(B) Hunt Days: Waterfowl: Saturdays, Sundays, and Wednesdays during open seasons. Pheasants: Every day during the first nine days of the pheasant season and on Saturdays, Sundays, and Wednesdays during the remainder of the pheasant season and on the day following Thanksgiving. Other authorized species: Daily during open seasons during the periods July 1 through September 15, and from the beginning of waterfowl season through March 31, except that hunt days are limited to waterfowl and pheasant hunt days during the waterfowl and pheasant season. Raccoons may not be taken during the waterfowl or pheasant seasons. When the wildlife area is closed to general use, hunting will not be allowed.

(C) Entry Permits and Day Use Pass Requirement for Public Access: A daily entry permit is required to enter the area to hunt during the waterfowl and pheasant seasons. A day use pass or annual pass is required of all users except for users that possess a valid California sport fishing license, hunting license, or trapping license, or users that are under 16 years of age. Organized youth or school groups must have prior approval from the area manager before being issued free daily entry permits by the appropriate regional office. Permits may be purchased at the entrance registration booth.

(D) Authorized Species: Waterfowl, snipe, coots, moorhens, pheasants, doves, raccoons, and rabbits.

(E) Camping and Trailers: Camping is allowed at the main office parking area only, and only during waterfowl and pheasant seasons and during organized events.

(F) Reservations: For Zone 6, each reservation assures entry of no more than two persons. For Zone 6J, and the Mud Slough Unit, each reservation assures entry of one adult and one junior hunter. Reservations for free roam hunting are good for up to all two adult hunters, who may be accompanied by up to two junior hunters or non–shooters. All person's entering on the same reservation will receive the same hunt assignment.

(G) Hunters may enter or exit only at designated locations. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited.

(H) Special Restrictions: Closed to all public uses from September 15 until the opening of waterfowl season. During the waterfowl and pheasant hunt seasons, the wildlife area will be closed to all public use, except for controlled hunting. However, wildlife observation may be allowed in authorized locations on Mondays, Tuesdays, Thursdays and Fridays dur-

ing waterfowl season. Dogs are not allowed in the interpretive viewing area at any time. The wildlife area may be closed to all public uses for seven days following the close of the waterfowl hunt season to allow for post season maintenance. Dogs must be on a leash from April 1 through June 30. Dog training and trials are allowed in designated areas only. Special permits are required to hunt Zone 6 and the Mud Slough Unit during the waterfowl season. When assigned blind sites, hunters shall shoot only from their assigned sites, except to retrieve downed birds. Horses are not allowed on the area. The cutting of woody stemmed plants is prohibited. Blinds may not be constructed or covered with plant material gathered from outside the wildlife area.

(64) Mendota Wildlife Area

(A) Ammunition Restrictions: A hunter shall not possess more than 25 shot shells while in the field during the waterfowl season.

(B) Hunt Days: Waterfowl, coots, and moorhens: Saturdays, Sundays, and Wednesdays during waterfowl season. Pheasants: Every day during the first nine days of the pheasant season and only on Saturdays, Sundays, and Wednesdays during the remainder of the pheasant season and on the day following Thanksgiving. Other authorized species: Daily during open seasons from July 1 through September 15, and from the beginning of waterfowl season through March 31, except that hunt days are restricted to waterfowl and pheasant hunt days during the waterfowl and pheasant season. Raccoons may not be hunted during the waterfowl season.

(C) Authorized Species: Waterfowl, snipe, coots, moorhens, pheasants, dove, rabbits, raccoons, and crows.

(D) Camping and Trailers: Allowed only at hunter checking station during waterfowl season.

(E) Special Restrictions: The wildlife area is closed to all public use from September 16, until the opening of waterfowl season, except the designated tour route and fishing site which are open all year. The wildlife area is closed to all public uses, except regulated hunting during the waterfowl and pheasant hunt seasons. The wildlife area will be closed to all public uses for several days following the close of the waterfowl hunt season to allow for post season maintenance. Dogs must be on a leash from April 1 through June 30. Horseback riding is allowed during the authorized dog trials only.

(65) Morro Bay Wildlife Area

(A) Ammunition Restrictions: Hunters shall not possess in the field more than 25 shot shells.

(B) Hunt Days: Waterfowl may be taken only from the opening day of brant season through the remainder of the waterfowl season.

(66) Moss Landing Wildlife Area

(A) Method of Take Restrictions: No rifles or pistols may be used or possessed.

(B) Hunt Days: Saturdays, Sundays, and Wednesdays during open seasons for authorized species. Campfires are prohibited.

(C) Authorized Species: Waterfowl, coots, and moorhens.

(D) Camping and Trailers: Not allowed.

(E) Special Restrictions: Closed to all hunting on New Years Day. The Salt Ponds are closed to hunting.

(67) North Grasslands Wildlife Area

(A) Ammunition Restrictions: A hunter shall not possess more than 25 shot shells while in the field during the waterfowl season, except on days when only upland game may be taken, and on special "youth only" waterfowl hunt days when there shall be no restrictions on the number of shot shells taken into the field.

(B) Hunt Days: Waterfowl, coots, and moorhens: Saturdays, Sundays, and Wednesdays during waterfowl seasons. Snipe may be taken on waterfowl and pheasant hunt days. Pheasants: Every day during the first nine days of the pheasant season and thereafter on Saturdays, Sundays and Wednesdays during the remainder of the pheasant season and on the day following Thanksgiving. Dove: Opening day of the early dove season, and from the first Saturday of the early dove season through September 15, and on pheasant and waterfowl hunt days during the late dove season. Rabbits: Daily during the open season from July 1 through September 15, and from the day after waterfowl season through the end of rabbit season, and on waterfowl and pheasant hunt days. Other authorized species: Daily during open seasons from July 1 through September 15, and from the beginning of waterfowl season through March 31, except that hunt days are restricted to waterfowl and pheasant hunt days during the waterfowl and pheasant season. Raccoons may not be hunted during the waterfowl season.

(C) Authorized Species: Waterfowl, snipe, coots, moorhens, pheasants, doves, raccoons, and rabbits.

(D) Camping and Trailers: Not allowed beyond checking station.

(E) Special Restrictions: Dogs must be on a leash from April 1 through June 30. Horseback riding is allowed for authorized dog trials only. Closed to all public use from September 15 to the opening of waterfowl season, and may be closed to all public uses for seven days following the close of waterfowl season to allow for post season maintenance.

(F) Reservations and Entry Permits: A type A permit is required for entry during waterfowl and pheasant seasons. All person's entering on the same reservation will receive the same hunt assignment.

(68) O'Neill Forebay Wildlife Area

(A) Method of Take Restrictions: Limited to shotguns and archery equipment. No shotgun slugs, rifles or pistols may be used or possessed.

(B) Hunt Days: Daily during open seasons for authorized species.

(C) Entry Permits: Self registration at the parking lot is required, except for junior pheasant hunts, and the day following the junior pheasant hunt, when capacity is controlled. Junior pheasant hunt permits shall be issued through a special drawing.

(D) Authorized Species: Waterfowl, pheasants, quail, doves, rabbits, and crows.

(E) Camping and Trailers: Allowed in parking lot only and in other designated locations inside the wildlife area during authorized trials.

(F) Special Restrictions: Dogs must be on a leash from April 1 through June 30. Horseback riding is allowed only during authorized dog trials. Motor vehicles are permitted only in designated areas and only during authorized dog trials. Hunting is permitted during daylight hours only.

(69) San Luis Obispo Wildlife Area

(A) Entry: No person shall enter the San Luis Obispo Wildlife Area except that portion of the area designated as a public shooting facility under supervision of the authorized rangemaster or with written permission from the regional manager.

(B) Period of Firearms and Archery Equipment Use: All year. No firearms or other propulsive devices of any kind may be possessed or discharged except at the designated shooting range at such time as the facility is open to the public and under the direction and control of the authorized rangemaster.

(C) Days of Operation: Wednesday through Monday, one–half hour before sunrise to one–half hour before sunset.

(D) Hours of Operation for Lighted Ranges: One–half hour before sunrise to 10:00 p.m.

(E) Fee: Daily range fees are required.

(F) Authorized Species: None.

(G) Camping and Trailers: Camping is restricted to the parking lot and not more than 30 vehicles may occupy the lot except under written permission of the regional manager.

(H) Special Restrictions: Alcoholic beverages may not be possessed or consumed on any part of the San Luis Obispo Wildlife Area by any person who officially acts as a rangemaster, or by any person who attempts to discharge a firearm or shoot an arrow.

(I) Ammunition restrictions: Full metal jacket bullets not allowed.

(70) San Luis Reservoir Wildlife Area

(A) Method of Take Restrictions: Limited to shotguns and archery equipment. No rifles or pistols may be used or possessed.

(B) Hunt Days: Daily during open seasons for authorized species.

(C) Authorized Species: All legal species.

(D) Entry Permit: Self registration at the parking lot on Dinosaur Point Road is required. Special permit, obtained by special drawing, is required

for all entry during the opening weekend of the Zone A general deer season.

(E) Camping and Trailers: Allowed in parking lot only.

(F) Special Restrictions: Dogs are not allowed for wild pig hunting. Horseback riding is not allowed. Motor vehicles are prohibited. Hunting is permitted during daylight hours only.

(71) Volta Wildlife Area (U.S. Bureau of Reclamation Lands)

(A) Method of Take Restrictions: Limited to shotguns and archery equipment. A hunter shall not possess more than 25 shot shells while in the field during the waterfowl season, except on days when only upland game may be taken, and on special "youth only" waterfowl hunt days when there shall be no restrictions on the number of shells taken into the field.

(B) Hunt Days: Waterfowl: Saturdays, Sundays, and Wednesdays during open seasons. Pheasants: Every Saturday, Sunday, and Wednesday during the pheasant season when the pheasant season occurs during the same period as waterfowl season. Other Authorized Species: Daily from July 1 through September 15, and from the beginning of waterfowl season through March 31 when in season, except that hunt days are restricted to waterfowl and pheasant hunt days during the waterfowl and pheasant season.

(C) Authorized Species: Waterfowl, snipe, coots, moorhens, pheasants, and rabbits. Rabbits may not be taken during the waterfowl season.

(D) Camping and Trailers: Allowed at checking station parking lot during waterfowl season only. Boat trailers are permitted beyond the checking station for the purpose of launching boats at designated areas. Permit holders may drive to designated parking areas during waterfowl and pheasant hunt seasons only. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited, except vehicles may be driven past parking lot 1 to launch boats.

(E) Special Restrictions: Closed to all public use from August 15 until the beginning of waterfowl season, except for fishing in the Volta Wasteway Channel. From September 15 through the Saturday following the end of waterfowl season, fishing is restricted to the Volta Wasteway Channel for a distance of one mile downstream of Ingomar Grade. The wildlife area is closed to all nonhunting uses during the waterfowl season. The cutting of woody stemmed plants is prohibited. Blinds may not be constructed or covered with plant material brought from outside the wildlife area.

(F) Reservation and Entry Permits: A type A permit is required for entry to hunt during the waterfowl and pheasant hunt seasons. All other users must self register at the fishing access booth. Persons entering together on a reservation will receive the same hunting assignment.

(G) Except during waterfowl and pheasant seasons, when hunting permittees are allowed to drive to designated parking areas, vehicle access is not allowed. Hunters may enter or exit only at designated locations. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited.

(72) West Hilmar Wildlife Area

(A) Method of Take Restrictions: No rifles or pistols may be used or possessed.

(B) Hunt Days: Daily during open seasons for authorized species.

(C) Authorized Species: Quail, doves, pheasants, rabbits, and waterfowl.

(D) Camping and Trailers: Not allowed.

REGION 5 AND REGION 6

(73) Baldwin Lake, San Bernardino National Forest

(A) Method of Take Restrictions: No rifles or pistols may be used or possessed.

(B) Hunt Days: Saturdays and Wednesdays during open seasons for authorized species.

(C) Reservations and Entry Permits: Waterfowl hunting reservations, which serve as entry permits, are required for the first seven hunt days (Saturdays and Wednesdays) of duck season. Beginning on the fourth Wednesday of the season, entry permits are not required.

(D) Authorized Species: Waterfowl, coots, and moorhens.

(E) Camping and Trailers: Not allowed.

(F) Special Restrictions: Shore hunting is not allowed. Hunting is permitted only from boats. All boats must be in and completely surrounded by water. All boats must be launched from the designated sites only. Hunting is permitted only in designated areas. A hunter shall not possess more than 25 shot shells while in the field.

(74) Hollenbeck Canyon Wildlife Area

(A) Method of Take Restrictions: No rifles or pistols may be used or possessed. No shotgun with a live round in the chamber may be possessed outside of the designated hunting zone except in the designated dog training area during the course of authorized dog training.

(B) Hunts Days: Daily during general season from September 1 through January 31 in designated area(s).

(C) Authorized Species: Upland game birds, American crow, coyote, and resident small game.

(D) Camping and Trailers: Camping and overnight use is not allowed, horse trailers are permitted within the designated parking area, if space is available.

(E) Fires: Not allowed year round.

(F) Dog Training: Allowed only in designated areas from September 1 through February. Only male ring–neck pheasants, male bobwhite quail, either sex feral pigeons, and male mallard ducks may be used for dog training purposes. Release or possession of female ring–neck pheasant, female bobwhite quail, female mallard, or any bird species is prohibited. It is unlawful to release or possess a male mallard duck without at least one wing clipped.

(G) Special Restrictions: Upland game and resident small game species may be taken only in designated areas. Horse and bicycle use is limited to designated trails and/or routes. Paint ball guns may not be used or possessed.

(75) Imperial Wildlife Area

(A) Wister Unit.

1. Ammunition Restrictions: A hunter shall not possess more than 25 shot shells while in the field during the waterfowl season.

2. Hunt Days: Waterfowl, coots, moorhens, and snipe: Saturdays, Sundays, and Wednesdays during open seasons. Snipe may also be taken on pheasant hunt days. Doves: Daily during the September dove season and on pheasant hunt days. Pheasants: Mondays and Thursdays during the pheasant season. Rabbits: Daily during season, except during the waterfowl season. Rabbits may also be hunted on pheasant hunt days. Quail: Only on pheasant hunt days. Raccoons: Daily from August 1 through one week before the waterfowl season.

3. Day Use Pass Requirement for Public Access: In addition to a daily entry permit required for hunting during the waterfowl and pheasant seasons, a day use pass or valid annual wildlife pass is required of all users, except for users who possess a valid California sport fishing license, hunting license, or trapping license or users who are under 16 years of age, or users who are part of an organized youth or school group and having free permits issued by the appropriate regional office.

4. Hunting Party Size and Restrictions: Waterfowl hunting parties may not exceed 6 individuals nor 4 adults. At the Union Tract and Hazard Unit each blind site will be limited to 4 individuals. At the Wister Unit of the Imperial Wildlife Area on waterfowl hunt days, 6 individuals are allowed per reservation with no more than 4 adults.

5. Authorized Species: Waterfowl, snipe, coots, moorhens, doves, pheasants, quail, rabbits, and raccoons.

6. Camping and Trailers: Limited camping in designated area. Campers must obtain a use permit daily. No unattached trailers or tents allowed on the checking station parking lot.

7. Special Restrictions: Waterfowl hunters must hunt from within 100 yards of assigned blind sites. Closed to all nonhunting uses from one week before waterfowl season through the last day of waterfowl season, except for designated wildlife viewing sites and designated fishing areas. Only hand–portable boats and only electric boat motors may be used.

(B) Finney–Ramer Unit

1. Method of Take Restrictions: No rifles or pistols may be used or possessed.

2. Ammunition Restrictions: A hunter shall not possess more than 25 shot shells while in the field during the waterfowl season.

3. Hunt Days: Daily during open seasons for authorized species during the period July 1 through January 31.

4. Day Use Pass Requirement for Public Access: Daily entry permits are required of all persons hunting or for other area uses. A day use pass or annual wildlife pass is required of all users except for users that possess a valid California sport fishing license, hunting license, or trapping license or users that are under 16 years of age, or users that are part of an organized youth or school group and having free permits issued by the appropriate regional office.

5. Checking Station: Entry permits are required and will be available at the self–service registration booths at both Finney and Ramer lakes on a first–come, first–served basis.

6. Authorized Species: Waterfowl, snipe, coots, moorhens, quail, doves, pheasants, rabbits, and raccoons.

7. Boats: Boats are required for waterfowl hunting; however, no motor–driven boats, except those with electric motors, shall be permitted.

8. Camping and Trailers: Allowed only in designated area at Finney Lake.

9. Special Restrictions: Waterfowl hunting is allowed only from boats and islands. Dog field trials are allowed only in designated areas.

(76) Perris Reservoir State Recreation Area

(A) Method of Take Restrictions: No rifles or pistols may be used or possessed.

(B) Hunt Days: Waterfowl, coots, moorhens, and snipe: Saturdays and Wednesdays during open seasons. Upland game: Daily during respective seasons that fall within the period from the first Saturday following Labor Day through January 31.

(C) Hunt Hours: Shooting times for migratory waterfowl, snipe, coots, and moorhens will be from one–half hour before sunrise until 12:00 noon. Upland game: as provided in the regulations.

(D) Entry Permit and Fee: Except for the recreation area day–use fees, there are no additional fees for waterfowl or upland game hunting.

(E) Authorized Species: Waterfowl, coots, moorhens, doves, pheasants, quail, and rabbits.

(F) Boats: Boat with motor required.

(G) Camping and Trailers: Not allowed on hunting area.

(H) Special Restrictions: Shore hunting for waterfowl, coots, and moorhens not allowed. Upland game may be taken only in designated areas. Fishing shall be permitted in the designated waterfowl hunting area only on non–shoot days.

(77) San Felipe Valley Wildlife Area

(A) Method of Take Restrictions: Use and possession of rifles and pistols may be prohibited in designated areas.

(B) Hunt Days: Daily from September 1 through January 31 and during the spring turkey season, when only turkeys may be hunted.

(C) Authorized Species: All legal species.

(D) Camping and Trailers: Not allowed.

(E) Special Restrictions: D–16 General Deer Zone Tags may not be used west of Highway S–2. Horse and bicycle use is limited to designated routes. Dog training is allowed only in designated areas from September 1 through February.

(78) San Jacinto Wildlife Area

(A) Davis Road Unit

1. Ammunition Restrictions: A hunter shall not possess more than 25 shot shells while in the field during the waterfowl season.

2. Hunt Days: Waterfowl, coots, and moorhens: Saturdays and Wednesdays during the duck season. Upland game: Daily during respective seasons that fall within the period July 1 through January 31. Pheasant: Mondays during the pheasant season.

3. Reservations, Entry Permits and Day Use Pass Requirements for Public Access: Reservations are available for waterfowl and pheasant hunting. In addition to a daily entry permit required for hunting waterfowl and pheasants, a day use pass or annual wildlife pass is required of all users except for users that possess a valid California sport fishing license, hunting license, or trapping license, or users that are under 16 years of age, or users that are part of an organized youth or school group and having free permits issued by the appropriate regional office.

4. Reservations: Each reservation shall assure entry for up to two adults and two holders of junior hunting licenses.

5. Authorized Species: Waterfowl, coots, moorhens, doves, quail, pheasants, snipe, and rabbits.

6. Camping and Trailers: Not allowed.

7. Special Restrictions: Upland game (doves, pheasants, quail, snipe, and rabbits) may be taken only in designated areas. A self–issued permit is required to enter the upland game hunting area.

(B) Potrero Unit

1. Camping and Trailers: Camping and overnight use is not allowed.

2. Any person within the unit shall have in his or her immediate possession a current valid day use pass for the Potrero Unit. No person may be within the boundaries of the unit during hours or dates that the unit is closed to unrestricted public access.

3. No motorized vehicles allowed except by written permission of the regional manager.

4. Bicycle use is limited to designated trails and/or routes.

5. No person shall enter or leave the unit except at designated entry and exit points.

6. Alcoholic beverages may not be possessed or consumed on the premises.

7. Paintball guns, parts or supplies may be not used or possessed.

8. Fires: Not allowed year round.

9. Dogs must be kept on a leash and under the immediate control of the owner or owner's designee, unless actively involved in legal hunting or other authorized activity.

10. Authorized Species: Upland game birds and resident small game.

11. Special Restrictions: Upland game and resident small game species may be taken only in designated areas unless otherwise restricted or limited within the unit.

(79) Santa Rosa Wildlife Area

(A) Hunt Days: Daily during open seasons for authorized species.

(B) Authorized Species: Deer, rabbits, and quail.

(C) Special Restrictions: No person, except authorized personnel, shall possess or discharge a firearm, bow and arrow, air or gas gun, spear gun, or other propulsive device of any kind on that portion of the Santa Rosa Wildlife Area lying within Fish and Game refuge District 4D (see Section 10837, Fish and Game Code).

NOTE: Authority cited: Sections 200, 202, 203, 355, 713, 1050, 1526. 1528, 1530, 1570–72, 1765 and 10504, Fish and Game Code. Reference: Sections 355, 711, 713, 1050, 1055.3, 1526, 1528, 1530, 1570–1572, 1764, 1765, 2006 and 10504, Fish and Game Code.

HISTORY

1. Repealer and new section filed 10–8–93; operative 10–8–93 pursuant to section 202 and 215, Fish and Game Code (Register 93, No. 41). For prior history, see Register 92, No. 43.
2. Amendment of section and NOTE filed 10–5–94; operative 11–4–94 (Register 94, No. 40).
3. Amendment filed 9–12–95; operative 9–12–95 pursuant to Government Code section 11343.4(d) (Register 95, No. 37).
4. Editorial correction adding inadvertently omitted subsection (q)(51)(B)5. (Register 96, No. 40).
5. Amendment of section and NOTE filed 10–1–96; operative 10–1–96 pursuant to Government Code section 11343.4(d) (Register 96, No. 40).
6. Amendment filed 10–3–97; operative 10–3–97 pursuant to Fish and Game Code sections 202 and 215 (Register 97, No. 40).
7. Amendment of subsection (q)(13)(D), subsection renumbering, and amendment of newly designated subsection (d)(2) filed 2–5–98; operative 3–1–98 pursuant to Fish and Game Code sections 202 and 215 (Register 98, No. 6).
8. Amendment of subsections (j)(2), (j)(4)–(5) and multiple subparts of subsection (q) filed 10–16–98; operative 10–16–98 pursuant to Fish and Game Code sections 202 and 215 (Register 98, No. 42).
9. Amendment of subsections (g)(2), (g)(4), (h)(3), (j)(4), (m) and multiple parts of subsection (q) and amendment of NOTE filed 10–6–99; operative 10–6–99 pursuant to Fish and Game Code sections 202 and 215 (Register 99, No. 41).

10. New subsection (*l*)(4), amendment of subsections (q), (q)(1)(A) and (q)(2)(D), repealer of subsections (q)(18)–(q)(18)(E), subsection renumbering, amendment of newly designated subsections (q)(25)(E) and (q)(35)(D) and new subsection (q)(38)(F) filed 9–28–2000; operative 9–28–2000 pursuant to Fish and Game Code section 215 (Register 2000, No. 39).
11. Amendment filed 10–23–2001; operative 10–23–2001 pursuant to Fish and Game Code sections 202 and 215 (Register 2001, No. 43).
12. Amendment of subsections (a)(2)(F)–(G), (f), (q), (q)(17)(D)1. and (q)(33)(E), new subsections (q)(35)–(q)(35)(E), subsection renumbering, amendment of newly designated subsections (q)(38)(D), (q)(45)(D), (q)(46)(B) and (D)–(F), (q)(60)(A)1. and 5., (q)(60)(B)1. and 6., (q)(62)(A) and (q)(63)(A)–(B) and (F)–(H), new subsection (q)(65)(F), amendment of newly designated subsections (q)(66)(A), (q)(67)(A), (q)(68)(A) and (D)–(G), and new subsections (q)(71)(A)–(G) filed 9–9–2002; operative 9–9–2002 pursuant to Fish and Game Code sections 202 and 215 (Register 2002, No. 37).
13. Amendment of subsections (h)(2), (i), (j)(5), (o)(3), (q) and (q)(10)(A), repealer of subsection (q)(10)(E), amendment of subsections (q)(11)(E), (q)(13)(E), (q)(15)(D), (q)(23)(A), (q)(23)(D)–(E) and (q)(26)(B)–(C), repealer of subsection (q)(26)(E), amendment of subsections (q)(27)(B), (q)(27)(E) and (q)(28)(D), new subsections (q)(35)–(q)(35)(C), subsection renumbering, amendment of newly designated subsections (q)(37)(C) and (q)(38)(B), repealer of newly designated subsection (q)(38)(E), amendment of newly designated subsections (q)(44)(B), (q)(44)(D)–(E), (q)(46)(D), (q)(47)(B), (q)(47)(F), (q)(61)(A)5., (q)(61)(B)6., (q)(63)(G), (q)(66)(E), (q)(67)(F), (q)(68)(F), (q)(75)(A) and (q)(75)(E), redesignation of former subsections (q)(75)(A)–(G) as new subsections (q)(76)(A)–(A)(7) and new subsections (q)(76)(B)–(B)11. and amendment of NOTE filed 11–4–2004; operative 11–4–2004 pursuant to Fish and Game Code section 215 (Register 2004, No. 45).
14. Change without regulatory effect amending subsections (g)(2), (g)(4) and (j)(2) filed 5–10–2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 19).
15. Amendment of subsection (e), repealer and new subsections (g)–(g)(4) and (j)(2), new subsections (j)(2)(A)–(D) and amendment of subsection (q) — San Luis Obispo Wildlife Area and (q)(59)(E) filed 8–4–2006; operative 8–4–2006 pursuant to Government Code section 11343.4 (Register 2006, No. 31).
16. Editorial correction removing duplicate subsections (g)(2)–(4) (Register 2006, No. 44).
17. New subsections (a)(2)(F) and (a)(2)(I), subsection relettering, amendment of subsection (b)(3), new subsection (b)(4), subsection renumbering, amendment of subsection (h)(3), and amendment of subsection (q) and its subsections filed 11–7–2007; operative 12–7–2007 (Register 2007, No. 45).
18. Amendment of subsection (j)(2) filed 12–14–2007; operative 1–13–2008 (Register 2007, No. 50).
19. Amendment of subsections (q)(1)(B), (q)(5)(B) and (q)(42)(B) filed 6–20–2008; operative 6–20–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 25).

§ 551.5. Merced National Wildlife Refuge Special Closure, Merced County.

NOTE: Authority and reference cited: Sections 1526, 1528, 1530 and 10504, Fish and Game Code, and the 1962 U.S. Statutes at Large, pg. 238, and existing agreements with the United States relating to the administration of federally owned or leased areas.

HISTORY

1. New section filed 8–18–82; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 82, No. 34).
2. Amendment filed 9–16–83; effective thirtieth day thereafter (Register 83, No. 38).
3. Repealer filed 10–17–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 42).

§ 552. Regulations for National Wildlife Refuges Where Hunting Programs are Administered by the Department of Fish and Game.

(a) The power to control entry on the federally owned areas listed in subsection 551(a)(2) is at the discretion of the Director of the U.S. Fish and Wildlife Service. The following lands owned by the U.S. Fish and Wildlife Service are open to hunting by the public under control of the California Department of Fish and Game.

(1) Colusa National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field.

(B) Hunt Days: Waterfowl, coots, moorhens, and snipe: Saturdays, Sundays, and Wednesdays during open seasons. Pheasant: Waterfowl hunt days during the pheasant season.

(C) Authorized Species: Waterfowl, coots, moorhens, snipe, and pheasants.

(D) Camping and tents not allowed. No person may build or maintain fires, except in portable gas stoves.

(E) Bicycles: Not allowed.

(F) Hunters may enter or exit only at designated locations. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited.

(G) Nonreservation Drawing: Nonreservation hunters may enter the drawing for either Colusa, Delevan, or Sacramento, but for not more than one location on any single hunt date.

(2) Delevan National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field.

(B) Hunt Days: Waterfowl, coots, moorhens, and snipe: Saturdays, Sundays, and Wednesdays during open seasons. Pheasant: First Monday of pheasant season and on waterfowl hunt days during the pheasant season.

(C) Authorized Species: Waterfowl, coot, moorhens, snipe, and pheasants.

(D) Nonreservation Drawing: Nonreservation hunters may enter the drawing for either Colusa, Delevan, or Sacramento, but for not more than one location on any single hunt date.

(E) Camping and tents not allowed. No person may build or maintain fires, except in portable gas stoves.

(F) Bicycles: Not allowed.

(G) Reservations: Each reservation assures entry of up to four individuals, whether adult hunters, junior hunters, or non–shooters.

(H) Special Restrictions: When assigned hunting sites, hunters shall hunt only within 100 feet of their assigned sites, except to retrieve downed birds. Pheasant hunting is not permitted in the assigned blind area except on the first Monday of the pheasant season.

(I) Hunters may enter or exit only at designated locations. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited.

(3) Kern National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field.

(B) Hunt Days: Waterfowl, coots, and moorhens: Saturdays and Wednesdays during open seasons. Pheasant: Waterfowl hunt days during the regular pheasant season.

(C) Authorized Species: Waterfowl, coots, moorhens, and pheasants. There shall be no hunting of common snipe.

(D) Camping and Trailers: Not allowed.

(4) Merced National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells per day.

(B) Hunt Days: Saturdays and Wednesdays during waterfowl season.

(C) Shooting Hours: Waterfowl shooting hours will be from one–half hour before sunrise until 12:00 noon.

(D) Authorized Species: Waterfowl, coots, and moorhens. There shall be no hunting of common snipe.

(E) Camping and Trailers: Not allowed.

(F) Bicycles: Allowed.

(G) Reservations: Each reservation assures entry of no more than three persons if three–person blinds are available, or no more than two persons, if two–person blinds are available. All person's entering on the same reservation will receive the same hunt assignment.

(H) Special Restrictions: Hunters must hunt from assigned blinds, except to retrieve downed birds.

(5) Sacramento National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field.

(B) Hunt Days: Waterfowl, coots, moorhens, and snipe: Saturdays, Sundays, and Wednesdays during open seasons. Pheasants: The first Monday of pheasant season and on waterfowl hunt days during the pheasant season.

(C) Authorized Species: Waterfowl, coots, moorhens, snipe, and pheasants.

(D) Nonreservation Drawing: Nonreservation hunters may enter the drawing for either Colusa, Delevan, or Sacramento, but for not more than one location on any single hunt date.

(E) Camping and tents not allowed. No person may build or maintain fires, except in portable gas stoves.

(F) Bicycles: Not allowed.

(G) Reservations: Each reservation assures entry of up to four individuals, whether adult hunters, junior hunters, or non–shooters.

(H) Special Restrictions: When assigned hunting sites, hunters shall hunt only within 100 feet of their assigned sites, except to retrieve downed birds. Pheasant hunting is not permitted in the assigned blind area except on the first Monday of the pheasant season.

(I) Hunters may enter or exit only at designated locations. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited.

(6) San Luis National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field.

(B) Hunt Days: Saturdays, Sundays, and Wednesdays during waterfowl season. Waterfowl hunting is prohibited on the West Bear Creek Unit prior to the third Saturday in November.

(C) Authorized Species: Waterfowl, coots, and moorhens. Hunting for pheasants will be allowed by permit only on designated days and areas at the Kesterson Unit on the first two days of pheasant season only, and at the San Luis Unit free roam area. Pheasant hunting is also allowed within the Kesterson Unit spaced blind area on the first Monday of the pheasant season only. Snipe hunting is allowed only within the San Luis Unit free roam area, and only on waterfowl shoot days when the area is open to hunting by adult license holders.

(D) Camping and Trailers: Not allowed on the San Luis, Blue Goose, and the west Bear Units of the San Luis National Wildlife Refuge.

(E) Bicycles: Allowed.

(F) Reservations: For the Kesterson and Blue Goose units, each reservation assures entry of no more than three persons if three–person blinds are available, or no more than two persons if two–person blinds are available. For the Freitas units (north and south), each reservation assures entry of one boat with up to four persons. All person's entering on the same reservation will receive the same hunt assignment.

(G) Special Restrictions: Hunters in the Kesterson and Blue Goose units must hunt from assigned blinds, except to retrieve downed birds. Hunters in free roam areas are not restricted to blinds. Freitas units are by boat only. Maximum boat speed may not exceed 5 mph. Inboard water thrust and air–thrust boats are prohibited. Construction of permanent blinds is prohibited. Cutting or breaking of woody vegetation is prohibited. All blinds and equipment must be removed following each day's hunt

(H) Hunters may enter or exit only at designated locations. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited.

(7) Sonny Bono Salton Sea National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field. Firearms must be unloaded when being transported between parking areas and blind sites.

(B) Hunt days: Saturdays, Sundays, and Wednesdays during open seasons.

(C) Authorized Species: Waterfowl, coots, and moorhens.

(D) Camping and Trailers: Not allowed.

(E) Special Restrictions: Hunters in the Hazard Unit shall hunt only from within 100 feet of their assigned blind sites or stakes, except to retrieve downed birds. Hunters in the Union Tract shall hunt only from within their blinds, except to retrieve downed birds.

(F) Blind Limitation: Not more than four individuals may occupy a blind site.

(8) Sutter National Wildlife Refuge.

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U.S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field.

(B) Hunt Days: Waterfowl, coots, moorhens, and snipe: Saturdays, Sundays, and Wednesdays during open seasons. Pheasant: Waterfowl hunt days during the pheasant season.

(C) Authorized Species: Waterfowl, coot, moorhens, snipe, and pheasants.

(D) Camping and tents not allowed. No person may build or maintain fires, except in portable gas stoves.

(E) Bicycles: Not allowed.

(F) Hunters may enter or exit only at designated locations. Stopping vehicles between designated parking areas to drop off passengers or hunting equipment is prohibited.

(9) Stone Lakes National Wildlife Refuge

(A) Area Firearms Restrictions: Shotguns and steel or other nontoxic shot approved by the U. S. Fish and Wildlife Service only. A hunter shall not possess more than 25 shot shells while in the field.

(B) Hunt Days: Wednesdays and Saturdays from 1/2 hour before sunrise to 12 noon.

(C) Authorized Species: Waterfowl, coots, moorhens and snipe.

(D) Reservations only, no non–reservations accepted or backfill.

(E) Camping and tents: Not allowed. No person may build or maintain fires.

(F) Decoy carts: Allowed.

(G) Bicycles: Not allowed.

(H) Reservations: Each reservation assures entry of up to two individuals per blind, except for the youth draw blinds on Saturdays which may include two youth hunters accompanied by one adult (only youth may apply). The pontoon boat for persons with disabilities is for use by one disabled hunter and one able bodied companion.

(I) Special Restrictions: When assigned hunting sites, hunters shall remain in the assigned blind unless placing decoys, traveling to and from parking area, retrieving downed birds or when shooting and retrieving crippled waterfowl.

(J) Hunting dogs must remain under leash or voice control at all times.

11. Amendment of subsections (a)(4)(A) and (a)(6)(G) and new subsections (a)(9)(A)–(J) filed 11–7–2007; operative 12–7–2007 (Register 2007, No. 45).

§ 553. Heenan Lake Wildlife Area.

For the purpose of controlling public use during the fishing season, permits are required as follows:

(a) Permits shall be issued only to holders of a valid California sport fishing license for persons 16 years of age and older. Persons under 16 years of age shall be accompanied by an adult legally responsible for him or her and said adult shall list each minor on the permit.

(b) Fishing permits shall be issued at offices of the Department of Fish and Game in Redding, Sacramento, Rancho Cordova, Bishop, Yountville, Fresno, Long Beach and at designated license agents in Markleeville.

(c) A fee of $3.00 shall be charged for each three–day weekend period for all persons 16 years of age or older.

(d) Only boats propelled by oars or electric motors may be used.

(e) Any portion of the Heenan Lake Wildlife Area may be closed to fishing or trespass by the Department by posting notice of the same.

NOTE: Authority cited: Sections 1526, 1528 and 1530, Fish and Game Code. Reference: Sections 1526, 1528 and 1530, Fish and Game Code.

HISTORY

§ 553.1. Clifton Court Forebay Waterfowl Public Shooting Area.

NOTE: Authority cited: Sections 1526–1530 and 10504, Fish and Game Code.

HISTORY

1. New section filed 8–24–71; effective thirtieth day thereafter (Register 71, No. 35).
2. Correctory amendment of subsection (f) filed 9–15–71 (Register 71, No. 41).
3. Amendment of subsection (i) filed 8–28–74; effective thirtieth day thereafter (Register 74, No. 35).
4. Repealer filed 8–27–76; effective thirtieth day thereafter (Register 76, No. 35).

§ 554. Cooperative Deer Hunting Areas.

To encourage the protection and enhancement of critical deer habitat, to provide added protection to landowners from depredations of trespassers and to provide greater access for the public to hunt on privately owned or controlled lands, the department may establish cooperative hunting areas and issue permits for the take of deer as specified subject to the following conditions:

(a) Definition and Scope. A cooperative deer hunting area is an area of private land located within critical deer habitat as determined by the department in deer quota zones (see Section 360) which require public drawings. The cooperative hunting area shall encompass not less than a total of 5,000 acres, except that such area may consist of neighboring lands not less than 640 acres in size under the control of one or more owners.

(b) Application Process. Application forms are available from the department's headquarters and regional offices. The applicant for a cooperative deer hunting area permit shall be an owner of said land. The completed application form and a completed one deer tag application for the appropriate deer zone shall be submitted to one of the following offices of the Department of Fish and Game:

Region 1, 601 Locust Street, Redding 96001 (530) 225–2300

Region 2, 1701 Nimbus Road, Rancho Cordova 95670 (916) 358–2900

Region 3, 7329 Silverado Trail, Box 47, Yountville 94599 (707) 944–5500

Region 4, 1234 East Shaw Avenue, Fresno 93710 (559) 243–4005

Region 5, 4949 View Ridge Avenue, San Diego 92123 (858) 467–4201

Region 6, 4775 Bird Farm Road, Chino Hills 91709 (909) 597–9823

The completed applications must be received prior to the first Friday in August. No individual may submit more than one cooperative deer hunting area application or deer tag application per deer season nor may there be more than two cooperative deer hunting area applicants for a given parcel of land. The department shall review the cooperative deer hunting application, verify the content thereof and certify that the lands consist of critical deer habitat prior to the issuance of a cooperative deer hunting area permit and deer tag.

Only those applications that are filled out completely will be accepted. Incomplete applications will be returned within 15 days of receipt by the department. There shall be no fee for a cooperative hunting area permit.

(c) A deer tag issued pursuant to the provisions of this section is valid only during the open deer season for the deer zone specified on the tag and may only be used on the lands specified in the landowner's application.

(d) All provisions of the Fish and Game Code relating to the take of birds and mammals shall be a condition of all permits and tags issued pursuant to this section.

(e) Any permit or tag issued pursuant to Section 554 may be cancelled or suspended at any time by the commission for cause after notice and opportunity to be heard, or without a hearing upon conviction of a violation of this regulation by a court of competent jurisdiction.

NOTE: Authority cited: Section 1572, Fish and Game Code. Reference: Sections 1570–1572, Fish and Game Code.

HISTORY

1. New section filed 6–29–83 as an emergency; effective upon filing (Register 83, No. 27). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 10–27–83. For prior history, see Register 81, No. 41.
2. Certificate of Compliance including amendments filed 9–30–83 (Register 83, No. 40).
3. Amendment of subsections (a) and (b) filed 8–9–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 32).
4. Editorial correction of subsection (b) filed 10–29–85; effective thirtieth day thereafter (Register 85, No. 44).
5. Amendment filed 7–17–87; operative 7–17–87 (Register 87, No. 29).
6. Amendment of subsection (b) filed 6–27–2000; operative 6–27–2000 pursuant to Fish and Game Code sections 202 and 205 (Register 2000, No. 26).

§ 555. Cooperative Elk Hunting Areas.

To encourage protection and enhancement of elk habitat and provide eligible landowners an opportunity for limited elk hunting on their lands, the department may establish cooperative elk hunting areas and issue license tags to allow the take of elk as specified in Section 364, and subject to the following conditions:

(a) Definition and Scope. A cooperative elk hunting area is an area of private land located within the boundary of an area open to public elk hunting (as identified in Section 364). Minimum size of a cooperative elk hunting area shall be 5,000 acres, except that contiguous parcels of at least 640 acres in size may be combined to comprise a cooperative elk hunting area. Within an area open to public elk hunting, the number of cooperative elk hunting license tags issued shall not exceed 20 percent of the number of public license tags for the corresponding public hunt and shall be of the same designation (i.e., antlerless, spike bull, bull or either–sex) as the public license tags. If the number of applicants exceeds the number of cooperative elk hunting license tags available, the department will issue license tags by random drawing from the pool of qualified applicants.

(b) Application Process. Application forms are available from the department's headquarters and regional offices. A person (as defined by Fish and Game Code Section 67) owning at least 640 acres within a cooperative elk hunting area shall be eligible to apply for a cooperative elk hunting area permit. Applicants shall designate one individual eligible to receive one elk license tag by the date indicated under subsection (3) below. Such individuals shall be California residents at least 12 years of age and possess a valid California hunting license. A person may annually submit a cooperative elk hunting area application where they own suffi-

cient habitat as described in subsection (a) above, for each public hunt area in which their property occurs.

(1) Applications shall be submitted to the department's regional office nearest the proposed cooperative elk hunting area. Department of Fish and Game regional offices are located as follows:

Northern California and North Coast Region, 601 Locust Street, Redding 96001 (530) 225–2300

Sacramento Valley and Central Sierra Region, 1701 Nimbus Road, Rancho Cordova 95670 (916) 358–2900

Central Coast Region, 7329 Silverado Trail, Box 47, Yountville 94599 (707) 944–5500

San Joaquin Valley and Southern Sierra Region, 1234 East Shaw Avenue, Fresno 93710 (559) 243–4005

South Coast Region, 4949 View Crest Avenue, San Diego 92123 (858) 467–4201

Eastern Sierra and Inland Deserts Region, 4775 Bird Farm Road, Chino Hills 91709 (909) 597–9823

(2) Completed applications must be received by the first business day following July 1. Only those applications that are filled out completely will be accepted. The Department will evaluate applications to determine if the specified parcels are of sufficient size within the boundary of a public elk hunt area, and contain important elk habitat. Rejected applications and those that are incomplete will be returned within 15 days of receipt by the department. If the number of accepted applications exceeds the license tags available, the department will determine successful applicants and a list of alternates by conducting a random drawing from the pool of qualified applicants as soon as possible after the application deadline.

(3) Successful applicants will be notified by the department as soon as possible after the application deadline. Applicants shall submit the name, address, and valid California hunting license number of designated elk license tag recipients and payment of elk license tag fees by check, money order, or credit card authorization in the amount specified by subsection 708(d), to the department's regional office nearest the proposed cooperative elk hunting area, by the first business day following August 1.

(c) An elk license tag issued pursuant to the provisions of this section is valid only during the general elk season in which the cooperative elk hunting area occurs and shall only be used on land specified in the landowner's application. License tags are not transferable.

(d) All provisions of the Fish and Game Code and Title 14, CCR, relating to the take of birds and mammals shall be conditions of all license tags issued pursuant to this section.

(e) Any permit issued pursuant to Section 555 may be canceled or suspended at any time by the commission for cause after notice and opportunity to be heard, or without a hearing upon conviction of a violation of this regulation by a court of competent jurisdiction.

NOTE: Authority cited: Section 1572, Fish and Game Code. Reference: Sections 67 and 1570–1572.

HISTORY

1. New section filed 6–27–2000; operative 6–27–2000 pursuant to Fish and Game Code sections 202 and 205 (Register 2000, No. 26).
2. Amendment filed 6–28–2002; operative 6–28–2002 pursuant to Fish and Game Code sections 202 and 215 (Register 2002, No. 26).

Chapter 9. Shooting Clubs

§ 600. Licensed Game Bird Clubs.

No licensed game bird club utilizing domestically reared game birds may be operated in this state except under a license issued by the department and under the provisions of this section. Domestically reared game birds include only the following: Pheasants of the species *Phasianus colchicus*, including all ring–necked pheasant races, Indian chukar, domestically reared wild turkey, Hungarian partridge, bobwhite quail, Coturnix quail, and other such species as may be designated by the Fish and Game Commission.

(a) General Provisions for All Licensed Game Bird Clubs, Including Zone A and B Clubs.

(1) Licensed Provisions.

(A) Application Form. Application for a game bird club license shall be made on LICENSED GAME BIRD CLUB APPLICATION, Form LGBC 600 (5/95), which is incorporated by reference herein. Application forms are available from the Department of Fish and Game, License and Revenue Branch. The application form shall be completed in its entirety and submitted to the License and Revenue Branch. The approved application form (LGBC 600) shall be kept with the shooting permit records for the licensed area and shall be open to inspection.

(B) Signing of Application. Applications shall be signed by the applicant. If the applicant is a corporation, the application shall be signed by any one or more duly authorized officers of the corporation. If the applicant is a partnership, the application shall be signed in behalf of the partnership by any one or more of the general partners. If the applicant is a person, doing business under a business name, the application shall be signed by such person accompanied by a statement of the name under which business is being done.

(C) Inspection Requirement. The department may inspect each tract proposed for licensing to determine if it is suitable for a licensed game bird club.

(D) Licensed Area. A licensed game bird club shall include the total area within the exterior boundary.

(E) Map Requirement for New Areas or Boundary Changes. Applications for new areas and those involving a boundary change must include a current 7.5 minute U.S. Geological Survey topographic map denoting the boundaries of the proposed area or areas.

(F) Transfer of License. The department may transfer a license to other land owned or controlled by a licensee if the land is located in the same county as the land specified in the original application, if the new land is suitable for the purposes of the license. A transfer of license may not require an additional fee but may require a department inspection to determine if the above provisions are satisfied.

(G) Proof of Hunting Rights. Applications involving lands not owned by the applicant must include written verification that the applicant has acquired exclusive hunting rights on the land in question for the total period of the license.

(H) Term of License. A game bird club license shall be issued for a period of one year from August 1 to July 31, or for the remainder of the period if issued after August 1.

(I) License Fees. The base license fee shall be $280 for game bird clubs over 500 acres in size and $210 for game bird clubs of 500 acres or less. These fees shall be annually adjusted pursuant to Section 713 of the Fish and Game Code.

(J) Request for Cancellation of License. A licensee shall request that his/her license be cancelled. This request must be made in writing to the department's License and Revenue Branch (see subsection (a)(1)(A)). The license fee shall not be refunded for a cancelled license.

(K) License Revocation or Suspension. The department may revoke, suspend or decline to renew a license for failure to comply with the provisions of a license or failure to comply with these regulations. Any person whose license is revoked or suspended may request a hearing before the commission to show cause why his/her permit should not be revoked or suspended.

(2) Posting of Area. Every game bird club shall be posted on the exterior boundary with signs of a size not less than 8 1/2 by 11 inches at intervals of at least three (3) to the mile and at all corners and entrances. The signs shall include the name of the club and the words: "private licensed game bird club or private licensed pheasant club—authorized under regulations of the Fish and Game Commission—no trespassing." These signs shall be visible at least twenty–five (25) feet from the boundaries of such club. The department shall not furnish such signs. Signs shall be removed prior to September 15 of the succeeding year if no license is granted for that year.

(3) Compliance Requirement. It is unlawful to shoot, attempt to shoot, or otherwise take any game bird on the premises of any licensed game bird club unless the provisions of this Section 600 have been complied with. The department may inspect the premises of each licensed area to determine whether or not the licensee has complied with these regulations.

(4) Shooting Permit Requirement. No person may hunt domestically reared game birds on a licensed game bird club without having in possession a valid hunting license, a valid upland game bird stamp and a valid game bird club shooting permit issued by the licensee or an agent authorized by the licensee (see subsection (a)(9)). The shooting permit shall include the following information: name, hunting license number, and date(s) permit is valid.

(5) Daily Log Sheets. Every hunter on a licensed game bird club shall sign in on a daily log sheet at the location designated on the license application prior to going afield in pursuit of domestically reared game birds.

(6) Shooting Records. Licensees shall maintain a record for each shooting day on forms supplied by the department. LICENSED GAME BIRD CLUB MONTHLY REPORT, Form LGBC 600B (5/97), which is incorporated by reference herein, and shall make entries on the record for each shooting day.

(7) Shooting Records Maintenance. Shooting permit records and other records required by these regulations shall be open to inspection by the department on shooting days at a designated site identified in the license application. During the balance of the shooting season, these records shall be available for inspection by the department from the licensee or authorized agent. Records must be retained for inspection for a period of one year after the close of the shooting season. The licensee shall submit all of the LGBC 600B forms provided by the department showing the daily and monthly numbers of each species released and taken. The report shall be sent to the Department of Fish and Game, at an address to be determined by the Department, within thirty (30) days after shooting has ceased, and the licensee shall maintain a legible copy of such record.

(8) Seal Requirement.

(A) Seals shall be affixed by the licensee, or an authorized agent, to all pheasants, chukars, and turkeys taken on a licensed game bird club area. Seals shall be applied immediately upon the hunter's return to club headquarters. Seals shall remain attached to the birds until they are finally prepared for consumption. Seals shall be supplied by the department at a fee of five cents ($0.05) each. These seals shall be purchased and located on the club area prior to the taking of any released birds. Seals may be obtained from the department's License and Revenue Branch (see subsection (a)(1)(A)).

(B) Seals shall be affixed to bagged pheasants, chukars, and turkeys only. Seals shall be affixed only by the licensee or an authorized agent.

(C) The licensee must account for all used and unused seals upon request by the department. The licensee is required to destroy all unused seals at the end of each season.

(D) There shall be no refund of money for unused seals.

(E) Seals are not transferable and shall be used only on the licensed club to which they are issued.

(F) Seals are not required for domestically reared game birds other than pheasant, chukar, and turkey.

(9) Authorized Agents. The licensee may appoint authorized agents to serve in his/her capacity. An authorized agent must be 16 years of age or older. The applicant shall declare the intended authorized agents on LICENSED GAME BIRD CLUBS – AUTHORIZED AGENTS, (Form LGBC 600A), which is incorporated by reference herein, and post the form at the club headquarters for the duration of the season.

(10) Liberation of Birds.

(A) The department may require the licensee to deliver birds to the licensed area for inspection and/or banding. If banding is required the licensee or authorized agent shall remove all leg bands from birds killed on the licensed game bird club and return them to the department's Wildlife Management Division (see subsection (a)(7) for address).

(B) At time of release, all birds shall be full-winged and otherwise in condition to go wild. Birds that are altered in any manner which would, in the opinion of the department, render them incapable of surviving in the wild, or which are diseased, or show evidence of malnutrition, shall be rejected for release.

(C) Approval for the release and take of domestically reared wild turkeys will not be granted in areas where wild turkeys have been released by the department or where a population of wild turkeys exists.

(11) Shooting Hours.

(A) The shooting hours for taking domestically reared game birds on licensed game bird clubs shall be from one-half hour before sunrise to one-half hour after sunset.

(12) Conduct of Hunters. The licensee or authorized agent, of a licensed game bird club, may refuse to issue a permit to any person who in his/her opinion is intoxicated or handles firearms in a careless and dangerous manner. The licensee, or authorized agent, may also revoke forthwith the permit of any hunter who endangers the safety of other hunters, destroys or endangers property on the club or fails to attempt to recover crippled or dead birds which he/she has shot or violates any fish and game regulations.

(13) Laws and Regulations For Game Other Than Domestically Reared Game Birds. Game other than domestically reared game birds may be taken on a licensed game bird club under the laws and regulations applying to the state at large, including daily bag limits.

(14) Prohibition on Removal of Domesticated Game Birds Taken By Means Other Than Hunting. No game birds killed in any manner other than by hunting by legal methods shall be removed from the premises of any licensed game bird club. It shall be unlawful to sell or buy or attempt to sell or buy any domestic game birds taken from such club.

(15) Disease Prevention. Birds being reared for release by the licensee on a licensed game bird club or at an off-site location shall be maintained under conditions which are not conducive to the spread of diseases. Rearing facilities shall be subject to inspection by the department.

(16) Game Bird Purchase Records. The licensee shall retain copies of all game bird purchase invoices. A copy of these records shall be available for inspection during the license year. Information concerning the date and number of birds delivered shall be recorded on all invoices. All pens and birds may be inspected by the department at any time. A department employee may witness all releases.

(17) Use of Dogs. Hunters are encouraged to utilize retrieving dogs while in the field to assist in the recovery of downed birds. Hunters shall make a reasonable effort to locate all downed birds consistent with sections 203.1 and 4304 of the Fish and Game Code. For hunters without retrieving dogs, the licensee may provide dogs and accompanying handlers. No dog handler may serve as a guide and the use of dogs on licensed game bird clubs does not constitute guiding, as defined in Section 2535 of the Code.

(b) Zones for Licensed Game Bird Clubs. For the purpose of hunting domestically reared game birds, the state is divided into Zone A and Zone B. Clubs licensed in these areas shall be known as Zone A and Zone B licensees, respectively.

(1) Zone A Licensed Game Bird Clubs.

(A) Zone A Defined. Zone A consists of the following area: San Joaquin-Sacramento Valleys; within a line beginning at the junction of State Highway 41 and Interstate Highway 5 northerly on Interstate Highway 5 to the junction of Washoe Avenue; northerly along Washoe Avenue to California Avenue (Panoche Road); westerly along California Avenue (Panoche Road) to Interstate Highway 5; northerly along Interstate Highway 5 to the Delta-Mendota Canal crossing; northerly and westerly along said canal to the crossing of the Southern Pacific Railroad tracks (about five (5) miles south of Byron); northwesterly along said railroad to its intersection with State Highway 4 at Brentwood; north and west along said State Highway 4 to its intersection with State Highway 84; along said State Highway 84 to the Sacramento-Contra Costa county line on the Antioch Bridge; westerly along the Sacramento-Contra Costa county line to its intersection with the Solano County boundary; northeasterly along the Sacramento County-Solano County line to Cache Slough; northwesterly along the South bank of Cache Slough to Haas Slough; northerly along the south bank of Haas Slough to its intersection with the Sacramento Northern Railroad tracks; northeasterly along the Sacramento Northern Railroad tracks to Bunker Station; westerly along the Bunker Station-Binghampton Road to State Highway 113; northerly along State Highway 113 to Hawkins Road; westerly along Hawkins

[The next page is 164.3.]

Road to Leisure Town Road; southerly along Leisure Town Road to Cooper School Road; westerly along Cooper School Road to Nut Tree Road; northwesterly along Nut Tree Road to Interstate Highway 80; southwesterly along Interstate Highway 80 to the range line between R1W and R2W; northerly along said range line to the Pacific Gas and Electric Pit Vaca Dixon electrical transmission lines approximately six (6) miles north and east of the town of Capay; northwesterly along west right-of-way boundary of the said Pacific Gas and Electric transmission lines to the township line between T15N and T16N; northerly along the west right-of-way boundary of said transmission line to the Tehama County line; easterly along the Tehama-Glenn county line to the Sacramento River; northerly along the Sacramento River to the Tehama-Butte county Line; easterly along the Tehama-Butte county line to U.S. Highway 99; southeasterly along 99E through Chico to the junction of State Sign Route 162; southeasterly along State Sign Route 162 to the junction of State Highway 70; southeasterly on State Highway 70 to the township line between T18N and T19N; easterly on said township line to the Oroville-Bangor Highway; southeasterly on the Oroville-Bangor Highway to Bangor on the section line between Section 27 and Section 28, T18N, R5E; south on said section line to the township line between T18N and T17N; east on said township line to the range line between R5E and R6E; south on said range line to State Highway 20; easterly along said Highway 20 through Smartville to the common boundary between Nevada an Yuba counties; south along this boundary to Placer County; east along the common boundary of Nevada and Placer counties to the range line between R6E and R7E; south along said range line to the township line between T11N and T10N; east along this township line to the common boundary between Placer and El Dorado counties; south along said boundary to the common boundary between Sacramento and El Dorado counties; southeasterly along said boundary between Sacramento and El Dorado counties, Sacramento and Amador counties, San Joaquin and Amador counties, San Joaquin and Calaveras counties; southerly along the San Joaquin-Stanislaus county line to State Highway 4; easterly on State Highway 4 to Milton Road; southerly on Milton Road to its junction with Sonora Road; southeasterly along Sonora Road to Knights Ferry; southerly along the Knights Ferry-LaGrange Road to Warnerville; southerly along Crabtree Road to Turlock Lake State Park; southerly on Roberts Ferry Road to its intersection with Lake Road; westerly on Lake Road to Hawkins Road; southerly on Hawkins Road to Keyes Road; easterly on Keyes Road to its intersection with Cox Ferry Road; southerly along Cox Ferry Road and State Highway 59 to the Santa Fe Railroad tracks; southerly along the Santa Fe Railroad tracks through Planada and LeGrand to its intersection with State Highway 145; southwesterly along State Highway 145 to U.S. Highway 99; southerly along U.S. Highway 99 to State Highway 41; then southwesterly along State Highway 41 to the point of beginning.

(B) Shooting Season. The Zone A shooting season for pheasants shall commence on the Saturday nearest the 15th day of October and extend for 114 consecutive days. For all other domestically reared game birds, the Zone A shooting season shall be from September 1 to March 31 of the following year.

(C) Limitation on Pheasants Taken. At no time shall the number of pheasants taken on a Zone A licensed game bird club exceed 80% of the total number of pheasants previously released on the licensed area during the license year and up to 12 days prior to the season. Such birds must be released under the provisions of a current game bird club license.

(D) Daily Bag Limit. There is no daily bag limit for domestically reared game birds on a Zone A licensed game bird club.

(E) Unused Seals. Unused seals shall not be given to hunters.

(F) Headquarters and Travel Route. A headquarters building, housetrailer, or site for record inspection shall be maintained for each licensed game bird club during the shooting season. The location of the building, housetrailer, or site must be designated on the license application. No shooting permits shall be issued or birds taken until such headquarters has been established. When hunters, in order to travel between headquarters and the licensed hunting area, must travel off the licensed hunting area, the applicant must include in his application a request for an authorized travel route. Such route shall not exceed 10 miles. Firearms must be unloaded in conformance with state law while hunters are using such authorized travel route. The travel route must be included in the application and indicated on the map to scale required in the application. The headquarters and authorized travel routes shall be considered part of the licensed premises for the requirements of sealing birds, but shall not affect the gross area of the club.

(2) Zone B Licensed Game Bird Clubs.

(A) Zone B Defined. Zone B consists of the remainder of the state not included in the area described in subsection (b)(1)(A) above (Zone A).

(B) Shooting Season. The Zone B shooting season shall commence on September 1 and close on May 31.

(C) Release of Pheasants Required. Pheasants may not be taken on a Zone B licensed pheasant club unless domestically reared pheasants have previously been released on the licensed area during the current license year. The take of pheasants shall at no time exceed the number previously released during the current license year.

(D) Limitation on Birds Taken. The total number of pheasants which may be taken on a Zone B licensed game bird club shall not exceed the number of pheasants released on the licensed area during the license year.

(E) Daily Bag Limit. There is no daily bag limit for domestically reared game birds on a Zone B licensed game bird club.

(F) Unused Seals. Unused Zone B seals may be possessed only by the licensee or a duly authorized agent.

(G) Headquarters and Travel Route. A headquarters building, housetrailer, or site for record inspection shall be maintained for each licensed game bird club during the shooting season. The location of the building, housetrailer, or site must be designated on the license application. No shooting permits shall be issued or birds taken until such headquarters has been established. When hunters, in order to travel between headquarters and the licensed hunting area, must travel off the licensed hunting area, the applicant must include in his application a request for an authorized travel route. Such route shall not exceed 10 miles. Firearms must be unloaded in conformance with state law while hunters are using such authorized travel route. The travel route must be included in the application and indicated on the map to scale required in the application. The headquarters and authorized travel routes shall be considered part of the licensed premises for the requirements of sealing birds, but shall not affect the gross area of the club.

2. Certificate of Compliance—Section 11422.1, Gov. Code, filed 2–9–68 (Register 68, No. 6).
3. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
5. Repealer filed 6–30–95; operative 7–1–95 pursuant to Fish and Game Code section 3270 (Register 95, No. 26).

§ 600.4. Licensed Domesticated Migratory Game Bird Shooting Areas.

Pursuant to the provisions of Section 3300 of the Fish and Game Code, licenses to operate licensed domesticated migratory game bird shooting areas may be issued by the Department of Fish and Game on the following terms:

(a) Application Requirements.

(1) If the application indicates that the property upon which a licensed domesticated migratory game bird shooting area is to be operated does not belong to the applicant, he shall declare in the application that he has acquired from the landowner exclusive hunting rights on the said property during the license period. The department may at its discretion require the applicant to provide written verification that he has acquired such hunting rights.

(2) Application shall be made on forms supplied by the department.

(3) Applications shall be signed by the applicant. If the applicant is a corporation the application shall be signed by any one or more duly authorized officers of the corporation. If the applicant is a partnership, the application shall be signed in behalf of the partnership by any one or more of the general partners. If the applicant is a natural person, doing business under a fictitious name, the application shall be signed by such natural person accompanied by a statement of the fictitious name under which he is doing business.

(4) Appearance of Representative of Applicant. Whenever it appears to the commission, on information furnished by the department, that a licensee has not complied with all of the terms and conditions of his permit, no license shall be issued to such licensee for the following year unless he supports his application for renewal of his license by an appearance before the commission in person or by an authorized representative and presents evidence which, in the opinion of the commission, constitutes a justifiable excuse for his failure to satisfy the conditions of his permit during the preceding license year. Unless the commission is thus satisfied, no license shall be issued to the applicant for the period covered by the application.

(5) License Withdrawal. The department may, in its discretion upon written application by the licensee, allow the licensee to withdraw from his license. In the application the licensee shall state the reasons for his request. The license fee shall not be refunded once the license has been issued.

(b) Suitability of Area for Use as Licensed Domesticated Migratory Game Bird Shooting Area. No license for a licensed domesticated migratory game bird shooting area shall be issued until an investigation has been completed by the department and the department has determined that the property is suitable for the purpose of a licensed domesticated migratory game bird shooting area. The department shall base its determinations on whether or not the proposed shooting area will cause conflicts with wild migratory game bird hunting, that the establishment of the shooting area will be in the public interest, and that the operation of a licensed domesticated migratory game bird shooting area at the location specified in the application will not have a detrimental effect upon wild migratory game birds. In the event the license is refused by the department the applicant shall have the right of appeal to the Fish and Game Commission.

(c) Signs. Licensed domesticated migratory game bird shooting area signs shall be posted by the licensee as required by Section 3301 of the Fish and Game Code. Such signs shall be removed prior to September 15 of the succeeding year if no license is granted for that year.

(d) Inspection of Licensed Premises and Domesticated Migratory Game Birds.

(1) The premises where domesticated migratory game birds are held for the purpose of shooting shall be inspected by the Department of Fish and Game for health of birds and sanitation of facilities. Licensees shall pay the department an inspection fee of two cents ($0.02) for each migratory game bird raised or imported for shooting purposes.

(2) Every person who brings or causes to be brought into this state live domestically reared migratory game birds for shooting purposes shall have such birds inspected for disease and health conditions at the point of origin by a licensed veterinarian. A certificate stating that the birds are disease free and signed by a licensed veterinarian, and endorsed by a federal veterinarian, will be forwarded to the Department of Fish and Game for each shipment of birds. Any shipment of birds not accompanied by a certificate of inspection shall be destroyed or returned to the place of origin by the importer at his sole cost and responsibility.

(e) Shooting Season. The season during which shooting shall be permitted shall be for the period September 1 through May 31.

(f) Shooting Hours. Shooting hours for taking domesticated migratory game birds on licensed areas shall be from one–half hour before sunrise to sunset.

(g) Methods of Take. Domesticated migratory game birds may be taken on licensed areas only by the following equipment or methods:

(1) Shotguns 10 gauge or smaller using shotshells only and incapable of holding more than three shells in the magazine and chamber combined;

(2) Muzzle–loading shotguns;

(3) Falconry;

(4) Long bow and arrow;

(h) Reports and Records. Licensees shall maintain on forms supplied by the department an up–to–date record of the number of domesticated migratory game birds taken and the number of hunters using the area. Such original record shall be submitted to the Department of Fish and Game, Wildlife Protection Branch, 1416 Ninth Street, Sacramento, California 95814, within ten (10) days after the close of each month during the shooting season, and the licensee shall retain a legible copy of such records. Such records shall be open to inspection at the area headquarters on shooting days, at the club headquarters or in the possession of the licensee or his agent during the balance of the shooting season, and at a location specified by the licensee for one year thereafter. Such records shall be open to the inspection at any time during these periods by authorized representatives of the department.

(i) Seals on Birds Killed.

(1) Seals, as required by Section 3309 of the Fish and Game Code, shall be affixed by the licensee or his agent to all domesticated migratory game birds taken on the licensed area before such birds are removed from the licensed area. Unused seals shall not be given to shooters. These seals shall be of a type approved by the Fish and Game Commission and shall be purchased at a cost of five cents ($0.05) each prior to the taking of any domesticated migratory game birds on the license area.

(2) All seals must be accounted for by the licensee whenever requested by the department, and at the end of the domesticated migratory game bird shooting area season unused seals shall be returned to the department with the final report. There shall be a refund of money for all returned unused seals.

(3) Seals are not transferable and shall be used only on the licensed domesticated migratory game bird shooting area for which issued.

(j) Posting of Laws and Regulations. Each licensee shall post a complete copy of the licensed migratory game bird shooting area laws and regulations in the area headquarters where they may be read by any person using the facilities of the area. An appropriate copy of the laws and regulations will be furnished to each licensee by the department.

NOTE: Authority cited: Sections 200, 202, 219, 355, 356, 3000, 3302 and 3303, Fish and Game Code. Reference: Sections 200, 202, 219, 355, 356, 3000, 3300–3311 and 3500, Fish and Game Code.

HISTORY

1. New section filed 11–4–70 as an emergency; effective upon filing (Register 70, No. 45).
2. Certificate of Compliance—sec. 11422.1, Gov. Code, filed 1–26–70 (Register 71, No. 5).
3. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
5. New subsection (k) filed 10–19–87; operative 10–19–87 (Register 87, No. 43).
6. Amendment of subsection (b) filed 11–4–93; operative 11–4–93 pursuant to Fish and Game Code sections 202 and 215 (Register 93, No. 45).
7. Change without regulatory effect amending subsections (g) and (k) (5) filed 3–28–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 13).
8. Repealer of subsections (k)–(k)(7) filed 9–23–96; operative 9–23–96 pursuant to Fish and Game Code sections 202 and 215 (Register 96, No. 39).

§ 601. Enhancement and Management of Fish and Wildlife and their Habitat on Private Lands.

(a) Definition and Scope: A Private Lands Wildlife Habitat Enhancement and Management Area, (Herein after referred to as a Private Wildlife Management Area) is an area of private lands for which the landowner or their designee has completed and implemented a wildlife habitat enhancement and management plan that actively encourages the propagation, conservation and wise use of the fish and wildlife populations on their land. Such areas shall be licensed annually by the commission.

(b) Application Process:

(1) Application Form and Management Plan: The applicant for a license to operate a Private Wildlife Management Area shall submit the appropriate completed application, as specified in Section 702, and any accompanying additional documentation to the department, at the appropriate regional office as listed on the application. An initial applicant shall include three copies of a general management plan containing at least the following information:

(A) A legal description of the land to be included in the Private Wildlife Management Area. Four original USGS quadrangle maps or equivalent maps showing the boundaries of the Private Wildlife Management Area, access roads, any public lands within and/or adjacent to the Private Wildlife Management Area and all structures and facilities, shall be submitted with the original application;

(B) An estimate of the wildlife and habitats present within the Private Wildlife Management Area, including an indication of animal distribution and habitat condition based on the California Wildlife Habitat Relationships Database System;

(C) A statement of management objectives;

(D) A detailed description of proposed management actions that are intended to achieve the management objectives;

(E) The county General Plan land use designation for the Private Wildlife Management Area.

(2) Applicants shall be individuals or corporate landowners or their designee.

(3) Applications submitted by person(s) other than the landowner shall be approved and signed by the landowner(s).

(4) License Fees: A nonrefundable fee for the purposes of management plan review by the department shall be submitted with the application for a revocable Private Wildlife Management Area license. The fee as specified in Section 702 will be based on the size of the Area as follows:

(A) less than 5000 acres

(B) 5,001 to 10,000 acres

(C) 10,001 to 15,000 acres

(D) greater than 15,001 acres

This application fee is established pursuant to Section 3402(b) of the Fish and Game Code. Payment of the application fee does not constitute acceptance into the program. The Private Wildlife Management Area license shall be valid for five years during the period from July 1 through June 30, and subject to annual review and renewal by the commission. The application fee covers the initial five–year license period. A fee shall be submitted, based on the size of the area, with the license renewal application at the beginning of each subsequent five year period. This license shall be in place of any other license that may be required of private landowners by the Fish and Game Code or regulations made pursuant thereto. This section shall not, however, be construed to exempt anyone from any requirement pertaining to hunting and sport fishing licenses and stamps.

The department will screen each application for compliance with these regulations. Applications that do not provide the information required, will be rejected and returned to the applicant. Any individual whose application has been rejected by the department may appeal that decision to the commission. Applications accepted by the department will be forwarded for commission review and approval.

(5) Issuance of Area License: Upon approval of the general management plan, the department, with approval of the commission, shall issue a license for the taking of any fish, game bird or mammal in said Private Wildlife Management Area pursuant to the regulations of the commission and the terms and conditions of the permit, which may supersede Fish and Game Code Section 331(a) and (b) as it pertains to resident hunters and license tag fees for antelope, Section 332(b) and (c) as it pertains to resident hunters and license tag fees for elk, and sections 457–459, related to antlerless and either sex deer.

(A) During the initial license year, the take of antelope or elk, will not be authorized, nor shall deer be taken except during the general open season, consistent with the bag and possession limits for the deer hunting zone in which the Area is located, unless otherwise stipulated by the com-

mission. This provision does not apply to renewed licenses provided that the Private Wildlife Management Area has been continuously licensed in the Private Lands Wildlife Habitat Enhancement and Management Program. Upon satisfactory completion of the first year management actions identified in the plan for the Private Wildlife Management Area, the commission may authorize seasons and bag limits which differ from those established for the general seasons. Hunting must be consistent with the management plans prepared for that area or herd and should not result in an overall negative effect on the species population or herd being hunted as determined by the department.

(6) Annual Review: Annual renewal applications must be submitted to the department no later than March 1. The annual renewal application shall contain a summary of habitat enhancement and management activities, harvest, and full payment of fees for the preceding year. The department shall review each plan to determine that the licensee has fulfilled the obligations as prescribed in the management plan. The annual review shall evaluate the following:

(A) Results of activities carried out during the preceding year, including habitat improvement, wildlife production and population levels, hunter use and harvest of wildlife, including an accurate account of all hunting permits, seals and big game tags;

(B) Recommended changes in the general management plan.

(c) Tags and Seals:

(1) Possession of Tags and Seals: Every person hunting on a Private Wildlife Management Area shall have in their immediate possession a valid California hunting license and the appropriate tag or seal issued by a licensee or their authorized agent. Tags shall be filled out by hunters before hunting. The tags or seals shall permit hunting for the period specified, or until revoked by the licensee or the department. Hunting permittees shall only take or possess those species and number of each species as specified by their hunting tags or seals as approved in the management plan. This does not apply to species not included in the management plan which may only be taken in accordance with the provisions of Part 2, Chapters 1–7, and 9 of these regulations and sections 4331 and 4332 of the Fish and Game Code. Hunting permittees while on the Private Wildlife Management Area shall be subject to all terms and conditions of the license.

(2) Tag and Seal Procedures:

(A) The department shall furnish each licensee with the appropriate tags or seals required by each management plan. With landowner approval and payment of the additional tag or seal fees, tags or seals issued by the licensee may be exchanged for a tag or seal for the same species for use on any other licensed Private Wildlife Management Area for the take of the same species.

(B) Any deer hunter who has been issued a deer tag or deer tag application by the department and wishes to hunt on a Private Wildlife Management Area shall exchange an unfilled public tag(s) or tag application(s) of the current license year for a Private Wildlife Management Area deer tag(s). These tags can only be used on a Private Wildlife Management Area. In no event shall any hunting permittee take more than two deer each year anywhere in California on either public or private lands. No person shall take more than one buck deer in the X–zones, as defined in Section 360(b), Title 14, CCR.

(C) Any pronghorn antelope hunter who has been issued a buck pronghorn antelope tag by the department and wishes to hunt on a Private Wildlife Management Area within the zone specified on the tag shall exchange an unfilled public buck pronghorn antelope tag of the current license year for a Private Wildlife Management Area buck pronghorn antelope tag. Any pronghorn antelope hunter who has been issued a doe pronghorn antelope tag by the department and wishes to hunt on a Private Wildlife Management Area within the zone specified on the tag shall exchange an unfilled public doe pronghorn antelope tag of the current license year for a Private Wildlife Management Area doe pronghorn antelope tag. In no case shall an exchange occur to allow pronghorn antelope hunting outside the geographic zone or prescribed dates of the original tag, as contained in Section 363, Title 14. No hunter shall exchange a Private Wildlife Management Area pronghorn antelope tag for a public tag.

(D) Immediately upon killing any animal under the authority of the tag issued to them by the licensee, the hunter shall completely fill out the tag and attach it to the antler or horn of the male animal or to the ear of the female animal. Prior to transporting the carcass from the Private Wildlife Management Area, the hunter shall surrender the report card portion of the tag to the licensee or their designee. The hunter shall have the license tag validated pursuant to the provisions of Section 4341 of the Fish and Game Code and Section 708(a)(8), Title 14, CCR. The completed report card portion of the deer tag or any other species tag shall be returned to the department by the licensee on or before January 1. The license tag shall remain with the animal pursuant to sections 708(a)(3), 708(c)(4), 708(d)(4), Title 14, CCR.

(3) Tag and Seal Fees: The licensee shall pay the department the fees specified in Section 702 for each tag and seal authorized annually.

(d) Operation of a Private Lands Wildlife Habitat Enhancement and Management Area:

(1) Posting: Private Wildlife Management Areas shall be posted by the licensee by placing signs which have been approved by the department and that forbid trespass. Signs shall be placed at intervals not less than three to the mile along exterior boundaries and at all roads and trails entering such lands. Where the area is bounded by land open to public hunting, posting shall be required with signs posted at intervals not less than eight to the mile. These signs shall identify both ingress to the Area and egress from the Area. Posting shall be completed no later than fourteen days prior to hunting within either the Area or adjacent public deer hunting zone, and maintained for the life of the license. Posting shall ensure that all boundaries are clearly marked and that no public access roads or areas appear to be closed.

(2) Records: The licensee shall maintain accurate records of all tags and seals and make such records available to the department upon request. The licensee shall provide the department with the location of where records will be kept and available for inspection. An accurate accounting of all hunting tags and seals authorized shall be submitted to the Licenses and Revenue Branch, 3211 S Street in Sacramento, CA 95816, by March 1 of each year. Such accounting shall include the actual exchanged tags or applications provided by the individual hunters on each area. Each licensee shall pay for all the previous year's authorized tags and seals by March 1. In the event a licensee fails to remit all fees by March 1, the department may require full payment of all tags and seals prior to the next license year. Tag and seal fees which have not been paid in full by March 1 will be subject to a 10% late payment fee. All fees must be paid in full before the department forwards any renewal application to the commission for consideration and approval.

(e) Revocation of Licenses, Tags, and Seals:

(1) License: A Private Lands Wildlife Habitat Enhancement and Management Area license may be suspended temporarily by the Director, upon their verification of the facts, for a breach or violation of the terms of the license by the holder thereof, or by any person acting under their direction or control or in cooperation with them. The commission shall be notified of any such suspension and subsequently may revoke or reinstate the license or fix the period of suspension after written notice and a hearing at the next scheduled commission meeting has been provided to the licensee by the commission. Any licensee convicted of a violation of the Fish and Game Code or regulations made pursuant thereto or a violation of the terms and conditions of their license must appear before the commission prior to the issuance of a new license.

(2) Tags and Seals: The licensee, their designee, or any employee of the department may revoke a Private Wildlife Management Area hunting tag or tags, seal or seals for a violation of any Fish and Game law or regulation or the terms and conditions of the Private Lands Wildlife Habitat Enhancement and Management Area license.

(f) Termination of License: a licensee may elect to terminate involvement with the Private Lands Wildlife Habitat Enhancement and Management Program only after giving the commission and the department ten

days notice of their intent to withdraw. The licensee must submit a certified letter of intent to the commission and the nearest regional office of the department along with a full accounting of all tags and seals used, exchange tags received, and all fees due the department. Prior to the department receiving this notice and full accounting with fees due, the licensee must abide by the terms and conditions of the license issued pursuant to Section 3402 of the Fish and Game Code.

(g) No person shall violate any of the provisions of this section or any license issued pursuant thereto. Failure to comply therewith may result in:

(1) denial of application

(2) revocation of license and/or tags and seals

(3) citation under the provisions of the Fish and Game Code.

HISTORY

1. New section filed 8–18–82: effective upon filing pursuant to Government Code Section 11346.2(d) (Register 82, No. 34). For prior history, see Registers 81, No. 44; 81, No. 23; 72, No.32; 72, No. 22; 72, No. 8; and 72, No. 5.
2. Repealer filed 6–17–83; effective thirtieth day thereafter (Register 83, No. 25).

Chapter 11. Ecological Reserves

§ 630. Ecological Reserves.

The areas specified in this chapter have been declared by the Fish and Game Commission to be ecological reserves. A legal description of the boundaries of each ecological reserve is on file at the department's headquarters, 1416 Ninth Street, Sacramento. Ecological reserves are established to provide protection for rare, threatened or endangered native plants, wildlife, aquatic organism and specialized terrestrial or aquatic habitat types. Public entry and use of ecological reserves shall be compatible with the primary purposes of such reserves, and subject to the following applicable general rules and regulations, except as otherwise provided for in the special area regulations:

(a) General Rules and Regulations:

(1) Protection of Resources. No person shall mine or disturb geological formations or archeological artifacts or take or disturb any bird or nest, or eggs thereof, or any plant, mammal, fish, mollusk, crustacean, amphibian, reptile, or any other form of plant or animal life in an ecological reserve except as provided in subsections 630(a)(2) and (a)(8). The department may implement enhancement and protective measures to assure proper utilization and maintenance of ecological reserves.

(2) Fishing. Fishing shall be allowed in accordance with the general fishing regulations of the commission except that the method of taking fish shall be limited to angling from shore. No person shall take fish for commercial purposes in any ecological reserve except by permit from the commission.

(3) Collecting. No collecting shall be done in an ecological reserve except by permit issued pursuant to section 650 of these regulations. Any person applying for a permit must have a valid scientific collecting permit issued pursuant to subdivision 3 of this title.

(4) Motor Vehicles. No person shall drive, operate, leave, or stop any motor vehicle, bicycle, tractor, or other type of vehicle in an ecological reserve except on designated access roads and parking areas.

(5) Swimming. No person shall swim, wade, dive, or use any diving equipment within an ecological reserve except as authorized under the terms of a permit issued pursuant to subsection (a)(3).

(6) Boating. No person shall launch or operate a boat or other floating device within an ecological reserve except by permit from the commission.

(7) Trails. The department may designate areas within an ecological reserve where added protection of plant or animal life is desirable, and may establish equestrian or walking trails or paths within such designated areas. No person shall walk or ride horseback in such areas except upon the established trails or paths.

(8) Firearms. No person shall fire or discharge any firearm, bow and arrow, air or gas gun, spear gun, or any propulsive device capable of firing a projectile, including, but not limited to, any paintball gun, BB gun or pellet gun, or any other weapon of any kind within or into an ecological reserve or possess such weapons within an ecological reserve, except law enforcement personnel and as provided for in individual area regulations that allow for hunting.

(9) Ejection. Employees of the department may eject any person from an ecological reserve for violation of any of these rules or regulations or for any reason when it appears that the general safety or welfare of the ecological reserve or persons thereon is endangered.

(10) Public Entry. Public entry may be restricted on any area at the discretion of the department to protect the wildlife, aquatic life, or habitat. No person, except state and local law enforcement officers, fire suppres-

sion agencies and employees of the department in the performance of their official duties or persons possessing written permission from the department, may enter any ecological reserve, or portion thereof, which is closed to public entry. No person may enter any Ecological Reserve between sunset and sunrise except with written permission from the department, which may be granted for purposes including night fishing in accordance with subsection (a)(2) from designated shore areas only.

A $2.00 day use pass or a valid $10.00 annual wildlife pass is required of all users of Elkhorn Slough and Upper Newport Bay ecological reserves except for users that possess a valid California sport fishing license, hunting license or trapping license, or users that are under 16 years of age or users that are part of an organized youth or school group and having free permits issued by the appropriate regional office. Refer to subsections 550(b)(4) and (5), Title 14, CCR, for regulations for fee requirements for wildlife areas.

(11) Introduction of Species. Unless authorized by the commission, the release of any fish or wildlife species, including domestic or domesticated species, or the introduction of any plant species, is prohibited. The department may reintroduce endemic species on ecological reserves for management purposes.

(12) Feeding of Wildlife. The feeding of wildlife is prohibited.

(13) Pesticides. The use of pesticides is prohibited on any ecological reserve unless authorized by the commission with the exception that the department may use pesticides for management purposes and for public safety.

(14) Litter and Dumping. No person shall deposit, drop, dump, or scatter any debris, earth, rock, vegetation, trash, or other materials of any kind on any ecological reserve except in a receptacle or area designated for that purpose. Where no designated receptacles are provided, any refuse resulting from a person's use of an area must be removed from that area by such person.

(15) Grazing. The grazing of livestock is prohibited on any ecological reserve, except that grazing may be allowed for habitat or vegetation management purposes under permit from the department.

(16) Falconry. Falconry is prohibited.

(17) Aircraft. No person shall operate any aircraft or hovercraft within a reserve, except as authorized by a permit from the commission.

(18) Pets. No person shall allow pets to enter any ecological reserve, except as provided in this section. Pets, including dogs and cats, are prohibited from entering reserves unless they are retained on a leash of less than ten feet or are inside a motor vehicle, except as provided for in individual area regulations that allow for hunting or training activities.

(19) Fires. No person shall light fireworks or other explosive or incendiary devices, or start or maintain any fire on or in any reserve, except for management purposes as provided in subsection (a)(1).

(20) Camping. No person shall camp on/in any ecological reserve.

(21) Vandalism. No person shall tamper with, damage or remove any property not his own when such property is located within an ecological reserve.

(22) Regional Manager's Authority: The regional manager shall have the authority to regulate public use of State ecological reserves where such use is not provided for in these regulations.

(b) Areas and Special Regulations for Use:

(1) Agua Hedionda Lagoon Ecological Reserve, San Diego County.

(A) The department, and the County of San Diego, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(B) All fishing is prohibited.

(2) Albany Mudflats Ecological Reserve, Alameda County.

(3) Alkali Sink Ecological Reserve, Fresno County.

(4) Allensworth Ecological Reserve, Tulare County.

(A) Hunting shall be permitted in accordance with general hunting regulations, but only at such times and in specific areas as designated by the department.

(5) Apricum Hill Ecological Reserve, Amador County.

(A) No person, except as provided in subsection (a)(10), shall enter the reserve.

(6) Atascadero Creek Marsh Ecological Reserve, Sonoma County.

(7) Bair Island Ecological Reserve, San Mateo County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve during the period February 15 through May 20.

(B) Waterfowl shall be taken in accordance with the general waterfowl regulations.

(8) Baldwin Lake Ecological Reserve, San Bernardino County.

(A) All fishing is prohibited.

(B) Waterfowl and upland game hunting shall be allowed in accordance with the general hunting regulations. Waterfowl hunting shall be permitted from boats only, and in accordance with general waterfowl hunting regulations and pursuant to the provisions of Section 551, Title 14, CCR.

(C) Boating is permitted for the purpose of waterfowl hunting only. Boats may be launched and retrieved in designated areas only.

(9) Ballona Wetlands Ecological Reserve, Los Angeles County.

(A) Pedestrian use is allowed on designated trails only, and entrance to the reserve shall be restricted to designated access points.

(B) Bicycle use is allowed only on the designated bike path on the north side of the Ballona Creek flood control channel.

(C) Fishing from shore is allowed only in designated areas along Ballona Creek flood control channel. Fishing from boats is allowed only within the Ballona Creek flood control channel. Only barbless hooks may be used.

(D) Boating shall be allowed only within the Ballona Creek flood control channel.

(E) Existing recreational uses may be allowed under license agreement with Playa Vista Little League in that portion of Area C identified in the license agreement unless it is determined by the department that restoration or other uses in this area are more appropriate.

(F) Existing parking areas under leases to the County of Los Angeles may be allowed unless it is determined by the department that restoration or other uses in those areas are more appropriate.

(G) No person shall allow pets, including dogs and cats, to enter the reserve.

(H) Placing of signage, flagging, or marking is prohibited, except as allowed by written permission from the department.

(I) No person shall operate any remote–control, control–line, or free–flight model rocket, aircraft, or other vehicle which utilizes a combustive fuel motor, electric motor, or rocket motor.

(10) Batiquitos Lagoon Ecological Reserve, San Diego County.

(A) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6) and (12), the department may issue permits to conduct biological research projects within the reserve. Such projects shall be compatible with the primary purpose of the reserve.

(B) San Diego County, after consultation with the department, may carry out management activities necessary for fish and wildlife management, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and associated use of equipment.

(11) Big Table Mountain, Fresno County.

(A) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6), (10), (12) and (20), the department may issue permits to conduct biological research or monitoring compatible with the purposes of the reserve.

(12) Blue Ridge Ecological Reserve, Tulare County.

(A) Hunting and trapping shall be permitted in accordance with the general hunting and trapping regulations, but only at such times and in specific areas as designated by the department. Trapping may only be done under permit from the department.

[The next page is 165.]

(13) Blue Sky Ecological Reserve, San Diego County.

(A) Bicycles prohibited.

(14) Bobelaine Ecological Reserve, Sutter County.

(A) No person, except as provided in subsection (a)(10), employees of the National Audubon Society or employees of the Department of Water Resources, in the performance of their official duties or those persons possessing written permission from the area manager, may enter the reserve for any purpose.

(B) All fishing is prohibited.

(C) The area manager may issue permits to conduct biological research projects and may restrict the use of boats, vehicles and other motorized equipment within the reserve. Such projects and use shall be compatible with the primary purposes of the reserve.

(D) The Audubon Society may carry out operation and management activities necessary for fish and wildlife management, flood control, vector control and public access. Authorized operation and maintenance activities shall include, but not be limited to, use of chemicals, vegetation control, water control and associated use of equipment.

(15) Boden Canyon Ecological Reserve, San Diego County.

(A) Upland game hunting shall be permitted in accordance with the general hunting regulations, but only at such times and in specific areas as designated by the department.

(16) Boggs Lake Ecological Reserve, Lake County.

(17) Bolsa Chica Ecological Reserve, Orange County.

(A) No person, except as provided in subsection (a)(10), or employees of Signal Corporation and its invitees, for the purposes of carrying out oil and gas operations, shall enter this reserve and remain therein except on established trails, paths or other designated areas.

(B) Fishing shall be permitted at designated areas around outer Bolsa Bay only.

(C) Horses are prohibited from entering the reserve.

(D) Pets are prohibited from entering the reserve except when they remain inside a motor vehicle.

(E) No person shall enter this reserve between 8:00 p.m. and 6:00 a.m.

(F) Motor vehicles are prohibited between 8:00 p.m. and 6:00 a.m.

(G) Vehicle parking is for reserve visitors' use only.

(H) The County of Orange, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(18) Bonny Doon Ecological Reserve, Santa Cruz County.

(19) Boulder Creek/Rutherford Ranch Ecological Reserve, San Diego County.

(20) Buena Vista Creek Ecological Reserve, San Diego County.

(21) Buena Vista Lagoon Ecological Reserve, San Diego County.

(A) The County of San Diego, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(B) Fishing is allowed at designated fishing areas only.

(22) Burton Mesa Ecological Reserve, Santa Barbara County

(A) Motor vehicles use is prohibited, except by department personnel or department authorized contractors for management or research, or by law enforcement/public safety officers in response to public safety or health hazards.

(B) Horses and bicycles are prohibited.

(23) Butler Slough Ecological Reserve, Tehama County.

(A) The department may carry out management activities necessary for habitat preservation and management. Authorized operations and maintenance activities shall include, but not be limited to, controlled burning, and chemical and mechanical treatment with the use of associated equipment.

(24) Butte Creek Canyon Ecological Reserve, Butte County.

(A) Motor vehicle use in the Reserve is prohibited except by department personnel, law enforcement officers or firefighters in response to public safety or health hazards.

(B) Horses are prohibited.

(C) Fishing by boat or other flotation device within the Reserve and in the main channel of Butte Creek is permitted only from February 1 through April 30. Only hand–carried boats or flotation devices may be launched and operated.

(D) The use, application or deposition in any form of toxic substances is prohibited unless authorized by the commission.

(25) Butte Creek House Ecological Reserve, Butte County.

(A) Motor vehicle use is prohibited except by department personnel, law enforcement officers, or firefighters in response to public safety or health hazards.

(B) The use, application or deposition in any form of toxic substances is prohibited unless authorized by the commission.

(26) Buttonwillow Ecological Reserve, Kern County.

(A) Hunting may be permitted in accordance with general hunting regulations, but only at such times and in specific areas as designated by the department.

(27) By–Day Creek Ecological Reserve, Mono County.

(A) All fishing is prohibited.

(B) Hunting shall be permitted in accordance with general hunting regulations.

(28) Calhoun Cut Ecological Reserve, Solano County.

(A) No person, except as provided below and in subsection (a)(10), shall enter this reserve.

(B) Hunting for waterfowl is allowed only from a boat on waters of the main channel of Calhoun Cut and its tributaries, accessible only from Lindsey Slough and subject to the general hunting regulations and the provisions of subsection (a)(10), related to the protection of wildlife, aquatic life and habitat.

(C) Fishing is allowed only from a boat on waters of the main channel of Calhoun Cut and its tributaries, accessible only from Lindsey Slough and subject to the general sport fishing regulations and the provisions of subsection (a)(10), related to the protection of wildlife, aquatic life and habitat.

(29) Canada de los Osos Ecological Reserve, Santa Clara County.

(A) No person, may enter the reserve except with written permission from the department, or unless part of an organized group that has received written permission.

(B) Fishing may be allowed only with written permission from the department. Fishing may be permitted from boats, as well as from shore; only lightweight hand–carried boats or floatation devices may be launched and operated. No gasoline–powered boats shall be permitted.

(C) Swimming, diving and wading may be allowed in designated areas with permission from the department.

(D) Hunting may be allowed, but only in participation with department sponsored hunts at such times, areas, and species as designated by the department.

(E) Target and skeet shooting, other discharge of firearms, and use of bow and arrow may be allowed, but only at such times and in specific areas as designated by the department.

(F) Except as otherwise permitted by the department, all public access trails are open to foot access only.

(G) Notwithstanding the provisions of subsections (a)(1), (2), (3), (5), (6), (8), (12) and (17), the department may issue permits to conduct biological research within the reserve, and may allow collection of plants and animals for educational purposes. Such activities must be compatible with the primary purpose of the reserve.

(H) Camping and campfires may be allowed in specified areas with written permission from the department.

(I) The department may restrict any activities on the reserve to persons under 16 and adults supervising those persons.

(J) Dogs may be allowed in the reserve with written permission from the department.

(30) Canebrake Ecological Reserve, Kern County.

(A) Firearms, archery equipment, and hunting dogs, either on leash or in a vehicle, may be possessed only by licensed hunters only at such times and in specific areas as designated by the department.

(B) Fishing may be allowed only in those specific areas designated by the department.

(C) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6), and (12), the department may issue permits to conduct biological or archaeological research. Such research shall be compatible with the primary purpose of the reserve.

(D) Notwithstanding the provisions of subsection (a)(18), only those animals assisting visually impaired or disabled persons are permitted.

(E) Notwithstanding the provisions of subsection (a)(7), equestrian use may be allowed, but only in specific areas designated by the department.

(31) Carlsbad Highlands Ecological Reserve, San Diego County.

(32) Carrizo Canyon Ecological Reserve, Riverside County.

(A) No person, except as provided in subsection (a)(10), and employees of the Bureau of Land Management in the performance of their official duties shall enter this reserve during the period January 1 to September 30.

(B) The County of Riverside may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(C) Pets are prohibited from entering the reserve except when they remain inside a motor vehicle.

(33) Carrizo Plains Ecological Reserve, San Luis Obispo County, including the American, Panorama, Elkhorn Plain, North Chimineas, and South Chimineas Units.

(A) Hunting shall be allowed in accordance with the general hunting regulations and only at such times and in such places as designated by the department. Hunting of coyotes and ground squirrels is prohibited on the North and South Chimineas Units.

(B) Target shooting is permitted in designated areas.

(C) Notwithstanding the provisions on subsections (a)(1), (3), (5), (6), (10), (12) and (20), the department may issue permits to conduct biological research or monitoring compatible with the purposes of the reserve.

(D) All persons accessing the South Chimineas Unit shall be in possession of an access permit issued by the department. Upon leaving the property, the completed permits shall be provided to the department.

(34) China Point Ecological Reserve, Siskiyou County.

(A) No person, except as provided in subsection (a)(10) and employees of the U.S. Forest Service in the performance of their official duties, shall enter this reserve during the period February 15 through July 31.

(B) Fishing shall be permitted from boats as well as from shore; boats may be launched and operated in the Klamath River.

(C) Hunting shall be allowed in accordance with the general hunting regulations and subject to subsection (34)(A) above.

(35) Chorro Creek Ecological Reserve, San Luis Obispo County.

(A) Except as otherwise designated by the department, all public access trails are open to foot access only.

(B) Notwithstanding the provisions of subsections (a)(1), (2), (3), (5), (6), (8), (12) and (17), the department may issue permits to conduct biological research within the reserve, and may allow collection of plants and animals for educational purposes. Such activities must be compatible with the primary purpose of the reserve.

(36) Clover Creek Ecological Reserve, Shasta County.

(A) The department may carry out management activities necessary for habitat preservation and management. Authorized operations and maintenance activities shall include, but not be limited to, controlled burning, and chemical and mechanical treatment with the use of associated equipment.

(37) Coachella Valley Ecological Reserve, Riverside County.

(A) The Bureau of Land Management, the Fish and Wildlife Service and The Nature Conservancy may carry out management activities necessary for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but not be limited to, use of chemicals, vegetation control, water control and associated use of equipment.

(38) Coal Canyon Ecological Reserve, Orange County.

(A) Hunting shall be permitted in accordance with the general hunting regulations, but only at such times and in specific areas as designated by the department.

(B) Method of take restrictions: Shotguns and archery equipment only.

(C) Horses and bicycles are allowed on designated trails only, excluding dates within 72 hours of any weather event that produces 1/4 inch of precipitation in any 24 hour time period, or any such event that produces 1/2 inch of precipitation with in any 72 hour time period.

(39) Coldwater Canyon Ecological Reserve, Ventura County.

(A) The existing travel corridor through the area is open to foot traffic only. All other areas are closed to public entry.

(40) Corral Hollow Ecological Reserve, San Joaquin County.

(A) No person, except as provided in subsection (a)(10), shall enter the reserve.

(41) Corte Madera Marsh Ecological Reserve, Marin County.

(A) Boating is permitted, except only lightweight hand–carried boats may be launched within the reserve.

(42) Cosumnes River Ecological Reserve, Sacramento County.

(A) Walking is allowed only on established trails, paths or other designated areas.

(B) Horses, except by written permission of the department for grazing management, are prohibited.

(C) Boating is permitted subject to the limitation that only lightweight, hand carried, non–gasoline powered floating devices may be launched and operated from designated launching sites. The department or its designee may further restrict the use and operation of boats to protect resources or provide for the orderly operation of recreational programs. Boating restrictions may include, but are not limited to, seasonal closures.

(D) Fishing is allowed only from a boat on the waters of the main channel of the Cosumnes River and sloughs accessible from the Mokelumne River in accordance with the general fishing regulations and the provisions of subsection (a)(10), related to the protection of wildlife, aquatic life and habitat.

(E) Hunting may be permitted in accordance with general hunting regulations, but only at such times and in specific locations as designated by the department.

(F) Picnicking shall occur only at such times and in those areas designated by the department.

(G) Pets are prohibited from entering the reserve, except when they remain inside a motor vehicle.

(H) The department, the State Lands Commission, the Bureau of Land Management, The Nature Conservancy, Ducks Unlimited, Inc. and the County of Sacramento may carry out management activities necessary for fish and wildlife management, flood control, vector control and public access. Authorized operation and maintenance activities shall include, but not be limited to, use of chemicals, vegetation control, animal control, water control and associated use of equipment.

(I) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6) and (12), the department may issue permits to conduct biological or archaeological research. Such research shall be compatible with the primary purpose of the reserve.

(J) Notwithstanding the provisions of subsections (a)(4) and (11), farming may be allowed under permit from the department for manage-

ment purposes when such farming is compatible with the primary purpose of the reserve.

(43) Crestridge Ecological Reserve, San Diego County.

(A) Non–motorized mountain biking may be allowed on designated roads during designated seasons as determined by the department. Closures may be implemented at the discretion of the department.

(44) Dales Lake Ecological Reserve, Tehama County.

(A) Waterfowl hunting shall be permitted in accordance with the general waterfowl regulations per Section 502, Title 14, CCR.

(B) The department may carry out management activities necessary for habitat preservation and management. Authorized operations and maintenance activities shall include, but not be limited to, controlled burning, and chemical and mechanical treatment with the use of associated equipment.

(45) Del Mar Mesa/Lopez Ridge Ecological Reserve, San Diego County.

(46) Del Monte Dunes Ecological Reserve, Monterey County.

(47) Eden Landing Ecological Reserve, Alameda County.

(A) No person shall enter this reserve except on designated trails without written permission or by posted notice of the regional manager.

(B) No person shall walk, ride horses or bicycles, except on designated trails.

(C) Dogs are restricted to designated trails and designated hunting areas during the waterfowl season. In designated hunting areas, dogs may be off leash only for hunting during waterfowl season and must be under voice control at all times.

(D) Waterfowl hunting shall be permitted, but only at such times and in specific areas as designated by the department. Waterfowl shall be taken in accordance with the general waterfowl regulations.

(E) Fishing shall be permitted from boats and from shore, but only at such times and in specific areas as designated by the department.

(F) Notwithstanding the provisions of section (a)(2), commercial bait fishing for brine shrimp may occur only at such times and in specific areas as designated by the department.

(G) Notwithstanding the provisions of subsections (a)(1), (2), (3), (5), (6), (8), (10), (12) and (20), the department may issue permits to conduct biological research or monitoring compatible with the primary purposes of the reserve.

(48) Elkhorn Slough Ecological Reserve (National Estuarine Research Reserve), Monterey County.

(A) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6) and (12), the department may issue permits to conduct biological research projects within the reserve. Such projects shall be compatible with the primary purposes of the reserve.

(B) Fishing shall be conducted from only those specific areas of the reserve designated by the department.

(C) Hunting shall be permitted in accordance with general hunting regulations, but only at such times and in specific areas as designated by the department.

(D) The department may restrict the use of horses by grazing permittees.

(E) All designated public access trails are opened to foot access only.

(F) The causing of excessive noise especially that amplified electronically is prohibited.

(G) Picnicking shall be conducted in only those areas designated by the department.

(49) Estelle Mountain Ecological Reserve, Riverside County.

(A) Upland game hunting shall be permitted in accordance with the general hunting regulations.

(50) Fagan Marsh Ecological Reserve, Napa County.

(A) Fishing shall be permitted from boats, as well as from shore; only lightweight hand–carried boats may be launched and operated.

(B) Swimming and diving are permitted.

(51) Fall River Mills Ecological Reserve, Shasta County.

(52) Fish Slough Ecological Reserve, Inyo and Mono counties.

(A) Fishing is prohibited within the 20–acre fenced and posted plot of land encompassing two spring areas and an artificial impoundment of 5.6 acres located in the northwest corner of that area known as "Fish Slough," northern Inyo and southern Mono counties.

(B) Hunting shall be allowed in accordance with the general hunting regulations.

(53) Fremont Valley Ecological Reserve, Kern County.

(54) Goleta Slough Ecological Reserve, Santa Barbara County.

(A) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6) and (12), the department may issue permits to conduct biological research projects within the reserve. Such projects shall be compatible with the primary purposes of the reserve.

(B) No person, except as provided in subsection (a)(10) or designated employees of Santa Barbara Airport, City of Santa Barbara and Goleta Valley Mosquito Abatement District for the purposes of carrying out official duties shall enter this reserve and remain therein except on established trails, paths or other designated areas.

(C) No fishing shall be allowed except at designated areas.

(D) Horses are prohibited.

(E) The department, City of Santa Barbara and the Goleta Valley Mosquito Abatement District may carry out management activities necessary for fish and wildlife management and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control, minor ditching for mosquito abatement when approved by department and use of associated equipment.

(55) Harrison Grade Ecological Reserve, Sonoma County.

(56) Headwaters Forest Ecological Reserve, Humboldt County.

(A) Horses are prohibited from entering the reserve.

(B) Bicycles are allowed only on the northern 3.5–mile designated corridor.

(C) Dogs on leash are allowed only on the northern 3.5–mile designated corridor.

(D) Camping may be authorized with written permission from the department or the Bureau of Land Management for research and monitoring.

(E) Swimming may be authorized with written permission from the department or the Bureau of Land Management for research and monitoring.

(F) Aircraft operations and motorized vehicle use may be authorized with written permission from the department or the Bureau of Land Management for emergency operations, monitoring, research and other management activities.

(G) The Bureau of Land Management may carry out operation and maintenance activities necessary for fish and wildlife management and public access. Authorized operation and maintenance activities shall include, but not be limited to use of chemicals, vegetation control, forestry management, controlled burning and use of associated equipment.

(57) Hidden Palms Ecological Reserve, Riverside County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve.

(58) Indian Joe Springs Ecological Reserve, Inyo County.

(A) Upland game hunting shall be permitted in accordance with the general hunting regulations.

(59) Joshua Creek Canyon Ecological Reserve, Monterey County.

(60) Kaweah Ecological Reserve, Tulare County.

(A) Hunting shall be allowed in accordance with the general hunting regulations, but only at such times and in specific areas as designated by the department.

(61) Kerman Ecological Reserve, Fresno County.

(A) Hunting shall be permitted in accordance with general hunting regulations from July 1 through January 31. Only licensed hunters will be permitted to possess firearms. Shotguns only, discharging not larger than number 2 lead or size T steel shot, will be allowed on the area. Pos-

session of firearms for other than law enforcement purposes will not be permitted on the area, except as provided herein.

(B) No plinking, firearms practice, or target shooting is allowed within the area.

(62) King Clone Ecological Reserve, San Bernardino County.

(63) Laguna Laurel Ecological Reserve, Orange County.

(64) Lake Hodges Ecological Reserve, San Diego County.

(65) Lake Mathews Ecological Reserve, Riverside County.

(A) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6) and (12), the department may issue permits to conduct biological research projects within the reserve. Such projects shall be compatible with the primary purposes of the reserve.

(B) No person except as provided in subsection (a)(10) and employees and consultants of Metropolitan Water District and member public agencies of the District, in the performance of customary reservoir maintenance activities or other official duties, may enter or utilize boats, aircraft or motor vehicles within this reserve.

(C) All fishing is prohibited.

(D) Collections may be made by the department for the purposes of fish and wildlife management, or by Metropolitan Water District for the purpose of water quality testing.

(E) The department and Metropolitan Water District may carry out management activities necessary to ensure water quality and the proper operation and maintenance of Lake Mathews as a water supply facility and natural area. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control, rodent control and use of associated equipment.

(66) Leek Springs Ecological Reserve, El Dorado County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve without written permission from the regional manager.

(B) All fishing is prohibited.

(C) Pets are prohibited from entering the reserve.

(D) Vehicles are prohibited, except for use by adjacent landowners and their invitees, United States Forest Service personnel, fire personnel or other authorized persons who may only use the road easement which bisects the property.

(E) Horses and bicycles are prohibited.

(67) Limestone Salamander Ecological Reserve, Mariposa County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve.

(68) Little Butte Ecological Reserve, Mendocino County.

(69) Little Red Mountain Ecological Reserve, Mendocino County.

(70) Loch Lomond Vernal Pool Ecological Reserve, Lake County.

(71) Lokern Ecological Reserve, Kern County.

(A) Hunting may be permitted in accordance with general hunting regulations only at such times and in specific areas as designated by the department.

(72) Macklin Creek Ecological Reserve, Nevada County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve without written permission from the regional manager.

(B) All fishing in prohibited.

(73) Magnesia Spring Ecological Reserve, Riverside County.

(A) No person, except as provided in subsection (a)(10), and employees of the City of Rancho Mirage or the City of Palm Desert in the performance of their official duties shall enter this reserve during the period January 1 to September 30 except on designated trail.

(B) The County of Riverside may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(C) Pets are prohibited from entering the reserve except when they remain inside a motor vehicle.

(D) Year round access will only be permitted on the portion of the Mirage Trail from Painter's Path in the City of Palm Desert to the junction with the Hopalong Cassidy Trail located in the eastern half of Section 24 and continuing off the Reserve to Cahuilla Hills Park, City of Palm Desert. The Hopalong Cassidy trail then enters the reserve again at Section 35 and follows contours around the eastern side of the section before leaving the reserve and continuing on to City of Palm Desert owned parcels.

(E) Bicycles are only allowed on the portions of trail described in (D).

(74) Marin Islands Ecological Reserve, Marin County.

(75) Mattole River Ecological Reserve, Mendocino County.

(76) McGinty Mountain Ecological Reserve, San Diego County.

(77) Meadowbrook Ecological Reserve, San Diego County.

(78) Moro Cojo Ecological Reserve, Monterey County.

(79) Morro Dunes Ecological Reserve, including the Bayview Unit, San Luis Obispo County.

(80) Morro Rock Ecological Reserve, San Luis Obispo County.

(A) No person shall enter into or upon this reserve for any purpose except as follows:

1. For the purpose of fishing and sightseeing, persons may enter upon that portion of Morro Rock between the low tide mark and a point ten (10) feet in elevation above the mean high tide mark.

2. Those persons provided for in subsection (a)(10), and employees of the Department of Parks and Recreation may enter the reserve in the performance of their official duties.

(81) Napa River Ecological Reserve, Napa County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve between sunset and sunrise.

(B) Swimming is permitted.

(C) The possession and/or consumption of alcoholic beverages is prohibited.

(82) North Table Mountain Ecological Reserve, Butte County.

(A) Horses and bicycles are prohibited from entering the reserve.

(B) Hunting is permitted for deer and upland game in accordance with the general hunting regulations through November 15. Hunting is prohibited after November 15 and through the spring turkey season.

(83) Oasis Springs Ecological Reserve, Riverside County.

(A) All fishing is prohibited.

(B) Hunting shall be permitted in accordance with general hunting regulations.

(84) Offshore Rocks and Pinnacles, coastal counties.

(85) Otay Mountain Ecological Reserve, San Diego County.

(A) Hunting shall be allowed in accordance with the general hunting regulations and the Bureau of Land Management's Wilderness Area Restrictions.

(86) Owl Creek Ecological Reserve, Humboldt County.

(87) Palo Verde Ecological Reserve, Riverside County.

(A) Notwithstanding subsections (a)(4) and (11), farming may be allowed under permit from the department for management purposes when such farming is compatible with the primary purpose of the reserve.

(B) Hunting for rabbits, doves, quail and waterfowl shall be allowed in accordance with general hunting regulations and only at such times and in such places as designated by the department.

(C) Except as otherwise designated by the department, all public access to properties on the lowest flood plain and any new or established restoration sites shall be by foot.

(D) The department and cooperating agencies may carry out management activities necessary for habitat restoration, preservation and management. Authorized operations and maintenance activities shall include, but not be limited to, controlled burning, and chemical and mechanical treatment and use of associated equipment.

(E) Notwithstanding the provisions of subsections (a)(1), (2), (3), (5), (6), (8), (12) and (17) The department may issue permits to conduct biological and archeological research within the reserve, and may allow collection of plants and animals for educational purposes. Such activities must be compatible with the primary purpose of the reserve.

(F) Horseback riding is prohibited.

(88) Panoche Hills Ecological Reserve, Fresno County.

(A) Hunting shall be permitted in accordance with general hunting regulations from July 1 through January 31. Only licensed hunters will be permitted to possess firearms.

(B) No plinking, firearms practice, or target shooting is allowed within the area.

(89) Peninsular Ranges Ecological Reserve, Riverside County.

(A) Upland game hunting shall be permitted in accordance with the general hunting regulations.

(90) Peytonia Slough Ecological Reserve, Solano County.

(A) Fishing shall be permitted from boats as well as from shore.

(B) Swimming, wading and diving shall be permitted within the reserve.

(C) Boats may be operated within the reserve; however, only lightweight, hand–carried boats may be launched within the reserve.

(91) Phoenix Field Ecological Reserve, Sacramento County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve.

(92) Pilgrim Creek Ecological Reserve, San Diego County.

(93) Pine Hill Ecological Reserve, El Dorado County including the Salmon Falls Unit.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve.

(B) No horses are permitted within the boundaries of the reserve.

(94) Piute Creek Ecological Reserve, San Bernardino County.

(A) Hunting shall be allowed in accordance with the general hunting regulations.

(95) Plaisted Creek Ecological Reserve, San Diego County.

(96) Pleasant Valley Ecological Reserve, Fresno County.

(A) Hunting may be permitted in accordance with the general hunting regulations, but only at such times and in specific areas as designated by the department.

(97) Quail Hollow Ecological Reserve, Santa Cruz County.

(98) Quail Ridge Ecological Reserve, Napa County.

(A) No person, except as provided in subsection (a)(10) shall enter this reserve without permission from the department.

(B) Hunting will be permitted only as specially authorized hunts determined by the department.

(99) Rancho Jamul Ecological Reserve, including the Headquarters Unit, San Diego County.

(A) Controlled retriever training may be permitted within a designated area. This area shall be clearly posted.

(B) Hunting shall be allowed in accordance with the general hunting regulations, but only at such times and in specific areas as designated by the department.

(C) Within the 50.51 acre Headquarters Unit, the department may develop facilities and conduct activities consistent with training programs, meeting and storage needs, fire suppression and control, and educational programs under guidelines established by the regional manager.

(D) Uses associated with occupied state housing shall be allowed within the 50.51 acre Headquarters Unit.

(100) Redwood Shores Ecological Reserve, San Mateo County.

(A) Fishing shall be permitted from boats as well as from shore; only lightweight, hand–carried boats may be launched and operated.

(B) Swimming, wading and diving shall be allowed within the ecological reserve.

(C) Bicycles are allowed along levee–top road system.

(101) River Springs Lakes Ecological Reserve, Mono County.

(A) Hunting shall be permitted in accordance with the general hunting regulations.

(102) Saline Valley Ecological Reserve, Inyo County.

(A) Hunting shall be allowed in accordance with the general hunting regulations.

(103) San Bruno Mountain Ecological Reserve, San Mateo County.

(104) San Diego River Ecological Reserve, San Diego County.

(105) San Dieguito Lagoon Ecological Reserve, San Diego County.

(A) Fishing shall be permitted from shore and from the Grand Avenue bridge.

(B) No person, except as provided in subsection 630(a)(10), shall be permitted on the California least tern nesting island.

(C) No person, except as provided in subsection 630(a)(10), shall enter this reserve between 8:00 p.m. and 5:00 a.m.

(D) The County of San Diego, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(E) Collections of fish, wildlife, water and soil may be made by the department for the purposes of fish and wildlife management or by San Diego County for the purposes of water quality testing and vector control.

(106) San Elijo Lagoon Ecological Reserve, San Diego County.

(A) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6) and (12), the department may issue permits to conduct biological research projects within the reserve. Such projects shall be compatible with the primary purposes of the reserve.

(B) San Diego County, after consultation with the department, may carry out management activities for fish and wildlife management, flood control, vector control and regional park recreational activities. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control, minor ditching and use of associated equipment.

(C) Collections may be made by the department for purposes of fish and wildlife management or by San Diego County for the purpose of water quality testing and vector control.

(107) San Felipe Creek Ecological Reserve, Imperial County.

(A) Hunting shall be permitted in accordance with the general hunting regulations.

(108) San Joaquin River Ecological Reserve, Fresno and Madera Counts.

(A) No person shall enter into any unit of this reserve except as provided in subsection (a)(10), or as provided by written permission or by posted notice of the regional manager who will designate appropriate times and/or areas open to public use.

(B) The department may carry out or cause to be carried out management activities for fish and wildlife, flood control, and vector control. Authorized operation and maintenance activities shall include, but not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(C) Boating is permitted, subject to the limitations of subsection (A) above. Except in the execution of law enforcement, emergency services, or official duties of department employees or contractors, only lightweight, hand carried, non–gasoline powered floating devices may be launched and operated from designated launching sites. The Regional Manager or his designee may further restrict the use and operation of boats to protect the resource or provide for the orderly operation of recreational programs maintained on the area. Boating restrictions may include, but are not limited to, seasonal closures.

(D) Angling shall be permitted from boats as well as from shore, subject to the limitations in subsections (A) and (C), above.

(E) Subsection (a)(20) notwithstanding, late night or over–night use for camping and other purposes may be allowed subject to limitations in subsection (A) above.

(F) Subsection (a)(11) notwithstanding, the department may, for management purposes, introduce or cause to be introduced nonendemic fish species which are naturalized in the San Joaquin River system, primarily to establish and maintain urban sport–fishing opportunities.

(G) Subsection (a)(17) shall not be construed to prohibit aircraft from operating within a normal flight pattern when taking off from or landing at the Sierra Skypark airport located approximately one–quarter mile south of the reserve.

(109) San Luis Rey River Ecological Reserve, San Diego County.

(110) Santa Cruz Long-toed Salamander Ecological Reserve, Santa Cruz County.

(A) No person shall enter the reserve for any purpose except as follows:

1. Those persons provided for in subsection (a)(10), and employees of the departments of Parks and Recreation and Transportation in the performance of their official duties.

(111) Santa Rosa Plain Vernal Pool Ecological Reserve, Sonoma County, including the Hall Road, Todd Road, Wikiup and Yuba Drive Units.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve without written permission of the department. Public use of a trail to be constructed on the Hall Road Unit will be allowed under conditions established by the regional manager.

(B) Ecological research and environment education may be conducted with written permission of the department.

(112) Santa Rosa Plateau Ecological Reserve, Riverside County.

(A) Notwithstanding the provisions of subsection (a)(18), only those animals assisting visually impaired or disabled persons are permitted.

(B) Smoking is prohibited except inside a motor vehicle.

(113) Semitropic Ecological Reserve, Kern County.

(A) Notwithstanding the provisions of subsections (a)(1), (3), (5), (6), (10), (12) and (20), the department may issue permits to conduct biological research or monitoring compatible with the purposes of the reserve.

(114) Sky Valley Ecological Reserve, Riverside County.

(A) Upland game hunting shall be permitted in accordance with the general hunting regulations.

(115) Springville Ecological Reserve, Tulare County.

(A) No person, except as provided in subsection (a)(10), shall enter between sunset and sunrise.

(116) Stone Corral Ecological Reserve, Tulare County.

(A) Hunting may be permitted in accordance with general hunting regulations only at such times and in specific areas as designated by the department.

(117) Stone Ridge Ecological Reserve, Butte County.

(A) No person shall enter into or upon this reserve for any purpose except with prior written permission of the department for purposes of interpretive or wetland education field studies, or department approved biological research.

(118) Sycamore Canyon Ecological Reserve, Riverside County.

(119) Sycuan Peak Ecological Reserve, San Diego County.

(120) Table Bluff Ecological Reserve, Humboldt County.

(A) The department may carry out management activities for the preservation and expansion of the endangered western lily (*Lilium occidentale*). Authorized management activities may include, but not be limited to, controlled burning, chemical treatment and mechanical treatment.

(B) Except as provided in subsection (a)(10) no persons shall enter the fenced western lily area.

(121) Theiller Sebastopol Meadowfoam Ecological Reserve, Sonoma County.

(122) Thomes Creek Ecological Reserve, Tehama County.

(A) The department may carry out management activities necessary for habitat preservation and management. Authorized operations and maintenance activities shall include, but not be limited to, controlled burning, and chemical and mechanical treatment with the use of associated equipment.

(123) Tomales Bay Ecological Reserve, Marin County.

(A) Waterfowl may be taken in accordance with the general waterfowl regulations.

(B) Fishing shall be permitted from boats as well as from shore; only lightweight, hand-carried boats may be launched and operated.

(C) Swimming, wading, and diving shall be allowed within the reserve.

(D) The land area only of the reserve shall be closed to all entry from March 1 through June 30.

(124) Upper Newport Bay Ecological Reserve, Orange County.

(A) Fishing shall be permitted from boats. Fishing is also permitted from shore in designated areas. Clamming or wading is not permitted.

(B) Swimming is permitted only in that area bayward from North Star Beach to mid-channel.

(C) Boating is limited to non-motorized craft, with the exception of law enforcement, emergency, and department vessels and authorized operators under permit from the regional manager. Boating shall occur in designated areas only and is limited to five miles per hour.

(D) No person shall walk, or ride horseback except on established trails, paths, or other designated areas.

(E) The County of Orange may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(125) Walker Canyon Ecological Reserve, San Diego County.

(A) Hunting shall be allowed in accordance with the general hunting regulations.

(126) Watsonville Slough Ecological Reserve, Santa Cruz County.

(127) West Mojave Desert Ecological Reserve, San Bernardino County.

(A) Hunting shall be permitted in accordance with the general hunting regulations from July 1 to January 31. Only licensed hunters shall be permitted to possess firearms.

(B) No plinking, firearms practice or target shooting is allowed within the ecological reserve.

(128) Woodbridge Ecological Reserve, San Joaquin County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve.

(129) Yaudanchi Ecological Reserve, Tulare County.

(A) No person, except as provided in subsection (a)(10), shall enter this reserve between sunset and sunrise.

(B) No person shall walk except on established trails, paths, or other designated areas.

(C) Horses, except by written permission of the department for the purpose of grazing, are prohibited.

(130) Yorkville Ecological Reserve, Mendocino County.

HISTORY

1. New subsection (b)(50) filed 3–11–86; effective thirtieth day thereafter (Register 86, No. 11). For prior history, see Register 85, No. 38.
2. Amendment of subsections (b)(1), (b)(4) and new subsections (b)(51)–(59) filed 9–10–86; effective thirtieth day thereafter (Register 86, No. 37).
3. Amendment filed 7–28–88; operative 8–27–88 (Register 88, No. 32).
4. Amendment of subsection (a)(10) filed 3–27–89; operative 3–27–89 (Register 89, No. 13).
5. Amendment of subsections (b)(52) and (b)(60) and new subsections (b)(68), (b)(69) and (b)(70) filed 2–13–91; operative 3–15–91 (Register 91, No. 12).
6. Amendment of subsection (a) filed 4–18–91; operative 5–18–91 (Register 91, No. 21).
7. New subsection (b)(71) filed 10–24–91; operative 11–25–91 (Register 92, No. 5).
8. Amendment of subsections (b)(23) and (b)(56) filed 1–9–92; operative 2–10–92 (Register 92, No. 12).
9. New subsections (b)(72) through (b)(84)(D) and amendment of NOTE filed 6–24–93; operative 7–26–93 (Register 93, No. 26).
10. New subsections (b)(51)(B) and (b)(85)–(87) filed 9–23–93; operative 10–25–93 (Register 93, No. 39).
11. New subsections (b)(20)(C)–(D) filed 2–2–94; operative 3–4–94 (Register 94, No. 5).
12. New subsections (b)(75)(B)–(D) and (b)(88)–(97) filed 2–2–95; operative 3–6–95 (Register 95, No. 5).
13. Amendment of subsection (b)(28)(A) filed 10–19–95; operative 11–18–95 (Register 95, No. 42).
14. Amendment of subsections (b)(34)–(b)(34)(A), repealer of subsections (b)(83)–(b)(83)(A), subsection renumbering, amendment of newly designated subsection (b)(93) and new subsections (b)(97)–(b)(99)(F) filed 12–11–95; operative 1–10–96 (Register 95, No. 50).
15. Amendment of subsection (b)(40), repealer and new subsection (b)(54), repealer of subsection (b)(54)(A), amendment of subsection (b)(75), new subsections (b)(87)(B)–(C) and (b)(100)–(109), and amendment of NOTE filed 1–25–99; operative 1–25–99 pursuant to Government Code section 11343.4(d) (Register 99, No. 5).

16. Amendment filed 9–1–2000; operative 9–1–2000 pursuant to Fish and Game Code section 215 (Register 2000, No. 35).
17. New subsections (b)(2)–(b)(2)(B), (b)(13)(A), (b)(29)(C), (b)(64)–(b)(64)(E), (b)(71)(C) and (b)(93)(C)–(D), repealer of former subsection (b)(104)(B), subsection renumbering, amendment of newly designated subsections (b)(30), (b)(30)(D), (b)(70)(A)–(B), (b)(76), (b)(93) and (b)(115)(A) and (C) filed 1–7–2003; operative 1–7–2003 pursuant to Fish and Game Code section 215 (Register 2003, No. 2).
18. Repealer of subsections (b)(6)–(b)(6)(G) and (b)(103)–(b)(104)(E), subsection renumbering, amendment of newly designated subsection (b)(30)(C) and amendment of NOTE filed 3–10–2003; operative 4–9–2003 (Register 2003, No. 11).
19. Amendment of subsection (b)(18)(B), new subsections (b)(25)–(b)(25)(K), (b)(32)–(b)(32)(C), (b)(39)–(b)(39)(K), (b)(45)–(b)(45)(G), (b)(56)–(b)(56)(G) and (b)(82)–(b)(82)(C), subsection renumbering and amendment of newly designated subsection (b)(30) filed 2–9–2004; operative 3–10–2004 (Register 2004, No. 7).
20. New subsections (b)(18), (b)(20)–(b)(20)(B), (b)(46), (b)(68), (b)(81), (b)(90), (b)(93), (b)(109), (b)(114) and (b)(116)–(b)(116)(C), repealer of subsection (b)(64), subsection renumbering and amendment of newly designated subsections (b)(19)(A), (b)(59)(D)–(F) and (b)(113) filed 11–10–2004; operative 11–10–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 46).
21. Amendment filed 3–8–2005; operative 4–7–2005 (Register 2005, No. 10).
22. New subsections (b)(9)–(b)(9)(F) and subsection renumbering filed 4–10–2006; operative 5–10–2006 (Register 2006, No. 15).
23. Amendment of section and NOTE filed 3–26–2008; operative 4–25–2008 (Register 2008, No. 13).

§ 630.5. Marine Resources Protection Act Ecological Reserves.

NOTE: Authority cited: Section 14 of Article XB of the California Constitution; and Sections 1580, 1581, 1582, 1583, 1584, 1585, 8610.9 and 8610.14, Fish and Game Code. Reference: Section 14 of Article XB of the California Constitution; and Sections 1580, 1581, 1582, 1583, 1584, 1585, 8610.9 and 8610.14, Fish and Game Code.

HISTORY

1. New section filed 12–31–93; operative 1–31–94 (Register 93, No. 53).
2. Repealer filed 3–8–2005; operative 4–7–2005 (Register 2005, No. 10).

§ 631. Carmel Bay Ecological Reserve, Monterey County.

NOTE: Authority cited: Sections 1580–1584, Fish and Game Code. Reference: Sections 1580–1584, Fish and Game Code.

HISTORY

1. New section filed 7–28–77; effective thirtieth day thereafter (Register 77, No. 31).
2. Repealer filed 7–29–77; effective thirtieth day thereafter (Register 77, No. 31).

§ 632. Marine Protected Areas (MPAs), Marine Managed Areas (MMAs), and Special Closures.

The areas specified in this section have been declared by the commission to be marine protected areas, marine managed areas, or special closures. Public use of marine protected areas, marine managed areas, or special closures shall be compatible with the primary purposes of such areas. MPAs, MMAs, and special closures are subject to the following general rules and regulations in addition to existing Fish and Game Code statutes and regulations of the commission, except as otherwise provided for in subsection 632(b), areas and special regulations for use. Nothing in this section expressly or implicitly precludes, restricts or requires modification of current or future uses of the waters identified as marine protected areas, special closures, or the lands or waters adjacent to these designated areas by the Department of Defense, its allies or agents.

(a) General Rules and Regulations:

(1) Protection of Resources.

(A) State Marine Reserves: In a state marine reserve, it is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource, except under a scientific collecting permit issued pursuant to Section 650 or specific authorization from the commission for research, restoration, or monitoring purposes.

(B) State Marine Parks: In a state marine park, it is unlawful to injure, damage, take, or possess any living or nonliving marine resource for commercial purposes. Any human use that would compromise protection of the species of interest, natural community or habitat, or geological, cultural, or recreational features, may be restricted by the commission as specified in subsection 632(b), areas and special regulations for use. The commission may issue scientific collecting permits pursuant to Section 650 or specifically authorize research, monitoring, and educational activities and certain recreational harvest in a manner consistent with protecting resource values.

(C) State Marine Conservation Areas: In a state marine conservation area, it is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource for commercial or recreational purposes, or a combination of commercial and recreational purposes except as specified in subsection 632(b), areas and special regulations for use. The commission may issue scientific collecting permits pursuant to Section 650 or specifically authorize research, education, and recreational activities, and certain commercial and recreational harvest of marine resources, provided that these uses do not compromise protection of the species of interest, natural community, habitat, or geological features.

(D) State Marine Recreational Management Areas: In a state marine recreational management area, it is unlawful to perform any activity that would compromise the recreational values for which the area may be designated. Recreational opportunities may be protected, enhanced, or restricted, while preserving basic resource values of the area. No other use is restricted unless specified in subsection 632(b), areas and special regulations for use.

(2) Finfish. Finfish, for the purpose of this section, are defined as any species of bony fish or cartilaginous fish (sharks, skates and rays). Finfish do not include amphibians, invertebrates, plants or algae. The definition of finfish provided in Section 159 does not apply to this Section.

(3) Pelagic Finfish. Pelagic finfish, for the purpose of this section, are a subset of finfish defined as: northern anchovy (Engraulis mordax), barracudas (Sphyraena spp.), billfishes* (family Istiophoridae), dolphinfish (Coryphaena hippurus), Pacific herring (Clupea pallasi), jack mackerel (Trachurus symmetricus), Pacific mackerel (Scomber japonicus), salmon (Oncorhynchus spp.), Pacific sardine (Sardinops sagax), blue shark (Prionace glauca), salmon shark (Lamna ditropis), shortfin mako shark (Isurus oxyrinchus), thresher sharks (Alopias spp.), swordfish (Xiphias gladius), tunas (family Scombridae), and yellowtail (Seriola lalandi). *Marlin is not allowed for commercial take.

(4) Access. Access into marine protected areas or marine managed areas for non–consumptive uses including but not limited to swimming, surfing, diving, boating, hiking and walking is allowed unless otherwise specified in subsection 632(b), areas and special regulations for use.

(5) Introduction of Species. Unless authorized by the commission or as a result of authorized fishing activities, the release of any fish or wildlife species, including domestic or domesticated species, or the introduction of any plant species, is prohibited. The department may reintroduce endemic species to marine protected areas or marine managed areas for management purposes.

(6) Feeding of Fish and Wildlife. The feeding of fish and wildlife is prohibited except permitted scientific collection pursuant to Section 650 or as a result of authorized fishing within state marine conservation areas, state marine parks, and state marine recreational management areas.

(7) Anchoring. Vessels shall be allowed to anchor in any marine protected area or marine managed area with catch onboard unless otherwise specified in subsection 632(b), areas and special regulations for use. Fishing gear shall not be deployed in the water while anchored in a state marine reserve. Fishing gear, except legal fishing gear used to take species identified as allowed for take in subsection 632(b), shall not be deployed in the water while anchored in a state marine recreational management area, state marine park or state marine conservation area. Anchoring regulations shall be consistent with federal law and allowances made for anchoring required by emergency or severe weather.

(8) Transit or Drifting. Vessels shall be allowed to transit through marine protected areas and marine managed areas with catch onboard. Fishing gear shall not be deployed in the water while transiting through a state marine reserve. Fishing gear, except legal fishing gear used to take species identified as allowed for take in subsection 632(b), shall not be deployed in the water while transiting through a state marine recreational management area, state marine park or state marine conservation area.

(b) Areas and Special Regulations for Use. Pursuant to the commission's authority in Fish and Game Code Section 2860 to regulate commercial and recreational fishing and any other taking of marine species in MPAs, Fish and Game Code Sections 10500(f), 10500(g), 10502.5,

10502.6, 10502.7, 10502.8, 10655, 10655.5, 10656, 10657, 10657.5, 10658, 10660, 10661, 10664, 10666, 10667, 10711, 10801, 10900, 10901, 10902, 10903, 10904, 10905, 10906, 10907, 10908, 10909, 10910, 10911, 10912, 10913, and 10932 are made inoperative as they apply to Subsection 632(b). All geographic coordinates listed use the North American Datum 1983 (NAD83) reference datum:

(1) Punta Gorda State Marine Reserve.

(A) This area is bounded by the three–fathom inshore depth contour, the 30–fathom depth contour and the following points:

40° 16.43′ N. lat. 124° 22.00′ W. long.;
40° 16.43′ N. lat. 124° 23.50′ W. long.;
40° 14.83′ N. lat. 124° 23.18′ W. long.; and
40° 15.23′ N. lat. 124° 21.62′ W. long.

(B) Take of all living marine resources is prohibited.

(C) Swimming. No person shall swim, wade, dive, or use any diving equipment within the Punta Gorda State Marine Reserve except as authorized pursuant to scientific research approved by the department.

(D) Boating. Except as allowed pursuant to Federal law, no person shall launch or operate a boat or other floating device within the Punta Gorda State Marine Reserve except to pass through the area during the normal course of vessel transit along the coast, to avoid inclement weather, or pursuant to scientific research approved by the department.

(E) Firearms. No person shall possess, fire, or discharge any firearm, bow and arrow, air or gas gun, spear gun, or any other weapon of any kind within, or into the Punta Gorda State Marine Reserve except as authorized pursuant to scientific research approved by the department.

(F) Public Entry. Public entry into the Punta Gorda State Marine Reserve may be restricted at the discretion of the department to protect wildlife, aquatic life, or habitat. No person, except state and local law enforcement officers, fire suppression agencies and employees of the department in the performance of their official duties or persons possessing written permission from the department, or institution or agency entering into a memorandum of understanding (MOU) with the department, may enter an area which is closed to public entry.

(G) Pesticides, Herbicides, and Other Regulated Chemicals. The use of pesticides, herbicides, and other regulated chemicals is prohibited in the Punta Gorda State Marine Reserve except as authorized pursuant to scientific research approved by the department. Where such chemicals are intended to be used as a part of any research program, any necessary authorization and/or permits required to dispense such chemicals into state waters or tide and submerged lands shall be obtained prior to final approval of the research by the department.

(H) Litter. No person shall deposit, drop, or scatter any debris on the Punta Gorda State Marine Reserve. Any refuse resulting from a person's use of an area must be removed from that area by such person.

(I) Aircraft. No person shall operate any aircraft or hovercraft within the Punta Gorda State Marine Reserve, except as authorized pursuant to scientific research approved by the department.

(J) Pets. Pets, including but not limited to, dogs and cats, are prohibited from entering the Punta Gorda State Marine Reserve unless authorized by the department.

(K) Memorandum of Understanding (MOU). The department may enter into MOU's with colleges, universities, and other bonafide research organizations to conduct marine–related research within the Punta Gorda State Marine Reserve.

(L) Scientific research conducted within the Punta Gorda State Marine Reserve shall not interfere with access by land to coastal trails along the shoreline adjacent to the reserve.

(2) MacKerricher State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, the 3–fathom depth contour and the following points:

39° 29.81′ N. lat. 123° 47.50′ W. long.;
39° 29.95′ N. lat. 123° 47.80′ W. long.;
39° 27.62′ N. lat. 123° 48.80′ W. long.; and
39° 27.55′ N. lat. 123° 48.52′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, red abalone, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Only the following species may be taken commercially: finfish, crabs, ghost shrimp, jackknife clams, sea urchins, squid, algae except giant kelp and bull kelp and worms except that no worms may be taken in any mussel bed, nor may any person pick up, remove, detach from the substrate any other organisms, or break up, move or destroy any rocks or other substrate or surfaces to which organisms are attached.

(3) Point Cabrillo State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 1000 feet seaward of mean lower low water, and the following points:

39° 21.24′ N. lat. 123° 49.25′ W. long.;
39° 21.33′ N. lat. 123° 49.64′ W. long.;
39° 20.66′ N. lat. 123° 49.68′ W. long.; and
39° 20.57′ N. lat. 123° 49.27′ W. long.

(B) Take of all living marine resources is prohibited except the commercial take of finfish and marine aquatic plants.

(4) Russian Gulch State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, the 3–fathom depth contour and the following points:

39° 19.86′ N. lat. 123° 48.84′ W. long.;
39° 19.85′ N. lat. 123° 48.89′ W. long.;
39° 19.52′ N. lat. 123° 48.46′ W. long.; and
39° 19.52′ N. lat. 123° 48.23′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, red abalone, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Only the following species may be taken commercially: finfish, crabs, ghost shrimp, jackknife clams, sea urchins, algae except giant kelp and bull kelp and worms except that no worms may be taken in any mussel bed, nor may any person pick up, remove, detach from the substrate any other organisms, or break up, move or destroy any rocks or other substrate or surfaces to which organisms are attached.

(5) Van Damme State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, the 3–fathom depth contour and the following points:

39° 16.45′ N. lat. 123° 47.60′ W. long.;
39° 16.355′ N. lat. 123° 47.60′ W. long.;
39° 16.27′ N. lat. 123° 47.545′ W. long.; and
39° 16.27′ N. lat. 123° 47.43′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, red abalone, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Only the following species may be taken commercially: finfish, crabs, ghost shrimp, jackknife clams, sea urchins, algae except giant kelp and bull kelp and worms except that no worms may be taken in any mussel bed, nor may any person pick up, remove, detach from the substrate any other organisms, or break up, move or destroy any rocks or other substrate or surfaces to which organisms are attached.

(6) Manchester and Arena Rock State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

39° 00.30′ N. lat. 123° 41.90′ W. long.;
39° 00.30′ N. lat. 123° 44.40′ W. long.;
38° 58.30′ N. lat. 123° 45.60′ W. long.; and
38° 57.50′ N. lat. 123° 43.70′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, red abalone, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Only the following species may be taken commercially: finfish, crabs, ghost shrimp, jackknife clams, sea urchins, algae except giant kelp and bull kelp and worms except that no worms may be taken in any mussel bed, nor may any person pick up, remove, detach from the substrate any other organisms, or break up, move or destroy any rocks or other substrate or surfaces to which organisms are attached.

(7) Del Mar Landing State Marine Park.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

38° 44.44′ N. lat. 123° 30.81′ W. long.;
38° 44.32′ N. lat. 123° 30.95′ W. long.;
38° 44.25′ N. lat. 123° 30.64′ W. long.;
38° 44.28′ N. lat. 123° 30.49′ W. long.; and
38° 44.40′ N. lat. 123° 30.37′ W. long.

(B) Take of all living marine resources is prohibited except the recreational take of finfish by hook and line or spear.

(8) Salt Point State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

38° 35.18′ N. lat. 123° 20.49′ W. long.;
38° 34.40′ N. lat. 123° 21.35′ W. long.;
38° 33.05′ N. lat. 123° 19.58′ W. long.; and
38° 33.55′ N. lat. 123° 18.99′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, red abalone, chiones, clams, cockles, rock scallops, native oysters, crabs, lobsters, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Only the following species may be taken commercially: finfish, crabs, ghost shrimp, jackknife clams, sea urchins, algae except giant kelp and bull kelp and worms except that no worms may be taken in any mussel bed, nor may any person pick up, remove, detach from the substrate any other organisms, or break up, move or destroy any rocks or other substrate or surfaces to which organisms are attached.

(9) Gerstle Cove State Marine Conservation Area.

(A) This area lies within the Salt Point State Marine Conservation Area and is bounded by the mean high tide line and a straight line connecting the following points:

38° 33.93′ N. lat. 123° 19.85′ W. long.; and
38° 33.93′ N. lat. 123° 19.65′ W. long.

(B) Take of all living marine resources is prohibited except the commercial take of finfish and algae except giant kelp and bull kelp.

(10) Fort Ross State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, the 3–fathom depth contour, and the following points:

38° 30.71′ N. lat. 123° 15.14′ W. long.;
38° 30.57′ N. lat. 123° 15.29′ W. long.;
38° 30.35′ N. lat. 123° 14.50′ W. long.; and
38° 30.61′ N. lat. 123° 14.16′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, red abalone, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. The commercial take of all species other than giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) is allowed.

(11) Sonoma Coast State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, the 3–fathom depth contour, and the following points:

38° 22.55′ N. lat. 123° 04.64′ W. long.;
38° 22.54′ N. lat. 123° 04.78′ W. long.;
38° 19.50′ N. lat. 123° 04.80′ W. long.; and
38° 19.40′ N. lat. 123° 04.70′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, red abalone, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. The commercial take of all species other than giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) is allowed.

(12) Bodega State Marine Reserve.

(A) This area is bounded by the mean high tide line, a distance of 1000 feet seaward of mean lower low water, and the following points:

38° 19.38′ N. lat. 123° 04.47′ W. long.;
38° 19.57′ N. lat. 123° 04.71′ W. long.;
38° 18.56′ N. lat. 123° 04.33′ W. long.; and
38° 18.71′ N. lat. 123° 04.15′ W. long.

(B) Take of all living marine resources is prohibited.

(C) In the Bodega State Marine Reserve licensees of the Regents of the University of California and all officers, employees, and students of such university may take, for scientific purposes, any invertebrate or specimen of marine plant life without a permit from the department.

(D) The director of the Bodega State Marine Reserve may authorize any person to enter the Reserve for the purpose of taking fish, invertebrates, or marine plants for scientific study and to take or possess fish, invertebrates, or marine plants for scientific study.

(E) Except as permitted by federal law or emergency caused by hazardous weather, it is unlawful to anchor or moor a vessel in the Bodega State Marine Reserve without authorization from the reserve director for the purpose of scientific study.

(13) Tomales Bay State Marine Park.

(A) This area is bounded by the mean high tide line of Tomales Bay within Tomales Bay Ecological Reserve southeastward of a line drawn between the following two points:

38° 05.73′ N. lat. 122° 49.84′ W. long.; and
38° 05.45′ N. lat. 122° 50.57′ W. long.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants.

(C) Only lightweight, hand–carried boats may be launched or operated within the park.

(D) Waterfowl may be taken in accordance with the general waterfowl regulations (Sections 502, 550, 551, and 552).

(14) Point Reyes Headlands State Marine Conservation Area.

(A)This area is bounded by the mean high tide line, a distance of 1000 feet seaward of mean lower low water, and the following points:

37° 59.73′ N. lat. 123° 01.46′ W. long.;
37° 59.73′ N. lat. 123° 01.68′ W. long.;
37° 59.40′ N. lat. 122° 57.60′ W. long.; and
37° 59.40′ N. lat. 122° 57.81′ W. long.

(B) Take of all living marine resources is prohibited except the commercial take of finfish and algae other than giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*).

(15) Estero de Limantour State Marine Conservation Area.

(A) This area consists of waters below the mean high tide line within Estero de Limantour eastward of a line drawn between the following two points:

38° 01.97′ N. lat. 122° 55.97′ W. long.; and
38° 02.33′ N. lat. 122° 55.97′ W. long.

(B) Take of all living marine resources is prohibited except the commercial take of finfish and algae other than giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*).

(16) Duxbury Reef State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 1000 feet seaward of mean lower low water, and the following points:

37° 55.52′ N. lat. 122° 44.17′ W. long.;

37° 55.42′ N. lat. 122° 44.31′ W. long.;
37° 53.65′ N. lat. 122° 41.91′ W. long.; and
37° 53.77′ N. lat. 122° 42.02′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: Red abalone, Dungeness crab, rock crabs, rockfish (family Scorpaenidae), lingcod, cabezon, surfperch (family Embiotocidae), halibut, flounder, sole, turbot, salmon, kelp greenling, striped bass, steelhead, monkeyface–eel, wolf–eel, smelt, and silversides.

2. The commercial take of all species other than giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) is allowed.

(17) Farallon Islands State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and a distance of one nautical mile offshore Southeast Farallon and North Farallon Islands.

(B) Take other than the recreational take of marine aquatic plants is allowed except within the areas described in this section during the stated timeframes.

(C) All vessels shall observe a five (5) nautical mile per hour speed limit within 1,000 feet of any shoreline in the reserve.

(D) All commercial abalone and sea urchin diving vessels operating in the reserve shall terminate their vessel engine exhaust system either through a muffler for dry exhaust systems, or below the vessel waterline for wet exhaust systems.

(E) All commercial abalone and sea urchin diving vessels equipped with an open, deck–mounted air compressor system, while operating in the conservation area, shall have the air compressor's engine exhaust system terminate below the vessel waterline.

(F) From March 15 through August 15 of each year no vessel shall be operated or anchored less than 300 feet from the shoreline of any of the four islets comprising the North Farallons, including North Farallon, the Island of St. James and the two unnamed islets located between them, in the vicinity of 37° 46′ N. lat. 123° 06′ W. long., except in the area beginning at a line extending due west magnetic from the northernmost point of land on North Farallon and continuing clockwise to a line drawn due west magnetic from the southernmost point of land on North Farallon and in the area beginning at a line drawn due west magnetic from the northernmost point of land on the northernmost of the two unnamed islets extending clockwise to a line drawn due south magnetic from the southernmost point of land on that islet.

(G) From March 15 through August 15 of each year no vessel shall be operated or anchored less than 300 feet from the shoreline in the area beginning at the south end of Jordan Channel, westward around Indian Head, then generally northward past Great Arch Rock, then generally following the shoreline to a line extending due west from the northernmost point of land on Sugarloaf Island or in the area from the east end of Mussel Flat, generally southward to the northeasternmost point of land on Saddle Rock (Seal Rock) then generally southwest along the northerly shoreline of Saddle Rock to the southwesternmost point of land on Saddle Rock and continuing generally northward to the west end of Mussel Flat, both areas at Southeast Farallon Island.

(H) Nothing in this section shall prohibit emergency anchorage or vessel operation necessary to protect property or human life.

(18) Fagan Marsh State Marine Park.

(A) This area consists of waters below the mean high tide line within the Fagan Marsh Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants.

(C) Only lightweight, hand–carried boats may be launched or operated within the park.

(19) Peytonia Slough State Marine Park.

(A) This area consists of waters below the mean high tide line within the Peytonia Slough Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants.

(C) Only lightweight, hand–carried boats may be launched or operated within the park.

(20) Corte Madera Marsh State Marine Park.

(A) This area consists of waters below the mean high tide line within the Corte Madera Marsh Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants from shore only.

(C) Only lightweight, hand–carried boats may be launched or operated within the park.

(D) Swimming, wading, and diving are prohibited within the park.

(21) Marin Islands State Marine Park.

(A) This area consists of waters below the mean high tide line within the Marin Islands Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants from shore only.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(22) Albany Mudflats State Marine Park.

(A) This area consists of waters below the mean high tide line within the Albany Mudflats Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants from shore only.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(23) Robert W. Crown State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and a distance of 150 feet seaward of mean lower low water, between the following points:
37° 45.97′ N. lat. 122° 16.84′ W. long.; and
37° 45.95′ N. lat. 122° 16.52′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Finfish may be taken recreationally by hook and line only.

2. Finfish and kelp may be taken commercially.

(24) Redwood Shores State Marine Park.

(A) This area consists of waters below the mean high tide line within the Redwood Shores Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants.

(C) Only lightweight, hand–carried boats may be launched or operated in within the park.

(25) Bair Island State Marine Park.

(A) This area consists of waters below the mean high tide line within the Bair Island Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than kelp from shore only.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(D) No person, except state and local law enforcement officers, fire suppression agencies and employees of the department in the performance of their official duties or persons possessing written permission from the department, shall enter this park during the period February 15 through May 20.

(E) Waterfowl may be taken in accordance with the general waterfowl regulations (Sections 502, 550, 551, and 552).

(26) James V. Fitzgerald State Marine Park.

(A) This area is bounded by the mean high tide line, a distance of 1000 feet seaward of mean lower low water, and the following points:
37° 32.68′ N. lat. 122° 31.00′ W. long.;
37° 32.75′ N. lat. 122° 31.18′ W. long.;
37° 29.73′ N. lat. 122° 30.13′ W. long.; and
37° 29.74′ N. lat. 122° 29.90′ W. long.

(B) Take of all living marine resources is prohibited except the recreational take by hook and line or spear of: rockfish (family Scorpaenidae), lingcod, surfperch (family Embiotocidae), monkeyface eel, rock eel, white croaker, halibut, cabezon, kelp greenling, and smelt (Families Osmeridae and Atherinidae).

(27) Año Nuevo State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and a distance of 200 feet seaward of mean lower low water between the following two points:

37° 10.00′ N. lat. 122° 21.80′ W. long; and

37° 08.70′ N. lat. 122° 21.00′ W. long.

The area then continues southward bounded by the mean high tide line and straight lines connecting the following points in the order listed:

37° 08.70′ N. lat. 122° 21.00′ W. long.;

37° 04.70′ N. lat. 122° 21.00′ W. long.; and

37° 04.70′ N. lat. 122° 16.20′ W. long.

(B) Take of all living marine resources is prohibited except the commercial take of giant kelp (*Macrocystis pyrifera*) by hand harvest only.

(28) Greyhound Rock State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, the three nautical mile offshore boundary and straight lines connecting the following points in the order listed except where noted:

37° 04.70′ N. lat. 122° 16.20′ W. long.;

37° 04.70′ N. lat. 122° 21.00′ W. long.;

37° 03.55′ N. lat. 122° 21.00′ W. long.; thence southward along the three nautical mile offshore boundary to

37° 02.57′ N. lat. 122° 19.10′ W. long.; and

37° 02.57′ N. lat. 122° 14.00′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: giant kelp (*Macrocystis pyrifera*) by hand harvest only, squid, salmon, and, by hook–and–line from shore only, other finfish.

2. Only the following species may be taken commercially: giant kelp (*Macrocystis pyrifera*) by hand harvest only, salmon, and squid except that not more than five percent (5%) by landed weight of any commercial squid catch may be other species taken incidentally to squid.

(29) Natural Bridges State Marine Reserve.

(A) This area is bounded by the mean high tide line and a distance of 200 feet seaward of mean lower low water between the following two points:

36° 57.90′ N. lat. 122° 07.65′ W. long.; and

36° 57.00′ N. lat. 122° 03.50′ W. long.

(B) Take of all living marine resources is prohibited.

(30) Elkhorn Slough State Marine Reserve.

(A) This area includes the waters below mean high tide within Elkhorn Slough lying east of longitude 121° 46.40′ W. and south of latitude 36° 50.50′ N.

(B) Take of all living marine resources is prohibited.

(31) Elkhorn Slough State Marine Conservation Area.

(A) This area includes the waters below mean high tide within Elkhorn Slough east of the Highway 1 Bridge and west of longitude 121° 46.40′ W.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish by hook–and–line only and clams. Clams may only be taken on the north shore of the slough in the area adjacent to the Moss Landing State Wildlife Area [subsection 550(a)].

(32) Moro Cojo Slough State Marine Reserve.

(A) This area includes the waters within Moro Cojo Slough below mean high tide and east of the Highway 1 Bridge and west of the crossing of the Southern Pacific Railroad tracks.

(B) Take of all living marine resources is prohibited.

(33) Soquel Canyon State Marine Conservation Area.

(A) This area is bounded by straight lines connecting the following points in the order listed:

36° 51.00′ N. lat. 121° 56.00′ W. long.;

36° 51.00′ N. lat. 122° 03.80′ W. long.;

36° 48.00′ N. lat. 122° 02.88′ W. long.;

36° 48.00′ N. lat. 121° 56.00′ W. long.; and

36° 51.00′ N. lat. 121° 56.00′ W. long.

(B) Take of all living marine resources is prohibited except the commercial and recreational take of pelagic finfish [subsection 632(a)(3)].

(34) Portuguese Ledge State Marine Conservation Area.

(A) This area is bounded by straight lines connecting the following points in the order listed:

36° 43.00′ N. lat. 121° 56.00′ W. long.;

36° 43.00′ N. lat. 122° 01.30′ W. long.;

36° 41.00′ N. lat. 122° 00.80′ W. long.;

36° 41.00′ N. lat. 121° 56.00′ W. long.; and

36° 43.00′ N. lat. 121° 56.00′ W. long.

(B) Take of all living marine resources is prohibited except the commercial and recreational take of pelagic finfish [subsection 632(a)(3)].

(35) Edward F. Ricketts State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

36° 36.50′ N. lat. 121° 53.37′ W. long.;

36° 37.25′ N. lat. 121° 53.78′ W. long.; and

36° 37.10′ N. lat. 121° 54.09′ W. long.

(B) Take of all living marine resources is prohibited except:

1. The recreational take of finfish by hook–and–line is allowed.

2. The commercial take of giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) is allowed by hand in the area defined by subsection 165(c)(4)(D) under the following conditions:

a. A kelp harvester with a valid license issued pursuant to Section 165 may take no more than 12 tons of kelp from the portion of Administrative Kelp Bed 220 within the Edward F. Ricketts State Marine Conservation Area in any calendar month.

b. Duplicate landing records must be kept on board the harvest vessel in accordance with the requirements of Section 165.

(36) Lovers Point State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

36° 37.10′ N. lat. 121° 54.09′ W. long.;

36° 37.25′ N. lat. 121° 53.78′ W. long.;

36° 37.38′ N. lat. 121° 53.85′ W. long.;

36° 37.60′ N. lat. 121° 54.75′ W. long.; and

36° 37.60′ N. lat. 121° 54.91′ W. long.

(B) Take of all living marine resources is prohibited.

(37) Pacific Grove Marine Gardens State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

36° 37.60′ N. lat. 121° 54.91′ W. long.;

36° 37.60′ N. lat. 121° 54.75′ W. long.;

36° 38.70′ N. lat. 121° 55.40′ W. long.;

36° 38.90′ N. lat. 121° 56.60′ W. long.; and

36° 38.22′ N. lat. 121° 56.15′ W. long.

(B) Take of all living marine resources is prohibited except:

1. The recreational take of finfish is allowed.

2. The commercial take of giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) by hand is allowed under the following conditions:

a. A kelp harvester with a valid license issued pursuant to Section 165 may take no more than 44 tons of kelp from the portion of Administrative Kelp Bed 220 within the Pacific Grove Marine Gardens State Marine Conservation Area in any calendar month.

b. Duplicate landing records must be kept on board the harvest vessel in accordance with the requirements of Section 165.

(38) Asilomar State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

36° 38.22′ N. lat. 121° 56.15′ W. long.;

36° 38.90′ N. lat. 121° 56.60′ W. long.; and

36° 36.60′ N. lat. 121° 57.50′ W. long.

(B) Take of all living marine resources is prohibited.

(39) Carmel Pinnacles State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
36° 33.65′ N. lat. 121° 57.60′ W. long.;
36° 33.65′ N. lat. 121° 58.50′ W. long.;
36° 33.10′ N. lat. 121° 58.50′ W. long.;
36° 33.10′ N. lat. 121° 57.60′ W. long.; and
36° 33.65′ N. lat. 121° 57.60′ W. long.
(B) Take of all living marine resources is prohibited.
(40) Carmel Bay State Marine Conservation Area.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
36° 33.65′ N. lat. 121° 57.10′ W. long.;
36° 31.70′ N. lat. 121° 56.30′ W. long.; and
36° 31.70′ N. lat. 121° 55.55′ W. long.
(B) Take of all living marine resources is prohibited except:
1. The recreational take of finfish is allowed.
2. The commercial take of giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) by hand is allowed under the following conditions:
a. A kelp harvester with a valid license issued pursuant to Section 165 may take no more than 44 tons of kelp from the portion of Administrative Kelp Bed 219 within the Carmel Bay State Marine Conservation Area in any calendar month.
b. Duplicate landing records must be kept on board the harvest vessel in accordance with the requirements of Section 165.
(41) Point Lobos State Marine Reserve.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
36° 31.70′ N. lat. 121° 55.55′ W. long.;
36° 31.70′ N. lat. 121° 58.25′ W. long.;
36° 28.88′ N. lat. 121° 58.25′ W. long.; and
36° 28.88′ N. lat. 121° 56.30′ W. long.
(B) Take of all living marine resources is prohibited.
(C) Within the portion of the Point Lobos State Marine Reserve which also falls within the boundary of the Point Lobos State Reserve (State Park Unit), restrictions on boating and diving activities exist. Contact the California Department of Parks and Recreation for current restrictions.
(42) Point Lobos State Marine Conservation Area.
(A) This area is bounded by straight lines connecting the following points in the order listed except where noted:
36° 31.70′ N. lat. 121° 58.25′ W. long.;
36° 31.70′ N. lat. 122° 01.30′ W. long.; thence southward along the three nautical mile offshore boundary to
36° 28.88′ N. lat. 122° 00.55′ W. long.;
36° 28.88′ N. lat. 121° 58.25′ W. long.; and
36° 31.70′ N. lat. 121° 58.25′ W. long.
(B) Take of all living marine resources is prohibited except the recreational and commercial take of salmon, albacore, and the commercial take of spot prawn.
(43) Point Sur State Marine Reserve.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
36° 18.40′ N. lat. 121° 54.10′ W. long.;
36° 18.40′ N. lat. 121° 56.00′ W. long.;
36° 15.00′ N. lat. 121° 52.50′ W. long.; and
36° 15.00′ N. lat. 121° 50.25′ W. long.
(B) Take of all living marine resources is prohibited.
(44) Point Sur State Marine Conservation Area.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:
36° 18.40′ N. lat. 121° 56.00′ W. long.;
36° 18.40′ N. lat. 121° 58.33′ W. long.; thence southward along the three nautical mile offshore boundary to
36° 15.00′ N. lat. 121° 55.10′ W. long.;
36° 15.00′ N. lat. 121° 52.50′ W. long.; and
36° 18.40′ N. lat. 121° 56.00′ W. long.
(B) Take of all living marine resources is prohibited except the commercial and recreational take of salmon and albacore.
(45) Big Creek State Marine Reserve.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:
36° 07.20′ N. lat. 121° 38.00′ W. long.;
36° 07.20′ N. lat. 121° 39.00′ W. long.;
36° 05.20′ N. lat. 121° 38.00′ W. long.;
36° 05.20′ N. lat. 121° 41.25′ W. long.; thence southward along the three nautical mile offshore boundary to
36° 02.65' N. lat. 121° 39.70′ W. long.; and
36° 02.65' N. lat. 121° 35.13′ W. long.
(B) Take of all living marine resources is prohibited.
(C) Anchoring. Except as pursuant to Federal law or emergency caused by hazardous weather, it is unlawful to anchor or moor a vessel in waters shallower than 10 fathoms in the Big Creek State Marine Reserve.
(46) Big Creek State Marine Conservation Area.
(A) This area is bounded by the three nautical mile offshore boundary and straight lines connecting the following points in the order listed except where noted:
36° 07.20′ N. lat. 121° 39.00′ W. long.;
36° 07.20′ N. lat. 121° 42.90′ W. long.; thence southward along the three nautical mile offshore boundary to
36° 05.20′ N. lat. 121° 41.25′ W. long.;
36° 05.20′ N. lat. 121° 38.00′ W. long.; and
36° 07.20′ N. lat. 121° 39.00′ W. long.
(B) Take of all living marine resources is prohibited except the commercial and recreational take of salmon, albacore, and the commercial take of spot prawn.
(47) Piedras Blancas State Marine Reserve.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
35° 42.85′ N. lat. 121° 18.95′ W. long.;
35° 42.85′ N. lat. 121° 21.00′ W. long.;
35° 39.15′ N. lat. 121° 18.50′ W. long.; and
35° 39.15′ N. lat. 121° 14.45′ W. long.
(B) Take of all living marine resources is prohibited.
(48) Piedras Blancas State Marine Conservation Area.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:
35° 42.85′ N. lat. 121° 21.00′ W. long.;
35° 42.85′ N. lat. 121° 22.85′ W. long.; thence southward along the three nautical mile offshore boundary to
35° 39.15′ N. lat. 121° 20.90′ W. long.;
35° 39.15′ N. lat. 121° 18.50′ W. long.; and
35° 42.85′ N. lat. 121° 21.00′ W. long.
(B) Take of all living marine resources is prohibited except the commercial and recreational take of salmon and albacore.
(49) Cambria State Marine Conservation Area.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
35° 37.10′ N. lat. 121° 09.20′ W. long.;
35° 37.10′ N. lat. 121° 10.70′ W. long.;
35° 32.85′ N. lat. 121° 06.70′ W. long.; and
35° 32.85′ N. lat. 121° 05.85′ W. long.
(B) The commercial take of all living marine resources is prohibited. Recreational take is allowed.
(50) White Rock (Cambria) State Marine Conservation Area.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
35° 32.85′ N. lat. 121° 05.85′ W. long.;
35° 32.85′ N. lat. 121° 06.70′ W. long.;
35° 30.50′ N. lat. 121° 05.00′ W. long.; and
35° 30.50′ N. lat. 121° 03.40′ W. long.

(B) Take of all living marine resources is prohibited except the commercial take of giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) under the following conditions:

1. A kelp harvester with a valid license issued pursuant to Section 165 and holding a valid lease to Administrative Kelp Bed 208 may take no more than 125 tons of kelp from the portion of Administrative Kelp Bed 208 within the White Rock (Cambria) State Marine Conservation Area in any calendar month.

2. Duplicate landing records must be kept on board the harvest vessel in accordance with the requirements of Section 165.

(51) Morro Bay State Marine Recreational Management Area.

(A) This area includes the area below mean high tide within Morro Bay east of the Morro Bay entrance breakwater and west of longitude 120° 50.34′ W.

(B) Recreational hunting of waterfowl is allowed unless otherwise restricted by hunting regulations (sections 502, 550, 551, and 552).

(C) Take of all living marine resources is prohibited except the following activities are allowed north of latitude 35° 19.70′ N:

1. The recreational take of finfish

2. Aquaculture of oysters, pursuant to a valid State water bottom lease and permit.

3. Storing finfish taken outside the Morro Bay State Marine Recreational Management Area in a receiver for bait purposes.

(52) Morro Bay State Marine Reserve.

(A) This area includes the area below mean high tide line within Morro Bay east of longitude 120° 50.34′ W.

(B) Take of all living marine resources is prohibited.

(53) Point Buchon State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

35° 15.25′ N. lat. 120° 54.00′ W. long.;
35° 15.25′ N. lat. 120° 56.00′ W. long.;
35° 11.00′ N. lat. 120° 52.40′ W. long.; and
35° 13.30′ N. lat. 120° 52.40′ W. long.

(B) Take of all living marine resources is prohibited.

(54) Point Buchon State Marine Conservation Area.

(A) This area is bounded by straight lines connecting the following points in the order listed except where noted:

35° 15.25′ N. lat. 120° 56.00′ W. long.;
35° 15.25′ N. lat. 120° 57.80′ W. long.; thence southward along the three nautical mile offshore boundary to
35° 11.00′ N. lat. 120° 55.20′ W. long.;
35° 11.00′ N. lat. 120° 52.40′ W. long.; and
35° 15.25′ N. lat. 120° 56.00′ W. long.

(B) Take of all living marine resources is prohibited except the commercial and recreational take of salmon and albacore.

(55) Vandenberg State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

34° 44.65′ N. lat. 120° 37.75′ W. long.;
34° 44.65′ N. lat. 120° 40.00′ W. long.;
34° 33.25′ N. lat. 120° 40.00′ W. long.; and
34° 33.25′ N. lat. 120° 37.25′ W. long.

(B) Take of all living marine resources is prohibited except take incidental to base operations and commercial space launch operations identified by the Vandenberg Air Force Base Commander as mission critical.

(C) Public Entry. Public entry into the Vandenberg State Marine Reserve may be restricted at the discretion of the department to protect wildlife, aquatic life, or habitat, or by the Commander of Vandenberg Air Force Base to protect and provide safety for base operations.

(D) The Department shall enter into a Memorandum of Understanding (MOU) with the Commander of Vandenberg Air Force Base for the mutually beneficial management and administration of the Vandenberg State Marine Reserve. The MOU shall include, but not be limited to, the identification of Vandenberg Air Force Base's national defense mission activities that are unrestricted by the subject regulations and details on management and administrative roles and responsibilities.

(56) Refugio State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

34° 27.63′ N. lat. 120° 05.32′ W. long.;
34° 27.34′ N. lat. 120° 05.75′ W. long.;
34° 27.34′ N. lat. 120° 02.75′ W. long.; and
34° 27.76′ N. lat. 120° 02.75′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Only the following species may be taken commercially: finfish, crabs, ghost shrimp, jackknife clams, sea urchins, algae except giant kelp and bull kelp and worms except that no worms may be taken in any mussel bed, nor may any person pick up, remove, detach from the substrate any other organisms, or break up, move or destroy any rocks or other substrate or surfaces to which organisms are attached.

(57) Goleta Slough State Marine Park.

(A) This area consists of waters below the mean high tide line within the Goleta Slough Ecological Reserve:

(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants from designated areas.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(D) No person shall enter this park and remain therein except on established trails, paths or other designated areas except department employees or designated employees of Santa Barbara Airport, City of Santa Barbara and Goleta Valley Mosquito Abatement District for the purposes of carrying out official duties.

(58) Richardson Rock (San Miguel Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line of Richardson Rock and straight lines connecting the following points in the order listed except where noted:

34° 07.905′ N. lat. 120° 28.200′ W. long.;
34° 02.211′ N. lat. 120° 28.200′ W. long.;
34° 02.211′ N. lat. 120° 31.467′ W. long.; thence northward along the three nautical mile offshore boundary to
34° 07.905′ N. lat. 120° 28.200′ W. long.

(B) Take of all living marine resources is prohibited.

(59) San Miguel Island Special Closure. Special restrictions on boating and access apply to San Miguel Island as follows.

(A) Boating is allowed at San Miguel Island except west of a line drawn between Judith Rock (34° 01.50′ N. lat. 120° 23.30′ W. long.) and Castle Rock (34° 03.30′ N. lat. 120° 26.30′ W. long.) where boats are prohibited closer than 300 yards from shore.

1. Notwithstanding the 300–yard boating closure between Judith Rock and Castle Rock, the following shall apply:

a. Boats may approach San Miguel Island no nearer than 100 yards from shore during the period(s) from March 15 through April 30, and October 1 through December 15; and

b. Boats operated by commercial sea urchin divers may enter waters of the 300– yard area between the western boundary of the Judith Rock State Marine Reserve at 120° 26.60′ W. long. and Castle Rock for the purpose of fishing sea urchins during the period(s) from March 15 through April 30, and October 1 through December 15.

2. The department may rescind permission for boats to enter waters within 300 yards between Judith Rock and Castle Rock upon finding that impairment to the island marine mammal resource is imminent. Immediately following such closure, the department will request the commission

to hear, at its regularly scheduled meeting, presentation of documentation supporting the need for such closure.

(B) Other Requirements:

1. Boats traveling within 300 yards of the shoreline or anchorages shall operate with a minimum amount of noise and shall not exceed speeds of five miles per hour.

2. Except as permitted by federal law or emergency caused by hazardous weather, boats may be anchored overnight only at Tyler Bight and Cuyler Harbor.

3. Landing is allowed on San Miguel Island only at the designated landing beach in Cuyler Harbor.

4. No person shall have access to all other offshore rocks and islands at San Miguel Island.

(60) Harris Point (San Miguel Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

34° 03.160′ N. lat. 120° 23.300′ W. long.;

34° 09.285′ N. lat. 120° 23.300′ W. long.; thence southeastward along the three nautical mile offshore boundary to

34° 06.322′ N. lat. 120° 18.400′ W. long.; and

34° 01.755′ N. lat. 120° 18.400′ W. long.

(B) Take of all living marine resources is prohibited.

(C) An exemption to the reserve, where commercial and recreational take of living marine resources is allowed, exists between the mean high tide line in Cuyler Harbor and a straight line between the following points:

34° 03.554′ N. lat. 120° 21.311′ W. long.; and

34° 02.908′ N. lat. 120° 20.161′ W. long.

(61) Judith Rock (San Miguel Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

34° 01.802′ N. lat. 120° 26.600′ W. long.;

33° 58.508′ N. lat. 120° 26.600′ W. long.; thence eastward along the three nautical mile offshore boundary to

33° 58.510′ N. lat. 120° 25.300′ W. long.; and

34° 01.618′ N. lat. 120° 25.300′ W. long.;

(B) Take of all living marine resources is prohibited.

(62) Carrington Point (Santa Rosa Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

34° 01.296′ N. lat. 120° 05.200′ W. long.

34° 04.000′ N. lat. 120° 05.200′ W. long.;

34° 04.000′ N. lat. 120° 01.000′ W. long.;

34° 00.500′ N. lat. 120° 01.000′ W. long.; and

34° 00.500′ N. lat. 120° 02.930′ W. long.

(B) Take of all living marine resources is prohibited.

(63) Skunk Point (Santa Rosa Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

33° 59.000′ N. lat. 119° 58.808′ W. long.;

33° 59.000′ N. lat. 119° 58.000′ W. long.;

33° 57.100′ N. lat. 119° 58.000′ W. long.; and

33° 57.100′ N. lat. 119° 58.257′ W. long.

(B) Take of all living marine resources is prohibited.

(64) South Point (Santa Rosa Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

33° 55.014′ N. lat. 120° 10.000′ W. long.

33° 51.506′ N. lat. 120° 10.000′ W. long.; thence eastward along the three nautical mile offshore boundary to

33° 50.657′ N. lat. 120° 06.500′ W. long.;

33° 53.800′ N. lat. 120° 06.500′ W. long.; and

33° 53.800′ N. lat. 120° 06.544′ W. long.

(B) Take of all living marine resources is prohibited.

(65) Painted Cave (Santa Cruz Island) State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

34° 04.492′ N. lat. 119° 53.000′ W. long.;

34° 05.200′ N. lat. 119° 53.000′ W. long.; thence eastward along a line one nautical mile offshore to

34° 05.000′ N. lat. 119° 51.000′ W. long.; and

34° 04.034′ N. lat. 119° 51.000′ W. long.

(B) Take of all living marine resources is prohibited except for the recreational take of lobster and pelagic finfish [subsection 632(a)(3)].

(66) Gull Island (Santa Cruz Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line and the following points except where noted:

33° 58.065′ N. lat. 119° 50.967′ W. long.;

33° 58.000′ N. lat. 119° 51.000′ W. long.;

33° 58.000′ N. lat. 119° 53.000′ W. long.;

33° 55.449′ N. lat. 119° 53.000′ W. long.; thence eastward along the three nautical mile offshore boundary to

33° 54.257′ N. lat. 119° 48.000′ W. long.; and

33° 57.756′ N. lat. 119° 48.000′ W. long.

(B) Take of all living marine resources is prohibited.

(67) Scorpion (Santa Cruz Island) State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

34° 02.958′ N. lat. 119° 35.500′ W. long.;

34° 06.202′ N. lat. 119° 35.500′ W. long.; thence eastward along the three nautical mile offshore boundary to

34° 06.245′ N. lat. 119° 32.800′ W. long.; and

34° 02.700′ N. lat. 119° 32.800′ W. long.

(B) Take of all living marine resources is prohibited.

(68) Anacapa Island Special Closure.

(A) No net or trap may be used in waters less than 20 feet deep off the Anacapa Islands commonly referred to as Anacapa Island.

(B) A brown pelican fledgling area is designated from the mean high tide mark seaward to a water depth of 20 fathoms (120 feet) on the north side of West Anacapa Island between a line extending 000° True off Portuguese Rock (34° 00.91′ N. lat. 119° 25.26′ W. long.) to a line extending 000° True off the western edge of Frenchy's Cove (34° 00.417′ N. lat. 119° 24.600′ W. long.), a distance of approximately 4,000 feet. No person except department employees or employees of the National Park Service in the performance of their official duties shall enter this area during the period January 1 to October 31.

(69) Anacapa Island State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

34° 00.828′ N. lat. 119° 26.623′ W. long.;

34° 00.800′ N. lat. 119° 26.700′ W. long.;

34° 03.940′ N. lat. 119° 26.700′ W. long.; thence eastward along the three nautical mile offshore boundary to

34° 04.002′ N. lat. 119° 24.600′ W. long.; and

34° 00.417′ N. lat. 119° 24.600′ W. long.

(B) Take of all living marine resources is prohibited except for the recreational take of lobster and pelagic finfish [subsection 632(a)(3)] and the commercial take of spiny lobster.

(70) Anacapa Island State Marine Reserve.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

34° 00.417′ N. lat. 119° 24.600′ W. long.;

34° 04.002′ N. lat. 119° 24.600′ W. long.; thence eastward along the three nautical mile offshore boundary to

34° 04.033′ N. lat. 119° 21.400′ W. long.;

34° 01.000′ N. lat. 119° 21.400′ W. long.; and

34° 00.960′ N. lat. 119° 21.449′ W. long.

(B) Take of all living marine resources is prohibited.

(71) Footprint (Anacapa Channel) State Marine Reserve

(A) This area is bounded by the straight lines connecting the following points in the order listed except where noted:

33° 59.300′ N. lat. 119° 30.965′ W. long.;
33° 57.510′ N. lat. 119° 30.965′ W. long.; thence eastward along the three nautical mile offshore boundary to
33° 57.264′ N. lat. 119° 25.987′ W. long.;
33° 59.300′ N. lat. 119° 25.987′ W. long.; and
33° 59.300′ N. lat. 119° 30.965′ W. long.
(B) Take of all living marine resources is prohibited.
(72) Big Sycamore Canyon State Marine Reserve.
(A) This area is bounded by the 5– fathom depth contour, the 20–fathom depth contour, and the following points:
34° 04.79′ N. lat. 119° 02.03′ W. long.;
34° 03.92′ N. lat. 119° 02.70′ W. long.;
34° 02.97′ N. lat. 119° 00.00′ W. long.; and
34° 03.86′ N. lat. 119° 00.00′ W. long.
(B) Take of all living marine resources is prohibited.
(C) Swimming. No person shall swim, wade, dive, or use any diving equipment within the Big Sycamore Canyon State Marine Reserve except as authorized pursuant to scientific research approved by the department.
(D) Boating. Except as allowed pursuant to Federal law, no person shall launch or operate a boat or other floating device within the Big Sycamore Canyon State Marine Reserve except to pass through the area during the normal course of vessel transit along the coast, to avoid inclement weather, or pursuant to scientific research approved by the department.
(E) Firearms. No person shall possess, fire, or discharge any firearm, bow and arrow, air or gas gun, spear gun, or any other weapon of any kind within, or into the Big Sycamore Canyon State Marine Reserve except as authorized pursuant to scientific research approved by the department.
(F) Public Entry. Public entry into the Big Sycamore Canyon State Marine Reserve may be restricted at the discretion of the department to protect wildlife, aquatic life, or habitat. No person, except state and local law enforcement officers, fire suppression agencies and employees of the department in the performance of their official duties or persons possessing written permission from the department, or institution or agency entering into a memorandum of understanding (MOU) with the department, may enter an area which is closed to public entry.
(G) Pesticides, Herbicides, and Other Regulated Chemicals. The use of pesticides, herbicides, and other regulated chemicals is prohibited in the Big Sycamore Canyon State Marine Reserve except as authorized pursuant to scientific research approved by the department. Where such chemicals are intended to be used as a part of any research program, any necessary authorization and/or permits required to dispense such chemicals into state waters or tide and submerged lands shall be obtained prior to final approval of the research by the department.
(H) Litter. No person shall deposit, drop, or scatter any debris on the Big Sycamore Canyon State Marine Reserve. Any refuse resulting from a person's use of an area must be removed from that area by such person.
(I) Aircraft. No person shall operate any aircraft or hovercraft within the Big Sycamore Canyon State Marine Reserve, except as authorized pursuant to scientific research approved by the department.
(J) Pets. Pets, including but not limited to, dogs and cats, are prohibited from entering the Big Sycamore Canyon State Marine Reserve unless authorized by the department.
(K) Memorandum of Understanding (MOU). The department may enter into MOU's with colleges, universities, and other bonafide research organizations to conduct marine–related research within the Big Sycamore Canyon State Marine Reserve.
(L) The department shall notify the California Department of Parks and Recreation of scientific research approved within the Big Sycamore Canyon State Marine Reserve.
(73) Santa Barbara Island State Marine Reserve.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:
33° 28.500′ N. lat. 119° 01.847′ W. long.;
33° 28.500′ N. lat. 118° 58.051′ W. long.; thence along the three nautical mile offshore boundary to
33° 24.842′ N. lat. 119° 02.200′ W. long.; and
33° 27.973′ N. lat. 119° 02.200′ W. long.
(B) Take of all living marine resources is prohibited.
(74) Abalone Cove State Marine Park.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
33° 44.53′ N. lat. 118° 22.83′ W. long.;
33° 44.47′ N. lat. 118° 22.83′ W. long.;
33° 44.14′ N. lat. 118° 22.47′ W. long.;
33° 44.14′ N. lat. 118° 22.12′ W. long.; and
33° 44.19′ N. lat. 118° 22.12′ W. long.
(B) Take of all living marine resources is prohibited except the recreational take of finfish by hook and line or spear.
(75) Point Fermin State Marine Park.
(A) This area is bounded by the mean high tide line, a distance of 600 feet seaward of mean lower low water, and the following points:
33° 42.31′ N. lat. 118° 17.57′ W. long.;
33° 42.21′ N. lat. 118° 17.57′ W. long.;
33° 42.47′ N. lat. 118° 17.00′ W. long.; and
33° 42.47′ N. lat. 118° 17.13′ W. long.
(B) Take of all living marine resources is prohibited except the recreational take of: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.
(76) Bolsa Chica State Marine Park.
(A) This area consists of waters below the mean high tide line within the Bolsa Chica Ecological Reserve.
(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than marine aquatic plants from designated areas around outer Bolsa Bay.
(C) Boating, swimming, wading, and diving are prohibited within the park.
(D) No person, except State and local law enforcement officers, fire suppression agencies and employees of the department in the performance of their official duties or persons possessing written permission from the department or employees of Signal Corporation and its invitees for the purpose of carrying out oil and gas operations, shall enter this park and remain therein except on established trails, paths, or other designated areas.
(E) No person shall enter this park between the hours of 8:00 p.m. and 6:00 a.m.
(F) The County of Orange, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.
(77) Special Closure: Arrow Point to Lion Head Point (Catalina Island) Invertebrate Area.
(A) This area is bounded by the mean high tide line, a distance of 1000 feet seaward of mean lower low water, and the following points:
33° 28.64′ N. lat. 118° 32.33′ W. long.;
33° 28.82′ N. lat. 118° 32.33′ W. long.;
33° 27.25′ N. lat. 118° 29.90′ W. long.; and
33° 27.18′ N. lat. 118° 30.07′ W. long.
(B) Recreational take of invertebrates is prohibited. Take of other living marine resources is allowed.
(78) Catalina Marine Science Center State Marine Reserve.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
33° 26.65′ N. lat. 118° 29.33′ W. long.;
33° 26.83′ N. lat. 118° 29.13′ W. long.;
33° 26.96′ N. lat. 118° 28.56′ W. long.;

33° 26.92′ N. lat. 118° 28.53′ W. long.; and
33° 26.87′ N. lat. 118° 28.62′ W. long.
(B) Take of all living marine resources is prohibited.
(C) Except as pursuant to Federal law, emergency caused by hazardous weather, or as provided in this section, it is unlawful to anchor or moor a vessel in the Catalina Marine Science Center State Marine Reserve.
(D) The director of the Catalina Marine Science Center Marine State Marine Reserve, or any person that the director of the reserve has authorized may anchor or moor a vessel or take, for scientific purposes, any fish or specimen of marine life under the conditions prescribed by the department or the reserve director.
(79) Farnsworth Bank State Marine Conservation Area.
(A) This area consists of waters shallower than 250 feet within the area bounded by straight lines connecting the following points in the order listed:
33° 21.00′ N. lat. 118° 32.00′ W. long.;
33° 21.00′ N. lat. 118° 30.50′ W. long.;
33° 20.00′ N. lat. 118° 30.50′ W. long.;
33° 20.00′ N. lat. 118° 32.00′ W. long.; and
33° 21.00′ N. lat. 118° 32.00′ W. long.
(B) Take of purple coral (Stylaster californicus) is prohibited. Take of other living marine resources is allowed.
(80) Lover's Cove State Marine Conservation Area.
(A) This area is bounded by the mean high tide line, a distance of 100 yards seaward of mean lower low water, and the following points:
33° 20.64′ N. lat. 118° 19.25′ W. long.;
33° 20.67′ N. lat. 118° 19.20′ W. long.;
33° 20.59′ N. lat. 118° 18.94′ W. long.; and
33° 20.56′ N. lat. 118° 18.98′ W. long.
(B) Take of all living marine resources is prohibited except the commercial take of finfish and kelp.
(81) Upper Newport Bay State Marine Park.
(A) This area consists of waters below the mean high tide line within the Upper Newport Bay Ecological Reserve bounded by; the southern end of Shellmaker Island (33° 37.20′ N. lat. 117° 53.51′ W. long.) in the south, Back Bay Drive, East Bluff Drive, and Jamboree road in the east, the 10–foot elevation in the north and west, and a line connecting North Star Beach (33° 37.38′ N. lat. 117° 53.60′ W. long.) to the southern end of Shellmaker Island.
(B) Take of all living marine resources is prohibited except the recreational hook and line take of species other than kelp.
(C) Swimming is allowed only in the area between North Star Beach and mid–channel.
(D) Boats are limited to speeds less than five miles per hour.
(E) Shoreline access is limited to established trails, paths, or other designated areas.
(F) A $2.00 day use pass or a valid $10.00 annual wildlife pass is required of all users of Upper Newport Bay Ecological Reserve except: users that possess a valid California sport fishing license, hunting license or trapping license; users that are under 16 years of age; or users that are part of an organized youth or school group and having free permits issued by the appropriate regional office. Refer to subsections 550(b)(4) and (5), Title 14, CCR, for regulations for fee requirements for wildlife areas.
(82) Robert E. Badham State Marine Conservation Area.
(A) This area is bounded by the mean high tide line, a distance of 200 feet seaward of mean lower low water, and the following points:
33° 35.42′ N. lat. 117° 52.22′ W. long.;
33° 35.40′ N. lat. 117° 52.24′ W. long.;
33° 35.03′ N. lat. 117° 51.78′ W. long.; and
33° 35.05′ N. lat. 117° 51.74′ W. long.
(B) Take of all living marine resources is prohibited except:
1. Only the following species may be taken recreationally: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.
2. Only spiny lobster may be taken commercially.
(83) Crystal Cove State Marine Conservation Area.
(A) This area is bounded by the mean high tide line, the 20–fathom depth contour, and the following points:
33° 35.05′ N. lat. 117° 51.74′ W. long.;
33° 34.76′ N. lat. 117° 52.32′ W. long.;
33° 33.27′ N. lat. 117° 49.62′ W. long.; and
33° 33.40′ N. lat. 117° 49.18′ W. long.
(B) Take of all living marine resources is prohibited except:
1. Only the following species may be taken recreationally: finfish, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.
2. Only the following species may be taken commercially: finfish, crabs, ghost shrimp, jackknife clams, sea urchins, algae except giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis spp.*) and worms except that no worms may be taken in any mussel bed, nor may any person pick up, remove, detach from the substrate any other organisms, or break up, move or destroy any rocks or other substrate or surfaces to which organisms are attached.
(84) Irvine Coast State Marine Conservation Area.
(A) This area is bounded by the mean high tide line, a distance of 600 feet seaward of mean lower low water, and the following points:
33° 35.05′ N. lat. 117° 51.74′ W. long.;
33° 35.00′ N. lat. 117° 51.84′ W. long.;
33° 33.37′ N. lat. 117° 49.28′ W. long; and
33° 33.40′ N. lat. 117° 49.18′ W. long.
(B) Take of all living marine resources is prohibited except:
1. Only the following species may be taken recreationally: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.
2. Only spiny lobster may be taken commercially.
(85) Laguna Beach State Marine Conservation Area.
(A) This area is bounded by the mean high tide line, a distance of 600 feet seaward of mean lower low water, and the following points:
33° 32.86′ N. lat. 117° 48.35′ W. long.;
33° 32.78′ N. lat. 117° 48.45′ W. long.;
33° 30.37′ N. lat. 117° 45.17′ W. long.; and
33° 30.43′ N. lat. 117° 45.06′ W. long.
(B) Take of all living marine resources is prohibited except:
1. Only the following species may be taken recreationally: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.
2. Only spiny lobster may be taken commercially.
(86) Heisler Park State Marine Reserve.
(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:
33° 32.66′ N. lat. 117° 47.61′ W. long.;
33° 32.53′ N. lat. 117° 47.66′ W. long.;
33° 32.43′ N. lat. 117° 47.26′ W. long.; and
33° 32.56′ N. lat. 117° 47.30′ W. long.

(B) Take of all living marine resources is prohibited.

(C) Boats may be launched and retrieved only in designated areas and may be anchored within the reserve only during daylight hours.

(87) South Laguna Beach State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, the 20–foot depth contour, and the following points:

33° 30.43′ N. lat. 117° 45.06′ W. long.;
33° 30.37′ N. lat. 117° 45.17′ W. long.;
33° 30.04′ N. lat. 117° 44.91′ W. long.; and
33° 30.15′ N. lat. 117° 44.81′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.

2. Only spiny lobster may be taken commercially.

(88) Niguel State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 1200 feet seaward of mean lower low water, and the following points:

33° 29.15′ N. lat. 117° 44.05′ W. long.;
33° 29.15′ N. lat. 117° 44.30′ W. long.;
33° 27.74′ N. lat. 117° 43.18′ W. long.; and
33° 27.74′ N. lat. 117° 42.95′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.

2. Only spiny lobster may be taken commercially.

(89) Dana Point State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 1200 feet seaward of mean lower low water, and the following points:

33° 27.74′ N. lat. 117° 42.95′ W. long.;
33° 27.74′ N. lat. 117° 43.18′ W. long.;
33° 27.47′ N. lat. 117° 42.28′ W. long.; and
33° 27.63′ N. lat. 117° 42.45′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally below the mean lower low–water mark: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.

2. Only spiny lobster may be taken commercially.

(C) Except as expressly provided in this section, it is unlawful to enter the intertidal zone in the Dana Point State Marine Park for the purpose of taking or possessing, or to take or possess, any species of fish, plant, or invertebrate, or part thereof; to use or have in possession any contrivance designed to be used for catching fish; to disturb any native plant, fish, wildlife, aquatic organism; or to take or disturb any natural geological feature. This subdivision does not prohibit persons from entering the intertidal zone for the purpose of entertainment, recreation, and education while having a minimum impact on the intertidal environment and the living organisms therein. For this purpose, minimum impact includes foot traffic; general observation of organisms in their environment with immediate replacement of any unattached organisms to their natural location after temporary lifting for examination; and photography. Minimum impact does not include removal of attached organisms from their environment; gathering of fishing bait; littering, collecting rocks and shells; or turning rocks or other acts destructive to the environment.

(D) The department director may appoint a director of the Dana Point State Marine Park.

(E) The director of the Dana Point State Marine Park may issue a special collecting permit authorizing any person to enter the park for the purposes of scientific collecting under the conditions of a scientific collector's permit issued by the department.

(F) Notwithstanding subsections 632(b)(88)(B) or 632(b)(88)(C), the director of the Dana Point State Marine Park, or any person who has a scientific collector's permit from the department and to whom the director of the Dana Point State Marine Park has issued a special collecting permit may take, for scientific purposes, any fish or specimen of marine plant life under the conditions prescribed by the department.

(G) This section does not prohibit the entry of state and local law enforcement officers, fire suppression agencies, and employees of the department in the performance of their official duties. This section does not prohibit or restrict navigation in the Dana Point State Marine Park pursuant to federal law.

(90) Doheny Beach State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 600 feet seaward of mean lower low water, and the following points:

33° 27.70′ N. lat. 117° 41.38′ W. long.;
33° 27.60′ N. lat. 117° 41.38′ W. long.;
33° 27.27′ N. lat. 117° 40.28′ W. long.; and
33° 27.35′ N. lat. 117° 40.21′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: lobster, rockfish (family Scorpaenidae), greenling, lingcod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, California corbina, white seabass, opaleye, halfmoon, surfperch (family Embiotocidae), blacksmith, Pacific barracuda, California sheephead, Pacific bonito, California halibut, sole, turbot, and sanddab. Finfish shall be taken only by hook and line or by spearfishing gear.

2. Only spiny lobster may be taken commercially.

(91) Doheny State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 1,500 feet seaward of mean lower low water, and the following points:

33° 27.70′ N. lat. 117° 41.38′ W. long.;
33° 27.45′ N. lat. 117° 41.39′ W. long.;
33° 27.15′ N. lat. 117° 40.38′ W. long.; and
33° 27.35′ N. lat. 117° 40.21′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Commercial take is allowed.

(92) Buena Vista Lagoon State Marine Park.

(A) This area consists of waters below the mean high tide line within the Buena Vista Lagoon Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational take of species other than kelp by hook and line in designated areas and at designated times only.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(D) The County of San Diego, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(93) Agua Hedionda Lagoon State Marine Reserve.

(A) This area consists of waters below the mean high tide line within the Agua Hedionda Lagoon Ecological Reserve.

(B) Take of all living marine resources is prohibited.

(C) The department, and the County of San Diego, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(94) Batiquitos Lagoon State Marine Park.

(A) This area consists of waters below the mean high tide line within the Batiquitos Lagoon Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational take of finfish by hook and line from shore.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(D) San Diego County, after consultation with the department, may carry out management activities necessary for fish and wildlife management, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and associated use of equipment.

(95) Encinitas State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, as distance of 600 feet seaward of mean lower low water, and the following points:

33° 02.74′ N. lat. 117° 17.88′ W. long.;
33° 02.70′ N. lat. 117° 18.00′ W. long.;
33° 01.98′ N. lat. 117° 17.64′ W. long.; and
33° 02.04′ N. lat. 117° 17.54′ W. long.

(B) Take of all living marine resources is prohibited except the commercial and recreational take of finfish.

(96) Cardiff–San Elijo State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 3000 feet seaward of mean lower low water, and the following points:

33° 02.04′ N. lat. 117° 17.54′ W. long.;
33° 01.75′ N. lat. 117° 18.03′ W. long.;
33° 00.06′ N. lat. 117° 17.27′ W. long.; and
33° 00.29′ N. lat. 117° 16.73′ W. long.

(B) Take of all living marine resources is prohibited except:

1. Only the following species may be taken recreationally: finfish, chiones, clams, cockles, rock scallops, native oysters, crabs, lobster, ghost shrimp, sea urchins, mussels and marine worms except that no worms may be taken in any mussel bed unless taken incidentally to the take of mussels.

2. Commercial take is allowed.

(97) San Elijo Lagoon State Marine Park.

(A) This area consists of waters below the mean high tide line within the San Elijo Lagoon Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational take of finfish by hook and line from shore.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(D) San Diego County, after consultation with the department, may carry out management activities for fish and wildlife management, flood control, vector control and regional park recreational activities. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control, minor ditching and use of associated equipment.

(E) Collections may be made by the department for purposes of fish and wildlife management or by San Diego County for the purpose of water quality testing and vector control.

(98) San Dieguito Lagoon State Marine Park.

(A) This area consists of waters below the mean high tide line within the San Dieguito Lagoon Ecological Reserve.

(B) Take of all living marine resources is prohibited except the recreational take of finfish by hook and line from shore and the Grand Avenue bridge.

(C) Boating, swimming, wading, and diving are prohibited within the park.

(D) No person, except state and local law enforcement officers, fire suppression agencies and employees of the department in the performance of their official duties or persons possessing written permission from the department, shall be permitted on the California least tern nesting island.

(E) No person, except state and local law enforcement officers, fire suppression agencies and employees of the department in the performance of their official duties or persons possessing written permission from the department, shall enter this park between 8:00 p.m. and 5:00 a.m.

(F) The County of San Diego, after consultation with the department, may carry out management activities for fish and wildlife, flood control and vector control. Authorized operation and maintenance activities shall include, but shall not be limited to, use of chemicals, vegetation control, water control and use of associated equipment.

(G) Collections of fish, wildlife, water and soil may be made by the department for the purposes of fish and wildlife management or by San Diego County for the purposes of water quality testing and vector control.

(99) San Diego–Scripps State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 1000 feet seaward of mean lower low water, and the following points:

32° 52.28′ N. lat. 117° 15.16′ W. long.;
32° 52.32′ N. lat. 117° 15.34′ W. long.;
32° 51.86′ N. lat. 117° 15.48′ W. long.; and
32° 51.86′ N. lat. 117° 15.28′ W. long.

(B) Take of all living marine resources is prohibited except the commercial and recreational take of finfish.

(C) Licensees of the Regents of the University of California and all officers, employees, and students of such university may take, for scientific purposes, any invertebrate or specimen of marine plant life without a permit from the department.

(100) La Jolla State Marine Conservation Area.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

32° 51.86′ N. lat. 117° 15.28′ W. long.;
32° 51.86′ N. lat. 117° 16.25′ W. long.;
32° 51.22′ N. lat. 117° 16.17′ W. long.; and
32° 51.07′ N. lat. 117° 16.40′ W. long.

(B) Take of all living marine resources is prohibited except the commercial take of squid for bait by use of hand–held scoop net west of a line drawn due north from Goldfish Point (34° 51.00′ N. lat. 119° 16.17′ W. long.).

(C) Boats may be launched and retrieved only in designated areas and may be anchored within the conservation area only during daylight hours.

(101) Mia J. Tegner State Marine Conservation Area.

(A) This area is bounded by the mean high tide line, a distance of 150 feet seaward of mean lower low water, and the following points:

32° 40.27′ N. lat. 117° 14.73′ W. long.;
32° 40.27′ N. lat. 117° 14.76′ W. long.;
32° 39.91′ N. lat. 117° 14.42′ W. long.; and
32° 39.94′ N. lat. 117° 14.44′ W. long.

(B) Take of all living marine resources is prohibited except:

1. The recreational take of finfish is allowed.

2. The commercial take of finfish and marine aquatic plants is allowed.

2. Amendment of section and NOTE filed 3–8–2005; operative 4–7–2005 (Register 2005, No. 10).

3. Amendment filed 11-2-2005; operative 11-2-2005 pursuant to Fish and Game Code section 215 (Register 2005, No. 44).
4. Amendment of section heading, subsections (b), (b)(72) and (b)(72)(A), new subsections (b)(72)(A)1.-2. and amendment of NOTE filed 10-19-2006; operative 10-19-2006 pursuant to Government Code section 11343.4 (Register 2006, No. 42).
5. Amendment of section heading, section and NOTE filed 8-22-2007; operative 9-21-2007 (Register 2007, No. 34).
6. Amendment of subsections (b)(58)(A), (b)(60)(A), (b)(60)(C), (b)(61)(A), (b)(62)(A), (b)(63)(A), (b)(64)(A), (b)(65)(A), (b)(66)(A), (b)(67)(A), (b)(68)(B), (b)(69)(A) and (b)(70)(A), new subsections (b)(71)-(b)(71)(B), subsection renumbering and amendment of newly designated subsection (b)(73)(A) filed 12-17-2007; operative 12-17-2007 pursuant to Government Code section 11343.4 (Register 2007, No. 51).

Chapter 12. Management of Fish and Wildlife on Military Lands

§ 640. Management of Fish and Wildlife on Military Lands.

(a) Agreements: Pursuant to the provisions of Section 3450-3453 of the Fish and Game Code, the department may enter into agreements with the United States Department of Defense to provide for the development and administration of fish and wildlife management plans and programs on military installations. Such plans and programs shall be designed to provide biologically optimum levels of fish and wildlife resource management and use compatible with the primary military use of those lands. Military lands covered by such agreements shall not be available to the general public without the consent of the commanding officer responsible for such military lands.

(b) Military Lands Fish and Wildlife Management Plan: A fish and wildlife management plan shall be submitted to the department in writing, pursuant to agreements of Section 640(a). Upon the department's approval, the plan shall be submitted to the Commission for concurrence at the next scheduled meeting. The management plan shall include, but not be limited to the following information:

(1) A statement of management objectives;

(2) A description of the area;

(3) A description of the fish and wildlife resources and a statement on the condition of the habitat;

(4) A discussion of the appropriative and non-appropriative use of the resources; and

(5) A discussion of the projects on the area to improve habitat for fish and wildlife.

(c) Annual Review: The department shall annually review the implementation of the provisions of the management plan for each participating military installation and report its findings to the Commission annually at its February meeting. The Director of the department shall be informed annually prior to December 1 or any proposed modification of the management plan for the following calendar year. Such proposals shall include any request for the adoption of hunting and fishing regulations which may differ from those proposed by the department of the lands adjacent to the specified military installation. The department shall forward such proposals to the Commission within 60 days. Such requests shall include the following information:

(1) Species to be regulated;

(2) Proposed harvest regimes including areas, seasons, bag and possession limits and special conditions;

(3) Opportunities available to the general public, if any; and

(4) Biological data to support proposed regulations.

(d) Records: Records of the number and species of animals harvested pursuant to the management plan shall be maintained and this information shall be submitted to the department by December 1 of each year.

(e) Termination of Agreement: The commanding officer of a participating military installation or the department may terminate any agreement provided for herein upon 30 days' written notice to the Commission.

NOTE: Authority cited: Sections 3452 and 3453, Fish and Game Code. Reference: Sections 3450-3453, Fish and Game Code.

HISTORY

1. New Chapter 12 (Section 640) filed 3-4-87; effective thirtieth day thereafter (Register 87, No.10).

Subdivision 3. General Regulations

Chapter 1. Collecting Permits

§ 650. Scientific Collecting Permits.

(a) **General.** Except as otherwise provided, it is unlawful to take or possess marine plants, live or dead birds, mammals, fishes, amphibians, or reptiles for scientific, educational, or propagation purposes except as authorized by a permit issued by the department. Notwithstanding Fish and Game Code Section 86, take includes capturing, marking, and releasing any animal.

NOTE: Persons taking a rare, threatened, or endangered **PLANT** species are exempt from this permit but must obtain a RARE, THREATENED, AND ENDANGERED PLANT COLLECTING PERMIT. Forms are available from the Department of Fish and Game, 1416 Ninth Street, Sacramento, California 95814.

(1) The department may authorize and limit the kind and number of specimens that may be taken, the type of equipment and methods used, the time and seasons for take, and the areas where take may occur.

(2) The permittee shall carry the permit and any amendments at all times when conducting any activity authorized by the permit.

(3) The department may amend the conditions of a permit at any time.

(4) No person shall take any threatened, endangered, or fully protected animal except persons who have a valid Memorandum of Understanding in writing with the department. Any such wildlife inadvertently taken shall be immediately released at the site of capture except migratory birds may be banded with a federal leg band before release.

(b) **Issuance of Permits.** The department may issue permits to take wildlife and marine plants for bona fide scientific, educational, or propagation purposes to:

[The next page is 173.]

(1) Employees of local, state and federal agencies who take specimens in connection with their official duties.

(2) Faculty, professional staff, college level students of, or individuals hired by; public or private companies, educational institutions, zoological gardens or aquariums, in or out of state.

NOTE: See Fish and Game Code sections 3039, 4005, and 7850 concerning restrictions and additional licenses required for taking fish and wildlife for commercial purposes.

(3) Individuals who take wildlife or marine plants for other permittees or pursuant to environmental protection documents required by law.

(4) Individuals who possess a valid federal Bird Marking and Salvage Permit. Holders of this federal permit are not required to obtain a state permit to take migratory birds, other than raptorial birds.

(c) **Applicant Qualifications and Requirements.** Individuals who take wildlife or marine plants for use by schools, museums, and other organizations shall submit a written statement signed by a minimum of two faculty members of the institution verifying the take is required by the institution.

(1) Students required to take wildlife or marine plants for educational purposes shall submit proof of sponsorship from a faculty member requiring the take.

(2) Persons who take birds protected by the U.S. Migratory Bird Treaty Act must also possess all required federal permits.

(3) A permit shall not be issued to anyone under 18 years of age to mark birds except for students at the college level who must mark birds to meet an educational curriculum requirement and who have obtained the sponsorship of an instructor in such curriculum.

(d) **Marking.** Mark means any activity which results in placement of a color dye or other identifying device on an animal.

(e) **Application.** Each person must submit a completed application on SCIENTIFIC COLLECTING PERMIT APPLICATION, Form FG1379 (5/95), which is incorporated by reference herein. Application forms are available from the Department of Fish and Game, 3211 "S" Street, Sacramento, California 95816.

(f) **Permit Revocation.** The department may revoke, suspend or decline to renew a permit for failure to comply with the provisions of a permit or failure to comply with these regulations. Any person whose permit is denied, revoked, or suspended may request a hearing before the commission to appeal the department's decision.

(g) **Permit Nontransferable.** Permits are not transferable. Persons may assist the permittee if the permittee is present and overseeing the activities.

(h) **Notification of Department Required Prior to Taking Specimens.** Before taking any wildlife or marine plants, the permittee shall notify the department office designated in the permit and provide the following information; name and permit number; date, time and location of take; species, gear to be used, vehicle description, and number of persons in party. Such notification may be given by letter, telephone or personal contact. The department may require a minimum time for providing the advance notification as a condition of the permit.

(i) **Reporting of Specimens Taken.** Permittees shall submit a completed report of activities within 30 days of expiration of the permit except the department may waive the reporting requirements. The waiver shall be in writing.

(1) The department shall accept the report in any of the following formats:

(A) Written on REPORT OF SPECIMENS COLLECTED, Form FG1379a (10/95), which is incorporated by reference herein, or;

(B) Written as a SPECIAL REPORT as designated in the conditions of the permit, or;

(C) Electronically in a format and to an address specified by the department, or;

(D) As otherwise required in writing by the department.

(2) No permit will be renewed unless the completed report is received by the department within 30 days of the expiration date of the permit, or as directed in writing by the department.

(3) Reports of wildlife or marine plants taken after submission of application for renewal shall be included in the next year's report.

(4) A permittee who instructs a commercial fishing class shall submit the report for the entire class. The report shall show the total number of each species of fish taken, the amount of fish sold and the price received therefor, the amount of fish donated to charitable institutions, and the name and address of such institutions. Students enrolled in commercial fishing classes shall not be required to submit an annual report.

(j) **Inspection.** Employees of the department or sponsors of permittees may inspect any collection at any time to determine whether or not the permittee is complying with the regulations.

(k) **Disposition of Specimens.** The department may restrict the use and disposition of all wildlife taken under authority of a permit.

(*l*) **Possession of Dead Wildlife.** The following are not required to possess a permit for accidentally killed and legally acquired wildlife; government accredited schools that are open to the public, government agencies, federally recognized native American groups, institutions or organizations engaged in bona fide scientific study of native wildlife if the specimens are readily available for use or viewing by the general public on a regular basis, any person or group with a valid permit issued by the federal government authorizing possession of specific wildlife, and nationally constituted youth organizations which have the study of native wildlife as an integral part of their national program. This exemption does not apply to accidentally killed big game mammals or to any threatened, rare, endangered or fully protected species.

(1) **Records.** The person who has the chief authority to act for any group, agency, or institution listed in section 650(b) shall maintain a permanent written record of the date of acquisition, the name and address of the person donating wildlife, how it was acquired, the species, sex, and number of animals, and the city and street address of the storage site. All records and wildlife must be maintained within California and shall be presented immediately to any employee of the department upon request.

(2) **Transportation.** Wildlife possessed pursuant to section 650(b) may not be transported from the storage site unless accompanied by a written document describing the animal or part thereof, listing the name of the person who has temporary possession, the purpose, and the date to be returned. The authorization must be written on organization letterhead, dated, and signed by the chief administrative officer.

(3) **Ownership.** All accidentally killed wildlife remains the property of the state and must be disposed of as directed by the department.

HISTORY

1. New subsection (a)(8) filed 1–16–74; effective thirtieth day thereafter (Register 74, No. 3). For prior history, see Register 70, No. 50.
2. Repealer and new section filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
3. Order of Repeal of last sentence of first paragraph of subsection (g) and subsection (*l*) filed 6–3–85 by OAL pursuant to Government Code Section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).
4. Repealer and new section filed 6–18–96; operative 7–18–96 (Register 96, No. 25).

§ 650.5. Frogs.

NOTE: Authority cited: Section 7709, Fish and Game Code.

HISTORY

1. New section filed 6–3–70 as an emergency; effective upon filing. Certificate of Compliance included (Register 70, No. 23).
2. Correctory amendment filed 6–19–70 (Register 70, No. 23).
3. Repealer filed 4–13–72; effective thirtieth day thereafter (Register 72, No. 16).

§ 651. Commercial Take of Native Reptiles and Amphibians for Scientific or Educational Institutions.

(a) Native reptiles and amphibians may be sold to scientific or educational institutions only by owners of biological supply houses who have been issued a permit by the department for such purposes.

(1) Permits shall be issued on an annual basis, commencing April 1 of each year, and expiring on March 31 of the following year, or for the unexpired portion of any permit year commencing April 1.

(2) To defray costs incurred in the administration of these regulations, a fee of $50 shall be paid to the department by each applicant upon the filing of an application for a permit.

(3) Applications for a permit to sell native reptiles and amphibians to scientific or educational institutions shall be submitted on forms provided by the department. Applications shall be accompanied by a copy of applicable city or county business permits, and shall include a list of employees or agents authorized by the supply house owner to collect native reptiles or amphibians for the supply house, pursuant to these regulations.

(b) Field Collecting Permit. Native reptiles and amphibians may be taken for sale to scientific or educational institutions only by owners of biological supply houses who have been issued a permit by the department pursuant to subsection (a) above, and by authorized employees or agents of such biological supply houses, only under authority of a field collecting permit issued by the department.

(1) The department may issue a field collecting permit to an owner of a biological supply house upon receipt by the department of the original copy of a written request for purchase from a faculty or staff member of a scientific or educational institution, accompanied by a statement from the supply house owner indicating (A) the name of the owner, authorized employees, or agents who will collect the specimens requested; (B) the species and number of each species the owner or each employee or agent will collect; and (C) the estimated beginning and ending dates of such collecting.

(2) The field collecting permit shall indicate the names of those authorized to collect the specimens requested by the scientific or educational institution.

(3) The field collecting permit shall indicate the maximum number of each species requested by the scientific or educational institution that the supply house is authorized to collect and possess.

(4) The field collecting permit shall indicate the inclusive dates during which collecting of the specimens requested by the scientific or educational institution is authorized, and the date by which such specimens shall be shipped.

(5) Specimens collected pursuant to a field collecting permit may be held only on the premises of a biological supply house following expiration of the authorized collecting period, but shall not be held on the premises of the supply house later than the authorized shipping deadline.

(c) Each owner, employee, or agent of a biological supply house collecting under authority of this section, shall have in his possession, in addition to his own copy of a field collecting permit, a copy of the permit issued to the biological supply house pursuant to Section 651(a) of these regulations, and, if amphibians are to be collected, a valid commercial fishing license.

(d) Each owner, employee, or agent of a biological supply house collecting under authority of a field collecting permit shall collect only those species and numbers authorized by the field collecting permit. Any species possessed in the field that is not authorized by the field collecting permit shall be considered to have been collected for commercial purposes and shall be a violation of these regulations.

(e) Delivery.

(1) All deliveries or shipments of reptiles or amphibians taken under authority of this section shall be accompanied by the original copy of the field collecting permit issued to the supply house owner. Shipments via the U.S. Postal Service or private carrier shall have this document attached to the outside of the shipping container, which shall be labeled: "Live Reptiles/Amphibians—Handle With Care."

(2) Possession by the scientific or educational institution of the original copy of the field collecting permit, which accompanies the shipment or delivery of the reptiles or amphibians taken pursuant to this section, shall constitute authority for the scientific or educational institution to possess the specimens purchased pursuant to this section.

(f) Methods of Take.

(1) Amphibians shall be taken only by hand or by a dip net.

(2) Reptiles shall be taken only by hand or by the following hand–operated devices: (A) Lizard nooses, (B) Snake tongs, (C) Snake hooks.

(3) It is unlawful to use crowbars, tire irons, jackhammers, winches, explosive devices, or any other method or means of collecting that involves removal or breaking apart of rocks, granite flakes, or other shelters in or about which reptiles or amphibians may be found.

(4) It is unlawful to take reptiles or amphibians by means of pit–traps or can–traps.

(g) Closures.

(1) No reptiles or amphibians may be taken from within the boundaries of State Parks or National Parks or Monuments, including public roadways therein.

(2) No reptiles or amphibians may be taken from within the boundaries of ecological reserves designated by the Commission, including public roadways therein.

(3) No garter snakes (*Thamnophis* sp.) may be taken in San Mateo County.

(h) The supply house owner shall be responsible for compliance by its employees or agents with these regulations. The department may refuse to authorize owners, employees, or agents of biological supply houses to collect or sell native reptiles or amphibians upon conviction of a violation of these regulations by a court of competent jurisdiction.

(i) Any permit issued pursuant to these regulations may be cancelled or suspended at any time by the commission for cause after notice and opportunity to be heard, or without a hearing upon conviction of a violation of these regulations by a court of competent jurisdiction.

5. Repealer filed 6–18–96; operative 7–18–96 (Register 96, No. 25).

§ 654. Permits for Possession of Protected Species of Wild Animals for Exhibition Purposes.

(a) Disposition of live or dead protected species of wild animals acquired by the department in its operations or enforcement of the fish and game laws may be made by issuing free permits for the possession of such wild animals to public zoological gardens, scientific or educational institutions for exhibition purposes.

(b) Permits for the possession of migratory birds as defined by the Migratory Bird Treaty Act are void unless accompanied by a permit issued by the U.S. Fish and Wildlife Service.

(c) Permits are not transferable.

(d) Employees of the department may inspect wildlife species possessed under authority of this permit at any time to determine whether or not such wildlife species are properly housed and cared for.

(e) The commission may revoke the permit for violation of its terms or of any fish and game law or upon the recommendation of the department when such wildlife specimens are not properly housed, exhibited or cared for.

2. Repealer filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).

§ 656. Permits to Take Beaver or Bear in a Refuge.

The department may issue a free permit to take beaver or bear within a refuge under the following conditions:

(a) Applications to take beaver or bear shall be filed with the department and shall show:

(1) Name and address of applicant.

(2) Name of refuge involved.

(3) The approximate number of animals to be taken.

(4) Such other pertinent data as the department may require.

(b) All permits shall be for a stated period of time not to exceed six months.

(c) No permit shall be issued unless the department is satisfied that damage is presently occurring or is immediately threatened.

(d) During the first two weeks of January of each year, each permittee shall submit to the department report of specimens taken during the preceding calendar year and no new permit shall be issued until such a report has been received.

(e) The commission may revoke a permit for violation of the terms of the permit.

(f) Any applicant convicted of violating these regulations or the terms and conditions of his permit must appear before the Fish and Game Commission before his permit may be reinstated or a new permit issued to him.

3. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
4. Amendment of undesignated first paragraph filed 4–18–91; operative 5–18–91 (Register 91, No. 21).

§ 657. Permits to Land California Caught Fish at Points Outside of California.

NOTE: Authority cited: Section 7891, Fish and Game Code. Reference: Section 7891, Fish and Game Code.

HISTORY

1. New section filed 7–31–68; effective thirtieth day thereafter (Register 68, No. 29).
2. Renumbering of Section 657 to Section 105.1 filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).

§ 658. Commercial Take of Bullfrogs (Rana Catesbeiana) for Sale to Scientific or Educational Institutions.

(a) Permit Required of Supplier. Permits shall be issued only to qualified scientific supply houses which sell bullfrogs to bona fide scientific or educational institutions. Such supply houses shall be responsible for compliance by its employees with these regulations. The commission shall approve the qualifications of applicants under this section, and the department shall issue the permit following approval by the commission. See subsection 699(b) of these regulations for the fee for this permit.

(b) Market Order Issued by Supplier. A qualified scientific supply house shall issue a market order to each employee before that employee collects bullfrogs Each market order shall specify the exact number of bullfrogs to be collected, the collecting locality, and the dates, not to exceed seven (7) consecutive days, required for the employee to fill that order.

(c) Licenses and Permits Required of Employees. Each employee who collects bullfrogs for a qualified scientific supply house shall have a commercial fishing license and a scientific collecting permit issued by the department. Each boat used for this purpose shall be registered as a commercial fishing vessel.

(d) Market Order in Possession of Employees. Each employee shall have a market order in his possession when bullfrogs are being collected. No bullfrogs in excess of the numbers specified on the market order may be taken or possessed by the employee of a qualified scientific supply house.

(e) Commercial Fishing Reports Required. The commercial fishing provisions of the Fish and Game Code shall apply to the take of bullfrogs.

(f) Closed Areas. No bullfrogs may be taken for sale north of Interstate 80 in the Valley Sportfishing District described in section 12.00, title 14, California Administrative Code.

(g) Open Areas and Seasons. Bullfrogs may be taken for sale for scientific or educational purposes only in the following sportfishing districts or parts thereof, and only during the specified dates, except as provided in subsection (h):

(1) Southern District as described in section 6.00, title 14, CAC–August 1 through November 30.

(2) Colorado River District as described in section 7.00, title 14, CAC–August 1 through November 30.

(3) South of Interstate 80 in the Valley District as described in section 12.00, title 14, CAC, and in the remainder of the state–May 1 through November 30.

(h) The department may issue permits to owners of biological supply houses to collect bullfrogs during the closed season, but only for sale to a bona fide scientific or educational institution as determined by the department. The supply house owner shall submit a written request to the department for the permit. An original letter, under the scientific or educational institution's letterhead and from a staff or faculty member requesting the purchase of a stated number of bullfrogs, shall accompany the request.

(i) Restricted Sale. Except for bullfrogs sold, leased, or rented for use in frog jumping contests as defined in Fish and Game Code section 6880, bullfrogs taken under authority of a permit issued pursuant to this section may be sold only to bona fide scientific or educational institutions and may be used only for scientific or educational purposes, and may not be sold, purchased, or traded for any other use.

(j) Delivery of Bullfrogs. A licensed employee shall deliver or ship all captured bullfrogs to the premises of the scientific supply house.

(k) Bullfrog Capture Methods. Bullfrogs may be captured only by hand. No spears, gigs, hooks, or other devices which might injure bullfrogs may be used.

(*l*) Application Requirements. Permit applications shall be submitted on forms furnished by the department. They may be filed with the department at any time. Application for renewal of a permit for the following calendar year may be filed concurrently with the annual report in December.

(m) Notification of Warden. Before collecting bullfrogs, the supplier shall notify a warden in the area where the employee wishes to collect. Such notification may be given by letter, telephone, or personal contact and shall include the canals and exact location on each of entry and departure, the dates of collection, and approximate length of time during which collecting is to be done. The employee shall carry his commercial fishing license, scientific collecting permit and market order at all times when collecting. These documents and specimens shall be shown upon demand to any person authorized by the department to enforce the provisions of the Fish and Game Code or regulation made pursuant thereto.

(n) Cancellation and Suspension of Permits. Any permit may be cancelled or suspended at any time by the commission for cause after notice and opportunity to be heard, or without a hearing upon conviction of a violation of these regulations by a court of competent jurisdiction.

NOTE: Authority cited: Sections 205, 1002, 6851, 6896, 7121 and 7709, Fish and Game Code. Reference: Sections 1002, 6851, 7121 and 7709, Fish and Game Code.

HISTORY

1. Amendment of subsection (d) filed 4–13–72; effective thirtieth day thereafter (Register 72, No. 16). For prior history, see Register 71, No. 41.
2. Amendment filed 6–6–74; effective thirtieth day thereafter (Register 74, No. 23).
3. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Amendment of subsections (f) and (g) filed 6–4–82; effective thirtieth day thereafter (Register 82, No. 23).
5. Order of Repeal of subsection (e) filed 6–3–85 by OAL pursuant to Government Code section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).
6. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
7. Amendment filed 9–8–86; effective thirtieth day thereafter (Register 86, No. 37).
8. Amendment of subsection (a) filed 4–18–91; operative 5–18–91 (Register 91, No. 21).
9. Amendment of subsection (i) and NOTE filed 1–25–95; operative 2–24–95 (Register 95, No. 4).

Chapter 2. Commission

§ 660. Election of Commission Officers.

It is the intent of the commission to provide protection from external influences of its operation and administration and decision–making processes. The commission finds that the choice of its president and vice president should be free of external influences. The commission further finds the selection of officers by seniority advances this goal.

(a) The president and vice president of the commission shall be elected annually, for a one–year term. The election shall take place at the February meeting, to take effect immediately. The president shall be the most senior member and the vice president shall be the next most senior member. Where the member declines to serve as president or vice president, the next most senior member shall be elected to that office.

(b) Seniority shall be the time served in his or her current term. In the case of two members with the same time of service in the current term, the member with the longer total time of service shall be the senior member.

(c) No member shall serve as either President or Vice President for more than two consecutive terms. Where such a member has served two consecutive terms, the next most senior member shall be elected to that office, and the next most senior member shall be deemed the next in seniority.

NOTE: Authority cited: Section 102, Fish and Game Code. Reference: Section 102, Fish and Game Code.

HISTORY

1. Amendment of chapter 2 heading and new section filed 10–5–98; operative 11–4–98 (Register 98, No. 41). For prior history of chapter 2 (sections 660–662), see Register 67, No. 50.

§ 660.1. Annual Certification and Report on Status of Resources.

Pursuant to the Constitution of the State of California, the Legislature has delegated powers to the Fish and Game Commission relating to the protection and propagation of fish and wildlife resources for the use and enjoyment of future generations. In accordance with these mandates, it is the policy of the Fish and Game Commission that:

The Department shall annually report to the Commission on the relative status of California's fish and wildlife resources with emphasis on those resources estimated to be at marginal or low levels. The Department shall identify management options, particularly for those resources that have declined to such a level that focused efforts are needed for recovery. In odd–numbered years, the Department shall report on the status of fish at the October meeting of the regulation–setting process of Section 206, Fish and Game Code. In even–numbered years, the Department shall report on the status of birds and mammals at the April meeting of the regulation–setting process prescribed by sections 207 and 208 of said Code. In satisfying this requirement, the Department may submit status reports that it prepares to satisfy other statutory requirements.

In conjunction with information provided by the Department, the Commission may solicit funds from private sources to provide for independent studies as needed, subject to approval by the Director of Finance pursuant to Government Code sections 11005 and 11005.1, and any funds received shall be designated for the benefit of the Status of the Resources Report Fund, pursuant to Government Code Section 16302. Such funds may also be used to help support the Department's resource monitoring and management programs or for peer review of scientific reports related to resource assessment.

Annually, based upon the best scientific information, the Commission shall certify the relative status of California's fish and wildlife resources. The Commission shall then prepare a report on the status of the State's resources for presentation to the Senate Resources & Wildlife Committee and the Assembly Water, Parks & Wildlife Committee.

NOTE: Authority cited: Section 703, Fish and Game Code. Reference: Section 703, Fish and Game Code.

HISTORY

1. New section filed 10–29–99; operative 11–28–99 (Register 99, No. 44).

Chapter 3. Miscellaneous

§ 670. Practice of Falconry.

(a) General Provisions. No person shall engage in any falconry activity except as provided by the Fish and Game Code and regulations provided herein. Applicable regulations adopted by the U.S. Secretary of the Interior pursuant to the Migratory Bird Treaty Act and published in Title 50, Code of Federal Regulations (CFR), Part 21 (Revised 9/14/89) are hereby incorporated and made a part of these regulations. Federal regulations shall be made available upon request from the Department of Fish and Game License and Revenue Branch, 3211 S. Street, Sacramento, Ca 95816.

(b) Take of Game or Nongame Birds or Mammals.

Any person using raptors to take game or nongame birds or mammals shall abide by all laws and regulations related to hunting, including but not limited to licenses, seasons, bag limits, and hunting hours. Any protected bird or mammal inadvertently taken by a raptor must be removed from the raptor, as soon as practical, and left at the site.

(c) Additional State Regulations. State regulations included herein complement current federal regulations and are cross–referenced by use of the respective federal Title 50 CFR section numbers boldfaced and placed in parentheses.

(1) LICENSING.

(A) Application for License. The department shall provide information on application procedures. This information may be obtained by contacting the department (address given in subsection (a) above).

(B) Co–sign Requirement. (Section 21.28 CFR)

Persons under the age of 18 shall have a parent or guardian co–sign their license application.

(C) Substitution of Experience. (Section 21.29 CFR) The department shall consider an applicant's experience acquired in another state or country when evaluating an application for any class of license.

(D) Application Fee. In addition to the fee required by Fish and Game Code Section 396, the department shall charge an application fee. The base fee for this application is $7.50 as of January 1, 1993 (Note: This fee shall be charged effective July 7, 1993) and shall be adjusted annually per Fish and Game Code Section 713.

(E) Examination Requirement. (Section 21.29 CFR)

1. Minimum Score. Persons applying for their first license or for renewal of a license that expired prior to January 1, 1978, must correctly answer at least 80% of the questions on an examination provided and administered by the department.

2. Reexamination for Failing Score. (Section 21.29 CFR) Any applicant who fails to pass the examination may take another examination no earlier than three months from the date of the prior examination.

3. Substitutions of Passing Score from Another State. (Section 21.29 CFR) Applicants who provide documentation of having successfully passed a federally approved examination in a state listed in Section 21.29(k), CFR, will not be required to take the test.

(F) Classes of Licenses. (Section 21.29 CFR) Licenses will be issued in three classes, apprentice, general, and master, only to persons who meet all requirements and qualifications described in these regulations. The department may issue the class of license equal to that of the most recent license issued to a person from a state listed in Section 21.29(k), CFR.

(G) Suspension, Revocation or Denial of License. (Section 21.29 CFR) The department may suspend, revoke, or deny issuance or renewal of any falconry license if the applicant or licensee either fails to comply with any requirement of these regulations or has been convicted of a violation of any falconry regulations, including such regulations of a state listed in Section 21.29(k), CFR. For the purpose of this subsection, violation of a general hunting regulation is not a violation of a falconry regulation. An applicant or licensee whose license has been suspended, revoked, or denied may appeal to the Commission.

(H) Notification of Termination of Sponsorship. (Section 21.29 CFR) A sponsor shall immediately notify the department in writing (address given in subsection (a) above) in the event of termination of sponsorship for a licensee. The person requiring the sponsor shall acquire a new sponsor within 60 days of the receipt of the notification by the department. Failure to comply with this subsection will result in loss of qualifying time from the date sponsorship was terminated and no subsequent license will be issued until all requirements have been fulfilled.

(I) Report Requirement for Apprentices. (Section 21.29 CFR) Apprentice licensees must complete and submit a report of progress on a form approved by the department (FG 362 (9/95), which is incorporated by reference herein). This report must be signed and dated by both the licensee and sponsor. The report will be used to determine qualifying experience for future licenses.

(J) Department Inspection and Approval of Equipment and Housing. (Section 21.29 CFR) The equipment and housing required by these regulations shall be inspected and approved by the department prior to the issuance of a license, except the department may authorize a sponsor to inspect and certify that the equipment and housing of apprentice applicants meets or exceeds the minimum standards required by these regulations. Equipment or housing that does not meet the minimum standards required by these regulations shall not be certified by a sponsor. The department may enter the premises of any licensee at any reasonable hour to inspect all housing, equipment, or raptors possessed by the licensee, or to inspect, audit, or copy any permit, book, or record required to be kept by these regulations.

(2) AUTHORIZATION.

(A) Authorization of Licensed Nonresidents. (Section 21.29 CFR) Nonresidents licensed to practice falconry in a state listed in Section 21.29(k), CFR, are authorized to practice falconry in California. Citizens from another country are authorized to practice falconry in California only in accordance with a permit issued by the U.S. Fish and Wildlife Service. (See subsection (c)(2)(F) below for importation).

(B) Nonresident License Not Valid for Resident. (Section 21.29 CFR) Residents are not authorized to possess raptors or practice falconry by a license issued by another state or country.

(C) Temporary Transfer of Raptor. (Section 21.29 CFR) Any licensee who allows another person to temporarily possess any raptor as authorized by sections 21.28(d)(6) and 21.29(j)(4), CFR, shall mail a copy of completed federal Form 3–186A and a copy of the statement authorizing temporary possession to the department (address given in subsection (a) above) on the day the bird is transferred.

(D) Apprentice Restriction. (Section 21.29 CFR) Except as provided in subsection (c)(2)(E) below, apprentice licensees may only take or possess American kestrels (*Falco sparverius*) or red–tailed hawks (*Buteo jamaicensis*).

(E) Possession of Captive Bred Raptors from Rehabilitation Facilities. (Section 21.29 CFR) All licensees may possess and use birds acquired from department approved rehabilitation facilities or legally acquired captive bred birds.

(F) Importation of Raptors. (Section 21.29 CFR) Licensees may import raptors for falconry only if they submit written authority to export raptors from the originating state or country with the department's copy of federal Form 3–186A. Nonresident licensees from a state listed in Section 21.29(k), CFR, and resident licensees who take their birds out of state and are returning to California, are exempt from this requirement. Citizens from another country may import raptors under the authority of a permit issued by the federal government, (see Section 21.29 CFR).

(G) Possession of Infertile Eggs. (Section 21.29 CFR) Infertile eggs laid by a licensee's bird may be possessed if the licensee notifies the department (address given in subsection (a) above), in writing within 48 hours after the egg is laid.

(3) BANDING.

(A) Prohibition of Removal of Bands. (Section 21.29 CFR) Raptor bands may not be removed from raptors except by a department employee or a person authorized by the department. The loss or removal of any band must be reported to the issuing office on federal Form 3–186A within five (5) working days of the loss or removal of the band.

(B) Prohibition on Defacing Band. (Section 21.29 CFR) The alteration, counterfeiting or defacing of a band is prohibited except that licensees may remove the rear tab or may smooth any imperfect surface provided the integrity of the band and numbering are not affected.

(4) TAKING.

(A) Possession of Valid Falconry License Required For Take. (Section 21.29 CFR) Only persons with a valid falconry license in possession may take a raptor from the wild. Raptors may not be taken in any state or na-

tional park. (Nonresidents see subsection (c)(4)(B) below for additional requirements)

(B) Nonresident Provisions. (Section 21.29 CFR) Nonresidents licensed to practice falconry in a state listed in Section 21.29(k), CFR, shall apply to the department (address given in subsection (a) above) for a permit to take raptors in California. Application shall be made on form FG 364 (1/96), (Request for Capture), which is incorporated by reference herein, and which shall be provided by the department upon request. If unsuccessful, the permit (form FG 364a (1/96), which is incorporated by reference herein) shall be returned to the department within five days after the expiration date (address given in subsection (a) above). The fee for the permit is $182.00 per bird as adjusted annually pursuant to Section 713 of the Fish and Game Code. Nonresidents shall only take raptors from the wild in accordance with the conditions of the permit.

Reporting Take Location. Permittee shall notify the department within 5 days of take of a bird from the wild, on form FG 364a (1/96), provided by the department. Such notification shall include the county of take and a description of the site in Township, Range, and Section format. A copy of a topographic map, with the capture site clearly indicated, shall be mailed to the department at the address indicated on the form (address given in subsection (a) above) within 14 days of take. The location reporting requirement is for all species listed in subsection (c)(4)(C) below, except red-tailed hawk, American kestrel, and great horned owl.

(C) Raptors Approved for Take From the Wild. (Section 21.29 CFR) Only the following raptors may be taken from the wild: Northern goshawk (*Accipiter gentilis*) (also see subsection (c)(4)(D) below), Cooper's hawk (*A. cooperii*), sharp-shinned hawk (*A. striatus*), red-tailed hawk (*Buteo jamaicensis*), ferruginous hawk (*B. regalis*), merlin (*Falco columbarius*), American kestrel (*F. sparverius*), prairie falcon (*F. mexicanus*) and great horned owl (*Bubo virginianus*).

Reporting Take Location. Permittee shall notify the department within 5 days of take of a bird from the wild, on form FG 363 (9/95), which is incorporated by reference herein, provided by the department. Such notification shall include the county of take and a description of the site in Township, Range, and Section format. A copy of a topographic map, with the capture site clearly indicated, shall be mailed to the department at the address indicated on the form (address given in subsection (a) above) within 14 days of take. The location reporting requirement is for all species listed in subsection (c)(4)(C) below, except red-tailed hawk, American kestrel, and great horned owl.

(D) Prohibition on Take of Northern Goshawks. (Section 21.29 CFR) Northern goshawks may not be taken from the wild at any time in the Lake Tahoe Basin as described below:

Those portions of Placer, El Dorado, and Alpine counties lying within a line beginning at the north end of Lake Tahoe, at the California–Nevada state line approximately four miles north of Stateline Point in the near vicinity of Mt. Baldy; westerly along the Tahoe Divide between the Lake Tahoe and Truckee River drainages to the intersection of the north line of Section 36, T17N, R17E, MDM; west along said north section line to the section corner common to section 25, 26, 35, and 36, T17N, R17E, MDM; south approximately one mile along the common section line; southwesterly to the intersection of the Tahoe Divide and Highway 267 in the near vicinity of Brockway Summit; southwesternly in the near vicinity of the Tahoe Divide to Mt. Pluto; south to Mt. Watson; westerly approximately two miles to Painted Rock; southerly approximately two miles along the Tahoe Divide to the intersection of Highway 89; southwesterly along the Tahoe Divide to Ward Peak; southerly approximately 30 miles along the Tahoe Divide to a point on the Echo Lakes Road; southeasterly along said road to Old Highway 50; southeasterly along Old Highway 50 to the intersection of the Echo Summit Tract Road; southerly along said road to Highway 50; easterly along Highway 50 to the intersection of the South Echo Summit Tract Road; southerly along said road to the Tahoe Divide; southerly along the Tahoe Divide past the Alpine county line to Red Lake Peak; northerly along the Tahoe Divide past Monument Peak to the California–Nevada state line; north on the state line to the point of beginning. NOTE: the area described above includes the entire basin of Lake Tahoe within California. The geographic boundary of the Lake Tahoe basin is also an area encompassed by the Lake Tahoe Basin Management Unit which is administered by the U.S. Forest Service. The Forest Service office is located in South Lake Tahoe, and maps depicting the boundary may be purchased there or obtained by mail. For ordering information call (916) 573–2600.

(E) Approved Methods of Take. (Section 21.29 CFR) Raptors may be taken by trap or net which do not injure the birds. All snare type traps must be attended at all times. All other traps must be identified with the name and address of the licensee and checked at least once every 12 hours.

(F) Eyas Bird Restriction. (Section 21.29 CFR) Eyas birds may be taken only by general or master licensees, and only from May 20 through July 15. No more than two eyas birds may be taken by the same licensee in any one year. In no case may all eyas birds be taken from any one nest. At least one eyas shall be left in a nest at all times.

(G) Passage Bird Restriction. (Section 21.29 CFR). Passage birds may only be taken from October 1 through January 31, except that a legally marked raptor which was lost or escaped may be taken at any time.

(H) Definition of Replacement Period. (Section 21.29 CFR) The 12 month period for replacing birds begins on March 1, of each year.

NOTE: Authority cited: Sections 200, 395, 1050 and 2120, Fish and Game Code. Reference: Sections 395, 713, 1050 and 1054.5, Fish and Game Code.

HISTORY

1. Amendment of subsection (d) filed 8–6–82; effective thirtieth day thereafter (Register 82, No. 32). For prior history, see Register 81, No. 45.
2. Editorial correction of subsection (b)(4)(C) filed 7–29–85; effective thirtieth day thereafter (Register 85, No. 31).
3. Amendment of subsections (a), (c), (d), (*l*) and (o) filed 1–31–86; effective upon filing pursuant to Government Code section 11346.2(d) (Register 86, No. 5).
4. Amendment of subsection (c) filed 8–12–87; operative 9–11–87 (Register 87, No. 33).
5. Amendment of subsections (e) and (l) filed 7–28–88; operative 8–27–88 (Register 88, No. 32).
6. Amendment of subsection (c) and NOTE filed 6–30–92; operative 7–30–92 (Register 92, No. 27).
7. Amendment filed 7–7–93; operative 7–7–93 (Register 93, No. 28).
8. Change without regulatory effect amending subsections (c)(1)(A), (G), and (H), (c)(2)(A), (C), (D), and (G), (c)(4)(A) and (C) and NOTE filed 9–8–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 37).
9. Amendment of subsections (c)(1)(I) and (c)(4)(B), (C), and (D) filed 4–21–94; operative 4–21–94 (Register 94, No. 16).
10. Change without regulatory effect amending subsections (a), (c)(1)(A), (c)(1)(I), (c)(2)(G), (c)(4)(B) and (c)(4)(C) filed 4–4–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 14).

§ 670.1. Listing of Endangered and Threatened Species.

(Note: These regulations were drafted to provide a petition form and rules and procedures governing the submission and review of petitions for listing, uplisting, downlisting and delisting of endangered and threatened species of plants and animals. The intent of the 1994 amendments is a smoother and more effective implementation of the California Endangered Species Act (CESA) through procedural clarity. While these amendments generally follow the chronology of the CESA statutes, they do not recreate each procedural step of the statutes in regulations.)

Pursuant to Sections 2071 and 2071.5 of the Fish and Game Code, the following rules and procedures shall govern the submission and review of petitions for listing, uplisting, downlisting and delisting of threatened or endangered species:

(a) Petition Requirement. Every person recommending that a species or subspecies be added to or removed from the State listing of endangered and threatened plants and animals or be changed in status (endangered to threatened or threatened to endangered) must submit a petition to the Fish and Game Commission, 1416 Ninth Street, Box 944209, Sacramento, California 94244–2090. Only petitions submitted on an authorized petition form (PETITION TO THE STATE OF CALIFORNIA FISH AND GAME COMMISSION, FGC–670.1 (3/94), which is incorporated by reference herein), available at the Commission office and offices of the Department of Fish and Game, will be considered by the Commission.

(b) Review of Petition for Completeness. An incomplete petition shall be returned to the petitioner by the commission staff within 10 days of receipt. A petition shall be deemed incomplete if it is not submitted on FGC–670.1 (3/94) or fails to contain information in each of the required categories set forth in subsection (d)(1).

(c) Notice of Receipt of Petition. Pursuant to Section 2073.3 of the Fish and Game Code, the commission staff shall submit a notice of receipt of an accepted petition to the Office of Administrative Law, for publication in the California Regulatory Notice Register, at the time the petition is transmitted to the department for evaluation. Notice of the receipt of a petition submitted by the department shall be submitted to the Office of Administrative Law for publication upon receipt. Notices shall contain the date and location of the Commission meeting at which the petition is scheduled for receipt.

(d) Department Initial Evaluation of Petition. (90–Day Review)

(1) Sufficient Scientific Information. The department's evaluation report, required pursuant to Section 2073.5 of the Fish and Game Code, shall contain an evaluation of whether or not the petition provides sufficient scientific information on the following petition components of Section 2072.3 of the Fish and Game Code to indicate that the petitioned action may be warranted:

(A) population trend;
(B) range;
(C) distribution;
(D) abundance;
(E) life history;
(F) kind of habitat necessary for survival;
(G) factors affecting the ability to survive and reproduce;
(H) degree and immediacy of threat;
(I) impact of existing management efforts;
(J) suggestions for future management;
(K) availability and sources of information; and
(L) a detailed distribution map.

(e) Consideration of Petition by Commission (rejection or acceptance).

(1) Rejection of Petition by Commission. Pursuant to Section 2074.2 of the Fish and Game Code, a petition will be rejected by the commission if it fails to include sufficient scientific information under the categories of Section 2072.3 of Fish and Game Code (subsections (d)(1)(A) through (L) above) that the petitioned action may be warranted. If the commission finds that the petition does not provide sufficient information to indicate that the petitioned action may be warranted, a notice of finding that the petition is rejected, including the reason for objections, will be published in the California Regulatory Notice Register.

(2) Acceptance of Petition by Commission. If the commission finds that the petition provides sufficient information to indicate that the petitioned action may be warranted, a notice of finding that the petition is accepted for consideration will be published in the California Regulatory Notice Register. If the petitioned action is to add a species to the threatened or endangered species list, the notice will declare the species a candidate.

(f) Department Review of Candidate Species. Pursuant to Section 2074.6 of the Fish and Game Code, within 12 months of the date of publication of notice of acceptance of a petition for consideration by the commission, the department shall provide a written report to the commission, based upon the best scientific information available to the department. This report shall indicate whether or not the petitioned action is warranted.

(1) Recommendations for Management and Recovery. Pursuant to Section 2074.6 of the Fish and Game Code, the department's status report shall contain a preliminary identification of the habitat which may be essential to the continued existence of the species and recommendations for management activities and other recommendations for recovery of the species.

(2) Solicitation of Data and Comments. In satisfying the requirements of Section 2074.4 of the Fish and Game Code, the department shall solicit both existing data on the candidate species from independent sources and comments on the petitioned action. During the status review period the department shall seek independent and competent peer review of the department status report whenever possible. For purposes of these regulations, peer review is defined as the analysis of a scientific report by persons of the scientific/academic community commonly acknowledged to be experts on the subject under consideration, possessing the knowledge and expertise to critique the scientific validity of the report. The department shall include in the status report a listing of the individuals and agencies that were given an opportunity to review the status report prior to its submittal to the commission. Any comments received shall also be included in the status report.

(3) Review Period for Department–Initiated Petitions. When a department–initiated petition is accepted by the commission for consideration, commission staff shall schedule receipt of the department's report prepared pursuant to Section 2074.6 of the Fish and Game Code for a commission meeting no sooner than 90 days from the date the notice of candidate species is published in the California Regulatory Notice Register.

(g) Receipt of Department's Status Report and Scheduling of Finding Hearing.

(1) Commission Meetings for Receipt of Report and Making of Finding. The commission shall receive the department's status report at a regularly scheduled meeting and provide for final consideration of the petition at the next scheduled meeting. Agendas for both of these meetings shall be distributed to all individuals requesting such notification.

(2) Upon Receipt by the Commission Office, Availability of Status Report. The Department's status report shall be made available for public review.

(h) Submission of Reports by Interested Parties During the Department's Review Period of Candidate Species.

(1) Time of Submission. Public comments, including critiques, rebuttals or comments on the petition or on the department's status review report, may be submitted in writing to the commission office or presented as oral or written testimony at the finding hearing on the petition. Interested parties who wish to submit a detailed written scientific report to the commission on the petitioned action must submit such report not later than the time the department submits its report pursuant to Section 2074.6 of the Fish and Game Code. Detailed scientific reports received after the department submits its review report may not be considered. The department shall provide interested parties with a preliminary estimation of the date the status review report will be submitted to the commission. Such estimations will be provided only upon written request and shall not obligate the department to submit the report at the time identified. The department shall reserve the right to submit the report at a later or earlier date. If, however, the report will be submitted appreciably earlier or later than the estimated date, the department shall notify those who made written requests at the earliest possible time. (Parties planning to submit scientific reports are encouraged to coordinate with the department during its review period and to share scientific information useful to the department in its review.)

(2) Solicitation of Comments. Interested individuals who wish to submit a detailed scientific report pursuant to subsection 670.1(h)(1) above may seek independent and competent peer review of this report prior to submission. All comments from the reviewers shall be included with the report to verify that peer review has been solicited. Failure to obtain peer review of privately prepared detailed scientific reports may be a factor considered by the Commission in its final determination on the petition.

(3) Availability of Detailed Scientific Report from Interested Individuals. Detailed scientific reports from private individuals shall be made available for public review upon receipt by the Commission office.

(i) Final Consideration of Petition by Commission. (Action warranted or not warranted.)

(1) Petition Action Warranted.

(A) Listing. A species shall be listed as endangered or threatened, as defined in sections 2062 and 2067 of the Fish and Game Code, if the Commission determines that its continued existence is in serious danger or is threatened by any one or any combination of the following factors:

1. Present or threatened modification or destruction of its habitat;
2. Overexploitation;
3. Predation;
4. Competition;
5. Disease; or
6. Other natural occurrences or human–related activities.

(B) Delisting. A species may be delisted as endangered or threatened, as defined in sections 2062 and 2067 of the Fish and Game Code, if the Commission determines that its continued existence is no longer threatened by any one or any combination of the factors provided in subsection (i)(1)(A) above.

1. Status During Delisting Process. A threatened or endangered species petitioned for delisting shall retain its listed status throughout the delisting process.

2. Removal of Species. After the commission has determined that the petitioned action is warranted, a delisted species shall retain its listed status until 30 days after the Office of Administrative Law has approved the associated rulemaking file and filed the regulation change with the Secretary of State.

(C) Uplisting and Downlisting. A threatened species may be uplisted to endangered if its continued existence throughout all or a significant portion of its range is in serious danger of becoming extinct by any one or any combination of the factors listed in subsection (i)(1)(A) above. An endangered species may be downlisted to threatened if it is no longer in serious danger of becoming extinct but special protection and management are still required because of continued threats to its existence by any one or any combination of the factors listed in subsection (i)(1)(A) above.

(2) Petitioned Action Not Warranted. The commission shall enter its findings in the public records and the subject species shall revert to its status prior to the filing of the petition.

(j) Submission of Regulatory Document. The department shall prepare an Initial Statement of Reasons for Regulation Change (also called Pre–publication of Notice Statement), including an assessment of the potential for adverse economic impact pursuant to Government Code Sections 11346.5 and 11346.53, when listing, delisting or change in status is recommended in the Department's report prepared pursuant to subsection (f) of this section. This document shall be submitted to the commission staff at the commission meeting after final consideration of the petition if the commission makes a finding that the petitioned action is warranted.

NOTE: Authority cited: Sections 2071 and 2071.5, Fish and Game Code. Reference: Sections 2062, 2067, 2071, 2071.5, 2072, 2072.3, 2072.7, 2073.3, 2073.5, 2074.2, 2074.4, 2074.6 and 2075.5, Fish and Game Code.

HISTORY

1. New sections filed 5–30–86; effective thirtieth day thereafter (Register 86, No. 22).
2. Amendment of subsection (a) filed 8–31–90; operative 9–30–90 (Register 90, No. 42).
3. Amendment of section and NOTE filed 8–29–94; operative 9–28–94 (Register 94, No. 35).

§ 670.2. Plants of California Declared to Be Endangered, Threatened or Rare.

The following species, subspecies and varieties of California native plants are hereby declared to be endangered, threatened (as defined by section 2067 of the Fish and Game Code) or rare (as defined by section 1901 of the Fish and Game Code), as indicated:

(a) Endangered:

(1) Agavaceae (Agave Family)

(A) *Nolina interrata* (Dehesa nolina)

(2) Amaryllidaceae (Amaryllis Family)

(A) *Brodiaea coronaria* ssp. *rosea* (Indian Valley brodiaea)

(B) *Brodiaea filifolia* (thread–leaved brodiaea)

(C) *Brodiaea insignis* (Kaweah brodiaea)

(D) *Brodiaea pallida* (Chinese Camp brodiaea)

(3) Apiaceae (Carrot Family)

(A) *Eryngium aristulatum* var. *parishii* (San Diego button–celery)

(B) *Eryngium constancei* (Loch Lomond button–celery)

(C) *Eryngium racemosum* (Delta button–celery)

(4) Asteraceae (Sunflower Family)

(A) *Baccharis vanessae* (Encinitas baccharis)

(B) *Blennosperma bakeri* (Sonoma sunshine)

(C) *Cirsium ciliolatum* (Ashland thistle)

(D) *Cirsium fontinale* var. *fontinale* (fountain thistle)

(E) *Cirsium fontinale* var. *obispoense* (Chorro Creek bog thistle)

(F) *Eriophyllum latilobum* (San Mateo woolly sunflower)

(G) *Helianthus niveus* ssp. *tephrodes* (Algodones Dunes sunflower)

(H) *Deinandra conjugens* (Otay tarplant)

(I) *Deinandra increscens* ssp. *villosa* (Gaviota tarplant)

(J) *Deinandra mohavensis* (Mojave tarplant)

(K) *Holocarpha macradenia* (Santa Cruz tarplant)

(L) *Lasthenia burkei* (Burke's goldfields)

(M) *Layia carnosa* (beach layia)

(N) *Lessingia germanorum* (San Francisco lessingia)

(O) *Pentachaeta bellidiflora* (white–rayed pentachaeta)

(P) *Pentachaeta lyonii* (Lyon's pentachaeta)

(Q) *Pseudobahia bahiifolia* (Hartweg's golden sunburst)

(R) *Pseudobahia peirsonii* (San Joaquin adobe sunburst)

(5) Berberidaceae (Barberry Family)

(A) *Berberis nevinii* (Nevin's barberry)

(B) *Berberis pinnata* ssp. *insularis* (island barberry)

(C) *Mahonia sonnei* (Truckee barberry)

(6) Boraginaceae (Borage Family)

(A) *Amsinckia grandiflora* (large–flowered fiddleneck)

(B) *Plagiobothrys diffusus* (San Francisco popcorn–flower)

(7) Brassicaceae (Mustard Family)

(A) *Arabis macdonaldiana* (McDonald's rock cress)

(B) *Caulanthus californicus* (California jewel–flower)

(C) *Erysimum capitatum* var. *angustatum* (Contra Costa wallflower)

(D) *Erysimum menziesii* (Menzies's wallflower)

(E) *Erysimum teretifolium* (Santa Cruz wallflower)

(F) *Rorippa subumbellata* (Tahoe yellow cress)

(G) *Streptanthus niger* (Tiburon jewel–flower)

(H) *Thelypodium stenopetalum* (slender–petaled thelypodium)

(8) Cactaceae (Cactus Family)

(A) *Opuntia basilaris* var. *treleasei* (Bakersfield cactus)

(9) Campanulaceae (Bellflower Family)

(A) *Downingia concolor* var. *brevior* (Cuyamaca Lake downingia)

(10) Caryophyllaceae (Pink Family)

(A) *Arenaria paludicola* (marsh sandwort)

(B) *Silene campanulata* ssp. *campanulata* (Red Mountain catchfly)

(11) Chenopodiaceae (Goosefoot Family)

(A) *Atriplex tularensis* (Bakersfield smallscale)

(B) *Nitrophila mohavensis* (Amargosa nitrophila)

(12) Convolvulaceae (Morning–glory Family)

(A) *Calystegia stebbinsii* (Stebbins's morning–glory)

(13) Crassulaceae (Stonecrop Family)

(A) *Dudleya brevifolia* (short–leaved dudleya)

(B) *Dudleya traskiae* (Santa Barbara Island dudleya)

(C) *Sedella leiocarpa* (Lake County stonecrop)

(14) Cupressaceae (Cypress Family)

(A) *Cupressus abramsiana* (Santa Cruz cypress)

(15) Cyperaceae (Sedge Family)

(A) *Carex albida* (white sedge)

(16) Ericaceae (Heath Family)

(A) *Arctostaphylos densiflora* (Vine Hill manzanita)

(B) *Arctostaphylos hookeri* ssp. *hearstiorum* (Hearst's manzanita)

(C) *Arctostaphylos hookeri* ssp. *ravenii* (Presidio manzanita)

(D) *Arctostaphylos imbricata* (San Bruno Mountain manzanita)

(E) *Arctostaphylos pacifica* (Pacific manzanita)
(F) *Arctostaphylos pallida* (pallid manzanita)
(G) *Ornithostaphylos oppositifolia* (Baja California birdbush)
(17) Fabaceae (Pea Family)
(A) *Astragalus agnicidus* (Humboldt milk–vetch)
(B) *Astragalus lentiginosus* var. *sesquimetralis* (Sodaville milk–vetch)
(C) *Astragalus magdalenae* var. *peirsonii* (Peirson's milk–vetch)
(D) *Astragalus pycnostachyus var. lanosissimus* (Ventura marsh milk–vetch)
(E) *Astragalus tener* var. *titi* (coastal dunes milk–vetch)
(F) *Lotus argophyllus* var. *adsurgens* (San Clemente Island bird's–foot trefoil)
(G) *Lotus argophyllus* var. *niveus* (Santa Cruz Island bird's–foot trefoil)
(H) *Lotus dendroideus* var. *traskiae* (San Clemente Island lotus)
(I) *Lupinus nipomensis* (Nipomo Mesa lupine)
(J) *Lupinus tidestromii* var. *tidestromii* (Tidestrom's lupine)
(K) *Trifolium trichocalyx* (Monterey clover)
(18) Hydrophyllaceae (Waterleaf Family)
(A) *Eriodictyon altissimum* (Indian Knob mountainbalm)
(19) Lamiaceae (Mint Family)
(A) *Acanthomintha duttonii* (San Mateo thorn–mint)
(B) *Acanthomintha ilicifolia* (San Diego thorn–mint)
(C) *Monardella linoides* ssp. *viminea* (willowy monardella)
(D) *Pogogyne abramsii* (San Diego mesa mint)
(E) *Pogogyne clareana* (Santa Lucia mint)
(F) *Pogogyne nudiuscula* (Otay Mesa Mint)
(20) Liliaceae (Lily Family)
(A) *Fritillaria roderickii* (Roderick's fritillary)
(B) *Lilium occidentale* (western lily)
(C) *Lilium pardalinum ssp. pitkinense* (Pitkin Marsh lily)
(21) Limnanthaceae (False Mermaid Family)
(A) *Limnanthes douglasii* var. *sulphurea* (Point Reyes meadowfoam)
(B) *Limnanthes floccosa* ssp. *californica* (Butte County meadowfoam)
(C) *Limnanthes gracilis* var. *parishii* (Parish's meadowfoam)
(D) *Limnanthes vinculans* (Sebastopol meadowfoam)
(22) Linaceae (Flax Family)
(A) *Hesperolinon didymocarpum* (Lake County western flax)
(23) Malvaceae (Mallow Family)
(A) *Malacothamnus clementinus* (San Clemente Island bush mallow)
(B) *Malacothamnus fasciculatus* var. *nesioticus* (Santa Cruz Island bush mallow)
(C) *Sidalcea covillei* (Owens Valley checkerbloom)
(D) *Sidalcea oregana* ssp. *valida* (Kenwood Marsh checkerbloom)
(E) *Sidalcea pedata* (bird–foot checkerbloom)
(F) *Sidalcea stipularis* (Scadden Flat checkerbloom)
(24) Onagraceae (Evening–primrose Family)
(A) *Clarkia franciscana* (Presidio clarkia)
(B) *Clarkia imbricata* (Vine Hill clarkia)
(C) *Clarkia lingulata* (Merced clarkia)
(D) *Clarkia springvillensis* (Springville clarkia)
(E) *Oenothera deltoides* ssp. *howellii* (Antioch dunes evening–primrose)
(25) Poaceae (Grass Family)
(A) *Dichanthelium lanuginosum* var. *thermale* (Geysers dichanthelium)
(B) *Neostapfia colusana* (Colusa grass)
(C) *Orcuttia californica* (California Orcutt grass)
(D) *Orcuttia inaequalis* (San Joaquin Valley Orcutt grass)
(E) *Orcuttia pilosa* (hairy Orcutt grass)
(F) *Orcuttia tenuis* (slender Orcutt grass)
(G) *Orcuttia viscida* (Sacramento Orcutt grass)
(H) *Poa napensis* (Napa blue grass)
(I) *Tuctoria mucronata* (Crampton's tuctoria)
(26) Polemoniaceae (Phlox Family)
(A) *Eriastrum densifolium* ssp. *sanctorum* (Santa Ana River woollystar)
(B) *Navarretia leucocephala* ssp. *plieantha* (many–flowered navarretia)
(C) *Phlox hirsuta* (Yreka phlox)
(27) Polygonaceae (Buckwheat Family)
(A) *Chorizanthe orcuttiana* (Orcutt's spineflower)
(B) *Chorizanthe parryi* var. *fernandina* (San Fernando Valley spineflower)
(C) *Chorizanthe valida* (Sonoma spineflower)
(D) *Dodecahema leptoceras* (slender–horned spineflower)
(E) *Eriogonum alpinum* (Trinity buckwheat)
(F) *Eriogonum apricum* var. *apricum* (Ione buckwheat)
(G) *Eriogonum apricum* var. *prostratum* (Irish Hill buckwheat)
(H) *Eriogonum thornei* (Thorne's buckwheat)
(I) *Eriogonum grande* ssp. *timorum* (San Nicholas Island buckwheat)
(J) *Eriogonum kelloggii* (Kellogg's buckwheat)
(K) *Polygonum hickmanii* (Scotts Valley polygonum)
(28) Ranunculaceae (Buttercup Family)
(A) *Delphinium bakeri* (Baker's larkspur)
(B) *Delphinium variegatum* ssp. *kinkiense* (San Clemente Island larkspur)
(29) Rhamnaceae (Buckthorn Family)
(A) *Ceanothus ophicochilus* (Vail Lake ceanothus)
(30) Rosaceae (Rose Family)
(A) *Cercocarpus traskiae* (Catalina Island mountain–mahogany)
(B) *Potentilla hickmanii* (Hickman's cinquefoil)
(C) *Rosa minutifolia* (small–leaved rose)
(31) Rubiaceae (Madder Family)
(A) *Galium catalinense* ssp. *acrispum* (San Clemente Island bedstraw)
(32) Saxifragaceae (Saxifrage Family)
(A) *Lithophragma maximum* (San Clemente Island woodland star)
(33) Scrophulariaceae (Figwort Family)
(A) *Castilleja campestris* ssp. *succulenta* (succulent owl's–clover)
(B) *Castilleja grisea* (San Clemente Island Indian paintbrush)
(C) *Castilleja uliginosa* (Pitkin Marsh Indian paintbrush)
(D) *Cordylanthus maritimus* ssp. *maritimus* (salt marsh bird's–beak)
(E) *Cordylanthus palmatus* (palmate–bracted bird's–beak)
(F) *Cordylanthus rigidus* ssp. *littoralis* (seaside bird's–beak)
(G) *Gratiola heterosepala* (Boggs Lake hedge–hyssop)
(b) Threatened:
(1) Amaryllidaceae (Amaryllis Family)
(A) *Allium munzii* (Munz's onion)
(2) Asteraceae (Sunflower Family)
(A) *Cirsium loncholepis* (La Graciosa thistle)
(B) *Cirsium rhothophilum* (surf thistle)
(C) *Hazardia orcuttii* (Orcutt's hazardia)
(D) *Verbesina dissita* (crownbeard)
(3) Boraginaceae (Borage Family)
(A) *Plagiobothrys strictus* (Calistoga popcorn–flower)
(4) Brassicaceae (Mustard Family)
(A) *Dithyrea maritima* (beach spectaclepod)
(B) *Nasturtium gambelii* (Gambel's water cress)
(5) Crassulaceae (Stonecrop Family)
(A) *Dudleya stolonifera* (Laguna Beach dudleya)
(6) Fabaceae (Pea Family)
(A) *Astragalus claranus* (Clara Hunt's milk–vetch)
(B) *Lupinus citrinus* var. *deflexus* (Mariposa lupine)
(C) *Lupinus milo–bakeri* (Milo Baker's lupine)
(7) Liliaceae (Lily Family)
(A) *Calochortus tiburonensis* (Tiburon mariposa lily)
(B) *Fritillaria striata* (striped adobe–lily)
(8) Linaceae (Flax Family)
(A) *Hesperolinon congestum* (Marin western flax)
(9) Philadelphaceae (Mock Orange Family)

(A) *Carpenteria californica* (tree–anemone)
(10) Poaceae (Grass Family)
(A) *Pleuropogon hooverianus* (North Coast semaphore grass)
(11) Polemoniaceae (Phlox Family)
(A) *Gilia tenuiflora* ssp. *arenaria* (sand gilia)
(B) *Navarretia leucocephala* ssp. *pauciflora* (few–flowered navarretia)
(12) Polygonaceae (Buckwheat Family)
(A) *Chorizanthe howellii* (Howell's spineflower)
(13) Scrophulariaceae (Figwort Family)
(A) *Castilleja affinis* spp. *neglecta* (Tiburon Indian paintbrush)
(14) Verbenaceae (Vervain Family)
(A) *Verbena californica* (California vervain)
(c) Rare:
(1) Amaryllidaceae (Amaryllis Family)
(A) *Allium yosemitense* (Yosemite onion)
(B) *Bloomeria humilis* (dwarf goldenstar)
(2) Apiaceae (Carrot Family)
(A) *Lilaeopsis masonii* (Mason's lilaeopsis)
(B) *Sanicula maritima* (adobe sanicle)
(C) *Sanicula saxatilis* (rock sanicle)
(3) Asteraceae (Sunflower Family)
(A) *Blennosperma nanum* var. *robustum* (Point Reyes blennosperma)
(B) *Eriophyllum congdonii* (Congdon's woolly sunflower)
(C) *Deinandra arida* (Red Rock tarplant)
(D) *Deinandra minthornii* (Santa Susanna tarplant)
(E) *Dieteria asteroides* var. *lagunensis* (Mount Laguna aster)
(F) *Packera ganderi* (Gander's ragwort)
(G) *Packera layneae* (Layne's ragwort)
(4) Boraginaceae (Borage Family)
(A) *Cryptantha roosiorum* (bristlecone cryptantha)
(5) Brassicaceae (Mustard Family)
(A) *Caulanthus stenocarpus* (slender–pod jewel–flower)
(6) Campanulaceae (Bellflower Family)
(A) *Nemacladus twisselmannii* (Twisselmann's nemacladus)
(7) Crassulaceae (Stonecrop Family)
(A) *Dudleya cymosa* ssp. *marcescens* (marcescent dudleya)
(B) *Dudleya nesiotica* (Santa Cruz Island dudleya)
(8) Cyperaceae (Sedge Family)
(A) *Carex tompkinsii* (Tompkins's sedge)
(9) Ericaceae (Heath Family)
(A) *Arctostaphylos bakeri* (Baker's manzanita)
(B) *Arctostaphylos edmundsii* var. *parvifolia* (Hanging Gardens manzanita)
(10) Euphorbiaceae (Spurge Family)
(A) *Croton wigginsii* (Wiggins's croton)
(11) Fabaceae (Pea Family)
(A) *Astragalus johannis–howellii* (Long Valley milk–vetch)
(B) *Astragalus monoensis* (Mono milk–vetch)
(C) *Astragalus traskiae* (Trask's milk–vetch)
(D) *Lupinus padre–crowleyi* (Father Crowley's lupine)
(E) *Thermopsis macrophylla* var. *agnina* (Santa Ynez false lupine)
(F) *Trifolium polyodon* (Pacific Grove clover)
(12) Hydrophyllaceae (Waterleaf Family)
(A) *Eriodictyon capitatum* (Lompoc yerba santa)
(13) Liliaceae (Lily Family)
(A) *Calochortus dunnii* (Dunn's mariposa lily)
(B) *Calochortus persistens* (Siskiyou mariposa lily)
(C) *Chlorogalum purpureum* var. *reductum* (Camatta Canyon amole)
(14) Limnanthaceae (False Mermaid Family)
(A) *Limnanthes bakeri* (Baker's meadowfoam)
(15) Malvaceae (Mallow Family)
(A) *Sidalcea hickmanii* ssp. *anomala* (Cuesta Pass checkerbloom)
(B) *Sidalcea hickmanii* ssp. *parishii* (Parish's checkerbloom)
(16) Onagraceae (Evening–primrose Family)
(A) *Clarkia speciosa* ssp. *immaculata* (Pismo clarkia)
(B) *Oenothera californica* ssp. *eurekensis* (Eureka Dunes evening–primrose)
(17) Poaceae (Grass Family)
(A) *Agrostis blasdalei* var. *marinensis* (Marin bent grass)
(B) *Calamagrostis foliosa* (leafy reed grass)
(C) *Swallenia alexandrae* (Eureka Valley dune grass)
(D) *Tuctoria greenei* (Greene's tuctoria)
(18) Polemoniaceae (Phlox Family)
(A) *Eriastrum tracyi* (Tracy's eriastrum)
(19) Polygonaceae (Buckwheat Family)
(A) *Dedeckera eurekensis* (July gold)
(B) *Eriogonum butterworthianum* (Butterworth's buckwheat)
(C) *Eriogonum crocatum* (Conejo buckwheat)
(D) *Eriogonum giganteum* var. *compactum* (Santa Barbara Island buckwheat)
(E) *Eriogonum twisselmannii* (Twisselmann's buckwheat)
(20) Portulacaceae (Purslane Family)
(A) *Lewisia congdonii* (Congdon's lewisia)
(21) Ranunculaceae (Buttercup Family)
(A) *Delphinium hesperium* ssp. *cuyamacae* (Cuyamaca larkspur)
(B) *Delphinium luteum* (yellow larkspur)
(22) Rhamnaceae (Buckthorn Family)
(A) *Ceanothus hearstiorum* (Hearst's ceanothus)
(B) *Ceanothus maritimus* (maritime ceanothus)
(C) *Ceanothus masonii* (Mason's ceanothus)
(D) *Ceanothus roderickii* (Pine Hill ceanothus)
(23) Rosaceae (Rose Family)
(A) *Ivesia callida* (Tahquitz ivesia)
(24) Rubiaceae (Madder Family)
(A) *Galium angustifolium* ssp. *borregoense* (Borrego bedstraw)
(B) *Galium buxifolium* (box bedstraw)
(C) *Galium californicum* ssp. *sierrae* (El Dorado bedstraw)
(25) Saxifragaceae (Saxifrage Family)
(A) *Bensoniella oregona* (bensoniella)
(26) Scrophulariaceae (Figwort Family)
(A) *Castilleja gleasonii* (Mt. Gleason Indian paintbrush)
(B) *Cordylanthus mollis* ssp. *mollis* (soft bird's–beak)
(C) *Cordylanthus nidularius* (Mt. Diablo birds–beak)
(D) *Cordylanthus tenuis* ssp. *capillaris* (Pennell's bird's–beak)
(E) *Holmgrenanthe petrophila* (rock lady)
(F) *Pedicularis dudleyi* (Dudley's lousewort)
(27) Sterculiaceae (Cacao Family)
(A) *Fremontodendron decumbens* (Pine Hill flannelbush)
(B) *Fremontodendron mexicanum* (Mexican flannelbush)

HISTORY

1. New section filed 10–11–78; effective thirtieth day thereafter (Register 78, No. 41).
2. Amendment of subsections (a)(10), (b)(10), (b)(17) and new subsections (a)(12)–(a)(27) and (b)(19)–(b)(21) filed 6–11–79; effective thirtieth day thereafter (Register 79, No. 24).
3. Amendment filed 8–9–79; effective thirtieth day thereafter (Register 79, No. 32).
4. Amendment filed 10–17–79; effective thirtieth day thereafter (Register 79, No. 42).
5. Repealer and new section filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
6. Amendment of subsections (a)(2)–(a)(4), (a)(10), (a)(16), (a)(17), (a)(20) and (a)(26) filed 12–18–81; effective thirtieth day thereafter (Register 81, No. 51).
7. New subsections (a)(7)(D), (a)(14)(E) and (F), (a)(18)(C), (a)(20)(E) and (F), (a)(25)(B), (a)(26)(H), (a)(27) and (a)(28) filed 1–13–82; effective thirtieth day thereafter (Register 82, No. 3).
8. New subsections (a)(4)(H), (a)(7)(E), (a)(14)(G) and (H), (a)(18)(D), (a)(24)(F), (a)(29)–(a)(31) filed 3–17–82; effective thirtieth day thereafter (Register 82, No. 12).
9. Amendment of subsection (a)(26) and new subsections (b)(2)(C), (b)(3)(F)–(H), (b)(16)(F), (b)(20)(F), (b)(21)(B), and (b)(24)–(27) filed 6–4–82; effective thirtieth day thereafter (Register 82, No. 23).
10. New subsections (b)(1)(B), (b)(3)(E), (b)(9)(F) and (G), (b)(11)(C), (b)(14)(C), (b)(17)(C), (b)(18)(D), (b)(20)(E), and (b)(22) and (23) filed 6–4–82; effective thirtieth day thereafter (Register 82, No. 23).

11. Amendment of subsection (a)(3) and new subsection (a)(26)(H) filed 4–20–84; effective thirtieth day thereafter (Register 84, No. 16).
12. Editorial correction filed 7–20–84 (Register 84, No. 29).
13. Amendment filed 8–3–84; effective thirtieth day thereafter (Register 84, No. 31).
14. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
15. Amendment filed 5–30–86; effective thirtieth day thereafter (Register 86, No. 22).
16. Amendment of subsection (a), relettering and amendment of former subsection (b) to subsection (c), and new subsection (b) filed 1–16–87; effective upon filing pursuant to Fish and Game Code section 215 (Register 87, No. 4).
17. Amendment of subsections (a)(17) and (b)(3) filed 2–26–88; operative 3–27–88 (Register 88, No. 13).
18. Amendment of subsection (a) filed 10–23–89; operative 11–22–89 (Register 89, No. 43).
19. Editorial correction of printing error inadvertently omitting text (Register 90, No. 38).
20. Renumbering: former (a)(8) through (a)(25) to (a)(11) through (a)(28) respectively; former (a)(26), (27), (28), (29), (30), (31); to (a)(32), (9), (31), (10), (29) and (30) respectively; renumbering (a)(25)(A) to (a)(29)(C); relettering former (a)(25)(B) to (a)(28)(A); renumbering (b)(1)–(5) to (b)(5), (6), (7), (9), (10) respectively; adding new (a)(4)(K)–(N), (a)(7)(H), (a)(8), (a)(8)(A), (a)(10)(B), (a)(13)(C), (a)(27)(I), (b)(1), (b)(1)(A), (b)(2), (b)(2)(A)–(C), (b)(3), (b)(3)(A), (b)(4), (b)(4)(A)–(B), (b)(6)(B)–(C), (b)(8), (b)(8)(A), (b)(9)(B), (b)(11), (b)(11)(A); nonsubstantive spelling corrections at (a)(4)(G), (J), (a)(5)(C), (a)(6)(B), (a)(7)(A), (E), (F), (a)(17)(B), (E), (G), (a)(18)(B), (a)(19)(A), (E), (a)(23)(A), (E), (a)(25)(B), (a)(32)(A), (F), (b)(7)(A), (c)(1)(A), (c)(3)(F), (c)(9)(A), (C), (E), (F), (c)(11)(A), (C), (c)(15)(A), (B); correction of printing error repeating (a)(5), (a)(5)(A), (a)(4), (a)(4)(A)–(J) filed 10–9–90; operative 11–8–90 (Register 90, No. 45).
21. New subsection (a)(4)(O) filed 4–7–92; operative 5–7–92 (Register 92, No. 15).
22. New subsections (a)(4)(P)–(Q) and subsection (b)(8)(A) and renumbering filed 12–1–92; operative 12–31–92 (Register 92, No. 49).
23. New subsection (a)(4)(B) and subsection relettering filed 6–11–93; operative 7–12–93 (Register 93, No. 24).
24. New subsection (a)(29) and subsection renumbering filed 12–28–93; operative 1–27–94 (Register 93, No. 53).
25. New subsections (b)(13)–(b)(13)(A) filed 7–14–94; operative 8–15–94 (Register 94, No. 28).
26. Editorial correction relocating subsection (b)(8)(B) to (b)(7)(B) (Register 94, No. 28).
27. Change without regulatory effect amending subsections (a)(4)(H), (a)(4)(J), (a)(13)(B), (a)(17)(C), (a)(17)(F), (a)(19)(A), (a)(22)(A), (a)(25)(A), (a)(27)(G), (a)(28)(A), (a)(33)(D), (a)(33)(G), (b)(1)(A), (b)(6)(C), (b)(8)(A), (c)(3)(D), (c)(3)(G), (c)(5)(A), (c)(9)(B) and (c)(14)(B) filed 2–10–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 6).
28. Change without regulatory effect amending subsections (a)(26)(A), (b)(10)(B) and (b)(12)(A) filed 10–3–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 40).
29. Change without regulatory effect amending subsections (a)(5)(A) and (C) and (a)(20)(B) filed 8–20–98 pursuant to section 100, title 1, California Code of Regulations (Register 98, No. 34).
30. Change without regulatory effect amending section and NOTE filed 6–7–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 44).
31. New subsection (a)(17)(D) and subsection relettering filed 11–7–2000; operative 12–7–2000 (Register 2000, No. 45).
32. New subsection (a)(16)(G) filed 4–4–2002; operative 4–4–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 14).
33. New subsection (a)(27)(B) and subsection relettering filed 8–9–2002; operative 9–8–2002 (Register 2002, No. 32).
34. New subsection (b)(2)(C) and subsection relettering filed 12–26–2002; operative 1–25–2003 (Register 2002, No. 52).
35. New subsections (b)(10)–(b)(10)(A), repealer of subsection (c)(17)(C) and subsection renumbering and relettering filed 12–30–2002; operative 1–29–2003 (Register 2003, No. 1).
36. New subsection (a)(27)(K) filed 4–19–2005; operative 5–19–2005 (Register 2005, No. 16).
37. Change without regulatory effect amending subsections (a)(4)(H)–(J), (a)(13)(A) and (C), (a)(27)(H), (b)(4)(B), (b)(6)(A), (c)(3)(C)–(G) and (c)(11)(B) filed 5–26–2006 pursuant to section 100, title 1, California Code of Regulations (Register 2006, No. 21).
38. New subsection (a)(28)(A), repealer of subsection (c)(21)(A) and subsection relettering filed 10–6–2006; operative 11–5–2006 (Register 2006, No. 40).

§ 670.5. Animals of California Declared To Be Endangered or Threatened.

The following species and subspecies are hereby declared to be endangered or threatened, as indicated:

(a) Endangered:

(1) Crustaceans:

(A) California freshwater shrimp *(Syncaris pacifica)*

(B) Shasta crayfish *(Pacifastacus fortis)*

(2) Fishes:

(A) Bull trout *(Salvelinus confluentus)*

(B) Mohave tui chub *(Gila bicolor mohavensis)*

(C) Owens tui chub *(Gila bicolor snyderi)*

(D) Bonytail *(Gila elegans)*

(E) Colorado pikeminnow *(Ptychocheilus lucius)*

(F) Lost River sucker *(Deltistes luxatus)*

(G) Modoc sucker *(Catostomus microps)*

(H) Shortnose sucker *(Chasmistes brevirostris)*

(I) Razorback sucker *(Xyrauchen texanus)*

(J) Desert pupfish *(Cyprinodon macularius)*

(K) Owens pupfish *(Cyprinodon radiosus)*

(L) Unarmored threespine stickleback *(Gasterosteus aculeatus williamsoni)*

(M) Winter run chinook salmon *(Oncorhynchus tshawytscha)*

(N) Coho salmon (*Oncorhynchus kisutch*) south of Punta Gorda (Humboldt County), California.

(3) Amphibians:

(A) Santa Cruz long–toed salamander *(Ambystoma macrodactylum croceum)*

(B) Desert slender salamander *(Batrachoseps aridus)*

(4) Reptiles:

(A) Coachella Valley fringe–toed lizard *(Uma inornata)*

(B) Blunt–nosed leopard lizard *(Gambelia silus)*

(C) San Francisco garter snake *(Thamnophis sirtalis tetrataenia)*

(5) Birds:

(A) California brown pelican *(Pelecanus occidentalis californicus)*

(B) California condor *(Gymnogyps californianus)*

(C) Bald eagle *(Haliaeetus leucocephalus)*

(D) American peregrine falcon *(Falco peregrinus anatum)*

(E) California clapper rail *(Rallus longirostris obsoletus)*

(F) Light–footed clapper rail *(Rallus longirostris levipes)*

(G) California least tern *(Sterna antillarum browni)*

(H) Western yellow–billed cuckoo *(Coccyzus americanus occidentalis)*

(I) Elf owl *(Micrathene whitneyi)*

(J) Great gray owl *(Strix nebulosa)*

(K) Least Bell's vireo *(Vireo bellii pusillus)*

(L) Inyo California towhee *(Pipilo crissalis eremophilus)*

(M) Willow flycatcher *(Empidonax traillii)*

(N) Arizona Bell's vireo *(Vireo bellii arizonae)*

(O) Gila woodpecker *(Melanerpes uropygialis)*

(P) Gilded northern flicker *(Colaptes auratus chrysoides)*

(Q) Belding's savannah sparrow *(Passerculus sandwichensis beldingii)*

(R) Marbled murrelet (*Brachyramphus marmoratus*)

(6) Mammals:

(A) Riparian brush rabbit (*Sylvilagus bachmani riparius*)

(B) Morro Bay kangaroo rat *(Dipodomys heermanni morroensis)*

(C) Giant kangaroo rat *(Dipodomys ingens)*

(D) Tipton kangaroo rat *(Dipodomys nitritoides nitratoides)*

(E) Fresno kangaroo rat *(Dipodomys nitritoides exilis)*

(F) Salt–marsh harvest mouse *(Reithrodontomys raviventris)*

(G) Amargosa vole *(Microtus californicus scirpensis)*

(H) California bighorn sheep (*Ovis canadensis californiana*)

(b) Threatened:

(1) Gastropods:

(A) Trinity bristle snail *(Monadenia setosa)*

(2) Fishes:

(A) Delta smelt (*Hypomesus transpacificus*)

(B) Cottonball Marsh pupfish *(Cyprinodon salinus milleri)*

(C) Rough sculpin *(Cottus asperrimus)*

(D) Spring–run chinook salmon (*Oncorhynchus tshawytscha*) of the Sacramento River drainage.

(E) Coho salmon (*Oncorhynchus kisutch*) from Punta Gorda (Humboldt County), California to the northern border of California.

(3) Amphibians:

(A) Siskiyou mountain salamander *(Plethodon stormi)*

(B) Kern Canyon slender salamander *(Batrachoseps simatus)*

(C) Tehachapi slender salamander *(Batrachoseps stebbinsi)*

(D) Limestone salamander *(Hydromantes brunus)*

(E) Shasta salamander *(Hydromantes shastae)*

(F) Black toad *(Bufo exsul)*

(4) Reptiles:

(A) Desert tortoise *(Gopherus agassizzi)*

(B) Barefoot banded gecko *(Coleonyx switaki)*

(C) Southern rubber boa *(Charina bottae umbratica)*

(D) Alameda whipsnake *(Masticophis lateralis euryxanthus)*

(E) Giant garter snake *(Thamnophis couchi gigas)*

(5) Birds:

(A) Swainson's hawk *(Buteo swainsoni)*

(B) California black rail *(Laterallus jamaicensis coturniculus)*

(C) Yuma clapper rail *(Rallus longirostris yumanensis)*

(D) Greater sandhill crane *(Grus canadensis tabida)*

(E) Bank swallow *(Riparia riparia)*

(F) Xantus's murrelet (*Synthliboramphus hypoleucus*)

(6) Mammals:

(A) Mohave ground squirrel (*Spermohilus mohavensis*)

(B) San Joaquin antelope squirrel *(Ammospermophilus nelsoni)*

(C) Stephens' kangaroo rat *(Dipodomys stephensi)*

(D) Sierra Nevada red fox *(Vulpes vulpes necator)*

(E) San Joaquin kit fox *(Vulpes macrotis mutica)*

(F) Island fox *(Urocyon littoralis)*

(G) Wolverine *(Gulo gulo)*

(H) Guadalupe fur seal *(Arctocephalus townsendi)*

(I) Peninsular bighorn sheep *(Ovis canadensis cremnobates)*

HISTORY

1. New section filed 5–28–71; effective thirtieth day thereafter (Register 71, No. 22).
2. Amendment of subsections (a)(1), (a)(3) and (b)(3) filed 12–11–73; effective thirtieth day thereafter (Register 73, No. 50).
3. Amendment of subsections (a)(1) and (b)(1) filed 1–23–78; effective thirtieth day thereafter (Register 78, No. 4).
4. Amendment filed 9–2–80; effective thirtieth day thereafter (Register 80, No. 36).
5. Editorial correction of subsection (b) (Register 80, No. 41).
6. Editorial correction of NOTE and HISTORY 4. (Register 80, No. 51).
7. Repealer and new section filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
8. Amendment of subsection (b)(6) filed 3–18–83; effective thirtieth day thereafter (Register 83, No. 12).
9. Amendment filed 5–30–86; effective thirtieth day thereafter (Register 86, No. 22).
10. New subsections (a)(5)(M)–(O) filed 2–16–88; operative 3–17–88 (Register 88, No. 9).
11. Amendment filed 2–26–88; operative 3–27–88 (Register 88, No. 13).
12. Relettering of former subsections (a)(6)(C)–(a)(6)(E) to subsections (a)(6)(D)–(a)(6)(F) and new subsections (a)(6)(C) and (b)(5)(E) filed 5–12–89; operative 6–11–89 (Register 89, No. 20).
13. Amendment of subsection (b)(4) filed 8–3–89; operative 8–3–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 32).
14. New subsection (a)(2)(M) filed 9–22–89; operative 9–22–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 39).
15. Reordering of subsections (a)(5)(K)–(P) and new subsection (a)(5)(Q) filed 12–3–90; operative 1–2–91 (Register 91, No. 3).
16. Editorial correction of printing error in subsections (a)(2)(E) and (a)(5)(O) and (P) (Register 91, No. 31).
17. New subsection (a)(5)(R) filed 3–12–92 as an emergency; operative 4–13–92 (Register 92, No. 12).
18. Adoption of subsection (b)(2)(A) and subsection relettering filed 11–9–93; operative 12–9–93 (Register 93, No. 46).
19. Repealer of subsection (b)(6)(A) and subsection redesignation filed 4–20–94; operative 5–20–94 (Register 94, No. 16).
20. New subsection (a)(6)(A), subsection redesignation and amendment of NOTE filed 4–29–94; operative 5–30–94 (Register 94, No. 17).
21. New subsection (a)(2)(N) filed 12–1–95; operative 12–31–95 (Register 95, No. 48).
22. New subsection (b)(2)(D) filed 1–6–99; operative 2–5–99 (Register 99, No. 2).
23. New subsection (a)(6)(H), repealer of subsection (b)(6)(H) and subsection relettering filed 3–23–99 as an emergency; operative 3–23–99 (Register 99, No. 13). A Certificate of Compliance must be transmitted to OAL by 7–21–99 or emergency language will be repealed by operation of law on the following day.
24. Certificate of Compliance as to 3–23–99 order, including amendment of subsection (a)(6)(H), transmitted to OAL 7–16–99 and filed 8–27–99 (Register 99, No. 35).
25. Change without regulatory effect adding subsection (b)(6)(A) and relettering subsections filed 12–13–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 50).
26. New subsection (b)(5)(F) filed 11–22–2004; operative 12–22–2004 (Register 2004, No. 48).
27. Amendment of subsections (a)(2) and (b)(2) filed 2–28–2005; operative 3–30–2005 (Register 2005, No. 9).
28. Amendment of subsection (a)(2)(E) filed 12–27–2007; operative 1–26–2008 (Register 2007, No. 52).

§ 670.6. Commission Policy on Monitored Species.

It is the policy of the commission that the department shall monitor and report on the impact of ongoing management efforts for and the status of species or subspecies listed herein that were previously considered for candidacy or listing by the commission. The commission may reconsider listing any of these species or subspecies at any time based upon a new petition submitted pursuant to sections 2071 or 2072.7 of the Fish and Game Code. Any petition implemented pursuant to this section will be considered by the commission in accordance with procedures set forth in Article 2, Chapter 1.5, of the Fish and Game Code (California Endangered Species Act).

(a) Monitored Species and Subspecies. Note: There are no species currently listed.

NOTE: Authority cited: Section 703, Fish and Game Code. Reference: Sections 703, 2071 and 2072.7, Fish and Game Code.

HISTORY

1. New section filed 8–29–96; operative 9–28–96 (Register 96, No. 35).
2. Amendment of subsection (a) and repealer of subsection (a)(1) filed 10–4–2000; operative 11–3–2000 (Register 2000, No. 40).

§ 670.7. Permits to Take Fully Protected Animals for Scientific Purposes.

The department may issue revocable permits to take fully protected species for scientific purposes under the following conditions:

(a) Permits may be issued only to members of the faculty or professional staff of a scientific or educational institution; professional wildlife staff of a government agency or private institution; or others who are deemed qualified by the department.

(b) Requests for permits to take fully protected species shall be submitted to the department in writing, and shall include the following information:

(1) Name and address of applicant.

(2) Species and number to be collected.

(3) Scientific background and research experience of principal investigator and assistants.

(4) Description of proposed study, with reference to the literature, including purpose, methods of capture, materials, expected result, and intended disposition of animals collected or handled.

(5) Duration of study; locality and periods of sampling or capture.

(c) Revocable permits issued by the department shall be in the form of a memorandum of understanding. This memorandum shall include the conditions under which taking of animals may be permitted, beginning and termination dates, and requirements for periodic reports to the department, which shall be at least yearly. The memorandum, and any addenda to it, shall be signed by the director of the department and by the applicant or the applicant's executive supervisor.

(d) The department shall notify the commission prior to the issuance of any memorandums and prepare a report annually regarding any memorandums issued pursuant to this section.

(e) Commission approval shall be required prior to the issuance by the department of any memorandum for a fully protected species listed in subsection (f). Such memorandums shall be subject to conditions established by the commission.

(f) Commission approval shall be required for studies involving the take for scientific purposes of the following fully protected species:

(1) California condor (*Gymnogyps californianus*).

(2) Southern sea otter (*Enhydra lutris nereis*).

(3) Bighorn sheep (*Ovis canadensis*).

(g) Permits for the taking of fully protected species that are also declared to be rare or endangered by the commission pursuant to Section 670.5, or federally designated as endangered or threatened by the Secretary of the Interior, shall be subject to conditions of State–Federal Cooperative Agreements relating to these species.

(h) Any permit issued pursuant to these regulations may be cancelled or suspended at any time by the director of the department when, in his judgment, permittee is acting or has acted contrary to the terms and conditions of subject permit, or if, in his judgment, the safety or welfare of the species authorized to be taken by subject permit is or may be jeopardized by the actions of permittee.

NOTE: Authority cited: Section 1002, Fish and Game Code. Reference: Sections 3511, 4700, 5050 and 5515, Fish and Game Code.

HISTORY

1. New section filed 2–18–81; effective thirtieth day thereafter (Register 81, No. 8).

§ 671. Importation, Transportation and Possession of Live Restricted Animals.

(a) It shall be unlawful to import, transport, or possess alive animals restricted in subsection (c) below except under permit issued by the Department of Fish and Game. Permits may be issued by the department as specified herein and for purposes designated in Section 671.1 subject to the conditions and restrictions designated by the department. Except for mammals listed in Fish and Game Code Section 3950 or live aquatic animals requiring a permit pursuant to Fish and Game Code Section 2271, no permit is required by this section for any animal being imported, transported, or possessed pursuant to any other permit issued by the department. Cities and counties may also prohibit possession or require a permit for these and other species not requiring a state permit.

(b) The commission has determined the below listed animals are not normally domesticated in this state. Mammals listed to prevent the depletion of wild populations and to provide for animal welfare are termed "welfare animals", and are designated by the letter "W". Those species listed because they pose a threat to native wildlife, the agriculture interests of the state or to public health or safety are termed "detrimental animals" and are designated by the letter "D". The department shall include the list of welfare and detrimental wild animals as part of DFG MANUAL NO. 671 (2/25/92) IMPORTATION, TRANSPORTATION AND POSSESSION OF RESTRICTED SPECIES, to be made available to all permittees and other interested individuals.

(c) Restricted species include:

(1) Class Aves—Birds

(A) Family Alaudidae—Larks
Alauda arvensis (Skylark) (D).

(B) Family Cuculidae—Cuckoos
All species (D).

(C) Family Corvidae—Crows, Ravens, Rooks, Jackdaws
All species (D).

(D) Family Turdidae—Thrushes, Blackbirds, Fieldfare

1. *Turdus merula* (European blackbird) (D).
2. *Turdus viscivorus* (Missel thrush) (D).
3. *Turdus pilaris* (Fieldfare) (D).
4. *Turdus musicus* (Song thrush) (D).

(E) Family Sturnidae—Starlings, Mynahs
All species (D), except *Sturnus vulgaris* (Starling), *Gracula religiosa* or *Eulabes religiosa* (Hill mynahs), and *Leucopsar rothschildi* (Rothchild's mynah) are not restricted.

(F) Family Ploceidae—Sparrows, Weavers, Queleas

1. Genus *Passer* (Sparrow)
All species (D), except *Passer domesticus* (English house sparrow) is not restricted.
2. *Foudia madagascariensis* (Madagascar weaver) (D).
3. *Ploceus baya* (Baya weaver) (D).
4. *Genus Quelea* (Queleas)—All species (D).

(G) Family Estrildidae—Waxbills, Munias, Ricebirds

1. *Padda oryzivora* (Java sparrow) (D).

(H) Family Emberizidae—Yellowhammer
Emberiza citrinella (Yellowhammer) (D).

(I) Order Falconiformes—Falcons, Eagles, Hawks, Vultures
All species (D)

(J) Order Strigiformes—Owls
All species (D)

(K) Family Pyconotidae—Bulbuls or Fruit Thrushes
Pycnonotus jocosus (Red-whiskered bulbul) (D).

(L) Family Zosteropidae—Whiteeyes
Genus *Zosterops* (Whiteeyes)—All species (D).

(M) Family Psittacidae—Parrots, Parakeets
Myiopsitta monachus (Monk or Quaker parakeet) (D).

(N) Family Anatidae (ducks, geese, and swans)

1. *Cygnus olor* (Mute Swan) (D)

(2) Class Mammalia—Mammals

(A) Order Primates—Monkeys, Apes
All species (W), except Family Hominidae—not restricted.

(B) Order Edendata—Sloths, Anteaters, Armadillos, etc.
All species:

1. Family Dasypodidae—Armadillos—All Species (D).
2. Family Bradypodidae—Sloths—(W).
3. Family Myrmecophagidae—Anteaters—(W).

(C) Order Marsupialia—Marsupials or Pouched Animals
All species (W).

(D) Order Insectivora—Shrews, Moles, Hedgehogs, etc.
All species (D).

(E) Order Dermoptera—Gliding Lemurs
All species (D).

(F) Order Chiroptera—Bats
All species (D).

(G) Order Monotremata—Spiny Anteaters, Platypuses
All Species (W).

(H) Order Pholidota—Pangolins or Scaly Anteaters
All species (W).

(I) Order Lagomorpha—Pikas, Rabbits, and Hares
All species, (D), except domesticated races of rabbits and hares of the Family Leporidae—not restricted.

(J) Order Rodentia—Hamsters, Field Mice, Voles, Muskrats, Gerbils, Squirrels, Chipmunks, Woodchucks, and Prairie Dogs

1. All species (D), except:

a. *Ondatra zibethica* (Muskrats)—Not restricted under conditions set forth in Fish and Game Code Section 2250;

b. Domesticated races of golden hamsters of the species *Mesocricetus auratus* and domesticated races of dwarf hamsters of the Genus *Phodopus* not restricted;

c. Domesticated races of rats or mice (white or albino; trained, dancing or spinning, laboratory–reared) not restricted;

d. Domesticated races of guinea pigs of the species *Cavia porcellus* not restricted; and

e. Domesticated races of chinchillas of the species *Chinchilla laniger* not restricted.

(K) Order Carnivora—Raccoons, Ringtailed Cats, Kinkajous, Coatis, Cacomistles, Weasels, Ferrets, Skunks, Polecats, Stoats, Mongoose, Civets, Wolves, Foxes, Coyotes, Lions, Tigers, Ocelots, Bobcats, Servals, Leopards, Jaguars, Cheetahs, Bears, etc.

1. Family Felidae—All species (W) except:

a. *Acinonyx jubatus* (cheetahs)—(D).

b. Domestic cats and hybrids of domestic cats are not restricted.

2. Family Canidae—All species (W).

a. Wolf hybrids *Canis familiaris* (domestic dog) x *Canis lupus* (wolf).

i. Any F1 (first) generation wolf hybrid whelped on or before February 4, 1988 may be possessed under permit from the department.
ii. No state permit is required to possess the progeny of F1 generation wolf hybrids, but cities and counties may prohibit possession or require a permit.
b. Domesticated dogs are not restricted.
3. Family Viverridae—All species (D).
4. Family Procyonidae—All species—(D), except:
a. *Ailuris fulgens* (Lesser Panda)—(W).
b. *Aiuropoda melanoleuca* (Giant panda)—(W).
c. *Bassariscus astutus* (Ringtail or Ringtailed cat)—(W).
d. *Jentinkia sumichrasti* (Mexican and Central American Cacomistle)—(W).
5. Family Mustelidae—All species (D), except:.
a. *Ambloynx cinerea* (Oriental small-clawed otter)—(W).
b. *Aonyx capensis* (African clawless otter)—(W).
c. *Pteronura brasiliensis* (Giant otter)—(W).
d. All species of Genus *Lutra* (River otters)—(W).
6. All others—(W).
(L) Order Tubulidentata—Aardvarks
All species—(W).
(M) Order Proboscidae—Elephants
All species—(W).
(N) Order Hyracoidae—Hyraxes
All species—(W).
(O) Order Sirenia—Dugongs, Manatees
All species—(W).
(P) Order Perissodactyla—Horses, Zebras, Tapirs, Rhinoceroses, etc.
All species (W), except Family Equidae is not restricted.
(Q) Order Artiodactyla—Swine, Peccaries, Camels, Deer, Elk, Moose, Antelopes, Cattle, Goats, Sheep, etc.
All species (D) except:
1. *Bos taurus* and *Bos indicus* (Domestic cattle); *Bos grunniens* (Yak); *Bubalus bulalis* (Asian water buffalo); *Ovis aries* (Domestic sheep); *Capra hircus* (Domestic goat); *Sus scrofa domestica* (Domestic swine); *Llama glama* (Llama); *Llama pacos* (Alpaca); *Llama guanicoe* (Guanaco); Hybrids of llama, alpaca and guanacos; *Camelus bactrianus* and *Camelus dromedarius* (Camels); and *Bison bison* (American bison), are not restricted.
2. Permits may be issued for species of Elk (Genus *Cervus*) which are already maintained within California; and
3. Permits may be issued pursuant to Section 676, Title 14, CCR, for importing, breeding, slaughter and sale of the meat and other parts of fallow deer (*Dama dama*) for commercial purposes.
(3) Class Amphibia—Frogs, Toads, Salamanders
(A) Family Bufonidae—Toads
Bufo marinus, *Bufo paracnemis*, *Bufo horribilis* (Giant toad or marine toad group) and all other large toads from Mexico and Central and South America-(D).
(B) Family Pipidae—Tongueless Toads
All species of the Genus *Xenopus*-(D).
(C) Family Ambystomatidae-Mole Salamanders
All species of the genus *Ambystoma* (tiger salamanders)-D
(D) Family Leptodactylidae—Neotropical Frogs
Eleutherodactylus coqui—Commom Coqui or Coqui frog (D).
(4) Class Agnatha—Jawless Fishes
(A) Family Petromyzontidae—Lampreys
All nonnative species (D).
(5) Class Osteichthyes—Bony Fishes
(A) Family Percichthyidae—Temperate Basses
1. *Morone americana* (White perch) (D).
2. *Morone chrysops* (White bass) (D).
(B) Family Clupeidae—Herrings
Dorosoma cepedianum (Gizzard shad) (D).
(C) Family Sciaenidae—Drums
Aplodinotus grunniens (freshwater drum) (D).
(D) Family Characidae—Characins
1. *Astyanax fasciatus* (Banded tetra) (D).
2. All species of the genera *Serrasalmus, Serrasalmo, Pygocentrus, Taddyella, Rooseveltiella*, and *Pygopristis* (Piranhas) (D).
3. *Hoplias malabaricus* (Tiger fish) (D).
(E) Family Salmonidae—Trouts
Salmo salar (Atlantic salmon)—Restricted in the Smith River watershed (D).
(F) Family Lepisosteidae—Gars
All species (D).
(G) Family Amiidae—Bowfins
All species (D).
(H) Family Poeciliidae—Livebearers
Belonesox belizanus (Pike killifish) (D).
(I) Family Channidae—Snakeheads
All species (D).
(J) Family Cyprinidae—Carps and Minnows
1. *Leuciscus idus (ide)* (D).
2. *Ctenopharyngodon idellus* (Grass carp) (D), except that permits may be issued to a person, organization or agency for possession of triploid grass carp, under conditions set forth in Section 238.6.
3. *Hypophthalmichthys molitrix* (Silver carp) (D).
4. *Aristichthys nobilis* (Bighead carp) (D).
5. *Hypophthalmichthys harmandi* (Largescale Silver carp) (D).
6. *Mylopharyngodon piceus* (Black carp) (D).
(K) Family Trichomycteridae (*Pygidiidae*)—Parasitic Catfishes.
All species (D).
(L) Family Cetopsidae—Whalelike Catfishes.
All species (D).
(M) Family Clariidae—Labyrinth Catfishes
All species of the genera *Clarias, Dinotopterus*, and *Heterobranchus* (D).
(N) Family Heteropneustidae (Saccobranchidae)—Airsac Catfishes
All species (D).
(O) Family Cichlidae—Cichlids
1. *Tilapia sparrmani* (Banded Tilapia) (D).
2. *Tilapia zilli* (Redbelly tilapia) (D), except permits may be issued to a person or agency for importation, transportation, or possession in the counties of San Bernardino, Los Angeles, Orange, Riverside, San Diego, and Imperial.
3. *Tilapia aurea* (Blue tilapia) (D).
4. *Tilapia nilotica* (Nile tilapia) (D).
(P) Family Anguillidae—Freshwater Eels.
All species of genus *Anguilla* (D).
(Q) Family Esocidae—Pikes all species (D).
(R) Family Percidae—Perches
1. *Perca flavescens* (Yellow perch) (D).
2. *Stizostedion vitreum* (Walleye) (D).
(S) Family Catostomidae—Suckers
All members of the genus *Ictiobus* (Buffalos) (D).
(T) Family Cyprinodontidae-Killifishes
Cyprinodon variegatus (Sheepshead minnow) (D).
(U) Family Latidea—Lates perches
Lates calcarifer (Barramundi also know as Barramundi perch or Silver barramundi) (D).
(6) Class Elasmobranchiomorphi—Cartilaginous Fishes
(A) Family Carcharhinidae—Requiem Sharks
All species of genus *Carcharhinus* (Freshwater sharks) (D).
(B) Family Potamotrygonidae—River stingrays
All species (D).
(7) Class Reptilia—Reptiles
(A) Order Crocodilia—Crocodiles, Caimans, Alligators and Gavials
All species (D).
(B) Family Chelyridae—Snapping Turtles

All species (D).

(C) Family Elapidae—Cobras, Coral Snakes, Mambas, Kraits, etc.
All species (D).

(D) Family Viperidae—Adders and Vipers
All species (D).

(E) Family Crotalidae—Pit Vipers
All species (D), except *Crotalus viridis* (Western rattlesnake), *Crotalus atrox* (Western diamondback rattlesnake), *Crotalus ruber* (red diamondback rattlesnake), *Crotalus scutulatus* (Mojave rattlesnake), *Crotalus mitchelli* (speckled rattlesnake) and *Crotalus cerastes* (Sidewinder) not restricted.

(F) Family Colubridae—Colubrids

1. *Dispholidus typus* (Boomslang) (D).
2. *Theoltornis kitlandii* (Bird or vine snake) (D).
3. All species of genus *Nerodia* (watersnakes) (D).

(G) Family Helodermatidae

1. *Heloderma suspectum suspectum* (reticulate Gila monster) (D).

(8) Class Crustacea—Crustaceans

(A) All species of Family Cambaridae—Crayfish, etc. (D), except *Procambarus clarkii* and *Orconectes virilis* not restricted.

(B) All species of genus *Eriocheir* (D).

(9) Class Gastropoda—Slugs, Snails

(A) *Potamopyrgus antipodarum* (New Zealand mudsnail)

(B) All nonnative species of slugs and land snails (D), except:

1. *Rumina decollata* (decollate snail) in the counties of San Bernardino, Riverside, Imperial, Orange, San Diego, Los Angeles, Ventura, Kern, Fresno, Madera, Tulare and Santa Barbara not restricted with the concurrence of the appropriate county agricultural commissioners.
2. *Helix aspersa* (brown garden snail) not prohibited.

(C) *Pomacea canaliculata* (Channel Apple Snail) (D).

(D) All species of genus *Haliotis* (Abalone) (D), except *Haliotis rufescens* (Red abalone), *Haliotis sorenseni* (White abalone), *Haliotis corrugate* (Pink abalone), *Haliotis fulgens* (Green abalone), *Haliotis cracherodii* (Black abalone), *Haliotis kamtschatkana* (Pinto abalone), *Haliotis walallensis* (Flat abalone) and *Haliotis assimilis* (Threaded abalone) are not restricted.

1. NOTE: Unpermitted nonnative abalone are determined to be detrimental to native populations, therefore the exemptions provided in Fish and Game Code subsection 2271(b) and subsection 236(b), Title 14, CCR, are not applicable.

(10) Class Bivalvia–Bivalves

All members of the genus *Dreissena* (zebra mussels)—(D).

(11) Transgenic Aquatic Animals.

Includes freshwater and marine fishes, invertebrates, crustaceans, mollusks, amphibians, and reptiles (D).

NOTE: Unpermitted transgenic aquatic animals are determined to be detrimental to native wildlife, therefore the exemption provided for in Fish and Game Code Section 2150(e) is not applicable.

NOTE: Authority cited: Sections 2118 and 2120, Fish and Game Code. Reference: Sections 1002, 2116, 2118, 2118.2, 2118.4, 2119, 2120, 2122, 2123, 2124, 2125, 2126, 2127, 2150, 2190, 2271, 3005.9 and 3005.92, Fish and Game Code.

HISTORY

1. Amendment of subsection (g)(5) filed 2–9–84; effective thirtieth day thereafter (Register 84, No. 6). For prior history, see Register 81, No. 29.
2. Amendment of subsection (i) filed 7–8–85; effective thirtieth day thereafter (Register 85, No. 28).
3. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
4. Notice of Erroneous Filing filed 3–24–86 by OAL; purported amendment of subsection (g)(5) filed in error on 2–5–86 is null and void and text as filed with Secretary of State on 2–9–84 remains in effect uninterrupted (Register 86, No. 13).
5. Amendment of subsection (g)(5) filed 3–24–86; effective thirtieth day thereafter (Register 86, No. 13).
6. Amendment of subsection (h) filed 11–7–86; effective upon filing (Register 86, No. 45).
7. Amendment of subsection (g)(1) filed 5–1–87; operative 5–31–87 (Register 87, No. 19).
8. New subsection (e)(15) filed 2–16–88; operative 3–17–88 (Register 88, No. 9).
9. Amendment of subsection (b) filed 9–8–88; operative 10–8–88 (Register 88, No. 38).
10. Amendment filed 2–26–92; operative 2–26–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 13).
11. Amendment filed 7–21–93; operative 7–21–93 pursuant to section 202, Fish and Game Code (Register 93, No. 30).
12. Amendment of subsection (c)(9)(A) filed 2–28–94; operative 3–30–94 (Register 94, No. 9).
13. New subsection (c)(10) filed 3–7–94; operative 4–6–94 (Register 94, No. 10).
14. Amendment of subsection (c)(1)(I)2 filed 8–23–94; operative 9–22–94 (Register 94, No. 34).
15. Editorial correction of designation of subsection (c)(5)(G) (Register 94, No. 34).
16. Amendment of subsections (c)(2)(Q)2–3 filed 12–7–94; operative 12–7–94 pursuant to Government Code section 11346.2(d) (Register 94, No. 49).
17. Change without regulatory effect amending subsection (c)(1)(C) filed 9–28–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 39).
18. Amendment of subsection (c)(5)(J)2. filed 5–5–97; operative 6–4–97 (Register 97, No. 19).
19. Amendment of section heading and section filed 8–27–98; operative 9–26–98 (Register 98, No. 35).
20. New subsection (c)(3)(C) filed 2–27–2001; operative 2–27–2001 pursuant to Government Code section 11343.4 (Register 2001, No. 9).
21. New subsection (c)(11) and amendment of NOTE filed 4–14–2003; operative 5–14–2003 (Register 2003, No. 16).
22. New subsection (c)(9)(A), redesignation of portion of section (c)(9) as new subsection (c)(9)(B) and redesignation of former subsections (c)(9)(A)–(B) as (c)(9)(B)1.–2. filed 9–1–2004; operative 10–1–2004 (Register 2004, No. 36).
23. Amendment of subsection (c)(1)(I), new subsections (c)(1)(N) and (c)(3)(D), amendment of subsections (c)(5)(A) and (c)(5)(J), new subsection (c)(5)(U), amendment of subsection (c)(7)(F), new subsections (c)(9)(C)–(D) and amendment of NOTE filed 3–13–2008; operative 4–12–2008 (Register 2008, No. 11).

§ 671.1. Permits for Restricted Species.

(a) General. It is unlawful for any person to import, export, transport, maintain, dispose of, or use for any purpose any animal restricted by Section 671 except as authorized in a permit issued by the department.

(1) Limited Scope. A permit issued pursuant to this Section 671.1 does not supersede any Federal, State, or local law regulating or prohibiting the animals or the activities authorized in the permit.

(2) Inspections. The department may approve an application prior to facilities being inspected and approved. A permit shall not be issued unless the applicant's facilities have been inspected and approved by the department or persons designated by the department.

The department may enter any facility at a reasonable hour, where restricted species are kept or may be kept to inspect animals, facilities, animal equipment, or to inspect, audit, or copy any permit, book or record required to be kept by these regulations or federal regulations relating to such species.

(3) Change of Address or Name. The permittee must notify the Department's License and Revenue Division, 3211 S Street, Sacramento, California 95816, in writing of any change of address or name related to the permit within fourteen (14) days of the change.

(4) Records. Any record, log, invoice, or other document required by this Section 671.1 shall be maintained by the permittee for at least three years from the date issued, and be made available to the department immediately upon demand.

(5) Transportation Records Required of Broker/Dealer. The permittee shall prepare and sign an invoice in duplicate prior to any animals leaving their facility. The invoice shall contain the name and address of the Broker/Dealer, a phone number where the Broker/Dealer and the consignee can be reached 24 hours, the name and address of the consignee, the date of the shipment, and the number and scientific name of each animal. The invoice shall accompany the animals being shipped. The consignee shall sign and date the invoice receipt of the shipment and retain a copy.

(6) Permits for Business. A person (as defined in Fish and Game Code Section 67) other than a natural person can qualify for and be issued a permit, only by employing at least one full time employee who possesses the requirements for obtaining a permit. The permittee must continue to employ such qualified persons as long as the animals are possessed in California.

(7) Financial Responsibility. The department may require an applicant for a nonresident permit to provide proof he/she will immediately cover all expenses incurred by the department for personnel, equipment, and

facilities used to locate, capture, house, care for, and transport animals that escape or that are released or abandoned. The written proof must be in the form of an insurance bond or other financial guarantee payable to the department, local government agency, or entity contracting for the animals.

(8) Health Certificates. The department may require as a condition on any permit that restricted animals be approved for interstate shipment pursuant to applicable federal or state agency standards for diseases such as but not limited to tuberculosis, brucellosis, and pseudo rabies. Permit conditions may be more restrictive than federal standards.

(9) Transgenic Aquatic Animals. The department may issue permits for importation, possession, transportation or rearing of, or research on, transgenic aquatic animals pursuant to the following terms and conditions:

(A) All transgenic aquatic animals shall be held, raised, and transported in a closed–water system or in a system which treats effluent discharge from the facility with a disinfection system adequate to ensure against the inadvertent release of live animals. A closed–water system means that there is no discharge to waters of the state. Municipal treated sewage systems are not considered waters of the state. The Commission may grant an exception to subsection (a)(9)(A) of this regulation if it is determined that doing so shall not pose a significant risk to the waters or wildlife of the state.

(B) Access to facilities containing transgenic aquatic animals must be restricted through means determined to be adequate by the Department to assure against unauthorized removal of animals.

(C) Movement of live transgenic aquatic animals from facilities is prohibited unless specifically permitted by the Department.

(D) Release of transgenic aquatic animals or their progeny into waters of the state is prohibited.

(E) If transgenic aquatic animals are held with non–transgenic animals of the same species, all such animals that commingle with transgenic animals shall be treated as transgenic for the purposes of regulation and may not be introduced into waters of the state. Nontransgenic individuals that can be individually identified as nontransgenic may be exempt from this provision with prior department approval.

(F) In addition to any other penalty provided by law, any unauthorized release of transgenic aquatic animals or their progeny into the waters of the state may be subject to the penalties provided for under Fish and Game Code Sections 2125, 12007, and/or 12023.

(G) A university, college, governmental research agency or other bona fide scientific institution, as determined by the department, may apply for an expedited permit review under 671.1(b)(6) of this section by demonstrating that they meet or exceed the requirements stipulated in subsections (A) through (F) as part of a federal program or permit, for example, National Institute of Health guidelines administered by an Institutional Animal Care and Use Committee (IACUC). Such institutions shall have 120 calendar days from May 14, 2003 to submit supporting documentation for an initial permit.

(H) The Department shall provide written notice of the filing of all permit applications to any interested party who submits a written request for such notice. The Department shall consider all written comments regarding a permit application that are received from any interested party prior to approval of that application. All approved applications shall be reviewed by the Fish and Game Commission during a regularly scheduled public meeting; and the Commission, following public comment, may deny the issuance of a permit if it finds that an applicant is or will be unable to meet all regulatory requirements for importation, transportation, possession, and confinement of transgenic aquatic animals.

(I) The regulations under subsection 671.1(a)(9) shall be reviewed by the Department and other interested parties no later than one year after their effective date of May 14, 2003. A summary of the review shall be reported to the Commission at a regularly scheduled meeting within 90 days of May 14, 2004.

(b) Permits and Fees. The following fees will be adjusted annually pursuant to Section 699, Title 14, CCR. The department may issue permits with the conditions it determines are necessary to protect native wildlife, agriculture interests, animal welfare, and/or human health and safety to:

(1) Animal Care. A person who is a resident and who has the demonstrated experience and ability to house an animal, and who legally possessed the animal in California prior to January 1992. The permittee may only possess and provide care for the animal(s) specifically listed on their department approved permit inventory. No other activity is authorized except that which is medically necessary for the care of the animal. The base permit fees for this activity in 1998 are $34.75 for Welfare species and $289.50 for Detrimental species.

(2) Exhibiting. A person who is a resident or nonresident who is in the business of exhibiting animals and who possesses the qualifications listed in 671.1(c)(1) to import, transport, and possess only those species listed on the department approved permit inventory for commercial exhibition purposes. The base permit fee for this activity in 1998 is $289.50 for residents and $579.00 for nonresidents.

(3) Single Event Breeding for Exhibitor. A person who is a resident and permitted pursuant to Section 671.1(b)(2) to conduct a one time, single breeding of an animal which is listed on the department approved permit inventory. The permit may be renewed annually, but only upon written verification by a veterinarian accredited by the U.S. Department of Agriculture (USDA) that the breeding authorized by the former permit was not successful. The base permit fee for this activity in 1998 is $34.75.

(4) Breeding. A person who is a resident and who possesses the qualifications listed in Section 671.1(c)(1) to import, transport, and possess only those species listed on the department approved permit inventory for breeding, but only if the department determines the breeding will not result in unneeded or uncared for animals or the species is threatened or endangered. The base permit fee for this activity in 1998 is $289.50.

(5) AZA. A person accredited by the American Association of Zoos and Aquariums (AZA) to import, transport, and possess only those species listed on the department approved permit inventory for breeding, exhibition, or for bona fide scientific or public health research. The base permit fee for this activity in 1998 is $289.50.

(6) Research. A university, college, governmental research agency, or other bona fide scientific institution, as determined by the department, engaging in scientific or public health research to import, transport, and possess only those species listed on the department approved permit inventory for breeding, or for bona fide scientific or public health research. The base permit fee for this activity in 1998 is $289.50.

(7) Broker/Dealer. A person who is a resident or nonresident to act as a broker or dealer in a transaction involving the buying and/or selling of restricted species, or who is the business of transporting restricted species within the state between permittees. The base permit fee for this activity in 1998 is $289.50 for residents and $579.00 for nonresidents.

(A) Special Restrictions.

(1) Minimum Caging Period. Animals may be kept in transport caging for a period not to exceed 48 hours. An additional 48 hours may be approved by an enforcing officer or a veterinarian accredited by the USDA.

(2) Nonresident Restriction. The nonresident dealer shall only transport animals between permittees authorized by this Section or between AZA accredited institutions and permittees or ship them out of state in compliance with Federal guidelines.

(8) Shelter. A person who is a resident, who possesses the qualifications listed in Section 671.1(c)(1), and who has a statement in writing signed by the department's regional manager verifying the need for a shelter or similar facility in the area, to transport and possess restricted species for humane purposes only. The base permit fee for this activity in 1998 is $34.75. The permit fee may be waived upon recommendation of the regional manager when he/she determines it is in the best interest of the public, the animal, or the department to do so.

(A) Special Authorizations.

(1) A permittee may exhibit animals at its facility for fund–raising purposes.

Register 2008, No. 11; 3–14–2008

(2) The department may authorize a permittee to import restricted species upon receipt of written verification that appropriate facilities outside of California were contacted and no housing was available, and that these specific animals would be euthanized if they cannot be imported into California.

(NOTE: Deer Farming Permits. See Section 676.)

(c) Qualifications, Application Fees, and Permit Information.

(1) Qualifications. Applicants shall be at least 18 years of age and possess at least two years, full–time, paid or volunteer, hands–on experience caring for restricted species at a facility(ies) engaged in a similar or directly related activity to the permit requested. Applicants shall have at least one year full–time hands–on professional experience working with prohibited species in the same family or closely related taxonomic family as each species being requested. Experience will be considered only for the periods the applicant was directly involved in and responsible for the animals while engaged in the activity requested on the permit. Applicants must be residents of California, except permits for an exhibiting permit or a broker/dealer permit may be issued to nonresidents.

Persons or facilities accredited by the American Association of Zoological Parks and Aquariums (AZA), universities, colleges, governmental research agencies or other bona fide scientific institutions, as determined by the department, engaging in scientific or public health research are exempt from meeting these qualifications.

(2) Application. Completed applications and all fees shall be submitted to the Department of Fish and Game, License and Revenue Branch, Sacramento (see Section 671.1(a)(3) above for address) for each permit, permit amendment, or renewal. Application fees are nonrefundable and are in addition to permit fees.

The following information and documents shall accompany an application for each permit, amendment, or renewal:

(A) An inventory of each animal requested including the common and scientific name, sex, and age of each animal;

(B) Written certification from a veterinarian accredited by the USDA, that he/she has observed each of the permittee's animals at least twice during the prior year, that the animals have been appropriately immunized and are being housed and cared for as required by law. The certification must be signed by the veterinarian and must include the veterinari–

[The next page is 184.2(c).]

an's printed name, address and license number. In the case of animals to be acquired by the permittee, the certification shall include the future dates the animals will be inspected by the veterinarian;

(C) A resume which provides the dates and description of the applicant's experience. The resume is required only when applying for the original permit or when applying to add new species to the inventory.

(D) A copy of current license or registration document required by the United States Department of Agriculture (USDA) and a copy of the most recent USDA facility inspection form completed for the facility.

(E) A letter of recommendation on letterhead stationary signed in ink by the owner or operator of a facility where the applicant gained his/her experience. The letter must provide the printed name of the owner or operator and detailed information regarding the quality and extent of the applicant's knowledge and experience related to the permit requested.

(F) Applicants for a breeding permit shall include a statement describing why the progeny are necessary. The statement must be in writing on letterhead stationary from a university, research facility, exhibitor, breeder, zoological garden or other authorized recipient. The statement must contain the printed name and be signed in ink by an official representative of the organization providing the statement. The statement is required only with the original application and when applying to add new species to the breeding inventory.

(3) Term of Permit. Permits issued under the provisions of this Section 671.1 shall be valid for a term of one year from the date of issue.

(4) Denial. The department may deny the issuance of a permit if the conditions of Section 671.1(b) are not met, or the failure to comply with terms and conditions of a permit or the provisions of sections 671–671.6. Any person denied a permit under these regulations may request a hearing before the commission to show cause why their permit request should not be denied.

(5) Revocation. Any permit issued pursuant to these regulations may be canceled or suspended at any time by the commission for failure to comply with the terms and conditions of the permit or for failure to comply with sections 671–671.6, after notice and opportunity to be heard, or without a hearing upon conviction of a violation of these regulations by a court of competent jurisdiction.

(6) Fees. The following fees will be adjusted annually pursuant to Section 699, Title 14, CCR.

(A) Application. A nonrefundable application fee for new permit, amending or renewing existing permit: $30.

(B) Inspection. The applicant shall pay $100.00 for two inspections each year. If an inspection requires more than two hours, or additional inspections are required to verify corrections of facilities or for compliance with these regulations an additional $25.00 per hour shall be charged. The inspection fee shall be waived if a person submits an annual statement from a veterinarian accredited by the USDA certifying that the animals have been inspected at least twice during the year, at six month intervals, and that the animals are being cared for and housed in accordance with applicable requirements in sections 671.2 through 671.4, Title 14, CCR. In the case of animals to be acquired, the inspection fee shall be waived if a veterinarian accredited by the USDA will certify that the facilities meet the minimum requirements of Section 671.2, Title 14, CCR, and that the animals will be inspected at least twice during the next year as required.

HISTORY

1. Amendment filed 5–6–75 as an emergency; effective upon filing (Register 75, No. 18). For prior history, see Register 75, No. 4.
2. Certificate of Compliance filed 7–3–75 (Register 75, No. 27).
3. Amendment of subsection (a) filed 5–11–79; effective thirtieth day thereafter (Register 79, No. 19).
4. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
5. Order of Repeal of subsection (b) filed 6–3–85 by OAL pursuant to Government Code section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).
6. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
7. Repealer and new section filed 2–26–92; operative 2–26–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 13).
8. Amendment of subsection (b)(5)(A)2b and new subsections (b)(9) and (c)(6)(A)9 filed 12–7–94; operative 12–7–94 pursuant to Government Code section 11346.2(d) (Register 94, No. 49).
9. Repealer and new section filed 8–27–98; operative 9–26–98 (Register 98, No. 35).
10. New subsections (a)(9)–(a)(9)(G) and amendment of NOTE filed 4–14–2003; operative 5–14–2003 (Register 2003, No. 16).
11. Amendment of subsection (a)(9)(G) and new subsections (a)(9)(H)–(I) filed 8–28–2003; operative 9–27–2003 (Register 2003, No. 35).

§ 671.2. Humane Care and Treatment Standards.

(a) Care and Treatment. Except as provided by subsection (c) below, every person who imports, transports, or possesses a restricted species shall comply with the following provisions:

(1) Food. Food shall be wholesome, palatable and free from contamination and shall be supplied in sufficient quantity and nutritive value to maintain the animal in good health. The diet shall be prepared with consideration for the age, species, condition, and size of each animal.

(2) Feeding. Animals not in hibernation shall be fed at least once a day. Food receptacles shall be clean and sanitary. Food shall be accessible to all animals in the enclosure and placed to prevent contamination. If self–feeders are used, adequate measures shall be taken to prevent mold, contamination, deterioration or caking of food.

(3) Water. Potable water must be accessible to the animals at all times or provided as often as necessary for the health and comfort of the animal as directed by a licensed veterinarian. All water receptacles shall be clean and sanitary.

(4) Cleaning of enclosures. Excrement shall be removed from enclosures at least once per day or in the case of large pasture areas, large flight cages, breeding chambers or large natural habitat enclosures, as often as necessary to maintain animals in a healthy condition. When enclosures are cleaned by hosing or flushing, adequate measures shall be taken to protect confined animals from the direct spray.

(5) Disinfection of enclosures. After an animal with an infectious or transmissible disease is removed from a cage, room, or pen/run, that enclosure shall be disinfected in compliance with the directions of a licensed veterinarian.

(6) Pest control. Programs of disease prevention and parasite control, euthanasia and adequate veterinary care shall be established and maintained under the supervision of a licensed veterinarian. The pest control program shall be reviewed annually by the veterinarian for the safe use of materials and methods.

(7) Daily observation. Animals shall be observed every day by the person in charge of the care of the animals or by someone working under his or her direct supervision. Sick or diseased, stressed, injured, or lame animals shall be provided with veterinary care or humanely destroyed.

(8) Handling. Animals shall be handled expeditiously and carefully so as not to cause unnecessary discomfort, behavioral stress, or physical harm to the animal. Except as provided below, an animal may be placed on a chain and collar only when being transported by an attendant between areas on a permittee's premises or between a mode of conveyance and a worksite or veterinarian's office, or when the handler is working or exercising the animal(s) within the compound. Care shall be exercised to avoid harm to the handler or the general public. Animals shall be kept under control at all times and shall not be allowed to roam free outside of a compound, except when under the control of the handler during filming or exhibition.

Exceptions: Elephants chained pursuant to subsection 671.3(b)(2)(M)4. (see Department of Fish and Game Manual No. 671–2/25/92). Raptors may be jessed and tethered.

(9) Chaining/staking. Animal(s) shall not be chained or otherwise tethered to a stake, post, tree, building or other anchorage, except during filming, training or exhibition, in an emergency situation or when repairs are being made to the cage. The animal(s) shall be under the direct supervision of the handler or his designee at all times.

Exceptions: Elephants chained pursuant to subsection 671.3(b)(2)(M)4. (see Department of Fish and Game Manual No. 671–2/25/92). Raptors may be jessed and tethered.

(10) Public display. Animals shall be publicly displayed only for periods of time and under conditions consistent with the animal's health and comfort. The animal must be handled so there is no perceived risk to the public in the judgement of the department's enforcement officer, with sufficient distance allowed between animal acts and the viewing public to assure safety to both the public and the animals. Animals on display shall be contained within an escape–proof area or enclosure at all times when not under the immediate control of a handler. Circus or traveling show animals shall be allowed a rest period of at least 4 hours per day within an enclosure as directed by a licensed veterinarian.

(b) Log Requirement. Permittees shall maintain a written log in the English language for each animal in their possession which documents each animal's health care. The log shall contain the following information: date of acquisition, name and address of person from whom the animal was acquired, identifying marks or characteristics, date and description of illness and/or injury, health care treatment provided, name and signature of the person treating the animal, if applicable. This log shall be made available to department officers or its authorized agent on demand.

(c) Alternative Care and Treatment Authorized by Veterinarian. When specifically directed in writing by a licensed veterinarian, a person may provide alternative care and treatment. The veterinarian's written instructions for long–term care of the animals held under the permit shall be presented to the inspector at the time of inspection. The implementation of any short–term exceptions to the veterinarian's long–term instructions or to the provisions of subsections 671.2(a)(1) through (10) above shall be verified in writing in the animal's log by the permittee within 10 working days from the date of the action. Such exception shall not exceed two weeks without written concurrence from a licensed veterinarian.

NOTE: Authority cited: Section 2120, Fish and Game Code. Reference: Sections 2116.5, 2118 and 2120, Fish and Game Code.

HISTORY

1. Amendment filed 6–30–66; effective thirtieth day thereafter (Register 66, No. 20).
2. Amendment filed 1–24–75 as an emergency; effective upon filing. Certificate of Compliance included (Register 75, No. 4).
3. New NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
5. Repealer filed 7–15–87; operative 8–14–87 (Register 87, No. 29).
6. New section filed 2–26–92; operative 2–26–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 13).
7. Amendment of section heading and subsections (a), (a)(4), (a)(8), (a)(9) and (b) filed 8–27–98; operative 9–26–98 (Register 98, No. 35).

§ 671.3. Minimum Facility and Caging Standards for Wild Animals Housed at Permanent Facilities.

(a) General Housing Requirements and Specifications.

(1) All cages or enclosures shall be completely enclosed unless otherwise specified.

(2) Compatible animals may be held in the same enclosure if the required floor space is provided.

(3) Common walls between noncompatible animals shall be constructed so that animals cannot gain access to each other.

(4) If the ambient air temperature falls below that necessary to maintain the animal in a healthy condition, an artificial heat source that is sufficient to maintain that minimum ambient air temperature shall be provided.

[The next page is 184.3.]

(5) If a pool of water is required, the floor space occupied by the pool shall be in addition to the minimum floor space requirement unless otherwise specified.

(6) Night quarters, holding pens and nesting boxes may not be used as primary housing.

(7) Except as provided in subsection (b) below, all animals listed shall be housed in facilities that have double doors or, if individual cages do not have double doors, then a perimeter fence shall enclose the entire facility to prevent escape.

(8) All enclosures shall be provided with sufficient drainage to prevent standing water from accumulating.

(9) Wherever a concrete floor is specified, either wood plank flooring or natural substrate may be used to cover the concrete floor.

(10) The following are minimum pen, cage or enclosure size requirements:

MINIMUM PEN, CAGE OR ENCLOSURE SIZE REQUIREMENTS

Type of Animal	*Floor Space (Sq. Feet) One Animal*	*Two Animals*	*Each Additional Animal*	*Interior Ceiling or Outside Fence Height (Feet)*
CLASS AVES—Birds				
Ploceidae, Estrildidae, Zosteropidae	4	4	+3/animal	2 Ceiling
More than 2 birds requires a cage height of 6 feet.				
Alaudidae, Cuculidae, Turdidae, Sturnidae	6	6	+4/animal	4 "
More than 2 birds requires a cage height of 6 feet.

(b) Specific Housing Requirements. Permittees shall comply with the following provisions except that material or construction may be substituted upon approval of the inspecting officer if the permittee produces written certification from a licensed civil or structural engineer that the material and/or construction is of equivalent strength.

(1) Class Aves—Birds

All birds, except indigenous birds and birds in the Orders Falconiformes and Strigiformes, listed in Section 671 shall be housed in cages having double doors so constructed that the exterior door must be closed before the interior door can be opened. Each door or gate shall be secured by a lock. Perches shall be large enough in diameter so that the bird's claws do not meet the toe or pad on the underside of the perch.

(A) Orders Falconiformes and Strigiformes. Noncompatible raptors shall be housed separately unless tethered. Birds of these orders held pursuant to a falconry license shall be maintained in accordance with Section 670, Title 14, CCR. Tethered raptors shall be provided with a perch designed for individual species of raptors. Tethered raptors shall be protected from predators and shall be provided with water for drinking and bathing. Tethers shall be constructed to allow the bird freedom of normal movement without becoming tangled; such tethers shall be of equal length (one on each leg). Raptors shall not be tethered continuously unless they are being flown on a daily basis or they are incapable of flying.

(2) Class Mammalia

(A) Order Primates

1. A shelter or a den box shall be provided. All primates shall be provided with natural or artificial sunlight.

2. Nocturnal primates shall be provided with privacy during their daytime hours.

3. Nest boxes shall be provided for species that use them (e.g., tamarins, marmosets, owl monkeys). Raised perches and roost sites shall be provided for arboreal or semi-arboreal species.

4. For brachiating species (gibbons and spider monkeys), sufficient vertical space must be provided for this activity which means perches shall be above the floor at a height that is at least equivalent to twice the length of an adult. The ceiling shall be high enough to allow room for the animal to stand erect on its perch with arms extended overhead.

5. Primates shall be provided with objects or exercise systems appropriate to the age and species to promote physical and psychological well-being. These may include sturdy ropes, bars, branches, and chains and rings.

6. New World Monkeys such as squirrel, titis, and owl, medium and large South American monkeys, such as spiders, woollys, howlers, capuchins, and sakis held prior to August 3, 1989 may be kept in the currently approved housing so that the prior social structure and environment of those animals may be maintained. All other housing requirements shall pertain to these animals.

7. Apes:

a. Gorilla, Orangutan and Chimpanzee

(i) The walls and top of the cage shall be constructed of either 6-inch reinforced concrete; or 8-inch reinforced concrete block; or 5/8-inch diameter steel bars spaced on not greater than 4-inch centers and welded to horizontal angle iron bars 1-1/4 inches x 1/4-inch thick which are spaced no greater than 3 feet apart; or 6-gauge chain link or welded wire attached to 1-5/8-inch schedule 40 steel pipe spaced on 5-foot centers with vertical bracing of 1-5/8-inch schedule 40 steel pipe spaced on 4-foot centers. The horizontal angle iron bars shall be welded to the corner posts. The bottom horizontal bar shall be no more than 3 inches above a concrete floor or footing. Welded wire shall be welded to the framework every foot. Chain link fencing shall be secured along all edges to the framework using tension bars which shall be bolted, not welded, to the framework at 12 inch intervals. All bolt attachments shall be further secured by spot welding. Walls shall be secured to a concrete footing deep enough below grade to preclude escape by digging. The framework for the walls and top of the cage shall be made of 1-5/8 inch outside diameter structural weight galvanized steel pipe or equivalent. Vertical support shall be set 2-1/2 feet in concrete.

(ii) Corner posts shall be either one 2-3/8 inch steel pipe or two 1-5/8 inch schedule 40 steel pipes bolted together with 3/8 inch steel bolts or equivalent.

b. Gibbon

(i) Construction shall be 9 gauge chain link or welded wire or equivalent.

8. Old World Monkeys

a. Baboon, mandrill, macaque, quenon, mangabey, langur, etc.

(i) 9 gauge wire or concrete construction.

9. New World Monkeys

a. Marmoset, squirrel, titis, owl and other similar-sized Monkeys.

(i) Cage mesh no greater than 1" x 2".

b. Spider, woolly, howler, capuchin, saki, other medium and large sized South American monkeys, etc.

(i) 11 gauge wire or concrete construction.

(B) Order Edentata—Sloth, Anteater, Armadillo, etc.

1. The floor of the pen shall be at least 50% natural substrate. The walls of the pen shall be secured to a concrete footing or, if they are constructed of 11 gauge non-rusting chain link or welded wire, they shall be buried in the dirt deep enough to prevent escape by digging.

2. The pens for sloths may have a concrete floor and shall have limbs for climbing. One limb shall provide them an opportunity to get to a heat source.

(C) Order Marsupialia—Marsupial or Pouched Animal

1. The floor of the cage shall either be constructed of wood, or it shall be natural substrate. The surface of the paddock shall be natural substrate. Walls of the cage shall be secured to buried concrete or, if walls are constructed of 11 gauge non-rusting chain link or welded wire, they shall be buried in the dirt deep enough to prevent escape by digging.

2. Tree kangaroos and other arboreal marsupials shall be provided with limbs for perching, climbing and resting, a raised nest box or similar structure for seclusion and a heat source.

3. Kangaroos and wallabies shall be provided with a refuge area.

(D) Order Insectivora—Shrew, Mole, Hedgehog, etc.

1. The bottom of the cage shall be dirt, wood shavings or similar material over an escape–proof flooring.

2. A hide box or other refuge and protection from strong light are required.

(E) Order Dermoptera—Gliding Lemur

1. Limbs for perching and climbing and a rectangular cage are required.

(F) Order Chiroptera—Bat

1. Perching or other material shall be provided for the animal to suspend itself.

2 Protection from strong light shall be provided.

(G) Order Monotremata—Spiny Anteater, Platypus.

1. The floor of the cage shall be natural substrate. The walls of the cage shall be constructed of 11 gauge non–rusting chain link or welded wire, secured to buried concrete, or they shall be buried at least one foot below the surface.

2. Nest boxes with dry bedding or a natural burrow shall be provided for spiny anteaters. A heat source shall be provided.

3. A pool measuring at least 4 times the length of the animal(s) by 1–1/2 times the width of the animal by 2–feet deep shall be provided for platypuses for swimming and feeding. Each adult shall be provided with a dry land area equal to the surface area of the pool.

4. Platypuses require at least a 6–foot long, tunnel–like entrance to the nest box where water from the pool can be shed.

5. Platypuses shall be kept singly with young or paired only when breeding.

(H) Order Pholidota—Pangolin, Scaly Anteater

1. The floor of the cage shall be natural substrate or 4 inch concrete covered with permeable soil. The walls of the cage shall be constructed of 11 gauge non–rusting chain link or welded wire, secured to buried concrete, or they shall be buried at least one foot below the surface.

(I) Order Lagomorpha—Rabbit and Hare

All require tooth–resistant restraining materials and bone, wood or fibrous food to gnaw on.

1. The floor of a pen shall be constructed of concrete at least 2 inches thick or of 16 gauge non–rusting chain link or welded wire. Dirt or wood may be placed over the flooring.

(J) Order Rodentia—Muskrats, Porcupine, Squirrel, Beaver, Prairie Dog

All require tooth–resistant restraining materials and bone, wood or fibrous food to gnaw on.

1. Porcupine

a. New World porcupines require climbing perches.

b. A box shelter for seclusion is required.

2. Squirrel and Chipmunk

a. Arboreal forms require climbing perches.

b. Nest boxes are required for each animal.

c. The cage shall be completely enclosed with a welded wire and have a concrete floor.

d. The floor shall be covered with natural substrate, wood shavings or similar material.

3. Muskrat and Beaver

a. A pool of fresh water with easy entry and exit shall be provided. Half of the required floor space shall be a pool of water 2–1/2 feet deep.

b. A nest box or retreat shall be provided for each animal.

c. The walls of the cages for beaver shall be constructed of 9 gauge chain link or welded wire or equivalent construction; 11 gauge for muskrats.

d. The floor of the cages shall be constructed of 4–inch concrete or non–rusting 9 gauge chain link or welded steel wire. Such floors are not required if the side walls are anchored to equivalent materials which have been buried deep enough underground to prevent the animal's escape by digging.

e. Not more than 2 compatible adults of the same species and their offspring of the year may be held in the same enclosure.

4. Prairie Dog

a. The floor of a pen shall be constructed of 4–inch concrete, or 16 gauge, non–rusting woven wire or similar non–rusting material with mesh 1–inch in diameter. At least 1/4–inch diameter reinforcement rods shall be used along the outer edge of a concrete floor to help support concrete or concrete block walls. To facilitate drainage, 6–inch floor drains shall be installed in a concrete floor at the rate of one per 16 square feet. Floor drains shall be covered with 9 gauge non–rusting woven wire or similar material to prevent animals from escaping. Floor drains are not required when wire is used for entire floor. The floor shall be a minimum of 3 feet below ground level and covered with permeable soil or other mixture to ensure adequate drainage.

b. The walls of the pen below ground level shall be anchored to the floor and shall be of 4 inch concrete or concrete blocks or 9 gauge non–rusting woven wire or similar material with 1–inch mesh attached to the framework of steel or cedar posts. Above ground level the wall shall be of 18 gauge fur–farm netting with 1–inch mesh, 4–inch concrete or concrete blocks or similar material. The top shall be covered or the walls shall be at least 3–1/2 feet high and provide a non–climbable escape–proof barrier.

5. Acushi, Agouti, Paca and Capybara

a. Gnawing logs shall be provided.

b. A pool shall be provided for capybara.

c. Walls or fencing shall be anchored far enough below ground level to prevent escape by digging. Dirt substrate or similar natural material shall be provided.

(K) Order Carnivora—Raccoon, Weasel, Skunk, Mongoose, Wolf, Lion, Bear, etc.

1. Procyonidae—Raccoon, Coatimundi and Kinkajou

a. Limbs shall be required.

b. A nest box or sheltered retreat shall be provided.

c. The floor of the pen shall be constructed of 4–inch concrete, wood, or natural substrate over concrete or 9 gauge non–rusting chain link or similar material, or the walls shall be buried deep enough to prevent escape by digging.

d. The walls of the pen shall be constructed of 11 gauge chain link or equivalent, 4–inch concrete or concrete block. If no top is provided, the walls shall be of sufficient height and shall be constructed in a manner which makes them non–climbable to prevent escape.

2. Mustelidae

a. Weasel, Ferret, Mink, Marten, Tayra, Grison, and Skunk

(i) Limbs shall be required (except skunk).

(ii) A nest box shall be provided for each animal, except neutered European ferrets may have a large communal nest box.

(iii) The floor of the cage shall be constructed of one inch square or one inch by two inch mesh, 4–inch concrete, wood, 11 gauge non–rusting chain link or equivalent material with a covering of dirt or similar natural substrate.

b. Wolverine and Badger

(i) A natural or artificial den area shall be provided for each animal.

(ii) The floor of the cage shall be constructed of two inch by six inch wood or 4–inch concrete or non–rusting 9 gauge chain link or welded wire covered with 3 feet of permeable soil. Six–inch floor drains shall be installed in the concrete floor at the rate of one per 16 square feet. Floor drains shall be covered with 9 gauge non–rusting woven wire or similar material to prevent animals from escaping.

(iii) Walls of the cage shall be constructed of 9 gauge chain link or welded steel wire, 4–inch concrete, or concrete block. If no top is provided, walls shall be of sufficient height and shall be constructed in a manner which makes them non–climbable to prevent escape.

c. River Otter. (Sea otters shall be housed according to 9 CFR Sections 3.100–3.118.)

(i) A den area shall be provided for each animal.

(ii) A pool with fresh running water covering at least 1/2 of the required floor space and at least 2–1/2 feet deep shall be provided.

(iii) The floor of the cage shall be constructed of 4 inch concrete or dirt over such concrete or 9 gauge chain link or welded steel wire or the side walls shall be anchored to equal materials deep enough underground to prevent escape by digging. If concrete floor is used, 6 inch floor drains shall be used and they shall be covered with 9 gauge non–rusting woven wire or similar material to prevent animals from escaping.

(iv) The walls of the cage shall be constructed of 11 gauge chain link or welded steel fabric or equivalent construction.

3. Viverridae—Genet, Civet and Mongoose, Binturong

a. Limbs shall be provided.

b. A nest box or platform is required. A heat source shall be provided for genet, civet and mongoose.

c. The floor of the cage shall be constructed of 4–inch concrete or for civets and binturongs, it may be 11 gauge non– rusting welded steel fabric with 2–inch mesh and the cage for genets and mongooses shall be of 16 gauge welded steel fabric with 3/4–inch mesh which is covered with soil.

d. The walls of the cage for civets and binturongs shall be of 11 gauge welded steel fabric with 2–inch mesh and the cage for genets and mongooses shall be of 16 gauge welded steel fabric with 3/4–inch mesh, 4–inch concrete or concrete block.

4. Hyaenidae—Hyena

a. The floor of the cage shall be constructed of 4–inch concrete, or 2 by 6 inch or larger wood flooring or buried non–rusting 9 gauge chain link or welded wire with mesh no larger than 2 inches by 4 inches.

b. The walls of the cage shall be constructed of 9 gauge chain link or welded wire with mesh no larger than 2 inches by 4 inches, or 6–inch concrete or concrete block. If an animal is kept in a large enclosure in lieu of a cage, the floor shall be of natural substrate and the walls shall be anchored and extend at least 5 feet underground. If no top is provided, the walls shall be at least 10 feet high and constructed to be non–climbable by the animal or the walls shall be 8 feet high and shall have, in addition, a 2–foot overhang angling 45 degrees inward at the top.

c. A sheltered retreat and either a den or elevated wood platform shall be provided.

5. Canidae—Wolf, Coyote, Fox and Other Members of the Dog Family

a. Limbs shall be provided for gray and red foxes.

b. The floor of the cage shall be either natural substrate or constructed of two inch by six inch wood or 4–inch concrete or buried non–rusting 9 gauge chain link or welded wire. In lieu of the above, either the walls shall be buried at least 8 feet deep to prevent escape by digging, or a buried 3–foot wide concrete, chain link, or welded wire apron shall be provided which shall be attached to the inside of the bottom of the perimeter walls to prevent escape by digging at the walls. All buried chain link or welded wire shall meet the gauge requirements for walls.

c. The walls of the cage shall be constructed of 6–inch concrete or concrete block, chain link or welded wire. If chain link is used, it shall be 9 gauge for wolves and 11 gauge for other canids. If an animal is kept in a large enclosure in lieu of a cage, the floor shall be of natural substrate and the walls of the cage shall be anchored and extend at least 5 feet underground or a buried 3–foot wide concrete, chain link or welded wire apron shall be provided which shall be attached to the inside of the bottom of the perimeter walls to prevent escape by digging at the walls. If no top is provided, the walls shall be at least 10 feet high and constructed to be non–climbable by the animal or the walls shall be 6 feet high (except that the walls for the gray fox shall be 8 feet high) and shall have, in addition, a 2–foot overhang angling 45 degrees inward at the top.

d. A sheltered retreat and either a den or elevated wood platform shall be provided.

6. Felidae—Cat Family

a. Dens shall be provided and shall be adequate in size to provide privacy and comfort for all animals in the enclosure.

b. An elevated wooden loafing platform or an elevated dry natural substrate loafing area, adequate in size for all animals within the enclosure, shall be provided. The top of the den or den box may be designed to meet this requirement.

c. A tree limb or other suitable scratch block shall be provided.

d. The floor of the cage shall be natural substrate or constructed of wood or 4 inches of concrete or welded wire or the walls shall be buried deep enough to prevent escape by digging. All buried chain link or welded wire shall be non–rusting and shall meet the gauge requirements for walls.

e. Group I—Lion, Tiger, Cheetah, Snow Leopard, and Hybrids Thereof:

(i) A minimum of 100 square feet shall be of concrete or wood planking as a sanitary area for feeding unless a secured food receptacle which is cleaned daily is provided.

(ii) Walls and top of the enclosure shall be constructed of at least 9 gauge chain link. The framework for the walls and top shall be constructed of 1–5/8 inch schedule 40 steel pipe. Vertical posts shall be bolted to or anchored in concrete 1–1/2 feet deep by 10 inches in diameter spaced no more than 10 feet apart. Horizontal pipe supports shall be spaced no more than 4 feet apart and welded at the ends to the vertical posts. The above chain link fencing shall be secured to the vertical and horizontal framing on all sides using tension bars which shall be welded or bolted to the framework every 18 inches. Welded wire shall be welded to the framework every 12 inches on all sides. The bottom horizontal cross bar shall be no more than 3 inches above the concrete floor. If a bottom horizontal cross bar is not used, the walls shall be secured against the natural substrate or a wooden flooring in a manner which precludes escape. Corner posts shall be two 1–5/8–inch schedule 40 steel posts or one 2–3/8–inch schedule 40 steel post. The top cross members shall be spaced no more than 5 feet apart.

f. Group II—Black and Spotted Leopard, Jaguar, Clouded Leopard, Mountain Lion, European Lynx and Hybrids Thereof:

(i) At least 70 square feet of the floor space must be of concrete or wood planking as a sanitary area for feeding unless a secured food receptacle which is cleaned daily is provided.

(ii) Walls and tops shall be the same as for Group I cats.

g. Group III—Caracal, Bobcat, Canada Lynx, Golden Cat, Ocelot, Serval, Jungle Cat, Fishing Cat and Hybrids Thereof:

(i) At least 25 square feet of floor space shall be concrete or wood planking as a sanitary area for feeding, unless a secured food receptacle which is cleaned daily is provided.

(ii) Walls and top of the enclosure shall be constructed of at least 12 gauge chain link or equivalent. Corner posts shall be either one 2–3/8–inch schedule 40 steel pipe or two 1–5/8–inch schedule 40 steel pipes and anchored as provided for Group I cats.

h. Group IV—Margay, Leopard Cat, Pallas Cat, Marble Cat, Geoffroy's Cat, African Wild Cat, European Wild Cat, Jaguarundi, Little Spotted Cat, African Black Footed Cat, Sand Cat, Flatheaded Cat, Pampas Cat and Hybrids Thereof:

(i) At least 20 square feet of floor space shall be concrete or wood planking as a sanitary area for feeding, unless a secured food receptacle which is cleaned daily is provided.

(ii) Wall and top of the enclosure shall be constructed of at least 12 gauge chain link or equivalent. Corner posts shall be either one 2–3/8–inch schedule 40 steel pipe or two 1–5/8–inch schedule 40 steel pipes and anchored as provided for Group I cats.

7. Ursidae–Bear Family

Bears shall be classified into 3 groups: Group I= Sun Bears, Asiatic Black bears, Sloth bears and Spectacled bears; Group II= American Black bears and European brown bears; and Group III= Polar bears and Brown bears.

(i) Floors of the enclosure shall be constructed of reinforced concrete 4 inches thick or they shall be of natural substrate or wood with the walls secured to a concrete footing deep enough below grade to preclude escape by digging (at least 5 feet for Group III).

(ii) Vertical corner posts shall be made of either one 2–3/8– inch schedule 40 steel pipe or two 1–5/8–inch schedule 40 steel pipe. Other vertical, horizontal, and top cross member supports shall be made of 1–5/8–inch schedule 40 steel pipe for Group I and 1–7/8–inch schedule 40 steel pipe for Groups II and III. All horizontal pipe supports shall be spaced no more than 5 feet apart for any group. The bottom horizontal pipe shall be no more than 3 inches above the concrete floor.

(iii) The framework for the walls and top of the cage shall be constructed of materials that are equal or greater in strength than the corner posts with all upright members set 2–1/2 feet in concrete and spaced no more than 10 feet apart for Group I and II or 5 feet apart for Group III. The cross members (stringers) forming the framework for the top shall be spaced no more than 5 feet apart for any group. Iron pipe shall be standard grade for Groups I and II and structural strength grade for Group III.

(iv) For groups I and II the walls of the cage shall be constructed of 9 gauge chain link or welded wire with mesh no greater than 2 inches in diameter. For Group III bears the walls of the cage shall be constructed of 5 gauge chain link or welded wire. Welded wire shall be welded to the framework every 4 inches.

Chain link fencing shall be secured along all edges to the framework using tension bars which shall be bolted to the framework every foot. The walls of the cage for groups I, II and III bears may also be constructed of vertical steel bars or rods of 5/8–inch diameter, spaced on 4–inch centers, and welded at the ends to 1–1/4 inch x 1/4–inch angle iron.

The horizontal angle iron supports shall be welded to the vertical posts. The bottom horizontal support shall be no more than 3 inches above the concrete floor and each horizontal support shall be spaced no more than 4 feet apart between floor and top.

(v) The top of the cage shall be constructed of material equal to the wall requirements for the particular group of bears enclosed. Shade shall be provided by covering 1/4 to 1/2 of the top with exterior grade plywood, fiberglass, or similar material.

(vi) A concrete or concrete block den at least 4 feet high by 4 feet wide by 6 feet long or an equivalent shall be provided for each animal; or one den at least 4 feet high by 6 feet wide by 8 feet long for 2 animals or for a female and her offspring of the year. The top of the den shall be constructed of concrete which may be covered on top with wood for laying. A den shall be provided with shavings, straw, or a wooden platform or flooring for reclining. The den shall be provided with adequate ventilation to prevent condensation of moisture. The den box may be of wood if the den is completely within the cage.

(vii) A bear shall be provided with a suitable scratching post.

(viii) A pool deep enough for complete immersion shall be required for polar bears and the pool surface area shall be in addition to the minimum cage size requirement.

(L) Order Tubulidentata–Aardvarks

1. The floor of the cage shall be dirt. The walls of the cage shall be constructed of 9 gauge non–rusting welded wire or concrete which has been buried to a depth of at least 5 feet to prevent escape by digging.

(M) Order Proboscidea–Elephant

1. A heated barn shall be provided in any geographical area where the ambient air temperature drops below 40 degrees Fahrenheit. The floor of the barn shall be constructed of at least 6 inches of reinforced concrete. All lights and other such objects and obstacles in the barn shall be kept outside the reach of the elephant.

2. Elephants shall be provided free exercise unchained on dirt for a minimum of 5 hours per each 24–hour period.

3. An enclosure constructed of 6–inch reinforced concrete, 2– inch diameter steel bars or 4–inch diameter schedule 40 galvanized steel pipe shall be provided. No roof is required.

4. Chaining requirements:

a. Chains shall be secured to a concrete floor, concrete "dead man," or other immovable anchor.

b. A covered chaining area shall be provided.

c. An elephant may be chained by only one rear leg and the opposite front leg and in such a manner as to restrict movement but still allow the animal to easily lay down and rise again. Chains shall be rotated to the other 2 legs daily.

d. Elephants chained for any extended period shall have their leg chains padded and shall be checked regularly to insure they are secure and to detect any injury to the leg.

e. Snaps and clips may be used only within a primary enclosure. A clevis or stronger type chain attachment shall be used outside the primary enclosure.

5. Either a pool shall be provided or the elephant shall be washed with water daily, as weather or temperature permit.

(N) Order Hyracoidea—Hyrax

1. Limbs shall be provided for arboreal species.

2. Nest box or sheltered retreat shall be provided.

3. The floor of the cage shall be constructed of 4 inch concrete which shall be covered with dirt or natural substrate.

4. The walls of the cage shall be constructed of 1/2 inch by 1 inch mesh welded wire.

(O) Order Sirenia—Dugongs and Manatees—These animals shall be maintained in a manner that complies with 50 CFR, Part 18, Section 18.13(c).

(P) Order Perissodactyla—Tapirs, Rhinoceroses, etc.

1. The floor of the pen shall be dirt or natural substrate.

2. The walls of the pen for tapirs shall be constructed of 9 gauge chain link, or equivalent material. The walls of the enclosure for rhinoceroses shall be constructed of 6–inch reinforced concrete, 2 inch diameter steel bars, or 6–inch heavy duty galvanized steep pipe.

(Q) Order Artiodactyla—Wild Pigs, Hippopotami, Deer, Giraffes, Wild Cattle, Antelope, etc.

1. Wild Pigs and Peccaries

a. A shelter with a roof and three walls shall be provided.

b. The floor of the pen shall be dirt or natural substrate.

c. The animals shall be precluded from escape by digging.

2. Hippopotami

a. A heated barn shall be provided in any geographical area where the ambient air temperature drops below 40 degrees Fahrenheit.

b. A pool shall be provided for the Nile hippopotamus which shall have surface area of at least 300 square feet and a 35–degree nonskid ramp. The pool shall be not less than 5 feet deep. For each additional animal there shall be a 25% increase in the required pool area.

c. A pool shall be provided for the pygmy hippopotamus which shall have a surface area of at least 100 square feet with a 35–degree nonskid ramp. The pool shall be not less than 3 feet deep. For each additional animal there shall be a 25% increase in the required pool area.

d. The walls of the corral or paddock enclosure shall be constructed of 5–inch reinforced concrete or 5–inch structural grade schedule 40 galvanized steel pipe.

3. Deer, Elk, Giraffes, Wild Cattle, Antelope, and Wild Goats and Sheep.

a. The floor of the pen shall be dirt or other natural substrate.

b. All animals shall be provided with a shelter which has a roof and three walls.

Shelters for giraffes shall provide at least 140 square feet of floor space for each giraffe. A heat source shall be provided for giraffes.

c. Fences for giraffe, elk and wild cattle shall be constructed of 9 gauge woven wire or chain link with mesh not more than 6 inches in diameter or equivalent. Posts shall be of structural grade schedule 40 quality steel pipe or structurally sound 4 x 4 wood, spaced not more than 12 feet apart. A 6–foot vertical fence, with or without overhang, shall be required; a 7–foot vertical fence is required for elk.

d. Fences for deer, antelope and wild goats and sheep shall be constructed of 11 gauge woven wire with mesh not more than 6 inches in diameter or equivalent. Posts shall be of structurally sound 4x4 wood or equivalent, spaced not more than 12 feet apart. A 7–foot vertical fence is required for elk, red deer, bison, buffalo, impala, eland, antelope, goats and sheep; a 6–foot vertical fence is required for white–tailed deer, fallow deer, auodad and sika deer.

(3) Class Amphibia—Frogs, Toads, Salamanders

(A) General Requirements:

1. The animal's enclosure shall be kept within a closed and locked room or building which has covers over all drains and openings to prevent escape of the amphibians from the building. All doors shall be equipped with sweeps. Containers or exhibits shall be labeled with the identification of current species and the number of animals contained inside.

2. The rock or aquarium substrate shall be non–abrasive and shall be kept clean.

3. Any transfer containers shall have locked tops and shall be constructed in a manner which shall prevent the likelihood of escape.

(B) Family Bufonidae

1. One ten–gallon standard commercial aquarium shall be provided for one animal and an additional three–fourths of a square foot (equivalent to one 5 gallon aquarium) shall be provided for each additional animal.

2. At least one–third of the bottom of the aquarium shall be covered with water and two–thirds shall be dry.

3. Animals shall be kept at a temperature of between 60–80 degrees Fahrenheit.

(C) Family Pipidae

1. One 10 gallon standard commercial aquarium shall be provided for one animal. The minimum floor space requirement shall be increased by 50 percent for each additional animal. Water at a minimum depth of 1 foot shall cover at least the minimum floor space requirement for the number of animals confined.

2. Animals shall be confined at a temperature of between 60–80 degrees Fahrenheit.

(4) Class Reptilia

(A) Order Crocodilia—Alligators, Caimans, Crocodiles, Gavials

1. The minimum cage length and width dimensions for one animal shall be equal to one and one–half times the length of the animal by one and one–half times the length of the animal. This space requirement shall be doubled for two animals and shall be increased by a factor of two–thirds for each additional animal thereafter.

2. One–third of the minimum cage space shall be water that is deep enough for the animal to immerse itself. If more than one animal is present in the pen, the pool shall be of sufficient size that all animals can immerse themselves simultaneously. Pool surfaces shall be made of non–abrasive material and the pool shall have a drain.

3. That portion of the pen not occupied by the pool shall be covered with non–abrasive material such as dirt or grass.

4. Crocodilians, except alligators and caimans less than 4 feet in length, shall be kept in a totally enclosed building or exhibit. Animals shall be confined in a manner which precludes their coming in contact with the public. The walls of an open pen for other crocodilians shall be equivalent to at least one foot in height for every one foot in length of the largest animal up to a maximum of 6 feet high. If any of the walls are made of a climbable material such as fencing, the top 1–1/2 feet of the wall shall be constructed of a slippery, nonclimbable material for all crocodilians except alligators. The walls for all species shall be buried deep enough to prevent escape by digging, or a buried apron shall be used. The walls of an open alligator pen shall be at least 4 feet high, and the corners shall be covered to prevent climbing. The upper one–half of the walls of the enclosure shall be constructed of either concrete or concrete block or 9 gauge chain link or welded wire with no greater than 2–inch x 4–inch size mesh. Concrete or concrete block shall be used for the bottom half of the enclosure. All chain link or welded wire edges shall be smoothly secured in a manner which will prevent injury to the animals.

5. Alligators may be kept outdoors if:

a. An external heat source is provided, and the pool temperature is maintained above freezing;

b. The pool is at least three feet deep; and

c. The nighttime temperature does not fall below freezing for more than 2 consecutive nights.

6. Crocodilians other than alligators may be confined outdoors between sunrise and sunset if:

a. The air temperature is above 65 degrees Fahrenheit.

7. Crocodilians other than alligators shall not be confined outdoors between sunset and sunrise.

(B) Family Chelydridae—Snapping turtles

1. The container or exhibit shall be labeled with the common and scientific name of the species and the subspecies, if known, and the number of animals contained inside.

2. Each turtle shall be provided with a minimum floor space that is equal to five times the size of the animal.

3. At least one–half of the minimum floor space shall be water which is deep enough to immerse the turtle.

(C) Snakes—Families Elapidae, Viperidae, Colubridae and Crotalidae

1. The container or exhibit for venomous snakes shall be labeled with the common and scientific name of the species and the subspecies, if known, and the number of animals contained inside. The label shall be legibly marked with the warning "Poisonous" or "Venomous."

2. The perimeter of the enclosure for snakes less than 6 feet shall be 1–1/2 times the length of the snake. The perimeter of the enclosure for snakes over 6 feet shall be twice the length of the snake.

3. All venomous snakes shall be kept in a locked exhibit or container which shall be located within a locked building, compound or enclosure.

4. The floor of the enclosure shall be constructed of non–abrasive material and hiding areas shall be provided.

5. At least two fully trained people shall be present when an occupied enclosure is opened or when one of these snakes is handled. The names of the trained handlers shall be listed with the department's Wildlife Protection Division in Sacramento.

6. Written animal escape "emergency procedures" shall be clearly and conspicuously posted in the building housing these snakes and shall be supplied to the department at the time the permit application is initially submitted.

7. A notice shall be clearly and conspicuously posted on the premises which shall provide the location of the nearest most readily available source of appropriate antivenin and a written plan from a hospital stating how a venomous bite should be treated. Each enclosure shall be clearly and conspicuously labeled with the appropriate antivenin to be used for the species in the cage.

8. If a snake is transported or removed from its primary enclosure for feeding or in order to clean the enclosure, the snake shall be kept in a fully enclosed container with a secure and locked lid which has air holes or other means of ventilation.

9. Snake hooks shall be present for caring for these snakes.

10. The permittee shall telephonically notify the department of any snake bite on humans or escapes of any snakes within 24 hours and shall provide a written report of the incident to the department's Wildlife Protection Division in Sacramento within one week.

(5) All other Classes, Orders, Families, Genera and species for which specific caging and/or enclosure requirements have not been provided in sections (b)(1)–(4) above shall be humanely confined in a manner which precludes escape.

(c) Incorporation by reference of the Federal Animal Welfare Regulations and Federal "Guide for the Care and Use of Laboratory Animals."

Except as otherwise provided in subsections (a) and (b) above, permittees shall follow the requirements of the Federal Animal Welfare Regulations contained in 9 Code of Federal Regulations (CFR), Sections 2.33; 2.40; 3.75–3.85; 3.101(a)(3); and 3.136–3.142, as amended from time

to time, as the United States Department of Agriculture adopts regulations pursuant to the Laboratory Animal Welfare Act and its Amendments as found at 7 United States Code (USC), Sections 2131–2157. The Commission hereby incorporates by reference the cited Federal Animal Welfare Regulations and the "Guide for the Care and Use of Laboratory Animals," (NIH Publication No. 86–23, Revised 1985) as if they were set out in full.

(d) Variances to Minimum Caging and Enclosure Requirements.

(1) The general requirements set forth in subsections (a) and (b) above are minimum standards for permanent facilities. Any deviation from these specifications because of the age of the animal being housed, the use of an unusual facility design, such as moats, islands, outdoor natural habitat enclosures, pits or barriers shall be subject to the approval of the inspecting officer with concurrence of the director. In granting any variance of the minimum caging and enclosure requirements, the inspecting officer and the director shall make a finding that the overall welfare of the animal(s) involved has been maintained.

(2) Those cat cages which substantially conform to the provisions of Section 671.3(b)(2)(K)6 on or before August 3, 1989, shall be "grandfathered in." Existing cages, except currently approved cat cages, will be given three calendar years or until February 25, 1995 to comply with the new caging requirement set forth herein. The department may approve nonstandard cages on a case by case basis, if they substantially conform to the spatial requirements. The Regional Manager shall make a recommendation to the Chief of Patrol who will make the department's final decision. The department's final decision may be appealed to the commission.

(3) These minimum facility and caging standards do not apply to wildlife temporarily maintained pursuant to Section 251.5(f) as provided by Fish and Game Code Section 3005.5.

(e) Care of Laboratory Animals. With the approval of the department, prohibited wild animals used for research purposes may be confined and cared for pursuant to the provisions of the "Guide for the Care and Use of Laboratory Animals" adopted by the U.S. Department of Health and Human Services (NIH Publication No. 86–23, Revised 1985).

(f) Regulations Manual. The facility and caging requirements specific to animals that may be lawfully possessed are provided in the DEPARTMENT OF FISH AND GAME MANUAL 671 (2/25/92)–IMPORTATION, TRANSPORTATION AND POSSESSION OF WILD ANIMALS, which is incorporated by reference herein. Copies are available from the department's Wildlife Protection Division, 1416 Ninth Street, Box 944209, Sacramento, CA 94244–2090. Facility and caging regulations of subsection 671.3(b) contained in DEPARTMENT OF FISH AND GAME MANUAL 671 (2/25/92) are hereby adopted and made part of this Title 14 and are thus incorporated by reference.

NOTE: Authority cited: 1002, 2116, 2116.5, 2118, 2120, 2122, 3005.9 and 3005.92 Fish and Game Code. Reference: 1102, 2116–2118, 2118.2, 2118.4, 2119–2155, 2185–2190, 3005.9 and 3005.92, Fish and Game Code.

HISTORY

1. Amendment filed 1–24–75 as an emergency; effective upon filing. Certificate of Compliance included (Register 75, No. 4).
2. Amendment filed 5–11–79; effective thirtieth day thereafter (Register 79, No. 19).
3. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
5. Renumbering and amendment of former section 671.3 to section 671.5 and new section filed 2–26–92; operative 2–26–92 (Register 92, No. 13).

§ 671.4. Transportation Standards for Exhibition of Live Restricted Animals.

(a) Responsibility of Permittee. Permittees shall provide a copy of these regulations to any carrier or intermediate handler transporting wild animals. Permittees shall not transport or possess wild animals within the state for periods exceeding their exhibiting itinerary unless they provide facilities which meet the caging standards of Section 671.3 for each animal listed on their permit.

(b) Requirements for Carriers and Intermediate Handlers. (Also see subsections (d) and (f) of this Section regarding holding and food and water requirements.)

(1) Carriers and intermediate handlers shall not accept any animal presented by any person for shipment more than four hours prior to the scheduled departure of the primary conveyance on which it is to be transported.

(2) Carriers or intermediate handlers shall accept wild animals for transportation only if the transport cages are constructed in accordance with the provisions of subsection 671.4 (e)(1) below.

(3) Carriers or intermediate handlers whose facilities fail to meet the minimum temperature allowed by these regulations may not accept for transportation any live animal consigned by any person unless the consignor furnishes to the carrier or intermediate handler a certificate executed by a licensed veterinarian on a date which shall not be more than 10 days prior to delivery of such animal for transportation, stating that such live animal is acclimated to air temperatures lower than 7.2° C. (45° F.). A copy of such certificate shall accompany the shipment to its destination. The certificate shall include at least the following information: Name and address of the consignor; the number of animals in the shipment; a certifying statement (e.g., "I hereby certify that the animal(s) in this shipment is (are), to the best of my knowledge, acclimated to air temperatures lower than 7.2° C (45° F)"; and the signature of the accredited veterinarian, assigned accreditation number, and date.

(4) Carriers and handlers shall not commingle animal shipments with inanimate cargo. All animal holding areas of any carrier, handler, or any mode of conveyance shall be cleaned and sanitized often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation and to prevent a disease hazard. An effective program shall be provided and maintained by the owner or operator of the holding facility for the control of insects, ectoparasites, and avian and mammalian pests for all animal holding areas. All animal–holding areas containing live animals shall be provided with fresh air by means of windows, doors, vents or an air conditioning system to minimize odors and moisture condensation. Auxiliary ventilation, such as exhaust fans and vents or fans or blowers or air conditioning shall be used for any animal–holding area containing live animals when the air temperature within such animal–holding area is not compatible with the health and comfort of the animal. The temperature shall be regulated to protect the animals from temperature extremes. Animals shall not be placed in a direct draft.

(5) Carriers and intermediate handlers shall attempt to notify the consignee at least once every two hours following the arrival of any live animals at the animal holding area of the terminal cargo facility. The time, date and method of each attempted notification and the final notification to the consignee and the name of the person notifying the consignee shall be recorded on the copy of the shipping document retained by the carrier or intermediate handler and on a copy of the shipping document accompanying the animal shipment.

(c) Conveyances (motor vehicle, rail, air, and marine).

(1) The cargo space of any conveyance used to transport live animals shall be designed and constructed to protect the health, and ensure the safety and comfort of the live animals contained therein at all times.

(2) The animal space shall be constructed and maintained to prevent the ingress of direct engine exhaust fumes and gases from the conveyance.

(3) No live animal shall be placed in any cargo space that does not have sufficient air for normal breathing for each animal contained therein, and the transport cages shall be positioned in the animal cargo space so that each animal has sufficient air for normal breathing.

(4) Transport cages shall be positioned in the conveyance so that the animals can be quickly removed in an emergency.

(5) The interior of the animal cargo space shall be kept clean and sanitary.

(6) Live animals shall not be transported with any material, substance, (e.g., dry ice) or device which may be injurious to their health and well-being unless proper precaution is taken to prevent such injury.

(d) Handling Provisions.

(1) Carriers and handlers shall move live animals from animal holding areas to conveyances and from the conveyances to animal holding areas as expeditiously as possible. Carriers and handlers holding live animals in an animal holding area or transporting live animals from the animal holding area to the primary conveyance and from the primary conveyance to the animal holding area, including loading and unloading procedures, shall provide the following:

(A) Shelter from sunlight. Shade shall be provided to protect the animals from the direct rays of the sun. Animals shall not be subjected to surrounding air temperatures which exceed 29.5° C. (85° F.). The temperature shall be taken outside of the primary enclosure at a distance not to exceed 3 feet from any one of the external walls and on a level parallel to the bottom of the enclosure at a point which approximates half the distance between top and bottom of the enclosure.

(B) Shelter from rain or snow. Protection shall be provided so animals remain dry during rain or snow.

(C) Shelter from cold weather. Transport cages shall be covered to provide protection for animals when the air temperature falls below 10° C. (50° F.) and animals shall not be subjected to surrounding air temperatures which fall below 7.2° C. (45° F.). The temperature shall be taken at a distance not to exceed 3 feet from any one of the external walls of the transport cage unless such animals are accompanied by a veterinarian's certificate of acclimation to temperatures lower than 7.2° C. (45° F.).

(2) The transport cage shall not be handled in a manner that may cause physical or emotional trauma to the animal contained therein. Transport cages with animals inside shall not be tossed, dropped, or needlessly tilted and shall not be stacked in a manner which may reasonably be expected to result in their falling.

(e) Transport Caging Provisions. No person shall offer for transportation any live animal in a cage which does not conform to the following requirements:

(1) Cages used to transport live animals shall be constructed in such a manner that:

(A) the structural strength of the cage shall be sufficient to contain the animal and to withstand the normal rigors of transportation;

(B) the interior of the cage shall be free from any protrusions that could injure the animal contained therein;

(C) the openings of such cages shall be easily accessible at all times for emergency removal of live animals;

(D) when a primary enclosure is permanently affixed within the animal cargo space of the primary conveyance so that the front opening is the only source of ventilation for such primary enclosure, the front opening shall open directly to the outside or to an unobstructed aisle or passageway within the primary conveyance. Such front ventilation opening shall be at least 90% of the total surface area of the front wall of the primary enclosure and covered with bars, wire mesh or smooth expanded metal.

If there are ventilation openings located on two opposite walls of the primary enclosure, the ventilation openings on each wall shall be at least 16 percent of the total surface area of each such wall; or, if there are ventilation openings located on all four walls of the primary enclosure, the ventilation openings on each such wall shall be at least 8 percent of the surface area of each such wall. At least one-third of the total minimum area required for ventilation of the primary enclosure shall be located on the lower one-half of the primary enclosure and at least one-third of the total minimum area required for ventilation of the primary enclosure shall be located on the upper one-half of the primary enclosure. Projecting rims or other devices shall be placed on the exterior of the outside walls to prevent obstruction of ventilation openings and to provide a minimum air circulation space of 1.9 centimeters (.75 inch) between the primary enclosure and any adjacent cargo or conveyance wall; and

(E) adequate handholds or other devices for lifting shall be provided on the exterior of the cage to enable lifting of the enclosure without tilting and to ensure that the person handling the cage will not be in contact with the animal.

(2) Animals transported in the same cage shall be of the same species and maintained in compatible groups. Animals that have not reached puberty shall not be transported in the same cage with adult animals other than their dams. Socially dependent animals (e.g., sibling, dam, and other members of a family group) shall be allowed visual and olfactory contact. Any female animal in season (estrus) shall not be transported in the same cage with any male animal.

(3) Transport cages shall be as set forth below. In the event, however, the provisions of 9 CFR, Sections 3.85–3.91, Sections 3.112–3.118 and Sections 3.136–3.142 are met, the requirements of this subsection shall be deemed satisfied.

(A) All Animals Except Primates Traveling for Performances or Exhibition.

Minimum length: cages shall be at least 1–1/4 times the body length of quadruped (four-legged) animals, excluding the tail, or long enough for other animal species to lie down and get up normally.

Minimum height: cages shall be at least the full height of the animal plus 2 inches (antlers included in body height).

Minimum width: except for hoofstock, cages shall be at least 1–1/2 times the body width of the animal. For hoofstock, the width of the cages shall be consistent to the needs of the animal to ensure its safe delivery.

(B) Primates Traveling for Performance and Exhibition.

Minimum length: cages shall be at least equal to the length of the animal as measured from the buttocks to the top of the head.

Minimum height: cages shall be at least 1–1/2 times the height of the primate when it is in its natural posture.

Minimum width: cages shall be at least equal to the length of the animal as measured from the buttocks to the top of the head. The cage shall be large enough to allow the animal to lie down.

Notwithstanding the minimum requirements above, cages for adult chimpanzees and orangutans shall be at least 4′ long (L) x 4′ wide (W) x 4′ high (H) with one shelf or perch. When not traveling, an exercise cage of at least 6′ (L) x 4′ (W) x 6′ (H) shall be provided for a minimum of four hours per day. For adult small monkeys and baboons, cages shall be at least 3′ (L) x 3′ (W) x 4′ (H). When not traveling, an exercise cage of at least 4′ (L) x 4′ (W) x 6′ (H) shall be provided for a minimum of four hours per day. Primates less than one year of age shall be transported in a cage of such size and construction which ensures its safe delivery.

(C) Immediately upon arrival at a destination, animals traveling for performances or exhibition shall be placed in a space equal to 1/3 the minimum permanent space required for that species. Notwithstanding the foregoing, animals which are regularly exercised by exhibitors shall be permitted to remain in their transportation cages provided the permittee's veterinarian certifies that such cages provide sufficient space for the animal once it has arrived at a destination. The department shall bring to the immediate attention of the commission any circumstances where in the opinion of the department's officer, proper care is not being provided.

Animals not used in performances or exercised regularly shall be placed in a space equal to 1/2 the minimum permanent space required for that species. Elephants accompanied by an attendant may be staked out in a roped off area which excludes the public.

(4) Transport cages shall have solid bottoms to prevent leakage in shipment and shall be cleaned and disinfected pursuant to subsections 671.2(a)(4) and (5). Transport cages shall contain clean litter of a suitable absorbent material, which is safe and nontoxic to the animals, in sufficient quantity to absorb and cover excrement.

(5) Transport cages consigned to carriers and intermediate handlers shall be clearly marked on top and on all sides with the words "Live Wild Animal" in letters not less than 1 inch in height, and with arrows or other markings to indicate the correct upright position of the container.

[The next page is 185.]

(6) Documents accompanying the shipment consigned to carriers and intermediate handlers shall be attached in an accessible location on the outside of one transport cage.

(f) Care in Transit.

(1) To minimize the distress to animals during surface transportation, the driver shall visually inspect the animals at least once every 4 hours to assure that the animals are not in obvious physical distress and to provide for any needed veterinary care as soon as possible. When transported by air, animals shall be observed if the cargo space is accessible during flight. If the cargo space is not accessible during flight, the carrier shall visually observe the animals whenever the cargo space is accessible to assure that all applicable standards are being complied with and to determine whether any of the live animals are in obvious physical distress.

(2) Animals shall not be taken from their cage except under extreme emergency.

(3) Food and water requirements while in transit.

(A) All live animals shall be offered potable water within 4 hours prior to being transported. Any person who transports live animals shall provide potable water to all animals being transported at least every 12 hours after such transportation is initiated except as directed by a veterinarian or in the case of hibernation. Animals requiring more water shall be treated appropriately.

(B) Each animal shall be fed at least once in each 24–hour period, except as directed by a veterinarian. Predators are to be separated when feeding. Animals requiring more food shall be treated appropriately.

(C) Any person who offers animals to any carrier or intermediate handler for transportation shall comply with the provisions of subsection 671.1(a)(4) and shall affix to the outside of the transportation cage written instructions pursuant to subsections 671.4(f)(3)(A) and (B) concerning the food and water requirements of each animal.

(D) No carrier or intermediate handler shall accept any live animals for transportation unless written instructions concerning the food and water requirements of each animal are affixed to the outside of the cage.

HISTORY

1. Amendment filed 1–24–75 as an emergency; effective upon filing. Certificate of Compliance included (Register 75, No. 4).
2. Amendment filed 5–11–79; effective thirtieth day thereafter (Register 79, No. 19).
3. New subsection (d) filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Order of Repeal of subsection (d)(1)(f) filed 6–3–85 by OAL pursuant to Government Code section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).
5. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
6. Repealer and new section filed 2–26–92; operative 2–26–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 13).
7. Amendment of section heading and subsection (a) filed 8–27–98; operative 9–26–98 (Register 98, No. 35).

§ 671.5. Disposition of Violations Related to Possession of Wild Animals.

(a) Any live bird or mammal that is (1) designated as a furbearer, game, nongame, fully protected, threatened, or endangered animal or is of a species native to California, and (2) possessed in violation of Fish and Game Code section 3005.5 or regulations adopted pursuant thereto, shall be seized by the department. An animal that is seized may be taken to another location by the department or seized in place.

(b) Any person who, in violation of the provisions of the Fish and Game Code or regulations adopted pursuant thereto, brings into this state or transports or possesses within this state any live wild animal other than those specified in subdivision (a) may, upon written notice from an enforcing officer, be authorized to exercise one of the following options within the time and by the method specified by the enforcing officer, to have the animal (1) transferred to an appropriately permitted facility, (2) transferred out of the state, or (3) humanely destroyed. The exercise of any such option shall be under the direction and control of the enforcing officer and at the expense of the owner or possessor. If the owner or possessor fails to exercise such option within the time specified by the enforcing officer, the department shall thereafter seize the animal. An animal that is seized may be taken to another location by the enforcing officer or seized in place.

(c) Once an animal is seized pursuant to subsection (a) or (b), the enforcing officer may: (1) transfer the animal to an appropriate facility, (2) transfer the animal out of the state, (3) humanely destroy the animal, or (4) for animals specified in subsection (a) only, release the animal to the wild. Costs associated with the seizure, care, holding, transfer and destruction of the animal will, at the discretion of the department, be at the expense of the owner or possessor. Failure to pay these costs may result in an action for cost recovery and civil penalties pursuant to Fish and Game Code section 2125.

HISTORY

1. Amendment filed 1–24–75 as an emergency; effective upon filing. Certificate of Compliance included (Register 75, No. 4).
2. Amendment filed 5–11–79; effective thirtieth day thereafter (Register 79, No. 19).
3. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
5. Renumbering and amendment of former section 671.3 to section 671.5 and renumbering and amendment of former section 671.5 to section 671.6 filed 2–26–92; operative date 2–26–92 (Register 92, No. 13).
6. Amendment of section and NOTE filed 2–23–2007; operative 3–25–2007 (Register 2007, No. 8).

§ 671.6. Release of Animals into the Wild.

(a) No person shall release into the wild without written permission of the commission any wild animal (as defined by Section 2116 of the Fish and Game Code), including domestically reared stocks of such animal, which:

(1) is not native to California;

(2) is found to be diseased, or there is reason to suspect may have the potential for disease;

(3) may be genetically detrimental to agriculture or to native wildlife; or

(4) has not been successfully introduced prior to 1955.

(b) no permission will be granted to any person to release to the wild state turkeys that have been domestically reared for propagation or hunting purposes, except as provided in subsection 600(i)(4) of these regulations. Only wild trapped turkeys trapped from the wild by the Department may be released into the wild.

(c) Every person who releases Barbary partridges, Turkish or Greek chukar partridges; French, Spanish or Arabian red–legged partridges; and/or bobwhite or coturnix quail into the wild shall have a valid permit signed by the director of the department before making such a release. Persons desiring to release such birds shall submit an application showing the number and sex of birds to be released, the location of the proposed release, and the proposed date of such release.

At the time of release of such birds, the department may require that they shall be banded by the permittee with appropriate bands furnished by the department. The department may require a report giving the age, sex and number of the individual birds released.

(d) Application for the introduction of all non–native birds or animals, except those birds cited in subsection 671.6(c), shall be made to the commission on forms supplied by the department.

NOTE: Authority cited: Section 2120, Fish and Game Code. Reference: Sections 2116, 2116.5, 2118, 2118.2, 2118.3, 2118.4, 2120 and 2121, Fish and Game Code.

HISTORY

1. Amendment filed 1–23–78; effective thirtieth day thereafter (Register 78, No. 4). For prior history, see Register 75, No. 23.
2. New NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).

3. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
4. Amendment filed 4–6–87, operative 5–6–87 (Register 87, No. 15).
5. Repealer and renumbering and amendment of former section 671.5 to section 671.6 filed 2–26–92; operative 2–26–92 (Register 92, No. 13).

§ 671.7. Permits for Aquaculture Purposes.

The Department of Fish and Game may issue permits for importation, possession, and transportation of aquatic animals listed in Section 671 for aquaculture purposes.

NOTE: Authority cited: Sections 2118, 2120, Fish and Game Code. Reference: Sections 1050, 2116–2118, 2118.5–2123, 2125, 2150–2190, 15200–15202, 15400 and 15600, Fish and Game Code.

HISTORY

1. New section filed 7–21–93; operative 7–21–93 pursuant to section 202, Fish and Game Code (Register 93, No. 30). For prior history, see Register 85, No. 38.

§ 672. Shooting Exotic Resident and Nonresident Game Birds.

NOTE: Authority cited: Sections 200 and 3516, Fish and Game Code. Reference: Sections 200 and 3516, Fish and Game Code.

HISTORY

1. New section filed 4–21–60; effective 30th day thereafter (Register 60, No. 9).
2. Amendment filed 6–30–66 as an emergency; effective upon filing. Certificate of Compliance included (Register 66, No. 20).
3. Amendment filed 6–8–72; effective thirtieth day thereafter (Register 72, No. 24).
4. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
5. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
6. Amendment of undesignated first paragraph and subsection (i) filed 4–18–91; operative 5–18–91 (Register 91, No. 21).
7. Amendment of heading, subsections (c), (d) and NOTE filed 10–26–92; operative 10–26–92 (Register 92, No. 44).
8. Repealer filed 6–30–95; operative 7–1–95 pursuant to Fish and Game Code section 3270 (Register 95, No. 26).

§ 673. Importation of Resident Game Birds.

Every person who brings or causes to be brought into this state live domestically reared resident game birds shall have such birds inspected for disease and health conditions by the Department of Fish and Game unless the shipment is accompanied by a certificate from a licensed veterinarian at the point of origin stating that the birds are disease free. Written notice shall be given ten days in advance of all shipments, to the director, showing the date and place of arrival and stating whether or not the birds will be accompanied by a certificate of inspection. Game birds will be rejected for release if found diseased or altered in any manner which would, in the opinion of the department, render them incapable of surviving in the wild. Any birds rejected for release will be kept, destroyed, or returned to the place of origin by the importer at his sole cost and responsibility.

NOTE: Authority cited: Sections 2120 and 3516, Fish and Game Code. Reference: Sections 2120, 3500 and 3516, Fish and Game Code.

HISTORY

1. New section filed 4–9–64; effective thirtieth day thereafter (Register 64, No. 8).
2. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
3. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).

§ 674. Permits to Possess Desert Tortoises (Gopherus).

(a) Desert tortoises may be possessed only under the authority of a permit issued by the department. The department may issue a permit for the possession of a desert tortoise provided the tortoise was legally acquired and possessed prior to March 7, 1973. The department may require an applicant for a permit to submit proof of the legal acquisition of any desert tortoise.

(b) Applications for a tortoise permit shall be submitted on forms furnished by the department and may be filed with the department at any time. Upon approval of the application, the department shall provide a tag which shall be affixed to the desert tortoise as directed by the department.

(c) No desert tortoise may be transferred to any other person without prior department approval.

(d) Possession of a desert tortoise, regardless of subspecies, except under the authority of a department permit is in violation of this section. Untagged desert tortoises shall be seized by the department.

NOTE: Authority cited: Sections 200, 202, 1002 and 5002, Fish and Game Code. Reference: Sections 200–202, 203.1, 5000–5002, 5060 and 5061, Fish and Game Code.

HISTORY

1. New section filed 10–11–73; effective thirtieth day thereafter (Register 73, No. 41).
2. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
3. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).

§ 675. Importation and Sale of Domesticated Reindeer Meat.

Any domesticated reindeer meat imported into this state shall be accompanied by a bill of lading, a copy of which shall be forwarded to the Department of Fish and Game, Sacramento, within 24 hours after such importation. The bill of lading shall indicate the number of carcasses or pieces of reindeer meat, the total weight of the shipment, the country of origin and the name of the importer.

(a) No domesticated reindeer carcass or portion thereof shall be transported for sale or sold by an importer or wholesaler unless each quarter and each loin or each piece of the carcass of each reindeer is tagged with a domesticated game breeders tag or seal as provided in sections 3206 and 3207 of the Fish and Game Code.

(b) Tags or seals must be affixed to reindeer meat at the point of origin or by the importer before the meat is distributed for storage or sale in California.

(c) No tag or seal so affixed shall be used again.

(d) No tag or seal shall be sold by the department to anyone other than a person who is legally in possession of domesticated reindeer, reindeer carcasses or portions thereof.

(e) The keeper of a hotel, restaurant, boarding house, or club may sell portions of a quarter or loin of a domesticated reindeer to a patron or guest for actual consumption on the premises only.

(f) A retail meat dealer may sell portions of a quarter or loin of a domesticated reindeer carcass to a customer for actual consumption. All packages containing such portions shall be marked to indicate the origin, place of sale, amount contained in each package and date of sale. This marking shall be kept with the reindeer meat until such meat is consumed.

(g) The premises of such importers, wholesalers and retailers, together with the premises of such hotels, restaurants, boarding houses and clubs shall be open to inspection by the department at all times.

NOTE: Authority cited: Section 3219, Fish and Game Code. Reference: Sections 1006 and 3219, Fish and Game Code.

HISTORY

1. New section filed 7–2–65, effective thirtieth day thereafter (Register 65, No. 11).
2. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
3. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
4. Amendment of undesignated first paragraph filed 4–18–91; operative 5–18–91 (Register 91, No. 21).

§ 676. Fallow Deer Farming.

(a) General Provisions. Fallow deer farming is defined as the rearing of fallow deer for commercial sale of meat and other parts or for sale of live fallow deer pursuant to these regulations. No person shall engage in any deer farming activity except as provided by the Fish and Game Code and regulations provided herein. Only fallow deer (*Dama dama*) may be possessed for deer farming purposes.

(b) Permit Information.

(1) Application. Application for a fallow deer farming permit shall be made on Fallow Deer Farming Application, LRB 1676 (3/97), which is incorporated by reference herein. Application forms are available from the Department of Fish and Game, License and Revenue Branch, 3211 S Street, Sacramento, CA 95816. A new applicant shall complete the application form in its entirety, including information on the plan of operation, source of fallow deer, testing protocol and contingency plans for recapture of escaped fallow deer.

(2) Residency Requirement. Applicants shall be at least 18 years old and be residents of California.

(3) Inspection of Facility. No new fallow deer farming permit shall be issued until the applicant's facility is inspected and approved by the department. The department shall charge a fee pursuant to Section 2150.2 of the Fish and Game Code in an amount sufficient to cover the cost of the inspection.

(4) Term of a New Fallow Deer Farming Permit. Nontransferable, new fallow deer farming permits issued under the provisions of this section shall be valid for a term of one year. A permanent permit number shall be issued to the permittee for marking slaughtered fallow deer for transport.

(5) Fallow Deer Farming Permit Renewal. Fallow deer farming permits must be renewed by January 1 of each year. An inspection is required for the renewal of a fallow deer farming permit and may be accomplished by the department pursuant to the provisions of subsection (b)(3) above. In lieu of a department inspection, the department may approve a renewal application when a veterinarian, or other person who has obtained a degree in veterinary medicine from a college or university accredited by the American Veterinary Medical Association, certifies in writing that he/she has inspected the facility and found it to be in compliance with this section. If a veterinarian inspects the facility, he/she must certify that each of the permittee's fallow deer have been observed at least once during the prior year and that they have been appropriately cared for and appear healthy. No person shall falsely certify that the facility has been inspected and that such facility is in compliance.

(6) Terminating a Fallow Deer Farming Permit. Any fully or partially certified fallow deer farm permitted pursuant to this section shall notify the department within 45 days of its intended termination of fallow deer farming operations. The permittee shall identify the number of fallow deer under his/her possession and the disposition of fallow deer upon termination of operations. Upon termination of operations, fallow deer shall be slaughtered for meat consumption or, with proper health certifications, sold to another permitted fallow deer operation in California or sold and transported out of state.

(7) Denial. The department may deny the issuance of a fallow deer farming permit for failure to comply with the terms and conditions of a permit or the provisions of this section. Any person denied a permit under these regulations may request a hearing before the commission to show cause why their permit should not be denied.

(8) Revocation. Any fallow deer farming permit issued pursuant to these regulations may be revoked or suspended at any time by the commission for failure to comply with the terms and conditions of the permit or for failure to comply with these regulations, after notice and opportunity to be heard, or without a hearing upon conviction of a violation of these regulations by a court of competent jurisdiction.

(9) Fees. Pursuant to sections 2150 and 2150.2 of the Fish and Game Code, the following fees have been established to offset costs of administering and enforcing the associated laws and regulations.

(A) Application Fee. The application fee for a new fallow deer farming permit shall be $30.00 and shall be annually adjusted pursuant to Section 713 of the Fish and Game Code to offset the department's administrative costs of processing an application.

(B) Permit Fee. The fallow deer farming permit fee shall be $200.00. This fee shall be annually adjusted (base year 1997) pursuant to Section 713 of the Fish and Game Code.

(C) Inspection Fee. The annual fallow deer farming inspection fee shall be an amount sufficient to cover the department's cost of inspection. If, in lieu of a department inspection, a qualified veterinarian performs the inspection pursuant to subsection (b)(5) above, the annual fallow deer farming inspection fee shall be waived.

(c) Certification. All new fallow deer farming facilities shall be fully certified by the department. Fallow deer farms allowed to operate under partial certification when the fallow deer regulations were initially adopted in 1994 may satisfy the requirements for full certification set forth in this section.

(1) Full Certification. Fully certified fallow deer farms shall comply with the following requirements:

(A) Marking. All fallow deer shall be marked in such a manner that they are individually identifiable as stock of the permittee.

(B) Testing. All fallow deer six months of age or older shall undergo two tests, at least 12 months apart, for tuberculosis and one test for brucellosis within three years of the owner being granted a fallow deer farming permit, unless the fallow deer were obtained from a fully certified herd in the state. Tests shall be administered and interpreted by a U.S. Department of Agriculture accredited veterinarian approved by the department.

(C) Negative Herd Status. Full certification will not be granted unless negative herd status (not having a significant possibility of being infected) is determined by the department.

(D) Movement of Live Fallow Deer. Only fully certified fallow deer farms in full compliance with the provisions of subsection (f) of this section may serve as sources within California for stock for new fallow deer farms. Fully certified fallow deer farms may sell, trade or transport live fallow deer to any person in California in possession of a valid fallow deer farming permit issued by the department. Permittees shall maintain records of such transactions, including the number of fallow deer transferred, identification of individual fallow deer and the name and address of the person receiving the fallow deer. The provisions of subsection (e) of this section shall be complied with when importing fallow deer stock from outside of California.

(2) Existing Partially Certified Fallow Deer Farms. Existing partially certified fallow deer farms must comply with the following requirements:

(A) Marking. All fallow deer should be marked in such a manner that they are individually identifiable as stock of the permittee.

(B) Prohibition on Movement of Live Fallow Deer. Partially certified fallow deer farmers shall not sell, trade or transport, except to slaughter, live fallow deer in California.

(d) Sale of Meat. Fallow deer farmers may sell the meat of slaughtered fallow deer to persons within or outside of California. A receipt shall be

prepared and included with each shipment of meat. This receipt shall show the date of the transaction, identify the quantity of meat sold and bear the name and permit number of the fallow deer farmer selling the meat. A copy of the receipt shall be retained by the permittee for a period of one year after the date of transaction. Any person may obtain meat from a fallow deer farmer and sell it to the ultimate consumer. No permit is required of persons reselling meat obtained from fallow deer farmers. (Note: Fallow deer shall be humanely slaughtered in compliance with Penal Code Section 597.)

(e) Importation of Fallow Deer for Farming. Fallow deer shall not be imported into California for the purposes of farming. except as provided by these regulations.

(1) Importation Application Requirement. A Fallow Deer Farming Importation Application, LRB 1676A (3/97), which is incorporated by reference herein, shall be completed in its entirety by permittees wishing to obtain fallow deer stock from outside California. This application and documentation identified below shall be submitted to the Department of Fish and Game, Wildlife Investigations Laboratory, 1701 Nimbus Road, Suite D, Rancho Cordova, California 95670. Application forms are available at this address. The approved Fallow Deer Farming Importation Application form must accompany the imported fallow deer stock.

(2) Health Certificate Requirement. A health certificate issued by a U.S. Department of Agriculture accredited veterinarian or other person who has obtained a degree in veterinary medicine from a college or university accredited by the American Veterinary Medical Association in the state from which the fallow deer stock is being shipped shall accompany the imported fallow deer stock. This health certificate shall contain the methods used for testing, the results of the testing and be correlated to identifying markings on fallow deer tested.

(3) Copy of Official Test Results Required. A copy of the official results from tests conducted in the state of origin shall be submitted with the Fallow Deer Farming Importation Application form. Information on the test methods used and the results for each fallow deer tested shall be included.

(4) Disease Tests Required.

(A) Bovine Tuberculosis Testing. The herd of origin shall have undergone official testing for bovine tuberculosis within 24 months of importation of fallow deer, using a Single Cervical Tuberculin (SCT) Test or a Blood Tuberculosis (BTB) Test. All fallow deer six months of age or older shall be tested for tuberculosis within 120 days prior to entry into California and shall have been classified negative for tuberculosis based upon an official test. (Note: It is recommended that imported fallow deer be tested 90–120 days after importation.)

(B) Brucellosis. The veterinarian issuing the health certificate shall attest that the fallow deer to be imported into California are not known to be infected with brucellosis and that the animals have not been in contact with animals of unknown brucellosis status. Fallow deer six months of age or older shall be tested for brucellosis within 30 days of entry into California.

(C) Other Disease Testing. The department shall reserve the right to require additional testing prior to importation when there is reason to believe other diseases, parasites or other health risks are present. The department shall provide written notification if such testing is required.

(f) Disease Prevention and Control.

(1) Herd Testing for Bovine Tuberculosis. Testing is not required if no fallow deer have been added to the herd except by birth and if imported fallow deer have been properly tested.

(2) Issuance of Hold Order if Herd Test is Positive. If a herd is found positive for bovine tuberculosis, a hold order will be issued by the State Animal Health Official, (the chief veterinarian or official for a state animal disease control program), and an epidemiologic evaluation of all fallow deer in the herd must be conducted by a State or USDA veterinarian. If the epidemiologic evaluation indicates a negative herd status, the hold order shall be removed. If the epidemiologic evaluation indicates a positive herd status (having a significant possibility of being infected), the herd shall be classified as infected. Positive status fallow deer shall be identified, and the department shall issue a hold order for the herd. The permittee shall immediately prepare a written plan for eliminating bovine tuberculosis from the herd. When this plan is approved by the department it shall constitute a memorandum of understanding between the permittee, the state and appropriate federal agencies to eliminate bovine tuberculosis from the infected herd. The department shall make every reasonable effort to minimize economic loss to the impacted permittee. (Note: The state has no indemnification for depopulation of an infected herd).

(3) Other Disease Testing. The department shall reserve the right to additional testing when there is reason to believe other diseases, parasites or other health risks are present. The department shall notify the permittee in writing if such testing is required.

(4) Retention of Health Records. The permittee shall maintain all health records of individual fallow deer for a minimum of three years.

(g) Facility and Maintenance Requirements. The following general housing and maintenance provisions shall be complied with in rearing fallow deer for fallow deer for farming:

(1) An enclosure shall provide no less than 800 square feet of area for one animal and another 200 square feet for each additional fallow deer.

(2) Perimeter fences shall be eight feet in height and shall be constructed of a minimum of 12.5 gauge woven wire or equivalent. Posts shall be of structurally sound 4 x 4 wood or equivalent.

(3) Natural or artificial shelter from the elements shall be provided for all animals.

(4) Potable water shall be provided for fallow deer at all times.

(5) Fallow deer shall be observed every day by the person in charge of the care of the animals or by someone working under his/her direct supervision. Sick or diseased, stressed, injured or lame fallow deer shall be provided with veterinary care or humanely destroyed.

(h) Availability of Records and Inspection of Facility by Department. Any person holding a fallow deer farming permit authorized under this section shall allow the department's employees to enter his/her premises upon request at a reasonable hour, to inspect facilities, fallow deer restraining equipment and fallow deer possessed by the permittee, or to inspect records required to be maintained by these regulations or federal regulations relating to fallow deer farming.

NOTE: Authority cited: Sections 1002, 2120, 2150 and 2150.2, Fish and Game Code. Reference: Sections 2116.5, 2120, 2124, 2150, 2150.2, 2150.4, 2150.5, 2151, 2185, 2186, 2187, 2189, 2190, 2350 and 2355, Fish and Game Code.

HISTORY

1. New section filed 12–7–94; operative 12–7–94 pursuant to Government Code section 11346.2(d) (Register 94, No. 49).
2. Amendment filed 5–20–97; operative 5–20–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 21).

§ 677. Dog Training and Field Trials.

(a) Dog Training When No Wild Birds Are Captured, Injured, or Killed. Notwithstanding Section 265 of these regulations, a person may train dogs to retrieve, or to point or flush game birds, or may train for or participate in field trails or similar events related to these activities, at any time of year from sunrise to sunset if no wild birds are captured, injured, or killed. Domestically reared birds may be released and taken for dog training or field trials only as provided in Section 677(b). Dogs shall not be trained on or otherwise be allowed to pursue any birds that have special protection under California or federal law, including but not limited to fully protected birds (Section 3511 of the Fish and Game Code) and endangered, threatened or candidate species (Section 670.5 of these regulations and Code of Federal Regulations, Title 50, Section 17.11).

(b) Release and Take of Birds. Notwithstanding Section 671.6 of these regulations, bobwhite and coturnix quail, domestic pigeons, and the following domestically reared game birds may be released and/or taken during dog training or organizational field trials in accordance with subsections (b)(1) through (b)(5) of this section, general resident game bird regulations, or licensed game bird club regulations: pheasants (*Phasianus colchicus*), including all ring–necked pheasant races, chukar, Hungarian partridge and captive–reared mallard ducks.

(1) Hunting License Required. Each person taking domestically reared game birds must possess a valid California hunting license. In

addition, each person, except holders of junior hunting licenses, taking Hungarian partridge, ring-necked pheasant, and chukar must possess a valid Upland Game Bird Stamp.

(2) Prior Notification Required. Persons releasing and/or taking game birds in accordance with this section during organized field trials or hunt tests shall provide the Department's regional office in the region where the birds will be released and/or taken the following information at least three business days prior to the activity. This notification shall be in letter form, by fax, or by internet. The information required includes:

(A) The name, address, and telephone number of the person providing the information.

(B) The location that birds will be released and/or taken.

(C) The approximate number of each species of bird that will be released and/or taken.

(D) The approximate number of persons who will be involved in the release and/or take.

(E) The date and time that birds will be released and/or taken.

For any event where more than one person may be taking birds, only a single notification is required.

(3) Restrictions On Daily Take.

(A) Domestically reared game birds may be taken only on the day they are released, except when taken pursuant to general resident game bird regulations.

(B) Bobwhite quail and coturnix quail released for dog training or field trial purposes may be taken on any day.

(4) Marking of Birds.

(A) Prior to Release. If the Department determines that there is a need to distinguish domestically reared game birds used for dog training or field trials from other game birds at a particular location or event, the Regional Manager may require that some or all species of domestically reared game birds used for dog training or field trials be marked with streamers, coloring, or other conspicuous material prior to their release.

(B) Carcass. The carcass of each pheasant and chukar shall be tagged with a seal as provided by Section 3206 of the Fish and Game Code. The carcasses of bobwhite quail and coturnix quail need not be tagged. While in the field, all birds must be in a condition that the species can be identified.

(5) Inspection of Birds. The department may inspect all birds prior to their release and no birds may be released if the department determines that such releases may have significant potential to transmit diseases to wild bird populations.

NOTE: Authority cited: Sections 200, 202, 203, 3508 and 3516, Fish and Game Code. Reference: Sections 86, 203, 2080, 3500, 3502, 3508, 3511 and 3513–3516, Fish and Game Code.

HISTORY

1. New section filed 4–15–68; effective thirtieth day thereafter (Register 68, No. 16).
2. Amendment filed 7–11–73; effective thirtieth day thereafter (Register 73, No. 28).
3. Amendment of subsection (c)(1) filed 6–11–79; effective thirtieth day thereafter (Register 79, No. 24).
4. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
5. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
6. Change without regulatory effect amending NOTE filed 8–21–2003 pursuant to section 100, title 1, California Code of Regulations (Register 2003, No. 34).
7. Amendment of section heading, section and NOTE filed 6–15–2004; operative 7–15–2004 (Register 2004, No. 25).

§ 678. Captive Raptor Breeding.

(a) General Provisions. No person shall engage in any activity related to the propagation of raptors except as provided by the Fish and Game Code and regulations provided herein. Applicable regulations adopted by the U.S. Secretary of the Interior pursuant to the Migratory Bird Treaty Act and published in Title 50, Code of Federal Regulations (CFR), Part 21 (Revised 9/14/89) are hereby incorporated and made available upon request from the Department of Fish and Game, Wildlife Protection Division, 1416 Ninth Street, Box 944209, Sacramento, CA 94244–2090.

(b) Department Inspections. The department may enter the premises of any permittee at any reasonable hour to inspect all housing, equipment, or raptors possessed by the permittee, or to inspect, audit, or copy any permit, book, or record required to be kept by these regulations.

HISTORY

1. New section filed 1–10–80; effective thirtieth day thereafter (Register 80, No. 2).
2. Repealer and new section filed 10–23–81; effective thirtieth day thereafter (Register 81, No. 43).
3. Amendment of subsection (a)(8) filed 10–15–85; effective upon filing (Register 85, No. 42).
4. Amendment of subsection (b) filed 7–28–88; operative 8–27–88 (Register 88, No. 32).
5. Amendment of subsection (a)(17) and (b) filed 6–6–90; operative 6–6–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 30).
6. Amendment filed 7–7–93; operative 7–7–93 (Register 93, No. 28).
7. Change without regulatory effect amending subsection (a) filed 9–8–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 37).

§ 679. Possession of Wildlife and Wildlife Rehabilitation.

(a) General Prohibition on Possession of Wildlife. Except as provided in subsection (b) below or as otherwise authorized, it is unlawful for any person to possess any live game mammal or bird, nongame mammal or bird, furbearer, reptile or amphibian.

(b) Temporary Confinement of Wildlife. Except for big game mammals listed in Section 350, Title 14, CCR, injured, diseased or orphaned animals may be temporarily confined by persons if they notify the nearest regional office of the department within forty-eight (48) hours of finding or confining such wildlife. Notification shall include name and address; the species of wildlife and a description of its injury, disease or condition; the date and location the wildlife was found; and the location where the wildlife is confined. Confined animals must be disposed of pursuant to department direction, which may include placement in a department-approved wildlife rehabilitation facility. (Department offices: Northern Region (Redding), North Central Region (Rancho Cordova), Bay Delta Region (Yountville), Central Region (Fresno), South Coast Region (San Diego), Inland Deserts Region (Ontario), and Marine Region (Monterey).)

(c) Prohibition on Possession of Big Game Mammals or Fully Protected, Threatened or Endangered Species Except Under Department Permit. No person or wildlife rehabilitation facility may possess any big game mammal listed in Section 350, Title 14, CCR, or any fully protected, endangered or threatened bird, mammal, fish, reptile or amphibian without specific written authorization from the department.

(d) Prohibition on Picking up Disabled Wildlife in a Department Designated Oil/Toxic Spill Area. No person may enter a department designated oil/toxic spill area for the purpose of picking up disabled wildlife or transport or possess wildlife disabled by an oil spill or other spilled toxic substance unless that person has completed the training required by subsections 817.02(i) and (j), Title 14, CCR, and has authorization from the department. Designated oil/spill areas shall be clearly posted by the department.

(e) Wildlife Rehabilitation Facilities.

(1) Wildlife Rehabilitation Facility Defined. For the purposes of these regulations, a wildlife rehabilitation facility is defined as a site where activities are undertaken to restore to a condition of good health, for the purpose of release to the wild, animals occurring naturally and not normally domesticated in this state.

(2) Approval of Wildlife Rehabilitation Facility.

(A) The department may approve and issue a permit in the form of a Memorandum of Understanding (MOU) to only those wildlife rehabilitation facilities which meet the wildlife care standards set forth in the Minimum Standards for Wildlife Rehabilitation, 2000, Third Edition manual published jointly by the International Wildlife Rehabilitation Council and the National Wildlife Rehabilitators Association; or as provided in the MOU. The above wildlife care standards are hereby adopted and

made a part of this Title 14. All wildlife rehabilitation facilities, regardless of when established, shall comply with the wildlife care standards.

(B) A person seeking a MOU with the department for operating a new wildlife rehabilitation facility shall submit to the department two letters from permitted facilities in the nearby vicinity (the permitted facilities will be identified by the department), stating that they believe there is a need for a new facility. Within 30 days of receiving the letters, the department will provide a written determination stating whether such a facility is needed. If the department determines that there is not a need for a new facility the applicant may request a hearing before the commission to show cause why their permit request should not be denied. If the department determines that a new wildlife rehabilitation facility is needed, that person shall submit, along with this written determination, an application packet to the department that contains all of the following:

1. A complete application form "Wildlife Rehabilitation Permit Application/Renewal form," FG 542 (Rev 03/07) which is hereby incorporated by reference;

2. Documentation of the applicant's experience working (paid or unpaid) at a permitted wildlife rehabilitation facility. The applicant must document four hundred hours within a two year period of experience working with a permitted wildlife rehabilitation facility in California, or experience that the department determines is equivalent, to be eligible for a permit.

3. A letter from a veterinarian who agrees to sponsor the applicant by overseeing diagnoses, medication and surgical procedures by the proposed facility.

4. Pictures or diagrams of the proposed facility's caging or proposed caging sufficient to demonstrate that the caging will be appropriate for the types of animals the facility is planning to rehabilitate and will comply with the standards identified in subsection (e)(2)(A).

5. A statement of general intent that includes a list of the species and number of animals that the applicant proposes to rehabilitate and hold at the proposed facility; and plans describing the proposed facility's record–keeping system, animal intake process, euthanasia protocol, plan for carcass disposal, protocol for handling public phone calls, volunteer training protocol, animal diets, and disinfectant and disease control protocols. Plans provided as part of this statement must be consistent with the requirements of subsection (f) and the standards identified in subsection (e)(2)(A).

6. Payment of a non–refundable application processing fee of $41.00 and an inspection fee of $114.54 to be determined by the department pursuant to Fish and Game Code Section 2150.2 and adjusted annually pursuant to Fish and Game Code Section 713.

(C) The department shall determine whether the application is complete and request any additional information it believes is necessary to evaluate the proposal. The department may enter into a MOU with the California Council for Wildlife Rehabilitators (CCWR) for the purpose of obtaining CCWR's assistance with processing and evaluating applications. Such assistance may include but is not limited to helping review and evaluate applications, inspecting proposed facilities, and preparing recommendations to the department. Any MOU between the department and CCWR may also provide for payment by the department from revenue generated by the application and inspection fees collected under subsection (e)(2) to reimburse CCWR's expenses in providing assistance to the department. Within sixty days of receiving the application, the department shall make a determination that the applicant and the proposed facilities meet the requirements in subsection (e)(2). If the department determines that the application is incomplete or that the applicant or the proposed facilities do not meet the requirements in subsection (e)(2), the department shall deny the permit and will return the inspection fee.

(D) If the department determines that the application is complete and that the applicant and the proposed facilities meet the requirements in subsection (e)(2), the proposed facility shall be inspected by the department, CCWR or another designee. Failure to cooperate with inspectors provided by the department, CCWR or another designee may result in application denial.

(E) After inspection of the proposed facility, the department shall approve a MOU to permit a new wildlife rehabilitation facility only if the applicant and facility meets all applicable standards specified above. The department may deny a permit if the applicant has failed to allow an inspection of the proposed facility by the department or its designee or it is found that the facility does not meet the minimum standards. An applicant has one year to build the proposed facility from the time the MOU is signed by both parties. If the applicant has not built the proposed facility within one year of when the MOU was signed the permit will be revoked. Any person denied a permit under these regulations may request a hearing before the commission to show cause why their permit request should not be denied. MOU will be valid for three years. At the end of three years if a permittee wishes to renew a wildlife rehabilitation permit, a permit renewal form FG 542 (Rev 03/07) will be submitted along with a processing fee of $41.00 pursuant to Fish and Game Code Section 2150.2 and adjusted annually pursuant to Fish and Game Code 713.

(f) Provisions Related to the Operation of a Wildlife Rehabilitation Facility.

(1) Responsibility for Costs Incurred. The operator of a wildlife rehabilitation facility shall be responsible for any and all costs incurred in connection with the treatment, confinement or transportation of wildlife.

(2) Liability. The operator of a wildlife rehabilitation facility shall indemnify, defend and save harmless the State, its officers, agents, and employees from any and all claims and losses occurring or resulting to any person or property in connection with the treatment, confinement or transportation of wildlife.

(3) Restrictions Related to Holding Wildlife. Wildlife temporarily held for rehabilitation must be maintained separate from domestic animals and shall not be displayed to the public. Such wildlife shall have minimal direct human contact. Every effort shall be made to prevent imprinting.

(4) Department Approval Requirement for Release of Wildlife Back into the Wild. Rehabilitated wildlife may be released back into the wild only as directed by the department. The department may provide bands and tags for rehabilitated wildlife when deemed necessary by the department. If any animal cannot be released, it shall be transferred to a zoological garden, museum, college, university or other educational/research institution or wildlife exhibitor. If it cannot be released or transferred, it shall be humanely euthanized. These regulations do not authorize any person, facility or organization to accept, possess or relocate nuisance wildlife. Any healthy wildlife trapped in towns or cities or removed from under buildings or otherwise taken or trapped in accordance with Section 4152 or 4180, Fish and Game Code shall be immediately released in the area where trapped or disposed of as directed or authorized by the department. Any such wildlife that has been determined by a veterinarian to be so seriously ill that it cannot be treated shall be euthanized and tested as directed by the appropriate county public health agency or the department.

(5) Notification Requirement for Dead or Diseased Animals. The operator of a wildlife rehabilitation facility shall notify the nearest department region office within twenty–four (24) hours if any animal dies of a disease specified in the facility's permit or is suspected to have died from one of those diseases and shall make the dead animal available for delivery to the department or other facility as directed by the department.

(6) Written Record Requirement. The operator of a wildlife rehabilitation facility shall maintain a written record for each animal being cared for. This record shall include the name and address of the person finding the animal, the location where the animal was found (when available), a description of its condition and treatment, the dates it was received and transferred from the facility and the location of its final disposition.

(7) Availability of Records. The operator of a wildlife rehabilitation facility shall make all records, wildlife being rehabilitated and any materials used for the confinement, treatment, or care of wildlife, available for inspection by department employees or employees of the Department of Food and Agriculture or Department of Health Services or any other person authorized to enforce these regulations.

(8) All wildlife rehabilitation facility personnel, professional and volunteer, shall satisfactorily complete one department-approved wildlife rehabilitation training session each year. Training may include sessions of wildlife identification, wildlife capture and restraint, wildlife laws and regulations, veterinary medical and other subjects approved by the department. The training shall be a minimum of two hours.

(g) Compliance With Other Restrictions. These regulations, or any permit issued pursuant thereto, do not authorize possession of any wild animal in violation of any other Federal, state, city, or county law, ordinance or regulation, including but not limited to any California Department of Health Services Rabies Control regulations.

NOTE: Authority cited: Sections 200, 1050, 2000, 2127, 2150.2, 3005.5, 3800 and 4150, Fish and Game Code. Reference: Sections 200, 713, 1008, 2000, 2001, 2150.4, 2192, 3005.5, 3511, 3800, 4150, 4190 and 4800, Fish and Game Code; and Section 8670.61.5, Government Code.

HISTORY

1. New section filed 8-8-94; operative 9-7-94 (Register 94, No. 32).
2. Editorial correction of subsections (a) and (f)(1) (Register 2007, No. 12).
3. Amendment of section and NOTE filed 4-2-2007; operative 4-2-2007 pursuant to Government Code section 11343.4 (Register 2007, No. 14).

§ 680. Propagation, Sale, Transportation and Release of Birds or Mammals by Domestic Game Breeders, Licensed Pheasant Clubs, or Domestic Migratory Game Bird Shooting Areas.

(a) For the purpose of this section, a diseased bird or mammal is one that carries a disease which is detrimental to wild populations.

(b) No birds or mammals, designated by the department to be diseased, shall be propagated, sold, transported, released, or otherwise disposed of without a free written permit issued by the department.

NOTE: Authority cited: Sections 2120, 3302, 3303 and 3516, Fish and Game Code. Reference: Sections 2116, 2118.2, 2118.4, 2119-2155, 2185-2191, 3270.5, 3274, 3281-3283, 3287-3300, 3302-3305, 3307, 3311 and 3500-3517, Fish and Game Code.

HISTORY

1. New section filed 7-19-76 as an emergency; effective upon filing (Register 76, No. 30).
2. Certificate of Compliance filed 10-19-76 (Register 76, No. 43).
3. Amendment of NOTE filed 7-16-81; effective thirtieth day thereafter (Register 81, No. 29).
4. Editorial correction of NOTE filed 9-20-85; effective thirtieth day thereafter (Register 85, No. 38).
5. Amendment of subsection (b) filed 4-18-91; operative 5-18-91 (Register 91, No. 21).

§ 690. Captive Breeding of Albino Native Reptiles and Amphibians.

NOTE: Authority cited: Sections 5061 and 6896, Fish and Game Code. Reference: Sections 5061 and 6896, Fish and Game Code.

HISTORY

1. New section filed 10-1-82; effective thirtieth day thereafter (Register 82, No. 40).
2. Repealer filed 4-23-92; operative 5-25-92 (Register 92, No. 20).

§ 695. Taxidermists.

(a) Records: Every person who prepares, stuffs or mounts the skin or any part of any fish, reptile, bird or mammal for another person shall keep an accurate record of all fish, reptile, bird or mammal carcasses, skins or parts thereof received, acquired, stored or possessed for taxidermy purposes. Such record shall include the following:

(1) The name and address of the person from whom each specimen is received;

(2) The name and address of the owner of each specimen received, including the hunting or fishing license number and license tag number (if applicable);

(3) A description of each specimen, including the species of fish, reptile, bird or mammal, and the part of the animal received;

(4) The name and address of the person to whom each processed specimen is delivered;

(5) The date each specimen is received, and the date the processed specimen is delivered;

(6) A copy of the declaration of entry or the bill of lading accompanying all fish, reptile, bird or mammal carcasses, skins or parts thereof which are received or delivered from out of state required pursuant to section 2353 of the Fish and Game Code shall be retained.

(b) Immediate Recording: Upon receiving a fish, reptile, bird or mammal or part thereof, the information required in this regulation shall be immediately recorded.

(c) Inspection and Retention of Records: The records required by this regulation shall be open for inspection by department employees upon request. The records shall be retained for a period of one year, except that such record shall be retained permanently for any unclaimed or unredeemed specimen.

(d) Sale of Unclaimed or Unredeemed Specimens: Every person who prepares, stuffs or mounts the skin or any part of fish, reptiles, bird or mammal for another person and who keeps the records provided in (a) may sell unclaimed or unredeemed skins under the following conditions:

(1) A notice shall be posted where it is visible to all persons who bring skins to a taxidermist for preparation, stuffing, or mounting, stating that the skins will be sold pursuant to chapter 6 (commencing with section 3046) of part 4 of division 3 of the Civil Code if unclaimed or unredeemed by the owner.

(2) The department shall, upon request, be provided with the name and address of any person who has failed to claim or redeem any skin or part thereof.

(3) The sale price of any prepared, stuffed, or mounted skin or part thereof, shall not exceed the actual cost of labor, preparation and advertising costs relating to the sale, less any amount already paid by the owner of the skin for its preparation, stuffing, or mounting.

(4) No skin or part of any fully protected, rare, or endangered species of fish, reptile, bird or mammal may be sold.

(5) No skin or part of any migratory bird covered by the federal Migratory Bird Treaty Act or Bald Eagle Act may be sold without approval of the U.S. Fish and Wildlife Service.

(6) The notice to customers required in (1) above shall include a copy of subdivision (d) of this regulation.

NOTE: Authority cited: Section 3087, Fish and Game Code. Reference: Section 3087, Fish and Game Code.

HISTORY

1. New section filed 7-31-75; effective thirtieth day thereafter (Register 75, No. 31).
2. Amendment filed 3-16-77; effective thirtieth day thereafter (Register 77, No. 12).
3. Amendment of subsection (a), renumbering of subsection (a)(5) to subsection (b), subsection (a)(6) to subsection (c), and prior subsection (b) to subsection (d) and changes without regulatory effect pursuant to section 100, title 1, California Code of Regulations, in new subsections (b), (c) and (d) filed 4-18-91; operative 5-18-91 (Register 91, No. 19).

§ 696. Fur Dealer and Fur Agent Licenses.

(a) Fur Dealer License. Every person engaging in, carrying on, or conducting, wholly or in part, the business of buying, selling, trading or dealing in raw furs of furbearing mammals or nongame mammals shall first procure a fur dealer license.

Each licensed fur dealer shall submit, not later than July 1, to the department at 1416 Ninth Street, Sacramento, California 95814, an annual report on forms provided by the department.

(b) Fur Agent License. Any person employed by a licensed fur dealer to engage in the business of buying, selling, trading or dealing in raw furs only on behalf of the fur dealer, and not on his own behalf, shall first procure a fur agent license, providing that the fur dealer employing that person has submitted the annual report required in (a) above. Such licenses shall be valid for a term of one year from July 1, or if issued after the beginning of such term, for the remainder thereof.

(c) It shall be unlawful for any fur dealer or fur agent to purchase the raw fur of any furbearing mammal or nongame mammal from any person who does not hold a valid trapping license, fur dealer license, or fur agent license.

NOTE: Authority cited: Sections 4009.5, 4042 and 4150, Fish and Game Code. Reference: Sections 4009.5, 4030–4043 and 4150, Fish and Game Code.

HISTORY

1. New section filed 1–10–80 as an emergency; effective upon filing (Register 80, No. 2). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 5–10–80.
2. Certificate of Compliance filed 2–7–80 (Register 80, No. 6).
3. Repealer and new section filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).

§ 699. Fees.

Pursuant to the provisions of section 1050 of the Fish and Game Code, and in compliance with the provisions of section 713 of said Code, the Department shall annually adjust the fees of all licenses, certificates, permits and license tags, or other entitlement required by regulations set forth in this title 14.

(a) Base Year. Unless otherwise specified by the Fish and Game Code, or regulations adopted pursuant thereto, the base year for establishment of fees shall be 1991, or the year in which the license, certificate, permit or license tag was established after 1991.

(b) Permit Fees: Unless otherwise provided in this title 14 or in the Fish and Game Code, the Department shall charge a fee of thirty dollars ($30.00) for any permit issued pursuant to these regulations.

NOTE: Authority cited: Sections 240, 713 and 1050, Fish and Game Code. Reference: Sections 240, 713 and 1050, Fish and Game Code.

HISTORY

1. New section filed 11–27–89 as an emergency; operative 11–27–89 (Register 90, No. 4). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 3–27–90.
2. New section filed 7–3–90; operative 7–3–90 (Register 90, No. 35).
3. Amendment of subsection (a) including renumbering of first sentence to undesignated introductory paragraph, repealer and new subsection (b) filed 4–18–91; operative 5–18–91 (Register 91, No. 21).

§ 699.5. Fees for Lake and Streambed Alteration Agreements.

(a) Definitions.

(1) For purposes of this section, the following definitions apply:

(A) "Activity" means any activity that by itself would be subject to subdivision (a) of section 1602 of the Fish and Game Code.

(B) "Agreement" means a lake or streambed alteration agreement issued by the department.

(C) "Agreement for routine maintenance" means an agreement that: (1) covers only multiple routine maintenance projects that the entity will complete at different time periods during the term of the agreement; and (2) describes a procedure the entity must follow for any maintenance projects the agreement covers.

(D) "Agreement for timber harvesting" means an agreement of five years or less that covers one or more projects that are included in a timber harvesting plan approved by the California Department of Forestry and Fire Protection.

(E) "Department" means the California Department of Fish and Game.

(F) "Extension" means either a renewal of an agreement executed prior to January 1, 2004, or an extension of an agreement executed on or after January 1, 2004.

(G) "Master agreement" means an agreement with a term of greater than five years that: (1) covers multiple projects that are not exclusively projects to extract gravel, sand, or rock; not exclusively projects that are included in a timber harvesting plan approved by the California Department of Forestry and Fire Protection; or not exclusively routine maintenance projects that the entity will need to complete separately at different time periods during the term of the agreement; and (2) describes a procedure the entity must follow for construction, maintenance, or other projects the agreement covers.

An example of a project for which the department would issue a master agreement is a large–scale development proposal comprised of multiple projects for which specific, detailed design plans have not been prepared at the time of the original notification. The master agreement will specify a process the department and entity will follow before each project begins and may identify various measures the entity will be required to incorporate as part of each project in order to protect fish and wildlife resources. As a general rule, the process specified in the master agreement will require the entity to notify the department before beginning any project the agreement covers and submit a fee based on the cost of the project. After the department receives the notification, it will confirm that the master agreement covers the project and propose measures to protect fish and wildlife resources in addition to any included in the master agreement, if such measures are necessary for the specific project. A master agreement will typically, but not always, encompass one or more watersheds and/or relate to a habitat conservation plan or natural community conservation plan. By contrast, if the large–scale development proposal is comprised of, for example, multiple residences, golf courses, and associated infrastructure projects for which specific, detailed design plans have been prepared by the time the entity notifies the department and the entity is ready to begin those projects, the department would issue the entity a standard agreement.

(H) "Master agreement for timber operations" means an agreement with a term of greater than five years that: (1) covers timber operations on timberland that are not exclusively projects to extract gravel, sand, or rock; not exclusively projects that are included in a timber harvesting plan approved by the California Department of Forestry and Fire Protection; or not exclusively routine maintenance projects that the entity will need to complete separately at different time periods during the term of the agreement; and (2) describes a procedure the entity must follow for construction, maintenance, or other projects the agreement covers. For the purposes of this definition, "timberland" and "timber operations" have the same meaning as those terms are defined in sections 4526 and 4527 of the Public Resources Code, respectively.

(I) "Project" means either of the following as determined by the department:

1. One activity. An example of such a project is one that is limited to the removal of riparian vegetation at one location along the bank of a river, lake, or stream that will substantially change the bank.

2. Two or more activities that are interrelated and could or will affect similar fish and wildlife resources. An example of such a project is the construction of one bridge across a stream that requires the removal of riparian vegetation, the installation of abutments in or near the stream, and the temporary de–watering of the stream using a diversion structure. Each of those three activities together would constitute one project for the purpose of calculating the fee under this section because they are all related to the single purpose of constructing one bridge at one location. By contrast, the construction of three bridges and two culverts across a stream at five different locations would not constitute one project, but instead would constitute five projects, even if each structure were to provide access to a common development site and/or were physically connected to each other by a road.

"Project" does not mean project as defined in section 21065 of the Public Resources Code or section 15378 of title 14 of the California Code of Regulations.

(J) "Standard agreement" means any agreement other than an agreement for gravel, rock, or sand extraction, an agreement for timber harvesting, an agreement for routine maintenance, a master agreement, or a master agreement for timber operations.

(b) Standard Agreement.

(1) Fee if the term of the agreement is 5 years or less:

(A) $200 if the project costs less than $5,000.

(B) $250 if the project costs from $5,000 to less than $10,000.

(C) $500 if the project costs from $10,000 to less than $25,000.

(D) $750 if the project costs from $25,000 to less than $100,000.

(E) $1,100 if the project costs from $100,000 to less than $200,000.

(F) $1,500 if the project costs from $200,000 to less than $350,000.

(G) $2,250 if the project costs from $350,000 to less than $500,000.

(H) $4,000 if the project costs $500,000 or more.

(2) Fee if the term of the agreement is longer than 5 years:

(A) $2,400 base fee, plus the fee specified in subdivision (b), paragraph (1).

(3) For the purpose of this subdivision, project cost means the cost to complete each project for which notification is required.

(4) As a general rule, a notification for a standard agreement should identify only one project. If an entity chooses to identify more than one project in a single notification, the department may require the entity to separately notify the department for one or more of the projects included in the original notification based on their type or location. If the notification includes more than one project, the fee shall be calculated by adding the separate fees for each project. For example, if a notification identifies three projects, one of which will cost less than $5,000 to complete, one of which will cost $7,500 to complete, and one of which will cost $17,500 to complete, the fee for the first project would be $200, the fee for the second project would be $250, and the fee for the third project would be $500. Hence, the total fee the entity would need to submit with the notification that identifies those three projects would be $950.

(5) An entity may not obtain a standard agreement for any project identified in the notification that qualifies for an agreement for gravel, rock, or sand extraction, an agreement for timber harvesting, an agreement for routine maintenance, a master agreement, or a master agreement for timber operations unless the department agrees otherwise.

(6) Fee submittal:

(A) If the entity requests an agreement with a term of 5 years or less, the fee specified in paragraph (1) must be submitted with the notification.

(B) If the entity requests an agreement with a term longer than 5 years, the fee specified in paragraph (2) must be submitted with the notification.

(c) Agreement for Gravel, Sand, or Rock Extraction.

(1) Fee if the term of the agreement is 5 years or less:

(A) $500 if the annual extraction volume identified in the notification is less than 500 cubic yards.

(B) $1,000 if the annual extraction volume identified in the notification is 500 to less than 1,000 cubic yards.

(C) $2,500 if the annual extraction volume identified in the notification is 1,000 to less than 5,000 cubic yards.

(D) $5,000 if the annual extraction volume identified in the notification is 5,000 or more cubic yards.

(2) Fee if the term of the agreement is longer than 5 years:

(A) $10,000 base fee, plus an annual fee of $1,000.

(3) Fee submittal:

(A) If the entity requests an agreement with a term of 5 years or less, the fee specified in paragraph (1) must be submitted with the notification.

(B) If the entity requests an agreement with a term longer than 5 years, the base fee specified in paragraph (2) must be submitted with the notification.

(d) Agreement for Timber Harvesting.

(1) Fee:

(A) $1,200 base fee, plus $100 for each project.

(2) Fee submittal:

(A) The fee specified in paragraph (1) must be submitted with the notification.

(e) Agreement for Routine Maintenance.

(1) Fee if the term of the agreement is 5 years or less:

(A) $1,200 base fee, plus $100 for each maintenance project completed per calendar year.

(2) Fee if the term of the agreement is longer than 5 years:

(A) $2,400 base fee, plus $100 for each maintenance project completed per calendar year.

(3) Fee submittal:

(A) If the entity requests an agreement with a term of 5 years or less, the base fee specified in paragraph (1) at a minimum must be submitted with the notification.

(B) If the entity requests an agreement with a term longer than 5 years, the base fee specified in paragraph (2) at a minimum must be submitted with the notification.

(f) Master Agreement.

(1) Fee:

(A) $30,000 base fee, plus:

1. An annual fee of $2,500, unless the department specifies otherwise.

2. $250 for each project the agreement covers, unless the department specifies otherwise.

(2) Fee submittal:

(A) The base fee specified in paragraph (1) at a minimum must be submitted with the notification.

(g) Master Agreement for Timber Operations.

(1) Fee:

(A) $7,500 base fee, plus:

1. An annual fee of $1,000, unless the department specifies otherwise.

2. $100 for each project the agreement covers, unless the department specifies otherwise.

(2) Fee submittal:

(A) The base fee specified in paragraph (1) at a minimum must be submitted with the notification.

(h) If an entity chooses to identify more than one project in a single notification, the total fee may exceed $5,000 regardless of the term of the agreement.

[The next page is 190.3.]

(i) Extensions for Agreements.

(1) Fee:

(A) $200.

(2) Fee submittal:

(A) The fee specified in paragraph (1) must be submitted with the request for an extension.

(3) For the purpose of this subdivision and subdivisions (j) and (k), an extension is not an amendment.

(j) Minor Amendments.

(1) Fee:

(A) $150.

(B) For the purpose of this subdivision, a minor amendment is one that would not significantly modify the scope or nature of any project covered by the agreement or any measure included in the agreement to protect fish and wildlife resources.

(k) Major Amendments.

(A) $500.

(B) For the purpose of this subdivision, a major amendment is one that would significantly modify the scope or nature of any project covered by the agreement or any measure included in the agreement to protect fish and wildlife resources, or require additional environmental review pursuant to section 21000 *et seq.* of the Public Resources Code or section 15000 *et seq.* of title 14 of the California Code of Regulations.

(C) A project may not be added to an agreement by amendment unless the agreement specifies otherwise.

(*l*) California Environmental Quality Act ("CEQA").

(1) When the department is required to act as lead agency in administering or enforcing sections 1600–1616 of the Fish and Game Code, the department may charge and collect a reasonable fee from the entity to recover its estimated CEQA–related costs in accordance with section 21089 of the Public Resources Code. The department may recover its estimated CEQA–related costs by collecting from the entity one or more deposits. The amount of the first deposit shall be at least $1,500. The department shall refund any unused deposit to the entity.

(m) Payment of Fees.

(1) The department may refuse to process a notification or a request for an extension or amendment until the department receives the proper fee or fees.

(n) Refunds.

(1) If an entity requests an agreement with a term longer than 5 years and the department denies the entity's request, the department will return the fees paid and instruct the entity to submit the applicable fee for an agreement with a term of 5 years or less.

(2) If after receiving a notification the department determines that notification is not required because the project is not subject to subdivision (a) of section 1602 of the Fish and Game Code, the department shall refund to the entity any fees submitted with the notification.

NOTE: Authority cited: Section 1609, Fish and Game Code; and Section 21089, Public Resources Code. Reference: Section 1609, Fish and Game Code; and Section 21089, Public Resources Code.

HISTORY

1. New section filed 7–1–91; operative 7–1–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 40).
2. Amendment of subsections (a)–(f) filed 4–14–92; operative 5–14–92 (Register 92, No. 18).
3. Amendment filed 2–23–2000; operative 3–24–2000 (Register 2000, No. 8).
4. Repealer and new section filed 10–13–2005; operative 11–12–2005 (Register 2005, No. 41).

§ 700. Hunting and Fishing Licenses, Possession and Display Of.

(a) Display of Sport Fishing License: Every person, while engaged in taking any fish, amphibian or reptile, shall display their valid sport fishing license by attaching it to their outer clothing at or above the waistline so that it is plainly visible, except when diving as provided in Section 7145 of the Fish and Game Code.

(b) Possession of Hunting License: Every person, while engaged in taking any bird or mammal must have on their person or in their immediate possession a valid hunting license.

NOTE: Authority cited: Sections 200, 202, 203, 205, 215, 1050 and 3050. Fish and Game Code. Reference: Sections 200–205, 215, 220, 221, 1050, 1052, 1053, 2012, 3007, 3031, 3037, 3055, 3060–3063 and 7145–7150.5, Fish and Game Code.

HISTORY

1. New section filed 6–24–66 as an emergency; designated effective 7–2–66; Certificate of Compliance included (Register 66, No. 19).
2. Amendment filed 6–4–70; designated effective 7–1–70 (Register 70, No. 23).
3. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
4. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
5. Amendment of section heading, text and NOTE filed 2–25–94; operative 2–25–94 pursuant to Government Code section 11346.2(d) (Register 94, No. 8).

§ 700.4. Automated License Data System.

(a) Defined:

For the purposes of the Title 14, Division 1, California Code of Regulations, the "Automated License Data System" or "ALDS" is an automated system that will replace the Department's current paper–based licensing. The ALDS enables license items to be printed instantly using point of sale equipment and will be available at license agents and Department offices located throughout the state. The ALDS also allows for licensing via the telephone and/or Internet.

NOTE: Authority cited: Section 1050, Fish and Game Code. Reference: Section 1050, Fish and Game Code.

HISTORY

1. New section filed 12–14–2007; operative 1–13–2008 (Register 2007, No. 50).

§ 700.5. Applications and Reports.

(a) For any license, permit, tag, reservation or other entitlement issued by the department where a specific form or application is specified, the department may accept the submission of equivalent information identified on the application or form via alternative media, such as the Internet, an Automated License Data System (ALDS) Point of Sale terminal or the telephone.

(b) For any license, permit, tag, reservation or other entitlement provided by the department where a specific location is specified, the department may accept the submission at alternative locations, such as other department offices, license agent locations or the Internet.

(c) For any license, permit, tag, reservation or other entitlement issued by the department where a report is required and a specific reporting methodology or report form is specified, the department may accept the submission of equivalent information identified on the report form via alternative media, such as the Internet, an Automated License Data System (ALDS) Point of Sale terminal or the telephone.

NOTE: Authority cited: Section 1050, Fish and Game Code. Reference: Section 1050, Fish and Game Code.

HISTORY

1. New section filed 12–14–2007; operative 1–13–2008 (Register 2007, No. 50).

§ 701. Sport Fishing Forms and Fees.

(a) Declaration for Multi–Day Fishing Trip (FG 935 (rev. 09/07)), incorporated by reference herein $ 5.00

(b) 2008 Klamath–Trinity Salmon Report Card (FG 684 (Rev. 9/07)), incorporated by reference herein $5.00

(c) 2008 Sturgeon Fishing Report Card (FG 683 (Rev. 9/07)), incorporated by reference herein $0.00

(d) 2008 Spiny Lobster Report Card (FG 685 (New 9/07)), incorporated by reference herein $7.50

(e) 2008 Replacement Card Fee for a 2008 Abalone Report Card (FG 2915 (Rev. 09/07)), incorporated by reference herein $8.25

(f) 2008 Replacement Card Fee for a 2008 Sturgeon Fishing Report Card $0.00

(g) 2008 Replacement Processing Fee for a 2008 Abalone Report Card $7.50

(h) 2008 Replacement Processing Fee for a 2008 Sturgeon Fishing Report Card $7.50

(i) 2008 Steelhead Fishing Report and Restoration Card (FG 682 (Rev. 09/07)), incorporated by reference herein (per Section 7380(b) Fish and Game Code)

(j) Pursuant to the provisions of Section 699, Title 14, the department shall annually adjust the fees of all licenses, stamps, permits, tags, or other entitlement required by regulations set forth in this section.

NOTE: Authority cited: Sections 200, 202, 205, 220, 713, 1050, 1053, 7149.8 and 7380, Fish and Game Code. Reference: Sections 200, 202, 205, 206, 220, 713, 1050, 1053, 1055, 7149.8 and 7380, Fish and Game Code.

HISTORY

1. New section filed 8–4–2006; operative 8–4–2006 pursuant to Government Code section 11343.4 (Register 2006, No. 31).
2. Repealer of subsections (b) and (c) and subsection relettering filed 1–18–2007; operative 1–18–2007 pursuant to Government Code section 11343.4(c) (Register 2007, No. 3).
3. Amendment filed 2–28–2007; operative 2–28–2007 pursuant to Government Code section 11343.4 (Register 2007, No. 9).
4. Amendment of section and NOTE filed 3–14–2008; operative 4–1–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 11).

§ 702. Hunting Applications, Tags, Seals, Permits, Reservations and Fees.

(a) Private Wildlife Management Areas

(1) License Application (Initial — FG WPB 538 (Rev. 02/08), Annual Renewal — FG WPB 539 (Rev. 02/08), 5–Year Renewal — FG WPB 537 (Rev. 02/08), incorporated by reference herein)

(A) less than 5000 acres	$1,530.50
(B) 5,001 to 10,000 acres	$2,204.25
(C) 10,001 to 15,000 acres	$2,571.50
(D) greater than 15,001 acres	$2,938.75

(2) Tags and Seals

(A) 2008 Antelope Tag (Buck)	$ 183.50
(B) 2008 Antelope Tag (Doe)	$ 110.25
(C) 2008 Bear Tag	$ 51.50
(D) 2008 Deer Tag (Antlerless)	$ 58.75
(E) 2008 Deer Tag (Buck)	$ 58.75
(F) 2008 Deer Tag (Either–sex)	$ 58.75
(G) 2008 Elk Tag (Antlerless)	$ 367.50
(H) 2008 Elk Tag (Bull)	$ 514.00
(I) 2008 Pig Tag	$ 51.50
(J) 2008 Turkey Tag	$ 22.25
(K) 2008/2009 Upland Game seals	$ 01.05

(b) Reservation Drawings and Permits to Hunt on State and Federal Areas

(1) Reservation Drawings

(A) 2008–2009 Per Hunt Choice	$ 1.25

(2) Passes and Permits

(A) 2008/2009 Type A Season Pass	$124.50
(B) 2008/2009 Type B Season Pass	$ 41.50
(C) 2008/2009 Type A Two–Day Pass	$ 26.75
(D) 2008/2009 One–Day Entry Permit	$ 16.50

(c) Hunting Tags and Applications

(1)		*Tag/Application Fees*	*Processing Fees*
(A)	2008/2009 California Resident First–Deer Tag Application (LRB 1371A (Rev. 4/2008), incorporated by reference herein)	$ 21.00	$ 3.75
(B)	2008/2009 California Nonresident First–Deer Tag Application (LRB 1371B (Rev. 4/2008), incorporated by reference herein)	$214.00	$ 3.75
(C)	2008/2009 California Resident Second–Deer Tag Application (LRB 1371C (Rev. 4/2008), incorporated by reference herein)	$ 27.00	$ 3.75
(D)	2008/2009 California Nonresident Second–Deer Tag Application (LRB 1371D (Rev. 4/2008), incorporated by reference herein)	$214.00	$ 3.75
(E)	2008/2009 California Resident Bear Tag Application (LRB 1365A (Rev. 4/2008), incorporated by reference herein)	$ 32.50	$ 3.75
(F)	2008/2009 Nonresident Bear Tag Application (LRB 1365B (Rev. 4/2008), incorporated by reference herein)	$225.75	$ 3.75
(G)	2008 Antelope Drawing Application (Per hunter) (LRB 1363 (Rev. 4/2008), incorporated by reference herein)		$ 7.50
(H)	2008 Elk Drawing Application (Per Hunter) (LRB 1364 (Rev. 4/2008), incorporated by reference herein)		$ 7.50
(I)	2008 Nelson Bighorn Sheep Drawing Application (Per Hunter) (LRB 1362 (Rev. 4/2008), incorporated by reference herein)		$ 7.50
(J)	2008 Resident Antelope Tag	$ 118.00	
(K)	2008 Nonresident Antelope Tag	$ 365.00	
(L)	2008 Resident Elk Tag	$ 354.00	
(M)	2008 Nonresident Elk Tag	$1,094.75	
(N)	2008 Resident Bighorn Sheep Tag	$ 333.75	
(O)	2008 Nonresident Bighorn Sheep Tag	$ 500.00	
(P)	2008 Bobcat Tags (Five)	$ 13.25	
(Q)	2008 Deer Tag — Exchange		$ 8.25

(d) Pursuant to the provisions of Section 699, Title 14, the department shall annually adjust the fees of all licenses, stamps, permits, tags, or other entitlement required by regulations set forth in this section.

NOTE: Authority cited: Sections 200, 202, 203, 215, 220, 331, 332, 713, 1050, 1055, 1055.1, 1572, 4331, 4336 and 10502, Fish and Game Code. Reference: Sections 200, 202, 203, 203.1, 207, 210, 215, 219, 220, 331, 332, 713, 1050, 1055, 1570, 1571, 1572, 1573, 3950, 3951, 4302, 4330, 4331, 4332, 4333, 4336, 4340, 4341, 4652, 4653, 4654, 4655, 4657, 4750, 4751, 4752, 4753, 4754, 4755, 4902, 10500 and 10502, Fish and Game Code.

HISTORY

1. New section filed 8–4–2006; operative 8–4–2006 pursuant to Government Code section 11343.4 (Register 2006, No. 31).
2. Amendment filed 5–29–2007; operative 5–29–2007 pursuant to Government Code section 11343.4 (Register 2007, No. 22).
3. Change without regulatory effect amending section filed 7–28–2008 pursuant to section 100, title 1, California Code of Regulations; effective 30 days after filing (Register 2008, No. 31).

§ 704. Miscellaneous Forms, Permits and Fees.

All licenses, tags, permits, reservations or other entitlements purchased via the Automated Data License System (ALDS) will be subject to a three percent nonrefundable surcharge, not to exceed seven dollars and fifty cents ($7.50) per item, to pay the department's costs for issuing that license, tag, permit, reservation or other entitlement.

NOTE: Authority cited: Section 1050, Fish and Game Code. Reference: Section 1050, Fish and Game Code.

HISTORY

1. New section filed 2–13–2008; operative 3–14–2008 (Register 2008, No. 7).

§ 705. Hunting and Fishing Licenses, Application for.

The following procedure shall be followed in issuing hunting or sport fishing licenses:

(a) A hunting or sport fishing license, except as provided in subsections 705 (b) and (c), Title 14, CCR, shall contain the following information about the licensee before being issued:

(1) True name
(2) Residence address
(3) Date of Birth
(4) Height
(5) Color of eyes
(6) Color of hair
(7) Weight
(8) Sex

(b) A sport fishing license issued pursuant to subsections 7149(a)(5) or 7149.05(a)(5) of the Fish and Game Code shall contain the name of the angler and the date of validity before being issued to the licensee.

(c) For licenses issued via the current paper license system. Notwithstanding the provisions of Fish and Game Code Section 1053, any person may purchase a hunting or sport fishing license for another person, as long as the application contains the licensee's true name and residence address. Prior to using any license, the licensee shall complete the license so that it contains all of the information required in subsection (a) above.

(d) For licenses issued via the Automated License Data System (ALDS) (see Section 700.4). Notwithstanding any provisions of Fish and Game Code, Section 1053, any person may purchase a hunting or sport fishing license for another person, as long as the licensee's customer identification number issued from the ALDS and date of birth are provided.

(e) For licenses issued via the ALDS. Pursuant to Fish and Game Code Section 1061, any person who wishes to purchase an annual hunting license or annual sport fishing license for another person but does not have available the information required for that purchase may be allowed to purchase a voucher for said license.

HISTORY

1. New section filed 5–4–76; effective thirtieth day thereafter (Register 76, No. 19).
2. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
3. Amendment filed 8–18–82; effective upon filing pursuant to Government Code section 11346.2(d) (Register 82, No. 34).
4. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No.38).
5. Amendment filed 4–24–90; operative 5–24–90 (Register 90, No. 20).

§ 708. Big Game License Tag, Application, Distribution and Reporting Procedures.

(a) Deer License Tag Procedures and Requirements

(1) Deer License Tags.

No person shall hunt deer without a valid deer license tag in possession for that particular area as defined in sections 360 and 361. Deer shall be tagged only with a valid deer license tag for the area (as defined in sections 360 and 361) in which the deer is killed. Except as otherwise provided in the Fish and Game Code, no person shall take more than two deer during any license year.

(2) Deer License Tag Application and Distribution Procedures.

(A) Distribution of License Tags:

1. Premium deer hunt tags for X zones, additional hunts, and area–specific archery hunts shall be distributed by drawing, as described in subsection 708(g)(1) and (2), unless otherwise authorized. Applicants shall submit their deer tag application to the department at the address specified on the application. Applications must be received by the department by 5:00 p.m. on the first business day after June 1. Successful applicants will be selected by drawing within 10 business days following the application deadline date. If the drawing is delayed due to circumstances beyond the department's control, the department shall conduct the drawing at the earliest date possible. Successful and unsuccessful applicants will be notified by mail.

2. Except as noted in subsection 708(a)(2)(E) below, deer tags for A, B, C, and D zones and leftover drawing tags shall be issued upon request until each tag quota fills. If, on any given day, the number of applications received for any zone or hunt exceeds the number of available tags, the department may conduct a drawing for that zone or hunt.

(B) Application Forms: Except for permits and deer tags issued pursuant to sections 4181.5, 4188, and 4334 of the Fish and Game Code, applications for deer tags, as specified in Section 702, may be made available to the public at designated license agents and department offices.

(C) Application Procedures:

1. Applicants must be at least 12 years of age on or before July 1 of the license year for which they are applying or at the time of application if they are applying after July 1 and possess a California resident or nonresident hunting license valid for the deer hunting season for which they are applying, except applicants for additional apprentice deer hunts, who must possess a California junior hunting license. Two–day nonresident hunting licenses shall not be used to apply for deer tags.

2. No more than six persons may apply together as a party. To be considered as a party, all applications must be stapled together with the party leader's application on top and mailed in one envelope. All party members' applications must show the same tag choices in the same order of preference, the total number of persons in the party, and the party leader's name and identification number. All party members shall be awarded tags according to the choices listed on the party leader's application. Party applications for premium deer hunts shall not be split to meet the tag quota if the number of party members exceeds the number of available tags. Party applications which exceed the number of available tags shall be bypassed until the quota is reached. Incorrect or incomplete party applications will be separated and awarded tags on an individual basis.

3. Incomplete, incorrect, late or ineligible applications will be rejected.

(D) Application Fee: The department shall require that the specified fee for a deer tag, as specified in Section 4332 of the Fish and Game Code, be paid as a prerequisite to obtaining a deer tag application. In addition to the tag fee, the department shall also charge a nonrefundable processing fee, as specified in Section 702, for each deer tag application.

(E) Application Restrictions:

1. First–Deer Tag Application:

a. Any person may use a first–deer tag application to apply for any premium deer hunt tag (X zone, additional hunt, or area–specific archery hunt) issued by drawing as specified in subsection 708(a)(2)(A)1.

b. Any person may use a first–deer tag application to apply for an A, B, C, or D zone tag or archery–only tag issued upon request.

c. Any person may use a first–deer tag application to apply for any premium deer hunt tag (X zone, additional hunt, or area–specific archery hunt) remaining on the first business day after July 1. Applications must be submitted to the department's License and Revenue Branch in Sacramento, unless otherwise specified by the department.

2. Second–Deer Tag Application:

a. Any person may use a second–deer tag application to apply for an A or B zone tag or archery–only tag issued upon request.

b. Any person may use a second–deer tag application to apply for any area–specific archery tag remaining on the first business day following July 1. Applications must be submitted to the department's License and

Revenue Branch in Sacramento, unless otherwise specified by the department.

c. Any person may use a second-deer tag application to apply for any D zone tag or additional hunt tag, except an additional apprentice hunt tag, remaining on the first business day following August 1. Applications may be submitted before that date to the License and Revenue Branch in Sacramento.

d. Any person in possession of a valid junior hunting license, who has not used a first-deer tag application to apply for an additional apprentice hunt, may use a second-deer tag application to apply for an additional apprentice hunt tag issued by drawing as specified in subsection 708(a)(2)(A)1., and 708(g)(2)(A). An apprentice hunter may not submit more than one application for additional apprentice hunts.

e. No person shall submit more than one first-deer tag application and one second-deer tag application to the department during any one license year. Any person in violation of this subsection may be denied deer tags for the current and following license year.

(F) Deer Tag Exchange Fee: The department shall charge a nonrefundable processing fee, as specified in Section 702, for exchanging a deer tag for a different zone or hunt.

(3) Tagging Requirements:

Immediately upon killing a deer, both portions of the deer license tag must be completely filled out and the date of kill permanently marked on the deer license tag. The deer license tag must be attached to the antlers of an antlered deer or to the ear of any other deer and kept attached during the open season and for 15 days thereafter. Except as otherwise provided, possession of any untagged deer shall be a violation (refer to Fish and Game Code, Section 4336).

(4) Tag Validation and Countersigning Requirements, and Transporting for the Purpose of:

Any person legally killing a deer in this state shall have the deer license tag validated and countersigned by a person authorized by the commission as described below in subsection 708(a)(8) before transporting such deer, except for the purpose of taking the deer to the nearest person authorized to countersign the license tag, on the route being followed from the point where the deer was taken (refer to Fish and Game Code, Section 4341).

(5) Deer Head Retention Requirements and Production Upon Demand:

Any person taking any deer in this state shall retain in their possession during the open season thereon and for 15 days thereafter, that portion of the head which in adult males normally bears the antlers, and shall produce the designated portion of the head upon the demand of any officer authorized to enforce the provisions of this regulation (refer to Fish and Game Code, Section 4302).

(6) Deer Tag Reporting Requirements:

Every person to whom a deer tag is issued shall return the completed report card portion to the department within thirty days of taking a deer.

(7) Deer Violations, Tag Forfeiture:

Any person who is convicted of a violation involving deer shall forfeit their current year deer license tags and no new deer license tags may be issued to that person during the then current hunting license year, and that person may not apply for a deer tag for the following license year (refer to Fish and Game Code, Section 4340).

(8) Deer and Elk Tags, Persons Authorized to Validate.

The following persons are authorized to validate or countersign deer and elk tags:

(A) State:

1. Fish and Game Commissioners
2. Employees of the Department of Fish and Game
3. Deputy Foresters
4. Assistant Deputy Foresters
5. Forest Rangers
6. Park Rangers—Grades 1, 2, 3, and 4
7. Supervising Plant Quarantine Inspectors
8. Junior, Intermediate and Senior Plant Quarantine Inspectors
9. Foresters
10. Fire Prevention Officers—Grades 1, 2, 3, and 4
11. Fire Captains
12. Fire Apparatus Engineers

(B) Federal: (FS = U.S. Forest Service, FWS = U.S. Fish & Wildlife Service, BLM = Bureau of Land Management)

1. Range Technicians (BLM)
2. Forest Supervisors (FS)
3. Assistant Forest Supervisors (FS)
4. District Forest Rangers (FS)
5. Foresters (FS, BLM)
6. Range Conservationists (FS, BLM)
7. Forest Engineers (FS, BLM)
8. Forestry Aides (FS)
9. Fire Control Officers or Aides (FS, BLM)
10. Clerks (FS, FWS, BLM) while on duty at their headquarters
11. Game Management Agents (FWS)
12. Wildlife Management Biologists (FS, FWS, BLM)
13. District Managers (BLM)
14. Information Specialists (BLM)
15. Area Managers (BLM)
16. Realty Specialists (BLM)
17. Natural Resource Specialists (BLM)
18. Engineers (BLM)
19. Engineering Technicians (BLM)
20. Recreation Resource Specialists (BLM)
21. Geologists (BLM)
22. Recreation Aides (BLM)
23. All Uniformed Personnel of the National Park Service
24. Commanding officers of any United States military installation or their designated personnel for deer taken on their reservation.
25. Postmasters
26. Post Office Station or Branch Manager for deer brought to their post office.

(C) Miscellaneous:

1. County firemen at and above the class of foreman for deer brought into their station.
2. Judges or Justices of all state and United States courts.
3. Notaries Public
4. Peace Officers
5. Nonsalaried police officers or deputy sheriffs while on scheduled duty in a city or county of appointment for deer brought to a police station or sheriff's office
6. Officers authorized to administer oaths
7. Owners, corporate officers, managers or operators of lockers or cold storage plants for deer brought to their place of business.

(D) No person may validate or countersign their own tag.

(b) Distribution of Bighorn Sheep License Tags:

(1) Fund-raising Nelson bighorn ram license tags: Fund-raising license tags for the taking of mature Nelson bighorn rams shall be sold for the purpose of raising funds to manage bighorn sheep. The department may designate a nonprofit organization to sell this fund-raising tag. Any resident or nonresident is eligible to buy the tag. The purchaser of a fund-raising license tag shall complete a required hunter orientation program conducted by the department and meet the hunter education requirements for a hunting license. The fund-raising license tags are defined as follows:

(A) Open-zone fund-raising license tags: These fund-raising license tags are valid in any of the areas described in subsection 362(a).

(2) General Nelson bighorn ram license tags: The application form, as specified in Section 702, may be made available to the public at designated license agents and department offices. Applicants must be California residents or nonresidents, at least 16 years of age on or before July 1 of the license year for which they are applying, possessing a California hunting license valid during the bighorn ram season for which they are applying, and must not have been previously issued a bighorn license tag

in California. Two–day nonresident hunting licenses shall not be used to apply for Nelson bighorn sheep tags. Applicants must apply for only one designated zone. No person shall submit more than one application. Applicants shall submit the application with a nonrefundable processing fee, as specified in Section 702, to the department at the address specified on the application. Applications must be received before 5:00 p.m. on the first business day after June 1. Incomplete, late and ineligible applications and applications submitted without the appropriate processing fee will not be included in the drawing and the hunter will not earn a preference point. Successful applicants and a list of alternates for each zone shall be determined by drawing within 10 business days following the application deadline date. If the drawing is delayed due to circumstances beyond the department's control, the department shall conduct the drawing at the earliest date possible. No more than one nonresident shall be selected to receive a general license tag. Unsuccessful applicants will not be notified. Successful applicants will be mailed notification as soon as practical. Upon receipt of the notification, the applicant shall submit the appropriate tag fee, as specified in Section 702, to the department's License and Revenue Branch in Sacramento. The tag fee shall be received by the department by 5:00 p.m. on the Monday following the second Saturday in July. Should the quota for each zone remain unfilled after that date, the alternate lists shall be used. Successful applicants shall be issued tags only after successfully completing the required hunter orientation program conducted by the department.

(3) Tagholder Responsibilities:

(A) Only persons possessing valid Nelson bighorn sheep license tags are entitled to hunt bighorn sheep. Tags shall not be transferable and are valid only in the zone or zones specified.

(B) Individuals awarded a fund–raising license tag and all successful applicants for general license tags shall attend and successfully complete a mandatory hunter orientation program. Licensed guides employed by successful applicants and the fund–raising license tag buyer shall accompany their clients to this orientation program.

(C) All successful bighorn sheep tagholders shall have their tags validated. All tags must be returned to the department within 10 days after the close of the season, even though the tagholder may not have killed a Nelson bighorn ram.

(D) Tags must be completed and attached to the carcass of a bighorn ram immediately after the animal is killed. All successful bighorn sheep tagholders shall have their tags validated.

(E) All tagholders will be notified by mail as to whether they will be required to report to the department before hunting and upon completion of hunting. The notification shall contain procedures for reporting, including appropriate methods of contacting the department.

(F) The tagholder shall surrender his tag to an employee of the department for any or all of the following reasons:

1. Any act on the part of the tagholder which violates any of the provisions of the Fish and Game Code, or any regulations of the commission.

2. Any act on the part of the tagholder which endangers the person or property of others. The decision of the department in such respects shall be final and binding upon the tagholder.

(c) Distribution of Pronghorn Antelope License Tags:

(1) The pronghorn antelope license tags shall be issued by drawing, as described in subsection 708(g)(5)(A) and (B). Not more than one nonresident shall be selected to receive a general license tag. Application forms, as specified in Section 702, may be made available to the public at designated license agents and department offices. Each applicant must be at least 12 years of age on or before July 1 of the license year for which they are applying, and possess a California hunting license valid during the pronghorn antelope season for which they are applying. Applicants for the apprentice pronghorn antelope hunts must possess a junior hunting license valid during the pronghorn antelope season for which they are applying. Two–day nonresident hunting licenses shall not be used to apply for pronghorn antelope tags. No person shall submit more than one application for a pronghorn antelope license tag. No more than two persons shall apply together as a party. To be considered as a party, both persons must be residents and apply on the same application for the same tag choice. Nonresidents shall not apply as a party for pronghorn antelope tags. Incomplete, late and ineligible applications and applications submitted without the appropriate processing fee will not be included in the drawing and the hunter shall not earn a preference point.

(2) Applicants shall submit the application with a nonrefundable processing fee, as specified in Section 702, to the department at the address specified on the application. Applications must be received before 5:00 p.m. on the first business day after June 1. Successful applicants and a list of alternates for each hunt shall be determined by drawing within 10 business days following the application deadline date. If the drawing is delayed due to circumstances beyond the department's control, the department shall conduct the drawing at the earliest date possible. Except as provided in subsection 708(g)(5)(A)5., party applications drawn for the last tag available for a hunt will be split and the party leader (first person listed) as indicated on the application form shall be awarded the pronghorn antelope license tag. The party member shall become the first alternate for that hunt. Unsuccessful applicants will not be notified. Successful applicants will be mailed notification as soon as practical. Upon receipt of the notification the applicant shall submit the appropriate tag fee, as specified in Section 702, to the department's License and Revenue Branch in Sacramento. The tag fee shall be received by the department by 5:00 p.m. on the Monday following the second Saturday in July. Should the quota for each zone remain unfilled after that date, the alternate list shall be used. In the event only one pronghorn antelope license tag is available to an alternate, party applications will be split and the alternate tag shall be awarded to the party leader as indicated on the application form. Undistributed tags will be issued after the drawing. Any tags unclaimed by successful applicants after that date shall be awarded to alternates for that zone, on an individual basis, in the order drawn. Any remaining tags may be issued to alternates for other zones.

(3) Fund–raising License Tags: Fund–raising license tags for the taking of buck pronghorn antelope shall be offered for sale to raise funds for the management of pronghorn antelope. Any resident or nonresident is eligible to buy one of the fund–raising license tags. The sale price of a fund–raising license tag includes the fee for processing and issuing a hunting license. The purchaser shall be issued the fund–raising license tag only after meeting the hunter education requirements for a hunting license.

(4) Tagholder Responsibilities:

(A) Only persons possessing valid pronghorn antelope license tags are entitled to hunt pronghorn antelope during these hunts. Tags shall not be transferable and are valid only in the area, season, and period specified on the tag.

(B) All tagholders must return the report card portion of their license tag to the department within one week after the close of the pronghorn antelope season, even though the tagholder may not have killed a pronghorn antelope.

(C) The holder of a pronghorn antelope license tag, immediately after killing a pronghorn antelope, shall fill out both parts of the tag and mark permanently the date of kill. The tag portion shall be immediately attached to a horn of buck pronghorn antelope or to an ear of doe pronghorn antelope and kept attached for 15 days after the close of the open season.

(D) The tagholder shall surrender his license tag to an employee of the department for any of the following reasons:

1. Any act on the part of the tagholder which violates any of the provisions of the Fish and Game Code, or any regulations of this commission.

2. Any act on the part of the tagholder which endangers the person or property of others. The decision of the department in such respects shall be final and binding upon the tagholder.

(d) Distribution of Elk License Tags:

(1) Three fund–raising license tags for the taking of elk bulls shall be offered for sale to raise funds for the management of elk. The department may designate a nonprofit organization or organizations to sell the fund–raising tags. Any resident or nonresident is eligible to buy one of the license tags. The purchase of fund–raising tags shall complete required

hunter orientation programs conducted by the department and meet the hunter safety requirements for a hunting license.

(2) Application forms for elk tags, as specified in Section 702, may be made available to the public at designated license agents and department offices. Each applicant must be at least 12 years of age on or before July 1 of the license year for which they are applying, and possess a California hunting license valid during the elk season for which they are applying. Two-day nonresident hunting licenses shall not be used to apply for elk tags. No person shall submit more than one application for an elk license tag. No more than two persons shall apply together as a party. To be considered as a party, both persons must be residents and apply on the same application for the same tag choice. Nonresidents shall not apply as a party for elk tags. Incomplete, late and ineligible applications and applications submitted without the appropriate processing fee will not be included in the drawing and the hunter shall not earn a preference point.

(3) The elk hunting license tags shall be issued by drawing, as described in subsection 708(g)(4)(A) and (B). Not more than one nonresident shall be selected to receive a general license tag. Applicants shall submit the application with a nonrefundable processing fee, as specified in Section 702, to the department at the address specified on the application. Applications must be received before 5:00 p.m. on the first business day after June 1. Except as provided in subsection 708(g)(4)(A)5., party applications drawn for the last tag available for a hunt will be split and the party leader (first person listed) as indicated on the application form shall be awarded the elk tag. The party member shall become the first alternate for that hunt. Successful applicants and a list of alternates for each hunt will be determined by drawing within 10 business days following the application deadline date. If the drawing is delayed due to circumstances beyond the department's control, the department shall conduct the drawing at the earliest date possible. Unsuccessful applicants will not be notified. Successful applicants and alternates will be mailed notification as soon as practical. Upon receipt of the notification, the applicant shall submit the tag fee, as specified in Section 702, to the department's License and Revenue Branch in Sacramento. The tag fee shall be received by the department by 5:00 p.m. on the Monday following the second Saturday in July. Any tags unclaimed by successful applicants after that date shall be awarded to alternates for that hunt, on an individual basis, in the order drawn. Any remaining tags may be issued to alternates for other zones.

(4) Tagholder Responsibilities:

(A) All tagholders must return their license tags to the department within one week after the close of the elk season, even though the tagholder may not have killed an elk.

(B) License tags must be attached to the antler of an antlered elk, or to the ear of antlerless elk immediately after killing.

(C) Persons authorized to validate or countersign elk tags are listed in Section 708(a)(8). Elk tags must be countersigned before transporting such elk, except for the purpose of taking it to the nearest person authorized to countersign the license tag on the route being followed from the point where the elk is taken.

(D) Only persons possessing valid elk license tags are entitled to take elk. Tags are not transferable and are valid only for the area and period specified.

(E) The tagholder shall surrender his tag to an employee of the department for any or all of the following reasons:

1. Any act on the part of the tagholder which violates any of the provisions of the Fish and Game Code, or any regulations of the commission made pursuant thereto.

2. Any act on the part of the tagholder which endangers the person or property of others. The decision of the department shall be final.

(F) Elk may be taken on Santa Rosa Island pursuant to a permit issued by the department. For methods of take, see sections 353 and 354.

(e) Bear License Tags.

(1) Application for Bear License Tags:

(A) With the exception of permits and tags issued pursuant to section 4181 of the Fish and Game Code, all bear license tag applications shall be submitted on forms provided by the department.

(B) The department shall require that the specified fee provided for in section 4751 of the Fish and Game Code for such bear license tags be paid as a prerequisite to obtaining a bear license tag application.

(C) The department shall charge a nonrefundable processing fee, as specified in Section 702, for each bear tag application.

(D) Only one bear license tag application may be submitted to the department during any one license year. Any person who submits more than one bear license tag application may be denied bear license tags for the current license year.

(2) Distribution of bear tags: Applications for bear tags, as specified in Section 702, may be available to the public at designated license agents and department offices. Tags will be issued at designated department offices.

(3) Use of Guides: Any holder of a bear license tag who utilizes the services of a guide or guides shall verify that the guide is in possession of a valid guide's license and shall place the guide's license number on the bear license tag in the space provided.

(4) Use of Dogs: Any holder of a bear license tag who utilizes dogs to take bear shall so indicate on his bear license tag in the space provided.

(5) Validation of Bear Tags: Only department employees may validate bear tags (This provision supersedes section 4755 of the Fish and Game Code). Bear tags must be countersigned before transporting such bear except for the purpose of taking it to the nearest person authorized to countersign the license tag, on the route being followed from the point where the bear is taken.

(6) Return of Bear License Tags:

(A) Every person who takes a bear shall immediately return the report card portion of the bear license tag, after having the tag countersigned as required in (e) above. The tag may be presented to a department office/officer or returned through the United States Mail.

(B) Every person who is unsuccessful in taking bear shall return the report card portion of the bear license tags by February 1 of the current license year. The tag may be presented to a department office/officer or returned through the United States Mail.

(f) Application For and Use of Wild Pig License Tags:

(1) Any person, 12 years of age or older, who possesses a valid hunting license may procure wild pig license tags as specified in Section 4654 of the Fish and Game Code.

(2) Resident and nonresident wild pig license tags will be sold individually.

(3) Wild pig license tags are valid only during that portion of the current hunting license year in which wild pigs may be legally harvested as provided in subsection 368(a).

(4) Any person hunting wild pigs shall carry a wild pig license tag while hunting wild pigs, and upon the killing of any wild pig shall immediately fill out both parts of the tag, clearly mark the date of the kill and attach the tag to the carcass of the wild pig. The report card portion shall be immediately returned to the department.

(g) Big Game Drawing System

(1) General Conditions

(A) Except as otherwise provided, the department shall award license tags for premium deer (X zones, additional hunts, and Area-specific archery hunts), bighorn sheep, elk and pronghorn antelope hunts, as described in sections 360(b) and (c), 361, 362, 364 and 363, using a Modified-Preference Point drawing system.

(B) Except as otherwise provided, the Modified-Preference Point drawing system shall award proportions of hunt tag quotas, as specified for each species, using the following drawing methods:

1. Preference Point Drawings. Tags are awarded based on the following order of priority: an applicant's hunt choice (first choice only for

deer), accumulated point totals by species (highest to lowest), and computer-generated random number (lowest to highest).

2. Draw-By-Choice Drawings. Tags are awarded according to an applicant's hunt choice and computer-generated random number (lowest to highest), without consideration of accumulated points.

(C) Except as otherwise provided, applicants unsuccessful in receiving a tag for premium deer (based on first choice selection), bighorn sheep, elk or pronghorn antelope hunts shall earn one (1) preference point for use in future Big Game Drawings.

(D) To earn and accumulate a point for any species, a person must comply with all application requirements for that species as specified in subsections 708(a), (b), (c) and (d), including the following conditions:

1. Applicants must be at least 12 years of age on or before July 1 of the license year for which they are applying (16 years of age for bighorn sheep applications).

2. Applicants must possess a California hunting license valid for the hunting season requested (applicants for apprentice deer hunts must possess a junior hunting license). Applicants must provide evidence of such license at the time of application.

3. Applications for bighorn sheep, pronghorn antelope and elk hunts must include the appropriate nonrefundable processing fees.

4. Applications must be received by the department's License and Revenue Branch in Sacramento by 5:00 p.m. on the first business day after June 1.

5. Except for apprentice deer hunt applicants, applicants shall not submit more than one drawing application for each species during the same license year.

(E) No applicant shall earn more than one (1) preference point per species, per drawing, for use in future drawings. Preference points are accumulated by species and shall not be transferred to another species or another person. Preference points are not zone or hunt specific.

(F) Except as otherwise provided, successful applicants receiving tags for their first choice premium deer, bighorn sheep, elk or pronghorn antelope hunts shall lose all preference points for that species.

(G) For party applications, the department shall use the average preference point value of all party members (total preference points for the party divided by number of party members) as the basis for consideration in the drawing for that species. Point averages shall not be rounded.

(H) Except as otherwise provided, persons who do not wish to apply for an antelope, elk, bighorn sheep or premium deer tags may earn one (1) preference point for any or all of these species, by submitting the appropriate application(s), as specified in subsections 708 (a), (b), (c) and (d), and writing the point code number for that species, as defined by the department, in the hunt choice box (first choice only for deer). Persons applying for a preference point in this manner shall be subject to the same application requirements as regular drawing applicants as specified in subsection 708(g)(1)(D).

(I) The department shall maintain records of preference points earned by individual applicants based on the hunter identification number provided on each application (driver's license number, Department of Motor Vehicles identification number, or hunter identification number assigned by the department). Applicants shall notify the department's License and Revenue Branch in Sacramento in writing, of any changes or corrections regarding name, mailing address, date of birth or hunter identification number.

(J) Persons not applying for premium deer, bighorn sheep, elk, or pronghorn antelope hunts through the department's Big Game Drawings for five (5) consecutive years shall have their preference points for that species reduced to zero (0). For the purposes of this subsection, persons whose applications are disqualified from drawing shall be considered the same as persons not applying. Applying for preference points as described in (H) above, will keep an applicant's file active.

(K) Any person may appeal incomplete, late and ineligible applications or applications submitted without the appropriate processing fee that were not included in the department's big game drawing and the hunter did not earn a preference point. The appeal must be in writing and describe the basis for the appeal. The appeal shall be received by the department's License and Revenue Branch in Sacramento, or if mailed, postmarked on or before May 31 of the following year.

(2) Premium Deer Hunts

(A) Except for apprentice deer hunt applicants, as specified in subsection 708(a)(2)(E), persons must use a first-deer tag application to apply for premium deer hunts through the department's Big Game Drawing.

(B) License tags for premium deer hunts (except apprentice deer hunts) shall be awarded based on the following:

1. Ninety percent (90%) of the individual zone or hunt tag quota shall be awarded using a Preference Point drawing. Tag quota splits resulting in decimal fractions of a tag shall be rounded to the next higher whole number.

2. Ten percent (10%) of the individual zone or hunt tag quota shall be awarded using a Draw-By-Choice drawing. Tag quota splits resulting in decimal fractions of a tag shall be rounded to the next lower whole number.

3. For zones or hunts with quotas less than ten (10) tags, one (1) tag shall be awarded using a Draw-By-Choice drawing. Remaining tags shall be awarded using a Preference Point drawing.

4. Tags awarded to applicants for second or third choice zones or hunts shall be through a Draw-By-Choice drawing and shall not result in loss of accumulated points.

(C) License tags for apprentice deer hunts (J Hunts) as described in subsection 360(c) shall be awarded based on the following:

1. Fifty percent (50%) of the hunt tag quota shall be awarded through a Preference Point drawing. Tag quota splits resulting in decimal fractions of a tag shall be rounded to the next higher whole number.

2. Fifty percent (50%) of the hunt tag quota shall be awarded through a Draw-By-Choice drawing. Tag quota splits resulting in decimal fractions of a tag shall be rounded to the next lower whole number.

(D) An apprentice hunter applying for premium deer hunts (X zones, Area-specific archery hunts, and additional hunts) on a first-deer tag application and a second-deer tag application shall:

1. Receive a point only if he/she is unsuccessful in the big game drawing with his/her first choice on both applications.

2. Lose all preference points for deer if he/she receives his/her first choice on either application.

(3) Bighorn Sheep Hunts

(A) Successful bighorn sheep tag applicants shall be determined as follows, based on tag quotas for each hunt.

1. For quotas of one, the tag shall be awarded using a Draw-By-Choice drawing.

2. For quotas of two, one tag shall be awarded using a Preference Point drawing, and one tag shall be awarded using a Draw-By-Choice drawing.

3. For quotas of three, two tags shall be awarded using a Preference Point Drawing, and one tag shall be awarded using a Draw-By-Choice drawing.

4. For quotas of four or more, seventy-five percent (75%) of the quota shall be awarded using a Preference Point drawing. Any resulting fractional tag shall be rounded to the next higher whole number. The remaining portion of the quota shall be awarded using a Draw-By-Choice drawing.

(B) Alternates shall be selected for each hunt using a Preference Point Drawing.

(4) Elk Hunts

(A) Successful elk tag applicants shall be determined as follows, based on tag quotas for each hunt or hunt period.

1. For quotas of one, the tag shall be awarded using a Draw-By-Choice drawing.

2. For quotas of two, one tag shall be awarded using a Preference Point drawing, and one tag shall be awarded using a Draw-By-Choice drawing.

3. For quotas of three, two tags shall be awarded using a Preference Point drawing, and one tag shall be awarded using a Draw–By–Choice drawing.

4. For quotas of four or more, seventy–five percent (75%) of the quota shall be awarded using a Preference Point drawing. Any resulting fractional tag shall be rounded to the next higher whole number. The remaining portion of the quota shall be awarded using a Draw–By–Choice drawing.

5. Party applications shall be split as described in Section 708(d)(3) to fill the last tag available through the Preference Point drawing. Party applications shall not be split to fill the last tag available through the Draw–By–Choice drawing.

(B) Alternates shall be selected for each hunt or hunt period using a Preference Point drawing.

(5) Pronghorn Antelope Hunts

(A) Successful pronghorn antelope tag applicants shall be determined as follows, based on tag quotas for each hunt or hunt period.

1. For quotas of one, the tag shall be awarded using a Draw–By–Choice drawing.

2. For quotas of two, one tag shall be awarded using a Preference Point drawing, and one tag shall be awarded using a Draw–By–Choice drawing.

3. For quotas of three, two tags shall be awarded using a Preference Point drawing, and one tag shall be awarded using a Draw–By–Choice drawing.

4. For quotas of four or more, seventy–five percent (75%) of the quota shall be awarded using a Preference Point drawing. Any resulting fractional tag shall be rounded to the next higher whole number. The remaining portion of the quota shall be awarded using a Draw–By–Choice drawing.

5. Party applications shall be split as described in Section 708(c)(2) to fill the last tag available through the Preference Point drawing. Party applications shall not be split to fill the last tag available through the Draw–By–Choice drawing.

(B) Alternates shall be selected for each hunt or hunt period using a Preference Point drawing.

HISTORY

1. New section filed 6–28–2002; operative 6–28–2002 pursuant to Fish and Game Code sections 202 and 215 (Register 2002, No. 26).
2. Amendment of section and NOTE filed 3–27–2003; operative 4–26–2003 (Register 2003, No. 13).
3. Change without regulatory effect amending subsections (a)(2)(B), (b)(2), (c)(1)–(2), (d)(2)–(3) and (e)(2) filed 7–14–2003 pursuant to section 100, title 1, California Code of Regulations (Register 2003, No. 29).
4. Amendment of subsections (a)(2)(A)1., (a)(2)(B), (a)(2)(F), (b)(2), (c)(1)–(2), (d)(2)–(3), (e)(2) and (f)(2) filed 7–7–2004; operative 7–7–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 28).
5. Amendment filed 7–19–2005; operative 7–19–2005 pursuant to Government Code section 11343.4 (Register 2005, No. 29).
6. Amendment filed 8–4–2006; operative 8–4–2006 pursuant to Government Code section 11343.4 (Register 2006, No. 31).
7. Amendment filed 5–29–2007; operative 5–29–2007 pursuant to Government Code section 11343.4 (Register 2007, No. 22).
8. Amendment of subsections (a)(2)(C)1., (a)(2)(E)2.c.–d., (c)(1), (g)(1)(D)2., (g)(1)(D)5., (g)(2)(A)–(B), (g)(2)(C) and (g)(2)(D) filed 6–20–2008; operative 6–20–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 25).

§ 710. Hunter Education Training Equivalency.

(a) The department may evaluate the quality and coverage of hunter education courses offered by other countries, their political subdivision, or by the Armed Forces of the United States. Upon satisfactory evidence that a course fully meets or exceeds the requirements of the California hunter education course, the department may issue to graduates of such courses a California Certificate of Equivalency. (NOTE: See section 3050 (a)(3) of the Fish and Game Code regarding hunter safety certificates from other states.)

(b) The department shall prepare a comprehensive hunter education equivalency examination, to be administered to qualified applicants. Pass/fail criteria will be established by the department. Qualification to take the equivalency examination must include affirmation that the applicant has not previously taken and failed the examination.

Applicants who successfully pass the equivalency examination will be issued a hunter education certificate of equivalency.

NOTE: Authority cited: Sections 1050, and 3050, Fish and Game Code. Reference: Sections 711, 1050, and 3049–3055, Fish and Game Code.

HISTORY

1. New section filed 3–17–71; designated effective 6–1–71 (Register 71, No. 12).
2. Repealer filed 4–7–76; effective thirtieth day thereafter (Register 76, No. 15).
3. New section filed 8–31–79 as an emergency; designated effective 9–1–79 (Register 79, No. 35). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 12–29–79.
4. Certificate of Compliance filed 11–9–79 (Register 79, No. 45).
5. Repealer and new section filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
6. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
7. Amendment of subsection (b) filed 2–5–86; effective thirtieth day there after (Register 86, No. 6).
8. Amendment of subsection (a) and (b) and new subsection (c) filed 10–18–90; operative 11–17–90 (Register 90, No. 47).
9. Change without regulatory effect amending section heading and subsections (a) and (b) filed 3–28–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 13).

§ 711. Cold Storage/Frozen Food Locker Plant Records.

(a) Any person operating a cold storage plant or frozen food locker plant where game birds or game mammals, or parts thereof, taken pursuant to a hunting license are processed, preserved or stored, shall prepare and maintain the following records:

(1) name and address of residency of the individual who delivers the game bird or game mammal to the facility;

(2) name, address of residency and hunting license number, and tag number if applicable, of the individual who took the game bird or game mammal;

(3) location of kill—State_____ County_____ Deer Zone or Special Hunt Number_____;

(4) species; and

(5) date received.

(b) The records required by this section shall be maintained at the facility for a period of one year for each game bird or game mammal retained, and shall be open for inspection by wardens of the Department.

NOTE: Authority cited: Section 200, Fish and Game Code. Reference: Sections 200 and 3086, Fish and Game Code.

HISTORY

1. New section file 9–8–88; operative 9–8–88 (Register 88, No. 38). For history of former Section 711, see Registers 81, No. 29 and 73, No. 30.
2. Amendment of subsection (a)(4), repealer of subsection (a)(5), subsection renumbering and amendment of subsection (b) filed 6–28–2002; operative 6–28–2002 pursuant to Fish and Game Code sections 202 and 215 (Register 2002, No. 26).

§ 712. Restriction of Importation of Hunter–Harvested Deer and Elk Carcasses.

It is unlawful to import, or possess any hunter harvested deer or elk (cervid) carcass or parts of any cervid carcass imported into the State, except for the following body parts:

(a) portions of meat with no part of the spinal column, brain or head attached (other bones, such as legs and shoulders, may be attached).

(b) hides and capes (no spinal column, brain tissue or head may be attached).

(c) clean skull plates (no brain tissue may be present) with antlers attached.

(d) antlers with no meat or tissue attached, except legally harvested and possessed antlers in the velvet stage are allowed, if no meat, brain or other tissue is attached.

(e) finished taxidermy mounts with no meat or tissue attached (antlers in the velvet stage are allowed if no meat, brain or other tissue is attached).

(f) upper canine teeth (buglers, whistlers, ivories).

NOTE: Authority cited: Sections 200, 203, 240 and 2355, Fish and Game Code. Reference: Sections 200, 203 and 2355, Fish and Game Code.

HISTORY

1. New section filed 9–9–2002 as an emergency; operative 9–9–2002 (Register 2002, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–7–2003 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of Government Code section 11346.1(g) (Register 2003, No. 23).
3. New section filed 6–5–2003; operative 6–5–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 23).
4. Amendment filed 6–20–2008; operative 6–20–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 25).

§ 720. Designation of Waters of Department Interest.

For the purpose of implementing Sections 1601 and 1603 of the Fish and Game Code which requires submission to the department of general plans sufficient to indicate the nature of a project for construction by or on behalf of any person, governmental agency, state or local, and any public utility, of any project which will divert, obstruct or change the natural flow or bed of any river, stream or lake designated by the department, or will use material from the streambeds designated by the department, all rivers, streams, lakes, and streambeds in the State of California, including all rivers, streams and streambeds which may have intermittent flows of water, are hereby designated for such purpose.

NOTE: Authority cited: Sections 1601 and 1603, Fish and Game Code. Reference: Sections 1601 and 1603, Fish and Game Code.

HISTORY

1. New section filed 4–5–71; effective thirtieth day thereafter (Register 71, No. 15).
2. Amendment filed 1–18–77 as an emergency; effective upon filing (Register 77, No. 4).
3. Certificate of Compliance filed 3–16–77 (Register 77, No. 12).

§ 721. Temporary Reduction of Flows from Grizzly Valley Dam During Rotenone Treatment of Lake Davis and Its Tributaries (Plumas County) for the Eradication of Northern Pike.

Temporary Reduction of Flows from Grizzly Valley Dam During Rotenone Treatment of Lake Davis and Its Tributaries (Plumas County) for the Eradication of Northern Pike. Fish and Game Code Section 5937 is superseded for the limited and specific purpose of implementation of a project using rotenone to eradicate northern pike from Lake Davis and its tributaries to protect fish, wildlife, and other natural resources under the jurisdiction of the Commission. The outlet valve at Grizzly Valley Dam may be closed for a period of up to 45 days, notwithstanding Fish and Game Code Section 5937.

NOTE: Authority cited: Sections 215, 219, 220 and 315, Fish and Game Code. Reference: Sections 215 and 220, Fish and Game Code.

HISTORY

1. New section filed 6–11–2007; operative 7–11–2007 (Register 2007, No. 24). Section 721 was adopted pursuant to Fish and Game Code section 219. Section 219 requires that "A regulation adopted pursuant to this section shall remain in effect for not more than 12 months from its effective date."

§ 730. Camping Near or Occupying Wildlife Watering Places.

(a) Camping/Occupying Defined. For purposes of this Section, camping/occupying is defined as establishing or inhabiting a camp; resting; picnicking; sleeping; parking or inhabiting any motor vehicle or trailer; hunting; or engaging in any other recreational activity for a period of more than thirty (30) minutes at a given location.

(b) Wildlife Watering Places Defined. For purposes of this Section, wildlife watering places are defined as waterholes, springs, seeps and man–made watering devices for wildlife such as guzzlers (self–filling, in–the–ground water storage tanks), horizontal wells and small impoundments of less than one surface acre in size.

(c) Prohibitions.

(1) Camping/Occupying is prohibited within 200 yards of the following:

(A) Any guzzler or horizontal well for wildlife on public land within the State of California.

(B) Any of the wildlife watering places on public land within the boundary of the California Desert Conservation Area as depicted on the Bureau of Land Management maps of "Calif. Federal Public Lands Responsibility," "Calif. Desert Conservation Area" and the new "Desert District, B.L.M."

(2) Camping/Occupying is prohibited within one–quarter mile of the following wildlife watering places:

(A) Butte Well—T31N, R14E, Section 28, NE1/4, M.D.B.M., Lassen County.

(B) Schaffer Well—T31N R14E, Section 25, Center, M.D.B.M., Lassen County.

(C) Tableland Well—T31N, R14E, Section 17, SE1/4, M.D.B.M., Lassen County.

(D) Table Mountain Well—T31N, R14E, Section 32, SE1/4, M.D.B.M., Lassen County.

(E) Timber Mountain Well—T44N, R6E, Section 33, M.D.B.M., Modoc National Forest, Modoc County.

(F) Belfast Well—T31N, R14E, Section 31, NE1/4, M.D.B.M., Lassen County.

HISTORY

1. New section filed 8–3–71; effective thirtieth day thereafter (Register 71, No. 32).
2. Amendment of subsection (a) filed 1–28–76; effective thirtieth day thereafter (Register 76, No. 5).
3. Amendment of subsections (b)(1) and (b)(5) filed 6–13–78; effective thirtieth day thereafter (Register 78, No. 24).
4. Amendment of subsection (b)(4) filed 11–9–79; effective upon filing (Register 79, No. 45).
5. Repealer and new section filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
6. New subsection (a)(6) filed 1–26–84; effective thirtieth day thereafter (Register 84, No. 4).
7. Amendment of subsection (c) filed 7–13–94; operative 7–13–94 pursuant to sections 202 and 215, Fish and Game Code (Register 94, No. 28).
8. Amendment of section heading and repealer and new section filed 8–31–98; operative 8–31–98 pursuant to sections 202 and 215, Fish and Game Code (Register 98, No. 36).

§ 740. Oil Sumps Hazardous to Wildlife.

(a) Definitions:

(1) (Reserved)

(2) "Oil sump" means any open depression or basin in the ground, whether manmade or natural, which contains oil or a combination of oil and water.

(3) "Hazardous" means a condition within an oil sump where over ten percent of the surface area, or over 100 square feet is covered with a coating of oil.

(b) Notification to State Oil and Gas Supervisor: Within five (5) days after finding an oil sump hazardous or of immediate and grave danger to wildlife, the department shall notify the State Oil and Gas Supervisor. The notification shall clearly specify one of the following:

(1) The oil sump is hazardous to wildlife but does not constitute an immediate or grave danger to wildlife.

(2) The oil sump constitutes an immediate and grave danger to wildlife.

(c) Exceptions:

(1) Oil sumps which are adequately screened or eliminated pursuant to Section 1016 of the Fish and Game Code and Sections 3780–3784 of the Public Resources Code are excepted from the provisions of this section.

(2) Oil sumps that are an integral part of refinery operations shall be excepted from subsection (a)(2) above.

NOTE: Authority cited: Section 1016, Fish and Game Code. Reference: Section 1016, Fish and Game Code.

HISTORY

1. New section filed 1–18–74 as an emergency; effective upon filing (Register 74, No. 3).
2. Certificate of Compliance filed 3–12–74 (Register 74, No. 11).
3. Amendment filed 11–4–74 as an emergency; effective upon filing (Register 74, No. 45).
4. Certificate of Compliance filed 2–19–75 (Register 75, No. 8).
5. Amendment filed 2–20–75 as an emergency; effective upon filing. Certificate of Compliance included (Register 75, No. 8).
6. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
7. Order of Repeal of subsection (a)(1) filed 6–3–85 by OAL pursuant to Government Code Section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).

§ 744. Limitations on Public Benefits for Aliens.

NOTE: Authority cited: Section 702, Fish and Game Code. Reference: Sections 2536, 3200, 3201, 3240.5, 3300, 3401, 3406, 4030, 4032, 6650, 7850, 7920, 8030 and 8460, Fish and Game Code; and 8 U.S.C. Sections 1621, 1641 and 1642.

HISTORY

1. New section filed 3–9–98 as an emergency; operative 3–9–98 (Register 98, No. 11). A Certificate of Compliance must be transmitted to OAL by 7–7–98 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of Government Code section 11346.1(g) (Register 98, No. 46).

§ 745. Guide Licenses.

Revocable guide licenses may be issued as follows:

(a) License Application. Applications shall be submitted on forms furnished by the department. Applications shall be accompanied by the required license fee and proof that the applicant possesses a surety bond in the amount of $1,000 to insure faithful performance of the applicant and the applicant's agents or employees in fulfilling their responsibilities to their clients.

(1) In addition to other information requested, applicant shall certify that he has not been convicted of any fish and game violation or forfeited bail in connection with any such violation in the preceding 24 months.

(b) License Year. Guide licenses shall be valid from February 1 through January 31 of the following year. Guide licenses issued after the beginning of the license year shall be valid for the remainder thereof.

(c) License Revocation. Upon the conviction of a licensed guide for violation of any provision of the Fish and Game Code or any regulation adopted pursuant thereto, or upon the violation of any such law or regulation by any client of such guide when the violation has been knowingly permitted by the guide or an employee or assistant of such guide, the department shall inform the commission of such violation. The commission may thereafter revoke the guide license. The licensee shall be notified of the revocation proceedings and shall be provided an opportunity to be heard.

Any person who has had his guide license revoked shall not act as a guide or assist any guide during the period of revocation.

(d) Notice to Clients. Prior to guiding any person to a place where such person intends to take any bird, mammal, fish, amphibian, or reptile, a licensed guide shall furnish a written statement to the person to be guided. Such statement must contain information describing the services which the guide agrees to perform, the cost of those services, and the guide's license number. A copy of such statement shall be available to the department or its representatives upon request.

(e) Records. Each guide, when guiding for big game mammals or fish, shall make a record of each guided trip on forms furnished by the department. The record shall contain the name, address, and license number of each person being guided and the purpose of the trip. The guide record shall be in the field with the guide and client during the trip and shall be shown on demand to any department representative. If big game mammals or fish are taken on the trip, the record shall show the number of animals, species, location taken (section, township, and range), and tag number if a tag is required.

Such records shall be completed immediately upon returning to the vehicle, camp, or headquarters, whichever is closest to the site where the animals were taken. Such records shall be accurate, legible, and complete.

The completed original record of guided hunting or fishing trips during the month shall be received by the department no later than the 10th day of the following month and all records for the preceding month shall be included in one mailing.

The duplicate copy of the record shall be retained by the licensed guide for a period of one year. The records shall be shown on demand to any department representative.

Failure of a guide to comply with subsection (e) shall be sufficient cause for the department to refuse to issue a new license to such guide or to revoke a current license.

NOTE: Authority cited: Sections 2535–2546, Fish and Game Code. Reference: Sections 2535–2546, Fish and Game Code.

HISTORY

1. New section filed 3–21–75; effective thirtieth day thereafter (Register 75, No. 12).
2. Amendment filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
3. Amendment of subsections (d) and (i) filed 6–7–82; effective thirtieth day thereafter (Register 82, No. 24).
4. Amendment filed 8–7–85; effective thirtieth day thereafter (Register 85, No. 32).
5. Editorial correction of NOTE filed 9–20–85; effective thirtieth day thereafter (Register 85, No. 38).
6. Amendment of subsection (e) filed 11–21–86; effective upon filing pursuant to Fish and Game Code Section 215 (Register 86, No. 47).

§ 745.5. Revocation or Suspension of Hunting or Sport Fishing Privileges.

(a) The commission may suspend or revoke a person's hunting or sport fishing license or permit privileges, provided that:

(1) in a court of law the person is convicted of a violation of any provision of the California Fish and Game Code; any provision of Title 14, California Code of Regulations; or any other provision of law intended to protect fish and wildlife of the State of California; and

(2) the commission complies with the procedures set forth in section 746, Title 14, California Code of Regulations.

(3) the hearing officer determines the person committed the offense intentionally, knowingly, or recklessly.

(b) A person whose license or permit privileges have been suspended or revoked pursuant to Fish and Game Code Section 12154, 12155, or 12156 may appeal the revocation to the commission, and the commission shall comply with the procedures set forth in subdivision (a) of section 746, Title 14, California Code of Regulations.

(c) The procedures set forth in section 746, Title 14, California Code of Regulations shall not apply to a person described in subdivision (a) of Fish and Game Code Section 4340 and 4754.

(d) As used in this section, "license or permit privileges" means the privilege of applying for, purchasing, and exercising the benefits conferred by a license or permit issued by the Department of Fish and Game.

(e) Any person whose license or permit privileges have been suspended or revoked shall be subject to the terms of the Wildlife Violator Compact as set forth in Fish and Game Code Section 716.

NOTE: Authority cited: Section 12155.5, Fish and Game Code. Reference: Sections 4340, 4754, 12154, 12155, 12155.5 and 12156, Fish and Game Code.

HISTORY

1. New section filed 3–25–2005; operative 4–24–2005 (Register 2005, No. 12).

§ 746. Procedures for License or Permit Revocations, Suspensions, Reinstatements, Transfers or Waivers of Renewal Requirements Including Hunting and Sport Fishing License or Permit Privileges.

Except where revocation, suspension, transfer, reinstatement or waiver of renewal requirement procedures are specifically provided for by the Fish and Game Code or regulations made pursuant thereto, the commission, pursuant to the provisions of Section 309 of the Fish and Game Code, shall comply with the following minimum safeguards to afford each applicant, licensee or permittee procedural and substantive due process when the commission considers revocation, suspension, transfer, reinstatement or waiver of renewal requirements for a license or permit including hunting and sport fishing license or permit privileges.

(a) In the case where the applicant, licensee or permittee has already been convicted of a violation of the Fish and Game Code or any regulation pertaining to the activity licensed or permitted by said code, the commission shall comply with the following:

(1) The commission's president may appoint a commissioner, the commission's legal counsel, a former Executive Director of the commission, or a member of the State Bar of California with at least ten years' experience in the active practice of law and determined qualified by the president, to serve as a hearing officer.

(2) The hearing shall be held at such time and location determined by the hearing officer with due consideration for the convenience of the parties and the ends of justice. The hearing officer may engage in exparte communications with the parties for the purpose of setting a time and place of hearing.

(3) The commission shall notify the applicant, licensee or permittee, by certified letter, of the commission's intent to consider the revocation or suspension of his or her license or permit privileges. The certified letter shall include the following information:

(A) Name of applicant, licensee or permittee and last known address the Department of Fish and Game has on file.

(B) Date, time and place of scheduled hearing.

(C) Reason for potential commission action, including a statement as to the date and fact of conviction.

(D) A copy of Section 746, Title 14, California Code of Regulations.

(E) A statement that the applicant, licensee or permittee has the right to appear and to be represented by counsel.

(F) A statement that any continuance of the scheduled hearing date may be obtained only through compliance with subsection (d) of Section 746, Title 14, California Code of Regulations.

(4) The proceedings of the hearing shall be recorded by a court reporter or an electronic tape recording system.

(5) The hearing shall be conducted by the hearing officer who shall control the nature and order of the proceedings.

(6) At the hearing, the hearing officer shall read the conviction documents. The department shall provide the hearing officer with the background information regarding the violation and conviction and shall submit into the record a copy of a document which includes the facts of the conviction of a violation of regulation or statute.

(7) The applicant, licensee or permittee shall make his or her statement regarding the violation and conviction, and may argue that extenuating circumstances were such as to not warrant the loss of his or her license or permit privileges.

(8) The hearing officer may examine any party or witness.

(9) Within 30 days of the conclusion of the hearing, the hearing officer shall prepare and submit to the executive director a proposed decision which shall include proposed findings or reasons for the commission's action.

(10) Upon receipt of the proposed decision, the commission shall provide counsel or, if appearing pro se, the applicant, licensee or permittee, by certified mail, a copy of the hearing officer's proposed decision.

(11) At a meeting of the commission, no later than 60 days following receipt of the hearing officer's proposed decision, the commission shall

consider adoption of the proposed decision. The commission may by order adopt, revise or reject the proposed decision. The commission shall serve counsel or, if appearing pro se, the applicant, licensee or permittee, by certified mail, a copy of the commission's order and decision. The order is final.

(12) The applicant, licensee or permittee may request judicial review by filing a petition for writ of mandate in accordance with provisions of the Code of Civil Procedure within 30 days from the date of service (postmark) of the order. The record of the proceedings as designated by the petitioner shall be prepared by the commission and delivered to petitioner's counsel or, if appearing pro se, the petitioner within 30 days after petitioner's request and upon payment of the fee specified in Section 69950 of the Government Code.

(b) In the case where the applicant, licensee or permittee has not been convicted of a violation of the Fish and Game Code or any regulation pertaining to the activity licensed or permitted by said code, but has been cited by the department, the commission shall comply with the following:

(1) The commission's president may appoint a commissioner, the commission's legal counsel, a former Executive Director of the commission, or a member of the State Bar of California with at least ten years experience in the active practice of law and determined qualified by the president, to serve as a hearing officer.

(2) The hearing shall be held at such time and location determined by the hearing officer with due consideration for the convenience of the parties and the ends of justice except that any hearing requested by the holder of a commercial lobster permit, pursuant to Section 8254.7 of the Fish and Game Code, shall be held within the time specified therein. The hearing officer may engage in exparte communications with the parties for the purpose of setting a time and place of hearing.

(3) The commission shall notify the applicant, licensee or permittee, by certified letter, of the commission's intent to consider the revocation or suspension of his or her license or permit privileges. The certified letter shall include the following information:

(A) Name of applicant, licensee or permittee and last known address the Department of Fish and Game has on file.

(B) Date, time and place of scheduled hearing.

(C) Reason for potential commission action, including a concise statement of the alleged acts or omissions of the applicant, licensee or permittee which constitute a violation of the Fish and Game Code and regulations made pursuant thereto with specific citations of the code sections alleged to have been violated.

(D) A copy of Section 746, Title 14, California Code of Regulations.

(E) A statement that the applicant, licensee or permittee has the right to appear and to be represented by legal counsel.

(F) A statement that any continuance of the scheduled hearing date may be obtained only through compliance with subsection (d) of Section 746, Title 14, California Code of Regulations.

(4) The proceedings of the hearing shall be recorded by a court reporter or an electronic tape recording system.

(5) The hearing shall be conducted by the hearing officer who shall control the nature and order of the proceedings.

(6) The applicant, licensee, permittee and the department have the right to present evidence at the scheduled hearing as follows:

(A) Oral evidence shall be taken on oath or affirmation.

(B) The parties may submit affidavits by adhering to the procedure set out for the submission of affidavits in lieu of testimony in judicial arbitration proceedings, California Rules of Court, Rule 1613, subdivision (b)(2), and may submit transcripts of depositions by adhering to the procedure set out for the submission of depositions in judicial arbitration proceedings, California Rules of Court, Rule 1613, subdivision (b)(3).

(C) Each party may call and examine witnesses, cross-examine opposing witnesses on any relevant matter, may rebut evidence against him or her, and may orally argue the matter.

(D) The hearing need not be conducted according to the technical rules relating to evidence and witnesses. Any relevant evidence shall be admitted if it is the sort of evidence on which responsible persons would rely in the conduct of serious affairs.

(7) The hearing officer may examine any party or witness.

(8) Within 30 days of the conclusion of the hearing, the hearing officer shall prepare and submit to the executive director a proposed decision based on the evidence presented at the hearing. The decision shall contain proposed findings and reasons for the commission's action.

(9) Upon receipt of the proposed decision, the commission shall provide counsel or, if appearing pro se, the applicant, licensee or permittee, by certified mail, a copy of the hearing officer's proposed decision.

(10) At a meeting of the commission, no later than 60 days following the receipt of the hearing officer's proposed decision, the commission shall consider adoption of the proposed decision. The commission may by order adopt, revise or reject the proposed decision. The commission shall serve counsel or, if appearing pro se, the applicant, licensee or permittee, by certified mail, a copy of the commission's order and decision. The order is final.

(11) The applicant, licensee or permittee may request judicial review by filing a petition for writ of mandate in accordance with provisions of the Code of Civil Procedure within 30 days from the date of service (postmark) of the order. The record of the proceedings as designated by the petitioner shall be prepared by the commission and delivered to petitioner's counsel or, if appearing pro se, the petitioner within 30 days after petitioner's request and upon payment of the fee specified in Section 69950 of the Government Code.

(c) In the case where the applicant, licensee or permittee has neither been convicted nor cited by the department for a violation of the Fish and Game Code, but is appealing department denial of issuance, transfer, reinstatement or requesting waiver of renewal requirements for any permit or license, including a hunting or sport fishing license or permit, the commission shall comply with the following:

(1) The commission's president may appoint a commissioner, the commission's legal counsel, a former Executive Director of the commission, or a member of the State Bar of California with at least ten years experience in the active practice of law and determined qualified by the president, to serve as a hearing officer.

(2) The hearing shall be held at such time and location determined by the hearing officer with due consideration for the convenience of the parties and the ends of justice. The hearing officer may engage in exparte communications with the parties for the purpose of setting a time and place of hearing.

(3) The commission shall notify the applicant, licensee or permittee, by certified letter, of the commission's intent to consider the request for issuance, reinstatement or waiver of renewal requirements for the license or permit. The certified letter shall include the following information:

(A) Name of applicant, licensee or permittee and last known address the Department of Fish and Game has on file.

(B) Date, time and place of scheduled hearing.

(C) A copy of Section 746, Title 14, California Code of Regulations.

(D) A statement that the applicant, licensee or permittee has the right to appear and to be represented by legal counsel.

(E) A statement that any continuance of the scheduled hearing date may be obtained only through compliance with subsection (d) of Section 746, Title 14, California Code of Regulations.

(4) The proceedings of the hearing shall be recorded by a court reporter or an electronic tape recording system.

(5) The hearing shall be conducted by the hearing officer who shall control the nature and order of the proceedings.

(6) The applicant, licensee or permittee and the department have the right to present evidence at the hearing as follows:

(A) Oral evidence shall be taken on oath or affirmation.

(B) The parties may submit affidavits by adhering to the procedure set out for the submission of affidavits in lieu of testimony in judicial arbitration proceedings, California Rules of Court, Rule 1613, subdivision (b)(2), and may submit transcripts of depositions by adhering to the pro-

cedure set out for the submission of depositions in judicial arbitration proceedings, California Rules of Court, Rule 1613, subdivision (b)(3).

(C) Each party may call and examine witnesses, cross-examine opposing witnesses on any relevant matter, may rebut evidence against him or her, and may orally argue the matter.

(D) The hearing need not be conducted according to the technical rules relating to evidence and witnesses. Any relevant evidence shall be admitted if it is the sort of evidence on which responsible persons would rely in the conduct of serious affairs.

(7) The hearing officer may examine any party or witness.

(8) Within 30 days of the conclusion of the hearing, the hearing officer shall prepare and submit to the executive director a proposed decision based on the evidence presented at the hearing. The decision shall contain proposed findings and reasons for the commission's action.

(9) Upon receipt of the proposed decision, the commission shall provide counsel or, if appearing pro se, the applicant, licensee or permittee, by certified mail, a copy of the hearing officer's proposed decision.

(10) At a meeting of the commission, no later than 60 days following the receipt of the hearing officer's proposed decision, the commission shall consider adoption of the proposed decision. The commission may by order adopt, revise or reject the proposed decision. The commission shall serve counsel or, if appearing pro se, the applicant, licensee or permittee, by certified mail, a copy of the commission's order and decision. The order is final.

(11) The applicant, licensee or permittee may request judicial review by filing a petition for writ of mandate in accordance with provisions of the Code of Civil Procedure within 30 days from the date of service (postmark) of the order. The record of the proceedings as designated by the petitioner shall be prepared by the commission and delivered to petitioner's counsel or, if appearing pro se, the petitioner within 30 days after petitioner's request and upon payment of the fee specified in Section 69950 of the Government Code.

(d) Requests or applications to continue a hearing shall be made in writing to the hearing officer or the Executive Director of the commission. The hearing officer or the Executive Director must receive the request no less than two business days prior to the scheduled date of the hearing. A copy of the request shall also be sent to the department. The application shall include the case name and the date, time, and place of the scheduled hearing. The application shall identify any previous requests to continue the matter. The application shall also contain a statement of all facts the applicant contends constitute good cause to continue the matter. The hearing officer or the Executive Director has the discretion to waive the requirement for written application upon a showing of additional good cause. In cases where the licensee or permittee is appealing department denial of issuance, transfer, reinstatement or requesting waiver of renewal requirements for any permit or license pursuant to subsection (c), above, failure to appear as scheduled or to comply with this provision shall be deemed a withdrawal of the appeal.

NOTE: Authority cited: Sections 309 and 12155.5, Fish and Game Code. Reference: Sections 309, 7852.2, 8254.7, 8280.4, 8422, 8423.5, 8562, 8569, 12154, 12155, 12155.5 and 12156, Fish and Game Code.

HISTORY

1. New section filed 1-26-87; effective upon filing pursuant to Fish and Game Code Section 215 (Register 87, No. 5).
2. Amendment of section heading, section and NOTE filed 1-6-2000; operative 1-6-2000 pursuant to Fish and Game Code sections 202 and 215 (Register 2000, No. 1).
3. Amendment of section heading, section and NOTE filed 3-25-2005; operative 4-24-2005 (Register 2005, No. 12).
4. Amendment of subsections (a)(1), (b)(1) and (c)(1) and new subsections (a)(3)(F), (b)(3)(F), (c)(3)(E) and (d) filed 6-8-2006; operative 7-8-2006 (Register 2006, No. 23).

§ 747. Guidelines for Imposing Civil Penalties.

(a) Purpose and Scope.

The provisions of this section shall be applicable for the purposes of imposing civil liability and civil penalties under Fish and Game Code sections 500 and 2580-2589 for violations described therein.

(b) Definitions.

Definitions in the Fish and Game Code and regulations adopted pursuant thereto shall apply to this section unless otherwise provided herein.

For purposes of this section, the following definitions shall apply:

(1) The term "act done for profit or personal gain" shall mean an act done for the purpose of improving or which results in an improved financial, material, possessory or other position for the person. To establish that an act was done for profit or personal gain, the department need not establish that the value or benefit received from the act exceeded the costs of accomplishing the act.

(2) "Code" is defined as the Fish and Game Code.

(3) "Regulations" are defined as Title 14, Division 1, California Code of Regulations.

(4) "Civil penalty" shall mean both civil liability for prohibited acts as outlined in Section 2582 of the Code and civil penalty for prohibited acts as outlined in Section 2583 of the Code.

(5) "Item" shall mean an animal or its carcass in its entirety, or if the carcass is no longer maintained in its entirety, any part or product thereof.

(c) Imposition of Civil Penalties.

(1) In determining the amount of the civil penalty to be proposed in the complaint pursuant to sections 2582 and 2583 of the Code, and in determining the final civil penalty to be imposed pursuant to sections 2582 and 2583 of the Code, the Director shall consider the same factors, penalties and considerations as set forth for use by the qualified referee or hearing board (see subdivision (B) of section 2584 of the Fish and Game Code).

(2) If a violator has been previously put in jeopardy for the same act or conduct for which an action for a civil penalty is brought, the penalty established by the qualified referee or hearing board shall bear a rational relationship to compensating the State for its loss and will not be based upon the penalty criteria set forth below. In determining the loss to the State, the qualified referee or hearing board shall consider, among other things, investigation and prosecution fees and costs and reasonable liquidated damages, in addition to the impact that the violation had upon the resources.

(3) If the violation involves birds, mammals, amphibians, reptiles, or fish with a value in the aggregate of less than four hundred dollars ($400) and involves only the transporting, taking or receipt of fish or wildlife taken or possessed in violation of the Code, the civil penalty shall not exceed the maximum criminal fine provided by law for the violation in the Code or ten thousand dollars ($10,000), whichever is less.

(4) Civil penalties shall be imposed on a per item basis unless:

(A) Any of the aggravating factors specified in subsection (c)(8) of this section are found by the qualified referee or hearing board to be present. If any of the aggravating factors are found, the qualified referee or hearing board can impose the penalties as set forth in that subsection;

(B) The qualified referee or hearing board determines that it is impracticable to use a per item basis. In this case, the qualified referee or hearing board can determine a reasonable unit of measure and may impose a penalty based on that, but in no case can the cost per unit exceed the maximum per item penalty set forth below; or

(C) A mitigating factor is found by the qualified referee or hearing board to be present.

(5) The qualified referee or hearing board shall use the following considerations in assessing civil penalties within the ranges set forth below:

(A) The gravity of the violation, imposing lesser penalties for acts which have little significant effect upon the resources, and greater penalties for acts which may cause serious injury to the resources;

(B) The particular nature, extent, and circumstances of the violation; and

(c) The characteristics of the violator, including the violator's assets and other resources so as to ascertain the appropriate penalty level to deter future violations. This assessment shall also include a review of the violator's degree of culpability and involvement in the activity.

(6) In setting the civil penalties for acts set forth in sections 2582 and 2583 of the Code, the qualified referee or hearing board will base the penalty upon the fair market value of the item(s) plus the amounts for the items listed below. If no fair market value exist for the item, the Department may use any generally accepted valuation methodology generally in use at the time plus the amounts listed below:

(A) Big game as defined in Section 350 of the Regulations:	$400	–	$15,000
(B) Resident small game as defined in Section 257 of the Regulations:	$ 50	–	$ 1,000
(C) Migratory game birds as defined in Section 3500 of the Code:	$ 50	–	$ 1,000
(D) Nongame birds as defined in Section 3800 of the Code:	$ 50	–	$ 500
(E) Furbearing mammals as defined in Section 4000 of the Code:	$ 50	–	$ 1,000
(F) Marine mammals as defined in Section 4500 of the Code:	$400	–	$10,000
(G) Nongame mammals as defined in Section 4150 of the Code:	$ 50	–	$ 1,000
(H) Threatened, endangered, fully protected, specially protected and rare insects and animals as defined in sections 3511, 4700, 4800 and 5515 of the Code and Section 670.5 of the Regulations:	$400	–	$10,000
(I) Threatened, endangered, or rare plants, as defined in Section 670.2 of the Regulations:	$400	–	$ 5,000
(J) Fish as defined in Section 45 of the Code:	$.01	–	$ 1,000
(K) Reptiles:	$ 50	–	$ 1,000
(L) Wild animals as defined in Section 671 of the Regulations:	$400	–	$ 5,000

(7) In addition to the foregoing penalties, the qualified referee or hearing board may impose civil penalties for acts set forth in Code sections 2582(b) and 2582(c) and 2583 in the amounts as follows:

(A) Unlawfully exporting, importing, possessing, receiving, or transporting in interstate commerce any container or package that has not been marked, labeled, or tagged in accordance with the Code or Regulations and contains any bird, mammal, amphibian, reptile, or fish, or any endangered, rare, or threatened species, or any fully protected bird, mammal, amphibian, reptile or fish, or any part thereof, up to $1,000.00 for each container or package. The penalty under this section cumulatively shall not exceed $10,000.00 for acts or conduct taking place within a 24–hour period.

(B) Unlawful failure or refusal to maintain records or paperwork required by the Code or Regulations for the payment of taxes, fees, charges, or for export, import, possession, receipt or transport, up to $1,000.00 for each individual bird, mammal, amphibian, reptile or fish, or any endangered, rare or threatened species, or any full protected bird, mammal, amphibian, reptile or fish or any part thereof. The penalty under this section cumulatively shall not exceed $10,000.00 for acts or conduct taking place within a 24–hour period.

(8) If any one of the following aggravating factors is found by the qualified referee or hearing board to exist, the qualified referee or hearing board may, based on the totality of the circumstances surrounding the violation, impose a civil penalty of up to $10,000 for each bird, mammal, amphibian, reptile, fish or endangered or threatened species, or fully protected bird, mammal or fish:

(A) The violator's conduct was, in the opinion of the qualified referee or hearing board, intentional or reckless;

(B) The violator, within the last five (5) years, has been subject to a criminal or civil penalty for violation of the Code or related codes, been a subject to civil damages, or had any license document, including but not limited to a permit, suspended or revoked. This subsection shall not apply when the previous criminal or civil penalty, civil damage, or license suspension or revocation resulted from acts or conduct which are the same as those for which the civil penalty is currently sought;

(C) The acts of the violator could have resulted or did result in serious injury to the resources of the state;

(D) The acts of the violator were part of an illegal business enterprise or a legal business enterprise conducted illegally; or

(E) The acts of the violator took place in a wildlife management area. legislative refuge, ecological reserve, state marine reserve, state marine park, state marine conservation area, national wildlife refuge, national marine sanctuary, an area of critical concern, within the boundaries of a federal or state park or recreational area, or on other public lands or water set aside for the express purpose of protecting wildlife, plants, or habitat.

(d) If the qualified referee or hearing board finds that the violation was committed incidental to commercial fishing or processing activities, then the she/he shall impose a civil penalty based on the following schedule.

(1) If the illegally taken species constitute less than five percent, wet weight, of the load or lot, the civil penalty shall be $1,000.00, or the civil penalty listed in subsection (c)(6) above, whichever is less.

(2) If the illegally taken species constitutes five percent to ten percent, wet weight, of the load or lot, the civil penalty shall be $2,000.00, or the civil penalty listed in subsection (c)(6) above, whichever is less.

(3) If the illegally taken species constitute more than ten percent, wet weight, of the load or lot, the civil penalty listed in subsection (c)(6) above shall be imposed.

NOTE: Authority cited: Sections 500 and 2589, Fish and Game Code. Reference: Sections 500 and 2580–2589, Fish and Game Code.

HISTORY

1. New section filed 8–6–91; operative 9–5–91 (Register 92, No. 4).
2. Amendment of subsection (c)(8)(E) filed 3–8–2005; operative 4–7–2005 (Register 2005, No. 10).

§ 748. Procedures for Civil Penalties and License or Permit Revocations and Suspensions.

The procedures described in this chapter shall be applicable for the purposes of imposing civil penalties under Fish and Game Code sections 500 and 2580–2589 and regulations made pursuant thereto for violations described therein and for the purposes of revoking or suspending licenses or permits under Fish and Game Code section 8025, unless specific procedures for suspension or revocation are provided for by the Fish and Game Code or regulations made pursuant thereto.

(a) Burden of Proof.

The burden of proof shall be a preponderance of the evidence.

(b) Complaint.

(1) The Director, after investigation of facts and circumstances, may issue a complaint to any person on whom a civil penalty may be imposed pursuant to Section 2582 or 2583 of the Code. The complaint shall:

(A) allege the acts or failure to act that constitute a basis for the civil penalty;

(B) state the amount of the proposed civil penalty;

(C) be served by personal service or certified mail upon the person whom a civil penalty may be imposed at the last known address of the person;

(D) shall inform the person served that a hearing will be conducted within 60 days after the date of service unless the right to a hearing is waived.

(2) In the case of a license or permit revocation or suspension, the Department shall issue a complaint that shall:

(A) state the name of the licensee or permittee;

(B) inform the person served that a hearing will be conducted within 60 days after the date of service unless the right to a hearing is waived.

(C) be served by personal service or certified mail upon the person identified in the complaint at the licensee's or permittee's last known address.

(D) state the facts which constitute a violation of the Fish and Game Code and/or the regulations made pursuant thereto, including specific citations of the Code and/or regulations alleged to have been violated. In the case of a revocation or suspension in which the licensee or permittee has been convicted of a violation of the Fish and Game Code or any regulations pertaining to the activity licensed or permitted, the complaint shall state the date and fact of conviction;

(3) The complaint issued pursuant to (b)(1) and (b)(2) above may be accompanied by a Notice of Hearing described in subsection (e) of this section.

(c) Amended or supplemental complaint before submission of case.

At any time before the matter is submitted for decision, the Director may file or permit the filing of an amended or supplemental complaint. All parties shall be notified in writing thereof. If the amended or supplemental complaint presents new charges, the Department shall afford the person served a reasonable opportunity to prepare his or her defense thereto, but he or she shall not be entitled to file a further pleading unless the qualified referee or the presiding officer of the hearing board in his or her discretion so orders. Any new charges shall be deemed controverted, and any objections to the amended or supplemental complaint may be made orally and shall be noted in the record.

(d) Amendment of complaint after submission of case.

The Director, qualified referee or presiding officer of the hearing board may order amendment of the complaint after submission of the case for decision. Each party shall be given notice of the intended amendment and opportunity to show that he or she will be prejudiced thereby unless the case is reopened to permit the introduction of additional evidence on his or her behalf. If such prejudice is shown, the Director, qualified referee or presiding officer shall reopen the case to permit the introduction of additional evidence.

(e) Notice of hearing.

(1) The Department shall deliver or mail a notice of hearing to all parties at least 10 days prior to the hearing.

(2) The notice to the person served shall be substantially in the following form but may include other information:

You are hereby notified that a hearing will be held before a qualified referee or hearing board appointed by the Department of Fish & Game at [here insert place of hearing] on the _____ day of _____ 19 _____, at the hour of _____, upon the charges made in the complaint served upon you. You may be present at the hearing. You have the right to be represented by an attorney at your own expense. You are entitled to represent yourself without legal counsel. You may present any relevant evidence, and will be given full opportunity to cross–examine all witnesses testifying against you. You are entitled to the issuance of subpoenas to compel the attendance of witnesses and the production of books, documents or other things by applying to [here insert name and address of referee or presiding officer of the hearing board].

The hearing will be conducted in the English language. If you do not proficiently speak or understand the English language and would like to request language assistance, you must notify the Department in a timely manner. The referee or hearing board may order you to pay the costs of an interpreter.

Any questions you may have regarding this hearing must be addressed to the Department of Fish and Game, Legal Office at 1416 Ninth Street, Sacramento, CA 95814, telephone no. (916) 327–4483.

(3) In the case a license or permit revocation or suspension hearing, the person shall be advised that failure to appear at the time and place of the hearing shall result in an automatic suspension of the person's license or permit. In the case of the imposition of a civil penalty, the person shall be advised that failure to appear at the time and place of the hearing shall result in the automatic imposition of the civil penalty identified in the in the complaint.

(f) Continuance of hearing.

(1) The qualified referee or presiding officer of the hearing board may, on his or her own motion or upon request of any party accompanied by a showing of good cause, continue the hearing to another time not more than 60 days after the date scheduled for the initial hearing. Application for a continuance must be made to the qualified referee or the presiding officer not less than 20 calendar days prior to the scheduled hearing.

(2) When a continuance is ordered, the qualified referee or presiding officer shall give written notice of the time and place of the continued hearing.

(g) Waiver of hearing.

A person upon whom a complaint has been served may waive a right to a hearing. This waiver must be in writing signed by the person upon whom the complaint was served or his or her duly appointed representative. If the hearing is waived, the Department shall issue an order setting the penalty in the amount proposed in the complaint or setting the revocation or suspension. This order shall be final.

(h) Time and place of hearing.

The hearing shall be held at a location determined appropriate by the Department in Sacramento, California, unless the Department and the person served mutually agree to hold the hearing in one of the following locations: San Diego, Los Angeles, Fresno, San Francisco, Eureka or Redding.

(i) Discovery; exclusive provisions.

The provisions of subsection (j) of this Section provide the exclusive right to and method of discovery as to any proceeding governed by this section.

(j) Request for discovery; statements; writings.

After initiation of a proceeding, a party, upon written request made to another party, prior to the hearing and within 30 days after service by the Department of the initial pleading or within 15 days after such service of an additional pleading, is entitled to (1) obtain the names and addresses of witnesses to the extent known to the other party, including, but not limited to, those intended to be called to testify at the hearing, and (2) inspect and make a copy of any of the following in the possession or custody or under the control of the other party:

(1) A statement pertaining to the subject matter of the proceeding made by any party to another or person;

(2) Statement of witnesses then proposed to be called by the party and of other persons having personal knowledge of the acts, omissions or events which are the basis for the proceeding, not included in subsection (j)(1) above;

(3) All writings, including, but not limited to, reports of mental, physical and blood examinations and things which the party then proposes to offer in evidence;

(4) Any other writing or thing which is relevant and which would be admissible in evidence;

(5) Investigative reports made by or on behalf of the Department or other party pertaining to the subject matter of the proceeding, to the extent that such reports (1) contain the names and addresses of witnesses or of persons having personal knowledge of the acts, omissions or events which are the basis for the proceeding, or (2) reflect matters perceived by the investigator in the course of his or her investigation, or (3) contain or include by attachment any statement or writing described in subsections (j)(1) through (4), inclusive. or summary thereof.

For the purpose of this section, "statements" include written statements by the person signed or otherwise authenticated by him or her, stenographic, mechanical, electrical or other recordings, or transcripts thereof, of oral statements by the person, and written reports or summaries of such oral statements.

Nothing in this section shall authorize the inspection or copying of any writing or thing which is privileged from disclosure by law or otherwise made confidential, or is protected as the attorney's work product.

(k) Subpoenas, service; obligation of witness to attend; witness fees, mileage, per diem.

(1) The qualified referee or presiding officer of the hearing board may issue subpoenas and subpoenas duces tecum at the request of any party for attendance or production of documents at the hearing after making a showing of relevance and good cause. Subpoenas and subpoenas duces tecum shall be issued in accordance with Sections 1985, 1985.1, and 1985.2 of the Code of Civil Procedure.

(2) The process issued pursuant to subsection (k)(1) of this section shall be extended to all parts of the State and shall be served in accordance with Sections 1987 and 1988 of the Code of Civil Procedure.

(3) All witnesses appearing pursuant to subpoena, other than the parties or officers or employees of the state or any political subdivision thereof, shall receive fees, and all witnesses appearing pursuant to subpoena, except the parties, shall receive mileage in the same amount and under the same circumstances as prescribed by law for witnesses in civil actions in a superior court. Witnesses appearing pursuant to subpoena, except the parties, who attend hearings at points so far removed from their residences as to prohibit return thereto from day to day shall be entitled in addition to fees and mileage to a per diem compensation of three dollars ($3) for expenses of subsistence for each day of actual attendance and for each day necessarily occupied in traveling to and from the hearing. Fees, mileage, and expenses of subsistence shall be paid by the party at whose request the witness is subpoenaed.

(*l*) Contempt.

If any person in proceedings before the qualified referee or the hearing board disobeys or resists any lawful order, refuses to respond to a subpoena or a subpoena duces tecum, refuses to take the oath or affirmation as a witness or thereafter refuses to be examined, or is guilty of misconduct during a hearing or so near the place thereof as to obstruct the proceedings, the qualified referee or presiding officer of the hearing board shall certify the facts to the Superior Court in and for the County where the proceedings are held for contempt proceedings pursuant to Government Code Section 11525.

(m) Depositions.

On verified petition of any party, the qualified referee or the presiding officer of the hearing board may order that the testimony of any material witness residing within or without the State be taken by deposition in the manner prescribed by law for depositions in civil actions. The petition shall set forth the nature of the pending proceeding; the name and address of the witness whose testimony is desired; a showing of the materiality of his or her testimony; a showing that the witness will be unable or cannot be compelled to attend; and shall request an order requiring the witness to appear and testify before an officer named in the petition for that purpose. Where the witness resides outside the State and where the qualified or presiding officer of the hearing board has ordered the taking of his or her testimony by deposition, the deposition shall be taken according to the provisions of California Code of Civil Procedure section 2026, as amended.

(n) Prehearing conference; subject matter; prehearing order.

(1) On motion of a party or by order of a qualified referee or presiding officer of the hearing board. the qualified referee or hearing board may conduct a prehearing conference. The qualified referee or presiding officer of the hearing board shall set the time and place for the prehearing conference, and the Department shall give written notice to all parties.

(2) The rehearing conference may deal with one or more of the following matters:

(A) Exploration of settlement possibilities.

(B) Preparation of stipulations.

(C) Clarification of issues.

(D) Rulings on identity and limitation of the number of witnesses.

(E) Objections to proffers of evidence.

(F) Order of presentation of evidence and cross–examination.

(G) Rulings regarding issuance of subpoenas and protective orders.

(H) Schedules for the submission of written briefs if necessary, and schedules for the commencement and conduct of the hearing.

(I) Any other matters as shall promote the orderly and prompt conduct of the hearing.

(3) The qualified referee or hearing board shall issue a prehearing order incorporating the matters determined at the prehearing conference. The qualified referee or hearing board may direct one or more of the parties to prepare a prehearing order.

(o) Conduct of hearing; disqualification of qualified referee or member of the hearing board; reporting.

(1) Every hearing in a contested case shall be presided over by a qualified referee or hearing board that shall exercise all powers relating to the conduct of the hearing.

(2) A qualified referee or hearing board member shall voluntarily disqualify himself or herself and withdraw from any case in which he or she cannot accord a fair and impartial hearing or consideration. Any party may request the disqualification of any qualified referee or hearing board member by filing an affidavit, prior to the taking of evidence at a hearing, stating with particularity the grounds upon which it is claimed that a fair and impartial hearing cannot be accorded. The issue shall be determined by the qualified referee or hearing board.

(3) The proceedings at the hearing shall be reported by an electronic tape recording system.

(p) Evidence; examination of witnesses; interpreters.

(1) Oral evidence shall be taken only on oath or affirmation.

(2) Each party shall have these rights: to call and examine witnesses; to introduce exhibits; to cross–examine opposing witnesses on any matter relevant to the issues even though that matter was not covered in the direct examination; to impeach any witness regardless of which party first called him or her to testify; and to rebut the evidence against him or her. If the person upon whom the complaint was served does not testify in his or her own behalf he or she may be called and examined as if under cross–examination.

(3) The hearing need not be conducted according to technical rules relating to evidence and witnesses, except as hereinafter provided. Any relevant evidence shall be admitted if it is the sort of evidence on which responsible persons are accustomed to rely upon in the conduct of serious affairs, regardless of the existence of any common law or statutory rule which might make improper the admission of the evidence over objection in civil actions. Hearsay evidence may be used for the purpose of supplementing or explaining other evidence but shall not be sufficient in itself to support a finding unless it,would be admissible over objection in civil actions. The rules of privilege shall be effective to the extent that they are otherwise required by statute to be recognized at the hearing, and irrelevant and unduly repetitious evidence shall be excluded.

(4) The hearing shall be conducted in the English language, except that a party who does not proficiently speak or understand the English language and who requests language assistance shall be provided an interpreter approved by the qualified referee or the presiding officer of the hearing board conducting the proceedings. The cost of providing the interpreter shall be paid by the Department if the qualified referee or presiding officer so directs, otherwise by the party for whom the interpreter is provided. The qualified referee's or hearing board's decision to direct payment shall be based upon an equitable consideration of all the circumstances in each case, such as the ability of the party in need of the interpreter to pay. Such an interpreter shall be selected from the list issued by the State Personnel Board pursuant to Government Code section 11513.

(5) In the event that interpreters on the approved list cannot be present at the hearing, or if there is no interpreter on the approved list for a particular language, the qualified referee or presiding officer shall have discretionary authority to provisionally qualify and utilize other interpreters.

(6) The Department shall advise each party of their right to an interpreter at the same time that each party is advised of the hearing date. Each party in need of an interpreter shall also be encouraged to give timely notice to the Department conducting the hearing so that appropriate arrangements can be made.

(7) The rules of confidentiality of the Department, if any, which may apply in an adjudicatory hearing, shall apply to any interpreter in the hearing, whether or not these rules so state.

(8) The interpreter shall not have had any involvement in the issues of the case prior to the hearing.

(q) Qualified referee or hearing board; ex parte communication with party or interested person prohibited in absence of notice and participation opportunity.

(1) Except as required for the disposition of ex parte matters specifically authorized by statute, a qualified referee or hearing board member may

not communicate, directly or indirectly, upon the merits of a contested matter while the proceeding is pending, with any party, including employees of the Department, with any person who has a direct or indirect interest in the outcome of the proceeding, or with any person who presided at a previous stage of the proceeding, without notice and opportunity for all parties to participate in the communication.

(2) Unless required for the disposition of ex parte matters specifically authorized by statute, no party to an adjudicative proceeding, including employees of the Department, and no person who has a direct or indirect interest in the outcome of the proceeding or who presided at a previous stage of the proceeding, may communicate directly or indirectly, upon the merits of a contested matter while the proceeding is pending, with any person serving as a qualified referee or hearing board member, without notice and opportunity for all parties to participate in the communication, unless prior consent is obtained from all parties to the action.

(3) If, before serving as a qualified referee or hearing board member, a person receives an ex parte communication of a type that could not properly be received while serving, the person, promptly after starting to serve, shall disclose the communication in the manner prescribed in subsection (g)(4) of this section.

(4) A qualified referee or hearing board member who receives an ex parte communication in violation of this section shall place on the record of the pending matter all written communications received, all written responses to the communications, and a memorandum stating the substance of all oral communications received, all responses made, and the identity of each person from whom the qualified referee or hearing board member received an ex parte communication, and shall advise all parties that these matters have been placed on the record. Any person desiring to rebut the ex parte communication shall be allowed to do so, upon requesting the opportunity for rebuttal within 10 days after notice of the communication.

(5) The receipt by a qualified referee or hearing board member of an ex parte communication in violation of this section may provide the basis for disqualification of that qualified referee or hearing board member pursuant to this section. If the qualified referee or hearing board member is disqualified, the portion of the record pertaining to the ex parte communication may be sealed by protective order by the qualified referee or hearing board member so disqualified.

(r) Affidavits.

(1) At any time 10 or more days prior to a hearing or a continued hearing, any party may mail or deliver to the opposing party a copy of any affidavit which he or she proposes to introduce in evidence, together with a notice as provided in subsection (r)(2) of this section. Unless the opposing party, within seven days after such mailing or delivery, mails or delivers to the proponent a request to cross–examine an affiant, his or her right to cross–examine such affiant is waived and the affidavit, if introduced in evidence. shall be given the same effect as if the affiant had testified orally. If an opportunity to cross–examine an affiant is not afforded after request therefor is made as herein provided, the affidavit may be introduced in evidence, but shall be given only the same effect as other hearsay evidence.

(2) The notice referred to in subsection (r)(1) of this section shall be substantially in the following form:

The accompanying affidavit of (here insert name of affiant) will be introduced as evidence at the hearing in (here insert title of proceeding). (here insert name of affiant) will not be called to testify orally and you will not be entitled to question him or her unless you notify (here insert name of proponent or of his or her attorney) at (here insert address) that

[The next page is 192.2(c).]

you wish to cross-examine him or her. To be effective your request must be mailed or delivered to (here insert name of proponent or his or her attorney) on or before (here insert a date seven days after the date of mailing or delivering the affidavit to the opposing party).

(s) Official notice.

In reaching a decision, official notice may be taken, either before or after submission of the case for decision, of any generally accepted technical or scientific matter within the Department's jurisdiction, and of any fact which may be judicially noticed by the courts of this State. Parties present at the hearing shall be informed of the matters to be noticed, and those matters shall be noted in the record, referred to therein, or appended thereto. Any such party shall be given a reasonable opportunity on request to refute the officially noticed matters by evidence or by written or oral presentation of authority, the manner of such refutation to be determined by the qualified referee or hearing board.

(t) Decision consideration, preparation, adoption.

(1) A qualified referee or hearing board shall prepare, within 30 days after the conclusion of the hearing, a proposed decision which recommends the penalty to be imposed or the revocation or suspension of a license or permit. The proposed decision shall be submitted to the Director and shall be served upon the person whom the complaint was issued or his or her duly appointed representative.

(2) The Director may adopt, revise or reject the proposed decision or may enter into a settlement agreement with the person upon whom the complaint was served. If the Director revises, rejects or enters into a settlement agreement, the Director shall seek the recommendation of the qualified referee or the hearing board and shall enter into record of case the reasons for that action including the qualified referee's or hearing board's recommendations.

(3) Within thirty days after receipt of the proposed decision, the Director shall issue an order. If the order is issued against the person named in the complaint, the order shall set forth the amount of civil penalty to be imposed or the revocation or suspension of a license or permit. The order shall be served by personal service or by certified mail to the person upon whom the complaint was served. The order by the Director is final.

(u) Appeal.

Within 30 days after service of a copy of an order setting the amount of a civil penalty or revoking or suspending a license or permit, the person served may file with the Superior Court a petition for writ of mandate for review of the order. The record of the proceedings shall be prepared by the Department and delivered to the person upon whom the complaint is received by the Department after payment of any and all fees for the transcription of the record.

NOTE: Authority cited: Section 2589, Fish and Game Code. Reference: Section 2580–2589, Fish and Game Code.

HISTORY

1. New section filed 8–6–91; operative 9–5–91 (Register 92, No. 4).

§ 749. Special Order Relating to Incidental Take of Sacramento River Spring–Run Chinook Salmon During Candidacy Period.

The Commission finds that, based on current knowledge and existing protection and management efforts outlined in Appendices 1* and 2*, the level of habitat loss and take of Sacramento River spring–run chinook salmon individuals which is likely to occur during the period that this regulation is in effect will not cause jeopardy to the continued existence of the species.

(a) Take Authorization

Based on the above findings, the Commission authorizes the take of Sacramento River spring–run chinook salmon during the candidacy period subject to the terms and conditions herein.

(1) Inland Sport Fishing

Take of Sacramento River spring–run chinook salmon is authorized in accordance with the regulations adopted by the Commission.

(2) Ocean Sport Fishing

Take of Sacramento River spring–run chinook salmon is authorized in accordance with the regulations adopted by the Commission.

(3) Upper Sacramento River, Tributaries

Take of Sacramento River spring–run chinook salmon is authorized incidental to life–history studies described in (d)(3)(H) of Appendix 1, water diversions as described in (d)(3)(A)–(d)(3)(E) and (d)(6) of Appendix 1, and restoration actions described in (d)(3)(F)–(d)(3)(J) of Appendix 1, provided that such activities are substantially similar in nature and scope to those activities which existed on the effective date of this regulation, and provided further that there is no material change, to the detriment of conservation, in the existing management measures. The Commission shall determine, in its sole discretion, whether there has been a detrimental material change in such management measures.

(4) San Francisco Bay/Sacramento–San Joaquin River Delta Estuary

Take of Sacramento River spring–run chinook salmon is authorized incidental to water diversions described in (d)(6) of Appendix 1, provided that such activities are substantially similar in nature and scope to those activities which existed on the effective date of this regulation, and provided further that there is no material change, to the detriment of conservation, in the existing management measures. The Commission shall determine, in its sole discretion, whether there has been a detrimental material change in such management measures.

Take of Sacramento River spring–run chinook salmon is authorized incidental to operation of the State Water Project facilities and the Central Valley Project facilities in accordance with the 1995 WQCP and the Central Valley Project Improvement Act and as may be modified by the Operations Group through the process described in (d)(5) of Appendix 1. (For example, the CALFED OPERATIONS GROUP SACRAMENTO RIVER SPRING–RUN CHINOOK SALMON PROTECTION PLAN, dated October 27, 1997, found in Appendix 2.)

(b) Additions, Modifications, or Revocation

Other actions not addressed in this regulation requiring authorization for incidental take of Sacramento River spring–run chinook salmon from the Commission pursuant to Fish and Game Code Section 2084 or, to the extent allowed by law, by the Department of Fish and Game pursuant to Fish and Game Code Section 2081, will be considered on a case–by–case basis.

The Commission may modify or repeal this regulation in whole or in part, pursuant to law, if it determines that any activity, project or persons may cause jeopardy to the continued existence of the Sacramento River spring–run chinook salmon. In the event of a "triggering event (for consultation)", as defined in the CALFED OPERATIONS GROUP SACRAMENTO RIVER SPRING–RUN CHINOOK SALMON PROTECTION PLAN, or in the event the monitoring devices currently in place on Mill and Deer creeks are removed or rendered inoperable, the Commission shall forthwith institute an emergency action under Government Code Section 11125.5(a) and (b) to review the events which gave rise to the triggering event or loss of monitoring devices, and to consider modification of this regulation.

[NOTE: During the candidacy period of the spring–run chinook salmon, the commission commits to remaining informed on a timely basis as to the activities described in this regulation to determine if the commission must consider modification of the regulation. For example, in order to be informed of and responsive to potential impacts on spring–run throughout the candidacy period, the commission staff shall receive all electronic mail notices sent by the CALFED Operations Group Data Assessment Team (DAT) and the No Name Group to provide timely information to the commission. Based on this information, the commission will determine an appropriate level of participation in these conference calls and related meetings. When considering information of potential impacts or modification of this regulation, the commission shall ask staff for pertinent information about activities from other agencies or programs that could affect spring–run salmon, including the CALFED Bay–Delta Program, the CALFED Operations Group, the SWRCB Bay–Delta Water Rights Hearings, and the U.S. Fish and Wildlife Service and National Marine Fisheries Service (with respect to their biological opinions). Such involvement and information is intended to facilitate the commission's role in providing effective measures to protect spring–run salmon while minimizing conflicts with other resource needs. As provided by this regulation, where information warrants, the commission would convene an emergency meeting (under Government Code Section 11125.5) to deter-

mine whether any activity may cause jeopardy to the spring–run and if modification of this regulation is necessary.
Specifically, the commission acknowledges that the CALFED Operations Group Spring–run Chinook Salmon Protection Plan and the fish monitoring program, described by the Plan to determine salmon movements in the rivers and the Delta, continue to be in effect throughout the spring–run candidacy period and that the status of spring–run salmon will continue to be a factor in the Operations Group's decision making. (See Appendix 2, page 2, of this regulation.) Through receipt of DAT and No Name Group conference call notices, the commission will be able to determine when to participate in these groups, especially if these groups are making recommendations to DWR and USBR as to adjustments in CVP or SWP Delta pumping operations for purposes of spring–run salmon protection. Through this process, the commission may consider providing recommendations to DWR and USBR for protecting spring–run salmon and also may consider modifying this regulation through an emergency action to implement such protective measures.]

* Copies of Appendices 1 and 2, including attachments, which are referenced in this regulation are available upon request from the Fish and Game Commission, 1416 Ninth Street, Box 944209, Sacramento, CA 94255–2090 (Telephone: 916 653–4899).

NOTE: Authority cited: Sections 200, 202, 205, 240 and 2084, Fish and Game Code. Reference: Sections 200, 202, 205, 240 and 2084, Fish and Game Code.

HISTORY

1. New section filed 11–21–97 as an emergency; operative 11–21–97 (Register 97, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–23–98 or emergency language will be repealed by operation of law on the following day.
2. Editorial correction of subsection (a)(4) and footnote (Register 98, No. 9).
3. New section refiled 2–23–98 as an emergency, including amendment of subsection (b); operative 3–20–98 (Register 98, No. 9). A Certificate of Compliance must be transmitted to OAL by 7–20–98 or emergency language will be repealed by operation of law on the following day.
4. Certificate of Compliance as to 2–23–98 order transmitted to OAL 7–9–98 and filed 8–19–98 (Register 98, No. 34).
5. Amendment of subsection (a)(4) filed 11–16–98 as an emergency; operative 11–16–98 (Register 98, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–16–99 or emergency language will be repealed by operation of law on the following day.
6. Reinstatement of section as it existed prior to 11–16–98 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 5).

§ 749.1. Special Order Relating to Incidental Take of Coho Salmon *(Oncorhynchus kisutch)* During Candidacy Period.

The commission finds that, based on current knowledge and protection and management efforts outlined in this regulation, including Exhibits A through D*, the level of habitat loss and take of coho salmon which is likely to occur during the period that this regulation is in effect will not cause jeopardy to the continued existence of the species.

(a) Take Authorization.

Based upon the above findings, the commission authorizes the take of coho salmon north of San Francisco (Exhibit A) during the candidacy period subject to the terms and conditions herein.

(1) Inland and Ocean Sport and Commercial Fishing.

Coho salmon may not be retained during sport or commercial fishing in any waters of the State. Incidentally hooked or netted coho salmon must be immediately released unharmed to the waters where they are hooked or netted.

(2) Suction Dredging.

Incidental take of coho salmon during suction dredging that complies with Section 228, Title 14, CCR, is authorized during the candidacy period.

(3) Research and Monitoring.

(A) Take of coho salmon by department personnel in the course of research and monitoring is authorized pursuant to Section 783.1(c), Title 14, CCR.

(B) Take of coho salmon in the course of research and monitoring by public agencies and private parties is authorized subject to restrictions in Exhibit B.

(4) Hatchery Operations.

Take of coho salmon by the Department of Fish and Game for hatchery management purposes is authorized pursuant to Section 783.1(c). Title 14, CCR.

(5) Habitat Restoration.

(A) Incidental take of coho salmon resulting from planning, assessment, inventory, construction, maintenance and monitoring activities consistent with the objectives of the Department of Fish and Game Fisheries Restoration Grants Program and carried out in the manner prescribed in the department's "California Salmonid Stream Habitat Restoration Manual — Third Edition, January 1998", is authorized. Incidental take resulting from an activity not carried out in such manner is authorized only if the activity is performed under the supervision or oversight of, or is funded by the department.

(B) Incidental take resulting from activities performed by department employees related to constructing, installing, operating and maintaining facilities or stream features designed to eliminate or minimize barriers to fish migration and fish rescue operations is authorized pursuant to Section 783.1(c), Title 14, CCR.

(6) Extraction of Gravel Resources.

Incidental take of coho salmon resulting from the extraction of gravel resources in a stream or river, is authorized for the coho candidacy period provided that such activities are conducted in accordance with the measures specified in Exhibit C.

(7) Water Diversions.

Incidental take of coho salmon resulting from diversion of water, for any purpose, is authorized during the candidacy period, subject to the following conditions:

(A) Existing unscreened diversions may continue in operation through the candidacy period. Upon any future determination by the commission that coho salmon shall be added to the list of threatened or endangered species, incidental take for such diversions must be authorized under Fish and Game Code Section 2081(b) or be determined exempt from the permitting requirement under Fish and Game Code Section 2080.1.

(B) Diversions approved and constructed after the effective date of this section shall be screened and shall meet the Department of Fish and Game Fish Screening Criteria (dated June 19, 2000) included in this regulation as Exhibit D.

(C) Existing fish screens that are repaired, upgraded, or reconstructed during the candidacy period must meet the Department of Fish and Game Fish Screening Criteria (dated June 19, 2000) included in this regulation as Exhibit D.

(8) Department of Fish and Game Streambed Alteration Agreements.

Incidental take of coho salmon during the candidacy period is authorized for any project carried out in compliance with section 1601 or 1603 of the Fish and Game Code, for which a Lake or Streambed Alteration Agreement (Agreement) has been entered into between the department and the party undertaking the activity, provided that:

(A) any measures identified by the department as necessary to protect coho salmon are incorporated into the signed Agreement and are fully implemented by the party undertaking the activity; and

(B) the project otherwise complies with other relevant provisions of this section. Projects that will involve the extraction of mineral resources shall also comply with subsection (a)(6), and projects involving water diversions shall also comply with subsection (a)(7) of Section 749.1, Title 14, CCR.

(9) Pacific Lumber Company Habitat Conservation Plan.

Incidental take of coho salmon resulting from activities within the Plan and Permit Area described as Covered Activities in the "Habitat Conservation Plan for the Properties of The Pacific Lumber Company, Scotia Pacific Holding Company, and Salmon Creek Corporation, February 1999", is authorized during the candidacy period insofar as activities are conducted in accordance with the relevant Operating Conservation Plans.

(10) Forest Practices.

Incidental take of coho salmon is authorized during the candidacy period for otherwise lawful timber operations that comply with conditions

specified in the revised final rule language, "Protection for Threatened and Impaired Watersheds, 2000", sections 895, 895.1, 898, 898.2, 914.8, 934.8, 954.8, 916, 936, 956, 916.2, 936.2, 956.2, 916.9, 936.9, 956.9, 916.11, 936.11, 956.11, 916.12, 936.12, 956.12, 923.3, 943.3, 963.3, 923.9, 943.9 and 963.9, Title 14, CCR (which can be found on the Board of Forestry website at www.fire.ca.gov/BOF/pdfs/FRLZ00011814.pdf).

(11) Additions, Modifications or Revocation.

(A) Incidental take of coho salmon north of San Francisco from activities not addressed in this section may be authorized during the candidacy period by the commission pursuant to Fish and Game Code Section 2084 or by the department pursuant to Fish and Game Code Section 2081, on a case–by–case basis.

(B) The commission may modify or repeal this regulation in whole or in part, pursuant to law, if it determines that any activity or project may cause jeopardy to the continued existence of coho salmon north of San Francisco.

*A copy of Exhibits A through D which are referenced in this regulation is available upon request from the Fish and Game Commission, 1416 Ninth Street, Box 944209, Sacramento, CA 94255–2090 (Telephone 916 653–4899).

NOTE: Authority cited: Sections 200, 202, 205 and 2084, Fish and Game Code. Reference: Sections 200, 202, 205, 2080, 2084 and 2085, Fish and Game Code.

HISTORY

1. New section and Exhibits A–D filed 4–26–2001 as an emergency; operative 4–26–2001 (Register 2001, No. 17). A Certificate of Compliance must be transmitted to OAL by 8–24–2001 or emergency language will be repealed by operation of law on the following day.
2. New section and Exhibits A–D refiled 8–23–2001 as an emergency; operative 8–25–2001 (Register 2001, No. 34). A Certificate of Compliance must be transmitted to OAL by 12–24–2001 or emergency language will be repealed by operation of law on the following day.
3. Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 1).
4. New section and Exhibits A–D filed 12–31–2001 as an emergency; operative 12–31–2001 (Register 2002, No. 1). A Certificate of Compliance must be transmitted to OAL by 4–30–2002 or emergency language will be repealed by operation of law on the following day.
5. Certificate of Compliance as to 12–31–2001 order, including amendment of subsection (a)(5)(A) and repealer and new Exhibit A, transmitted to OAL 4–26–2002 and filed 6–6–2002 (Register 2002, No. 23).

Exhibit A — Coho Salmon Distribution North of San Francisco

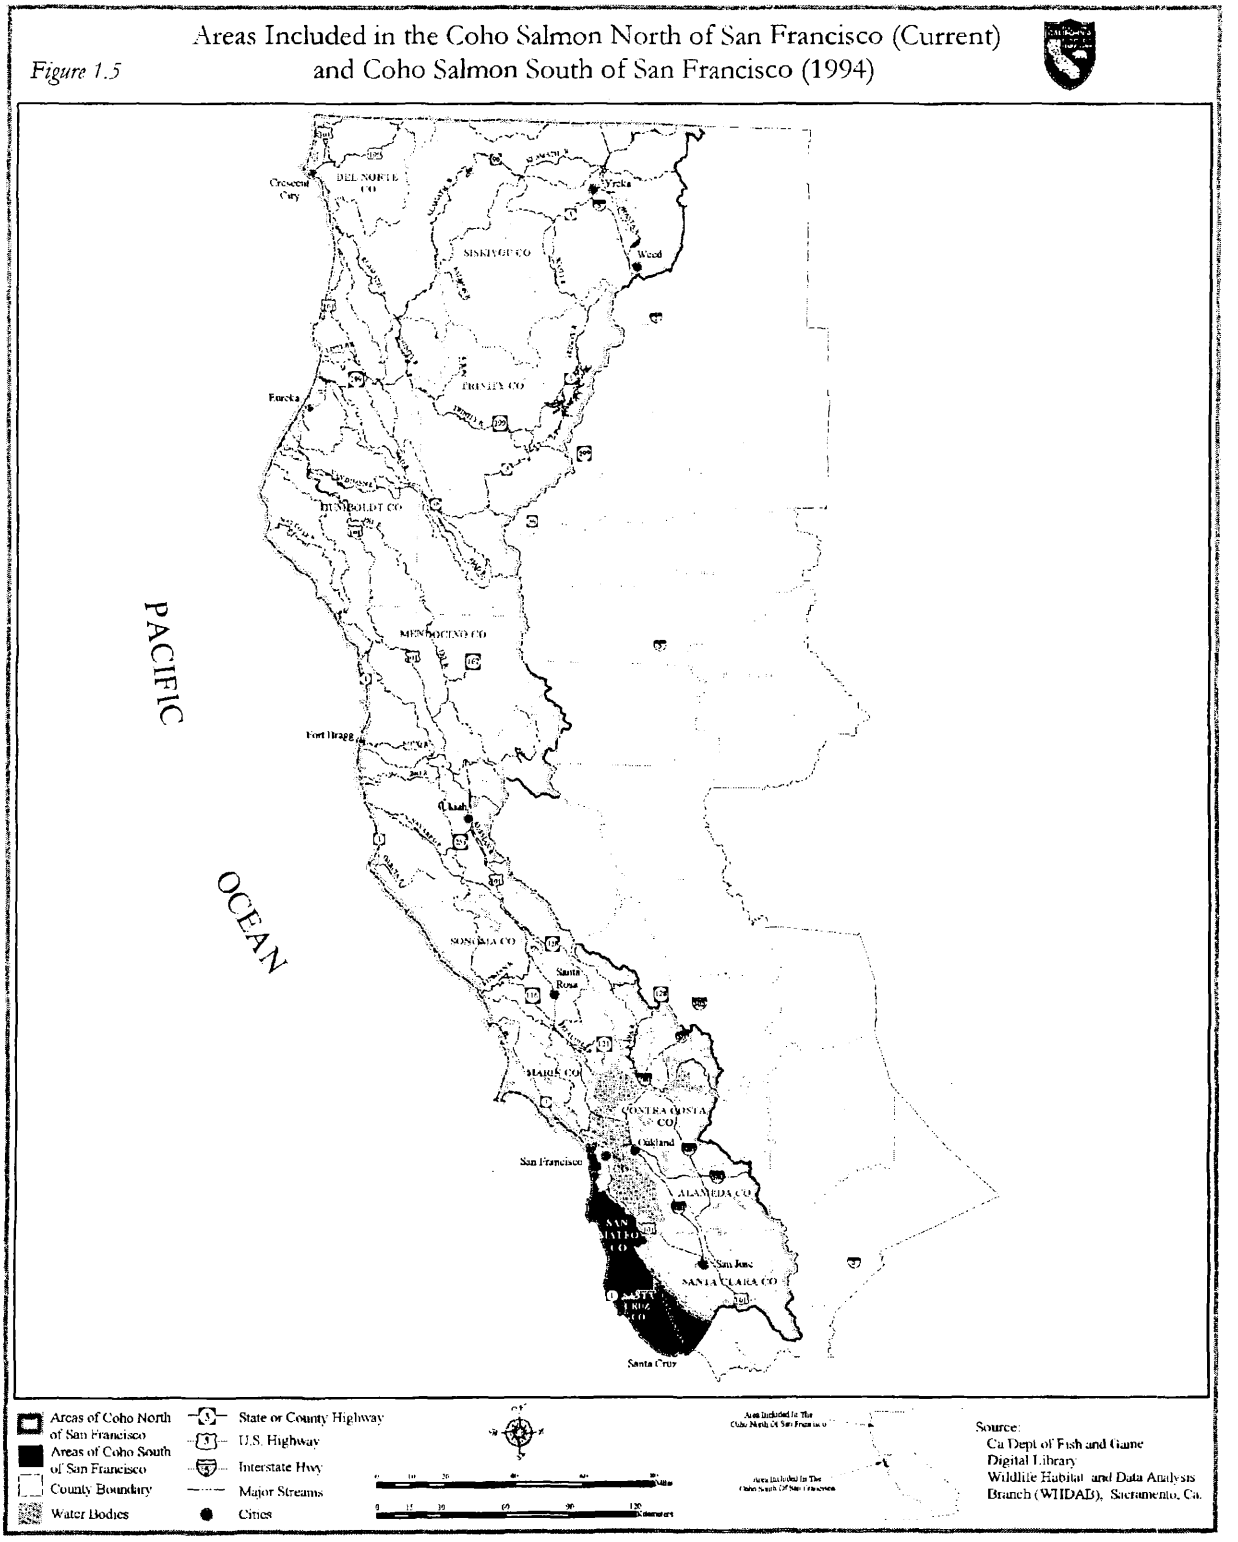

Exhibit B
Incidental Take Authorization Standards for Research and Monitoring During the Candidacy Period for Coho Salmon

Research Proposals

Take of coho salmon during the candidacy period is authorized for individuals, agencies, or universities and landowners for purposes of research and monitoring provided that:

(i) For ongoing research, a written, detailed project proposal describing objectives, methods (gear, sampling schedules and locations), efforts to minimize adverse effects to the species, estimated level of take of the species, and a copy of a permit authorizing take pursuant to the Federal Endangered Species Act shall be provided to the appropriate Department Regional Manager within 45 days of this regulation becoming effective.

(ii) For research which has not yet commenced, a written, detailed project proposal describing objectives, methods (gear, sampling schedules and locations), efforts to minimize adverse effects to the species, estimated level of take of the species, and a copy of a permit authorizing take pursuant to the Federal Endangered Species Act shall be provided to the appropriate Department Regional Manager.

(iii) The research or monitoring may commence once the Department issues written concurrence that the research and monitoring activities conducted are consistent with the Department's research and monitoring programs and are sufficient to protect coho salmon. The Department may specify additional terms and conditions for the protection of coho salmon and the reporting of all data collected to the Department.

Alternative Procedure

At the discretion of the Department, research and monitoring activities not addressed by the above procedures may receive separate authorization for take of coho salmon by the Department pursuant to Fish and Game Code Section 2081.

Department of Fish and Game Contacts

Regional Manager, Northern California — North Coast Region; 601 Locust Street, Redding, CA 96001 — (530) 225–2300.

Regional Manager, Central Coast Region; 7329 Silverado Trail, P.O. Box 46, Yountville, CA 94599 — (707) 944–5500.

Exhibit C
Incidental Take Authorization Standards for In–Stream Gravel Extraction During the Candidacy Period for Coho Salmon

1. A gravel extraction plan including design features, mitigation measures, and enhancement recommendations that minimize impacts to salmonids shall be prepared by the operator and submitted to the Department for review and approval before extraction may begin. The maximum amount permitted to be removed shall be no more than the amount of sand and gravel that is annually replenished in the proposed extraction area, and cumulative extraction quantities shall be consistent with the long–term average annual sustained yield based on estimates of mean annual recruitment.

2. Extraction of gravel shall be accomplished by "skimming" or grading of gravel from bars above the low water channel unless another technique is approved in advance by the Department. The gravel bars shall be sloped from the bank down towards the thalweg and downstream to avoid stranding of salmonids. No holes or depressions shall be allowed to remain in the extraction area. No extraction of the streambanks shall be allowed.

3. Low flow channel confinement shall be maximized by utilizing the low flow silt line, where available, in designing the vertical offset. The silt line measurement shall be taken on or before July 15th of any year unless an alternate date is approved, in advance, by the Department. The vertical offset shall be at least one foot. A larger vertical offset, as determined by the Department, may be necessary to maximize the low flow channel confinement.

4. Gravel bar stability shall be protected by minimizing extraction on the upstream one–third of gravel bars. No extraction shall be allowed in riffle sections. The Department shall review proposed gravel extraction plans during an annual site inspection and make specific recommendations to protect salmonid habitat.

5. Channel crossing construction shall not begin before June 15. Removal of channel crossings shall be completed by September 30. If temporary culverts are installed, they will be installed in such a manner so that they will not impede the passing of fish up and down stream.

6. Large woody debris (LWD) shall be stockpiled before gravel extraction begins and redistributed on the gravel bar after the extraction site has been reclaimed at the end of the extraction season. To the extent possible, vehicular access onto gravel mining sites shall be controlled to minimize the loss of LWD from firewood collectors.

7. Trees exceeding 1 inch DBH shall not be removed, and clumps of smaller trees shall not be removed except by prior approval of the Department. The disturbance or removal of vegetation shall be minimized, shall not exceed that necessary to complete operations and shall be limited to areas where extraction has occurred within the past two years.

8. The project shall comply with Section 1601 or 1603 of the California Fish and Game Code, and a Lake or Streambed Alteration Agreement shall be obtained from the Department. Any measures identified by the Department as necessary to protect coho salmon shall be incorporated into the signed agreement and shall be fully implemented.

Exhibit D
Department of Fish and Game
Fish Screening Criteria
June 19, 2000

1. STRUCTURE PLACEMENT

A. Streams And Rivers (flowing water): The screen face shall be parallel to the flow and adjacent bankline (water's edge), with the screen face at or streamward of a line defined by the annual low–flow water's edge.

The upstream and downstream transitions to the screen structure shall be designed and constructed to match the back–line, minimizing eddies upstream of, in front of and downstream of, the screen.

Where feasible, this "on–stream" fish screen structure placement is preferred by the California Department of Fish and Game.

B. In Canals (flowing water): The screen structure shall be located as close to the river source as practical, in an effort to minimize the approach channel length and the fish return bypass length. This "in canal" fish screen location shall only be used where an "on–stream" screen design is not feasible. This situation is most common at existing diversion dams with headgate structures.

The National Marine Fisheries Service — Southwest Region "Fish Screening Criteria for Anadromous Salmonids, January 1997" for these types of installations shall be used.

C. Small Pumped Diversions: Small pumped diversions (less than 40 cubic–feet per second) which are screened using "manufactured, self–contained" screens shall conform to the National Marine Fisheries Service — Southwest Region "Fish Screening Criteria for Anadromous Salmonids, January 1997".

D. Non–Flowing Waters (tidal areas, lakes and reservoirs): The preferred location for the diversion intake structure shall be offshore, in deep water, to minimize fish contact with the diversion. Other configurations will be considered as exceptions to the screening criteria as described in Section 5.F. below.

2. APPROACH VELOCITY (Local velocity component perpendicular to the screen face

A. Flow Uniformity: The design of the screen shall distribute the approach velocity uniformly across the face of the screen. Provisions shall be made in the design of the screen to allow for adjustment of flow patterns. The intent is to ensure uniform flow distribution through the entire face of the screen as it is constructed and operated.

B. Self–Cleaning Screens: The design approach velocity shall not exceed:

1. Streams And Rivers (flowing waters) — Either:

a. 0.33 feet per second, where exposure to the fish screen shall not exceed fifteen minutes, or

b. 0.40 feet per second, for small (less than 40 cubic-feet per second) pumped diversions using "manufactured, self-contained" screens.

2. In Canals (flowing waters) — 0.40 feet per second, with a bypass entrance located every one-minute of travel time along the screen face.

3. Non-Flowing Waters (tidal areas, lakes and reservoirs) — The specific screen approach velocity shall be determined for each installation, based on the species and life stage of fish being protected. Velocities which exceed those described above will require a variance to these criteria (see Section 5.F. below).

(Note: At this time, the U.S. Fish and Wildlife Service has selected a 0.2 feet per second approach velocity for use in waters where the Delta smelt is found. Thus, fish screens in the Sacramento-San Joaquin Estuary should use this criterion for design purposes.)

C. Screens Which Are Not Self-Cleaning: The screens shall be designed with an approach velocity one-fourth that outlined in Section B. above. The screen shall be cleaned before the approach velocity exceeds the criteria described in Section B.

D. Frequency Of Cleaning: Fish screens shall be cleaned as frequently as necessary to prevent flow impedance and violation of the approach velocity criteria. A cleaning cycle once every 5 minutes is deemed to meet this standard.

E. Screen Area Calculation: The required wetted screen area (square feet), excluding the area affected by structural components, is calculated by dividing the **maximum** diverted flow (cubic-feet per second) by the allowable approach velocity (feet per second). Example:,

1.0 cubic-feet per second / 0.33 feet per second = 3.0 square feet

Unless otherwise specifically agreed to, this calculation shall be done at the **minimum** stream stage.

3. SWEEPING VELOCITY (Velocity component parallel to screen face)

A. In Streams And Rivers: The sweeping velocity should be at least two times the allowable approach velocity.

B. In Canals: The sweeping velocity shall exceed the allowable approach velocity. Experience has shown that sweeping velocities of 2.0 feet per second (or greater) are preferable.

C. Design Considerations: Screen faces shall be designed flush with any adjacent screen bay piers or walls, to allow an unimpeded flow of water parallel to the screen face.

4. SCREEN OPENINGS

A. Porosity: The screen surface shall have a minimum open area of 27 percent. We recommend the maximum possible open area consistent with the availability of appropriate material, and structural design considerations.

The use of open areas less than 40 percent shall include consideration of increasing the screen surface area, to reduce slot velocities, assisting in both fish protection and screen cleaning.

B. Round Openings: Round openings in the screening shall not exceed 3.96mm (5/32in). In waters where steelhead rainbow trout fry are present, this dimension shall not exceed 2.38mm (3/32in).

C. Square Openings: Square openings in screening shall not exceed 3.96mm (5/32in) measured diagonally. In waters where steelhead rainbow trout fry are present, this dimension shall not exceed 2.38mm (3/32in) measured diagonally.

D. Slotted Openings: Slotted openings shall not exceed 2.38mm (3/32in) in width. In waters where steelhead rainbow trout fry are present, this dimension shall not exceed 1.75mm (0.0689in).

5. SCREEN CONSTRUCTION

A. Material Selection: Screens may be constructed of any rigid material, perforated, woven, or slotted that provides water passage while physically excluding fish. The largest possible screen open area which is consistent with other project requirements should be used. Reducing the screen slot velocity is desirable both to protect fish and to ease cleaning requirements. Care should be taken to avoid the use of materials with sharp edges or projections which could harm fish.

B. Corrosion And Fouling Protection: Stainless steel or other corrosion-resistant material is the screen material recommended to reduce clogging due to corrosion. The use of both active and passive corrosion protection systems should be considered.

Consideration should be given to anti-fouling material choices, to reduce biological fouling problems. Care should be taken not to use materials deemed deleterious to fish and other wildlife.

C. Project Review And Approval: Plans and design calculations, which show that all the applicable screening criteria have been met, shall be provided to the Department before written approval can be granted by the appropriate Regional Manager.

The approval shall be documented in writing to the project sponsor, with copies to both the Deputy Director, Habitat Conservation Division and the Deputy Director, Wildlife and Inland Fisheries Division. Such approval may include a requirement for post-construction evaluation, monitoring and reporting.

D. Assurances: All fish screens constructed after the effective date of these criteria shall be designed and constructed to satisfy the current criteria. Owners of existing screens, approved by the Department prior to the effective date of these criteria, shall not be required to upgrade their facilities to satisfy the current criteria unless:

1. The controlling screen components deteriorate and require replacement (i.e., change the opening size or opening orientation when the screen panels or rotary drum screen coverings need replacing),

2. Relocation, modification or reconstruction (i.e., a change of screen alignment or an increase in the intake size to satisfy diversion requirements) of the intake facilities, or

3. The owner proposes to increase the rate of diversion which would result in violation of the criteria without additional modifications.

E. Supplemental Criteria: Supplemental criteria may be issued by the Department for a project, to accommodate new fish screening technology or to address species-specific or site-specific circumstances.

F. Variances: Written variances to these criteria may be granted with the approval of the appropriate Regional Manager and concurrence from both the Deputy Director, Habitat Conservation Division and the Deputy Director, Wildlife and Inland Fisheries Division. At a minimum, the rationale for the variance must be described and justified in the request.

Evaluation and monitoring may be required as a condition of any variance, to ensure that the requested variance does not result in a reduced level of protection for the aquatic resources.

It is the responsibility of the project sponsor to obtain the appropriate fish screen criteria as provided herein. Project sponsors should contact the Department of Fish and Game, the National Marine Fisheries Service (for projects in marine and anadromous waters) and the U.S. Fish and Wildlife Service (for projects in anadromous and fresh waters) for guidance.

Copies of the criteria are available from the Department of Fish and Game through the appropriate Regional office, which should be the first point of contact for any fish screening project.

§ 749.2. Incidental Take of Xantus's Murrelet (*Synthliboramphus hypoleucus*) During Candidacy Period.

NOTE: Authority cited: Sections 200, 202, 205, 240 and 2084, Fish and Game Code. Reference: Sections 200, 202, 205, 240, 2080, 2084 and 2085, Fish and Game Code.

HISTORY

1. New section filed 11–7–2002 as an emergency; operative 11–7–2002 (Register 2002, No. 45). A Certificate of Compliance must be transmitted to OAL by 3–7–2003 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 3–4–2003 as an emergency; operative 3–7–2003 (Register 2003, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–7–2003 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 3–4–2003 order, including amendment of section heading and NOTE, transmitted to OAL 6–10–2003 and filed 6–24–2003 (Register 2003, No. 26).
4. Repealer filed 11–22–2004; operative 12–22–2004 (Register 2004, No. 48).

§ 749.3. Special Order Relating to the Incidental Take of Longfin Smelt (*Spirinchus thaleichthys*) During Candidacy Period.

The Commission finds that, based on current knowledge and the protection and management efforts outlined in this regulation, including Exhibits A through E, the level of habitat loss and take of longfin smelt which is likely to occur during the period that this regulation is in effect will not cause an appreciable reduction in the species' ability to survive and reproduce.

(a) Take Authorization

(1) Research and Monitoring

(A) Take of longfin smelt by Department personnel in the course of research and monitoring is authorized pursuant to Section 783.1(c), Title 14, CCR.

(B) Take of longfin smelt in the course of research and monitoring by public agencies and private parties is authorized subject to the following:

1. For ongoing research, a written, detailed project proposal describing objectives, methods (gear, sampling schedules and locations), efforts to minimize adverse effects to the species, and estimated level of take of the species shall be provided to the Regional Manger of the Bay Delta Region at the address specified in subsection (4) below within 45 days of this regulation becoming effective.

2. For research which has not yet commenced, a written, detailed project proposal describing objectives, methods (gear, sampling schedules and locations), efforts to minimize adverse effects to the species, and estimated level of take of the species shall be provided to the Regional Manger at the address specified in subsection (4) below.

3. The research or monitoring may commence once the Department issues written concurrence that the research and monitoring activities conducted are consistent with the Department's research and monitoring programs and are sufficient to protect longfin smelt. The Department may specify additional terms and conditions for the protection of longfin smelt and the reporting of all data collected to the Department.

4. Regional Manager, Bay Delta Region, P.O. Box 47, Yountville, CA 94599 — (707) 944–5500.

(C) Notwithstanding the foregoing, at the discretion of the Department, research and monitoring activities not addressed by the above procedures may receive separate authorizations for take of longfin smelt pursuant to Fish and Game Code Section 2081.

(2) Dredging and Extraction of Sand or Gravel Resources

Take of longfin smelt incidental to otherwise lawful dredging or extraction of sand or gravel resources in a stream or river is authorized for the longfin smelt candidacy period provided that any activity already required to monitor and report the take of any fish species to the Department or a federal wildlife agency also include the following information: the date, location and number of any longfin smelt taken during the candidacy period. A copy of the report shall be mailed to: Regional Manager, Bay Delta Region, P.O. Box 47, Yountville, CA 94599 — (707) 944–5500.

(3) Local Water Diversions

Incidental take of longfin smelt resulting from diversion of water by any local agency, private party, or the State Water Project North Bay Aqueduct or Suisun Marsh facilities, is authorized during the candidacy period, subject to the following conditions:

(A) Existing unscreened diversions may continue in operation through the candidacy period. Upon any future determination by the commission that longfin smelt shall be added to the list of threatened or endangered species, incidental take for such diversions must be authorized under Fish and Game Code Section 2081(b) or, if longfin smelt become listed pursuant to Section 1533 of Title 16 of the United States Code, be determined exempt from the permitting requirement under Fish and Game Code Section 2080.1.

(B) Diversions approved and constructed after the effective date of this section shall be screened and shall use the Department of Fish and Game Fish Screening Criteria for delta smelt (*Hypomesus transpacificus*) in Exhibit A as the fish screening criteria for longfin smelt.

(C) Existing fish screens that are repaired, upgraded, or reconstructed during the candidacy period must screen for longfin smelt by meeting the Department of Fish and Game Fish Screening Criteria for delta smelt in Exhibit A.

(D) Any activity already required to monitor and report the take of any fish species to the Department or a federal wildlife agency shall also include the following information: the date, location and number of any longfin smelt taken during the candidacy period. A copy of the report shall be mailed to: Regional Manager, Bay Delta Region, P.O. Box 47, Yountville, CA 94599 — (707) 944–5500.

(4) State Water Project and Federal Central Valley Project Export Facilities

In *Natural Resources Defense Council v. Kempthorne* (Kempthorne), the United States Eastern District Court issued an Interim Remedial Order Following Summary Judgment and Evidentiary Hearing which required specific limitations on the joint operations of the State Water Project (SWP) and the Federal Central Valley Project (CVP) in order to prevent the extinction of delta smelt until a new delta smelt biological opinion is issued by the United States Fish and Wildlife Service (FWS). The court has directed FWS to issue its new opinion by September 15, 2008. When the new biological opinion is issued, the *Kempthorne* requirements will terminate. The *Kempthorne* requirements are triggered by environmental conditions and the presence of specific delta smelt life stages and are focused on minimizing the negative entrainment effects caused when the combined export pumping of the SWP, operated by the Department of Water Resources (DWR) and the CVP, operated by the U.S. Department of the Interior, Bureau of Reclamation (Reclamation) reverses the flow in Old and Middle River (OMR). A series of *Kempthorne* OMR flow requirements began in late–December 2007 and will continue until June 20, 2008, sequentially targeting adult delta smelt during migration prior to spawning, spawning delta smelt, larvae and juveniles.

The Commission recognizes that there are statistical correlations between negative OMR flows and take of different longfin smelt life stages, as there are for delta smelt. There is substantial overlap in the periods when the two species are taken by the SWP and CVP. However, adult longfin smelt can be taken a month or more earlier than delta smelt (potentially in December). Because longfin smelt typically spawn earlier, the larvae may be present earlier as well (potentially in February). Consequently, concurrent take of both delta smelt and longfin smelt may include different life stages and magnitudes and Kempthorne requirements keyed to delta smelt presence may not match longfin smelt timing. The following measures will protect longfin smelt during the candidacy period when OMR limits required under *Kempthorne* for delta smelt may not

be in effect or adequately protective. The Commission therefore authorizes take of longfin smelt incidental to the coordinated operations of the SWP and CVP export facilities in accordance with the following OMR limits, or the OMR limits set in *Kempthorne*, whichever are more protective:

(A) Monitoring for the presence of adult (≥85mm Fork Length (FL)) and larval longfin smelt (<20 mmFL) shall be achieved as follows:

1. For adults by standard field sampling intervals, methods and locations of the Fall Midwater Trawl Survey, the San Francisco Bay Study Survey and the Spring Kodiak Trawl Survey.

2. For larvae, by initiating the 20mm Survey beginning in the first two weeks of March and conducting single tows at sampling locations 405, 411, 418, 602, 501, 504, 519, 508, 513, 520, 703, 704, 706, 707, 711, 716, 705, 801, 802, 804, 809, 812, 815, 901, 902, 906, 910, 912, 914, 915, 918, 919; In the last two weeks in March the full 20mm Survey will begin using standard survey protocol, sampling three tows per sampling location at all 41 standard locations.

3. DWR and Reclamation shall ensure that smelt collected at the SWP and the CVP, respectively, are preserved in formalin or ethanol, labeled with the date and location of collection, and transferred to the Department's Bay–Delta Region Stockton office, 4001 N Wilson Way, Stockton, CA 92405, within two business days to the attention of Marty Gingras for a determination of sex and reproductive status (i.e., egg stage or spent). Identification of any larval longfin smelt collected at either facility shall be reported within one business day to Marty Gingras at the Department's Bay–Delta Region Stockton office.

(B) Commencing on the effective date of this regulation, DWR and Reclamation shall protect spawning, larval, and juvenile longfin smelt by jointly operating the CVP and SWP to achieve a daily average net upstream (reverse) OMR flow (as computed for *Kempthorne* compliance) between 750 and 5,000 cfs on a seven–day running average beginning when longfin smelt spawning is indicated by: (i) the presence of spent female longfin smelt (≥85mm FL) in the Spring Kodiak Trawl (stations 809, 812, 815, 902, 906, 910, 912, 914, 915 on Exhibit B) or in the San Francisco Bay Study Otter Trawl or Midwater Trawl surveys (stations 863, 864, 865 on Exhibit C), all of which are located east or south of Jersey Point in the San Joaquin River, or south Delta channels or at either the SWP or CVP fish salvage facilities or (ii) when larval longfin smelt (<20mm FL) are detected in the 20mm Survey (stations 809, 812, 815, 901, 902, 906, 910, 912, 914, 915, 918 on Exhibit D) east or south of Jersey Point in the San Joaquin River or in south Delta channels or at the SWP or CVP fish salvage facility.

The specific biological flow objective within this range shall be set by the Department, after consultation with the FWS, DWR and Reclamation, to be determined on a weekly basis and based upon a Longfin Smelt Risk Assessment Matrix (LSRAM)(Exhibit E) to be refined by the Department in consultation with FWS, DWR, and Reclamation and the best available scientific and commercial information concerning the distribution and status of longfin smelt. The LSRAM is patterned after the Delta Smelt Risk Assessment Matrix only modified to reflect longfin smelt biology and life stages and available information. This action is suspended during any time: (i) the three–day average of flow in the Sacramento River at Freeport exceeds 80,000 cfs and is resumed when the three–day average Delta outflow falls below 40,000 cfs and adult or larval longfin smelt are again detected east or south of Jersey Point as described above, or (ii) the Vernalis Adaptive Management Plan is being implemented (31 days, typically in mid–April to mid–May). This action shall continue until, in the reasonable discretion of the Department, after consultation with the FWS, DWR, and Reclamation, the longfin smelt entrainment risk at each facility is abated, or June 20, 2008 whichever occurs first.

(C) Notwithstanding the foregoing, this regulation shall not prevent DWR or Reclamation from taking any action in operating the projects that is reasonably necessary to protect human health or safety of the public, including, but not limited to, any act or omission reasonably necessary to protect the structural integrity of any SWP or CVP facility.

(D) In the event DWR receives a permit from the Department pursuant to Fish and Game Code Section 2081, which governs the take of longfin smelt, those requirements under Section 749.3(a)(4) which apply to DWR shall be superseded by the terms of such permit.

(E) This emergency regulation shall be in effect for 180 days. It does not contain measures to protect pre–spawning longfin smelt or their larvae after June 20, 2008 from the effects of project operations, which effects can occur as early as late November or early December 2008. If this regulation is extended, operational requirements for this December — February period may be added by amending this regulation prior to expiration or extension.

NOTE: Authority cited: Sections 200, 202, 205, 240 and 2084, Fish and Game Code. Reference: Sections 200, 202, 205, 240 and 2084, Fish and Game Code.

HISTORY

1. New section and Exhibits A–E filed 2–27–2008 as an emergency; operative 2–29–2008 (Register 2008, No. 9). A Certificate of Compliance must be transmitted to OAL by 8–27–2008 or emergency language will be repealed by operation of law on the following day.

Exhibit A
Department of Fish and Game
Fish Screening Criteria
June 19, 2000

1. STRUCTURE PLACEMENT

A. Streams And Rivers (flowing water): The screen face shall be parallel to the flow and adjacent bankline (water's edge), with the screen face at or streamward of a line defined by the annual low–flow water's edge.

The upstream and downstream transitions to the screen structure shall be designed and constructed to match the bankline, minimizing eddies upstream of, in front of, and downstream of, the screen.

Where feasible, this "on–stream" fish screen structure placement is preferred by the California Department of Fish and Game.

B. In Canals (flowing water): The screen structure shall be located as close to the river source as practical, in an effort to minimize the approach channel length and the fish return bypass length. This "in canal" fish screen location shall only be used where an "on–stream" screen design is not feasible. This situation is most common at existing diversion dams with headgate structures.

The National Marine Fisheries Service — Southwest Region "Fish Screening Criteria for Anadromous Salmonids, January 1997" shall be used for these types of installations.

C. Small Pumped Diversions: Small pumped diversions (less than 40 cubic–feet per second) which are screened using "manufactured, self–contained" screens shall conform to the National Marine Fisheries Service — Southwest Region "Fish Screening Criteria for Anadromous Salmonids, January 1997."

D. Non–Flowing Waters (tidal areas, lakes and reservoirs): The preferred location for the diversion intake structure shall be offshore, in deep water, to minimize fish contact with the diversion. Other configurations will be considered as exceptions to the screening criteria as described in Section 5.F. below.

2. APPROACH VELOCITY (Local velocity component perpendicular to the screen face)

A. Flow Uniformity: The design of the screen shall distribute the approach velocity uniformly across the face of the screen. Provisions shall be made in the design of the screen to allow for adjustment of flow patterns. The intent is to ensure uniform flow distribution through the entire face of the screen as it is constructed and operated.

B. Self–Cleaning Screens:[1]

The U.S. Fish and Wildlife Service has selected a 0.2 feet per second approach velocity for use in waters where the Delta smelt is found. Thus, fish screens in the Sacramento–San Joaquin Delta and San Francisco Estuary should use this criterion for design purposes. In addition:

1. Streams and Rivers (flowing waters) — exposure to the fish screen shall not exceed fifteen minutes.

2. In Canals (flowing waters) — a bypass entrance shall be located every one–minute of travel time along the screen face.

3. Non–Flowing Waters (tidal areas, lakes and reservoirs) — The specific screen approach velocity shall be determined for each installation, based on the delta smelt life stage being protected. Velocities which exceed those described above will require a variance to these criteria (see Section 5.F. below).

C. Screens Which Are Not Self–Cleaning: The screens shall be designed with an approach velocity one–fourth that outlined in Section B. above. The screen shall be cleaned before the approach velocity exceeds the criteria described in Section B.

D. Frequency Of Cleaning: Fish screens shall be cleaned as frequently as necessary to prevent flow impedance and violation of the approach velocity criteria. A cleaning cycle once every 5 minutes is deemed to meet this standard.

E. Screen Area Calculation: The required wetted screen area (square feet), excluding the area affected by structural components (i.e., pore space or open area), is calculated by dividing the **maximum** diverted flow (cubic–feet per second) by the allowable approach velocity (feet per second). Example:

1.0 cubic–feet per second / 0.2 feet per second = 5.0 square feet of pore space

Unless otherwise specifically agreed to, this calculation shall be done at the **minimum** stream stage.

3. SWEEPING VELOCITY (Velocity component parallel to screen face)

A. In Streams And Rivers: The sweeping velocity should be at least two times the allowable approach velocity.

B. In Canals: The sweeping velocity shall exceed the allowable approach velocity. Experience has shown that sweeping velocities of 2.0 feet per second (or greater) are preferable.

C. Design Considerations: Screen faces shall be designed flush with any adjacent screen bay piers or walls, to allow an unimpeded flow of water parallel to the screen face.

4. SCREEN OPENINGS

A. Porosity: The screen surface shall have a minimum open area of 27 percent. We recommend the maximum possible open area consistent with the availability of appropriate material, and structural design considerations.

The use of open areas less than 40 percent shall include consideration of increasing the screen surface area, to reduce slot velocities, assisting in both fish protection and screen cleaning.

B. Round Openings: Round openings in the screening shall not exceed 3.96mm (5/32in). In waters where steelhead rainbow trout fry are present, this dimension shall not exceed 2.38mm (3/32in).

C. Square Openings: Square openings in screening shall not exceed 3.96mm (5/32in) measured diagonally. In waters where steelhead rainbow trout fry are present, this dimension shall not exceed 2.38mm (3/32in) measured diagonally.

D. Slotted Openings: Slotted openings shall not exceed 2.38mm (3/32in) in width. In waters where steelhead rainbow trout fry are present, this dimension shall not exceed 1.75mm (0.0689in).

5. SCREEN CONSTRUCTION

A. Material Selection: Screens may be constructed of any rigid material, perforated, woven, or slotted that provides water passage while physically excluding fish. The largest possible screen open area which is consistent with other project requirements should be used. Reducing the screen slot velocity is desirable both to protect fish and to ease cleaning requirements. Care should be taken to avoid the use of materials with sharp edges or projections which could harm fish.

B. Corrosion and Fouling Protection: Stainless steel or other corrosion–resistant material is the screen material recommended to reduce clogging due to corrosion. The use of both active and passive corrosion protection systems should be considered. Consideration should be given to anti–fouling material choices, to reduce biological fouling problems. Care should be taken not to use materials deemed deleterious to fish and other wildlife.

C. Project Review and Approval: Plans and design calculations, which show that all the applicable screening criteria have been met, shall be provided to the Department before written approval can be granted by the Regional Manager, Bay Delta Region.

The approval shall be documented in writing to the project sponsor, with a copy to the Deputy Director, Resource Management and Policy Division. Such approval may include a requirement for post–construction evaluation, monitoring and reporting.

D. Assurances: All fish screens constructed after the effective date of these criteria shall be designed and constructed to satisfy the current criteria. Owners of existing screens, approved by the Department prior to the effective date of these criteria, shall not be required to upgrade their facilities to satisfy the current criteria unless:

1. The controlling screen components deteriorate and require replacement (i.e., change the opening size or opening orientation when the screen panels or rotary drum screen coverings need replacing),

2. Relocation, modification or reconstruction (i.e., a change of screen alignment or an increase in the intake size to satisfy diversion requirements) of the intake facilities, or

3. The owner proposes to increase the rate of diversion which would result in violation of the criteria without additional modifications.

E. Supplemental Criteria: Supplemental criteria may be issued by the Department for a project, to accommodate new fish screening technology or to address species–specific or site–specific circumstances.

F. Variances: Written variances to these criteria may be granted with the approval of the Regional Manager, Bay Delta Region and concurrence from the Deputy Director, Resource Management and Policy Division. At a minimum, the rationale for the variance must be described and justified in the request. Evaluation and monitoring may be required as a condition of any variance, to ensure that the requested variance does not result in a reduced level of protection for the aquatic resources.

It is the responsibility of the project sponsor to obtain the most current version of the appropriate fish screen criteria. Project sponsors should contact the Department of Fish and Game and the U.S. Fish and Wildlife Service (for projects in anadromous and fresh waters) for guidance.

Copies of the current criteria are available from the Department of Fish and Game Bay Delta Region; 7329 Silverado Trail/P.O. Box 46, Yountville, CA 94599, (707) 944–5500.

Technical assistance can be obtained directly from the Habitat Conservation Branch; 1416 Ninth Street, Sacramento, CA 95814 – (916) 653–1070.

The National Marine Fisheries Service Southwest Region "Fish Screening Criteria for Anadromous Salmonids, January 1997" is available at: http://swr.ucsd.edu/hcd/fishscrn.htm and from their Southwest Region, 777 Sonoma Avenue, Room 325, Santa Rosa, CA 95402 – (707) 575–6050.

---

[1] Approach velocities in the June 19, 2000 Fish Screening Criteria that are inapplicable if delta smelt are present are omitted.

Tools for Change (6)	December	January	February	March	April	May	June	July
Export reduction at one or both facilities	X	X	X	X	X	X	X	X
Change in barrier operations						X	X	X
Change in San Joaquin River flows	X	X	X	X	X	X	X	X
Change position of cross channel gates	X	X	X			X	X	

Longfin Smelt Risk Assessment Matrix Footnotes

1 The concern index refers to the Fall Midwater Trawl longfin smelt total index (all ages) from the 2–years previous to the calendar year of the larva/juvenile loss risk being evaluated (e.g., in 2008, the concern index would be FMWT 2006 and 2007 LFS indices; see http://www.delta.dfg.ca.gov/data/mwt/). The critical concern index of 240 is the approximate index value at the lower limit of the 1988–2000 outflow–abundance relationship (Figure 1). For recovery, indices at or above the regression line of the relationship are targeted.

2 We hypothesize that the location of X2 influences the distance adult fish migrate into the Delta to spawn and thus their vulnerability to entrainment in south delta exports, as well as that of their offspring. The highest and most consistent salvage of adult longfin smelt occurs when X2 is upstream of river kilometer (rkm) 70, and little salvage occurs when X2 is below 60 rkm. Sacramento River flow (3–day running average) of 80,000 cfs or greater pushes X2 well below rkm 70 and typically below rkm 60, moving water conditions suitable for longfin smelt spawning downstream of the Delta and transporting larvae downstream, away from the Delta as well. Longfin smelt spawn in winter when water temperature is declining into 13–15°C range. Larvae are typically present in colder temperatures and few early stage larvae continue to be present after water temperatures surpass 16.5°C. Young juveniles avoid temperatures > 21.5°C. These temperature relations were derived from plotting catches by stage on water temperature measurements, both of which were taken by the Bay Study field crews at western Delta locations, 1980–1986.

Critical thermal maxima for longfin smelt is unknown.

3 The adult spawning stage is determined from longfin smelt (≥85 mm FL) captured by one of the trawl surveys and/or one of the salvage facilities. A stage greater than or equal to 4 indicates female longfin smelt are ripe and ready to spawn or have already spawned (following Mager 1996 for delta smelt).

Mager RC. 1996. Gametogenesis, Reproduction and Artificial Propogation of Delta Smelt, *Hypomesus transpacificus*. [Dissertation] Davis: University of California, Davis. 115 pages. Published.

4 Adults (December–February): the Fall Midwater Trawl in December, the Bay Study otter and midwater trawl samples in December through February, and the Spring Kodiak Trawl Survey in January and February all will provide data to be used to determine the distribution of adult longfin smelt. December–February trigger occurs when adult longfin smelt (≥85 mm FL) are detected east or south of Jersey point in the San Joaquin River or south Delta channels however risk is substantially reduced when Sacramento River flows at Freeport surpass 80,000 cfs in a 3–day running average and remains low until total Delta outflow drops below 40,000 cfs for a 3–day running average; at which time the longfin smelt distribution will be re–evaluated relative to the original triggering criteria of an adult east or south of Jersey Point.

Larvae (January–April)(in 2008, March–April): March concern is triggered by the presence of longfin smelt larvae in salvage or distribution east or south of Jersey Point in the 20mm Survey. The level of response is determined by the distribution of larvae within the system (see http://www.delta.dfg.ca.gov/data/20mm/ for longfin smelt)

Juveniles (March–July) — concern is triggered by longfin smelt juveniles distribution of juvenile smelt where the centroid is located upstream (negative) or downstream (positive) of the Sacramento–San Joaquin River confluence (see delta smelt Matrix, Figure 5.2). The 20–mm Survey centroid is calculated by multiplying the observed smelt station CPUE by a distance parameter in km from the confluence. The summed result (summed over a survey) is divided by the survey CPUE which gives the survey centroid position (see delta smelt Matrix, Figure 5.2 and http://www.delta.dfg.ca.gov/data/20mm/, selecting delta smelt).

5 Salvage trigger: the salvage trigger for December through March is determined by calculating the ratio of adult salvage to the fall MWT index. This ratio will increase as fish are salvaged during the winter months. If the ratio exceeds the median of what was observed during December–March 1980–2002, then the trigger was met (see Figure 6 for more explanation of the calculation)

During April, May and June, if longfin smelt collected at the salvage facilities is greater than zero, then the working group will meet. This is because April, May and June are the peak of smelt salvage and salvage densities cannot be predicted. Therefore, during these two months, the smelt working group will meet proactively to protect these fish by looking at relevant information such as salvage, delta temperatures, delta hydrology and smelt distributions.

6 The tools for change are actions that the working group can recommend to help protect longfin smelt. Exports may be reduced at one or both of the south delta

export facilities and a proposed duration of the reduction would be recommended by the working group.

Chapter 4. Procedural Regulations for Implementation of the California Environmental Quality Act of 1970

Article 1. General

§ 750. Authority.

These regulations are prescribed by the Director of the California Department of Fish and Game, the California Fish and Game Commission, and the California Wildlife Conservation Board, hereafter referred to as Fish and Game, under authority granted in Public Resources Code Section 21082 to implement, interpret, or make specific Sections 21000 through 21176 of the Public Resources Code (The California Environmental Quality Act of 1970—Division 13, Public Resources Code, 21000 et seq.) and Sections 15000 through 15203 of the California Administrative Code (Guidelines for Implementation of the California Environmental Quality Act of 1970—Division 6, Title 14, Cal. Adm. Code, Chap. 3) adopted by the California Resources Agency under Public Resources Code Section 21083.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

HISTORY

1. New Chapter 4 (Sections 750 through 781) filed 4–4–73 as an emergency; designated effective 4–4–73 (Register 73, No. 14).
2. Certificate of Compliance filed 7–11–73 (Register 73, No. 28).
3. Repealer of Chapter 4 (Articles 1–5, Sections 750–781) and new Chapter 4 (Articles 1–3, Sections 750–781) filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).

§ 751. Short Title.

Fish and Game CEQA Implementation Regulations.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 752. Purpose.

The purpose of these regulations is to further specify the objectives and criteria, and the procedures to be followed by Fish and Game in implementing the California Environmental Quality Act of 1970, hereinafter referred to as CEQA, and the Guidelines for Implementation of the California Environmental Quality Act of 1970, as adopted February 7, 1973 and all subsequent amendments thereto, hereinafter referred to as the State EIR Guidelines.

The State EIR Guidelines are incorporated into these regulations by reference, as though they are set out in full. These procedural regulations are to be used in conjunction with the State EIR Guidelines.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 753. Policy.

As early as possible and in all cases prior to a decision concerning a project as defined in CEQA and the State EIR Guidelines, Fish and Game, acting as a lead agency (Section 21080.3 and 21080.4 of CEQA, Section 15030 of the State EIR Guidelines), or an agency with jurisdiction by law to exercise authority over natural resources which may be affected by the project (Section 21080.3 and 21080.4 of CEQA) will, in consultation with the public and appropriate federal, state, and local agencies, assess in detail the potential environmental impact of a project in order that adverse effects are avoided, and environmental quality is preserved, restored or enhanced to the fullest extent practicable. Project alternatives that will minimize significant adverse impact will be explored and evaluated in order to avoid to the fullest extent practicable undesirable consequences to the environment.

It is Fish and Game policy that consideration of the potential environmental impact of all actions is of the highest priority.

It is further Fish and Game policy to involve affected federal, state, and local agencies, private organizations, and members of the public to the fullest extent practicable in the environmental impact assessment process.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 753.5. Collection of Filing Fees.

(a) Fee Schedule (also see subsection 753.5(g) of these regulations).

(1) Statutorily Exempt Projects: All projects statutorily exempt from the provisions of the California Environmental Quality Act shall incur no fee. (See sections 15260–15277, title 14, CCR.)

(2) Categorically Exempt Projects: All projects categorically exempt by regulations of the Secretary for Resources from the provisions of the California Environmental Quality Act shall incur no fee. (See sections 15300–15329, title 14, CCR.)

(3) De Minimis Projects: All projects found by the lead agency to be de minimis in their effect on fish and wildlife shall incur no fee. (See subsection 753.5(c) of these regulations).

(4) Negative Declaration Projects: All projects for which a Negative Declaration has been prepared pursuant to section 21080(c) of the Public Resources Code shall incur a fee of $1,250.00. (See subsection 753.5(c) of these regulations).

(5) Environmental Impact Report Projects: All projects for which an Environmental Impact Report has been prepared pursuant to section 21151 of the Public Resources Code shall incur a fee of $850.00. (See subsection 753.5(c) of these regulations).

(b) Parties Responsible for Payment of Fees.

Pursuant to subdivision 711.4(c) of the Fish and Game Code, all project applicants subject to the California Environmental Quality Act shall pay a filing fee for each project for which an EIR or Negative Declaration has been approved. In the case of projects subject to the discretionary approval of local government or nonstate public agencies the following regulations apply:

(1) Local or Non–state Public Agencies Undertaking a Project: When a local or non–state public agency acts in its own proprietary capacity in undertaking a project, the local agency or non–state public agency, shall be considered to be the applicant (section 15351, title 14, CCR) and be required to remit the fee.

(2) Private Entities or Special Districts Proposing Projects Subject to Environmental Review and Discretionary Approval by Local Government: When local land use authorities are granting a license, permit or entitlement to project applicants, the Private entity or special district shall be considered to be the applicant and be required to remit the fee.

(c) Fee Exemption for De Minimis Impact Finding.

Notwithstanding subsections (a)(4) and (5), if the lead agency (as defined by section 21067 of the Public Resources Code) finds that, considering the record as a whole a project involves no potential for adverse effect, either individually or cumulatively on wildlife (as defined by section 711.2 of the Fish and Game Code), no fee is required. A lead agency claiming a de minimis exemption shall comply with the following provisions:

(1) The lead agency's findings of fact shall include the following information in order to qualify for a de minimis exemption:

(A) The name and address of the project proponent;

(B) A brief description of the project and its location, including county:

(C) A statement that an initial study has been conducted by the lead agency so as to evaluate the potential for adverse environmental impact; and

(D) A declaration that when considering the record as a whole there is no evidence before the agency that the proposed project will have potential for an adverse effect on wildlife resources or the habitat upon which the wildlife depends.

(E) A declaration that the lead agency has, on the basis of substantial evidence, rebutted the presumption of adverse effect contained in these regulations at subsection (d).

(2) At the time a lead agency approves or determines to carry out a project subject to the California Environmental Quality Act, it shall complete, if appropriate, a Certificate of Fee Exemption (DFG 753.5 – 5/91) and adopt the findings of fact described above in subsection (c)(1).

(3) Upon certification of the contents of the Certificate of Fee Exemption (DFG 753.5 – 5/91) by the chief planning official, the lead agency shall retain the original certificate as part of the environmental record and file two copies of the certificate with the county clerk along with the Notice of Determination as provided in section 21152 of the Public Resources Code pertaining to local agencies, or with the Office of Planning and Research as provided in section 21108 of the Public Resources Code, pertaining to state agencies.

(d) Presumption of Adverse Effect.

(1) If the Environmental Checklist form found in the Secretary for Resources' guidelines (14 CCR, section 15000 et seq., Appendix I) or the initial study conducted by the lead agency indicates that the project may or will in the lead agency's opinion result in chances to the resources listed in subsections (A) through (G) below, it is presumed, unless rebutted by substantial evidence in the record, that the project will have a potential for adverse effect on fish and wildlife resources or the habitat upon which the wildlife depends.

(A) Riparian land, rivers, streams, watercourses, and wetlands under state and federal jurisdiction;

(B) Native and non–native plant life and the soil required to sustain habitat for fish and wildlife;

(C) Rare and unique plant life and ecological communities dependent on plant life; and

(D) Listed threatened and endangered plant and animals and the habitat in which they are believed to reside.

(E) All species of plant or animals as listed as protected or identified for special management in the Fish and Game Code, the Public Resources Code, the Water Code or regulations adopted thereunder.

(F) All marine and terrestrial species subject to the jurisdiction of the Department of Fish and Game and the ecological communities in which they reside.

(G) All air and water resources the degradation of which will individually or cumulatively result in a loss of biological diversity among the plants and animals residing in that air and water.

(e) Collection Procedures for County Clerks.

(1) Each project proponent shall remit to the county clerk on or before the filing of Notice of Determination (see Public Resources Code, section 21152) the fee required under Fish and Game Code section 711.4(d). Without the appropriate fee, de minimis finding, statutory or categorical exemption (see subsection 753.5(a) of these regulations) the Notice of Determination is not operative, vested or final, shall not be accepted by the clerk and shall be returned to the lead agency with notification of fee requirement and a statement that, pursuant to section 21089(b) of the Public Resources Code "the project is not operative, vested, or final until the filing fees are paid."

(2) In the event of nonpayment of the documentary handling fee authorized under Fish and Game Code, section 711.4, the county clerk shall have the discretion to not accept a filing until the handling fee is paid. Upon rejection of any filing under this subsection, the clerk may return the Notice of Determination to the lead agency with notification of fee requirement.

(3) Only one fee shall be paid per project. In the event a project requires multiple Notices of Approval or Determination by lead and/or responsible agencies, the fee shall be paid at the time or before the lead agency files the Notice of Approval or first Notice of Determination. Upon payment, the applicant shall retain the receipt for presentation to any additional agencies whose approval may be required. A copy of that receipt shall be attached to any additional Notices of Determination that may be required for the same project. This copy shall suffice as documentation that the fee has been paid.

(4) All checks are to be payable to the county where the filing is made. The county in turn will deposit the checks into its treasury and remit the fees collected to the State Treasurer on a monthly basis.

(5) To maintain accountability and to track all project applications, the Department has developed press numbered Environmental Filing Fee Cash Receipts (DFG 753.5a – 5/91). These cash receipts, or a Department approved alternative cash receipt, must be used in conjunction with this collection procedure. (To obtain Department approval the substitute receipt must provide the same information as in DFG.753.5a – 5/91 and contain four copies for distribution.) The original receipt is to be issued to a project applicant when payment is made in conjunction with filing a Notice of Determination (Public Resources Code, section 21152). The second copy is to be submitted to the Department on a monthly basis. The remaining copies will be retained by the county (one for the lead agency and one for the county clerk).

(6) For projects that are categorically exempt (sections 15260–15277, or 15300–15329, title 14, CCR) and are filed with the county clerk, the Environmental Filing Fee Cash Receipt shall also be completed and attached to the Notice of Exemption in order to ensure accountability in section 753.5(e)(5) above. The cash receipt will indicate "project that is exempt from fees". If a documentary handling fee of $25.00 maximum is charged by the county clerk, the receipt shall so indicate.

(7) For projects that the lead agency has found to be de minimis it is mandatory that a copy of the Certificate of Fee Exemption, certified by the lead agency's chief planning official be attached to the Notice of Determination.

(8) Within 30 days after the end of each month in which the filing fees are collected, each county will summarize and record the amount collected on the monthly State of California Form No. CA 25 (TC 31) report (available from State Controller's office) and remit the amount collected to the State Treasurer. IDENTIFY THE REMITTANCE ON THE STATE OF CALIFORNIA FORM NO. CA 25 (TC 31) AS "ENVIRONMENTAL DOCUMENT FILING FEES" PER FISH AND GAME CODE SECTION 711.4. DO NOT COMBINE THE ENVIRONMENTAL FEES WITH THE STATE SHARE OF FISH AND GAME FINES. The following documents are to be mailed by the county clerks to the Department of Fish and Game, Fiscal and Administrative Services Branch, 1416 Ninth Street. Box 944209, Sacramento, California 94244–2090, on a monthly basis:

(A) A photocopy of the monthly State of California Form No. CA 25 (TC 31);

(B) Department copies of all cash receipts (including all voided receipts);

(C) A copy of all "Certificates of Fee Exemption";

(D) A copy of all Notices of Approval or Determination filed with the county during the preceding month; and

(E) Name, address and telephone number of all project applicants for which a Notice of Determination has been filed. If this information is contained on the cash receipt filed with the Department under section 753.5(e)(5) above, no additional information is required.

(f) Retention of Records.

In order to ensure that records are available for Department audit and accountability purposes, the documents required by these regulations (section 753.5(e)(8)(A) through (E)) shall be retained for a period of 9 months. The county clerk shall make available to the Department, and its representatives, for purposes of inspection and review, any and all of its books, papers, documents and other records. The aforesaid records shall be available for inspection and review during regular business hours.

(g) Cost Recovery by County Clerks.

(1) The county clerk is authorized pursuant to Fish and Game Code, section 711.4(e) to charge a documentary handling fee for each environ-

mental document received by the clerk pursuant to Public Resources Code section 21152(a) or 21152(b).

(2) If the county is acting in its capacity as a "lead agency" and the costs of complying with these filings and remittance activities exceeds $25.00 per document, the county clerk is authorized under Public Resources Code, Section 21089 to charge and recover the estimated costs incurred by the clerk at the time the lead agency files the Notice of Determination or Exemption as required under Public Resources Code, section 21152.

(h) Collection Procedures – Statutory Assessment.

(1) Unpaid Fee Defined – An unpaid fee shall for the purposes of this regulation be defined as either of the following:

(A) In the event a project applicant fails to remit the fees due under Fish and Game Code section 711.4(d) to the county clerk on or before the time of filing of a Notice of Determination pursuant to Public Resources Code section 21152; or with the Office of Planning and Research as required under Public Resources Code section 21108; or with the Secretary for Resources as required under Public Resources Code section 21080.5;

(B) If the filing of a de minimis exemption where the legal presumption has not in the judgment of the Department been rebutted by substantial evidence in the record.

(2) If the county clerk, the Office of Planning and Research, or Secretary for Resources accepts the Notice of Determination without the required filing fee, the unpaid fee is a statutory assessment and such assessment is final pursuant to Revenue Taxation Code section 6757(b)(4) upon the date the county clerk, the Office of Planning and Research, or the Secretary for Resources accepts the Notice of Determination/Approval without the required Environmental Filing Fee.

(3) If the county clerk accepts a Notice of Determination for filing with a de minimis exemption certificate and the Department of Fish and Game, upon audit of the record of environmental filings received, determines that the legal presumption of adverse effect was not rebutted by substantial evidence, the Department of Fish and Game shall notice the project applicant and upon 20 days from mailing of the notice the unpaid fee shall then become a final statutory assessment pursuant to Revenue and Taxation Code, section 6757(b)(4).

(4) Enforceable Lien – Upon non–payment of the Environmental Filing Fee as required under Fish and Game Code section 711.4(d) by any person as defined under Revenue and Taxation Code, section 6005, the amount of the liability including penalties, interest, and any costs shall thereupon be a perfected and enforceable statutory lien subject to chapter 14 commencing with section 7150 of the Government Code.

HISTORY

1. New section filed 1–22–91 as an emergency, operative 1–22–91 (Register 91, No. 10). A Certificate of Compliance must be transmitted to OAL by 5–27–91 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 1–22–91 order with amendments transmitted to OAL 6–20–91 and filed 6–20–91 (Register 91, No. 42).

Article 2. Fish and Game As Lead Agency

§ 754. Environmental Review Procedures.

The following procedures shall be used when Fish and Game has been designated as the lead agency pursuant to the State EIR Guidelines. (Sec. 15065).

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 755. Determination of Lead Unit.

The Fish and Game unit having the lead role for the environmental evaluation process shall be that unit with the primary responsibility for

[The next page is 193.]

proposing to carry out or recommending approval of a project, and shall have responsibility for ensuring that the evaluation process as set forth in CEQA, the State EIR Guidelines, and these procedures is followed. In the event that a project requires joint proposal or approval of two or more Fish and Game units, then the unit executives shall meet and determine which shall be the lead unit, and what information and other assistance shall be provided by the other responsible units. (Sec. 15065).

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 756. Applicability of CEQA.

The lead unit shall determine whether or not a proposed action is in fact a "project" as defined by CEQA, and necessitates CEQA compliance. (Sec. 15037).

"Project" means the whole of an action which has a potential for resulting in a direct or indirect physical change in the environment as follows:

(a) Activities directly undertaken by Fish and Game;

(b) Activities undertaken by a person which are supported in whole or in part through contracts, grants, subsidies, loans or other forms of assistance provided by Fish and Game;

(c) Activities involving the issuance to Fish and Game of a lease, permit, license, certificate or other entitlement for use by one or more public agencies.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 757. Exempt Projects.

Planning and feasibility studies, ministerial projects, and classes designated by the State EIR Guidelines as "Categorical exemptions" are considered exempt from the provisions of CEQA. It is further modified by the State EIR Guidelines to exclude emergencies (Section 15071), legislative proposals (Section 15037(b)(2)), continuing administrative or maintenance activities (Section 15037(b)(3)), and "where it can be seen with certainty that the activity in question will not have a significant effect on the environment" (Section 15060). In addition, these guidelines are not applicable to those Fish and Game Commission programs or activities that are exempted from CEQA through certification by the Secretary for Resources under the provisions of Section 21080.5 CEQA.

The lead unit shall determine which projects are exempt and shall prepare a Notice of Exemption. This notice shall be forwarded from the lead unit to ESB for review, and from there to the Director's office. If the exemption is approved, it shall then be forwarded and filed with the Resources Agency. The filing of a notice of exemption starts a 35 day statute of limitations period on legal challenges. A copy shall be filed in ESB files and a copy returned to the lead unit. If the exemption is not approved, the lead unit will be notified. Specific exemptions include:

(a) Feasibility and Planning Studies. Feasibility and planning studies are exempted by Section 21102 of CEQA. This section provides that funds shall not be requested or authorized for any project, other than a project involving only feasibility or planning studies for possible future actions not approved, adopted, or funded, which may have a significant effect on the environment, unless an impact report has been prepared. However, environmental factors are to be considered during such studies.

(b) Ministerial Projects. Ministerial projects are exempted from CEQA by Section 21080(b). Ministerial projects, as defined in the Section 15032 of the State EIR Guidelines, include those activities defined as projects which are undertaken or approved by a governmental decision which a public officer or public agency makes upon a given state of facts in a prescribed manner in obedience to the mandate of legal authority. The following activities of Fish and Game are hereby considered to be ministerial projects as authorized by Section 15192(b) of the State EIR Guidelines:

(1) Issuance of fishing and hunting licenses, stamps, and tags, falconry licenses, and trapping licenses;

(2) Actions concerning enforcement of the Fish and Game Code and other State laws;

(3) Licensing of pheasant clubs, commercial hunting clubs, and domesticated migratory waterfowl shooting areas;

(4) Issuance of the following permits: domesticated fish breeder's permit; fish transportation permit; suction dredge permit; fish importation permit; private fish stocking permit; depredation permit; explosives permit; scientific collecting permit; bird banding permit; migratory waterfowl feeding permit; permit to import and possess prohibited species of wild animals; permit for Indians to transport game off reservations; permit for Commission approval for taking of deer; permit to take or herd birds or mammals with the aid of vehicles or aircraft.

Other projects may be ministerial and the determination of this status shall be made by Fish and Game on a case–by–case basis, depending upon analysis of the laws relevant to the project.

(c) Categorical Exemptions. Categorical exemptions are those classes of projects which are exempted from the requirements of CEQA, through adoption by the Secretary for Resources (Public Resources Code Section 21084). These exemptions have been made upon a finding that the projects will have no significant effect on the environment. This finding has been made as stated in Section 15100 et seq. of the State EIR Guidelines. Classes concerning Fish and Game and particular projects to which they apply are as follows:

(1) Class 1: Existing Facilities. Class 1 consists of the operation, repair, or maintenance or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that previously existing, including but not limited to:

(A) Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances;

(B) Existing streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities except where the activity will involve removal of a scenic resource including but not limited to a stand of trees, a rock outcropping, or an historic building;

(C) Restoration or rehabilitation of deteriorated or damaged structures, facilities or mechanical equipment to meet current standards of public health and safety, unless it is determined that the damage was substantial and resulted from an environmental hazard such as earthquake, landslide, or flood;

(D) Additions to existing structures provided that the addition will not result in an increase of more than 50 percent of the floor area of the structure before the addition or alteration, or 2,500 square feet, whichever is less; or, 10,000 square feet if the project is in an area where all public services and facilities are available to allow for maximum development permissible in the General Plan and, the area in which the project is located is not environmentally sensitive;

(E) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities, or mechanical equipment, or topographical features (including navigational devices) where these devices do not have or result in an adverse environmental impact;

(F) New copy on existing on–and–off–premise signs;

(G) Maintenance of existing landscaping, native growth and water supply reservoirs (including the use of economic poisons, as defined in Division 7, Chapter 2, California Agriculture Code);

(H) Maintenance of fish screens, fish ladders, wildlife habitat areas, artificial wildlife watering devices, streamflows, springs and waterholes, and stream channels (clearing of debris) to protect fish and wildlife resources;

(I) Production and stocking of fish and wildlife but not including the introduction of new species;

(J) Demolition and removal of individual small structures listed in this subsection except where the structures are of historical, archaeological or architectural significance:

1. Single family residences not in conjunction with the demolition of two or more units;

2. Apartments and duplexes designed for not more than four dwelling units if not in conjunction with the demolition of two or more such structures;

3. Offices, if designed for an occupant load of 10 persons or less, if not in conjunction with the demolition of two or more such structures;

4. Accessory (appurtenant) structures including but not limited to garages, carports, roof structures, workshops, storage buildings, well houses, aerators, feed bins, fences, patios and public restroom facilities;

(K) Minor repairs and alterations to existing dams and appurtenant structures under the supervision of the Department of Water Resources.

(2) Class 2: Replacement or Reconstruction. Class 2 consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, including but not limited to:

(A) Fish hatcheries;

(B) Office buildings;

(C) Residences;

(D) Streamflow maintenance dams;

(E) Public restroom facilities;

(3) Class 3: New Construction of Small Structures. Class 3 consists of construction and location of single, new facilities or structures and installation of new equipment and facilities including but not limited to:

(A) Single family residences not in conjunction with the building of two or more such units.

(B) Offices and laboratories if designed for an occupant load of 20 persons or less if not in conjunction with the building of two or more such structures.

(C) Accessory (appurtenant) structures including garages, carports, public restroom facilities, workshops, storage buildings, feed bins, roof structures, aerators, and well houses.

(4) Class 4: Minor Alterations to Land. Class 4 consists of minor public or private alterations in the condition of land, water and/or vegetation which do not involve removal of mature, scenic trees except for forestry and agricultural purposes. Examples include but are not limited to:

(A) Grading on land with a slope of less than 10 percent or under one acre, except where it is to be located in a waterway, in any wetland, in an officially designated (by Federal, State, or local governmental action) scenic area, in officially mapped areas of severe geologic hazard, or, in the habitat of a rare or endangered species of fish or wildlife;

(B) New gardening or landscaping but not including tree removal;

(C) Filling of earth into previously excavated land with material compatible with the natural features of the site;

(D) Minor alterations in land, water and vegetation on existing officially designated wildlife management areas or fish production facilities which result in improvement of habitat for fish and wildlife resources or greater fish production;

(E) Minor temporary uses of land having negligible or no permanent effects on the environment.

(5) Class 5: Alterations in Land Use Limitations. Class 5 consists of minor alterations in land use limitations in areas with less than a 20% slope, which do not result in any changes in land use or density, including but not limited to:

(A) Minor lot line adjustments, side yard and set back variances not resulting in the creation of any new parcel;

(B) Issuance of minor encroachment permits;

(C) Reversion to acreage in accordance with the Subdivision Map Act.

(6) Class 6: Information Collection. Class 6 consists of basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be for strictly information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted or funded, including but not limited to:

(A) Fish and wildlife life history studies, including collection or marking of animals and obtaining data on the vital statistics of fish and wildlife populations and their use by man;

(B) Measurement and monitoring of pesticides, heavy metals, thermal discharges, and other pollutants, including bioassays and testing of oil spill cleanup agents;

(C) Experimental development and evaluation of fish and wildlife habitat;

(D) Experimental introduction of exotic species, experimental fish and wildlife culture and stocking, and transplants of native and established species;

(E) Evaluation of the effects of fish and wildlife protection or enhancement facilities or measures (e.g. fish screens, vegetation removal from spawning areas, deer escape devices in canals);

(F) Research on fish and wildlife diseases and parasites;

(G) Studies of the impact of land and water use changes on fish and wildlife;

(H) Habitat inventory programs.

(7) Class 7: Actions by Regulatory Agencies for Protection of Natural Resources. Class 7 consists of actions taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment. Examples include but are not limited to wildlife preservation activities of the State Department of Fish and Game. Examples include but are not limited to:

(A) Actions to close areas to hunting and sport fishing;

(B) Approval of ecological reserves and wildlife management areas (but not acquisition or development);

(C) Elimination or control of undesirable species, including chemical treatment of streams, lakes and reservoirs;

(D) Vegetation development, manipulation, or fertilization to increase habitat productivity for fish and wildlife, including controlled burning;

(E) Botulism and other disease control measures;

(F) Development of springs and waterholes and artificial wildlife watering devices for fish and wildlife maintenance or enhancement purposes.

Construction activities are not included in this exemption.

(8) Class 8: Actions by Regulatory Agencies for Protection of the Environment. Class 8 consists of actions taken by regulatory agencies as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement or protection of the environment where the regulatory process involves procedures for protection of the environment. Construction activities are not included in this exemption.

(9) Class 9: Inspections. Class 9 consists of activities limited entirely to inspection, to check for performance of an operation, or quality, health or safety of a project, including:

(A) Related activities such as inspection for possible mis–labeling, mis–representation or adulteration of products;

(B) Live freshwater fish and marine shellfish importation inspection;

(C) Fish disease inspection;

(D) Game bird farm inspections;

(E) Inspections of private and public zoological gardens.

(10) Class 10: Loans. Class 10 consists of loans made by the Department of Veterans Affairs under the Veterans Farm and Home Purchase Act of 1943, mortgages for the purchase of existing structures where the loan will not be used for new construction and the purchase of such mortgages by financial institutions.

(11) Class 11: Accessory Structures. Class 11 consists of construction, or placement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities, including but not limited to:

(A) On–premise signs;

(B) Small parking lots;

(C) Placement of seasonal or temporary use items such as portable restrooms, checking stations, or other facilities designed for public use.

(12) Class 12: Surplus Government Property Sales. Class 12 consists of sales of surplus government property except for parcels of land located in an area of statewide interest or potential area of critical concern as identified in the Governor's Environmental Goals Policy Report pre-

pared pursuant to Government Code 65041 et seq. However, if the surplus property to be sold is located in those areas identified in the Governor's Environmental Goals and Policy Report, its sale is exempt if:

(A) The property does not have significant values for wildlife habitat or other environmental purposes; and,

(B) Any of the following conditions exist:

1. The property is of such size or shape that it is incapable of independent development or use, or

2. The property to be sold would qualify for an exemption under any other class of categorical exemption in Article 8 of these guidelines, or

3. The use of the property and adjacent property has not changed since the time of purchase by the public agency.

(13) Class 13: Acquisition of Lands for Wildlife Conservation Purposes. Class 13 consists of the acquisition of lands for fish and wildlife conservation purposes including preservation of fish and wildlife habitat, establishing ecological reserves under Fish and Game Code Section 1580, and preserving access to public lands and waters where the purpose of the acquisition is to preserve the land in its natural condition.

(14) Class 14: Minor Additions to Schools. Class 14 consists of minor additions to existing schools within existing schoolgrounds where the addition does not increase original student capacity by more than 25% or five classrooms, whichever is less. The addition of portable classrooms is included in this exemption.

(15) Class 15: Minor Land Divisions. Class 15 consists of the division of property in urbanized areas zoned for residential, commercial, or industrial use into four or fewer parcels when the division is in conformance with the General Plan and zoning, no variances or exceptions are required, all services and access to the proposed parcels to local standards are available, the parcel was not involved in a division of a larger parcel within the previous 2 years, and the parcel does not have a slope greater than 20%.

(16) Class 16: Transfer of Ownership of Land in Order to Create Parks. Class 16 consists of the acquisition or sale of land in order to establish a park where the land is in a natural condition or contains historic sites or archaeological sites and either:

(A) The management plan for the park has not been prepared, or

(B) The management plan proposes to keep the area in a natural condition or preserve the historic or archaeological site. CEQA will apply when a management plan is proposed that will change the area from its natural condition or significantly change the historic or archaeological site.

(17) Class 17: Open Space Contracts or Easements. Class 17 consists of the establishment of agricultural preserves, the making and renewing of open space contracts under the Williamson Act, or the acceptance of easements or fee interests in order to maintain the open space character of the area. The cancellation of such preserves, contracts, interests or easements is not included.

(18) Class 18: Designation of Wilderness Areas. Class 18 consists of the designation of wilderness areas under the California Wilderness System.

(19) Class 19: Annexations of Existing Facilities and Lots for Exempt Facilities. Class 19 consists of only the following annexations:

(A) Annexations to a city or special district of areas containing existing public or private structures developed to the density allowed by the current zoning or pre–zoning of either the gaining or losing governmental agency whichever is more restrictive, provided, however, that the extension of utility services to the existing facilities would have a capacity to serve only the existing facilities.

(B) Annexation of individual small parcels of the minimum size for facilities exempted by Section 15103, New Construction of Small Structures.

(20) Class 20: Changes in Organization of Local Agencies. Class 20 consists of changes in the organization of local governmental agencies where the changes do not change the geographical area in which previously existing powers are exercised. Examples include but are not limited to:

(A) Establishment of a subsidiary district;

(B) Consolidation of two or more districts having identical powers;

(C) Merger with a city of a district lying entirely within the boundaries of the city.

(21) Class 21: Enforcement Actions by Regulatory Agencies. Class 21 consists of actions by regulatory agencies to enforce or revoke a lease, permit, certificate, or other entitlement for use issued, adopted or prescribed by the regulatory agency of law, general rule, standard, or objective, administered or adopted by the regulatory agency. Such actions include, but are not limited to, the following:

(A) The direct referral of a violation of lease, permit, license, certificate, or entitlement for use or of a general rule, standard, or objective to the Attorney General, District Attorney, or City Attorney as appropriate, for judicial enforcement.

(B) The adoption of an administrative decision or order enforcing or revoking the lease, permit, license, certificate, or entitlement for use or enforcing the general rule, standard, or objective.

Construction activities undertaken by the public agency taking the enforcement or revocation action are not included in this exemption.

(22) Class 22: Educational or Training Programs Involving No Physical Changes. Class 22 consists of the adoption, alteration, or termination of educational or training programs which involve physical changes only in the interior of existing school or training structures. Examples include, but are not limited to:

(A) Development of or changes in curriculum or training methods;

(B) Changes in the grade structure in a school which do not result in changes in student transportation.

(23) Class 23: Normal Operations of Facilities for Public Gatherings. Class 23 consists of the normal operations of existing facilities for public gatherings for which the facilities were designed, where there is a past history of the facility being used for the same kind of purpose. Facilities included within this exemption include, but are not limited to racetracks, stadiums, convention centers, auditoriums, amphitheaters, planetariums, swimming pools and amusement parks.

(24) Class 24: Regulation of Working Conditions. Class 24 consists of actions taken by regulatory agencies, including the Industrial Welfare Commission as authorized by statute, to regulate any of the following:

(A) Employee wages;

(B) Hours of work; or

(C) Working conditions where there will be no demonstrable physical changes outside the place of work.

(25) Class 25: Transfers of Ownership of Interests in Land to Preserve Open Space. Class 25 consists of the transfers of ownership of interests in land in order to preserve open space. Examples include but are not limited to:

(A) Acquisition of areas to preserve the existing natural conditions;

(B) Acquisition of areas to allow continued agricultural use of the areas;

(C) Acquisition to allow restoration of natural conditions;

(D) Acquisition to prevent encroachment of development into flood plains.

(26) Class 26: Acquisition of Housing for Housing Assistance Programs. Class 26 consists of actions by a redevelopment agency, housing authority, or other public agency to implement an adopted Housing Assistance Plan by acquiring an interest in housing units. The housing units may be either in existence or possessing all required permits for construction when the agency makes its final decision to acquire the units.

(27) Class 27: Leasing New Facilities. Class 27 consists of the leasing of a newly constructed or previously unoccupied privately owned facility by a local or state agency where the local governing authority determined that the building was exempt from CEQA. To be exempt under this section, the proposed use of the facility:

(A) Shall be in conformance with existing State plans and policies and with general, community, and specific plans for which an EIR or Negative Declaration has been prepared;

(B) Shall be substantially the same as that originally proposed at the time the building permit was issued;

(C) Shall not result in a traffic increase of greater than 10% of front access road capacity; and

(D) Shall include the provision of adequate employee and visitor parking facilities;

(E) Examples of Class 27 include but are not limited to:

1. Leasing of administrative offices in newly constructed office space;

2. Leasing of client service offices in newly constructed retail space;

3. Leasing of administrative and/or client service offices in newly constructed industrial parks.

All of the exemptions listed above are inapplicable if the cumulative impact over a period of time has a significant effect on the environment.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

HISTORY

1. Repealer of subsection (b)(3) and subsection renumbering filed 2–23–2000; operative 3–24–2000 (Register 2000, No. 8).
2. Amendment of subsection (b)(4) filed 4–26–2001 as an emergency; operative 4–26–2001 (Register 2003, No. 9). A Certificate of Compliance must be transmitted to OAL by 8–24–2001 or emergency language will be repealed by operation of law on the following day.
3. Editorial correction adding HISTORY 2 (Register 2003, No. 9).
4. Reinstatement of section as it existed prior to 4–26–2001 emergency amendment by operation of Government Code section 11346.1(f) (Register 2003, No. 9).

§ 758. Initial Study.

If a project for which Fish and Game has assumed the role of Lead Agency is subject to the requirements of CEQA, and not found to be exempt, the lead unit shall conduct an Initial Study to determine if the project may have a significant effect on the environment unless the lead unit can determine that the project will clearly have a significant effect.

If any aspects of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, then an EIR must be prepared. All phases of project planning, implementation, and operation must be considered in the Initial Study of the project. To meet the requirements of this section, the Lead Agency may use an Initial Study prepared pursuant to the National Environmental Policy Act. The purposes, contents, uses, submission of data, format and consultation required shall be in accordance with Section 15080 of the State EIR Guidelines.

Early consultation shall include all responsible agencies, agencies with legal jurisdiction over natural resources affected by the project, and appropriate Fish and Game personnel, including Regional Environmental Services Supervisors and/or Environmental Services Branch.

Information from the Initial Study and comments obtained through consultation shall assist the lead unit in determining whether or not the project may have a significant effect on the environment.

If any aspects of the project, either individual or cumulative, may cause a significant effect on the environment, and EIR must be prepared. If no significant effects are found, a Statement of Negative Declaration is required.

(a) Purposes. The purposes of an Initial Study are to:

(1) Identify environmental impacts;

(2) Enable modification of a project, mitigating adverse impacts before an EIR is written:

(3) Focus an EIR, if one is required, on potentially significant environmental effects;

(4) Facilitate environmental assessment early in the design of a project;

(5) Provide documentation of the factual basis for the finding in a Negative Declaration that a project will not have a significant effect on the environment;

(6) Eliminate unnecessary EIRs.

(b) Contents. An Initial Study shall contain in brief form:

(1) A description of the project;

(2) An identification of the environmental setting;

(3) An identification of environmental effects by use of a checklist, matrix, or other method;

(4) A discussion of ways to mitigate the significant effects identified, if any;

(5) An examination of whether the project is compatible with existing zoning and plans;

(6) The name of the person or persons who prepared or participated in the Initial Study.

(c) Uses.

(1) The Initial Study shall be used to provide a written determination of whether a Negative Declaration or an EIR shall be prepared for a project.

(2) Where a project is revised in response to an Initial Study so that potential adverse effects are mitigated to a point where no significant environmental effects would occur, a Negative Declaration shall be prepared instead of an EIR. If the project would still result in one or more significant effects on the environment after mitigation measures are added to the project, an EIR shall be prepared.

(3) The EIR shall emphasize study of the impacts determined to be significant and can omit further examination of those impacts found to be clearly insignificant in the Initial Study.

(d) Submission of Data. If the project is to be carried out by a private person or private organization, Fish and Game may require such person or organization to submit data and information which will facilitate preparation of the Initial Study.

(e) Determining Significant Effect.

(1) The determination of whether a project may have a significant effect on the environment calls for careful judgment on the part of the public agency involved based to the extent possible on scientific and factual data. Prior to determining whether a Negative Declaration or Environmental Impact Report is required for a project, the lead unit will consult with all responsible agencies and all Trustee Agencies responsible for resources affected by the project as required by Section 15066(b) of the State EIR Guidelines. If a substantial body of opinion considers the effects of the project to be adverse, Fish and Game should prepare an EIR to explore the environmental effects involved.

(2) In evaluating the significance of the environmental effect of a project, the responsible Fish and Game unit shall consider both primary or direct and secondary or indirect consequences. Primary consequences are immediately related to the project (the construction of a new treatment plant may facilitate population growth in a particular area), while secondary consequences are related more to primary consequences than to the project itself (an impact upon the resource base, including land, air, water and energy use of the area in question may result from the population growth).

(f) Mandatory Findings of Significance. A project shall be found to have a significant effect on the environment if:

(1) The project has the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

(2) The project has the potential to achieve short–term environmental goals to the disadvantage of long–term environmental goals;

(3) The project has possible environmental effects which are individually limited but cumulatively considerable. As used in this subsection, "cumulatively considerable" means that the incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects;

(4) The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly.

During this Initial Study, the lead unit should consult with other appropriate Fish and Game personnel, including Regional Environmental Services Supervisors and/or the Environmental Services Branch for assistance.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 759. Preparation and Filing of Negative Declaration.

A Negative Declaration shall be prepared for a project which could potentially have a significant effect on the environment, but which Fish and Game finds on the basis of an Initial Study will not have a significant effect on the environment. Before completing a Negative Declaration, Fish and Game shall consult with all responsible agencies pursuant to Section 15066 of the State EIR Guidelines. This consultation shall be accomplished through transmittal of the results of the Initial Study to the agencies by a memorandum from the Director requesting their comments and recommendations on the proposed Negative Declaration. Coordination and staff assistance to the Lead Unit will be the responsibility of the Environmental Services Branch. The Negative Declaration shall include:

(a) A brief description of the project; including a commonly used name for the project, if any;

(b) The location of the project and the name of the project proponent;

(c) A finding that the project will not have a significant effect on the environment;

(d) An attached copy of the Initial Study documenting reasons to support the finding;

(e) Mitigation measures, if any, included in the project to avoid potentially significant effects.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 760. Staff Review of Negative Declarations.

Immediately upon completion, two copies of a Draft Negative Declaration shall be submitted to the Environmental Services Branch (ESB) for review. ESB will review the document, coordinate with other Branches and Regions as appropriate, and forward the document and a letter of comment to the Director. This review will be completed within 10 days of receipt.

(a) If the document is acceptable, ESB will notify the lead unit. This unit will then prepare a Notice of Intent and a Draft Negative Declaration for transmittal to the Secretary for Resources, a Notice of Intent and 25 copies of the Draft Negative Declaration for transmittal to the local agency or clearinghouse, and copies of the Draft Negative Declaration, as appropriate, for transmittal to other involved units of the Department.

(b) If the document requires revisions, ESB will notify the lead unit. The responsible unit will make the appropriate revisions and resubmit the Draft Negative Declaration to ESB for the Director's approval.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 761. Notice of Preparation.

Notice of the Preparation of Negative Declaration shall be provided to the public within a reasonable period of time prior to final adoption by the Department of the Negative Declaration. Notice shall be given to all organizations and individuals who have previously requested such notice, including responsible agencies and shall also be given by at least one of the following procedures:

(a) Publication by the public agency in a newspaper of general circulation in the area affected by the proposed project;

(b) Posting of notice by the public agency on and off site for a period of at least two weeks in the area where the project is to be located;

(c) Direct mailing to owners of property contiguous to the project. The alternatives for providing notice as specified above shall not preclude Fish and Game from providing additional notice by other means if it so desires, nor shall the requirements of this section preclude the Fish and Game from providing the public notice required herein at the same time and the same manner as public notice otherwise required by law for such project.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 762. Notice of Determination.

After making a decision to carry out or approve a project for which a Negative Declaration has been prepared, the responsible unit shall file a Notice of Determination with a copy of the Negative Declaration attached. The Notice of Determination shall include:

(a) The decision of the agency to approve or disapprove the project;

(b) The determination of the agency whether the project will have a significant effect on the environment; and

(c) A statement that no EIR has been prepared pursuant to the provisions of CEQA.

The notice of determination shall be filed with the Secretary for Resources. The filing of the Notice of Determination with the Secretary for Resources starts a 30 day statute of limitations on court challenges to the approval under CEQA [Section 21167(b)].

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 763. State, Federal and Public Review.

Filing the Negative Declaration with the Secretary for Resources and State Clearinghouse shall provide an opportunity for Federal, State and local agencies and members of the public to respond to the findings. Copies of the Negative Declaration shall be available for public inspection upon request during normal Department working hours at 1416 Ninth Street, Sacramento, or may be requested through regional offices of the Department of Fish and Game. If no objections to the project are received within 45 days, the project will be approved, unless there has been a request for a specific reasonable extension of time. Within 10 days after project approval, a Notice of Determination shall be transmitted from the Director of the Department of Fish and Game to the Secretary of Resources.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 764. Decision to Prepare an EIR.

If the Department of Fish and Game finds after an Initial Study that the project may have a significant effect on the environment, Fish and Game must prepare or cause to be prepared an Environmental Impact Report. An EIR should be prepared whenever it can be fairly argued on the basis of substantial evidence that the project may have a significant effect on the environment. An EIR should be prepared when there is serious public controversy concerning the environmental effect of a project. Controversy not related to an environmental issue does not require the preparation of an EIR.

The purpose of EIRs is set forth in Section 15012 of the State EIR Guidelines stating in part:

"An Environmental Impact Report is an informational document which, when fully prepared in accordance with the CEQA and these guidelines, will inform public decision–makers and the general public of the environmental effects of the projects they propose to carry out or approve."

(a) Early Consultation.

(1) Before completing a draft EIR consisting of the information specified in Sections 15141, 15142, and 15143 of the State EIR Guidelines, Fish and Game shall consult with all Responsible Agencies. In addition, if it has not already done so, Fish and Game should also consult directly with any person or organization it believes will be concerned with the environmental effects of the project. Many public agencies have found that early consultation solves many potential problems that would arise in more serious form later in the review process.

(2) For projects where federal involvement might require preparation of a federal EIS, Fish and Game should consult with the appropriate federal agency on the need for an EIS. If both an EIR and EIS are needed, the documents should be prepared jointly where federal regulations or

procedures allow, or the EIR should be prepared pursuant to Section 15063 of the State EIR Guidelines. Preparation of a separate EIR and EIS for the same project should be avoided, if possible.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 765. Contents of EIRs.

The contents of Draft EIRs and Final EIRs are prescribed in Sections 15140 and 15150 of the State EIR Guidelines. The title of a Draft EIR shall begin with the statement, "Draft Environmental Impact Report," followed by the project name.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 766. Procedure.

In the preparation of a Draft EIR, as with the Initial Study, the author may consult with the Regional Environmental Services Supervisor and/or the Environmental Services Branch for assistance. When preparing an EIR for a non-governmental person, such person shall be required to submit data and information required by Sections 15141-15145 of the State EIR Guidelines. All such data and information may be submitted in the form of a Draft EIR, however, Fish and Game assumes responsibility for the adequacy and objectivity of the EIR.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 767. Staff Review.

Immediately upon completion, two copies of a Draft shall be submitted to ESB for review. ESB will review the document, coordinate with other Branches and Regions as appropriate, and forward the document and a letter of comments to the Director. This review will be completed within 10 to 60 days of receipt, depending on the project scope.

(a) If the document is acceptable, ESB will notify the lead unit. This unit will then prepare a Notice of Intent and a Draft EIR for transmittal to the Secretary for Resources, a Notice of Intent and 25 copies of the Draft EIR for transmittal to the local agency or clearinghouse, and copies of the Draft EIR, as appropriate, for transmittal to other involved units of the Department.

(b) If the document requires revisions, ESB will notify the lead unit and resubmit the Draft EIR to the Director for approval.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 768. Fees for the Preparation and Processing of EIRs.

When Fish and Game prepares and processes an EIR under the requirements of Section 15037(a)(2) or 15037(a)(3) of the State EIR Guidelines, an initial fee shall be levied and collected from the project proponent before undertaking the preparation of the EIR.

(a) The minimum initial fee shall be based upon Fish and Game's estimated expenses in preparing the EIR. A detailed account of the derivation of this estimate shall be provided to the project proponent.

(b) Fish and Game shall separately account for the initial fee collected and the changes thereto. The status of the account shall be provided to the project proponent at regular periodic intervals established by mutual agreement. If, during the preparation of the EIR, it is determined that the costs will exceed the initial fee, the project proponent shall be required to pay the additional amount in advance of the work funded thereby. A final accounting shall be rendered by Fish and Game after the Final EIR is considered and adopted.

(c) If in the final accounting the initial fee exceeds the actual costs incurred by Fish and Game for the preparation and processing of the EIR, the excess shall be refunded. If the actual costs exceed the amount of the initial fee, the project proponent shall be billed for the difference.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 769. Advance Notice to Secretary for Resources.

A Notice of Completion and a copy of the Draft EIR shall be filed with the Secretary for Resources at least three working days before release of the draft EIR for state, federal and public review, in accordance with Section 15085(c) of the State EIR Guidelines.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 770. State, Federal and Public Review.

Filing the Draft EIR with the Secretary for Resources and State and local clearinghouses shall provide an opportunity for Federal, State and local agencies and members of the public to respond. EIRs shall be available for public inspection upon request during normal working hours at 1416 Ninth Street, Sacramento, or may be requested through Regional offices of the Department of Fish and Game. Copies shall be made available to the general public for the actual cost of reproducing such copies.

(a) In accordance with Section 15160 of the State Guidelines, Fish and Game shall provide a minimum of 45 calendar days between release of the Draft EIR and the final date for receipt of comments. ESB shall specify the length of the review period after considering the physical and environmental complexities of the proposed project. Unless there has been a request for a specific reasonable extension of time, only those comments received within the review period shall be considered.

(b) Whenever a public hearing is held on the project as a part of the review and approval process, hearings on the Draft EIR shall be included. In all other cases, the Director shall determine the need for public hearings on the Draft EIR in accordance with Section 15165 of the State Guidelines. Such public hearings shall not be held until at least 45 days after release of the Draft EIR for review and comment.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 771. Final EIR Preparation.

Fish and Game lead unit shall evaluate significance of comments received and shall respond to those comments found to raise significant environmental points, and incorporate comments and responses in the Final EIR, in accordance with Sections 15085(d), 15085(e), and 15146(a) of the State EIR Guidelines.

(a) The form of the Final EIR shall be that deemed most appropriate by the Director. The title of a Final EIR shall begin with the statement, "Final Environmental Impact Report," followed by the project name. All comments and responses shall be either an attachment to the EIR or incorporated within a revised EIR in accordance with Section 15146(b) of the State Guidelines.

(b) In accordance with Section 15166 of the State EIR Guidelines, comments received shall be maintained in the files of Fish and Game for a reasonable period.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 772. Final EIR Review.

In accordance with Sections 1060 and 1070 of the State Administrative Manual, the final EIR will be submitted with a second Notice of Completion to OPR, the Agency Secretaries, the State Library, and other appropriate public agencies. At least 14 days shall be allowed for these agencies to object to the adequacy with which the Final EIR met objections or recommendations made on the project during the review of the Draft EIR.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 773. Processing of Final EIR.

As required by Section 15085(g) of the State Guidelines, the final EIR shall be presented to the Director of the department. The Director shall certify that the final EIR has been completed in compliance with CEQA

and the State EIR Guidelines and that he has reviewed and considered the information contained in the EIR.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 774. Findings.

Fish and Game shall not approve or carry out a project for which an environmental impact report has been completed which identifies one or more significant effects of the project unless the public agency makes one or more of the following written findings for each of those significant effects, accompanied by a statement of the facts supporting each finding.

(a) Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant environmental effects thereof as identified in the final EIR.

(b) Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

(c) Specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the final EIR.

These findings required by Section 774 shall be supported by substantial evidence in the record.

The finding in subsection (b) shall not be made if Fish and Game has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 775. Statement of Overriding Considerations.

In accordance with Section 15089 of the State EIR Guidelines, if a project is approved for which serious adverse environmental consequences have been identified in an EIR, a statement may be made identifying the other interests that warrant approval. If such a statement is made, it should be included in the record of the project approval and may be attached to the Notice of Determination.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 776. Notice of Determination.

Within ten days after the decision on a project, Fish and Game shall file a Notice of Determination with the Secretary for Resources in accordance with Section 15085(g) of the State EIR Guidelines.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 777. Final EIR to Local Planning Agencies.

At the time of filing the Notice of Determination with the Secretary for Resources, Fish and Game shall file a copy of the final EIR with the local planning agencies as specified in Section 15085(i) of the State EIR Guidelines.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

Article 2.5. Certified Regulatory Program for Adoption of Regulations

§ 777.5. Purpose.

(a) This Article sets forth the procedure governing the Department of Fish and Game's (the "Department") adoption of regulations which may have a significant effect on the environment.

(b) These regulations are adopted by the Department to implement the procedures provided for under California Public Resources Code section 21080.5, which exempts a regulatory program certified by the Secretary of the Resources Agency from certain requirements of the California Environmental Quality Act ("CEQA"), when the regulatory program requires the preparation of a plan or other written documentation containing environmental information which is functionally similar to that required under CEQA.

(c) These regulations are adopted by the Department pursuant to the authority established by the Department's enabling legislation, as set forth in the California Fish & Game Code, including, but not limited to, section 702.

(d) If the Resources Agency declines to certify the regulatory program under California Public Resources Code section 21080.5, or if the Resources Agency revokes that certification, then this Article will no longer apply to the Department of Fish and Game's adoption of regulations.

NOTE: Authority cited: Section 702, Fish and Game Code. Reference: Section 21080.5, Public Resources Code.

HISTORY

1. New article 2.5 (sections 777.5–777.9) and section filed 8–27–98; operative 8–27–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 35).

§ 777.6. Contents of Initial Statement of Reasons.

(a) When the Department proposes to adopt, amend, or repeal a standard or regulation that falls within Section 777.5(a), above, the Department shall prepare and make available an Initial Statement of Reasons to accompany the proposed Department regulations, as required by Government Code section 11346.2.

(b) In addition to the information required by Government Code section 11346.2, the Initial Statement of Reasons shall contain the following material:

(1) A description of the proposed regulations and any possible significant adverse effects of the proposed regulations on the environment. If there are no significant adverse effects, the description shall so state. Such statement shall be supported by documentation describing the possible effects that the Department examined in reaching its conclusion.

(2) A statement of feasible alternatives to the proposed regulations and mitigation measures available to substantially lessen any significant or potentially significant adverse effect of the proposed regulations on the environment; or a statement that, because the Department's review of the proposed regulations showed that the proposed regulations would not have any significant or potentially significant effects on the environment, no alternatives or mitigation measures are proposed to avoid or reduce significant effects on the environment. Such statement shall be supported by documentation describing the possible effects that the Department examined in reaching its conclusion.

NOTE: Authority cited: Section 702, Fish and Game Code. Reference: Section 21080.5(d)(2), Public Resources Code.

HISTORY

1. New section filed 8–27–98; operative 8–27–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 35).

§ 777.7. Circulation of Notice and Initial Statement of Reasons; Solicitation of Comments and Consultation with Agencies Which Have Jurisdiction by Law; Subsequent Notices.

(a) The Initial Statement of Reasons and the proposed regulations shall be available for review and comment by other public agencies and the general public, as required by Government Code section 11346.8. The public review period shall be at least forty–five (45) days.

(b) Notice of the proposed action and availability of the Initial Statement of Reasons and the proposed regulations shall be mailed and published at least 45 days before the close of the public comment period, as required by Government Code section 11346.4. Such notice shall comply with Government Code section 11346.5 and shall include a request for input by the public and other public agencies.

(c) After the Notice is published, the Department shall consult with all other public agencies which have jurisdiction by law with respect to the activities involved in the proposed regulations.

(d) If changes or additions to the proposed regulations are made or if material is added to the record, subsequent notice and opportunity for

comment by the public and other public agencies shall be provided as required by Government Code section 11346.8.

NOTE: Authority cited: Section 702, Fish and Game Code. Reference: Section 21080.5(d)(2)(iii) and (iv), Public Resources Code.

HISTORY

1. New section filed 8–27–98; operative 8–27–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 35).

§ 777.8. Evaluation and Adoption of Proposed Regulations.

(a) When preparing the Initial Statement of Reasons, the Department shall evaluate proposed regulations for consistency with the Department's enabling legislation. The Department's evaluation shall be set forth in writing in the Initial Statement of Reasons.

(b) When evaluating proposed regulations, the Department shall utilize an interdisciplinary approach that will ensure the integrated use of the natural and social sciences in decision making, consistent with the environmental protection purposes of the Department's enabling statute. The evaluation shall address both short–term and long–term effects on the environment, and shall also address growth–inducing effects and any potential cumulative effects.

(c) Any proposed regulations for which significant adverse environmental effects have been identified during the review process shall not be approved or adopted as proposed if there are feasible mitigation measures or feasible alternatives available which would avoid or substantially lessen any significant adverse effect which the proposed regulations may have on the environment, in accordance with Public Resources Code section 21081.

(d) If the analysis identifies significant adverse environmental effects for which feasible mitigation measures are not available, it shall also include a statement describing any specific environmental, economic, legal, social, technological, or other benefits which might justify the significant environmental effects of the proposed regulations.

(e) In addition to meeting the requirements of Government Code section 11346.9(a)(3), if comments are received from other public agencies and members of the public during the evaluation process which raise significant environmental points, the Department shall summarize and respond to such comments in writing prior to taking final action on the proposed regulations and such written responses shall be included in the record of the rulemaking proceeding.

NOTE: Authority cited: Section 702, Fish and Game Code. Reference: Sections 21080.5(d)(2)(i), (ii) and (iv), and 21081, Public Resources Code.

HISTORY

1. New section filed 8–27–98; operative 8–27–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 35).

§ 777.9. Notice of Decision.

(a) A notice of the final decision by the Department, which indicates whether the proposed regulations will, or will not, have a significant effect on the environment, shall be filed with the Secretary of the Resources Agency. The notice of the final decision shall be available for public inspection, and a list of the notices will be posted on a weekly basis in the Office of the Resources Agency, and will remain posted for a period of thirty (30) days.

NOTE: Authority cited: Section 702, Fish and Game Code. Reference: Section 21080.5(d)(2)(v), Public Resources Code.

HISTORY

1. New section filed 8–27–98; operative 8–27–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 35).

Article 3. Fish and Game Review Procedures for EIRs and Negative Declarations

§ 778. General.

The nature and extent of Fish and Game's review of EIRs and Negative Declarations will be determined by the following conditions:

(a) Fish and Game has legal jurisdiction with respect to a project as it affects natural resources which are held in trust for the people of the State of California.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 779.5. Review of Projects Affecting Natural Resources Held in Public Trust—Early Consultation.

Under conditions specified in Section 21080.3 of CEQA, a lead agency shall consult with Fish and Game prior to the decision of whether an EIR or Negative Declaration is required. Comments shall be provided by the responsible regional unit.

Section 21080.4 of CEQA requires lead agencies to send a Notice of Determination to Fish and Game if an EIR is required. Upon receipt of such notice ESB personnel shall send the Notice to the responsible regional unit. This unit shall specify the scope and content of environmental information germane to Fish and Game statutory responsibilities and identify specific concerns with the project. The above information shall be provided in writing to ESB for review within 40 days of the date on the Notice of Determination. ESB shall obtain appropriate signatures and forward Fish and Game comments to the Resources Agency within 45 days of the date on the Notice of Determination.

In order for the environmental review process of a project to be timely and complete, the responsible regional unit of Fish and Game may request one or more meetings between representatives of agencies involved in the project. In addition, the responsible unit shall attend any such meeting requested by the lead agency or any other agency involved in the project. Such meetings shall be convened as soon as possible, but no later than 30 days, after they have been requested.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 780. Review of Draft EIRs and Negative Declarations.

Fish and Game in reviewing environmental documents, shall focus on the sufficiency of the EIR in accordance with Section 15161(c) of the State EIR Guidelines. Comments should focus on any shortcomings in the EIR. The appropriateness of using a Negative Declaration, or additional alternatives or mitigation measures which the document should include. Comments shall be provided by the regional unit to ESB for review. If the comments are sufficient, appropriate signatures shall be obtained, and the comments forwarded to the Resources Agency for incorporation into other Agency comments, if any. If the comments are not sufficient, regional unit personnel and ESB personnel shall coordinate to complete the comments before obtaining necessary signatures.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 780.5. Review of Final EIRs and Negative Declarations.

The same procedure shall be used to review final documents as is used to review draft documents.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 781. Designation of Contact Person.

Under the conditions and procedures specified above, Fish and Game shall supply with its comments the name of a Fish and Game contact person in accordance with Section 15161(d) of the State EIR Guidelines.

NOTE: Authority cited: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code; Section 15050 of the State EIR Guidelines.

§ 781.5. Regulation Procedure.

(a) When the department submits a recommendation to the commission with regard to adopting regulations which may have a significant effect on the environment, or it is anticipated that a substantial body of opinion will reasonably consider the environmental effect to be adverse, the recommendation shall be presented in written form containing:

(1) The proposal,

(2) Reasonable alternatives to the proposal, and

(3) Mitigation measures to minimize any significant adverse environmental impacts of the proposal.

(b) Recommendations from the department shall consider the relevant portions of policies declared by the state legislature and the commission dealing with the management of fish and wildlife resources.

(c) Recommendations received from any person other than the department shall be considered as a comment on, or counter proposal to, the recommendations received from the department, and a written response shall be prepared by the department.

(d) The commission will evaluate proposals according to how well the recommendations would achieve the purposes and policies of fish and wildlife management described in the Fish and Game Code, and in Division 1, Title 14, California Administrative Code.

(e) After receipt of the recommendation from the department, the commission shall consult with all other public agencies having jurisdiction by law with respect to the activities involved in the recommendation.

(f) Notice of the filing of the recommendation by the department shall be made to the public following the statutory requirements of the Fish and Game Code. The notification shall be provided early enough that people will have at least 30 days, or until the next meeting, whichever occurs first, to respond to the recommendation before the commission takes its action. Notice shall also be mailed to any person who requests in writing such notification.

(g) The commission will not adopt regulations as proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse impact which the activity may have on the environment, unless specific economic, social or other conditions make infeasible such project alternatives or such mitigation measures.

(h) The final action on the adopting of regulations shall include the written response of the commission to significant environmental points raised during the evaluation process by other public agencies and members of the public. Responses to comments received prior to the final public meeting when the commission must take its action will be prepared in writing prior to the meeting. Responses to comments received at the final meeting may be made orally by the commission during the meeting. Such oral responses will be included in the official written minutes of the meeting.

(i) Notice of the adoption of a regulation adopted pursuant to Section 21080.5, Public Resources Code, shall be filed with the Secretary for Resources. The notice shall be available for public inspection and shall remain posted for a period of 30 days.

NOTE: Authority cited: Section 21080.5, Public Resources Code, and Section 15050 of the State EIR Guidelines. Reference: Section 21080.5, Public Resources Code, and Section 15050 of the State EIR Guidelines.

HISTORY

1. New section filed 10–19–76; effective thirtieth day thereafter (Register 76, No. 43).
2. Amendment of subsection (a) filed 3–15–77 as an emergency; effective upon filing (Register 77, No. 12).
3. Certificate of Compliance filed 7–8–77 (Register 77, No. 28).
4. Amendment of subsection (a) filed 7–8–77; effective thirtieth day thereafter (Register 77, No. 28).
5. Amendment of NOTE filed 7–16–81; effective thirtieth day thereafter (Register 81, No. 29).
6. Renumbering of Section 3.90 to Section 781.5 filed 2–17–82; designated effective 3–1–82 (Register 82, No.8).

Chapter 5. Fish and Game Commission, Wildlife Conservation Board, and Department of Fish and Game—Conflict of Interest Code

NOTE: It having been found, pursuant to Government Code Section 11344, that the printing of the regulations constituting the Conflict of Interest Code is impractical and these regulations being of limited and particular application, these regulations are not published in full in the California Code of Regulations. The regulations are available to the public for review or purchase at cost at the following locations:

FISH AND GAME COMMISSION
1416 NINTH ST.
SACRAMENTO, CALIFORNIA 95814

WILDLIFE CONSERVATION BOARD

The Conflict of Interest Code is designated as Chapter 5 of Title 14 of the California Code of Regulations, and consists of sections numbered and titled as follows:

Section
782. General Provisions
Appendix

NOTE: Authority cited: Section 87300 and 87304, Government Code. Reference: Sections 87300, et seq., Government Code.

HISTORY

1. New Chapter 5 (Articles 1–5, Sections 782–786.7) filed 11–9–77; effective thirtieth day thereafter. Approved by Fair Political Practices Commission 10–4–77 (Register 77, No. 46).
2. Repealer of Chapter 5 (Article 1–4, Sections 782–786.7) and new Chapter 5 (Section 782 and Appendix) filed 2–26–81; effective thirtieth day thereafter. Approved by Fair Political Practices Commission 12–1–80 (Register 81, No. 9).
3. Amendment of Appendix filed 1–20–87; effective thirtieth day thereafter. Approved by Fair Political Practices Commission 10–14–86 (Register 87, No.4).
4. Amendment of Appendix filed 1–21–93; operative 2–22–93. Submitted to OAL for printing only pursuant to Government Code section 11343.8. Approved by Fair Political Practices Commission 11–9–92 (Register 93, No. 4).
5. Amendment of chapter heading, contact information, section and Appendix filed 6–9–2005; operative 7–9–2005. Approved by Fair Political Practices Commission 4–4–2005 (Register 2005, No. 23).

Chapter 6. Regulations for Implementation of the California Endangered Species Act

Article 1. Take Prohibition; Permits for Incidental Take of Endangered Species, Threatened Species and Candidate Species

§ 783.0. Purpose and Scope of Regulations.

This article implements Section 2080 and Section 2081 of the Fish and Game Code. This article does not affect the Department's authority to authorize take pursuant to any other provision of this division.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code. Reference: Sections 2080 and 2081, Fish and Game Code.

HISTORY

1. New chapter 6, article 1 (sections 783.0–783.8) and section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.1. Prohibitions.

(a) No person shall import into this State, export out of this State or take, possess, purchase, or sell within this State, any endangered species, threatened species, or part or product thereof, or attempt any of those acts, except as otherwise provided in the California Endangered Species Act, Fish and Game Code Section 2050, et seq. ("CESA"), the Native Plant Protection Act, the Natural Community Conservation Planning Act, the California Desert Native Plants Act, or as authorized under this article in an incidental take permit.

(b) Subsection (a) applies to any species designated as a candidate species under Section 2074.2 of the Fish and Game Code if the Commission has issued notice under Section 2074.4.

(c) Department wildlife management activities. The possession or take of endangered, threatened, or candidate species by employees and agents of the Department for scientific, educational and management purposes, and for law enforcement purposes, is not prohibited.

(d) Take of insects. The take of insects and other invertebrates that are not fish as defined in the Fish and Game Code is not prohibited.

NOTE: Authority cited: Sections 702, 1001, 2081(a) and 2081(d), Fish and Game Code. Reference: Sections 2080, 2085, 2062 and 2067, Fish and Game Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.2. Incidental Take Permit Applications.

(a) Permit applications. Applications for permits under this article must be submitted to the Regional Manager. Each application must include all of the following:

(1) Applicant's full name, mailing address, and telephone number(s). If the applicant is a corporation, firm, partnership, association, institution, or public or private agency, the name and address of the person responsible for the project or activity requiring the permit, the president or principal officer, and the registered agent for the service of process.

(2) The common and scientific names of the species to be covered by the permit and the species' status under CESA, including whether the species is the subject of rules and guidelines pursuant to Section 2112 and Section 2114 of the Fish and Game Code.

(3) A complete description of the project or activity for which the permit is sought.

(4) The location where the project or activity is to occur or to be conducted.

(5) An analysis of whether and to what extent the project or activity for which the permit is sought could result in the taking of species to be covered by the permit.

(6) An analysis of the impacts of the proposed taking on the species.

(7) An analysis of whether issuance of the incidental take permit would jeopardize the continued existence of a species. This analysis shall include consideration of the species' capability to survive and reproduce, and any adverse impacts of the taking on those abilities in light of (A) known population trends; (B) known threats to the species; and (C) reasonably foreseeable impacts on the species from other related projects and activities.

(8) Proposed measures to minimize and fully mitigate the impacts of the proposed taking.

(9) A proposed plan to monitor compliance with the minimization and mitigation measures and the effectiveness of the measures.

(10) A description of the funding source and the level of funding available for implementation of the minimization and mitigation measures.

(11) Certification in the following language:

I certify that the information submitted in this application is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to suspension or revocation of this permit and to civil and criminal penalties under the laws of the State of California.

(b) Information requirements; consultation with Department. Responses to the requirements of section 783.2(a)(5)–(a)(9) shall be based on the best scientific and other information that is reasonably available. At an applicant's request, the Department shall, to the greatest extent practicable, consult with the applicant regarding the preparation of a permit application in order to ensure that it will meet the requirements of this article when submitted to the Department. An analysis prepared pursuant to state or federal laws other than CESA that meets the requirements of section 783.2 and 783.3 may be submitted in an incidental take permit application.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code. Reference: Section 2081(b) and (c), Fish and Game Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.3. Compliance with the California Environmental Quality Act.

(a) Department as responsible agency. In general, the Department will be a responsible agency for purposes of issuing an incidental take permit where another public agency must approve the project or activity for which the permit is sought and the other agency has taken the lead agency role for purposes of compliance with the California Environmental Quality Act, Public Resources Code section 21000, et seq. ("CEQA"). Where the Department will be a responsible agency for purposes of CEQA, the following must be included in the permit application required by section 783.2:

(1) The name, address, telephone number and contact person of the lead agency.

(2) A statement as to whether an environmental impact report, negative declaration, mitigated negative declaration, initial study has been prepared or is being considered, or whether another document prepared pursuant to a regulatory program certified pursuant to Public Resources Code section 21080.5 (and listed in title 14, California Code of Regulations, section 15251) has been prepared or is being considered.

(3) At the option of the applicant, a notice of preparation, notice of determination, or draft or final environmental document may be attached.

(b) Department as lead agency. In general, the Department will act as the lead agency for purposes of CEQA where issuance of the incidental take permit is the only public agency action subject to CEQA that will be taken with regard to the project or activity for which the permit is sought. Where the Department will act as a lead agency for purposes of issuing an incidental take permit, the permit applicant, in addition to the information required by section 783.2, shall provide sufficient information to enable the Department to determine whether the project or activity for which a permit is sought, as proposed, may result in significant adverse environmental effects in addition to the impacts of taking analyzed pursuant to section 783.2, and, if so, whether feasible alternatives or feasible mitigation measures would avoid or substantially lessen any such significant adverse effects. In such cases, each application shall include an analysis of all potentially significant adverse environmental effects which may result from the project or activity, and either (1) a discussion of feasible alternatives and feasible mitigation measures to avoid or substantially lessen any significant adverse environmental effects or (2) a statement that, because the applicant's analysis of the proposed project showed that the proposed project would not have any significant or potentially significant effects on the environment, no alternatives or mitigation measures are proposed to avoid or substantially lessen significant effects on the environment. This statement shall be supported by documentation describing the potential effects examined in reaching this conclusion. If the analysis identifies significant adverse environmental effects for which feasible mitigation measures are not available, it shall also include a statement describing any specific environmental, economic, legal, social, technological, or other benefits which might justify the significant environmental effects of the project or activity. The analysis and information required by this section shall be provided to the Department as soon as reasonably practicable following the submission of a permit application.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code; and Section 21080.5, Public Resources Code. Reference: Section 2081(b), Fish and Game Code; and Sections 21002.1, 21069, 21080.1, 21080.3, 21080.4, 21080.5 and 21165, Public Resources Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.4. Incidental Take Permit Review Standards.

(a) Issuance criteria. If an application is submitted in accordance with section 783.2 and section 783.3, the Director shall decide whether or not

an incidental take permit should be issued. A permit may only be issued if the Director finds that:

(1) The take authorized by the permit will be incidental to an otherwise lawful activity.

(2) The applicant will minimize and fully mitigate the impacts of the take authorized under the permit. The measures required to meet this obligation shall be roughly proportional in extent to the impact of the authorized taking on the species. Where various measures are available to meet this obligation, the measures required shall maintain the applicant's objectives to the greatest extent possible. All required measures shall be capable of successful implementation. For purposes of this section only, impacts of taking include all impacts on the species that result from any act that would cause the proposed taking.

(3) The permit will be consistent with any regulations adopted pursuant to Fish and Game Code Sections 2112 and 2114.

(4) The applicant has ensured adequate funding to implement the measures required under the permit to minimize and fully mitigate the impacts of the taking, and to monitor compliance with, and the effectiveness of, the measures.

(b) No incidental take permit shall be issued pursuant to this article if issuance of the permit would jeopardize the continued existence of the species. The Department shall make this determination based on the best scientific and other information that is reasonably available, and shall include consideration of the species' capability to survive and reproduce, and any adverse impacts of the taking on those abilities in light of

(1) known population trends;

(2) known threats to the species; and

(3) reasonably foreseeable impacts on the species from other related projects and activities.

(c) Permit conditions. Every permit issued under this article shall contain such terms and conditions as the Director deems necessary or appropriate to meet the standards in this section. In determining whether measures are capable of successful implementation, the Director shall consider whether the measures are legally, technologically, economically and biologically practicable. This provision does not preclude the use of new measures or other measures without an as yet established record of success which have reasonable basis for utilization and a reasonable prospect for success.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code. Reference: Sections 2081(b) and (c), Fish and Game Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.5. Incidental Take Permit Process.

(a) The Director shall review and render a decision regarding incidental take permit applications in accordance with this section. On–site inspections by the Department may be required prior to a final decision by the Director.

(b) Initial review. The Department shall complete an initial review of each incidental take permit application within 30 days of receipt. If the Department determines that the application is complete, it shall notify the applicant that the application has been accepted and shall commence review of the permit application in accordance with section 783.5(c) or section 783.5(d), as applicable. This determination shall be based solely on whether the applicant has provided information responsive to each required element of sections 783.2 and 783.3 and shall not be based on the merits of the application. If an incomplete or improperly executed application is submitted, the Department shall return the application to the applicant with a description of the deficiency. The applicant shall have 30 days from receipt of the returned application to correct the deficiency and re–submit the application. If the Department takes no action within 30 days of receipt, the application shall be deemed complete. The Department may require supplementary information during the application review process after the application is determined to be complete, or is deemed complete, pursuant to this subsection.

(c) Department as CEQA responsible agency. If the Department is a responsible agency for purposes of CEQA, the Department shall act in accordance with California Code of Regulations, title 14, section 15096 and other applicable provisions of CEQA and the CEQA Guidelines, California Code of Regulations, title 14, section 15000, et seq.. The Director shall decide whether an incidental take permit can be issued under this article, in accordance with CEQA and the CEQA Guidelines, based on a review of the application; the environmental impact report, mitigated negative declaration or negative declaration, or other environmental documentation prepared pursuant to a regulatory program certified pursuant to Public Resources Code section 21080.5 (and listed in title 14, California Code of Regulations, section 15251), prepared by the lead agency; the lead agency's findings under Section 21081 of the Public Resources Code; and any other available, relevant information included in the record by the Department.

(1) If the Department determines that it will not proceed with any of the actions specified in California Code of Regulations, title 14, section 15096(e), the Director shall approve the application and issue a permit, or deny an application, in accordance with this article as soon as possible and no later than the latest of the following dates:

(A) 90 days from the date on which the lead agency approved the activity. However, the Department shall, at the request of the applicant, commence processing the application as soon as the information necessary to commence the processing is available.

(B) 90 days from the date on which the application was accepted as complete by the Department.

(C) If the Department makes a written finding that additional time is necessary due to the complexity of the application or the scope and duration of the requested permit, the 90 day periods for acting upon the permit application may be extended an additional 60 days to at total of 150 days.

(2) If the Director decides to approve the application, the Director shall make findings substantiating compliance with section 783.4 and shall make the findings required of a CEQA responsible agency under California Code of Regulations, title 14, section 15096(h). The Director shall then issue the incidental take permit. Within five working days after the issuance or amendment of a permit, the Department shall file a notice of determination under California Code of Regulations, title 14, section 15096(i).

(3) If the Director decides to deny the application, the Director shall return the application to the applicant with a written statement of the basis for the denial and a description of any measures the Director deems necessary in order for the application to be approved.

(d) Department as lead agency. If the Department is the lead agency under CEQA for purposes of issuing an incidental take permit, the application shall be reviewed, and approved or denied in accordance with this subsection. The Director shall approve an application and issue a permit, or deny the application , under this subsection no later than 120 days from the date on which the completed application is accepted as complete by the Department; provided, however, that the Department may extend this time to no later than 180 days from the date the application is accepted upon a written finding that the extension is necessary due to the complexity of the application or the scope and duration of the requested permit.

(1) Review of environmental analysis. After accepting a completed application, the Department shall review the analysis submitted by the applicant pursuant to section 783.3 and make any revisions that the Director deems necessary or appropriate to comply with CEQA.

(2) Notice of Public Availability of application.

(A) Public review and comment. Once the Department has reviewed and revised the analysis, it shall make the application and analysis available for public review at the headquarters of the region in which the application was submitted and shall distribute copies of a Notice of Public Availability. A minimum of 30 days following distribution of the Notice of Public Availability shall be allowed for public review and comment regarding the application. The Notice of Public Availability shall include the following:

1. the name of the applicant;
2. a brief description of the project or activity for which the permit is sought and its location;
3. the common and scientific names of the species to be covered by the permit;
4. the date on which the Department accepted the application;
5. a description of how copies of the application and analysis can be obtained;
6. the name and telephone number of a contact person within the Department who can answer questions regarding the application; and
7. a statement that the Department seeks written comments from the public regarding the application and analysis, an address to which the comments should be sent, and the deadline for submission of the comments.

(B) Distribution of notice. Copies of the Notice of Public Availability shall be distributed as follows:

1. A copy shall be sent to the office of the County Clerk of the county in which the proposed project or activity would take place and, if applicable, to the planning department of the city with jurisdiction over the project or activity, for posting at the customary place for posting environmental matters.
2. If the Director determines that the proposed project or activity is of Statewide significance, a copy shall be filed with the Office of Planning and Research.
3. A copy shall be sent to any other person upon written request.
4. Copies of the Notice of Public Availability may also be posted or made available at such other locations as the Director deems desirable and feasible to provide adequate public notice.

(3) Consultation. Concurrent with the distribution of the Notice of Public Availability, the Department shall consult with, and request written comments from, all public agencies with jurisdiction by law over the project or activity for which the permit is sought.

(4) Response to comments. The Department shall prepare a written summary and response to all significant environmental points raised during review of the application.

(5) Issuance of permit. The Director's decision regarding the application shall be based on the application and analysis, the written summary and response to significant environmental points, and any other available, relevant information included in the record by the Department. The Director shall determine whether or not to issue an incidental take permit pursuant to this article and, in addition, shall determine whether the project or activity, as proposed, may result in any significant adverse environmental effects in addition to the impacts of taking species to be covered by the permit, and, if so, whether feasible alternatives or feasible mitigation measures would avoid or substantially lessen any significant adverse effects. The Director shall not approve the application, as proposed, if there are feasible mitigation measures or alternatives which would substantially reduce any significant adverse effects. If significant adverse effects will likely result even after the inclusion of feasible mitigation measures or alternatives, the Director may approve the application if the Director first makes findings in accordance with the provisions of Section 21081 of the Public Resources Code.

(A) If the Director decides to approve the application, the Director shall make findings substantiating compliance with section 783.4 and this subsection (d)(5). The Director shall then issue the incidental take permit.

(B) If the Director decides to deny the application, the Director shall return the application to the applicant with a written statement of the basis for the permit denial and a description of any measures the Director deems necessary in order for the application to be approved.

(6) Notice of decision. Within five working days of issuing an incidental take permit or denying an application under this subsection(d), the Director shall file a Notice of Decision, which indicates whether the proposed permit will, or will not, have a significant effect on the environment, with the Secretary of the Resources Agency. The Notice of Decision shall include a statement that the Director approved the application and has issued an incidental take permit, or that the Director denied the application.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code; and Section 21080.5, Public Resources Code. Reference: Section 2081(b), Fish and Game Code; and sections 21002.1, 21069, 21080.1, 21080.3, 21080.4, 21080.5 and 21165, Public Resources Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.6. General Permit Conditions.

The following provisions apply to all permits issued under this article.

(a) Assignment or transfer of permit.

(1) Except as provided in subsection (a)(2) below, no incidental take permit shall be assigned or transferred without the written consent of the Department, which shall not be unreasonably withheld.

(2) With written notice to the Department, any permit may be assigned or transferred without the approval of the Department in the following circumstances:

(A) The sale, merger, annexation, consolidation or other acquisition of an institutional, corporate or public entity permit holder by another entity.

(B) The transfer of a permit from a natural person to the institutional, corporate, or public employer of such individual.

(C) As security for a debt under the provision of any mortgage, deed of trust, indenture, bank credit agreement, or similar instrument.

(b) Renewal of permits.

(1) Applicants for renewal must submit a written application to the Regional Manager at least 60 days prior to the expiration date of the permit. Applicants must certify in writing that all statements and information in the original application remain current and correct, unless previously changed or corrected. If the information is no longer current or correct, the applicant must provide corrected information.

(2) Renewal criteria. The Director shall renew a permit if the application meets the standards in section 783.4.

(3) Continuation of permitted project or activity. Any person holding a valid, renewable, incidental take permit who has submitted a timely application for renewal, may continue the activities authorized by the expired permit until the Director has acted on such person's application for renewal.

(c) Amendment of permit.

(1) Permittee's request. Where circumstances have changed so that a permittee desires to have any condition of a permit modified, such permittee must submit an application and supporting information in conformity with this article.

(2) Department amendments. The Department may amend any permit at any time during its term with the concurrence of the permittee, or as required by law. The Department shall amend a permit as required by law regardless of whether the permittee concurs with such amendment.

(3) Change of name or address. A permittee is not required to amend a permit or obtain a new permit if there is a change in the legal individual or business name, or in the mailing address of the permittee. A permittee is required to notify the Regional Manager within 10 calendar days of such change. This provision does not authorize any change in location of the conduct of the permitted project or activity when approval of the location is a qualifying condition of the permit.

(4) Minor permit amendments. Amendments that would not significantly modify the scope or nature of the permitted project or activity or the minimization, mitigation or monitoring measures in an incidental take permit, as determined by the Department, shall be considered minor permit amendments. Minor permit amendments shall be approved and incorporated into the incidental take permit, or denied, by the Director within 60 days of the permittee's submission of an application for amendment. If the Director approves a minor permit amendment, the Depart–

ment shall not impose any new permit condition or modify any existing permit condition except when the new or modified condition:

(A) relates solely to the minor permit amendment,

(B) is required by changes in the law, or

(C) is needed to make existing permit conditions consistent with the proposed amendment.

(5) Major permit amendments. Amendments that would significantly modify the scope or nature of the permitted project or activity or the minimization, mitigation or monitoring measures in an incidental take permit, or require additional environmental review pursuant to Public Resources Code, section 21166, or California Code of Regulations, title 14, section 15162, as determined by the Department, shall be considered major permit amendments. Requests for major permit amendments shall be reviewed according to the process established for initial permit applications, except that the information and analysis provided in support of an application for a major permit amendment may rely on and supplement the information and analysis used in the initial permit application.

(6) Approval standard. The Director shall approve any minor or major permit amendment if the amended permit would continue to meet the standards in section 783.4.

(d) Alteration of permit. Permits shall not be altered, erased, or mutilated, and any permit which has been altered, erased, or mutilated shall immediately become invalid.

(e) Display of permit. Permits shall be displayed for inspection upon request by the Director or the Director's agents.

(f) Surrender of permit. Any person holding a permit shall surrender such permit to the Department upon notification that the permit has been suspended or revoked and all appeal procedures have been exhausted.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code. Reference: Section 2081(b), Fish and Game Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.7. Permit Suspension and Revocation.

(a) Criteria for suspension. The privileges of exercising some or all of the permit authority may be suspended at any time if the permittee is not in compliance with the conditions of the permit. Any action to suspend any privileges under an incidental take permit shall be limited so as to address the discrete action or inaction that has resulted in the suspension, to the extent consistent with the species protection purposes of the permit.

(b) Criteria for revocation. The Director may begin procedures to revoke a permit if the permittee fails within 60 days of written notification pursuant to subsection (c)(3) to correct deficiencies that were the cause of a permit suspension, or if statutory enactments subsequent to the issuance of the permit prohibit the continuation of the permit or the project or activity covered by the permit. Any action to revoke any privileges under an incidental take permit shall be limited so as to address the discrete action or inaction, or statutory enactment, that has resulted in the revocation, to the extent consistent with the species protection purposes of the permit.

(c) Procedure for suspension or revocation.

(1) When the Director believes there are valid grounds for suspending or revoking a permit the permittee shall be notified in writing of the proposed suspension or revocation by certified or registered mail. In no case shall a proposed revocation notice be issued prior to the 60 day period required by subsection (b). The notice shall identify the permit to be suspended or revoked, the reason(s) for such suspension or revocation, the actions necessary to correct the deficiencies, and inform the permittee of the right to object to the proposed suspension or revocation. The Department may amend any notice of suspension or revocation at any time.

(2) Upon receipt of a notice of proposed suspension or revocation the permittee may file a written objection to the proposed action. Such objection must be in writing, must be filed within 45 calendar days of the date of the notice of proposal, must state the reasons why the permittee objects to the proposed suspension or revocation, and may include supporting documentation.

(3) A decision on the proposed suspension or revocation shall be made within 45 days after the end of the objection period. The Department shall notify the permittee in writing of the Director's decision and the reasons therefor. The Department shall also provide the applicant with the information concerning the right to request reconsideration of the decision under section 783.8 of this article and the procedures for requesting reconsideration. No permit may be revoked pursuant to this section unless it has first been suspended pursuant to this section. The permit shall remain valid and effective pending any final determination on suspension under this subsection, except that a permit may be suspended immediately if statutory enactments subsequent to the issuance of the permit prohibit the continuation of the permit or the project or activity covered by the permit.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code. Reference: Section 2081(b), Fish and Game Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

§ 783.8. Reconsideration and Appeal Procedures.

(a) Request for reconsideration. Any person may request reconsideration of an action under this article if that person is one of the following:

(1) An applicant for permit issuance, renewal or amendment who has received written notice of denial;

(2) A permittee who has a permit amended, suspended, or revoked; or

(3) A permittee who has a permit issued, renewed, or amended but has not been granted authority by the permit to perform all activities requested in the application; or the permit includes minimization or mitigation measures other than those proposed by the applicant.

(b) Method of requesting reconsideration. Any person requesting reconsideration of an action under this article must comply with the following criteria:

(1) Any request for reconsideration must be in writing, signed by the person requesting reconsideration or by the legal representative of that person, and must be submitted to the Regional Manager.

(2) The request for reconsideration must be received by the Regional Manager within 30 days of the date of notification of the decision for which reconsideration is being requested.

(3) The request for reconsideration shall state the decision for which reconsideration is being requested and shall state the reason(s) for the reconsideration, including presenting any new information or facts pertinent to the issue(s) raised by the request for reconsideration.

(4) The request for reconsideration shall contain a certification in substantially the same form as provided in section 783.2(a)(11). If a request for reconsideration does not contain such certification, but is otherwise timely and appropriate, it shall be held and the person submitting the request shall be given written notice of the need to submit the certification within 15 days. Failure to submit certification shall result in the request being rejected as insufficient in form and content.

(c) Inquiry by the Department. The Department may institute a separate inquiry into the matter under consideration.

(d) Determination of grant or denial of a request for reconsideration. The Department shall notify the permittee of its decision within 45 days of the receipt of the request for reconsideration. This notification shall be in writing, shall state the reasons for the decision, and shall contain a description of the evidence which was relied upon by the issuing officer. The notification shall also provide information concerning the right to appeal and the procedures for making an appeal.

(e) Appeal. A person who has received an adverse decision following submission of a request for reconsideration may submit a written appeal to the Director. An appeal must be submitted within 30 days of the date of the notification of the decision on the request for reconsideration. The appeal shall state the reason(s) and issue(s) upon which the appeal is based and may contain any additional evidence or arguments to support the appeal.

(f) Decision on appeal.

(1) Before a decision is made concerning the appeal, the appellant may present oral arguments before the Director if the Director judges oral arguments are necessary to clarify issues raised in the written record.

(2) The Director shall notify the appellant in writing of his or her decision within 30 calendar days of receipt of the appeal, unless extended for one additional 30–day period for good cause and the appellant is notified of the extension.

(3) The decision of the Director shall constitute the final administrative decision of the Department.

NOTE: Authority cited: Sections 702 and 2081(d), Fish and Game Code. Reference: Section 2081(b), Fish and Game Code.

HISTORY

1. New section filed 12–30–98; operative 12–30–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

Article 2. Take Incidental to Routine and Ongoing Agricultural Activities

§ 786.0. Purposes.

(a) The purpose of this article is to encourage farmers and ranchers engaged in agricultural activities to establish locally designed programs to voluntarily enhance and maintain habitat for endangered and threatened species. These voluntary local programs shall be suited to the particular circumstances of the local agricultural area where each will be implemented.

(b) Upon approval of the voluntary local program by the Department, any taking of candidate, threatened or endangered non–fish species incidental to routine and ongoing agricultural activities is not prohibited by the California Endangered Species Act, Division 3, Chapter 1.5 of the Fish and Game Code, provided that the take occurs on a farm or ranch while implementing the management practices specified in the voluntary local program.

(c) The voluntary local programs authorized pursuant to this article shall provide sufficient flexibility to maximize participation and to gain the maximum wildlife benefits without compromising the economics of agricultural operations.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Sections 2062, 2067, 2068, 2080, 2086, 2088 and 2089, Fish and Game Code.

HISTORY

1. New article 2 (sections 786.0–786.6) and section filed 12–31–98; operative 12–31–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).
2. Amendment filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.1. Definitions.

(a) Management Practices. "Management practices" are practical, achievable agricultural practices that, to the maximum extent practicable, avoid and minimize the take of candidate, threatened or endangered species while encouraging enhancement of wildlife habitat without compromising the economics of agricultural operations when undertaken by a farmer or rancher. Examples of management practices include, but are not limited to, establishing brood ponds, installing artificial nesting structures, reducing harvester speed, integrated pest management techniques, planting fallow fields, delaying fall tillage, flooding harvested fields, and establishing wildlife refugia at margins of fields.

(b) Routine and Ongoing Agricultural Activities. "Routine and ongoing agricultural activities" shall include the cultivation and tillage of the soil; crop rotation; fallowing; dairying; the production, cultivation, growing, replanting and harvesting of any agricultural commodity including viticulture, vermiculture, apiculture, or horticulture; the raising of livestock, fur bearing animals, fish, or poultry; any practices performed by a farmer on a farm as incident to or in conjunction with those farming operations, including the preparation for market, delivery to storage or to market, or delivery to carriers for transportation to market, including any such activities recognized as compatible uses pursuant to the Williamson Act (Government Code sections 51200 et seq.) provided such activities are consistent with the economics of agricultural operations; and other similar agricultural activities as determined by the Department during its review and approval of a particular voluntary local program. Routine and ongoing agricultural activities do not include conversion of agricultural land to nonagricultural use, timber harvesting activities governed by the State Board of Forestry or activities that intentionally reduce habitat and wildlife to facilitate conversion to non–agricultural use. For the purposes of this article and Division 3, Chapter 1.5, Article 3.5 of the Fish and Game Code, the conversion of rangeland to more intensive agricultural uses such as permanent crops is not considered a routine and ongoing agricultural activity. Ordinary pasture maintenance and renovation and dry land farming operations consistent with rangeland management are considered routine and ongoing agricultural activities.

(c) Local Program. A "local program" or a "voluntary local program" is a locally designed voluntary program to encourage the enhancement and maintenance of habitat for candidate, threatened and endangered species and other wildlife in ways compatible with routine and ongoing agricultural activities on farms or ranches, proposed in accordance with section 786.2(a) of this article.

(d) Department. For purposes of this article, "Department" means the Director of the Department or any Regional Manager or other Department representative to whom the Director has delegated duties under this article.

NOTE: Authority cited: Sections 702, 2086 and 2089, Fish and Game Code. Reference: Sections 700, 704, 2062, 2067, 2068, 2086, 2087 and 2089, Fish and Game Code.

HISTORY

1. New section filed 12–31–98; operative 12–31–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).
2. Amendment of section and NOTE filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.2. Preparation of a Voluntary Local Program.

(a) Local Program Development. A local program shall be developed by a planning committee formed by a group of farmers and/or ranchers or individual farmers or ranchers who own or manage agricultural lands within the geographic area to be covered by the local program. The planning committee, or individual farmer or rancher, shall identify a lead applicant, which may be the local county Agricultural Commissioner or another entity designated by the planning committee. The planning committee shall design a local program in consultation with interested government agencies and in cooperation with interested local private sector entities and interested conservation groups.

(b) Consultation. Individuals or groups of farmers and ranchers developing a voluntary local program are encouraged to consult with the Department, the California Department of Food and Agriculture, the local county Agricultural Commissioner, University of California Cooperative Extension agents, the USDA Natural Resources Conservation Service, local Resource Conservation Districts, local non–profit and private sector entities, or other agricultural or wildlife experts in identifying effective management practices.

(c) Information and Assistance from the Department. Individuals or groups of farmers and ranchers may propose a voluntary local program to the Department for Department review and assistance. When requested, the Department shall advise and assist in the development of the voluntary management practices and voluntary local program. When providing information and assistance, the Department shall recognize that the State consists of many different climates, habitats and geographies and that management practices will vary throughout the State based on local conditions and local farming and ranching activities.

(1) The Department shall assist the individual(s) seeking to establish a voluntary local program with contacts and information from the Department of Food and Agriculture, the local county Agricultural Commissioner, University of California Cooperative Extension agents, local non–profit and private sector entities or other agricultural experts.

(2) The Department will, upon request, provide the best available scientific information in its possession on any candidate, threatened, or endangered species within the vicinity of the proposed voluntary local program and any such information the Department has on possible management practices.

(3) The Department shall serve as a repository for information concerning possible management practices. The Department may collect information from persons with expertise in agriculture, biology or habitat conservation, including but not limited to representatives of the Califor-

nia Department of Food and Agriculture, the U.S. Department of Agriculture, local county agricultural commissioners, University of California Cooperative Extension agents, the Farm Bureau, the Bureau of Land Management, the University of California at Riverside and Davis, California State University at Fresno, California Polytechnic University at Pomona and San Luis Obispo, and the Cattlemen's Association, and shall review the information with the California Department of Food and Agriculture for the purpose of obtaining advice as to the information's practical application to local programs. The Department will incorporate available information developed in the preparation and establishment of each voluntary local program into that repository to facilitate the establishment of subsequent voluntary local programs and to periodically update information.

(d) Voluntary Local Program Plan Elements. The following elements shall be included in the voluntary local program:

(1) Area Description. A description of the area to be covered by the voluntary local program needs to include: geographic boundaries; the number of acres covered by the voluntary local program area; the habitat enhancement opportunities and constraints bearing upon the development of recommended management practices; candidate, threatened, and endangered species and wildlife likely to benefit from the local program; and reasonably attainable interim targets and long–range goals for increasing the quantity and quality of wildlife habitat throughout the program area.

(2) Designated Representative. The local program shall identify the name and address of one or more designated representative(s) who will serve as a contact person for communications between the voluntary local program and Department.

(3) List of Management Practices. The management practices so listed shall be described in an appendix to the voluntary local program in sufficient detail so that farmers, ranchers and program reviewers may understand what the practices are, how these practices may be recognized in the field, and how these practices are intended to minimize the take of candidate, threatened and endangered species while encouraging the enhancement of habitat. The Department shall not require land set–aside or conservation easements as a management practice.

(4) Activities Covered by the Plan. A description of the general types of agricultural activities covered and a reasonable estimate of the type and amount of habitat to be maintained and enhanced and how any significant adverse environmental effects are addressed by the plan. This element may include a description of any agreements required under section 1603 of the Fish and Game Code that are intended to be approved during the term of the voluntary local program.

(5) Best Available Scientific Information. A statement with supporting evidence that the management practices are supported by the best available scientific information for both agricultural and habitat conservation practices. The Department shall not require the development of additional scientific information or data as a condition of approval for the voluntary local program.

(6) Flexibility. A statement with supporting evidence that the voluntary local program is designed to provide sufficient flexibility to maximize participation and to gain maximum wildlife benefits without compromising the economics of agricultural operations.

(7) Environmental Analysis. An environmental analysis meeting the requirements of this subsection shall be prepared and submitted to the Department, except that when another public agency is acting as lead agency under the California Environmental Quality Act, Public Resources Code sections 21000 et seq. ("CEQA"), in the preparation and adoption of the local program, the Department, acting as a responsible agency, will consider the lead agency's environmental document in place of this environmental analysis. The environmental analysis shall include a description of the proposed local program and an analysis of any potentially significant adverse effects of the local program on the environment.

(A) If no potentially significant adverse effect is identified, a statement to that effect shall be provided and supported by a checklist or other documentation, based on substantial evidence.

(B) If potentially significant adverse environmental effects are identified, the following shall be included:

1. A detailed statement of whether additional management practices are necessary to reduce potentially significant adverse effects to a level less than significant; and

2. If potentially significant adverse effects remain after full consideration of the environmental benefits from the proposed management practices, a detailed statement shall be prepared of potentially feasible alternatives to the local plan and additional potentially feasible management practices that would substantially lessen any remaining potentially significant adverse environmental effects. The analysis shall address both short–term and long–term significant effects on the environment, and shall also address growth–inducing effects and potential cumulative effects. The analysis shall identify any significant adverse environmental impacts that remain after implementation of all reasonable and feasible alternatives and management practices. If remaining significant environmental effects are identified, it shall also include a statement describing any public benefits of the plan, including the management practices which substantially lessen the significant environmental effects of the activity.

(8) Administrative Plan. The written administrative plan, which describes how the voluntary local program is administered, shall include: a record keeping process which will document implementation of the program's management practices while protecting the confidentiality of participants and conforming with confidentiality under section 786.2(d)(10) of this article; a procedure for developing, reviewing and revising recommendations for management practices; a procedure for assessing the acreage benefitting from the local program on an annual basis; and a procedure for revoking the participation in the local program of any local program participant who fails to conduct agricultural activities or recommended management practices in a manner which is consistent with the requirements of the local program. Failure to conduct an agricultural activity or recommended management practice due to an act of nature or an event beyond the control of a local program participant shall not constitute grounds for program or individual participant revocation. Any participant whose enrollment is involuntarily revoked shall be required to comply with the procedures for withdrawal from the local program.

(9) Withdrawal and Termination of the Voluntary Local Program. This element shall include terms and conditions for withdrawing individual participation in the voluntary local program or for termination of the entire voluntary local program. These terms and conditions shall establish a reasonable time period and reasonable measures to minimize impacts to listed species in the area during withdrawal from or termination of the local program, without compromising the economics of agricultural operations. These terms and conditions:

(A) Shall provide for notice to the Department of intent to terminate the voluntary local program or of the withdrawal of any individual farmer or rancher.

(B) Shall not require land set–aside for impacts to wildlife caused by withdrawing participation in the voluntary local program, and shall not impose penalties or disincentives for withdrawing participation.

(C) Shall not prohibit take of listed species during termination or withdrawal provided that the terms and conditions governing withdrawal or termination have been followed.

(10) Confidentiality. All information generated by a voluntary local program or an individual landowner in the course of participation in the local program that identifies or indicates the existence of endangered, threatened or otherwise protected species or their habitat on a particular farm or ranch, including but not limited to observations, records, correspondence and communications, shall be confidential to the extent permitted by the Public Records Act and other applicable laws. Confidentiality shall be ensured by the local program, members of the program committee, all public agencies and each of their respective agents and employees who obtain such information to the extent permitted by law. Confidential information may only be used or shared as necessary for the administration, approval or denial of a local program, or as otherwise required by law or expressly authorized in this article. Nothing in this article waives, compromises or eliminates any right of confidentiality recognized in the state's Public Records Act or Evidence Code. Waiver of

any right of confidentiality for such information shall not be a condition for approval of a local program or participation in a local program. The confidentiality provisions of this section extend to the reports prepared pursuant to section 786.7 of this article unless the release of information is authorized in writing by an individual landowner specifically for that purpose.

(11) Annual Report. The annual report shall include a summary of the acreage benefitting from the local program and a summary of the success of the management practices listed pursuant to subsection (d)(3) of this section and recommendations, if any, on how to further improve voluntary participation by farmers and ranchers and further improve benefits to wildlife. The annual report shall not include information generated by a voluntary local program or an individual landowner that identifies or indicates the existence of endangered, threatened or otherwise protected species or their habitat on a particular farm or ranch.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Sections 2062, 2067, 2068, 2080 and 2086, Fish and Game Code.

HISTORY

1. New section filed 12–31–98; operative 12–31–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).
2. Amendment of section heading and section filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.3. Voluntary Local Program Review and Authorization.

A voluntary local program shall be submitted, reviewed and authorized in accordance with this section. During its review of a local program, the Department may extend any of the time periods specified in this section for a period of no more than 15 days by providing written notice of the extension to the designated representative, and including an explanation of the reason additional time is required.

(a) Early Review. Before submitting the voluntary local program including the environmental analysis element for review, the voluntary local program representatives may request a meeting with the Regional Manager or the Regional Manager's designee for an unofficial review of the voluntary local program. The Regional Manager or the Regional Manager's designee is encouraged to meet with representatives of the voluntary local program upon request.

(b) Department liaison. Within 14 days of receiving a request for consultation or the submittal of a voluntary local program, the Department shall designate a staff person at its appropriate regional office to serve as the primary contact with program sponsors during the consultation and review processes. This designated liaison will be responsible for working with the voluntary local program's designated representative and for responding to inquiries from voluntary local program sponsors, keeping program sponsors informed of the status of the Department's review of the voluntary local program, and assisting with communication of Department comments and questions to program sponsors.

(c) Review of Voluntary Local Program. The voluntary local program shall be submitted to the Department for review. The Department shall conduct an initial review of the plan to determine whether the submissions are complete. Within 60 days after receipt of the local program plan, the Department shall report to the local program designee whether the local program as submitted is complete.

(1) If the plan is not complete, the Department shall inform the designee about what additional elements, information or documents are required to complete the plan and environmental analysis.

(2) If the plan is complete, the Department shall conduct a review of the environmental analysis and make any revisions in the environmental analysis that the Department deems necessary or appropriate to accurately describe the voluntary local program and its potential effects on the environment. If the Department makes any revisions to the environmental analysis, the Department shall inform the designee about the revisions before making the materials, including the program plan and the revised environmental analysis, available for public review in order to give the voluntary local program the opportunity to withdraw the proposed program before public review.

(d) Lead Agency — Public Review and Comment. When the Department is acting as CEQA lead agency, after the program plan and any environmental analysis have been reviewed, the Department shall make all materials, including the local program plan and environmental analysis, available for public review at the headquarters of the region in which the plan was submitted and at the Department's headquarters in Sacramento.

(1) Notice of Public Availability. The Department shall distribute copies of a Notice of Public Availability announcing that the voluntary local program and related documents are being made available for public review and comment. A minimum of 30 days shall be allowed for public review and comment after distribution of a Notice of Public Availability. The Notice of Public Availability shall include the following:

(A) The date on which the Department accepted the voluntary local program as complete.

(B) A brief description of the geographic area covered by the application and of the activities proposed to be covered by the local program.

(C) The location where the application is available for public review and the name and telephone numbers of a contact person within the Department who can answer questions regarding the application.

(D) A statement that the Department seeks written comments from the public regarding the plan, an address to which written comments regarding the application should be submitted, and the deadline for submission of the comments.

(2) Publication and Distribution of the Notice. The Department shall publish the Notice of Public Availability at least once in a newspaper of general circulation in the area affected by the local program. Copies of the Notice of Public Availability shall also be distributed as follows:

(A) A copy to the office of the County Clerk of the county or counties in which the proposed activity would occur for posting at the customary place for posting notices of environmental matters.

(B) A copy to the Office of Planning and Research.

(C) A copy to any other person upon written request.

(D) Copies may also be posted or made available at such other locations as the Department deems desirable and reasonably required to provide adequate public notice.

(3) Response to Public Comment. After the public comment period has closed, the Department shall:

(A) Review all public comments received, including those from public agencies with which the Department consults; and

(B) Prepare a written summary and response to all significant environmental points raised during the review of the application.

(e) External Consultation. The Department shall consult with and request written comments from the Department of Food and Agriculture, county agricultural commissioner(s) of the county or counties in which the local program is proposed, and all public agencies with jurisdiction by law over the activity to be covered by the local program. The consultations shall occur during the public comment period when the Department is acting as CEQA lead agency and during the 75–day local program review period when the Department is acting as CEQA responsible agency. In their comments, the Department of Food and Agriculture and the county agricultural commissioner(s) shall consider if the proposed voluntary local program is consistent with the economics of the agricultural operations.

(f) Department's Authorization of the Voluntary Local Program. Within 75 days of the close of the public comment period when the Department is acting as CEQA lead agency, and within 75 days of the Department's determination that the submitted local program is complete when the Department is acting as CEQA responsible agency, the Department shall take one of the following actions:

(1) Make the findings required by subsection (g) of this section and authorize the voluntary local program.

(2) If the Department determines that changes in the voluntary local program are necessary, the Department shall promptly communicate that determination and proposed changes to the voluntary local program's designated representative. With the consent of the voluntary local program designee, the Department may make changes in the voluntary local

program and authorize the revised local program provided the revisions do not require further environmental analysis or public notice.

(3) If major changes requiring additional time or further environmental review are needed, the Department shall reject the voluntary local program and convey the identified deficiencies in the local program plan to the designee for further revisions.

(g) Mandatory Findings for Authorization of Local Program. The director shall authorize a voluntary local program only upon making the following written findings in support of that authorization:

(1) That the voluntary local program includes management practices that will, to the greatest extent practicable:

(A) avoid the take of listed species,

(B) minimize take of species that cannot be avoided,

(C) encourage the enhancement of habitat; and

(D) maximize wildlife benefits without compromising the economics of agricultural operations.

(2) That the local program is consistent with the goals and policies of the California Endangered Species Act and is supported by the best available scientific information.

(3) For every significant adverse environmental effect that has been identified for a local program, one or more of the findings required by section 21081 of the Public Resources Code. The Department may not approve any local program for which significant adverse environmental effects have been identified if feasible alternatives or feasible mitigation measures are available that would substantially lessen a remaining significant adverse environmental effect and those alternatives or measures have not been incorporated into the local program. For purposes of these findings:

(A) "Feasible" means "feasible" as defined in section 21061.1 of the Public Resources Code.

(B) "Environmental impact report" means an environmental impact report prepared pursuant to CEQA or, if the Secretary for Resources certifies this article under section 21080.5 of the Public Resources Code, an environmental analysis prepared pursuant to this article.

(C) Mitigation measures shall consist of new or revised management practices designed to reduce or avoid significant adverse environmental effects.

(h) Notice of Decision. Within five working days of authorizing or amending a voluntary local program, the Director shall file a Notice of Decision with the Secretary for Resources. The Notice of Decision shall include a statement that the Director authorized or amended the local program.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Sections 2062, 2067, 2068 and 2086, Fish and Game Code.

HISTORY

1. New section filed 12–31–98; operative 12–31–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).
2. Amendment of section heading and repealer and new section filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.4. Amendments to the Voluntary Local Program.

(a) The voluntary local program may initiate an amendment to a local program by providing written notification to the Department and by providing the Department with the necessary information for review. The Department review and approval of such amendments shall be governed by the following provisions. The Director shall approve any minor or major program amendment if the amended program would continue to meet the standards in section 786.3(g) of this article.

(1) Minor Amendments. Amendments that the Department determines will not significantly modify the scope or nature of the local program; will not likely result in a significant adverse impact on candidate, threatened, or endangered species beyond that anticipated from the originally approved plan; will not likely diminish the habitat–enhancing benefits of the local program; and will otherwise meet the standards in section 786.3(g) of this article shall be considered minor amendments to the local program. The Director shall approve minor amendments and incorporate them into the local program, or shall deny the minor amendments, within 30 days of submission of a minor amendment to the Department. Minor amendments may be used to adapt a local program's management practices based on experience in implementing the local program to make those practices more effective in meeting the standards in section 786.3(g) of this article, provided the Department determines the changes meet the criteria in this subsection (a)(1) for minor amendments. For a minor amendment of a local program for which the Department adopted an environmental analysis, the Department may prepare an addendum to the environmental analysis or other appropriate document.

(2) Major Amendments. Amendments that the Department determines would significantly modify the scope or nature of the local program, likely result in a significant adverse impact on candidate, threatened, or endangered species beyond that anticipated from the originally approved plan, diminish the habitat–enhancing benefits of the local program, or require additional environmental review pursuant to section 21166 of the Public Resources Code or California Code of Regulations, Title 14, section 15162, shall be considered major amendments to the local program. Requests for major amendments shall be reviewed according to the process established in this article for new local programs, except that the information and analysis provided in support of an application for a major amendment may rely on supplemental information to the analysis used in the initial submittal for the local program.

(b) The Department may initiate an amendment to a local program pursuant to this subsection if it believes that an amendment is reasonably necessary to bring the local program into compliance with the provisions in section 2086(b) of the Fish and Game Code or any other relevant provision of law.

(1) To make minor amendments as defined in subsection (a)(1) of this section, the Department shall notify in writing the voluntary local program designee of the proposed minor amendment and give the voluntary local program participants 60 days to accept or decline the proposed minor amendments. If the voluntary local program decides to decline the proposed minor amendments, the Department may initiate steps necessary to allow for the termination of the program or allow individuals to withdraw from the voluntary local program. If the voluntary local program accepts the amendments or fails to respond within the 60 days, the Department may approve the minor amendments with no further consultation.

(2) To make major amendments as defined in subsection (a)(2) of this section, the Department must make a finding that the program is not in compliance with section 2086(b) of the Fish and Game Code and state its rationale. The local program designee shall be notified in writing of the findings and rationale and be given 60 days to respond to deficiencies outlined by the Department. If the voluntary local program fails to amend the program, as directed by the Department, the Department may initiate steps necessary to terminate the program and allow individuals to withdraw from the voluntary local program.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Sections 2062, 2067, 2068, 2080 and 2086, Fish and Game Code.

HISTORY

1. New section filed 12–31–98; operative 12–31–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).
2. Renumbering of former section 786.4 to new section 786.6 and new section filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.5. Department Termination of a Voluntary Local Program.

If the Department terminates a voluntary local program because it no longer complies with section 2086(b) of the Fish and Game Code, termination shall be conducted consistently with the terms and conditions established pursuant to section 786.2(d)(9) of this article. Individual participants following the terms and conditions of withdrawal shall continue to receive take authorization until withdrawal has been completed.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Sections 2080 and 2086, Fish and Game Code.

HISTORY

1. New section filed 12–31–98; operative 12–31–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

2. Renumbering of former section 786.5 to new section 786.7 and new section filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.6. Take Authorization.

Any taking of candidate, threatened or endangered species incidental to routine and ongoing agricultural activities is not prohibited by Division 3, Chapter 1.5 of the Fish and Game Code if the take occurs while management practices in a voluntary local program authorized pursuant to this article are being followed, except that this section does not authorize the take of fish species that are a member of the class Osteichthyes. The Department recognizes that management practices, if successful, will increase the number of individuals of candidate, threatened and endangered species in proximity to farms and ranches as a result of management practices. This article is intended to protect farmers and ranchers from legal liability for take that may result from their voluntary participation in a voluntary local program.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Sections 2062, 2067, 2068, 2080, 2086(c) and 2088, Fish and Game Code.

HISTORY

1. New section filed 12–31–98; operative 12–31–98 pursuant to Government Code section 11343.4(d) (Register 99, No. 1).

2. Renumbering of former section 786.6 to new section 786.8 and renumbering and amendment of former section 786.4 to section 786.6 filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.7. Reports to the Legislature.

(a) Beginning in 2000, and every five years thereafter, the Department shall submit a written report to the appropriate policy committees of the Legislature regarding the effects of voluntary local programs.

(b) The Department shall consult with the Department of Food and Agriculture in evaluating the voluntary local programs and preparing the report.

(c) The report shall contain:

(1) A summary of voluntary local programs currently established;

(2) An analysis of trends in temporary and permanent acreage benefitting from the voluntary local programs, including an estimate of the amount of land upon which routine and ongoing agricultural activities are conducted;

(3) Examples of farmer and rancher cooperation in designing and implementing the voluntary local programs; and

(4) Recommendations to improve voluntary participation by farmers and ranchers.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Section 2086(d)(2), Fish and Game Code.

HISTORY

1. Renumbering and amendment of former section 786.5 to new section 786.7 filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

§ 786.8. Construction with Other Statutes.

Nothing in this Article precludes the Department from authorizing agricultural conservation programs pursuant to other provisions in Division 3, Chapter 1.5 of the Fish and Game Code. Take that occurs incidental to farm or ranch operations may independently be authorized by the Department under section 2081 or 2835 of the Fish and Game Code, provided the requirements of those sections are satisfied. In addition, the specific provisions in this Article that authorize incidental take by participants in a voluntary local program shall not be construed to limit the application of section 2087 of the Fish and Game Code, which provides that accidental take of candidate, threatened and endangered species is not prohibited during routine and ongoing agricultural activities without regard to whether a voluntary local program has been established.

NOTE: Authority cited: Sections 702 and 2086, Fish and Game Code. Reference: Sections 2062, 2067, 2068, 2080, 2086, 2087 and 2835, Fish and Game Code.

HISTORY

1. Renumbering and amendment of former section 786.6 to new section 786.8 filed 8–28–2002; operative 9–27–2002 (Register 2002, No. 35).

Article 3. Incidental Take Permit Guidelines for Timber Operations

§ 787.0. Purpose and Scope of Regulations.

(a) The purpose of this article is to establish rules and guidelines in accordance with Section 2112 of the Fish and Game Code to implement Fish and Game Commission policies regarding the issuance of incidental take permits pursuant to Section 2081 of the Fish and Game Code for timber operations or activities that may take coho salmon, a species that is listed as threatened or endangered under the California Endangered Species Act, Fish and Game Code sections 2050, et seq. ("CESA"). The Fish and Game Commission approved the *Recovery Strategy for California Coho Salmon (Oncorhynchus kisutch)* (February 2004), and approved for inclusion specified policies pursuant to Section 2112 of the Fish and Game Code to guide the issuance of incidental take permits under Section 2081 of the Fish and Game Code for timber operations or activities. This article sets forth rules and guidelines to implement those policies. In accordance with section 2112 of the Fish and Game Code, this article specifies conditions and circumstances when: (1) take is prohibited; (2) an incidental take permit is required; and (3) an incidental take permit is not required. This article outlines various ways to obtain incidental take permits for timber operations and activities, including an expedited process for obtaining incidental take permits by certification pursuant to these regulations, and through the normal permitting process set forth in CESA implementing regulations, California Code of Regulations, title 14, section 783.0 *et seq.*. The standards for issuance of incidental take permits are the permit issuance criteria set forth in section 2081(b) and (c) of the Fish and Game Code. This article is not intended to create a presumption that any particular timber operation or activity will incidentally take coho salmon.

(b) This article does not affect the Department's authority to authorize take pursuant to any other provision of the Fish and Game Code or any other provision of the California Code of Regulations including, but not limited to, take authorizations issued or approved by the Department pursuant to section 2835 of the Fish and Game Code.

NOTE: Authority cited: Sections 702, 2080, 2081(d) and 2112, Fish and Game Code. Reference: Sections 702, 2080, 2081(b), 2081(c) and 2112, Fish and Game Code.

HISTORY

1. New article 3 (sections 787.0–787.9) and section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.1. Definitions.

(a) The terms used in this article are defined by the definitions provided in the Forest Practice Rules, California Code of Regulations, title 14, section 895.1, *et seq.*, except as specifically provided in this article:

(1) Coho Salmon Impact Evaluation. A "coho salmon impact evaluation" is an evaluation by the Department of potential impacts of proposed timber operations to coho salmon, conducted in accordance with section 787.9.

(2) Jeopardy Determination. A "jeopardy determination" is the Department's determination, made in accordance with section 787.6 as to whether issuance of an incidental take permit for proposed timber operations activities would jeopardize the continued existence of coho salmon.

(3) Recovery Unit. A "recovery unit" is a group of watersheds related hydrologically, geologically and ecologically which constitute unique and important components of an Evolutionarily Significant Unit for coho salmon. The coho salmon recovery units are delineated and described in the *Recovery Strategy for California Coho Salmon (Oncorhynchus kisutch)* (February 2004), inclusive of amendments.

(4) Watersheds with Coho Salmon. "Watersheds with coho salmon" means any planning watershed(s) where coho salmon (Oncorhynchus kisutch) have been documented by the Department of Fish and Game to be present during or after 1990. A list of watersheds with coho salmon is available at http://www.dfg.ca.gov/habcon/timber/index.html

NOTE: Authority cited: Sections 702, 2081(d) and 2112, Fish and Game Code. Reference: Sections 702, 2081(b), 2081(c) and 2112, Fish and Game Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.2. Take Determination for Timber Operations.

(a) When acting as a Lead, Responsible or Trustee Agency under the California Environmental Quality Act, Public Resources Code section 21000 *et seq.* ("CEQA"), where timber operations are proposed in watersheds with coho salmon, subject to the availability of staff, the Department will prepare a "coho salmon impact evaluation" in accordance with section 787.9 and determine whether the proposed timber operations will or are likely to take one or more life stages of coho salmon. Any determination that take will or is likely to occur shall include a description of the activities and project specific conditions which may lead to take.

(b) The following is a list of activities that could potentially take coho salmon. This list is not exhaustive and there is no presumption that take will necessarily occur whenever these activities are implemented.

(1) Construction, maintenance, replacement and removal of watercourse crossings (e.g., culverts, bridges and Humboldt crossings);

(2) Watercourse bank stabilization;

(3) Construction, maintenance, replacement, removal and use of fords (i.e., low water crossings);

(4) Development, maintenance and operation of water diversion and drafting sites;

(5) Construction, maintenance, and use of segments of roads, skid trails, landings and associated drainage facilities hydrologically connected to watercourses;

(6) Any physical modification of a channel zone including removal of large wood from a Class I channel zone;

(7) Landslides initiated or accelerated by timber operations;

(8) Timber operations in a Class I watercourse and lake protection zone, accessible to coho salmon;

NOTE: Authority cited: Sections 702, 711.7, 2080, 2081(d) and 2112, Fish and Game Code; and Sections 21067, 21069, 21070, 21080.1, 21080.3, 21080.4, 21080.5, 21082.2 and 21104.2, Public Resources Code. Reference: Sections 702, 711.7, 2080, 2081(b), 2081(c) and 2112, Fish and Game Code; and Sections 21067, 21069, 21070, 21080.1, 21080.3, 21080.4, 21080.5, 21082.2 and 21104.2, Public Resources Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.3. Take of Coho Salmon from Timber Operations Prohibited.

Any unauthorized take of coho salmon is prohibited and may be subject to criminal action pursuant to the Fish and Game Code.

NOTE: Authority cited: Sections 702, 2080 and 2112, Fish and Game Code. Reference: Sections 702, 2080 and 2112, Fish and Game Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.4. Incidental Take Permit for Timber Operations Required.

(a) If the Department determines that proposed timber operations, including activities specified in section 787.2(b) could potentially take coho salmon, and the proposed project is not revised to avoid take in accordance with section 787.5, the Department may authorize incidental take of coho salmon by issuing a permit under the authority of Section 2081 of the Fish and Game Code using any of the following processes if subsection (b) of this section is met:

(1) Incidental take permit by certification. The Department may issue an incidental take permit by certification pursuant to section 787.7 for timber operations that are not the subject of a timberland conversion permit when timber operations in watersheds with coho salmon incorporate all of the minimization and mitigation measures set forth in Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1) (a)–(t), 916.9.2, (936.9.2), 923.9.1 (943.9.1), and 923.9.2 (943.9.2).

(2) Incidental take permit incorporating selected measures. An applicant may propose, and the Department will consider an incidental take permit application prepared in accordance with CESA implementing regulations, California Code of Regulations, title 14, section 783.0 *et seq.*, for timber operations that incorporate selected measures from Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1), 916.9.2, (936.9.2), 923.9.1 (943.9.1), and 923.9.2 (943.9.2). The Department may issue an incidental take permit in accordance with CESA implementing regulations, California Code of Regulations, title 14, section 783.0 *et seq.*

(3) Incidental take permit incorporating watershed evaluation–based measures. An applicant may propose, and the Department will consider an incidental take permit application prepared in accordance with CESA implementing regulations, California Code of Regulations, title 14, section 783.0 *et seq.*, for timber operations that incorporate minimization and mitigation measures based on a watershed evaluation. The watershed evaluation must include the components set forth below and shall be included in addition to the requirements of California Code of Regulations, title 14, section 783.2(a). The Department may issue an incidental take permit in accordance with CESA implementing regulations, California Code of Regulations, title 14, section 783.0 *et seq.*, for timber operations that incorporate minimization and mitigation measures based upon an evaluation of watershed conditions, risks and limiting factors for coho salmon where the timber operations are proposed.

(A) The following are required components of a watershed evaluation:

(i) Description of assessment area.

(ii) Status of coho salmon within each planning watershed in the assessment area.

(iii) Status of coho salmon habitat conditions and water quality within each planning watershed in the assessment area.

(iv) Identification and prioritization of limiting factors. A reasoned analysis shall assign ratings of high, moderate and low to those factors which may individually or cumulatively limit coho salmon distribution and abundance in the watershed.

(v) Proposed planning watershed specific management practices to prevent or control discharges and environmental impacts from timber operations that could contribute to the identified high and moderate risk limiting factors, and; corrective actions that would reduce or eliminate the high and moderate risk limiting factors on the landscape and mitigate the impacts of timber operations which cause or contribute to those limiting factors.

(vi) A plan and schedule for implementing proposed management practices.

(vii) A program for monitoring implementation and effectiveness of the management practices and, where the plan is not effective in limiting or eliminating the limiting factors as planned, an adaptive management strategy for changing the plan and schedule to ensure that limiting factors are reduced or eliminated in the watershed.

(4) Incidental take permit incorporating alternative measures. An applicant may propose, and the Department will consider an incidental take permit application in accordance with CESA implementing regulations, California Code of Regulations, title 14, section 783.0 *et seq.* The application submitted in accordance with California Code of Regulations, title 14, section 783.2 may specify minimization and mitigation measures included in the Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1), 916.9.2, (936.9.2), 923.9.1 (943.9.1), and 923.9.2 (943.9.2) and/or project specific minimization and mitigation measures developed by the applicant. The Department will review and render a decision on the application in accordance with California Code of Regulations, title 14, sections 783.3, 783.4, and 783.5

(b) In order to issue an incidental take permit under the processes outlined in this section, the permit issuance criteria set forth in Section 2081(b) of the Fish and Game Code must be met. In addition, as required by Section 2081(c) of the Fish and Game Code, the Department shall not

issue an incidental take permit for coho salmon if issuance of the permit would jeopardize the continued existence of the species. The Department will determine whether issuance of the permit would jeopardize the continued existence of the species in accordance with section 787.6.

NOTE: Authority cited: Sections 702, 2080, 2081(d) and 2112, Fish and Game Code. Reference: Sections 702, 2080, 2081(b), 2081(c) and 2112, Fish and Game Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.5. Incidental Take Permit for Timber Operations Not Required.

(a) If the Department determines proposed timber operations will avoid take of coho salmon, an incidental take permit under section 2081 of the Fish and Game Code is not required.

(b) If the Department determines proposed timber operations, including activities specified in section 787.2(a), could potentially take coho salmon, and as a result of a request by the project proponent or Lead Agency to consult with the Department, the project proponent revises or incorporates specific measures into the proposed project or the Lead Agency requires specific measures to be incorporated into the proposed project that the Department determines will avoid take, an incidental take permit under section 2081 of the Fish and Game Code is not required.

(c) If the Department determines, pursuant to section 2080.1 of the Fish and Game Code, that an incidental take statement or permit for coho salmon issued by the Secretary of Commerce for proposed timber operations is consistent with CESA, no further authorization or approval is necessary.

(d) Regardless of whether the Department first makes a determination regarding the take of coho salmon, the Department and any project proponent who intends to meet the requirements of the Natural Community Conservation Planning Act (Fish and Game Code section 2800 *et seq*) may enter into a planning agreement pursuant to section 2810. The planning agreement must include an interim process during plan development for project review. The interim process may include measures for timber operations or activities which the Department concludes will avoid take. Timber operations or activities carried out in accordance with any such interim process that avoids take will not require an incidental take permit under section 2081 of the Fish and Game Code.

NOTE: Authority cited: Sections 702, 2080, 2080.1, 2081, 2112 and 2810, Fish and Game Code. Reference: Sections 702, 2080, 2080.1, 2081, 2112 and 2810, Fish and Game Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.6. Jeopardy from Timber Operations Prohibited.

(a) If the Department determines that take will, or is likely to result from proposed timber operations, the Department must conduct an additional analysis to determine if issuance of an incidental take permit for the proposed timber operations will jeopardize the continued existence of coho salmon. This means determining whether issuance of an incidental take permit for proposed activities would be expected, directly or indirectly, to substantially reduce the likelihood of survival of coho salmon in the wild by reducing the reproduction, numbers or distribution of the species.

(b) A jeopardy determination will be made using an analysis at the scale of the coho salmon recovery unit and will be made for the Evolutionarily Significant Unit. A jeopardy determination must be based upon the best scientific and other information that is reasonably available, which may include, but not necessarily be limited to, consideration of:

(1) coho salmon's ability to survive and reproduce; and

(2) any adverse impacts of the taking on coho salmon's ability to survive and reproduce in light of:

(A) known population trends;

(B) known threats to the species; and

(C) reasonably foreseeable impacts on the species from other related projects and activities.

(c) The Department could determine that proposed timber operations will jeopardize the continued existence of coho salmon if one or more of the following criteria are met and the impact will likely reduce the numbers of coho salmon in the recovery unit returning to spawn successfully in future years.

(1) One or more cohorts of coho salmon within the recovery unit return in very low numbers, or not at all, and timber operations will likely "take" a substantial number of any life stage of coho salmon.

(2) Timber operations will create a barrier to passage or substantially reduce access by coho salmon to any habitat used for migration, spawning or rearing.

(3) One or more cohorts of coho salmon within the recovery unit return in very low numbers, or not at all, and timber operations will directly or incrementally through cumulative effects render existing spawning or rearing habitat unsuitable for continued use by coho salmon.

(4) Exceptional project specific circumstances exist or are proposed which will reduce the numbers of coho salmon in the recovery unit returning to spawn successfully in future years.

(d) Where the Department determines that proposed timber operations are likely to jeopardize the continued existence of coho salmon, the Department shall consult, upon request by the project proponent or Lead Agency, and specify reasonable and prudent minimization and mitigation measures which, if fully implemented, will avoid jeopardy while maintaining the project purpose to the greatest extent possible.

(e) Where, following such consultation, the project proponent declines to incorporate any of the specified reasonable and prudent minimization and mitigation measures into the proposed project, the Department shall not issue an incidental take permit. If, however, the project proponent agrees to incorporate all of the specified reasonable and prudent minimization and mitigation measures into the proposed project to avoid jeopardy, the Department may issue an incidental take permit if the permit issuance criteria set forth in Section 2081(b) are met.

NOTE: Authority cited: Sections 702, 2080, 2081(c) and 2112, Fish and Game Code. Reference: Sections 702, 2080, 2081(c) and 2112, Fish and Game Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.7. Incidental Take Permit by Certification for Timber Operations.

(a) The Department may permit incidental take of coho salmon from timber operations by certification of compliance under this section if all of the following are satisfied:

(1) The permittee certifies in writing that the permittee agrees to comply with and incorporate into its timber operations all minimization and mitigation measures specified in Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1), 916.9.2, (936.9.2), 923.9.1 (943.9.1), and 923.9.2 (943.9.2) as identified and described in a THP or Notice of Timber Operations attached to the certification. Preconsultation with the Department prior to submittal of the certification and attached THP or Notice of Timber Operations is strongly recommended in order to facilitate acceptance and return receipt of the certification.

(2) The permittee includes implementation and effectiveness monitoring procedures and schedules in the Timber Harvesting Plan (THP) or Notice of Timber Operations. Monitoring which is specified in the THP or Notice of Timber Operations to meet other regulatory requirements may be determined by the Department to satisfy the issuance criteria for an incidental take permit

(3) The permittee provides a financial security for performance with terms and in an amount acceptable to the Department in accordance with section 787.8.

(4) The permittee provides written consent to the Department for access to inspect timber operations during and following completion of operations for compliance monitoring.

(5) The Department returns a signed receipt of the certification finding that it meets the requirements of Sections 2081(b) and (c) of the Fish and

Game Code. If any requirement is not met (e.g., a financial security in a form and amount acceptable to the Department is not provided), the Department shall deny the certification and notify the permittee.

(6) The THP or Notice of Timber Operations which is the subject of the certification is approved by the California Department of Forestry and Fire Protection.

(b) Effect of Certification.

(1) A certification that is signed by the Department is an incidental take permit for coho salmon that becomes effective only after both of the following have occurred:

(A) The permittee receives the signed certification from the Department from the appropriate regional office; and

(B) The THP or Notice of Timber Operations attached to the certification, which contains the required minimization and mitigation measures, is approved by the California Department of Forestry and Fire Protection;

(2) The incidental take permit by certification authorizes incidental take of coho salmon from the timber operations described in the THP or Notice of Timber Operations that is attached to the certification. Any incidental take from operations that deviate from such timber operations, whether under subsequent amendments to the THP or Notice of Timber Operations or otherwise, is not authorized by this permit by certification.

(3) CESA implementing regulations governing permit revocation and suspension (California Code of Regulations, title 14, section 783.7) apply to an incidental take permit by certification.

(c) Form of Certification. The certification required by section 787.7 shall take substantially the following form:

CERTIFICATION OF COMPLIANCE

I certify that all of the minimization and mitigation measures set forth in Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1), 916.9.2, (936.9.2), 923.9.1 (943.9.1), and 923.9.2 (943.9.2) including any alternative measures provided in these sections are included as enforceable elements of the attached Timber Harvesting Plan (THP) or Nonindustrial Timber Management Plan (NTMP) Notice of Timber Operations.

I acknowledge that these measures are roughly proportional in extent to the impact of the authorized take of the species, the measures maintain my project objectives to the greatest extent possible, and they are capable of successful implementation. I understand that this permit allows incidental take of coho salmon pursuant to CESA; it does not authorize the violation of any Federal, State or local laws or regulations. I understand that this incidental take permit becomes effective after both of the following have occurred: (1) the THP or Notice of Timber Operations containing the required measures is approved by the Department of Forestry and Fire Protection; and (2) I have received receipt of the certification signed by the Department of Fish and Game from the appropriate address below. I understand that this certification permits incidental take of coho salmon from the timber operations described in the attached THP or Notice of Timber Operations. Any incidental take from operations that deviate from such timber operations, whether under subsequent amendments to the THP or Notice of Timber Operations or otherwise, is not authorized by this permit by certification.

I certify that the information submitted in this certification is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein or failure to comply with the terms of the permit (e.g., unauthorized take under CESA for undertaking a project that differs from the one described in the attached THP or Notice of Timber Operations, or failure to properly implement required minimization and mitigation measures) may subject me to suspension or revocation of this permit and to civil and criminal penalties under the laws of the State of California.

THP or NTMP designation: _____

Proposed beginning date of timber operations: _____

End date for timber operations: _____

Attached is the security for performance, calculated in accordance with section 787.8, ensuring adequate funding to implement measures to minimize and fully mitigate impacts of authorized take, and for monitoring compliance with and effectiveness of, those measures. The undersigned is responsible for immediately notifying the Department of Fish and Game of any deviations from the above.

_____

(RPF or authorized signature) Date

The undersigned is authorized to provide consent to the Department of Fish and Game to access and inspect the subject timber operations during and following completion of operations, and hereby provides such authorization to the Department of Fish and Game.

_____

(authorized representative signature) Date

For Del Norte, Humboldt, Mendocino, Siskiyou or Trinity Counties

REGIONAL MANAGER
DEPARTMENT OF FISH AND GAME
601 LOCUST STREET
REDDING, CA 96001
(530) 225.2300

For Santa Cruz, San Mateo, Marin, or Sonoma Counties

REGIONAL MANAGER
DEPARTMENT OF FISH AND GAME
P.O. BOX 47
YOUNTVILLE, CA 94599
(707) 944.5500

The Department of Fish and Game [circle one: finds/does not find] that: (1) the activities identified in the attached THP or NTMP Notice of Timber Operations may result in take of coho salmon incidental to an otherwise lawful activity; where the Department of Fish and Game finds that the activities may result in incidental take, the Department of Fish and Game finds that: (2) the impacts of authorized take will be minimized and fully mitigated; the measures required to meet this obligation are roughly proportional in extent to the impact of the authorized take; where various measures are available to meet this obligation, the impacts of take, the measures maintain the applicant's objectives to the greatest extent possible; and the measures are capable of successful implementation; (3) this permit by certification of compliance is consistent with regulations adopted pursuant to Sections 2112 and 2114 of the Fish and Game Code; (4) the permittee has assured adequate funding to implement the required measures and for monitoring compliance with and effectiveness of those measures; (5) and issuance of the permit by certification which is approved by the signature below will not jeopardize the continued existence of coho salmon. The Department of Fish and Game's findings are based upon the certification submitted; the approved THP or Notice of Timber Operations and associated environmental review and impact analysis; the administrative records supporting the incorporated Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1), 916.9.2, (936.9.2), 923.9.1 (943.9.1), and 923.9.2 (943.9.2), and the Incidental Take Permit Guidelines for Timber Operations, section 787.0 *et seq.*, and other information the Department of Fish and Game had before it at the time of the certification.

_____

DFG Regional Manager Date

(d) Department Review and Response. The Department shall review and approve or deny the certification as soon as possible and no later than 30 days following receipt of all information specified in California Code of Regulations, title 14, section 783.4 by the appropriate Regional Manager.

NOTE: Authority cited: Sections 702, 2081(d) and 2112, Fish and Game Code. Reference: Sections 702, 2081(b), 2081(c) and 2112, Fish and Game Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.8. Security for Performance for Incidental Take Permits.

(a) As required by Fish and Game Code section 2081(b)(4) and CESA implementing regulations, California Code of Regulations, title 14, sec-

tion 783.4(a)(4), the permit applicant must assure adequate funding to implement the required measures and for monitoring compliance with, and effectiveness of, those measures. Acceptable instruments of financial security include a pledged savings or trust account, certificate of deposit, or irrevocable letter of credit, the terms of which must be approved by the Department. Other instruments and their terms must be approved by the Department. Security must be provided to the appropriate Department Regional Manager by certified mail together with the Certification of Compliance.

(b) Where incidental take is authorized through section 787.5(c), no additional security for performance is required.

(c) Where incidental take is authorized through section 787.4(a)(2), (3) or (4), security for performance is required and shall be determined on a project specific basis.

(d) Where incidental take is authorized through section 787.4(a)(1), security shall be provided in accordance with the following and shall include a Road Component and an Area Component.

(1) Road Component

(A) The security for performance for the Road Component shall be calculated according to the following schedule for all roads appurtenant to the proposed THP or Notice of Timber Operations, which lie within a watershed with coho salmon.

(i) $5,000/mile for all road segments within Class I watercourse and lake protection zones

(ii) $2500/mile for all road segments within Class II watercourse and lake protection zones

(iii) $1000/mile for all road segments within Equipment Exclusion Zones and Equipment Limitation Zones which are established for Class III Watercourses, inner gorges and connected headwall swales.

(iv) For each new, reconstructed or temporary Class I watercourse crossings additional security in the amount of $2000/crossing shall be required. Where an existing Class I watercourse crossing will be used without modification, additional security in the amount of $500/crossing shall be required.

(v) For each new, reconstructed or temporary Class II watercourse crossing, additional security in the amount of $1000/crossing shall be required. Where an existing Class II watercourse crossing will be used without modification, additional security in the amount of $500/crossing shall be required.

(vi) For each new, reconstructed or temporary Class III watercourse crossings additional security in the amount of $500/crossing shall be required. Where an existing Class III watercourse crossing will be used but not reconstructed, additional security in the amount of $250/crossing shall be required.

(B) The security for performance for the Road Component will be returned following a written request by the permittee to the Department upon completion of the Prescribed Maintenance Period provided that each requirement of Forest Practice Rules, California Code of Regulations, title 14, sections 923.9.1 (943.9.1), and 923.9.2 (943.9.2) has been properly implemented. The Department shall make its best effort to return the security within 45 days of receipt of said request.

(C) The security for performance for the Road Component will be forfeited by the permittee if each requirement of Forest Practice Rules, California Code of Regulations, title 14, sections 923.9.1 (943.9.1), and 923.9.2 (943.9.2) has not been properly implemented, except that the Department may, at its discretion, return all or part of the security for performance of an applicable component if in the Department's judgment the Permittee has completely remedied its failure to properly implement a required measure or measures.

(2) Area Component

(A) The security for performance for the Area Component shall be calculated at the rate of $500/acre for all proposed Watercourse and Lake Protection Zones and those Equipment Exclusion Zones and Equipment Limitation Zones which are established for Class III Watercourses, inner gorges and connected headwall swales.

(B) The security for performance for the Area Component will be returned to the permittee upon filing of the Notice of Completion, and after receipt of a written request from the permittee to the Department, provided that all requirements of Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1) and 916.9.2, (936.9.2) have been properly implemented. The Department shall make its best effort to return the security within 45 days of receipt of said request.

(C) The security for performance for the Area Component Security will be forfeited by the permittee if any requirement of Forest Practice Rules, California Code of Regulations, title 14, sections 916.9.1 (936.9.1) and 916.9.2, (936.9.2) has not been properly implemented, except that the Department may, at its discretion, return all or part of the security for performance of an applicable component if in the Department's judgment the Permittee has completely remedied its failure to properly implement a required measure or measures.

(e) The full amount of the required security for performance must remain in place for the life of the permit. In the event that the Department accesses all or part of the security for performance, within 30 days thereof the permittee will be required to replenish the amount of security to the full amount required by the Department.

(f) Notwithstanding, Section 787.7(a) the Department may, at its discretion, refuse to permit incidental take of coho salmon from timber operations by certification of compliance under this article if the applicant previously obtained an incidental take permit by certification of compliance under this article and the security for performance for that permit was forfeited in whole or part for a failure to properly implement a required measure or measures.

NOTE: Authority cited: Sections 702, 2081(d) and 2112, Fish and Game Code. Reference: Sections 702, 2081(b), 2081(c) and 2112, Fish and Game Code.

HISTORY

1. New section filed 2-11-2008; operative 2-11-2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

§ 787.9. Coho Salmon Impact Evaluation.

(a) When acting as a Lead, Responsible, or Trustee Agency under CEQA, and, subject to the availability of sufficient staff, the Department will evaluate potential impacts of proposed timber operations on coho salmon. Where the Department is a Responsible or Trustee Agency, the Department shall provide a reasoned analysis and determination, to the extent possible within the time frames established by regulation for environmental review and within any written communication to the Lead Agency addressing any other trustee responsibilities of the Department.

(b) The Department may determine that proposed timber operations will have potentially significant impacts within watersheds with coho salmon if one or more of the following criteria are met:

(1) One or more cohorts of coho salmon return in low numbers or not at all, and timber operations will contribute net additional sediment to spawning and rearing habitat in the planning watershed where timber operations are proposed or the planning watershed immediately downstream.

(2) One or more cohorts of coho salmon return in very low numbers, or not at all, and timber operations will further reduce shading within a Class I watercourse and lake protection zone accessible to coho salmon, in a planning watershed where water temperatures limit habitat suitability for any life stage of coho salmon.

(3) One or more cohorts of coho salmon return in very low numbers, or not at all, and timber operations will reduce the potential for recruitment of functional large woody material from the Class I watercourse and lake protection zone into a Class I watercourse accessible to coho salmon in a planning watershed where excessive sediment impairs coho salmon spawning or rearing.

(4) A substantial number of coho salmon will likely be taken by the proposed timber operations. For this determination, "substantial" means that the impact will, by itself, reduce the likelihood of coho salmon returning to spawn successfully in future years.

[The next page is 199.]

(5) The proposed timber operations will likely reduce access to habitat used by coho salmon for migration, spawning or rearing.

(c) Where the Department determines that project impacts are likely to be significant, Department staff shall identify and propose mitigation measures intended to reduce potentially significant impacts to a level which is less than significant.

(d) Where timber operations incorporate all of the measures set forth in Forest Practice Rules, California Code of Regulations, title 14, sections 895.1; 916.9 and 936.9 and 956.9; 923.9, 943.9 and 963.9; 916.9.1 and 936.9.1; 916.9.2 and 936.9.2; 916.11.1 and 936.11.1; 923.9.1 and 943.9.1; and 923.9.2 and 943.9.2, the Department shall conclude that any impacts pursuant to 787.9(b)(1–5) have been sufficiently mitigated to a level which is less than significant.

NOTE: Authority cited: Sections 702, 711.7 and 2112, Fish and Game Code; and Sections 21067, 21069, 21070, 21080.1, 21080.3, 21080.4, 21080.5, 21082.2 and 21104.2, Public Resources Code. Reference: Sections 702, 711.7 and 2112, Fish and Game Code; and Sections 21067, 21069, 21070, 21080.1, 21080.3, 21080.4, 21080.5, 21082.2 and 21104.2, Public Resources Code.

HISTORY

1. New section filed 2–11–2008; operative 2–11–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 7).

Chapter 7. Regulations for Implementation of Section 4526 of the Government Code

Article 1. General Provisions

§ 789.0. Definitions.

As used in these regulations:

(a) "Small business" firm is one which meets the definition of small business firm as set forth in Title 2, California Code of Regulations, section 1896(n).

(b) "Department" means the Department of Fish and Game.

(c) "Director" is the Director of the Department of Fish and Game, or any person authorized by the Director to act on behalf of the Director.

(d) "Firm" means any individual, firm, partnership, corporation, association, or other legal entity permitted by law to practice the profession of architecture, landscape architecture, engineering, environmental services, land surveying, or construction project management.

(e) "Architectural, landscape architectural, engineering, environmental, and land surveying services" includes those professional services of an architectural, landscape architectural, engineering, environmental, or land surveying nature as well as incidental services that members of these professions and those in their employ may logically or justifiably perform.

(f) "Contract" shall mean those contracts entered into by the Department for architectural, landscape architectural, engineering, environmental, land surveying, or construction project management services.

NOTE: Authority cited: Section 4526, Government Code; and Section 702, Fish and Game Code. Reference: Sections 4525–4529, Government Code.

HISTORY

1. New chapter 7 (articles 1–2, sections 789.0–789.6), article 1 (section 789.0) and section filed 1–7–2000; operative 2–6–2000 (Register 2000, No. 1).

Article 2. Specific Provisions

§ 789.1. Establishment of Criteria.

The Director shall establish criteria which will comprise the basis for selection for each contract. The criteria shall include such factors as professional excellence, demonstrated competence, specialized experience of the firm, education and experience of key personnel to be assigned, staff capability, workload, ability to meet schedules, nature and quality of completed work, reliability of the firm, location, and other considerations deemed relevant. Such factors shall be weighed by the Director according to the nature of the contract, the needs of the State and complexity and special requirements of the specific contract for which the services will be provided.

NOTE: Authority cited: Section 4526, Government Code; and Section 702, Fish and Game Code. Reference: Section 4526, Government Code.

HISTORY

1. New article 2 (sections 789.1–789.6) and section filed 1–7–2000; operative 2–6–2000 (Register 2000, No. 1).

§ 789.2. Request for Qualifications.

(a) When a project requires architectural, landscape architectural, engineering, land surveying, construction project management, or environmental services, the Director shall make a statewide announcement through the publications of the respective professional societies.

(b) The announcement shall contain the following information: the nature of the work, the criteria upon which the award shall be made, and the time within which statements of interest, qualification and performance data will be received.

(c) The Director shall endeavor to provide to all small business firms which have indicated an interest in receiving such, a copy of each announcement for projects for which the Director concludes that small business firms could be especially qualified. A failure of the Director to send a copy of an announcement to any firm shall not operate to preclude any contract.

NOTE: Authority cited: Section 4526, Government Code; and Section 702, Fish and Game Code. Reference: Section 4527, Government Code.

HISTORY

1. New section filed 1–7–2000; operative 2–6–2000 (Register 2000, No. 1).

§ 789.3. Selection of Services.

(a) After expiration of the period stated in the publication, the Director shall evaluate statements of qualifications and performance data on file with the Department. Discussions shall be conducted with no less than three firms regarding the required service. From the firms with which discussions are held, the Director shall select, for contract negotiation, no less than three, in order of preference, based upon the established criteria, which are deemed to be the most highly qualified to provide the services required. Where three firms cannot be found which could provide the required service, the Director may then select from the available applicant firms. Selections based on less than three firms must be documented with the names and addresses of firms contacted by the Director and the reasons why the provisions of this section could not be met. This documentation shall be maintained in the Department's contract file.

(b) The Director shall attempt to negotiate a contract with the best qualified firm. If the Director is unable to negotiate a satisfactory contract with this firm at a fair and reasonable price, negotiations with that firm shall be terminated. The Director shall then undertake negotiations with the second most qualified firm. Failing accord, negotiations shall be terminated. The Director shall then undertake negotiations with the third most qualified firm. Failing accord, negotiations shall be termined. If the Director is unable to negotiate a satisfactory contract with any of the selected firms, the Director shall select additional firms in the manner prescribed and continue the negotiation procedure.

NOTE: Authority cited: Section 4526, Government Code; and Section 702, Fish and Game Code. Reference: Section 4528, Government Code.

HISTORY

1. New section filed 1–7–2000; operative 2–6–2000 (Register 2000, No. 1).

§ 789.4. Conflict of Interest/Unlawful Activity.

Department employees who are related to persons or have interests in business entities seeking to contract under these regulations shall not participate in any aspect of the contract review or selection process.

Further, any practice that results in an unlawful activity including, but not limited to, rebates, kickbacks or any other unlawful consideration shall be prohibited.

NOTE: Authority cited: Section 4526, Government Code; and Section 702, Fish and Game Code. Reference: Sections 4526 and 87100, Government Code.

HISTORY

1. New section filed 1–7–2000; operative 2–6–2000 (Register 2000, No. 1).

§ 789.5. Amendments.

If the Department makes a necessary change in the project during performance of the contract and the amount of work to be performed by the contractor has changed from the work originally contemplated by the parties, the contractor's compensation may be adjusted in a fair and reasonable amount by negotiation of a mutual written agreement.

NOTE: Authority cited: Section 4526, Government Code; and Section 702, Fish and Game Code. Reference: Section 4528, Government Code.

HISTORY

1. New section filed 1–7–2000; operative 2–6–2000 (Register 2000, No. 1).

§ 789.6. Contracting in Phases.

Should the Department determine that it is necessary or desirable to have a given project performed in phases, it will not be necessary to negotiate the total contract price or compensation provisions at the time the initial phase is negotiated, provided that the Department shall have determined that the firm is the best qualified to perform the whole project at a fair and reasonable cost, and the contract contains provisions that the State, at its option, may utilize the firm for other phases and that the firm will accept a fair and reasonable price for subsequent phases to be later negotiated and reflected in a subsequent written instrument. The procedure with regard to negotiation provided for in section 6106 of the Public Contract Code shall be applicable.

NOTE: Authority cited: Section 4526, Government Code; and Section 702, Fish and Game Code. Reference: Section 4528, Government Code.

HISTORY

1. New section filed 1–7–2000; operative 2–6–2000 (Register 2000, No. 1).

Subdivision 4. Office of Spill Prevention and Response

Chapter 1. General Definitions and Abbreviations

§ 790. Definitions and Abbreviations.

Unless the context requires otherwise, the following definitions shall govern the construction of this subdivision.

(a)(1) "Act" means the Lempert–Keene–Seastrand Oil Spill Prevention and Response Act of 1990 (Statutes of 1990, Chapter 1248) and amendments thereto.

(a)(2) "Administrator" means the administrator for oil spill response appointed by the Governor pursuant to Government Code Section 8670.4.

(a)(3) "Adverse weather" means the weather conditions that will be considered when determining the appropriate oil spill response systems and equipment for a particular operating environment. Factors that will be considered include wind, significant wave height, temperature, weather–related visibility, and the tides and currents within the response area in which the equipment is intended to function.

(a)(4) "Anchorage or Anchorage designation" means an area designated by the U.S. Army Corps of Engineers or the United States Coast Guard for the anchoring of vessels.

(a)(5) "Assets", as defined by GAAP, means probable future economic benefits obtained or controlled by a particular entity as a result of past transactions or events.

(a)(6) "Assist/Escort Tug" see "Escort Tug".

(a)(7) "Area Contingency Plan" (ACP) means an oil spill response plan required by the Coast Guard for each of six regions along the California coast. These six regions are the Federal Area Plan Zones, and are defined in this subchapter under "Geographic Regions."

(b)(1) "Balance of the Coast" means those areas of the California coast that are not designated as either a high volume port or as a facility transfer area.

(b)(2) "Barge" means any vessel that carries oil in commercial quantities as cargo but is not equipped with a means of self–propulsion.

(b)(3) "Barrel" means 42 United States gallons of oil at 60 degrees Fahrenheit.

(b)(4) "Best achievable protection" means

(A) the highest level of protection which can be achieved through the use of both of the following;

1. the best achievable technology, and

2. those manpower levels, training procedures, and operational methods which provide the greatest degree of protection achievable.

(B) The Administrator's determination of which measures provide the best achievable protection shall be guided by the critical need to protect valuable coastal resources and marine waters, while also considering all of the following;

1. the use of current and historical protection provided by the measures,

2. the technological achievability of the measures, and

3. the cost of the measures.

(C) The Administrator shall not use a cost–benefit or cost–effectiveness analysis or any particular method of analysis in determining which measures provide the best achievable protection. The Administrator shall instead, when determining which measures provide best achievable protection, give reasonable consideration to historical and current prevention methods, historical and current improvements in technology, and response readiness. Additionally the Administrator shall consider the protection provided by the measures, the technological achievability of the measures, and the cost of the measures when establishing the requirements to provide the best achievable protection for coastal and marine resources.

(b)(5) "Best achievable technology" means historical, current or future technology which provides the greatest degree of protection taking into consideration, the following;

(A) processes which are being developed, or could feasibly be developed anywhere in the world, given overall reasonable expenditures on research and development, and

(B) processes which are currently in use anywhere in the world, taking into account historical and current effectiveness provided by the measures already in place.

(C) In determining what is the best achievable technology, the Administrator shall consider the effectiveness and engineering feasibility of the technology and if there would be an improvement over the technology currently in place.

(b)(6) "Bollard Pull" means the force, in pounds, that a tug is capable of exerting against a stationary object. Bollard pull can be measured for either or both of the following:

(A) astern force, which is the force applied when the tug is pushing or pulling astern.

(B) ahead force, which is the force applied when the tug is pushing or pulling ahead.

(b)(7) "Braking Force" means astern bollard pull (at zero speed) for conventional tugs, and ahead bollard pull (at zero speed) for tractor tugs.

(b)(8) "Bulk" see "Oil in Bulk".

(b)(9) "Bunkering" or "Bunkering Operation" means the transfer of oil via hoses, pipelines, or loading arms for the purpose of providing fuel or lubricants to a tank vessel or nontank vessel. A Bunkering Operation includes all phases of the operation from the beginning of mooring activities between the transfer unit and the receiving unit to the departure of either the transfer unit or the receiving unit.

(b)(10) "Bunkering oil" means that product used as fuel for a vessel's propulsion system.

(c)(1) "California marine waters" see "Marine Waters".

(c)(2) "Cleaned–up" means spilled oil has been removed to the extent that it no longer poses a threat to human health and safety or the environment, as determined by either:

(A) the unified command, consisting of the Federal On–Scene Coordinator (FOSC), the responsible party, if designated, and the Staff (as defined in this chapter); or

(B) the State Incident Commander (as designated by the Administrator) if the unified command is not established.

(c)(3) "Clearing House" means an individual, organization, corporation or agency designated by the Administrator to carry out responsibilities related to tug escort requirements for specific harbors in California.

(c)(4) "Coast Guard Designated Area" see "Geographic Region".

(c)(5) "COLREGS" is a shortened form of the term 'Collision Regulations', and refers to the International Regulations for the Prevention of Collisions at Sea.

(c)(6) "Competitive aspects" means the cost of materials, labor, services, property or other necessities required to carry out a recommendation of a harbor safety committee. These costs shall be compared to other alternative costs for the same or similar requirements and may vary from port to port within a harbor area. Competitive aspects shall be addressed in any economic feasibility report or study made part of any such recommendation.

(c)(7) "Containment area" means that area designated for the containment of any spilled oil with the intent of preventing the oil from reaching open water.

(c)(8) "Conventional Tug" means a tug with screws or propellers which are fixed to provide thrust either fore or aft, parallel to the keel or longitudinal axis of the tug.

(c)(9) "Crude oil" means petroleum in an unrefined or natural state, including condensate and natural gasoline.

(c)(10) "Culturally Sensitive Sites" means locations which include, but are not limited to, historical and archaeological sites, and areas of cultural or economic significance to Native Americans.

(c)(11) "Current assets", as defined by GAAP, means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash, or sold or consumed during the normal operating cycle of the business.

(c)(12) "Current liabilities", as defined by GAAP, means those obligations whose liquidation is reasonably expected to require the use of existing resources, properly classifiable as current assets, or the creation of other current liabilities.

(d)(1) "Deadweight tonnage" means the weight of the cargo, fuel, water, and stores necessary to submerge a vessel from its light draft to its load draft. This measurement shall be obtained from the following:

(A) the most current Lloyds Register, or

(B) from the country of registry, or

(C) by documentation from a recognized classification society, or

(D) as reflected in the International Load Line Certificate posted on each vessel.

(d)(2) "Dedicated Response Resources" means equipment and personnel committed solely to oil spill response, containment, and cleanup that are not used for any other activity that would adversely affect the ability of that equipment and personnel to provide oil spill response services in the timeframes for which the equipment and personnel are rated.

(d)(3) "Department" means the California Department of Fish and Game.

(d)(4) "Discharge" see "Spill".

(d)(5) "Discharge Container System" means any system designed to enclose or restrain spilled oil and prevent it from spreading further and/or reaching open water. Such a system may be fixed or portable, depending upon the application, and may involve specific equipment for certain applications.

(d)(6) "Displacement" means the total weight of water, as measured in long tons, displaced by a vessel at a given load level.

(e)(1) "Economically Sensitive Sites" means locations which include, but are not limited to, public beaches, parks, marinas, boat ramps, diving areas, industrial and drinking water intakes, power plants, salt pond intakes and other similarly situated underwater structures, intertidal and subtidal drilling leases, and major waterways and vessel traffic.

(e)(2) "Effective Daily Recovery Capacity" (EDRC) means that value computed by taking the manufacturer's rating for the recovery capacity of a piece of skimming equipment and reducing that amount to reflect the limitations of the response equipment's efficiency. Limitations on efficiency may be the result of such variables as weather, sea state, velocity of the ocean currents, hours of operation per day, or visibility. The EDRC shall be calculated as 20% of the manufacturer's rated skimming capacity (SC) for the equipment for a 24 hour period, [(SC x 24 hours)20% = EDRC].

(e)(3) "Environmentally Sensitive Site" means sites defined pursuant to the applicable Area Contingency plans, as created and revised by the U.S. Coast Guard and the Administrator.

(e)(4) "Escort/Assist Tug" see "Escort Tug".

(e)(5) "Escort Tug" means a tug that is designed primarily for pushing or pulling ahead or astern, or towing alongside another vessel. A tug is considered to be designed for escort work whether or not it is involved in such activity. Escort tugs are further defined for specific harbors as follows:

(A) In the harbors of Los Angeles/Long Beach, an "Assist/Escort Tug" means any tug that is accepted by the tank vessel master and/or pilot to escort a tank vessel that is transiting waters where an assist/escort is required.

(B) In the harbor of Port Hueneme, an "Escort/Assist Tug" means any tug that is authorized by the Oxnard Harbor District and/or the U.S. Navy for use in Port Hueneme and is equipped with at least 500 horsepower to escort/assist a tanker or barge transiting waters where escort/assistance is required.

(e)(6) "Escort Vessel" see "Escort Tug".

(f)(1) "Facility" see "Marine Facility".

(f)(2) "Facility Transfer Areas" means the areas where oil or oil products are transferred within marine waters, excluding High Volume Ports.

(f)(3) "Facility Transfer Point" means a fixed location where oil or oil products are or can be transferred between a vessel and a facility.

(f)(4) "Federal breakwater" means the line of demarcation as specified in Title 33 Code of Federal Regulations, Section 80.1114.

(f)(5) "Fiscal Year" means the period commencing on the first day of July and ending on June 30 of the following year.

(g)(1) "GAAP" means the Generally Acceptable Accounting Principles in the United States.

(g)(2) "Geographic Region" means one of six regions along the California coast defined by the Coast Guard as the Federal Area Plan Zones. These Coast Guard regions are as follows;

(A) Area 1, North Coast: the Oregon border to the Sonoma/Mendocino County line;

(B) Area 2, San Francisco and the Delta: the Sonoma/Mendocino County line to the Santa Cruz/San Mateo County line, including San Francisco Bay and the portions of the Sacramento/San Joaquin Delta covered under Article 5, Section 8670.28(a)(1) of the Government Code;

(C) Area 3, Central Coast: the Santa Cruz/San Mateo County line to the San Luis Obispo/Monterey County line;

(D) Los Angeles/Long Beach, as follows:

(1) Area 4, Northern Sector: San Luis Obispo, Ventura and Santa Barbara Counties;

(2) Area 5, Southern Sector: Los Angeles and Orange Counties;

(E) Area 6, San Diego: San Diego/Orange County line to the Mexico border.

(g)(3) "Geographic Response Plan" (GRP) means the plan that addresses the response strategies for a Geographic Response Plan Area.

(g)(4) "Geographic Response Plan Areas" (GRA) mean subdivisions of an ACP Area, and are based on natural basins or other natural features, landmarks, or general planning demarcations as described in the appropriate ACP. Each GRP contains all the sensitive sites in its natural basin.

(g)(5) "Gross Registered Tons", now changed to "Gross Tons", means a measure of the tanker, barge or nontank vessel's tonnage by volume.

(h)(1) "Harbor Safety Committee" means a committee comprised of those individuals, appointed by the Administrator pursuant to Section 8670.23 of the Government Code, to determine harbor safety needs for the harbors of San Diego; Los Angeles/Long Beach; Port Hueneme; San Francisco, San Pablo, Suisun Bays; and Humboldt Bay.

(h)(2) "Hazardous Materials" means any material that, because of its quantity, concentration or physical or chemical characteristics, would pose a significant present or potential hazard to human health and/or safety, or to the environment if released into the environment. This definition includes, but is not limited to, "oil" as defined in the Act.

(h)(3) "High Volume Ports" means either of the following:

(A) for the San Francisco Bay/Sacramento–San Joaquin Delta; all California marine waters that are within a 50 nautical mile radius of the San Francisco Approach, Lighted Horn Buoy (SF) (LNB) (LLNR 360) [located at 37–45.0N, 122–41.6W] on the San Francisco Bay Chart #18645. This does not include the Ports of Stockton and Sacramento;

(B) for the Los Angeles/Long Beach Harbor; all California marine waters that are within a 50 nautical mile radius of the Approach Lighted Whistle Buoy "LB" (LLNR 3010) [33–42.1N, 118–11.0W] outside the entrance to the Los Angeles/Long Beach Harbors on the Los Angeles and Long Beach Harbor Chart #18751.

(i)(1) "Incident Commander" means the individual responsible for overseeing the Incident Command Structure (as outlined in the State Marine Oil Spill Contingency Plan) during an oil spill response or response drill. This person may be the Administrator or his/her designee.

(i)(2) "Independently audited" means an audit performed by an independent certified public accountant in accordance with generally accepted auditing standards.

(i)(3) "Infrequent Transfer" means a transfer of oil or oil product that is conducted on the average of one time per month or not more than twelve times in a twelve month period.

(i)(4) "Intangible assets" means assets, such as trademarks, goodwill, patents, organization costs, computer programs, etc., which lack physical substance.

(i)(5) "Involved Parties" means a responsible party, potentially responsible party, their agents and employees, the operators of all tankers, barges and nontank vessels docked at a marine facility which is the source of a discharge, and all state and local agencies involved in a spill or spill response.

(j) (Reserved)

(k)(1) "Kips" means a thousand pounds of force.

(*l*)(1) "Liabilities", as defined by GAAP, means probable future sacrifices of economic benefits arising from present obligations of a particular entity to transfer assets or provide services to other entities in the future as a result of past transactions or events.

(*l*)(2) "Linefill capacity" means the volume of fluid in a pipeline or pipeline segment as determined by multiplying the cross-sectional area of the inside of the pipeline in square feet, times the length of the pipeline in feet, times 7.48 gallons per cubic foot. [Linefill capacity in gallons equals $7.48(3.1416\ r^2 * L)$ where 7.48 = gallons per cubic foot; 3.1416 is the constant, pi; r = inside radius in feet; * = times; and L = length in feet].

(*l*)(3) "Line Haul Tug" means that tug that provides the primary power to push or pull a barge.

(*l*)(4) "Lightering" or "Lightering Operation" means the transfer of a cargo of oil in bulk from one vessel to another. Lightering includes all phases of the operation from the beginning of mooring activities between the transfer unit and the receiving unit to the departure of either the transfer unit or receiving unit. A lightering operation does not include bunkering.

(*l*)(5) "LOA" means the actual Length Overall of a vessel measured in meters. This is the length for each vessel as listed in Lloyds Register or with the country of registry.

(*l*)(6) "Local government" means any chartered or general law city, chartered or general law county, or any city and county.

(*l*)(7) "Long tons" means a unit of weight equal to 2,240 pounds avoirdupois.

(m)(1) "Marine facility" means:

(A) A drill ship, semisubmersible drilling platform, jack-up type drilling rig, or any other floating or temporary drilling platform.

(B) Any facility of any kind, other than a tanker or barge which;

1. is or was used for the purposes of exploring for, drilling for, producing, storing, handling, transferring, processing, refining, or transporting oil, including pipelines, and

2. is located in marine waters, or is located where a discharge could impact marine waters.

(C) The following facilities are not included in the definition of "marine facility":

1. facilities which are subject to Chapter 6.67 (commencing with Section 25270) or Chapter 6.75 (commencing with Section 25299.10) of Division 20 of the Health and Safety Code; or

2. facilities which are placed on a farm, nursery, logging site, or construction site and do not exceed a 20,000 gallon capacity in any single storage tank; or

3. small craft refueling docks.

(m)(2) "Marine Terminal" means any marine facility used for transferring oil to or from tankers or barges. This would include all piping not integrally connected to a tank facility as defined in Section 25270.2(k) of the Health and Safety Code relating to above ground storage tanks.

(m)(3) "Marine Waters" means those waters subject to tidal influence and includes the waterways used for waterborne commercial vessel traffic to the Port of Sacramento and the Port of Stockton.

(m)(4) "Master" means the master of the tug engaged in towing a barge or the master of a tanker or nontank vessel.

(m)(5) "Mobile Transfer Unit (MTU)" means a vehicle, truck, or trailer, including all connecting hoses and piping, used for transferring oil at a location where a discharge could impact marine waters.

(m)(6) "Mobilization Time" means the time in which initial response personnel are able to begin movement of spill response resources to the site of an oil spill.

(m)(7) "MTU" means Mobile Transfer Unit.

(n)(1) "Navigational Aid" means any device used by a tanker, barge or nontank vessel that is intended to assist a navigator in determining the tanker, barge or nontank vessel's position or a safe course, or to warn of dangers or obstructions to navigation.

(n)(2) "Non-dedicated Response Resources" means those response resources identified by an Oil Spill Response Organization for oil spill response activities that are not dedicated response resources.

(n)(3) "Non-persistent or Group 1 oil" means a petroleum-based oil, such as gasoline, diesel or jet fuel, which evaporates relatively quickly. Such oil, at the time of shipment, consists of hydrocarbon fractions of which:

(A) at least 50 percent, by volume, distills at a temperature of 340 degrees C (645 degrees F); and

(B) at least 95 percent, by volume, distills at a temperature of 370 degrees C (700 degrees F).

(n)(4) (Nontank Vessel) means a vessel of 300 gross tons or greater that carries oil, but does not carry oil as cargo.

(o)(1) "Office of Spill Prevention and Response" means the California Department of Fish and Game, Office of Spill Prevention and Response established pursuant to the Act.

(o)(2) "Offshore Marine Facility" includes but is not limited to a drill ship, semi-submersible drilling platform, jack-up type drilling rig, facilities located on production piers, artificial islands and platforms, any floating or temporary drilling platform and any facility of any kind which is or was used for purposes of exploring for, drilling for, producing, storing, handling, transferring, processing, refining, or transporting oil and is located in, under, on, or above marine waters. This includes facilities in the process of abandonment, re-drilling, well maintenance and repairs.

(o)(3) "Offshore Marine Terminal" means any marine terminal at which tank vessels or barges are made fast to a buoy or buoys.

(o)(4) "Oil" means any kind of petroleum, petroleum-based liquid hydrocarbons, petroleum products or any fraction or residues therefrom. This shall include, but is not limited to: crude oil, bunker fuel, gasoline, diesel fuel, aviation fuel, oil sludge, oil refuse, oil mixed with waste, and liquid distillates from unprocessed natural gas.

(o)(5) "Oil In Bulk" means any volume of oil carried in the cargo tanks of a vessel. Bulk oil does not include oil carried in packaged form, and does not include residue or clingage remaining in the cargo tanks after the cargo oil has been discharged. During a bunkering or lightering operation, bulk oil may also be that oil which is transferred to or from a marine portable tank or independent tank on board a vessel.

(o)(6) "Oil Spill Contingency Plan" or "contingency plan" means the oil spill contingency plan required pursuant to Sections 815.03 and 825.03 of this subdivision.

(o)(7) "Oil Spill Response Organization" or OSRO means an individual, organization, association, cooperative, or other entity that provides, or intends to provide, equipment, personnel, supplies, or other services directly related to oil spill containment, cleanup, or removal activities.

(A) A "Rated OSRO" means an OSRO that has received a satisfactory rating from the Administrator for a particular rating level established pursuant to Section 819.01 of this subdivision.

(B) "OSRO" does not include an owner or operator with an oil spill contingency plan approved by the Administrator or an entity that only provides spill management services, or who provides services or equipment that are only ancillary to containment, cleanup, or removal activities.

(o)(8) "Oil Transfer System" means that system as described in 33 CFR Part 154, Subpart (c).

(o)(9) "Operator" see "Owner or Operator".

(o)(10) "Operating" means, in terms of a tanker, barge or nontank vessel, either:

(A) the transferring and/or transporting of oil, or

(B) that the tanker, barge or nontank vessel is not at anchor, is not made fast to the shore or an anchored tanker, barge or nontank vessel, or not aground.

(o)(11) "OSPR" means the Office of Spill Prevention and Response in the Department of Fish and Game.

(o)(12) "OSRO" means Oil Spill Response Organization.

(o)(13) "Owner or Operator" means any of the following:

(A) in the case of a tanker, barge, or nontank vessel, any person who owns, has ownership interest in, operates, charters by demise, or leases the tanker, barge, or nontank vessel;

(B) in the case of a marine facility or a marine terminal, any person who owns, has an ownership interest in, or operates the marine facility or the marine terminal;

(C) except as provided in subparagraph (D), in the case of any tanker, barge, nontank vessel or marine facility, title or control of which was conveyed due to bankruptcy, foreclosure, tax delinquency, abandonment, or similar means, to an entity of state or local government, the owner or operator is any person who owned, held an ownership interest in, operated, or otherwise controlled activities concerning the tanker, barge, nontank vessel or marine facility immediately before the conveyance;

(D) an entity of the state or local government which acquired ownership or control of a tanker, barge, nontank vessel or marine facility, when the entity of the state or local government has caused or contributed to a spill or discharge of oil into marine waters;

(E) "Owner" or "Operator" does not include a person who, without participating in the management of a tanker, barge, nontank vessel or marine facility, holds indicia of ownership primarily to protect his or her security interest in the tanker, barge, nontank vessel or marine facility;

(F) "Operator" does not include any person who owns the land underlying a marine facility or the facility itself if the person is not involved in the operations of the facility.

(o)(14) "Owners' equity", as defined by GAAP, means the difference between total assets and total liabilities.

(p)(1) "P&I Club" see "Protection and Indemnity Club".

(p)(2) "Persistent Oil" means a petroleum–based oil that does not meet the distillation criteria for a non–persistent oil. Persistent oils are further classified based on both specific and American Petroleum Institute (API) observed gravities corrected to 60 degrees Fahrenheit, as follows:

(A) Group 2 – specific gravity greater than or equal to 0.8000 and less than 0.8500. API gravity less than or equal to 45.0 and greater than 35.0;

(B) Group 3 – specific gravity greater than or equal to 0.8500 and less than 0.9490. API gravity less than or equal to 35.0 and greater than 17.5;

(C) Group 4 – specific gravity greater than or equal to 0.9490 and up to and including 1.0. API gravity less than or equal to 17.5 and greater than 10.0;

(D) Group 5 – specific gravity greater than 1.0000. API gravity equal to or less than 10.0.

(p)(3) "Person" means any individual, trust, firm, joint stock company, or corporation, including, but not limited to, a government corporation, partnership, and association. Also included is any city, county, city and county, district and the state or any department or agency thereof, and the federal government or any department or agency thereof, to the extent permitted by law.

(p)(4) "Petroleum Barge" see "Barge".

(p)(5) "Pilot" means a person duly licensed by the U.S. Coast Guard as a Federal First Class Pilot authorized to serve as a pilot on tankers and nontank vessels transiting in specified harbors in California. This person may or may not be the "Master" as defined in this chapter.

(p)(6) "Pipeline" means any line or conduit used at any time to transport oil. A pipeline will be considered a marine facility if it is located in marine waters or where a discharge from the pipeline could impact marine waters.

(p)(7) "Point of Transfer", means a position either physically located on the receiving or transferring tanker, barge, or nontank vessel, or in the case of a response vessel, located within 1/2 miles of the actual oil transfer operation.

(p)(8) "Port Authority" means the person, governmental agency or civilian organization responsible for the operation, control and administration of a port or harbor area.

(p)(9) "Production pier" means a structure supported above marine waters by pilings, columns or caissons which is connected to land and upon which is situated an oil and gas production operation.

(p)(10) "Protection and Indemnity (P&I) Club" means a mutual insurance organization formed by a group of ship owners or operators in order to secure cover for various risks of tanker, barge, or nontank vessel operation, including oil spill costs, not covered by normal hull insurance.

(q)(1) "QI" see "Qualified Individual".

(q)(2) "Qualified Individual (QI)" means a shore–based representative of a tanker, barge, nontank vessel or facility owner or operator. The QI can be an individual or company that provides QI services. The QI must be fluent in English, located in the continental United States, available on a 24–hour basis, and have full written authority to implement the tanker, barge, nontank vessel or facility's contingency plan. A person stationed on a fixed, off–shore platform is considered to be shore–based for purposes of this definition. A QI is not necessarily the responsible party unless otherwise considered a responsible party as defined in this chapter. The duties of the QI shall include:

(A) activating and engaging in contracting with required oil spill response organizations;

(B) acting as liaison with, and following the orders of, the State Incident Commander and/or Federal On–Scene Coordinator through the Unified Command during all phases of spill response. This would include the ability to make changes to the plan when so ordered by the Administrator or the Federal On–Scene Coordinator;

(C) obligating, either directly or through prearranged contracts, any funds necessary to carry out all required or directed oil spill response activities detailed in the tanker, barge, nontank vessel or facility's contingency plan or specified by order of the Incident Commander and/or Federal On–Scene Coordinator.

(r)(1) "Rated OSRO" means an OSRO that has received a satisfactory rating from the Administrator for a particular rating level established pursuant to Section 819.01 of this subdivision.

(r)(2) "Reasonable Worst Case Oil Spill" is defined in the chapters of this subdivision where the term is used.

(r)(3) "Regional Response Team (RRT)" means the federal, interagency organization that is responsible for granting approval for the use of cleanup agents during an oil spill response. The RRT was established under the federal Oil Spill Act of 1990 and is composed of representatives of the federal agencies enumerated in 40 CFR §300.175(b), as well as state and local representatives.

(r)(4) "Remove" or "Removal" means the extraction of oil from the water and shorelines, or taking other action as necessary to minimize or mitigate oil–related damage to the environment, or to safeguard the public health or welfare.

(r)(5) "Response Area" means the area in which spill response activities are occurring. This shall include the designated routes that response vessels will transit to and from temporary storage facilities or other locations as specified by the Administrator and/or the Federal On–Scene Coordinator during the course of an oil spill incident.

(r)(6) "Response Resources" means all the personnel, equipment, supplies, and services necessary to perform oil spill response activities.

(r)(7) "Response Vessel" means any tanker, barge or other waterborne craft used in the course of response activities during an oil spill incident.

(r)(8) "Responsible Party (or Party Responsible)" means any of the following:

(A) the owner or transporter of oil or a person or entity accepting responsibility for the oil;

(B) the owner, operator or lessee of, or person who charters by demise, any tanker, barge, nontank vessel or marine facility;

(C) a person or entity who accepts responsibility for vessel or marine facility; or

(D) the person who fulfills the role of the Qualified Individual during spill response only if that person is also one of the individuals as described in subparagraphs (A) through (C) above.

(r)(9) "Risk and Hazard Analysis" means a study in which process hazards and potential operating problems that could lead to oil spills are identified using systematic methods recommended by the American Institute of Chemical Engineers, or other means approved by the Administrator. This is the study referred to as the Hazard and Operability Study in Section 8670.28 of the Government Code.

(r)(10) "Risk Zone" means one of the areas along the California coast that has been differentiated by the relative risk of an oil spill occurring in that area. The areas so designated shall be termed: High Volume Ports; Facility Transfer Areas; or the Balance of the Coast; and are further defined in this chapter.

(s)(1) "Santa Barbara Channel Area" see "Facility Transfer Area".

(s)(2) "Sensitive Site Strategy Evaluation Program (SSSEP)" means the program to test and evaluate the effectiveness of the protection response strategies developed in the ACPs to protect the sensitive sites in California's marine waters. This program, managed by the Administrator, will ensure that the strategies will be effective in an actual oil spill emergency.

(s)(3) "Shifting" means to move or transfer a tanker, barge, or nontank vessel from one place or position in the harbor to another in the harbor.

(s)(4) "Shoreline Protection Tables" or SP Tables, means the tables dated July 17, 2006, incorporated by reference herein, developed by the Office of Spill Prevention and Response and posted on the Office's website. These tables outline the shoreline protection requirements for California's coastal areas and applies to all vessels of 300 gross tons or greater. Small Harbor Tables are included to define the shoreline protection requirements for vessels that operate in the small harbors as listed.

(s)(5) "Short ton" means a unit of weight equal to 2,000 pounds, avoirdupois.

(s)(6) "Small Craft" means any vessel, other than a tanker or barge, that is less than 65 feet, 7 1/2 inches (20 meters) in length.

(s)(7) "Small Craft Refueling Dock" means a waterside operation that dispenses only non-persistent oil in bulk and small amounts of persistent lubrication oil in sealed containers, primarily to small craft, and meets both of the following criteria:

(A) has tank storage capacity not exceeding 20,000 gallons in any single storage tank or tank compartment;

(B) has a total useable tank storage capacity not exceeding 75,000 gallons.

(s)(8) "Small marine fueling facility" means either of the following:

(A) a mobile transfer unit, or

(B) a fixed facility that is not a marine terminal, which dispenses primarily nonpersistent oil, and may dispense small amounts of persistent oil, primarily to small craft, and meets all of the following criteria:

(1) has tank storage capacity not exceeding 40,000 gallons in any single storage tank or storage tank compartment,

(2) has total usable tank storage capacity not exceeding 75,000 gallons,

(3) had an annual throughput volume of over-the-water transfer of oil that did not exceed 3,000,000 gallons during the most recent preceding 12-month period.

(s)(9) "Small vessel" see "Small Craft".

(s)(10) "Spill (or Discharge)" means any release of at least one barrel (42 gallons) of oil which impacts marine waters that was not authorized by a federal, state, or local governmental entity.

(s)(11) "Staff" means the Administrator or any personnel within the California Department of Fish and Game authorized to act on behalf of the Administrator.

(s)(12) "State Fiscal Year" see "Fiscal Year"

(s)(13) "State Incident Commander" see "Incident Commander".

(s)(14) "State Liaison Officer" means that person responsible for the coordination of information between the State Incident Commander/ Federal On-Scene-Coordinator and other state and local government representatives. The State Liaison Officer is a function within the Incident Command System as described in the State Marine Oil Spill Contingency Plan.

(s)(15) "Static Bollard Pull" see "Bollard Pull".

(t)(1) "Tank Barge" see "Barge"

(t)(2) "Tank Ship", see "Tanker".

(t)(3) "Tank Vessel" means any tanker or barge that carries oil in commercial quantities as cargo.

(t)(4) "Tanker" means any self-propelled, waterborne vessel, constructed or adapted to transport oil in bulk or in commercial quantities as cargo.

(t)(5) "Terminal" see "Marine Terminal".

(t)(6) "Tractor Tug" means a tug which is propelled by blades or screws which may be manipulated or rotated to provide propulsive thrust to any part of a 360 degree arc relative to the keel or longitudinal axis of the tug.

(t)(7) "Transporting oil in bulk" see "Oil in Bulk".

(t)(8) "Tug" or "Tug Escort" see "Escort Tug".

(u) (Reserved)

(v)(1) "Vessel" means any watercraft or ship of any kind, including every structure adapted to be navigated from place to place for the transportation of merchandise or persons.

(v)(2) "Vessel Carrying Oil as Secondary Cargo" means any vessel that does not carry oil as a primary cargo, but does carry oil in bulk as cargo or cargo residue.

(v)(3) "Vessel of Opportunity" means any craft engaged in spill response activities that is otherwise normally and substantially involved in activities other than spill response.

(v)(4) "Vessel Traffic Service (VTS) System" means the system authorized pursuant to 33 CFR Part 161, or Government Code Section 8670.21.

(v)(5) "VTS" means Vessel Traffic Service System.

(w)(1) "Working Capital", as defined by GAAP, means current assets minus current liabilities.

NOTE: Authority cited: Sections 8670.7(a), 8670.13.1(a), 8670.13.2, 8670.17.2, 8670.23.1, 8670.28, 8670.32 and 8670.35, Government Code. Reference: Sections 8670.3, 8670.7(a), 8670.13(a), 8670.13.2, 8670.17.2, 8670.21, 8670.23.1, 8670.28, 8670.32 and 8670.35, Government Code.

HISTORY

1. New section filed 8-15-91 as an emergency; operative 8-15-91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12-1-91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12-13-91 as an emergency; operative 12-14-91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4-13-92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12-13-91 order including amendment of NOTE and amendment of subsections (c), (m)(2), (r)(1), (w)(1), (w)(2), (x)(2), (z), (aa), (ab), adoption of subsection (m)(3), redesignation of subsection (f) to subsection (d) and subsection relettering transmitted to OAL 4-10-92 and filed 5-22-92 (Register 92, No. 22).
4. Editorial correction of HISTORY 2 (Register 95, No. 12).
5. Amendment of section and NOTE and subsection renumbering filed 3-23-95; operative 4-24-95 (Register 95, No. 12).
6. Amendment of subsection (z) filed 6-23-95; operative 7-23-95 (Register 95, No. 25).
7. Change without regulatory effect renumbering former chapter 1 to chapter 2, renumbering and amending former section 790 to section 791, and adding new chapter 1 and section filed 7-12-95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
8. Change without regulatory effect repealing subsections (g)(2)(D) and (g)(2)(E), subsection relettering, amending newly designated subsection (g)(2)(D), adding subsections (g)(2)(D)(1)-(2), amending subsections (m)(5), (s)(6) and (s)(6)(A), repealing subsection (s)(6)(C), and adding subsections (s)(7)-(s)(7)(B)(3) with subsection renumbering filed 10-21-96 pursuant to Section 100, title 1, California Code of Regulations (Register 96, No. 43).
9. Amendment of section and NOTE filed 11-8-96; operative 1-1-97 (Register 96, No. 45).
10. Amendment of subsections (m)(1)(C)1. and (o)(2), new subsection (v)(2), subsection relettering, and amendment of NOTE filed 11-13-97; operative

11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
11. Amendment of subsections (f)(2)(A), (f)(2)(D), (m)(1)(B)1. and (p)(2)–(p)(2)(D) and amendment of NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
12. New subsections (a)(7) and (r)(2) and subsection relettering filed 7–28–98; operative 8–27–98 (Register 98, No. 31).
13. Amendment of subdivision 4 heading filed 8–19–98; operative 9–18–98 (Register 98, No. 34).
14. Amendment of section and NOTE filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
15. Amendment of subsection (n)(4) and amendment of NOTE filed 9–17–2001; operative 9–17–2001 pursuant to Government Code section 11343.4 (Register 2001, No. 38).
16. Amendment of subsections (b)(9), (*l*)(4) and (m)(5), repealer of subsection (s)(2), subsection renumbering, amendment of newly designated subsections (s)(4), (s)(5), (s)(8) and (s)(9), repealer of subsections (t)(5) and (v)(3) and subsection renumbering filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).
17. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 790.5. Schedule of Compliance.

NOTE: Authority cited: Section 8670.37.54(b), Government Code. Reference: Sections 8670.37.51–8670.37.57, Government Code.

HISTORY

1. New section filed 3–23–95; operative 4–24–95 (Register 95, No. 12).
2. Change without regulatory effect renumbering former section 790.5 to section 791.5 filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).

Chapter 2. Financial Responsibility

Subchapter 1. Certificates of Financial Responsibility

§ 791. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede any definition in Chapter 1:

(a) "Certificant" means an owner or operator or a person accepting responsibility for the oil who has been issued a Certificate of Financial Responsibility under this subchapter.

An owner or operator may also include any person or entity responsible for the specified tanker, barge, marine facility, nontank vessel or oil, or any authorized agent thereto as described in Sections 8670.37.52 and 8670.37.58(a) of the Government Code. It shall be a conclusive presumption that any party making an application for a Certificate of Financial Responsibility pursuant to Section 8670.37.53 of the Government Code is either an owner or operator as defined in this subchapter or is an authorized agent acting within the scope of employment, direction, and control of the owner or operator.

(b) "Large barge" for the purposes of determining financial responsibility, means a barge with a cargo capacity of 150,000 or more barrels of oil.

(c) "Nontank Vessel" means a vessel of 300 gross tons or greater, other than a tanker or barge, as those terms are defined in Chapter 1, Section 790 of this subdivision.

(d) "Proof of entry" means the documents that evidence that an owner of a tanker, barge, nontank vessel, or person named is covered for oil pollution liabilities by a Protection and Indemnity Club.

(e) "Small barge", for the purposes of determining financial responsibility, means a barge with a cargo capacity of less than 150,000 barrels of oil.

(f) "Vessel Carrying Oil as Secondary Cargo" means a tanker or barge that does not carry oil as a primary cargo, but does carry oil in bulk as cargo or cargo residue.

NOTE: Authority cited: Sections 8670.37.53 and 8670.37.54(b), Government Code. Reference: Sections 8670.3 and 8670.37.51–8670.37.58, Government Code.

HISTORY

1. New section filed 8–15–91 as an emergency; operative 8–15–91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12–1–91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12–13–91 as an emergency; operative 12–14–91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4–13–92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12–13–91 order including amendment of NOTE and amendment of subsections (b)(5), (c), (d) and (f), repealer of subsections (c)(1) and (d)(1), and subsection renumbering transmitted to OAL 4–10–92 and filed 5–22–92 (Register 92, No. 22).
4. Amendment of section heading, section and NOTE and subsection renumbering filed 3–23–95; operative 4–24–95 (Register 95, No. 12).
5. Amendment filed 6–23–95; operative 7–23–95 (Register 95, No. 25).
6. Change without regulatory effect renumbering former chapter 1 to chapter 2, renumbering and amending former section 790 to section 791, and renumbering and amending former section 791 to new section 791.7 filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
7. Amendment of first paragraph, subsection (a) and NOTE filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
8. Amendment of section and NOTE filed 12–28–99; operative 2–3–2000 (Register 99, No. 53).
9. New subsections (c) and (d), subsection relettering, amendment of newly designated subsection (e) and amendment of NOTE filed 2–4–2000 as an emergency; operative 2–4–2000 (Register 2000, No. 5). A Certificate of Compliance must be transmitted to OAL by 6–5–2000 or emergency language will be repealed by operation of law on the following day.
10. Reinstatement of section as it existed prior to 2–4–2000 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 31).
11. Amendment of subsection (c) and amendment of NOTE filed 12–21–2000 as an emergency; operative 12–21–2000 (Register 2000, No. 51). A Certificate of Compliance must be transmitted to OAL by 4–20–2001 or emergency language will be repealed by operation of law on the following day.
12. Amendment of subsection (c) and amendment of NOTE refiled 4–16–2001 as an emergency; operative 4–16–2001 (Register 2001, No. 16). A Certificate of Compliance must be transmitted to OAL by 8–14–2001 or emergency language will be repealed by operation of law on the following day.
13. Certificate of Compliance as to 4–16–2001 order, including further amendment of section, transmitted to OAL 8–3–2001 and filed 9–17–2001 (Register 2001, No. 38).
14. Change without regulatory effect amending subsection (a) and amending NOTE filed 6–24–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
15. Amendment of NOTE filed 6–26–2003; operative 6–26–2003 (Register 2003, No. 26).

§ 791.5. Schedule of Compliance.

(a) Unless a Certificate of Financial Responsibility (hereinafter referred to as a certificate) is suspended pursuant to Section 797 of this subchapter, all certificates issued by the Administrator shall remain in effect and satisfy the requirements of this subchapter according to the terms printed on the certificate. Any applicant who does not have a valid certificate issued by the Administrator, must comply with the provisions of this subchapter. Any certificant, upon application for renewal of a Certificate of Financial Responsibility, must comply with the provisions of this subchapter.

NOTE: Authority cited: Section 8670.37.54(b), Government Code. Reference: Sections 8670.37.51–8670.37.58, Government Code.

HISTORY

1. Change without regulatory effect renumbering former section 790.5 to new section 791.5 filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
2. Amendment filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
3. Amendment of NOTE filed 12–28–99; operative 2–3–2000 (Register 99, No. 53).
4. Change without regulatory effect amending NOTE filed 6–24–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
5. Amendment of NOTE filed 6–26–2003; operative 6–26–2003 (Register 2003, No. 26).

§ 791.7. Procedures for Application for California Certificate of Financial Responsibility.

(a) All operators or owners of marine facilities, where a spill could impact the marine waters of the state, and operators or owners of vessels or

the owners of the oil contained therein, or the operators or owners of nontank vessels, shall obtain a California Certificate of Financial Responsibility (hereafter referred to as a certificate) before operating in California. The following applications shall be used to obtain a certificate:

(1) Application for Certificate of Financial Responsibility for Operators or Owners of Tank Vessels (application), referred to as FG OSPR Form 1925 (11/05);

(2) Application for Certificate of Financial Responsibility for Operators or Owners of Nontank Vessels (application), referred to as FG OSPR Form 1972 (05/06);

(3) Application for Certificate of Financial Responsibility for Marine Facilities, (application), referred to as FG OSPR Form 1924 (11/05);

(4) Application for Certificate of Financial Responsibility for Owners of Oil (application), referred to as FG OSPR Form 1947 (11/05); and

[The next page is 200.7.]

(5) Application for Certificate of Financial Responsibility for Mobile Transfer Units (application), referred to as FG OSPR Form 1946 (11/05).

(6) These forms shall collectively be referred to as applications and incorporated by reference herein.

(7) The applications shall be obtained from and, upon completion, submitted to the Office of Spill Prevention and Response (OSPR) at the following address:

DEPARTMENT OF FISH AND GAME
OFFICE OF SPILL PREVENTION AND RESPONSE (OSPR)
P.O. BOX 944209
SACRAMENTO, CA 94244-2090

(b) Any facility owner/operator may request exemption from the requirement to obtain a certificate on the basis that a spill from the facility could not reasonably be expected to impact marine waters.

(1) Such request must be submitted to the Administrator and must provide specific, technical justification for the request.

(2) Prior to granting or denying the request, the Administrator may inspect the facility to determine if a spill from the facility could potentially impact marine waters.

(3) Within forty-five (45) business days of receipt of a request for exemption, the Administrator shall inform the facility owner/operator in writing if the justification is complete and the exemption is granted, or that it is deficient and what specific information or documentation is required.

(4) If the exemption request is deemed deficient:

(A) within fifteen (15) business days of receipt of the notice of deficiency, the facility owner/operator must submit the required information or documentation to the Administrator.

(B) within twenty-one (21) business days of receipt of this information, the Administrator shall notify the facility owner/operator if the exemption has been granted or denied.

(5) If the request for exemption is denied, the facility owner/operator must submit an application for a certificate within ten (10) business days of the date the notice of denial is received by the owner/operator, unless a request for reconsideration is submitted pursuant to Section 791.7(g).

(c) General Application Procedures.

(1) All applications and supporting documents shall be prepared in English and all monetary terms shall be in U.S. currency.

(2) All spaces on the application shall be completed with either the requested information or the phrase "Not applicable".

(3) All applications shall be signed by the applicant or authorized representative of the applicant, whose title shall be indicated in the space provided on the application.

(4) All applications shall be accompanied by a written delegation of authority to submit the application on behalf of the applicant where the person signing the application is an individual other than the individual applicant in the case of a sole proprietorship, a partner in the case of a partnership applicant, or an authorized signatory or official of a corporate applicant.

(5) Operator(s) or owner(s) of nontank vessels shall submit a nonrefundable fee per vessel with each new or renewal application as follows: Do not deduct any processing fees from the per vessel fee.

(A) Operator(s) or owner(s) of nontank vessels with a carrying capacity of over 6,500 barrels, or over 7,500 barrels for nontank vessels owned and operated by California or a federal agency, shall submit a nonrefundable USD $2,500 fee per vessel, or;

(B) Operator(s) or owner(s) of nontank vessels that have a carrying capacity greater than 500 barrels of oil and less than or equal to 6,500 barrels of oil, or a carrying capacity greater than 500 barrels of oil and less than or equal to 7,500 barrels of oil for nontank vessels owned and operated by California or a federal agency, shall submit a nonrefundable USD $1,500 fee per vessel, or;

(C) Operator(s) or owner(s) of nontank vessels that have a carrying capacity of 500 barrels of oil or less shall submit a nonrefundable USD $500 fee per vessel.

(6) If, prior to certificate issuance, an applicant becomes aware of a material change in any of the facts contained in the application or supporting documents, the applicant shall, within five (5) business days of becoming aware of the change or changes, notify the Administrator in writing of the change.

(7) Each certificate issued by the Administrator shall:

(A) except as provided in Subsection (c)(8) below, expire no later than two years following its issuance date; and

(B) bear its expiration date clearly on its face.

(8) The Administrator may issue a certificate for a marine facility for a period of not longer than three years if the Administrator finds that:

(A) continued operation is necessary to finance abandonment of the marine facility; and

(B) the financial resources the operator is able to demonstrate are reasonably sufficient to cover any spill-related damages from the facility.

(9) The minimum, median, and maximum processing times for an application from the time of receipt until issuance of a certificate are as follows:

(A) The minimum time is same day processing;

(B) The median time is nineteen (19) days;

(C) The maximum time is ninety-two (92) days.

(d) Application processing by the OSPR – Tankers, Nontank Vessels, Large Barges, and Owners of Oil.

(1) Applications and evidence of financial responsibility submitted by owners or operators of tankers, nontank vessels, large barges, and owners of oil will be reviewed within twenty-one (21) calendar days of receipt by the OSPR. Certificates will be issued within that period provided that the following has been received: (1) adequate information was furnished in the application, (2) receipt of the nontank vessel fee, and (3) acceptable evidence of financial responsibility, as determined by the Administrator, has been received. The criteria for demonstrating financial responsibility are set forth in Section 795 of this subchapter. Amounts of financial responsibility that must be demonstrated are as follows:

(A) Operator(s) or owner(s) of tankers, large barges, or owners of, or persons accepting responsibility for the oil, shall demonstrate their current financial ability to pay at least one billion dollars ($1,000,000,000).

(B) Except as provided in (C) below, operator(s) or owner(s) of nontank vessels shall demonstrate their current financial ability to pay at least 300 million dollars ($300,000,000) for any damages arising from an oil spill during the term of the certificate.

1. Certificates of financial responsibility are not required for non-self propelled nontank vessels that do not carry any oil.

(C) Operator(s) or owner(s) of nontank vessels that have a carrying capacity of 6,500 barrels of oil or less, or a carrying capacity of 7,500 barrels of oil or less for nontank vessels owned and operated by California or a federal agency, shall demonstrate their current financial ability to pay the following appropriate amount of financial responsibility:

1. $2,000,000 for those that have a carrying capacity from less than 1 to not more than 10 barrels;

2. $5,000,000 for those that have a carrying capacity greater than 10 to not more than 50 barrels;

3. $10,000,000 for those that have a carrying capacity greater than 50 to not more than 500 barrels;

4. $18,900,000 for those that have a carrying capacity greater than 500 to not more than 1,000 barrels.

5. Those nontank vessels that have a carrying capacity greater than 1000 to not more than 6,500 barrels, or 7,500 barrels for nontank vessels owned and operated by California or a federal agency, shall determine the amount of financial responsibility as follows: subtract 1,000 barrels from the total carrying capacity of oil of the nontank vessel: multiply this amount by $5,670 (which represents 30% of the cargo multiplied by the maximum per barrel clean-up and damage cost of spilled oil of $18,900); then add $18,900,000.

6. The amount of financial responsibility shall not exceed the amount required for nontank vessels as set forth in Section 8670.37.58(a) of the Government Code.

7. Certificates of financial responsibility are not required for non-self propelled nontank vessels that do not carry any oil.

(2) The amounts in this subsection (d) are in effect unless amended by Section 8670.37.53(a), 8670.37.58(a) or 8670.41 of the Government Code.

(3) If the information contained in the application, evidence of financial responsibility, or any supplemental information provided is insufficient, the Administrator shall notify the applicant of the nature of such insufficiency within twenty–one (21) calendar days from the date of receipt of the application and evidence of financial responsibility, or any supplemental information or additional evidence, whichever is applicable. Applicants shall then have ten (10) business days from the date of notification to provide the missing information or additional evidence.

(A) Certificates will be issued within fifteen (15) calendar days of the submission of additional evidence or supplemental information provided that acceptable evidence or adequate information was received. In the event that acceptable evidence or adequate information is not received, the Administrator may deny the application by providing written notice specifying the reasons for the denial following the ten (10) day period set forth in Subsection (d)(3) above.

(e) Application processing by the OSPR – Small Barges, Marine Facilities, Small Marine Fueling Facilities, Mobile Transfer Units, and Vessels Carrying Oil As Secondary Cargo.

(1) Applications submitted by owners or operators of small barges, marine facilities, small marine fueling facilities (as defined in Section 790 of this subdivision), mobile transfer units, and vessels carrying oil as secondary cargo (as defined in Section 790 of this subdivision) will be reviewed and applicants notified of the amount of financial responsibility required within twenty–one (21) calendar days of receipt by the OSPR.

(2) The OSPR shall determine the amount of financial responsibility as follows:

(A) For small barges, except for those vessels carrying oil as secondary cargo addressed under Subsection (e)(2)(F) of this section:

1. the product derived by multiplying the maximum per barrel clean–up and damage cost of spilled oil ($12,500) times thirty percent (30%) of the maximum cargo capacity, as measured in barrels, of the small barge.

2. The amount of financial responsibility shall not exceed the amount required for tankers as set forth in Section 8670.37.53(a) of the Government Code.

3. The amount of financial responsibility required for small barges used exclusively to transfer, transport, store, or mechanically treat oily waste water may be reduced if allowed by the Administrator following reconsideration pursuant to the procedures established in Subsection 791.7(g). If a reduced financial responsibility amount is allowed, it shall be based on: $12,500 times thirty percent (30%) of the maximum concentration of oil found in the oily waste water, as measured in barrels.

4. However, the amount of financial responsibility will, in no case, be reduced below the minimum of $1,000,000.

(B) For marine facilities except for those offshore marine facilities, small marine fueling facilities, and mobile transfer units addressed under Subsections (e)(2)(C), (e)(2)(D) and (e)(2)(E), respectively, of this section:

1. the product derived by multiplying the maximum per barrel clean–up and damage cost of spilled oil ($12,500) times the reasonable worst case spill volume, as measured in barrels, calculated in the certificant's oil spill contingency plan, in accordance with Sections 817.02(d)(1)(A), 817.02(d)(1)(B), and 817.02(d)(1)(E) of Title 14 of the California Code of Regulations.

2. The amount determined pursuant to this paragraph shall not be less than $1,000,000 or in excess of $300,000,000, unless otherwise determined by the Administrator following reconsideration pursuant to subsection 791.7(g).

(C) For offshore marine facilities engaged in drilling operations which may have the potential for resulting in an uncontrolled release of oil from the reservoir into marine waters:

1. the product derived by multiplying the maximum per barrel clean–up and damage cost of spilled oil ($12,500) times the reasonable worst case spill volume, as measured in barrels. This volume is based on calculations and parameters proposed by the offshore marine facility in the certificant's oil spill contingency plan, in accordance with Sections 817.02(d)(1)(C)–(E) of Title 14 of the California Code of Regulations; plus:

2. The amount determined pursuant to this paragraph shall not be less than $10,000,000 or in excess of $300,000,000, unless otherwise determined by the Administrator following reconsideration pursuant to subsection 791.7(g).

(D) For small marine fueling facilities except for those mobile transfer units addressed under Subsection (e)(2)(E) of this section:

1. the product derived by multiplying the maximum per barrel clean–up and damage cost of spilled oil ($12,500) times the reasonable worst case spill volume, as measured in barrels, calculated in the certificant's oil spill contingency plan, in accordance with Section 817.03(d)(1)(A) of Title 14 of the California Code of Regulations.

(E) For mobile transfer units:

1. The product derived by multiplying the maximum per barrel clean–up and damage cost of spilled oil ($12,500) times thirty percent (30%) of the maximum cargo capacity, as measured in barrels, of the unit.

2. The amount of financial responsibility required for mobile transfer units used exclusively to transport oil–water mixture may be reduced if allowed by the Administrator following reconsideration pursuant to the procedures established in Subsection 791.7(g). If a reduced financial responsibility amount is allowed, it shall be based on: $12,500 times thirty percent (30%) of the maximum concentration of oil found in the oily waste water, as measured in barrels.

(F) For Vessels Carrying Oil As Secondary Cargo:

1. the product derived by multiplying the maximum per barrel clean–up and damage cost of spilled oil ($12,500) times thirty percent (30%) of the maximum oil cargo capacity, as measured in barrels, of the vessel.

2. The amount of financial responsibility shall not exceed the amount required for tankers as set forth in Section 8670.37.53(a) of the Government Code.

3. However, the amount of financial responsibility will, in no case, be reduced below the minimum of $1,000,000.

(3) Evidence of financial responsibility must be submitted within twenty–one (21) calendar days from the date applicant receives notice of the amount of financial responsibility. The Administrator may waive the twenty–one (21) day period for submitting such evidence.

(4) Certificates will be issued for small barges, marine facilities, small marine fueling facilities, mobile transfer units, and vessels carrying oil as secondary cargo within ten (10) business days following the receipt of acceptable evidence of financial responsibility by the OSPR, as determined by the Administrator. The criteria for demonstrating financial responsibility are set forth in Section 795 of this subchapter.

(5) If the information contained in the application, evidence of financial responsibility, or the other supplemental information provided is insufficient, the Administrator shall notify the applicant of the nature of such insufficiency within twenty–one (21) calendar days from the date of receipt of either the application, evidence of financial responsibility, or supplemental information, whichever is applicable. Applicants shall then have ten (10) business days from the date of notification to provide the missing information or additional evidence.

(A) Certificates will be issued within ten (10) business days following the submittal of evidence of financial responsibility and any additional evidence required, provided that acceptable evidence and adequate information is received. In the event that acceptable evidence or adequate information is not received, the Administrator may deny the application by providing written notice specifying the reasons for the denial following the ten (10) day period set forth above.

(B) If no evidence of financial responsibility is submitted following issuance of the notice of financial responsibility or if the response to a notice of insufficiency is inadequate, the Administrator may deny the application by providing written notice specifying the reasons for the denial

following the twenty–one (21) day or ten (10) day submittal period specified above, whichever is applicable.

(f) Application renewals.

(1) Certificate renewal applications shall be accepted by the Administrator no earlier than ninety (90) calendar days prior to the expiration of the existing certificate. In order to renew a certificate prior to the expiration date of the existing certificate, renewal applications must be submitted no later than forty–five (45) calendar days prior to the expiration date.

(2) If at any time after a certificate has been issued, a holder of a certificate becomes aware of a material change in any facts contained in the application or supporting documents, including the holder ceasing to be the owner or operator of the tanker, barge, nontank vessel, or marine facility, or the owner of the oil, the holder of the certificate shall notify OSPR, in writing, within five (5) business days of becoming aware of the change.

(3) Operator(s) or owner(s) of nontank vessels shall submit a nonrefundable fee per vessel, as set forth in Section 791.7(c)(5) of this subchapter. Do not deduct any processing fees from the per vessel fee.

(g) Requests for Reconsideration.

(1) Applicants may submit a written request to the Administrator requesting reconsideration of the amount of financial responsibility that the applicant must demonstrate to obtain a certificate, or any decision to deny issuance of a certificate or a renewal certificate, or any decision to deny exemption from the requirement to obtain a certificate. Requests must be submitted within ten (10) business days from the date that the applicant receives notice of denial or of the amount of financial responsibility to be demonstrated. The Administrator may waive the ten (10) day period for submitting a request.

(2) The request must contain the basis for requesting reconsideration and, if applicable, provide evidence which rebuts the basis for the Administrator's denial of the application, renewal application, exemption, or financial responsibility determination.

(3) Within ten (10) business days from the date the request for reconsideration is received, the OSPR will advise the applicant of the Administrator's decision whether the request will be considered.

(4) Within fifteen (15) calendar days following the notice that the Administrator will consider the request, the applicant will either be sent a notice that the Administrator shall adhere to his or her earlier decision (i.e., deny the request for reconsideration); or a certificate shall be issued; or a revised notice of financial responsibility shall be issued; or an exemption shall be granted.

(h) Destruction or Loss of Certificate.

(1) In the event that a certificate has been lost or destroyed, the holder of the certificate shall immediately notify the Administrator of the certificate's loss or destruction.

(2) Certificate holders shall provide a written request which clearly states the reasons for the request to the Administrator for the issuance of a replacement certificate.

NOTE: Authority cited: Sections 8670.37.54(b), 8670.37.58 and 8670.41, Government Code. Reference: Sections 8670.37.53, 8670.37.54, 8670.37.58 and 8670.41, Government Code.

HISTORY

1. Change without regulatory effect renumbering and amending former section 791 to new section 791.7 filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
2. Change without regulatory effect repealing subsection (e)(2)(B)2. and subsection renumbering filed 7–18–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 29).
3. Change without regulatory effect amending subsections (e)(2)(A)3., (e)(2)(B), (e)(2)(B)2., (e)(2)(C)3. and (e)(2)(D)2. and repealing subsections (e)(2)(B)4.–5. filed 8–3–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 31).
4. Change without regulatory effect amending subsection (a) and adding (a)(1)–(6) designators, amending subsections (d)(1)(A)–(C), and amending forms incorporated by reference at subsections (a)(1), (a)(2), (a)(3) and (a)(4) filed 10–21–96 pursuant to Section 100, title 1, California Code of Regulations (Register 96, No. 43). FG OSPR Forms 1924 (10/96), 1925 (10/96), 1926 (2/95), 1927 (2/95), 1928 (2/95), 1929 (2/95), 1930 (2/95), 1946 (2/96) and 1947 (8/96), which are incorporated by reference in Section 791.7, were removed from print but are still incorporated.
5. Amendment filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
6. Editorial correction of subsection (a) (Register 98, No. 30).
7. Change without regulatory effect amending subsections (a)(2), (e)(2)(B)1., and (e)(2)(D)1. filed 7–23–98 pursuant to section 100, title 1, California Code of Regulations (Register 98, No. 30).
8. Amendment of section and NOTE filed 12–28–99; operative 2–3–2000 (Register 99, No. 53).
9. Amendment of subsections (a)(1), (d) and (d)(1) and new subsections (d)(1)(D)1. and 2. filed 2–4–2000 as an emergency; operative 2–4–2000 (Register 2000, No. 5). A Certificate of Compliance must be transmitted to OAL by 6–5–2000 or emergency language will be repealed by operation of law on the following day.
10. Reinstatement of section as it existed prior to 2–4–2000 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 31).
11. Amendment of subsection (a)(2), repealer of subsection (d)(1)(A), subsection relettering, amendment of newly designated subsection (d)(1)(B)2., new subsections (d)(1)(C)–(d)(1)(C)8. and repealer and new NOTE filed 12–21–2000 as an emergency; operative 12–21–2000 (Register 2000, No. 51). A Certificate of Compliance must be transmitted to OAL by 4–20–2001 or emergency language will be repealed by operation of law on the following day.
12. Amendment of subsections (a)(2) and (d)–(d)(1), repealer of subsections (d)(1)(A) and (d)(1)(D), subsection relettering, new subsections (d)(1)(C)–(d)(1)(C)8. and repealer and new NOTE refiled 4–16–2001 as an emergency, including further amendment of subsections (d)(1)(C)2.–5.; operative 4–16–2001 (Register 2001, No. 16). A Certificate of Compliance must be transmitted to OAL by 8–14–2001 or emergency language will be repealed by operation of law on the following day.
13. Certificate of Compliance as to 4–16–2001 order, including further amendment of section, transmitted to OAL 8–3–2001 and filed 9–17–2001 (Register 2001, No. 38).
14. Change without regulatory effect amending subsections (d)(1)(C)6. and (d)(1)(C)8. and amending NOTE filed 6–24–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
15. Change without regulatory effect amending subsections (a)(1)–(2) and (a)(4) filed 7–25–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 30).
16. Amendment of subsections (a)(2) and (c)(5), new subsections (c)(5)(A)–(C), repealer of subsections (d)(1)(B)1. and (d)(1)(C)7., subsection renumbering, redesignation and amendment of portion of subsection (d)(1)(C) as subsection (d)(2), subsection renumbering and amendment of subsection (f)(3) filed 11–21–2002 as an emergency; operative 1–1–2003 (Register 2002, No. 47). A Certificate of Compliance must be transmitted to OAL by 5–1–2003 or emergency language will be repealed by operation of law on the following day.
17. Editorial correction of subsection (d)(1)(B)1. (Register 2002, No. 49).
18. Amendment of subsections (a)(2) and (c)(5), new subsections (c)(5)(A)–(C), repealer of subsections (d)(1)(B)1. and (d)(1)(C)7., subsection renumbering, redesignation and amendment of portion of subsection (d)(1)(C) as subsection (d)(2), subsection renumbering and amendment of subsection (f)(3) refiled 4–30–2003 as an emergency; operative 5–2–2003 (Register 2003, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–2–2003 or emergency language will be repealed by operation of law on the following day.
19. Certificate of Compliance as to 4–30–2003 order, including further amendment of section and NOTE, transmitted to OAL 5–15–2003 and filed 6–26–2003 (Register 2003, No. 26).
20. Change without regulatory effect amending subsections (a)(1)–(5) and forms OSPR–1924, OSPR–1925, OSPR–1946, OSPR–1947 and OSPR–1972 (incorporated by reference) filed 8–21–2003 pursuant to section 100, title 1, California Code of Regulations (Register 2003, No. 34).
21. Amendment of subsections (a)(1)–(5) filed 4–17–2006; operative 5–17–2006 (Register 2006, No. 16).
22. Change without regulatory effect amending subsection (a)(2) and form FG OSPR–1972 (incorporated by reference) filed 6–5–2006 pursuant to section 100, title 1, California Code of Regulations (Register 2006, No. 23).

§ 792. Certification Requirements: Tankers, Nontank Vessels, Large Barges, and Owners of Oil.

(a) Each tanker or barge operator or owner who transports oil across California marine waters or the owner(s) of all the oil contained in and to be transferred to or from the tanker or barge, or the person accepting responsibility for the oil, or each nontank vessel operator or owner entering the marine waters of the state, shall obtain a certificate issued by the Administrator prior to operating in California marine waters. The certificate(s) shall be kept in their possession or control and, if applicable, on board the tanker, barge or nontank vessel.

(b) To obtain a certificate, the operator(s) or owner(s) of tankers, nontank vessels, large barges, or owner(s) of oil contained therein, or the per-

son accepting responsibility for the oil, shall demonstrate the required amounts of financial responsibility found in Subsection 791.7(d).

(c) The required amounts of financial responsibility in no way restricts or sets financial limitations on any duty, obligation or liability of the responsible party to the State of California or any other public or private entity. This includes civil penalties assessed pursuant to all applicable federal, state and local laws.

(d) When the owner(s) of all of the oil contained in the tanker, barge or nontank vessel, or the person accepting responsibility for the oil, hold the certificate(s) in lieu of the tanker, barge or nontank vessel operator or owner, the owner(s) or person accepting responsibility for the oil, shall provide a copy of documentation demonstrating ownership of, or responsibility for, all the oil contained in the vessel, a written statement authorizing application of the certificate(s) to the tanker, barge or nontank vessel, and a copy of the certificate to the tanker, barge or nontank vessel operator.

(e) The original or a certified copy(s) of certificate(s) issued to the responsible party (e.g., the tanker, barge or nontank vessel operator or owner, or, if applicable, the owner(s) of all the oil contained in the tanker, barge or nontank vessel or the person accepting responsibility for the oil), shall be carried on the tanker, barge or nontank vessel and be available for inspection at all times. As used in this subsection, a certified copy means either a notarized copy or a copy with an attached declaration, signed by an official of certificant, declaring the copy to be a true and accurate copy of the original certificate. If applicable, the documentation required pursuant to Subsection (d) shall be carried on the tanker, barge or nontank vessel and be available for inspection at all times.

(f) If the operator or owner of a vessel intends to rely on the certificate(s) issued to the owner(s) of or person(s) accepting responsibility for the oil cargo, the vessel operator shall, at least twenty–four (24) hours prior to transporting the oil across California marine waters, provide the Administrator with the following:

(1) a copy or copies of the certificate(s) applicable to all of the oil at all times during the transport; and

(2) a copy of a written statement by the holder(s) of the applicable certificate(s) authorizing its (their) application to the vessel.

(g) Operators who are not also the owners of the certificated tankers, barges or nontank vessels, shall carry on board such tankers, barges or nontank vessels a copy of the charter–party or any other written document which demonstrates that the operators are the operators designated on the certificates.

(h) Owners or operators of tankers, barges or nontank vessels used exclusively to respond to, contain, and clean up oil spills shall be exempt from the financial responsibility requirements set forth in this chapter, provided the responsible party or the Administrator agrees to indemnify the owner or operator, or the owner or operator is subject to the qualified immunity provisions set forth in Government Code Section 8670.56.6.

NOTE: Authority cited: Sections 8670.37.54(b), 8670.37.51, 8670.37.53 and 8670.37.58, Government Code. Reference: Sections 8670.37.51–8670.37.58 and 8670.56.6, Government Code.

HISTORY

1. New section filed 8–15–91 as an emergency; operative 8–15–91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12–1–91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12–13–91 as an emergency; operative 12–14–91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4–13–92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12–13–91 order including amendment of subsections (c), (d), (g), (j) and (k), transmitted to OAL 4–10–92 and filed 5–22–92 (Register 92, No. 22).
4. Amendment of section heading and section filed 3–23–95; operative 4–24–95 (Register 95, No. 12).
5. Change without regulatory effect amending subsection (b) filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
6. Amendment of subsections (b) and (e) filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
7. Amendment of section heading, section and NOTE filed 12–28–99; operative 2–3–2000 (Register 99, No. 53).
8. Amendment of subsections (a), (b), (d) and (e) filed 2–4–2000 as an emergency; operative 2–4–2000 (Register 2000, No. 5). A Certificate of Compliance must be transmitted to OAL by 6–5–2000 or emergency language will be repealed by operation of law on the following day.
9. Reinstatement of section as it existed prior to 2–4–2000 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 31).
10. Change without regulatory effect amending NOTE filed 6–24–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
11. Amendment of NOTE filed 6–26–2003; operative 6–26–2003 (Register 2003, No. 26).

§ 793. Certification Requirements: Small Barges, Marine Facilities, Small Marine Fueling Facilities, Mobile Transfer Units, and Vessels Carrying Oil As Secondary Cargo.

(a) Operators or owners of small barges, marine facilities, small marine fueling facilities, mobile transfer units, and vessels carrying oil as secondary cargo shall demonstrate the financial ability to pay for any damages arising from an oil spill resulting from the operations of the small barge, marine facility, small marine fueling facility, mobile transfer unit, or vessel carrying oil as secondary cargo.

(b) Each operator or owner of a small barge, marine facility, small marine fueling facility, mobile transfer unit, or vessel carrying oil as secondary cargo shall obtain a Certificate of Financial Responsibility from the Administrator.

(c) The original or certified copy of the certificate shall remain on–board the barge, the marine facility premise, the small marine fueling facility premise, with the mobile transfer unit, or on–board the vessel carrying oil as secondary cargo and be available for inspection at all times. As used in this subsection, a certified copy means either a notarized copy or a copy with an attached declaration, signed by an official of certificant, declaring the copy to be a true and accurate copy of the original certificate.

(d) Each operator or owner of a marine terminal within the state may only transfer oil to or from a vessel following receipt and verification of a copy(s) of the certificate(s) issued by the Administrator to the operator of the vessel or owner(s) of or persons accepting responsibility for the oil contained in the vessel, as well as all the oil to be transferred to or from the vessel.

(e) Each marine terminal operator or owner may only transfer oil to a vessel which is intended to be used for transporting oil to a second vessel located within twelve (12) miles of the California shoreline and which is intended to be used for transporting such oil as cargo, following receipt and verification of a copy(s) of the certificate(s) issued to the person(s) responsible for both vessels or all of the oil contained in both vessels, as well as all the oil to be transferred to both vessels.

(f) Each marine terminal operator or owner may only transfer oil from a vessel which has been used for transporting oil cargo from a second vessel located within twelve (12) miles of the California shoreline, following receipt and verification of a copy(s) of the certificate(s) issued to the person(s) responsible for both vessels or all of the oil contained in both vessels, as well as all the oil to be transferred from both vessels.

(g) Each marine terminal operator or owner shall be determined to have met the verification requirements set forth in Subsections (d), (e), and (f) of this regulation, when, at the time of oil transfer, the marine terminal operator or owner has:

(1) obtained verbal verification that the certificate (s) is (are) current and applicable to the vessel(s) and, if applicable, all of the oil contained in or to be transferred to or from the vessel from the person(s) responsible for the vessel(s) or from person(s) responsible for the oil to be transferred to or from the affected vessels or from person(s) authorized to provide this verification; and

(2) visually inspected all relevant manifests or similar documentation (e.g., U.S. Customs Cargo Declarations) to confirm the information ascertained pursuant to Subsection (g)(1), above; and

(3) assured that the information contained in Certificates of Financial Responsibility, required to be obtained pursuant to this subchapter, is

consistent with the information acquired in Subsections (g)(1) and (2), above.

(h) The operator or owner of the marine terminal must retain a copy of the certificate(s) obtained in accordance with Subsections (d), (e), and (f) of this section for a period of not less than one year.

(i) The Administrator shall determine the amount of financial responsibility that owners or operators of small barges, marine facilities, small marine fueling facilities, mobile transfer units, and vessels carrying oil as secondary cargo must demonstrate. The amount shall be based on the procedures described in Subsection 791.7(e)(2) of this subchapter.

(j) The required amounts of financial responsibility in no way restricts or sets financial limitations on any duty, obligation or liability of the responsible party to the State of California or any other public or private entity. This includes civil penalties assessed pursuant to all applicable federal, state and local laws.

(k) Owners or operators of mobile transfer units used exclusively to respond to, contain, and clean up oil spills shall be exempt from the financial responsibility requirements set forth in this subchapter, provided the responsible party or the Administrator agrees to indemnify the owner or operator, or the owner or operator is subject to the qualified immunity provisions set forth in Government Code Section 8670.56.6.

(*l*) Special procedures for owners or operators of offshore marine facilities engaged in drilling operations.

(1) The operator or owner of any offshore marine facility from which drilling operations are being carried out, where the drilling operations may have the potential for resulting in an uncontrolled release of oil from the reservoir into marine waters, shall demonstrate the financial ability to pay for any damages resulting from the operations of the offshore marine facility during an oil spill from the facility or from the drilling operations. The amount shall be based on the procedures described in Subsection 791.7(e)(2)(C).

(2) At such time as an operator or owner described in Subsection (*l*)(1) of this section submits an application to the State Lands Commission or the Division of Oil, Gas and Geothermal Resources in the Department of Conservation for permission to carry out drilling operations which may have the potential for resulting in an uncontrolled release of oil from the reservoir into marine waters, that operator or owner shall apply for and obtain from the Administrator an amended Certificate of Financial Responsibility to reflect the requirements of Subsection (*l*)(1) of this section. The amended certificate shall no longer be required once the drilling operations are completed.

NOTE: Authority cited: Sections 8670.37.51, 8670.37.53(b) and 8670.37.54(b), Government Code. Reference: Sections 8670.37.51–8670.37.57 and 8670.56.6, Government Code.

HISTORY

1. New section filed 8–15–91 as an emergency; operative 8–15–91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12–1–91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12–13–91 as an emergency; operative 12–14–91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4–13–92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12–13–91 order including amendment of subsections (a), (c) and (i) transmitted to OAL 4–10–92 and filed 5–22–92 (Register 92, No. 22).
4. Amendment of section heading, section and NOTE filed 3–23–95; operative 4–24–95 (Register 95, No. 12).
5. Change without regulatory effect amending subsections (i) and (*l*)(1)filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
6. Amendment of section heading and section filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
7. Amendment of NOTE filed 6–26–2003; operative 6–26–2003 (Register 2003, No. 26).
8. Amendment of subsections (a), (e)–(g) and (h) filed 4–17–2006; operative 5–17–2006 (Register 2006, No. 16).

§ 794. Multiple Vessels/Facilities Certifications.

(a) Original certificates shall be issued, one for each tanker, barge or nontank vessel or facility listed on the completed application, following approval of the application by the OSPR.

(b) Total financial responsibility for multiple small barges, multiple marine facilities, multiple small marine fueling facilities, multiple mobile transfer units, or multiple vessels carrying oil as secondary cargo shall be based on the barge, facility, unit, or tanker, barge or nontank vessel which poses the greatest financial risk during an oil spill as determined pursuant to Subsection 791.7(e)(2).

(c) An oil spill or spills occurring from one or more tankers, barges or nontank vessels, or marine facilities within or outside of California marine waters, which cause the certificate holder(s) to be liable for damages exceeding five percent (5%) of the total financial resources reflected by the certificate, as determined by the Administrator, shall cause the Administrator to:

(1) immediately review the certificate holder's financial resources to determine the applicability of this section to the certificate holder and notify the holder of the results of the review prior to issuing a determination that the certificate is inapplicable to any tanker, barge or nontank vessel, or marine facility not associated with the spill; and

(2) where a determination is made that the certificate is inapplicable, provide the certificate holder reasonable time to cease necessary operations; and

(3) consider the certificate inapplicable to any tanker, barge or nontank vessel, or marine facility not associated with the spill.

(d) Operators or owners holding certificates deemed inapplicable to any tanker, barge or nontank vessel, or marine facility not associated with the spill(s), pursuant to Subsection (c) above, shall reapply for a certificate for any or all tanker(s), barge(s) or nontank vessel(s), or marine facility(s) not associated with the spill. Upon reapplication, the operator(s) or owner(s) shall demonstrate to the satisfaction of the Administrator that:

(1) the operator(s) or owner(s) has (have) the amount of financial ability required pursuant to this subchapter; and

(2) the operator(s) or owner(s) has (have) the financial ability to pay all damages which arise or have arisen from the spill or spills which have occurred.

NOTE: Authority cited: Sections 8670.37.54(b), 8670.37.55 and 8670.37.58, Government Code. Reference: Section 8670.37.55, Government Code.

HISTORY

1. New section filed 8–15–91 as an emergency; operative 8–15–91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12–1–91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12–13–91 as an emergency; operative 12–14–91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4–13–92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12–13–91 order including amendment of subsection (c) transmitted to OAL 4–10–92 and filed 5–22–92 (Register 92, No. 22).
4. Repealer of subsection (a), subsection relettering, and amendment of newly designated subsections (a), (b) and (d) filed 3–23–95; operative 4–24–95 (Register 95, No. 12).
5. Change without regulatory effect amending subsection (b) filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
6. Amendment filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
7. Amendment of section and NOTE filed 12–28–99; operative 2–3–2000 (Register 99, No. 53).
8. Amendment of subsections (b), (c), (c)(1), (c)(3) and (d) filed 2–4–2000 as an emergency; operative 2–4–2000 (Register 2000, No. 5). A Certificate of Compliance must be transmitted to OAL by 6–5–2000 or emergency language will be repealed by operation of law on the following day.
9. Reinstatement of section as it existed prior to 2–4–2000 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 31).
10. Editorial correction removing erroneous HISTORY 10 (Register 2001, No. 16).
11. Change without regulatory effect amending NOTE filed 6–24–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
12. Amendment of NOTE filed 6–26–2003; operative 6–26–2003 (Register 2003, No. 26).

§ 795. Evidence of Financial Responsibility.

(a) Insurance.

(1) The whole or portion of the amount of financial responsibility required may be demonstrated by providing evidence that the operator or owner is insured up to the amount determined pursuant to Section 791.7 of this subchapter.

(2) Operators or owners of tankers, barges or nontank vessels or marine facilities, or owners of oil, or persons accepting responsibility for the oil may submit any of the following:

(A) an insurance policy or other documentation, and a certificate of insurance that is acceptable to the Administrator specifying the nature, type, and amount of insurance. At a minimum, the insurance policy or certificate must include the following information:

1. Name and address of insured;

2. Name and principal characteristics of tanker(s), barge(s) or nontank vessel(s) or facility covered;

3. Name and address of insurer(s);

4. Policy number(s);

5. Effective date and term of coverage;

6. All conditions and limitations of the policy or certificate which may affect coverage in the event of discharge of oil;

7. Language that the policy covers damages as specified in Government Code Section 8670.56.5, except as provided in (D) below:

8. Evidence of dollar amounts of insurance policy or certificate of insurance and;

9. Amount of deductibles and/or self–insured retention (SIR).

(B) a certificate of insurance that is acceptable to the Administrator and an endorsement executed by the underwriter or insurer which contains the language set forth in the California standard endorsement. Refer to the Endorsement for Vessels Calling Upon California — Oil Spill Liabilities, FG OSPR Form 1929 (10/05) for endorsements to policies for tankers, barges or nontank vessels; and to Endorsement for Marine Facilities — Oil Spill Liabilities, FG OSPR Form 1962 (10/05) for endorsements to policies for marine facilities (other than mobile transfer units); and to the Endorsement for Mobile Transfer Units and Transportable Treatment Units — Oil Spill Liabilities, FG OSPR Form 1930 (10/05) for endorsements to policies provided as evidence of coverage for mobile transfer units and transportable treatment units, incorporated by reference herein.

(C) similar or comparable evidence of insurance acceptable to the Administrator.

(D) If an insurance policy or broker's cover note is being submitted as as evidence for excess coverage over and above a P&I Club policy, then one of the following is required:

1. Language that the policy covers damages as specified in Government Code Section 8670.56.5(h); or

2. The insurance policy shall be signed by the underwriter and shall state that the insurance policy covers the assured's legal liability for oil pollution claims, and is issued under the same terms and conditions as the underlying P&I Club policy; or

3. The underwriter shall acknowledge in writing that the broker has the authority to include language in the broker's cover note that the insurance policy covers the assured's legal liability for oil pollution claims, and is issued under the same terms and conditions as the underlying P&I Club policy.

When multiple underwriters are providing coverage, the underwriter who sets rates and conditions shall execute the appropriate documents.

(E) If an insurance policy is being submitted for excess coverage over and above the primary policy, then one of the following is required:

1. language that the policy covers damages as specified in Government Code Section 8670.56.5(h); or

2. a copy of the "following form" language which states that the policy is issued under the same terms and conditions as the primary or underlying policy or policies.

(3) Certificants or applicants, whichever is applicable, shall notify the OSPR within five (5) business days of the date such certificant or applicant knows, or has reason to believe, that the policy of insurance submitted as evidence of financial responsibility will be terminated or any coverage thereunder will cease.

(4) At the Administrator's discretion, a deductible provision or self–insured retention (SIR) layer which is greater than $250,000, in any policy of insurance or certificate is only acceptable if:

(A) the applicant shows supplemental coverage for the amount of the deductible or SIR by means of other acceptable insurance, surety, guaranty, self–insurance, letter of credit, or other proof of financial responsibility acceptable to the Administrator; or

(B) the deductible provision provides for a loss reimbursement plan which contains language guaranteeing that the insurer will be responsible for payment of all claims on a first dollar basis, without waiting for the insured to pay the amount of the deductible.

(5) No later than thirty (30) calendar days following the expiration of the current policy period, certificants using insurance as evidence of financial responsibility shall submit a certificate of insurance, or other written documentation acceptable to the Administrator evidencing the renewal of certificant's insurance policy.

Certificant shall also submit additional written documentation acceptable to the Administrator within ninety (90) calendar days. Acceptable written documentation includes a copy of the renewal policy that incudes language that the policy covers damages as specified in Government Code Section 8670.56.5(h); an Endorsement form (FG OSPR Form 1929 (10/05), FG OSPR Form 1930 (10/05), or FG OSPR Form 1962 (10/05); other documentation which contain the minimum information set forth in Subsection (a)(2) above; or similar or comparable evidence of insurance acceptable to the Administrator. Any additional terms or limitations which may affect coverage, including the renewal and new expiration dates, shall be included.

(6) The Administrator may require the certificant to submit a supplemental certificate of insurance executed by the certificant's insurance company and/or the certificant's insurance broker or agent confirming that the certificant's insurance coverage used to demonstrate financial ability remains current and/or agreeing to notify the Administrator within thirty (30) calendar days of cancellation of the policy for any reason.

(7) If an insurance policy is submitted which for any reason cannot be used as evidence of financial responsibility, the applicant must submit a declaration from the underwriter, or a broker designated and authorized by the underwriter, containing the information required in Subsection (a)(2), above.

(8) For insurance coverage to be acceptable, the insurer providing coverage must be licensed or approved by the California Insurance Commissioner to do business in the State of California (i.e., be an admitted company) or, as a minimum, not be named in any order "not to place business with nonadmitted insurer" issued pursuant to Section 1765.1 of the Insurance Code by the California Commissioner of Insurance. The insurer providing coverage must also have a current AM Best rating of at least A–. The Administrator may waive this minimum rating requirement on a case–by–case basis if sufficient evidence such as, but not limited to, the insurer's ability to pay claims is provided.

(b) Qualification as a self–insurer.

(1) An applicant may satisfy financial responsibility requirements by demonstrating, to the Administrator's satisfaction, that the applicant meets the requirements specified in this subsection. To qualify as a self–insurer, the applicant must meet the criteria of either Subsections (b)(1)(A) (Test I), or (b)(1)(B) (Test II) below.

(A) Test I – The applicant must have:

1. one of the following two ratios:

a. a ratio of total liabilities to net worth less than 1.5;

b. a ratio of cash flow (the sum of net income, after taking into consideration the effect of any extraordinary items, plus depreciation, depletion, and amortization) minus $20 million to total liabilities greater than 0.1; and

2. worldwide owners' equity minus intangible assets (i.e., "tangible net worth") equal to at least $20 million plus two times the amount of self–insurance to be established; and

3. assets in the United States amounting to at least ninety percent (90%) of total assets or at least two times the amount of self–insurance to be established.

(B) Test II – The applicant must have:

1. a current rating of the applicant's most recent bond issuance of AAA, AA, A, or BBB– stable or better, as issued by Standard and Poors or Aaa, Aa, A, or Baa as issued by Moody's or commercial paper rating of A1, A2, or the equivalent; and

2. worldwide owners' equity minus intangible assets (i.e., "tangible net worth") of at least $20 million plus two times the amount of self–insurance to be established; and

3. assets in the United States amounting to at least ninety percent (90%) of total assets or at least two times the amount of self–insurance to be established.

(2) Applicants relying upon self–insurance provisions set forth in subsection (b)(1) of this section as evidence of financial responsibility shall submit the following additional documentation to the Administrator with the application:

(A) a letter signed by a financial officer if the applicant is a corporation; a general partner if the applicant is a partnership; or the proprietor if the applicant is a sole proprietorship stating:

1. he or she is a financial officer, general partner, or proprietor (as applicable) of the organization or business entity; and

2. that the letter supports the applicant's use of the financial test to demonstrate financial responsibility in the amount and manner stated (the letter must state the specific amount of financial responsibility being demonstrated by self–insurance and show specifically how the tests have been applied) pursuant to this section; and

3. the applicant or a subsidiary of the applicant is the owner or operator of the tankers, barges or nontank vessels, or facilities described in the applications or the owner of oil; and

4. the applicant or certificant, whichever applies, agrees to notify the Administrator by certified mail within five (5) business days if, at any time, the applicant or certificant fails to meet the self–insurance test criteria.

(B) annual financial statements audited by an independent certified public accountant for the fiscal year ending immediately before each initial application. The applicant may submit, in lieu of audited financial statements, copies of the most recent Form 10–K and any subsequent Forms 10–Q filed pursuant to the Securities Exchange Act of 1934 providing that the Form 10–K includes audited financial statements.

(3) Certificants relying upon self–insurance as the method for demonstrating financial responsibility, and any persons required to demonstrate to the satisfaction of the Administrator that they continue to meet the self–insurance requirements set forth in this section, shall submit annually the letter described in Subsection (2)(A) above and the most current documents described in Subsection (2)(B) above, within thirty (30) days of completion of the audit or forms described in Subsection (2)(B).

(c) Surety bond.

(1) An applicant may demonstrate financial responsibility by obtaining and submitting to the Administrator a surety bond which conforms to the requirements of this subsection. The surety bond form shall be in the form provided by Title 11, California Code of Regulations, Chapter 2, Section 44.2. Refer to bond form titled "Surety Bond for Oil Spill Response and Damages". The surety company issuing the bond must, at a minimum, be among those listed as acceptable sureties on Federal bonds in Circular 570 of the U.S. Department of the Treasury.

(2) Upon written request, the Administrator may waive the thirty (30) day notice period for terminations prior to the bond's expiration date pursuant to item 10 of the bond form with respect to any unloaded tanker(s), barge(s) or nontank vessel(s), covered by the surety bond.

(3) The bond shall contain no additional terms or conditions which limit the surety company's obligation to pay for costs and damages arising under Government Code Section 8670.56.5.

(4) Under the terms of the bond, the bond shall be subject to and governed by the laws of the State of California.

(5) Applicants utilizing surety bonds to demonstrate evidence of financial responsibility shall establish a standby trust fund. The Trust Agreement shall be in the form prescribed by this subchapter. Refer to FG OSPR Form 1926 (3/99) for tankers, barges or nontank vessels/owners of oil and FG OSPR Form 1961 (3/97) for marine facilities, incorporated by reference herein, for approved language. Under the terms of the bond, all payments made thereunder shall be deposited by the surety directly into the standby trust fund in accordance with the Administrator's instructions.

(d) Letter of Credit.

(1) An applicant may satisfy financial responsibility requirements by obtaining and submitting to the Administrator an Irrevocable Standby Letter of Credit in favor of the State of California. The issuing institution must be an entity which is acceptable to the Administrator and which has the authority to issue letters of credit and whose letter of credit operations are regulated and examined by a federal or state agency. The letter of credit shall be in the form prescribed by this section. Refer to FG OSPR Form 1927 (3/97), incorporated by reference herein. The Irrevocable Letter of Credit shall:

(A) be effective on or before the approval date of the Certificate of Financial Responsibility; and

(B) be addressed to the Administrator.

(2) The letter of credit shall contain no additional terms or conditions which limit the issuing institution's obligation to make funds available for costs and damages arising under Government Code Section 8670.56.5.

(3) An applicant utilizing a letter of credit to demonstrate evidence of financial responsibility shall establish a standby trust fund. The Trust Agreement shall be in the form prescribed by this section. Refer to FG OSPR Form 1926 (3/99) for tankers, barges or nontank vessels/owners of oil and FG OSPR Form 1961 (3/97) for marine facilities for approved trust agreement language. Under the terms of the letter of credit, all amounts paid pursuant to a draft by the State of California shall be deposited by the issuing institution directly into the standby trust fund in accordance with the Administrator's instructions.

(e) Guaranty:

(1) An applicant may satisfy the financial responsibility requirements determined pursuant to this chapter by obtaining a written guaranty which conforms to the requirements of this subsection. The Guaranty of Financial Responsibility for Oil Spill Response and Damages shall be in the form prescribed by this section. Refer to FG OSPR Form 1928 (3/97), incorporated by reference herein, for approved language.

(2) Applicants utilizing guarantees to demonstrate evidence of financial responsibility must submit a properly executed guaranty to the OSPR.

(3) Upon written request, the Administrator may waive the thirty (30) day notice period for terminations prior to the guaranty's expiration date pursuant to item 9 of the guaranty form with respect to any unloaded tanker(s), barge(s) or nontank vessel(s) covered by the guaranty.

(4) The guaranty shall contain no additional terms or conditions which limit the guarantor's obligation to pay for costs and damages arising under Government Code Section 8670.56.5.

(5) Except in circumstances where the guarantor itself is a responsible party, no guarantor shall be held liable for any cleanup costs and damages which exceed the amount of financial responsibility that the guarantor has provided.

(6) Applicants utilizing guarantees shall establish a standby trust fund.

(A) The Trust Agreement shall be in the form prescribed by this section. Refer to FG OSPR Form 1926 (3/99) for tankers, barges or nontank vessels/owners of oil and FG OSPR Form 1961 (3/97) for marine facilities for approved language.

(B) Under the terms of the guaranty, all payments made thereunder shall be deposited by the guarantor directly into the standby trust fund in accordance with the Administrator's instructions.

(C) Where the guarantor is the parent corporation of the applicant, the requirement to establish a standby trust fund is waived.

(f) Other evidence of financial responsibility. Applicants may provide other evidence of financial responsibility that is not specifically mentioned in this subchapter and which is acceptable to the Administrator. Acceptable evidence pursuant to this subsection includes, but is not lim-

ited to, documentation that provides proof of entry of each tanker, barge or nontank vessel, into a protection and indemnity club (P&I Club) and which reflects that each entered tanker, barge or nontank vessel, is covered for pollution risk in the amount set forth in Section 791.7 above and which names the applicant as an assured or member, all addenda which pertain to pollution risk and deductibles, and a copy of the applicable P&I Club rules.

(1) At the Administrator's discretion, an applicant submitting evidence of P&I Club cover containing a deductible or similar provision which is greater than $250,000 may be required to submit the following additional proof before applicant's evidence of financial responsibility shall be deemed acceptable:

(A) the applicant shows supplemental coverage for the amount of the deductible by means of other acceptable insurance, surety, guaranty, self-insurance, letter of credit, or other proof of financial responsibility acceptable to the Administrator; or

(B) the deductible provision provides for a loss reimbursement plan which contains language guaranteeing that the P&I Club will be responsible for payment of all claims on a first dollar basis, without waiting for the member to pay the amount of the deductible.

(2) No later than thirty (30) calendar days following renewal of the P&I Club coverage, certificants using P&I Club membership as the method of evidence of financial responsibility shall self certify in writing that the certificant's membership in the P&I Club has been renewed.

Certificants shall also submit additional written documentation acceptable to the Administrator evidencing renewal of the certificant's membership in the P&I Club, no later than ninety (90) calendar days following renewal of the P&I Club coverage. Acceptable written evidence includes a copy of the addendum or renewal certificate of entry, both of which contain the information required by Subsection (f), and any additional terms or conditions which may affect cover, including the renewal and new expiration dates.

(3) If requested by the Administrator, the certificant shall submit documentation executed by the certificant's P&I Club confirming that the certificant's coverage used to demonstrate financial responsibility remains current. The certificant shall agree to notify the Administrator within thirty (30) calendar days, or five (5) days prior to a tanker, barge or nontank vessel entering into the state waters of California, of cancellation of the cover for any reason.

(g) Combination of methods. Any one or a combination of the above-described methods may be utilized to establish the amount of financial responsibility required pursuant to this subchapter.

HISTORY

1. New section filed 8-15-91 as an emergency; operative 8-15-91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12-1-91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12-13-91 as an emergency; operative 12-14-91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4-13-92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12-13-91 order including amendment of subsections (a)(4), (a)(5), (b)(1), (b)(1)(c), (c)(5), (c)(6), (d)(1), (d)(2), (e)(1)(E), (e)(1)(H), (f)(1) and (f)(2) transmitted to OAL 4-10-92 and filed 5-22-92 (Register 92, No. 22).
4. Amendment of section and NOTE filed 3-23-95; operative 4-24-95 (Register 95, No. 12).
5. Renumbering of subsections (b)(1)(A)1.-3., (b)(1)(B)1.-3., and (b)(2)(A)1.-4. filed 6-23-95; operative 7-23-95 (Register 95, No. 25).
6. Change without regulatory effect amending subsection (a)(1) filed 7-12-95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
7. Change without regulatory effect amending subsections (b)(3) and (f) filed 10-21-96 pursuant to Section 100, title 1, California Code of Regulations (Register 96, No. 43).
8. Amendment filed 11-13-97; operative 11-13-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
9. Amendment of section and NOTE filed 12-28-99; operative 2-3-2000 (Register 99, No. 53).
10. Amendment of subsection (a)(2) filed 2-4-2000 as an emergency; operative 2-4-2000 (Register 2000, No. 5). A Certificate of Compliance must be transmitted to OAL by 6-5-2000 or emergency language will be repealed by operation of law on the following day.
11. Change without regulatory effect amending subsections (a)(2)(B) and (a)(5) filed 6-30-2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 26).
12. Reinstatement of section as it existed prior to 2-4-2000 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 31).
13. Amendment of subsection (a)(2)(B), new subsections (a)(2)(E)-(a)(2)(E)2. and amendment of subsections (a)(4), (a)(5), (b)(1)(B)1. and (f)(1) filed 9-17-2001; operative 9-17-2001 pursuant to Government Code section 11343.4 (Register 2001, No. 38).
14. Change without regulatory effect amending subsections (a)(2)(A)7., (a)(2)(D), (a)(2)(E)1. and (a)(5) and amending NOTE filed 6-24-2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
15. Amendment of NOTE filed 6-26-2003; operative 6-26-2003 (Register 2003, No. 26).
16. Amendment of subsections (a)(2)(A)7., (a)(2)(B) and (a)(5) filed 4-17-2006; operative 5-17-2006 (Register 2006, No. 16).

§ 796. Certificate Revocation.

(a) A certificate may be revoked, following (10) ten business days written notice by the Administrator to certificant unless the certificant requests reconsideration as specified in Subsection (d) below, for any of the following reasons:

(1) negligently making an false material statement in connection with an application for or renewal of a certificate; or

(2) failure to establish or maintain evidence of financial responsibility as required by this subchapter.

(b) A certificate may be revoked immediately with concurrent written notice by the Administrator to certificant for any of the following reasons:

(1) when the holder of the certificate is no longer the owner or operator of the tanker, barge or nontank vessel or marine facility, or owner of the oil in question; or

(2) willfully making any false statement in connection with an application for or renewal of a certificate.

(c) Erasures or other alterations to a certificate or copy are prohibited and automatically void a certificate or copy.

(d) Request for Reconsideration.

(1) Certificants may submit a written request to the Administrator requesting reconsideration of any decision to revoke a certificate. Requests must be submitted within ten (10) business days from the date the applicant receives notice of revocation. The Administrator may waive the ten (10) day period for submitting a request.

(2) The request must contain the basis for requesting reconsideration and, if applicable, provide evidence which rebuts the basis for the Administrator's revocation of the certificate. The certificate shall remain valid while the request for reconsideration is reviewed.

(3) Within ten (10) business days from the date the request for reconsideration is received, the OSPR will advise the certificant of the Administrator's decision whether the request will be considered.

(4) Within fifteen (15) calendar days following the notice that the Administrator will consider the request, the certificant will either be sent a notice that the Administrator shall adhere to his or her earlier decision (i.e., deny the request for reconsideration), or the notice of revocation shall be rescinded.

(e) If a certificate is revoked, a new application and fee, if applicable, are required.

NOTE: Authority cited: Sections 8670.37.54(b), 8670.37.56 and 8670.37.58, Government Code. Reference: Sections 8670.37.54-8670.37.56, Government Code.

HISTORY

1. New section filed 8-15-91 as an emergency; operative 8-15-91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12-1-91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12-13-91 as an emergency; operative 12-14-91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4-13-92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12-13-91 order transmitted to OAL 4-10-92 and filed 5-22-92 (Register 92, No. 22).

4. Amendment of subsection (d) filed 3–23–95; operative 4–24–95 (Register 95, No. 12).
5. Amendment filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
6. Amendment of subsection (b)(1) and NOTE filed 12–28–99; operative 2–3–2000 (Register 99, No. 53).
7. Amendment of section heading and section filed 9–17–2001; operative 9–17–2001 pursuant to Government Code section 11343.4 (Register 2001, No. 38).
8. Change without regulatory effect amending NOTE filed 6–24–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
9. Amendment of NOTE filed 6–26–2003; operative 6–26–2003 (Register 2003, No. 26).

§ 797. Reporting and Suspension.

(a) The certificant shall provide written notification to the Administrator of an event which could produce a material change that affects the certificant's ability to comply with the financial responsibility requirement. Such events include, but are not limited to, an oil spill or discharge occurring within or outside of California marine waters from one or more tankers, barges or nontank vessels, or marine facilities or other facilities for which the certificant may be liable for damages, or other significant action against the certificant (e.g., bankruptcy, insolvency). Additionally, the certificants must notify the Administrator in writing of any potential liability that could produce a material change that affects the certificant's ability to comply with the financial responsibility requirement. Written notification must be submitted within ten (10) business days of knowledge of the incident or knowledge of sufficient facts which would lead a reasonably prudent person to investigate and learn of the incidents. For purposes of this subsection, "material change" means an event or action which could cause the certificant to be liable for damages in an amount exceeding five percent (5%) of the total financial resources reflected by the certificate or, if owners' equity exceeds the total amount of financial resources reflected by the certificate, five percent (5%) of the owners' equity.

(b) Upon notification of the oil spill or discharge or other action or potential liability, as required by Subsection 797(a), the Administrator shall reevaluate the validity of the Certificate of Financial Responsibility.

(c) Upon a determination by the Administrator that the certificant lacks sufficient financial resources to assume financial responsibility for both the current spill or liability and have adequate resources remaining available to meet the requirements of this subchapter, the Administrator shall suspend the certificate following ten (10) business days written notice.

(d) Suspension of the certificate shall continue until the responsible party demonstrates, to the satisfaction of the Administrator, that the responsible party has the financial resources needed to meet the requirements of this subchapter.

(e) Request for Reconsideration.

(1) Certificants may submit a written request to the Administrator requesting reconsideration of any decision to suspend a certificate. Requests must be submitted within ten (10) business days from the date the applicant receives notice of suspension. The Administrator may waive the ten (10) day period for submitting a request.

(2) The request must contain the basis for requesting reconsideration, and, if applicable, provide evidence which rebuts the basis for the Administrator's suspension of the certificate. Upon a showing of good cause, the Administrator may reinstate the certificate pending a final decision by the Administrator.

(3) Within ten (10) business days from the date the request for reconsideration is received, the OSPR will advise the certificant of the Administrator's decision whether the request will be considered.

(4) Within fifteen (15) calendar days following the notice that the Administrator will consider the request, the certificant will either be sent a notice that the Administrator shall adhere to his or her earlier decision (i.e., deny the request for reconsideration), or the notice of suspension shall be rescinded.

NOTE: Authority cited: Sections 8670.37.54(b), 8670.37.56 and 8670.37.58, Government Code. Reference: Sections 8670.37.54–8670.37.56, Government Code.

HISTORY

1. New section filed 8–15–91 as an emergency; operative 8–15–91 (Register 92, No. 3). A Certificate of Compliance must be transmitted to OAL 12–1–91 or emergency language will be repealed by operation of law on the following day.
2. Repealed by operation of law and new section filed 12–13–91 as an emergency; operative 12–14–91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 4–13–92 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 12–13–91 order including amendment of subsection (a) transmitted to OAL 4–10–92 and filed 5–22–92 (Register 92, No. 22).
4. Amendment of subsections (a) and (c), new subsection (e), and new forms filed 3–23–95; operative 4–24–95 (Register 95, No. 12).
5. Change without regulatory effect removing FG OSPR Forms 1924 (10/96), 1925 (10/96), 1926 (2/95), 1927 (2/95), 1928 (2/95), 1929 (2/95), 1930 (2/95), 1946 (8/96) and 1947 (8/96) from print filed 10–21–96 pursuant to Section 100, title 1, California Code of Regulations (Register 96, No. 43).
6. Amendment filed 11–13–97; operative 11–13–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 46).
7. Amendment of subsection (a) and NOTE filed 12–28–99; operative 2–3–2000 (Register 99, No. 53).
8. Amendment of subsection (a) filed 2–4–2000 as an emergency; operative 2–4–2000 (Register 2000, No. 5). A Certificate of Compliance must be transmitted to OAL by 6–5–2000 or emergency language will be repealed by operation of law on the following day.
9. Reinstatement of section as it existed prior to 2–4–2000 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 31).
10. Amendment of subsection (a) filed 9–17–2001; operative 9–17–2001 pursuant to Government Code section 11343.4 (Register 2001, No. 38).
11. Change without regulatory effect amending NOTE filed 6–24–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 26).
12. Amendment of NOTE filed 6–26–2003; operative 6–26–2003 (Register 2003, No. 26).

Chapter 3. Oil Spill Prevention and Response Planning

Subchapter 1. Harbor Safety Committees and Harbor Safety Plans

§ 800. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this Subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "Vessels" means any watercraft or ship of any kind, including every structure adapted to be navigated from place to place for the transportation of merchandise or persons.

NOTE: Authority cited: Section 8670.23, Government Code. Reference: Sections 8670.3, 8670.21 and 8670.23, Government Code.

HISTORY

1. New chapter 2, subchapter 1 and section filed 1–12–93; operative 1–12–93 (Register 93, No. 8).
2. Change without regulatory effect renumbering former chapter 2 to chapter 3, amending subchapter 1 heading, adding new first paragraph, repealing subsections (a)–(m) and subsection relettering filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Amendment of subsection (a) and NOTE filed 1–10–2005; operative 2–9–2005 (Register 2005, No. 2).

§ 800.5. Harbor Safety Committees.

(a) The Administrator shall create harbor safety committees for the harbors and adjacent regions of San Diego Bay; Los Angeles/Long Beach Harbor; Port Hueneme; San Francisco, San Pablo, and Suisun Bays; and Humboldt Bay. In consultation with each harbor safety committee, the Administrator shall determine its geographic region of responsibility which shall be clearly reflected in the committee's plan as described in Section 802(b)(2) of this Subchapter.

(b) In the event that a designee of a port authority is not able to participate as a harbor safety committee member due to military affiliations, the

civilian counterpart for that harbor may serve in place of the port authority designee.

(c) All meetings of harbor safety committees, their subcommittees, workgroups or organizations, as defined in Government Code Section 54952, are subject to the open meeting requirements contained in Government Code Sections 54950 through 54962.

NOTE: Authority cited: Sections 8670.23 and 8670.23.1, Government Code. Reference: Section 8670.23, Government Code.

HISTORY

1. New section filed 1–12–93; operative 1–12–93 (Register 93, No. 8).
2. Change without regulatory effect adding new subsection (d) and amending NOTE filed 3–21–95; operative 4–20–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 12).
3. Amendment of subsection (a), repealer of subsection (b), subsection relettering, amendment of newly designated subsection (c) and amendment of NOTE filed 1–10–2005; operative 2–9–2005 (Register 2005, No. 2).

§ 800.6. Harbor Safety Committee Membership.

(a) The Administrator shall appoint to each harbor safety committee, for a term of three years, all of the following members and their alternates:

(1) A designee of each of the port authorities within the region, except that the harbor safety committee for the San Francisco, San Pablo and Suisun Bay region shall have four designees.

(2) A representative of dry cargo vessel operators, except that the harbor safety committee for the San Francisco, San Pablo and Suisun Bay region may have two representatives.

(3) A representative of tank ship operators, except that the harbor safety committee for the San Francisco, San Pablo and Suisun Bay region shall have one additional representative of either tank ship operators or marine oil terminal operators.

(4) For the harbor safety committees for the Los Angeles/Long Beach Harbor region, Port Hueneme region, and Humboldt Bay region a representative of marine oil terminal operators.

(5) A representative of tug or tank barge operators, who is not also engaged in the business of operating either tank ships or dry cargo vessels, except that the harbor safety committees for the San Francisco, San Pablo and Suisun Bay region and Humboldt Bay region shall have one representative of tug operators and one representative of tank barge operators, neither of whom is also engaged in the business of operating either tank ships or dry cargo vessels.

(6) For the harbor safety committees for the San Francisco, San Pablo and Suisun Bay region, Los Angeles/Long Beach Harbor region and San Diego Bay region, a representative of scheduled passenger ferry or excursion vessel operators.

(7) A representative of the pilot organizations within the region, except that the harbor safety committee for the Los Angeles/Long Beach Harbor region shall have two pilot representatives: one a designee of the Port of Los Angeles pilot organization and one a designee of the Port of Long Beach pilot organization. Additionally, the harbor safety committee for the Los Angeles/Long Beach Harbor region have one representative of mooring masters who represents all mooring masters operating within the committee's geographic area of responsibility.

(8) A representative of a recognized labor organization involved with operations of vessels.

(9) A representative engaged in the business of commercial fishing.

(10) A representative of pleasure boat operators or a recreational boat organization.

(11) A representative of a recognized nonprofit environmental organization that has as a purpose the protection of marine resources, except that the harbor safety committee for the Los Angeles/Long Beach Harbor region may have two representatives.

(12) The United States Coast Guard Captain of the Port and a designee of each of the following federal agencies to the degree that each consents to participate on the committee: the United States Army Corps of Engineers, the National Oceanographic and Atmospheric Administration, and the United States Navy.

(13) A designee of the California Coastal Commission, except for the harbor safety committee for the San Francisco, San Pablo and Suisun Bay region, where the Administrator shall appoint a designee of the San Francisco Bay Conservation and Development Commission.

(b) A harbor safety committee may petition the Administrator with a request for new or additional membership positions for special needs to conduct ongoing harbor safety committee business and which reflect the makeup of the local maritime community. The qualifications for such positions shall be set either in committee bylaws or on the petition. The approval of such petitions shall be at the sole discretion of the Administrator.

(c) A harbor safety committee may petition the Administrator for the elimination of new or additional membership positions requested and approved pursuant to Subsection (b). The approval of such petitions shall be at the sole discretion of the Administrator.

(d) The members appointed from the categories listed in Subsections (a)(2), (3), (4), (5), (6), and (7) above shall have navigational expertise. An individual is considered to have navigational expertise if the individual meets any of the following conditions:

(1) Has held or is presently holding a United States Coast Guard Merchant Marine Deck Officer's license.

(2) Has held or is presently holding a position on a commercial vessel that includes navigational responsibilities.

(3) Has held or is presently holding a shoreside position with direct operational control of vessels.

(4) Has held or is currently holding a position having responsibilities for permitting or approving the docking of vessels in and around harbor facilities.

(e) The Administrator shall appoint a chairperson and vice chairperson, for a term not to exceed the balance of their current membership appointment, for each harbor safety committee from the membership specified in Subsection (a) above. The Administrator may withdraw such appointments at his or her sole discretion.

(f) Upon request of the committee chairperson, pursuant to the committee's bylaws, the Administrator may remove a member or alternate appointed under authority of Subsection (a) above.

NOTE: Authority cited: Sections 8670.23 and 8670.23.1, Government Code. Reference: Section 8670.23, Government Code.

HISTORY

1. New section filed 1–10–2005; operative 2–9–2005 (Register 2005, No. 2).

§ 801. General Provisions.

(a) Each harbor safety committee shall be responsible for planning for the safe navigation and operation of vessels within its geographic region of responsibility. As part of meeting this responsibility, each committee shall prepare and submit to the Administrator its harbor safety plan which encompasses all vessel traffic within its region and addresses the region's unique safety needs.

(b) All harbor safety plans shall be consistent with both the California Oil Spill Contingency Plan and the National Contingency Plan.

(c) All harbor safety plans shall be in writing and shall include a reference to any federal, state or local laws or regulations if those laws or regulations were relied upon to develop the plan.

(d) Harbor safety plans which meet the requirements of this subchapter shall be implemented by the Administrator in consultation with the respective committee.

(e) On or before July 1 of each year, each harbor safety committee shall assess maritime safety or security within its region, including tank vessel safety, and shall report its findings and recommendations for improvements to the Administrator by amending its current harbor safety plan or instituting other alternatives to address its findings. All plans shall be reviewed by the Administrator to ensure their compliance with this subchapter.

(f) The Administrator may direct a harbor safety committee to address any issue affecting maritime safety or security, as appropriate, and to report findings and recommendations on those issues.

HISTORY

1. New section filed 1–12–93; operative 1–12–93 (Register 93, No. 8).
2. Amendment of section and NOTE filed 1–10–2005; operative 2–9–2005 (Register 2005, No. 2).

§ 802. Harbor Safety Plan Content.

(a) All harbor safety plans shall be written in consideration of the best achievable protection standard as that term is defined in Chapter 1 of this subdivision.

(b) Each harbor safety plan shall include, at a minimum, a discussion of the following:

(1) Tug Escorts

(A) One section of the plan shall be dedicated to the usage of tug escorts in the committee's geographic region of responsibility.

(B) This section shall allow for a case–by–cast determination of tug escort usage or need based on specified criteria which include, but are not limited to, all of the following factors:

1. the physical limitations of the tugs;

2. an analysis of commonly encountered weather and sea conditions including, but not limited to, wind, tidal and ocean currents;

3. the type of cargo carried by the tank vessel;

4. a determination of whether or not tug escorts are needed for unladen tank vessels; and

5. the effectiveness of tug escorts in steering and/or stopping assistance for heavily laden tank vessels given the geographic and navigational limitations of that region.

(C) This section shall also include, but not be limited to, all of the following:

1. an outline discussing tug boat capabilities when assisting a tank vessel;

2. a recommendation determining when tank vessels must be escorted by tug(s) while entering, leaving, or navigating in the region;

3. a determination of sufficient size, horsepower, and pull capacity of the tug(s) to assure maximum assistance capability;

4. a comprehensive inventory of the number and types of tugs available for tank vessel escort in each geographic region; and

5. an analysis, including factual data and studies relating to the analysis, which specifies the incident and location of accidents and the effects of the absence or presence of tug escorts at the time of those accidents.

(D) Each plan shall address its method for performing a continued study of tug escorts, which will rely in part on relevant information solicited by the harbor safety committee from pilots, masters, representatives from towing industries and builders, and other interested parties.

(2) Geographic Region of Responsibility

This section shall provide a written description of each committee's geographic region of responsibility and shall include a large scale chart, or chartlet, illustrating the entire region. The geographic region of responsibility described and illustrated shall be the one approved by the Administrator as outlined in Section 800.5(a) of this Subchapter.

(3) Regional Harbor Conditions

This section shall provide:

(A) A description of existing and expected conditions of weather, tidal ranges, tidal currents (directions and velocities) and other factors which might impair or restrict visibility or impact vessel navigation;

(B) a description of the procedures for routing vessel traffic, and any contingency or secondary routing plans which may be used during construction and dredging operations;

(C) a description of limitations of current anchorages (designations, proximity to heavily used fairways or channels) and any plans, if developed, to address those limitations; and

(D) a description of the current channel design (navigable channel width and advertised dredged depth) and any proposed changes to these plans.

(4) Vessel Traffic Patterns

This section shall provide, to the greatest extent possible:

(A) A description of the types of vessels which call on the ports or facilities within the region; and

1. identification of the types of cargo transported on the vessels; and

2. a determination of the amount of oil annually (using a three year average) shipped into or from the ports or facilities within the region.

(B) a history and types of all accidents and near–accidents which have occurred within the region during the past three years and any corrective actions or programs taken to alleviate recurrences. For purposes of this subsection, "near–accident" shall mean all situations where a risk of collision as defined by 33 USC 2007 existed;

(C) an assessment of current safety problems or conflicts with small vessels, sailing vessels, or vessels engaged in fishing as it relates to violation of Rule 9 (Narrow Channels Rule) of the Inland Navigational Rules Act (33 USC 2009);

(D) current procedures for routing vessels during emergencies or other contingencies which impact navigation;

(E) a review of existing and proposed federal, state or local laws, regulations or ordinances affecting the region to determine a need for any change;

(F) an assessment of the need for establishing or upgrading existing educational or public awareness programs for all waterway users.

(5) Aids to Navigation

This section shall:

(A) describe any fixed navigational hazards specific to the region and aids to navigation systems in place to minimize risk of contact with these hazards;

(B) evaluate the existing aids to navigation systems available to each region as established and maintained by the United States Coast Guard or other navigational aids as permitted by the United States Army Corps of Engineers, and determine the need for any changes; and

(C) evaluate current programs to determine accurate depth information in navigable channels, anchorages and berths used by tank vessels, and make recommendations necessary to increase the accuracy of such information.

(6) Communication

This section shall:

(A) review and evaluate the adequacy of current ship–to–ship and ship–to–shore communication systems used in the region;

(B) identify any low propagation, or silent areas within the region;

(C) if communication deficiencies exist, develop a strategy to address such deficiencies.

(7) Bridge Management Requirements

(A) This section shall assess the current schedule for bridge openings, the adequacy of ship–to–bridge communications, and the physical limitations affecting vertical and horizontal clearance.

(8) Enforcement

(A) This section shall include suggested mechanisms that will ensure that the provisions of the plan are fully, uniformly and regularly enforced.

(9) Project Funding

This section shall:

(A) provide recommendations for funding projects that the committee intends to recommend or initiate; and

(B) consider the imposition of user fees, and assess existing billing mechanisms as potential funding sources.

(10) Competitive Aspects

This section shall:

(A) identify and discuss the potential economic impacts of implementing the provisions of the harbor safety plan; and

(B) describe the significant differences in the restrictions that could vary from port to port within the region.

(11) Miscellaneous

(A) This section shall address any additional issues deemed necessary by the harbor safety committee that could impact safe navigation in the region including, but not limited to:

1. vessel pilotage;

2. vessel ballast procedures or requirements;

3. vessel mooring requirements;

4. navigation in reduced or restricted visibility; and

5. maintenance dredging necessary for safe vessel operation.

HISTORY

1. New section filed 1–12–93; operative 1–12–93 (Register 93, No. 8).
2. Change without regulatory effect amending subsection (a) filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Amendment of section heading, section and NOTE filed 1–10–2005; operative 2–9–2005 (Register 2005, No. 2).

Subchapter 3. Oil Spill Contingency Plans

§ 815.01. General Outline.

815.03 Purpose and Scope
815.05 Definitions
815.07 General Requirements
816 Plan Submittal, Review and Approval
817.02 Marine Facility Contingency Plans
817.03 Small Marine Fueling Facility Contingency Plans
818.02 Vessel Contingency Plans
818.03 Vessels Carrying Oil As Secondary Cargo Contingency Plans
819 Oil Spill Response Organizations Rating
820.01 Drills and Exercises—Evaluation and Credit

HISTORY

1. New section filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
2. Amendment filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).

§ 815.03. Purpose and Scope.

This subchapter sets forth planning requirements for oil spill prevention and response for tank vessels and marine facilities in California. The planning requirements specify that the owner/operator of a tank vessel or marine facility must own or have contracted for on–water recovery and storage resources sufficient to respond to all spills up to the calculated Response Planning Volume or the defined Daily Recovery Rate, whichever is less. A tank vessel owner/operator shall also demonstrate through contracts(s) or other approved means, the shoreline protection response resources necessary to protect each type of shoreline and all applicable sensitive sites as outlined in the applicable Shoreline Protection Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website). Equipment in addition to that under contract must be identified, and a call–out procedure in place to access additional response resources if needed. For the purpose of meeting the regulatory requirements herein, contracts for booming, on–water recovery and storage, and shoreline protection services can only be made with OSROs Rated by the Office of Spill Prevention and Response. For other required services (e.g., shoreline clean–up, waste management, spill response management) contracts with non–rated OSROs may be used.

The equipment that the owner/operators have available must be applicable to the areas of intended use. This subchapter requires that trajectory analyses be conducted for marine facilities to determine the probable areas of the coastline that could be impacted by a spill. The applicable SP Tables shall be used for tank vessels. Based on these trajectories and tables the owner/operators will be able to ascertain the type of equipment that must be available, such as shallow–water skimmers, as well as the appropriate response strategies necessary to protect and clean up the shoreline types that could be affected. Tank vessel owner/operators shall demonstrate adequate emergency services as described, by sufficient in–house capability or a signed, valid contract with a vessel emergency services provider.

The information required by this subchapter must be submitted to the Office of Spill Prevention and Response (OSPR), and maintained by the owner/operator, in separate volumes. A principal volume will be compiled to contain all the required information, calculations, studies, maps and related data. A separate volume will be set up as a response manual and will contain only the information that response personnel will need at the time of a spill to facilitate the immediate notification and response actions that are mandated.

To the greatest extent possible, California has endeavored to be consistent with the scope and intent of the Federal oil spill response regulations and the Area Contingency Plans (ACP) completed by the U.S. Coast Guard, state agencies, and local governments, with public participation, as required by the Oil Pollution Act of 1990 (33 USC 2701, et seq.). Allowance has been made to accept response plans prepared for the U.S. Coast Guard, or other appropriate agencies, in lieu of some of the information required by this subchapter. Any additional information required by this subchapter can be submitted simply as an addendum to the plans prepared for other agencies. Information developed to demonstrate compliance with other applicable Federal, State, and International (e.g., International Maritime Organization) requirements may be used to demonstrate compliance with all or part of this subchapter.

NOTE: Authority cited: Sections 8670.28 and 8670.29, Government Code. Reference: Sections 8670.3, 8670.4, 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Editorial correction repealing duplicative chapter heading and amending HISTORY 1 (Register 94, No. 42).
3. Change without regulatory effect amending subchapter 3 heading filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
4. Amendment filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
5. Amendment of first and last paragraphs and amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
6. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 815.05. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "*Area Exercise*" means an exercise of the Area Contingency Plan and selected oil spill contingency plans through the combination of tabletop and equipment deployment exercises in accordance with the National Preparedness for Response Exercise Program.

(b) "*Contract or Other Approved Means*":

(1) includes either of the following:

(A) A written, signed contract, or written certification of active membership, between a plan holder and an Oil Spill Response Organization(s) (OSRO) rated by OSPR (as specified in Section 819 of this subchapter) This contract shall identify and ensure the availability of the required personnel and equipment capable of responding to an oil spill within the stipulated response times and in the specified Geographic Regions in which the tank vessel or marine facility operates; or

(B) Written certification that the necessary personnel and equipment are owned or operated by the plan holder and are available within the stipulated response times and in the specified Geographic Regions;

(2) The owner/operator shall notify the Administrator within five days of a change in contracted resources/membership with a local or regional OSRO.

(3) A contract between a plan holder and an OSRO shall not contain a provision requiring the plan holder to notify the OSRO in advance, in order to guarantee response services for two hours and beyond (as specified in Section 819.04(b)(2) of this subchapter) for containment booming and on–water recovery services. It may contain provisions to notify the OSRO 24 hours in advance before entering California marine waters, to meet the 0–12 hour shoreline protection requirement. This advance notice requirement is only for vessels that operate in those areas not identified as High Volume ports. For immediate (less than 2 hours) spill re-

sponse coverage during oil transfer operations, advance notice to the OSRO is also allowed. A plan holder shall comply with all other applicable contractual provisions or the contingency plan will immediately be nullified, and the plan holder will be operating in marine waters without an approved contingency plan, which is in violation of Section 816.06(c) of this subchapter.

(c) "*Dedicated Response Resources*" means equipment and personnel committed solely to oil spill response, containment, and cleanup that are not used for any other activity that would adversely affect the ability of that equipment and personnel to provide oil spill response services in the time frames for which the equipment and personnel are Rated. Ratings of six hours or earlier require either dedicated response resources or OSRO owned and controlled response resources, as specified in Section 819.04(b)(2) of this subchapter.

(d) "*Equipment Deployment Exercise*" means an exercise of oil spill response equipment identified in an oil spill contingency plan or an OSRO application through its actual deployment and operation as it would be used in spill response efforts in an environment of similar water depth, current velocity, tidal range, and substrate, where the equipment may need to be used in an actual oil spill response.

(e) "*Full Scale Combination Exercise*" means an exercise of an oil spill contingency plan involving both the spill management response efforts and the actual deployment and operation of oil spill response equipment as it would be used in spill response efforts at a specific site.

(f) "*Implementation of the Plan*" means that all essential provisions have been taken to enable the plan or any portion of the plan to become operational.

(g) "*Innocent Passage*" means navigation through the territorial sea for the purpose of traversing that sea without entering internal waters or calling at a roadstead or port facility outside internal waters. Passage shall be continuous and expeditious. However, passage includes stopping and anchoring, but only in so far as the same are incidental to ordinary navigation or are rendered necessary by distress or for the purpose of rendering assistance to persons, ships or aircraft in danger or distress.

(h) "*Letter of Approval*" means a letter or other written document issued by the Office of Spill Prevention and Response to the owner/operator of a vessel or marine facility plan holder following verification, inspection and if required by the Administrator, satisfactory performance in an announced and unannounced drill, and final review of the facility or vessel plan holder's contingency plan.

(i) "*Marine Waters*" means those California marine waters subject to tidal influence and includes all waterways used for waterborne commercial vessel traffic to the Port of Stockton and the Port of Sacramento.

(j) "*Non–Dedicated Response Resources*" means those response resources listed by an OSRO for oil spill response activities that are not dedicated response resources.

(k) "*OSRO–owned and controlled resources*" means equipment owned by the OSRO and personnel who are employed directly by the OSRO.

(*l*) "*OSRO Rating Letter*" (ORL) means a written document issued by the Office of Spill Prevention and Response to an OSRO following verification, inspection and unless exempted by the Administrator, satisfactory performance in an announced and unannounced drill, and final review of the OSRO's application.

(m) "*Plan Holder*" means the owner/operator of a tank vessel, nontank vessel, marine facility, small marine fueling facility, or vessel carrying oil as secondary cargo responsible for the development, submittal, update, maintenance of, and compliance with the oil spill contingency plan required under this subchapter.

(n) "*Plan Recipient*" means a receiving agency and any other entity that has been designated in this subchapter to receive a copy of the vessel or marine facility oil spill contingency plan.

(o) "*Shallow–Draft Vessel*" means:

(*1*) for purposes of boom deployment, a vessel that must be able to operate in water depths of two feet or less;

(2) for purposes of skimming operations, a vessel and attendant skimming system that must be able to operate in water depths of three feet or less.

(p) "*Spill Management Team*" means the personnel identified in an oil spill contingency plan to staff the organizational structure that will manage response implementation and is able to fully integrate into an Incident Command/Unified Command structure, as required by the National Contingency Plan and the State Marine Oil Spill Contingency Plan.

(q) "*Systems Approach*" means an assessment of the infrastructure and the support resources that an OSRO must have to mobilize, transport, deploy, sustain, and support the equipment resources necessary for the level of response for which Rated.

(r) "*Tabletop Exercise*" means an exercise of an oil spill contingency plan and the spill management response efforts without the deployment of response equipment. A tabletop exercise usually involves the enactment of a response to a simulated spill.

(s) "*Unannounced Drill*" means an exercise of an oil spill contingency plan or an OSRO application initiated by OSPR without prior notice to the plan holder or oil spill response organization.

NOTE: Authority cited: Sections 8670.28, 8670.29 and 8670.30, Government Code. Reference: Sections 8670.3, 8670.28, 8670.29 and 8670.30, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Change without regulatory effect amending section filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Amendment of section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
4. Change without regulatory effect amending subsections (c) and (m) and amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
5. Amendment of section and NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
6. Amendment of subsections (b)(1)(A) and (b)(2)–(3), repealer and new subsection (g) and amendment of subsections (h), (i) and (n) filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).
7. Amendment of subsection (b)(3) filed 10–12–2007 as an emergency; operative 10–12–2007 (Register 2007, No. 41). A Certificate of Compliance must be transmitted to OAL by 4–9–2008 or emergency language will be repealed by operation of law on the following day.
8. Reinstatement of section as it existed prior to 10–12–2007 emergency amendment by operation of Government Code section 11346.1(f) (Register 2008, No. 18).
9. Amendment of subsection (b)(3) filed 4–28–2008 as an emergency; operative 4–28–2008 (Register 2008, No. 18). A Certificate of Compliance must be transmitted to OAL by 7–28–2008 or emergency language will be repealed by operation of law on the following day.
10. Certificate of Compliance as to 4–28–2008 order transmitted to OAL 7–25–2008 and filed 8–6–2008 (Register 2008, No. 32).

§ 815.07. General Requirements.

(a) Plan holders shall only contract with an OSRO(s) that has received a Rating by OSPR (as specified in Section 819 of this subchapter) for the booming, on–water recovery and storage, and shoreline protection services required. An OSRO's existing Letter of Approval issued from the Administrator shall remain valid unless revoked and shall be deemed to meet the requirements of this subchapter for three years from the date of the letter's issuance.

(b) No person shall load oil onto, nor unload oil from a tank vessel unless the following conditions are met prior to transfer operations:

(1) after initial submittal but prior to approval of the contingency plan, the tank vessel owner/operator must provide the owner/operator of the marine terminal with a copy of the letter acknowledging the receipt of the tank vessel's oil spill contingency plan by the Administrator, if the terminal owner/operator does not already have such a letter on file;

(2) after approval of the initial submittal of the contingency plan, the owner/operator of the tank vessel must provide the owner/operator of the marine terminal with a copy of the letter approving the current oil spill contingency plan for that tank vessel if the terminal owner/operator does not already have such a letter on file;

(3) the tank vessel owner/operator must notify the terminal owner/operator of any change in the approval status not reflected by the letter on file at that terminal; and

(4) the owner/operator of the tank vessel must certify that a complete copy of the response manual for that tank vessel is on board the tank vessel.

(c) Each plan shall provide for the best achievable protection of coastal and marine resources and shall ensure that all areas addressed by the plan are at all times protected by prevention, response, containment and clean-up equipment and operations.

(d) Each plan shall be consistent with the State Marine Oil Spill Contingency Plan and not in conflict with the National Oil & Hazardous Substances Pollution Contingency Plan, or the applicable Federal Area Contingency Plans.

(e) Nothing in this subchapter shall, in any manner or respect, impair or limit the authority of the California Coastal Commission to review federal activities, federal development projects, or federally–permitted or licensed activities, as authorized pursuant to the Coastal Zone Management Act of 1972 (16 U.S.C., Section 1451 et seq.). Nor shall this subchapter impair or limit the authority of the California Coastal Commission to ensure such activities or projects are performed in a manner that is consistent, to the extent required by applicable law, with the enforceable policies of the California Coastal Management Program.

(f) All plans must be written in English, and for tank vessel plans, if applicable, the response manual portion shall also be in a language that is understood by the crew members responsible for carrying out the plan.

NOTE: Authority cited: Sections 8670.28, 8670.29 and 8670.30, Government Code. Reference: Sections 8670.28, 8670.29 and 8670.30, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of subsections (a)(1)–(4), (d) and (f) and repealer of subsection (g) filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Change without regulatory effect amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
4. New subsection (a), subsection relettering and amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
5. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 816. Plan Submittal, Review and Approval.

HISTORY

1. New heading filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).

§ 816.01. Plan Submittal.

(a) Plans

Unless otherwise exempt, each owner/operator of a tank vessel or marine facility shall prepare and submit an oil spill contingency plan for that tank vessel or facility. The plan may be specific to an individual facility or tank vessel or may be composed as follows:

(1) Marine Facility Blanket Plans

(A) Blanket contingency plans may be submitted for marine facilities that are substantially similar to one another based on the criteria in this subsection. The owner/operator must request approval for the use of a blanket plan prior to submitting the plan to the Administrator. The request must include a justification for the use of a blanket plan based on the criteria outlined in this subsection.

(B) The Administrator shall determine whether a blanket plan is appropriate for any given group of marine facilities. In order to utilize a blanket plan, each marine facility covered by the blanket must demonstrate the following:

1. each facility must be substantially similar in layout and design, or must be an integral part of another facility, such as the pipeline connecting a platform to a shoreside facility;

2. each facility must handle the same products;

3. the Risk and Hazard Analysis for each facility must show substantially similar risks of a spill, and similar sites of potential leakage or spills;

4. the response equipment and personnel must be able to respond to any and all of the covered marine facilities in the same or essentially the same amount of time;

5. any spill from any of the marine facilities must pose similar risks in the same or essentially the same Geographical Region, including risks to the same environmentally, economically or culturally sensitive sites; and

6. The prevention measures as specified in Subsections 817.02.(c) or 817.03(c) must be substantially the same for each facility.

(C) A separate appendix for each marine facility covered by the Blanket Plan must be included as an attachment to the plan.

(2) Tank Vessel Fleet Plans

Fleet contingency plans may be submitted by an owner/operator that has a number of tank vessels that transit the same or substantially the same routes in California marine waters.

(A) All prevention and response elements required pursuant to Sections 818.02(c) or 818.03(c) must be the same for the tank vessels included in the Fleet Plan.

(B) A separate appendix for each tank vessel covered by the Fleet Plan must be included as an attachment to the plan.

(3) Substitute Plans

(A) Plans of other Federal and State Agencies

Any plan, or appropriate section thereof, submitted to the Federal Environmental Protection Agency, the Minerals Management Service, the U.S. Coast Guard, the Department of Transportation – Research and Special Programs Administration, the California State Lands Commission, the California Coastal Commission, other states, or other appropriate agencies may be submitted in substitution for all or part of the plan required under this subchapter. This substitution may include documents submitted in compliance with the International Safety Management (ISM) Code. Any information required by this subchapter that is not included in the substitute plan must be submitted as an appendix to that plan. The Administrator will determine if the use of a substitute plan is appropriate prior to final plan approval.

(B) OSRO Rating Letter:

An OSRO Rating Letter will be issued for the equipment, personnel, and services which may be provided to the owner/operator of a marine facility or tank vessel or nontank vessel. A copy of the Rating letter may be referenced or submitted in substitution for all or part of the response elements required under Sections 817.02, 817.03, 818.02 or 818.03.

1. An OSRO Rating does not guarantee the performance of an OSRO, nor does the use of an OSPR–Rated OSRO in a contingency plan relieve the plan holders of their ultimate statutory and regulatory responsibility to ensure the adequacy of the spill response resources identified in their contingency plan.

(b) Timeframes:

(1) A marine facility shall submit a plan that is received by OSPR at least 180 days prior to the beginning of operations. Changes in ownership of a marine facility will require a new plan to be submitted at least 60 days prior to the change in ownership.

(2) A tank vessel shall submit a plan that is received by OSPR at least five working days prior to entering California marine waters.

(c) Receiving Agencies:

(1) One copy of the plan (either hard copy or electronic media — see Section 816.02) for each marine facility and each tank vessel shall be delivered to the Marine Safety Branch of the Office of Spill Prevention and Response (OSPR) of the Department of Fish and Game. Delivery of the plan may be in person or by registered mail with return receipt requested, or the equivalent. Additional hard copies shall be provided to an OSPR regional office upon request.

(2) Two copies of the plan (hard copy or electronic media) for each marine facility shall be delivered by the plan holder to the California State Lands Commission.

(3) Within two working days of a request from the Administrator, additional copies (hard copy or electronic media) shall be mailed by the plan holder to other member agencies of the State Interagency Oil Spill Committee and the State Oil Spill Technical Advisory Committee.

(4) Any additional copies shall be submitted within 2 working days of a request by the Administrator.

(d) Confidentiality

(1) A plan holder may request that proprietary information be kept confidential. Such a request must include justification for designating the information as confidential. The Administrator will make a determination regarding that information which may be considered confidential and removed from any copy of the plan that is made available for public review.

(A) A plan holder may also request that any reports or studies prepared or submitted under any contingency plan requirements be designated as proprietary information. Such a request must include justification for

[The next page is 200.15.]

designating the report or study, such as drill reports or any background information developed for the risk and hazard analysis, as confidential.

(2) Any information designated as confidential must be clearly identified as proprietary.

(3) If a plan holder designates information as confidential, two different copies of the plan must be submitted as follows:

(A) one copy must contain the confidential information. This plan will be utilized by the Administrator in the review and approval process;

(B) one copy must be submitted with the confidential information removed. This copy will be available for public review. This plan must contain sufficient information in place of the confidential information so that any individual reviewing the plan will understand all the notification, prevention and response elements of the plan.

(C) Any plan submitted to any state agency, as required by this section, must include all confidential information.

NOTE: Authority cited: Sections 8670.28, 8670.29, 8670.30 and 8670.31, Government Code. Reference: Sections 8670.28, 8670.29, 8670.30, 8670.31 and 8670.36, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Change without regulatory effect amending subsection (a)(3)(A) and amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
4. Amendment of subsection (a)(3)(C), new subsection (a)(3)(C)1. and amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
5. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 816.02. Plan Format.

OSPR will accept either an original hard copy of the contingency plan or a CD–ROM formatted contingency plan with an original, signed copy of the "Feasibility and Executability Statement" required by this subchapter. Other documents required to be submitted with the contingency plan, such as signed contracts with Oil Spill Response Organizations, may be scanned on the CD using Adobe Acrobat. Although not required, it is requested that the Table of Contents be linked to the different sections of the plan. Also, if a Federal Vessel Response Plan (VRP) or other non–California plan format it used, it is requested that the plan be electronically linked to the plan sections that comply with California's requirements. Each plan shall be organized into separate volumes: a response manual and a principal volume or volumes with related appendices. The format for each is outlined below:

(a) Response Manual

A simplified response manual suitable for on–scene use in the event of a spill which summarizes key notification information and the initial response actions specified in the plan shall be prepared and submitted with each plan.

(1) The response manual is a subset of the information provided in the principal volume of the plan.

(2) The information contained in the response manual shall be sufficient to direct on–scene response personnel through the first 24 hours of a response.

(b) Principal Volume of the Plan

(1) The principal volume shall include all the required information including a summary of the conclusions of all studies, calculations and analyses.

(2) The principal volume of each plan shall be organized to facilitate access to information, and shall include:

(A) a detailed table of contents with chapters arranged, to the extent possible, in the same order in which the requirement for that information appears in Sections 817.02, 817.03, 818.02 or 818.03;

(B) a system of numbered chapters, sections and appendices;

(C) index tabs for locating plan chapters;

(D) a log sheet placed in the front of the plan for recording all amendments and updates; and

(E) amendments and updates that are consecutively numbered and dated.

(3) If hard copies of the plan are submitted, they shall be submitted in an 8 1/2 by 11 inch 3–ring binder, in a loose–leaf format to allow replacement of chapter or appendix pages without requiring replacement of the entire plan. Amendments and updates shall be hole–punched and in a format that will fit the binder that was submitted with the plan.

(4) If a fleet or blanket plan is used, the principal volume of the plan will include all the information generic to all the marine facilities or tank vessels covered by the plan.

(5) All hard copy and electronic documents submitted will become the property of the Administrator. The documents will be retained by the Administrator for a minimum of three (3) years, unless the contingency plan is withdrawn by the submitter.

(c) Appendices

(1) Tank Vessel–Specific Appendix

If a fleet plan is used, each plan must include an appendix for each tank vessel covered by the plan. The vessel–specific appendix must provide the descriptive information regarding layout and design unique to that tank vessel.

(2) Marine Facility–Specific Appendix

If a blanket plan is used each plan must include an appendix for each marine facility covered by the plan. The facility–specific appendix must address all the required information unique to that facility.

(3) Geographic–Specific Appendix to Tank Vessel Plans

Each tank vessel plan must include an appendix to address the geographic–specific elements along the tank vessel's normal routes of travel. This appendix must include:

(A) all required notification information for each Geographic Region in which the tank vessel operates;

(B) identification of the oil spill response organizations to be used in each of the six Geographic Regions, as defined in Chapter 1, Section 790 of this subdivision, along the tank vessel's normal routes of travel; and

(C) a copy of the written contract or other approved means (as defined in Section 815.05(b) of this subchapter) that will verify that the oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill.

(d) Substitute Plans

If a substitute plan is submitted, such as a plan prepared for the State Lands Commission, the Minerals Management Service, the California Coastal Commission, or the United States Coast Guard, the following must also be submitted:

(1) a listing of all the elements of the individual tank vessel or marine facility's contingency plan that will be replaced by elements in the substitute plan, with an index specifying the location of the required elements, by regulation section, within the substitute plan;

(2) any required prevention or response element not included in the substitute plan must be submitted as an appendix to the substitute plan; and

(3) a copy of the response manual required by this section.

NOTE: Authority cited: Section 8670.28, Government Code. Reference: Section 8670.28, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Editorial correction of subsection (d)(1) (Register 95, No. 41).
3. Amendment of section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
4. Change without regulatory effect amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
5. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 816.03. Plan Review and Approval.

(a) Timeframes

(1) Each Plan shall be approved or denied within 180 days after receipt by the Administrator.

(2) Any state agency or committee that reviews the contingency plans shall submit any comments to the Administrator within 60 days of receipt of the plan by the agency or committee.

(3) The Administrator shall determine whether each plan complies with the regulations governing the contingency planning process. If it is determined that a plan is inadequate a written explanation of deficiencies, and, if practicable, suggested modifications or alternatives shall be sent to the plan holder.

(4) Upon notification of a plan's deficiencies, the plan holder will have 90 days to submit a new or modified plan. Such a re–submittal shall be treated as a new submittal and processed according to the provisions of this section.

(b) Determination of Adequacy

(1) A plan will be determined to be adequate if it provides for the best achievable protection of coastal and marine resources and meets the requirements of this subchapter. To be approved, the plan must also demonstrate that each owner/operator maintains a level of readiness that will allow for effective implementation of the plan.

(2) To be determined adequate, each plan shall provide for all of the following:

(A) Prevention Measures:

1. for marine facilities, all prevention measures to reduce or eliminate the hazards that could result in an oil spill as identified in the Risk and Hazard Analysis;

2. for tank vessels, all prevention measures to reduce the possibility of an oil spill occurring as a result of allisions, collisions, groundings, explosions or operator error;

(B) immediate notification and mobilization of response resources upon the discovery of a spill;

(C) procedures for deployment and delivery of response equipment and personnel within the timeframes specified in Sections 817.02, 817.03, 818.02 or 818.03;

(D) procedures to assure protection of the environment from oil spills;

(E) procedures for timely and adequate cleanup of all spills, up to and including the reasonable worst case spill;

(F) identification of response equipment, and the call–out procedures to acquire that equipment, to respond to any spill over and above the reasonable worst case spill, in a timely and efficient manner.

(G) all other prevention and response measures specified in Sections 817.02, 817.03, 818.02 or 818.03.

(3) In assessing the adequacy of a plan the Administrator shall consider:

(A) the volume and types of oil addressed by the plan;

(B) the history and circumstances of prior spills from the tank vessel, marine facility, small marine fueling facility, or vessel carrying oil as secondary cargo;

(C) existing operating hazards;

(D) the sensitivity and value of the natural, cultural and commercial resources of the geographic area encompassed by the plan;

(E) the spill prevention, notification and response measures addressed in the plan; and

(F) the site–specific characteristics of a marine facility that could affect response and cleanup operations, including: local topography, prevailing winds, current speed and direction, tidal fluctuations, and access to the potential spill sites; or

(G) the area–specific characteristics along a tank vessel's normal routes of travel that could affect response and cleanup operations, including: prevailing winds, current speed and direction, tidal fluctuations, and access to the potential spill response sites.

(4) Prior and subsequent to plan approval, the Administrator may make an on–site inspection and require a drill of all or part of any contingency plan submitted in order to determine the plan's adequacy.

(c) Public Review and Comment

Contingency plans will be made available for review by any interested member of the general public at a designated location.

(1) Any person interested in reviewing the plan shall contact the Administrator to request an appointment to review the plan at the office of OSPR. Copies of the plans will be provided at the cost of duplication.

(2) Any interested person may review a plan and submit written comments prior to the Administrator's approval of the initial plan or plan updates. Such comments will be taken into consideration in the Administrator's approval process. No comments will be accepted after final approval.

(d) Plan Approval

(1) A plan shall be approved if it addresses all the elements specified in Sections 817.02, 817.03, 818.02, or 818.03, as appropriate, and complies with the adequacy criteria enumerated in this section.

(2) Any revised plan submitted by an owner/operator in response to a notification of inadequacy shall be considered approved unless otherwise notified by the Administrator within the timeframes established in Section 816.03(a).

(3) Any comments submitted by other agencies or interested parties shall be considered when approving or disapproving the plan.

(4) The plan holder shall be notified when a plan has been approved. A Letter of Approval will be issued by the Administrator and will describe the conditions of approval, if any, and specify the expiration date of the Letter of Approval.

(5) A plan will be considered to be effective upon submittal unless and until the owner/operator is notified that the plan is inadequate. Exceptions to this requirement will be considered by the Administrator on a case–by–case basis.

(e) Interim Approval

(1) A plan may be approved with minor deficiencies as long as the following requisite elements are included in the plan:

(A) Information to clearly identify the tank vessel or marine facility, including but not limited to:

1. for tank vessels: vessel name, call sign, official number, classification and owner/operator name, address and phone number;

2. for marine facilities: name and address of facility, name, address and phone number of the owner/operator.

(B) A copy of the contract(s) or other approved means for the response resources that meet the requirements of this subchapter;

(C) Identification, including telephone number and facsimile number, of a Qualified Individual;

(D) Appropriate and adequate evidence of financial responsibility.

(2) An Interim Approval shall only remain valid for 30 calendar days.

(f) Denial or Revocation of Plan

(1) Approval shall be denied or revoked if a plan does not comply or maintain compliance with the criteria set forth in this Section (816.03).

(2) If approval is denied or revoked, the Administrator shall notify the plan holder in writing of the reasons for denial or revocation and provide an explanation of those actions necessary to secure approval.

(A) The plan holder shall have 90 calendar days from notification to submit a new or revised plan that incorporates the recommended changes, during which time the plan is considered effective pending final approval. If the plan holder fails to address plan deficiencies within 90 calendar days of notification, the plan may be denied a second time.

(B) No tank vessel shall operate in marine waters if it fails to gain approval of its contingency plan after the second submission, or if a second denial was issued as noted in (A) above, until a subsequent submission is approved.

(C) If a marine facility fails to gain approval of its contingency plan after the second submission, or if a second denial was issued as noted in (A) above, the administrator may order it to discontinue operations until a subsequent submission is approved.

(D) If a plan holder fails to address plan deficiencies within 90 calendar days from notification of a second plan denial, the Administrator may, without further notice, declare the plan null and void.

(g) Appeals

The plan holder may appeal a decision made by the Administrator regarding the contingency plan in accordance with the following provisions:

(1) the plan holder may submit a written request for reconsideration to the Administrator regarding any decision of interim approval, denial, revocation of approval, or a request for exemption. Requests must be submitted within 15 working days from the date the plan holder receives notice that approval of the plan has been denied. The request must contain the basis for the reconsideration and, if available, provide evidence which rebuts the basis for the Administrator's decision regarding the plan;

(2) within 15 working days following the receipt of the request for reconsideration, the plan holder will either be sent a notice that the Administrator shall adhere to the earlier decision or that the decision has been rescinded;

(3) the plan holder may, within 15 working days after receipt of notice that reconsideration has been denied, request a hearing in writing. No such hearing may be requested unless and until all remedies pursuant to this section have been exhausted. The Administrator shall conduct a reconsideration hearing upon request;

(4) the proceedings and hearings under this section shall be conducted in accordance with Chapter 4.5 (commencing with Section 11400) of Part I of Division 3 of Title 2 of the Government Code, including the right of judicial review as provided for in Section 11460.80 of the Government Code.

(h) Proof of Approval

(1) Marine Facilities

The marine facility plan holder shall keep the Letter of Approval, or a copy certified to be true and accurate, filed in the front of the approved contingency plan. The approval letter shall be presented upon request to any representative of the Administrator.

(2) Tank Vessels

The Letter of Approval shall be presented upon request to the operator of a marine facility prior to an oil transfer.

(i) Liability

Approval of a plan does not constitute an express assurance regarding the adequacy of the plan in the event of a spill nor does it constitute a defense to liability on the part of the operator or owner.

(j) Coastal Protection Review

(1) Within one year of the adoption of this section, and within 18 months of subsequent updates, the Administrator shall conduct a comprehensive review of all the oil spill contingency plans for tank vessels and marine facilities.

(2) The comprehensive review shall be conducted to assure that the plans, as a whole, provide the best achievable protection of coastal resources. Each plan will be reviewed in conjunction with all the plans submitted by tank vessels and marine facilities located in or using the same Geographical Region. The Geographic Regions to be used for the review of overall coastal protection are defined in Chapter 1, Section 790 of this subdivision. .

(3) The Administrator shall evaluate the contingency plans for each Geographical Region to determine if deficiencies exist in equipment, personnel, training and other elements determined to be necessary to ensure the best achievable protection for that region.

(4) If deficiencies are found to exist in overall protection, the Administrator shall remand any contingency plans to the plan holder with recommendations for any amendments necessary to adequately protect coastal resources in that Geographical Region. Any plans returned for amendment shall be processed according to the procedures for initial submittal, review and approval of the contingency plan.

NOTE: Authority cited: Sections 8670.19, 8670.28 and 8670.31, Government Code. Reference: Sections 8670.19, 8670.28 and 8670.31, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Change without regulatory effect amending subsection (j)(2) and repealing subsections (j)(2)(A)–(G) filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Amendment of section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
4. Change without regulatory effect amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
5. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 816.04. Plan Implementation and Use.

(a) Availability

(1) Marine Facility Plans

(A) A complete copy of the marine facility's approved plan must be maintained on–site if the facility is staffed, or at the nearest field office if the facility is not staffed.

(B) A copy of the response manual must be maintained at all sites covered by the plan.

(C) Response manuals for pipeline facilities shall be maintained at all sites covered by the plan or where operations and maintenance activities are conducted.

(2) Tank Vessel Plans

(A) A complete copy of the tank vessel's contingency plan, including the response manual, must be maintained by the owner/operator.

(B) A complete copy of the tank vessel's approved response manual must be maintained on board the tank vessel at all times.

(3) The plan, or response manual, whichever is required, must be in a central location accessible to key response personnel at all times.

(4) A complete copy of the contingency plan, including the response manual, must be maintained by the Qualified Individual and available for use in the event of an incident.

(5) A complete copy of the contingency plan, including the response manual, must be maintained by the owner/operator and made available for review and inspection by all relevant state agencies upon request.

(6) Immediate Notification Information

(A) Immediate response and notification information shall be summarized and posted in a conspicuous location with access to a telephone, or other similar means of communication.

(b) Implementation

(1) Each plan shall be effective upon submittal. Any element of the plan that can not be implemented upon submittal must be covered by a timetable for implementation. Elements included in the timetable may include such items as the purchase of equipment, or the implementation of specific prevention measures. The timetable must also include an explanation for the delay, and provide for full implementation within six months of plan submittal, unless an extension is authorized by the Administrator.

(2) The owner/operator must implement the plan according to any timetable submitted as part of the plan.

(3) An owner/operator, or any of his/her agents and employees shall use and implement the effective plan in the event of an oil spill or an oil spill drill.

(4) Any deviation from any major element of the contingency plan must be approved by the Administrator in advance of the change. A major element is one that will affect timely and adequate oil spill response.

(5) All involved parties, as defined, shall carry out whatever direction is given by the Administrator in connection with the response, containment, and cleanup of a spill. A responsible party or potentially responsible party may refuse to accept a directive from the Administrator if:

(A) the directions of the Administrator are in direct conflict with directions from the Federal On–scene Coordinator; and/or

(B) the party reasonably, and in good faith, believes that the directions or orders given by the Administrator will substantially endanger the public safety or the environment.

(6) If a party refuses to accept the directive of the Administrator, the party shall state the reason why they have refused at the time of refusal, and:

(A) the party that has refused a directive shall follow up a verbal explanation of their refusal with a written notice to the Administrator explaining in full the reason(s) for refusing the directive. The written notice must be submitted within 48 hours of the refusal;

(B) the burden of proof shall be on the party to demonstrate, by clear and convincing evidence, why refusal to follow orders was justified.

(7) Failure to implement the plan appropriately shall constitute a violation of this subchapter.

(c) Coordination With Other Plans

(1) Each plan shall be consistent with the State Marine Oil Spill Contingency Plan and not in conflict with the National Contingency Plan.

(2) Beginning with the first review and resubmission, each plan submitted shall be consistent with the appropriate Area Contingency Plan(s) completed by the Coast Guard, State Agencies, and Local Governments as required by the Oil Pollution Act of 1990 that are in effect on January 15 of the year in which the contingency plan update is required.

NOTE: Authority cited: Sections 8670.28 and 8670.31, Government Code. Reference: Sections 8670.27, 8670.28, 8670.28.5, 8670.29, 8670.30(a)(2) and 8670.57–8670.69.6, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of subsections (a)(1), (a)(4), (b)(1), (b)(7) and (c)(2) and amendment of NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Change without regulatory effect amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
4. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 816.05. Plan Updates.

(a) Timeframes

(1) Update and Review

(A) All plans shall be resubmitted for review on April 1, 1996, and on April 1, 1998, and then once every five years thereafter from the date of approval.

1. A complete new plan must be resubmitted for review only if there have been changes to the original plan or updates since the last submittal. If the original plan or submitted updates have not changed, or the relevant Area Plan has not been amended, the owner/operator may submit a letter to the Administrator stating that the plan currently on file with the OSPR is up–to–date and complete.

(B) The Administrator may require earlier or more frequent resubmission than that required in subparagraph (A). The owner/operator shall be notified in writing if an earlier update is required. The notice shall include an explanation for the reasons for the update. The circumstances that would warrant an earlier review or update include, but are not limited to, the following:

1. a change in regulations;

2. the development of new oil spill response technologies as determined by the Administrator during any review of Response Capability Standards;

3. deficiencies identified in the Administrator's review of all the oil spill contingency plans as part of the Coastal Protection Review;

4. an increased need to protect plant and wildlife habitat;

5. deficiencies in oil spill response capability identified during an oil spill;

6. deficiencies in oil spill response capability identified during an oil spill drill;

7. significant changes to the tank vessel or marine facility; and

8. any other situation deemed appropriate by the Administrator where deficiencies in the ability to provide timely and effective oil spill response are identified.

(2) Unscheduled Updates

(A) The Administrator shall be notified as soon as possible, but at least within 24 hours, of any significant change or update to an approved plan.

1. A significant change is one that could affect timely and adequate oil spill response including changes in tank vessel ownership and Financial Responsibility coverage.

2. Changes which are not significant include minor changes in equipment, personnel, or operating procedures which do not affect timely and adequate oil spill response.

3. As soon as administratively feasible, the Administrator will approve any change that would benefit the public health and safety, improve environmental protection, or facilitate more effective response, containment and cleanup.

(b) Review and Approval of Plan Updates

(1) The Administrator may deny approval of a resubmitted plan, or updated section(s) of a plan if it is no longer adequate according to the adopted regulations and policies in effect at the time of resubmission.

(2) The review will be processed in accordance with the same timeframes and procedures for submission of the initial plan.

(c) Logging and Distributing the Revised Plan

(1) The plan holder shall distribute the revised plan page(s) to all plan recipients within 15 days of the Administrator's approval of the revisions. Faxed updates for insertion into the plan are not acceptable.

(2) The updated page(s) shall have an update number and date revised on the bottom of each page, and shall be accompanied by an index of updates that includes update number, date revised, page(s) revised, and subject matter of update. As an alternative to the hard copy, this information may be submitted on electronic media, in a format approved by the Administrator (see Section 816.02(b)(3)).

(3) The log sheet, located in the front of the plan, shall be used to record the date the amendment was received, the initials of the individual who received the amendment, and a description of the change.

(d) Each plan recipient must incorporate and utilize all updated materials as provided by the plan holder.

NOTE: Authority cited: Sections 8670.28 and 8670.31, Government Code. Reference: Sections 8670.19, 8670.28 and 8670.31, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Change without regulatory effect amending subsections (a)(1)–(a)(1)(B) filed 10–21–96 pursuant to Section 100, title 1, California Code of Regulations (Register 96, No. 43).
3. Amendment of subsections (a)(1)(A), (a)(1)(B)7. and (c)(1), new subsection (c)(2), subsection renumbering, and amendment of subsection (d) filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
4. Change without regulatory effect amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
5. Amendment of subsections (a)(1)(A)–(A)1., (a)(1)(B)5.–8., (a)(2)(A)1.–2. and (c)(2) filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 816.06. Compliance Requirements/Penalties.

Any person who knowingly, intentionally, or negligently violates any provision of this subchapter shall be subject to criminal, civil, and/or administrative civil actions as prescribed in Article 9, beginning with Section 8670.57 of the Government Code. Actions which constitute a violation of this subchapter shall include, but not be limited to, the following:

(a) failure to submit the plan in a timely manner;

(b) failure to implement any element of the plan as approved unless otherwise authorized by the Administrator or the U.S. Coast Guard through the Unified Command;

(c) operating without an approved plan;

(d) failure to contract with an OSRO Rated by OSPR for booming, on–water recovery and storage, and shoreline protection services; or

(e) failure to follow the direction or orders of the Administrator in connection with an oil spill, except as provided in Section 8670.27 of the Government Code.

NOTE: Authority cited: Sections 8670.28, 8670.29, 8670.30 and 8670.57–8670.69.6, Government Code. Reference: Sections 8670.29, 8670.30, 8670.31 and 8670.57–8670.69.6, Government Code.

HISTORY

1. Amendment of first paragraph and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
2. Change without regulatory effect amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
3. New subsection (d), subsection relettering and amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).

§ 817. Marine Facility Contingency Plans.

HISTORY

1. New heading filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of section heading filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).

§ 817.01. Applicability.

(a) Plans

Oil spill contingency plans shall be prepared, submitted and used pursuant to the requirements of this subchapter for all marine facilities located in the marine waters (as defined in Section 815.05 of this subchapter) of California, or where a discharge of oil could reasonably be expected to impact the marine waters of California.

(1) A facility will be considered to have potential impact on marine waters based on the geographical and locational aspects of the site. Such aspects shall include proximity to marine waters or adjoining shorelines, land contour, and local drainage patterns. The existence of dikes, equipment or other structures used to prevent a spill from reaching marine waters will not necessarily affect the determination of which facilities are required to submit a plan.

(2) Contingency plans shall not be required of facilities located outside of the zone as measured from the mean high tide line to three nautical miles offshore. Any pipelines connecting such facilities to the shoreline, however, will be subject to the contingency planning requirements of this subchapter.

(b) Exemptions/Evaluations

(1) Owners/operators of platforms, with a reasonable worst case spill of less than 250 barrels, may apply for an exemption from the contingency plan requirements if the following conditions are met:

(A) the platform has a plan approved by either the Minerals Management Service (MMS), or the California State Lands Commission (SLC); and

(B) the MMS or SLC approved plan is submitted to the Administrator; and

(C) the Administrator determines that adequate response capability is available to address a spill and provide for the best achievable protection of coastal and marine resources.

(2) Any facility owner/operator may request a determination from the Administrator whether their facility meets the definition of marine facility, on the basis that a spill from the facility could not reasonably be expected to impact marine waters.

(A) The request must be submitted to the Administrator at least 180 days prior to the beginning of operation of the marine facility, and must provide specific, technical justification for the request.

(B) The Administrator shall inspect the facility to determine if a spill from the facility could potentially impact marine waters before the request may be approved.

(C) The Administrator will review the request within 30 days of receiving the request.

(D) If a decision is made that the facility meets the definition of marine facility, the facility owner/operator must submit a contingency plan within 90 days receipt of the decision.

(E) If a spill from a facility does occur which impacts marine waters, and the facility had previously received an evaluation that it does not meet the definition of marine facility, the evaluation is automatically revoked and the facility has 90 days in which to meet the contingency plan and Certificate of Financial Responsibility (COFR) requirements of this subdivision.

NOTE: Authority cited: Sections 8670.28, 8670.29 and 8670.30, Government Code. Reference: Sections 8670.28, 8670.29, 8670.30 and 8670.31, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Change without regulatory effect amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
4. Amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).

§ 817.02. Marine Facility Plan Content (Except for Those Small Marine Fueling Facilities Addressed in Section 817.03 of This Subchapter).

To the degree the information required by Subsections 817.02(b) through (k) exists elsewhere, copies of the pre–existing information may be submitted. If the information provided is not sufficient to meet the requirements of this subchapter, additional information may be requested by the Administrator.

(a) Introductory Material

(1) Each plan shall provide the following information:

(A) name and address of the marine facility, and mailing address if different. The name and address of the facility shall be referenced in the plan title or on a title page at the front of the plan;

(B) name, address, phone number, fax number and e–mail address, if available, of the owner and/or operator of the marine facility;

(C) name, address and phone number, fax number and e–mail address, if available, of the person to whom correspondence should be sent;

(D) a certification statement signed under penalty of perjury by an executive within the plan holder's management who is authorized to fully implement the oil spill contingency plan, who shall review the plan for accuracy, feasibility, and executability. If this executive does not have training, knowledge and experience in the area of oil spill prevention and response, the certification statement must also be signed by another individual within the plan holder's management structure who has the requisite training, knowledge, and experience. The certification shall be submitted according to the following format;

> "I certify, to the best of my knowledge and belief, under penalty of perjury under the laws of the State of California, that the information contained in this contingency plan is true and correct and that the plan is both feasible and executable."
>
> _____(signature), (title), (date);

(E) The California Certificate of Financial Responsibility (COFR) number for the marine facility shall be included in the front of the plan. If the COFR is not available when the plan is submitted because the marine facility is not yet operational, the COFR number must be provided as soon as it becomes available. The COFR number must be provided before the plan can be approved.

(2) Each plan shall identify a Qualified Individual, as defined in Chapter 1, Section 790 of this subdivision, and any alternates that may be necessary for the purpose of implementing the plan. If the plan holder contracts for this service, documentation that the Qualified Individual or company, and any identified alternates, acknowledge this capacity shall be included in the plan. If an alternate or alternates are identified in the plan, then the plan shall also describe the process by which responsibility will be transferred from the Qualified Individual to an alternate. During spill response activities, notification of such a transfer must be made to the State Incident Commander at the time it occurs.

(3) Each plan shall provide the name, address, telephone number and facsimile number of an agent for service of process designated to receive

legal documents on behalf of the plan holder. If the plan holder contracts for this service, documentation that the agent for service of process acknowledges this capacity shall be included in the plan. Such agent shall be located in California.

(4) Each plan shall identify a Spill Management Team (as defined in Section 815.05(p) of this subchapter). If the plan holder contracts for this service, documentation that the Spill Management Team acknowledges this capacity shall be included in the plan.

(5) Each plan shall contain a copy of the contract or other approved means (as defined in Section 815.05(b) of this subchapter) verifying that any oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill. This requirement can be met by a copy of the basic written agreement with an abstract of the recovery and/or cleanup capacities covered by the contract. Plan holders shall only contract with an OSRO(s) that has received a Rating by OSPR (as specified in Section 819 of this subchapter) for the booming, on–water recovery and storage, and shoreline protection services required.

(b) Marine Facility Description

(1) Each plan shall describe the marine facility's design and operations with specific attention to those areas from which an oil spill could occur. This description shall include, at a minimum, the following information:

(A) a piping and instrumentation diagram, and a tank diagram including the location of pumps, valves, vents and lines; the number, and oil storage capacity of each structure covered under the plan and its age, design, construction and general condition; the range of oil products normally stored in each structure; the presence or absence of containment structures and equipment; and the location of mooring areas, oil transfer locations, control stations, safety equipment, drip pans and the drainage for drip pans;

(B) a description of the types, physical properties, health and safety hazards, maximum storage or handling capacity and current normal daily throughput of oil handled. A material safety data sheet (MSDS) or equivalent will meet some of these requirements and can be maintained separately at the facility providing the plan identifies its location;

(C) a description of the normal procedures for transferring oil from or to a pipeline, tanker, barge or other vessel, or storage tank, and the amount, frequency and duration of oil transfers;

(D) the marine facility's normal hours of operation; and

(E) for an exploration or production facility, a complete description of those sections of the oil or gas lease field, gathering lines, storage tanks and processing facilities, under the control of the owner/operator, a spill from which could reasonably be expected to impact the marine waters of California.

(2) Each plan shall describe the marine facility site and surrounding area, including, where appropriate, the following information (note: where maps/diagrams are required they may be submitted on electronic media, in Portable Document Format (PDF)):

(A) a map and description of site topography, including the drainage and diversion plans for the marine facility, such as sewers, storm drains, catchment, containment or diversion systems or basins, oil/water separators, and all watercourses into which surface runoff from the facility drains;

(B) vicinity maps showing any vehicular or rail access to the marine facility, pipelines to and from the facility, nearby residential, commercial or other populous areas, and access to private land necessary to respond to a spill;

(C) seasonal hydrographic and climatic conditions including wind speed and direction, air and water temperature, local tides, prevailing currents, and any local visibility problems;

(D) physical geographic features, including ocean depths and local bathymetry; beach types and other geological conditions, including type of soil and terrain; operational conditions such as physical or navigation hazards, traffic patterns, permanent buoys, moorings and underwater structures or other site–specific factors; and any other physical feature or peculiarity of local waters that call for special precautionary measures that may affect spill response;

(E) logistical resources within the geographic area covered by the plan, including facilities for fire services, medical services, and accommodations for spill response personnel; and

(F) shoreline access area, including piers, docks, boat launches and equipment and personnel staging areas.

(c) Prevention Measures

Each plan shall address prevention measures in order to reduce the possibility of an oil spill occurring as a result of the operation of the marine facility. The prevention measures must eliminate or mitigate all the hazards identified in the Risk and Hazard Analysis.

(1) Risk and Hazard Analysis

(A) Each marine facility shall conduct a Risk and Hazard Analysis to identify the hazards associated with the operation of the facility, including: operator error, the use of the facility by various types of vessels, equipment failure, and external events likely to cause an oil spill.

The owner/operator may use one or more of the hazard evaluation methods identified by the American Institute of Chemical Engineers, or an equivalent method, including, but not limited to:

1. What–if analysis;
2. Checklist analysis;
3. Preliminary hazard analysis;
4. Hazard and operability study;
5. Failure mode and effect analysis; or
6. Fault tree analysis.

(B) The chosen hazard evaluation method must be conducted in accordance with the guidelines established by the American Institute of Chemical Engineers as published in the "Guidelines for Hazard Evaluation Procedures", second edition, copyright 1992, prepared for The Center For Chemical Process Safety.

1. The plan must include information regarding the expertise of the working group that develops the analysis.

2. The plan must include information that demonstrates to the Administrator that the analysis is appropriate to the marine facility and adequate according to the published procedures referenced in (C) above.

3. An owner/operator may be found in violation of this section if the Risk and Hazard Analysis does not adequately address the risks posed by the marine facility.

4. The Administrator may require that an analysis be updated if there are significant changes made to the marine facility. A significant change, as used in this paragraph, is one that would have an impact on the outcome of the Risk and Hazard Analysis.

5. Additional information regarding the analysis method used or the working group that conducted the analysis shall be made available to the Administrator upon request.

(C) Each plan shall include a summary of the results of the risk and hazard analysis. The summary shall include the following:

1. the hazard analysis method used, and a statement that the analysis is specific to the marine facility. If the analysis relies on a risk assessment at a similar facility, the summary shall specify how the two facilities are comparable;

2. an inventory of the hazards identified, including the hazards that resulted in the historical spills;

3. an analysis of the potential oil discharges, including the size, frequency, cause, duration and location of all significant spills from the marine facility as a result of each major type of hazard identified;

4. the control measures that will be used to mitigate or eliminate the hazards identified. The plan shall include timeframes for implementing any control measures that cannot be functional immediately; and

5. a prediction of the potential oil spills that might still be expected to occur after any mitigating controls have been implemented.

(D) All supporting documentation used to develop the Risk and Hazard Analysis summary shall be made available to the Administrator upon request.

(2) Off–Site Consequence Analysis

For the significant hazards identified in the Risk and Hazard Analysis required under this section, the marine facility shall conduct a trajectory analysis to determine the Off–Site Consequences of an oil spill. This analysis shall assume pessimistic water and air dispersion and other adverse environmental conditions such that the worst possible dispersion of the oil into the air or onto the water will be considered. This analysis is intended to be used as the basis for determining the areas and shoreline types for which response strategies must be developed. Some of the information required in this subsection may be drawn from the appropriate Area Contingency Plans, completed by the U.S. Coast Guard, State Agencies, and Local Governments pursuant to the Oil Pollution Act of 1990. (Note: where maps/diagrams are required they may be submitted on electronic media, in Portable Document Format (PDF)). The analysis, which shall be summarized in the plan, shall include at least the following:

(A) a trajectory, or series of trajectories (for pipelines, etc.), to determine the potential direction, rate of flow and time of travel of the reasonable worst case oil spill from the facility to marine waters and to the shorelines, including shallow–water environments, that may be impacted. For purposes of this requirement, a trajectory or trajectories (projected for a minimum of 72 hours) that determine the outer perimeter of a spill, based on regional extremes of climate, tides, currents and wind with consideration to seasonal differences, shall be sufficient;

(B) for each probable shoreline that may be impacted, a discussion of the general toxicity effects and persistence of the discharge based on type of product; the effect of seasonal conditions on sensitivity of these areas; and an identification of which areas will be given priority attention if a spill occurs.

(3) Resources at Risk from Oil Spills

Based on the trajectory of the spilled oil as determined in the Off–Site Consequence Analysis, each plan shall identify the environmentally, economically and culturally sensitive sites that may be impacted. Each plan shall identify and provide a map of the locations of these areas. Some of the information required in this subsection may be drawn from the appropriate Area Contingency Plans, completed by the U.S. Coast Guard, State Agencies, and Local Governments pursuant to the Oil Pollution Act of 1990. (Note: where maps/diagrams are required they may be submitted on electronic media, in Portable Document Format (PDF)).

(A) The map of environmentally sensitive sites shall include:

1. shoreline types and associated marine resources;

2. the presence of migratory and resident marine bird and mammal migration routes, and breeding, nursery, stopover, haul–out, and population concentration areas by season;

3. the presence of aquatic resources including marine fish, invertebrates, and plants including important spawning, migratory, nursery and foraging areas;

4. the presence of natural terrestrial animal and plant resources in marine–associated environments;

5. the presence of state or federally–listed rare, threatened or endangered species;

6. the presence of commercial and recreational fisheries including aquaculture sites, kelp leases and other harvest areas.

(B) The map of the locations of economically and culturally sensitive sites shall include:

1. public beaches, parks, marinas, boat ramps and diving areas;

2. industrial and drinking water intakes, power plants, salt pond intakes, and other similarly situated underwater structures;

3. off–shore oil and gas leases and associated drilling/production platforms;

4. known historical and archaeological sites. If a plan holder has access to any confidential archaeological information, it must be submitted as a separate item and will be handled as confidential information as outlined in Subsection 816.01(d);

5. areas of cultural or economic significance to Native Americans; and

6. the major waterways and vessel traffic patterns that are likely to be impacted.

(4) Required Prevention Measures

Each marine facility shall take all prevention measures to reduce or mitigate the potential hazards identified in the Risk and Hazard Analysis, and the potential impact those hazards pose to the resources at risk. Each plan shall include the following:

(A) schedules, methods and procedures for testing, maintaining and inspecting pipelines and other structures within or appurtenant to the marine facility that contain or handle oil which may impact marine waters if a failure occurs. Any information developed in compliance with Title 30 CFR, Part 250.153; Title 33 CFR, Part 154; Title 49 CFR, Part 195; and/or Title 5, Division 1, Part 1, Chapter 5.5, Sections 51010 through 51019.1 of the Government Code may be substituted for all or part of any comparable prevention measures required by this subsection.

(B) methods to reduce spills during transfer and storage operations, including overfill prevention measures and immediate spill containment provisions. Any information developed in compliance with Title 2, CCR, Division 3, Chapter 1, Article 5, Sections 2300–2407; Title 30 CFR, Part 250.154; and/or Title 33 CFR, Parts 154 and 156 may be substituted for all or part of any comparable prevention measures required by this subsection.

(C) procedures to assure clear communication among all the parties involved during transfer operations. Any information developed in compliance with Title 2, CCR, Division 3, Chapter 1, Article 5; Title 14, CCR, Division 1, Subdivision 4, Chapter 3, Subchapter 6; and/or Title 33 CFR, Parts 154 and 156 may be substituted for all or part of any comparable prevention measures required by this subsection;

(D) protection measures for areas within the marine facility that are subject to flooding;

(E) the plan holder shall provide additional relevant information to the Administrator upon request.

(d) Containment Booming and On–water Recovery

Each plan holder must have a contract or other approved means for containment booming and on–water recovery response resources up to their Response Planning volume for all potential oil spills from the marine facility. To determine the amount of response resources for containment booming and on–water recovery, each plan holder must calculate a Response Planning Volume as outlined below:

(1) Reasonable Worst Case Spill

To calculate the response planning volume, it is first necessary to determine the reasonable worst case spill for each marine facility, as follows:

(A) For marine facilities (except on–shore pipelines (not subject to Chapter 6.67 (commencing with Section 25270) or Chapter 6.7 (commencing with Section 25280) of Division 20, Health and Safety Code) which are addressed in Subsection (B), offshore platforms which are addressed in Subsections (C) and (D), and offshore pipelines which are addressed in Subsection (E):

1. the loss of the entire capacity of all in–line, break–out and portable storage tank(s), not subject to Chapter 6.67 (commencing with Section 25270) or Chapter 6.7 (commencing with Section 25280) of Division 20, Health and Safety Code, needed for the continuous operation of the pipelines used for the purposes of handling or transporting oil, taking into account the existence of volume limiting factors including, but not limited to, line pressure, gravity, and the availability and location of the emergency shut–off controls; plus

2. the amount of additional spillage that could reasonably be expected to enter California marine waters during emergency shut–off, transfer or pumping operations if a hose(s) or pipeline(s) ruptures or becomes disconnected, or if some other incident occurs which could cause or increase the size of an oil spill. The spillage shall be calculated as follows: the maximum time to discover the release from the pipe or hose in hours, plus the maximum time to shut down flow from the pipe or hose in hours (based on historic discharge data or the best estimate in absence of histor-

ic discharge data for the marine facility) multiplied by the maximum flow rate expressed in barrels per hour (based on the maximum relief valve setting or maximum system pressure when relief valves are not provided) plus the total linefill drainage volume expressed in barrels.

3. The Administrator has the discretion to accept that a marine facility can operate only a limited number of the total pipelines at a time. In those circumstances, the reasonable worst case spill volume shall include the drainage volume from the piping normally not in use, in addition to the volume determined in (1) and (2), above.

(B) For on-shore pipelines not subject to Chapter 6.67 (commencing with Section 25270) or Chapter 6.7 (commencing with Section 25280) of Division 20, Health and Safety Code, the largest volume in barrels, of the following:

1. The pipeline's maximum release time in hours (i.e., the time between pipeline rupture and discovery), plus the maximum shut-down response time in hours (based on historic discharge data or in the absence of such historic data, the operator's best estimate), multiplied by the maximum flow rate expressed in barrels per hour (based on the maximum daily capacity of the pipeline), plus the largest line drainage volume after shutdown of the line section(s) in the response zone expressed in barrels. (As used in this subsection: line section means a continuous run of pipe that is contained between adjacent pressure pump stations, between a pressure pump station and a terminal or break-out tank, between a pressures pump station and a block valve, or between adjacent block valves; response zone means a geographic area either along a length of pipeline or including multiple pipelines, containing one or more adjacent line sections, for which the operator must plan for the deployment of, and provide spill response capabilities. The size of the zone is determined by the operator after considering available capabilities, resources, and geographic characteristics); or

2. The largest foreseeable discharge for the line section(s) within a response zone, expressed in barrels, based on the maximum historic discharge, if one exists, adjusted for any subsequent corrective or preventive action taken; or

3. If the response zone contains one or more break-out tanks, the capacity of the single largest tank or battery of tanks within a single secondary containment system, adjusted for the capacity or size of the secondary containment system, expressed in barrels.

(C) For offshore platforms (except those drilling a new well which are addressed in Subsection (D)):

1. total tank storage and flow line capacity; plus

2. that portion of the total linefill capacity which could be lost during a spill, taking into account the availability and location of the emergency shut-off controls and the effect of hydrostatic pressure; plus

3. the amount of additional spillage that could reasonably be expected to enter marine waters during emergency shut-off, transfer or pumping operations if a hose or pipeline ruptures or becomes disconnected, or some other incident occurs which could cause or increase the size of an oil spill. The calculation may take into consideration other safety devices, emergency reaction times and maximum transfer rates; plus

4. the daily production volume for seven days from an uncontrolled blowout of the highest capacity well associated with the marine facility. In determining the daily discharge rate, the reservoir characteristics, casing/production tubing sizes, and historical production and reservoir pressure data shall be taken into consideration.

(D) For offshore platforms with active well drilling:

The owner/operator of a platform at which a new well is being drilled must submit a proposed reasonable worst case oil spill calculation for platform operations to the Administrator. The proposed worst case discharge is the daily volume possible for seven days from an uncontrolled blowout taking into consideration any known reservoir characteristics. The proposed calculation will be reviewed by the Administrator during the plan review and approval process to determine if it adequately addresses the oil spill potential of the new well system.

(E) For offshore pipelines, the largest volume in barrels of the following calculation:

1. The pipeline system leak detection time, plus the shutdown response time, multiplied by the highest measured oil flow rate over the preceding 12-month period. For new pipelines, use the predicted oil flow rate. Add to this calculation the total volume of oil that would leak from the pipeline after it is shut in. This volume should be calculated by taking into account the effects of hydrostatic pressure, gravity, frictional wall forces, length of pipeline segment, tie-ins with other pipelines, and other factors.

(F) The calculations, and such parameters as flow rates, linefill capacities and emergency shutoff times, that are used to determine a marine facility's reasonable worst case spill shall be submitted as part of the plan. The Administrator may review and test these parameters as part of the drill conducted in accordance with Subsection 816.03(b).

(2) Persistence and Emulsification Factors

(A) The reasonable worst case spill volume is then multiplied by a persistence factor relative to the most persistent type of oil that may be spilled by the marine facility. The persistence factors relative to the type of oil spilled, are specified below:

Oil Group	Group 1	Group 2	Group 3	Group 4
Persistence Multiplier	.20	.50	.50	.50

(B) Emulsification Factors

The volume determined from the calculation in Subparagraph (A) is then multiplied by one of the following emulsification factors, again, based on the type of oil.

Oil Group	Group 1	Group 2	Group 3	Group 4
Emulsification Multiplier	1.0	1.8	2.0	1.4

(C) Response Planning Volume

The total determined by the above calculation is a Response Planning Volume.

1. The Response Planning Volume to be used to determine the amount of Response Equipment and Services that must be under contract or other approved means shall be the greater of the amount determined in Subsection 817.02(d)(1) and (2) , or the Planning Volume for On-water Recovery calculated for the nearshore/inland environment in the marine facility's federal response plan pursuant to 33 CFR Part 154, Appendix C, Section 7. The Planning Volume for On-Water Recovery is the adjusted volume from the federal calculation determined prior to establishing the response tiers utilizing the mobilization factors.

2. All calculations used to determine the Response Planning Volume shall be included in the plan.

(3) Response Capability Standards

The equipment and personnel necessary to address the Response Planning Volume is brought to the scene of the spill over a period of time. The timeframes are dependent upon the risk zone in which the marine facility is located and are specified in the tables in this section.

The standards set forth in this section are only planning standards and may not reflect the exigencies of actual spill response. However, these are the standards that must be used to determine the amount of equipment and personnel that must be under contract or other approved means. Response resources in addition to those under contract must be identified, and a call-out procedure in place to access this equipment, if the marine facility has a spill that exceeds the Response Planning Volumes. The owner/operator is ultimately responsible for addressing the entire volume of an actual spill regardless of the planning volume.

(A) On-Water Daily Recovery Rates and Containment Boom Amounts

1. The total amount of on-water recovery equipment and services required shall be the lesser of the amount necessary to address the Response

Planning Volume determined in Section 817.02(d)(2)(C) or the Daily Recovery Rate established by this Section at 817.02(d)(3)(B) below.

2. The amount of response resources and the timeframes for delivery are specified in Subsection 817.02(d)(2)(C) below. The barrels per day capability figure is the total amount of on-water recovery equipment that must be at the scene of the spill at the hour specified which is measured from the time of notification, as described in this subchapter. All on-water recovery response resources shall be capable of being deployed and operable within one hour of arrival at the scene of the spill or drill but no later than the designated timeframe for each risk zone.

3. The timeframes for equipment delivery and deployment as specified in this subsection do not take into account the time required to conduct a health and safety assessment of the site as set forth in Subsection 817.02(f)(9), and as required by the California Occupational and Safety Administration. In addition, these timeframes do not account for delays that may occur due to weather or seastate. The actual time necessary to deliver and deploy equipment will be assessed at the time of an incident or a drill and will take into account the prevailing conditions of weather and seastate, as well as the site assessment requirements.

(B) Daily Recovery Rate

1. Facilities located in High-Volume Ports

DELIVERY TIME (HRS)	6	24	36	60
BBLS/DAY CAPABILITY	23,437	31,250	46,875	78,125

i. in addition, the facility/transfer points within the High Volume Ports must have 3,125 barrels/day, or 10% of the reasonable worst case spill volume, whichever is less, of on-water recovery capability that can be mobilized and on-scene within two hours of notification;

ii. if a facility/transfer point within a High Volume Port maintains and can immediately deploy containment equipment for a 3,125 barrel spill, or 10% of the reasonable worst case spill volume, whichever is less, the initial on-water recovery capability can be on-scene within three hours rather than two hours.

2. Facility/Transfer Areas and the Santa Barbara Channel Area

DELIVERY TIME (HRS)	12	36	60
BBLS/DAY CAPABILITY	19,531	35,156	66,406

i. in addition, facility/transfer points within a Facility/Transfer Area and the Santa Barbara Channel Area must have 3,125 barrels/day, or 10% of the reasonable worst case spill volume, whichever is less, of on-water recovery capability that can be mobilized and on-scene within 2 hours of notification;

ii. if a facility/transfer point within a Facility/Transfer Area or the Santa Barbara Channel Area maintains and can immediately deploy containment equipment for a 3,125 barrel spill, or 10% of the reasonable worst case spill volume, whichever is less, the initial on-water recovery capability can be on-scene within three hours rather than two hours;

iii. for those points where transfers occur infrequently, and where there is not permanent equipment present, the 3,125 barrel/day, or 10% of the reasonable worst case spill volume, whichever is less, on-water recovery capability shall be brought to the site at the time of transfer;

iv. for infrequent transfers of non-persistent oil, the initial response requirement may be waived by application to the Administrator. The application for waiver must include a justification based on such factors as the location of the marine facility, proximity to response equipment, additional equipment in the immediate area, and the relative environmental sensitivity of the potential spill sites.

(C) Sufficient containment equipment shall be brought to the scene of the spill to address the daily recovery rates as designated in Section 817.02(d)(3)(B).

(D) The standards set forth in Subsection 817.02(d)(3)(B) were increased by a factor of 25% on July 1, 1997, and again on July 1, 2001. It was determined that this increase was feasible and necessary to meet the best achievable protection of the coast.

(E) The standards set forth in Subsection 817.02(d)(3)(B) will be reviewed by the Administrator to determine if increases to these amounts are feasible and necessary in order to meet the best achievable protection of the coast. The Administrator shall conduct a review and hold a public hearing prior to confirming the new standards to solicit input regarding the necessity of the proposed increase and any credits that may be allowed.

(4) Movement of Response Resources

There may be times when it is necessary to move response equipment from one risk zone to another in order to respond to a catastrophic oil spill. However, the Administrator needs to ensure that sufficient response resources are available to address a reasonable risk within each zone. Therefore, when equipment is needed from one risk zone which may impact the plan holder's on-water containment and recovery at the 6 hour level, the plan holder or OSRO shall make a request to the Administrator to temporarily reduce the Response Capability Standards set forth in (d)(3) above, before the equipment can be moved. The Administrator shall only grant such a request after determining that sufficient response resources are available to address a reasonable risk within the zone from where the response equipment is being considered for removal.

(5) On-Water Response Equipment and Services

(A) Each plan shall demonstrate that the marine facility owner/operator has under contract or other approved means (as defined in Section 815.05(b) of this subchapter), access to all the necessary response resources to comply with the Response Capability Standards established in Subsection 817.02(d)(3). The amount of response equipment required shall take into account the effective daily recovery capacity (EDRC, as defined in Chapter 1, Section 790 of this subdivision) of the equipment.

(B) The equipment identified for a specific area must be appropriate for use in that area given the limitations of the geography, bathymetry, water depths, tides, currents and other local environmental conditions. For those areas that require shallow-water response capability (refer to the relevant Area Contingency Plan), the plan shall provide for an adequate number of shallow-draft vessels (as defined in Section 815.05 of this subchapter) and for adequate booming and other shoreline protective resources to be owned or under contract or other approved means and available to provide shoreline protection of all sensitive sites identified in the trajectory analysis conducted as part of the Off-site Consequence Analysis. Additionally, the equipment identified shall also be appropriate for use on the type of oil identified. To the extent that the following information is provided by a Rated OSRO, evidence of a contract or other approved means with a Rated OSRO will suffice:

1. the location, inventory and ownership of the equipment to be used to fulfill the response requirements of this subchapter;

2. a complete inventory of any nonmechanical response equipment and supplies, including the type and toxicity of each chemical agent, with procedures for storage and maintenance;

3. the type and capacity of storage and transfer equipment matched to the skimming capacity of the recovery systems;

4. the manufacturer's rated capacities and the operational characteristics for each major item of oil recovery equipment;

5. the effective daily recovery capacity (as defined in Chapter 1, Section 790 of this subdivision) for each major piece of on-water recovery equipment listed, as well as the effective daily recovery capacity for the skimming systems as a whole.

i. A request may be submitted to the Administrator to review the effective daily recovery capacity for a piece of equipment if it can be shown that the equipment has a different capacity than the derating factor allows.

ii. The Administrator's decision regarding a change in the effective daily recovery capacity for a piece of equipment will be issued as soon as administratively feasible.

6. vessels designated for oil recovery operations, including skimmer vessels and vessels designed to tow and deploy boom, and availability of shallow-draft vessels;

7. vessels of opportunity reasonably available for oil spill recovery operations, including availability of shallow-draft vessels, procedures to equip the vessels, inventory all equipment, and train personnel;

8. procedures for storage, maintenance, inspection and testing of spill response equipment under the immediate control of the operator;

9. sufficient equipment to track the movement of discharged oil, including aerial surveillance sufficient to direct skimming operations.

10. Each plan shall describe the personnel available to respond to an oil spill, including:

i. a list by job category including a job description for each type of spill response position needed as indicated in the spill response organization scheme;

ii. a match between personnel by job category, and the equipment proposed for use (including equipment appropriate for shallow-water environments), including the plan for mobilization of such personnel;

iii. sufficient personnel to maintain a response effort of at least 14 days.

11. Each plan shall describe procedures for the transport of required equipment, personnel and other resources to the spill site. The description shall include plans for alternative procedures during adverse environmental conditions. Adverse environmental conditions to be considered shall include:

i. adverse weather;

ii. sea states, tides, winds and currents;

iii. presence of debris or other obstacles; and

iv. any other known environmental conditions that could restrict response efforts.

(C) A list of the marine facility's spill management personnel (and company name if applicable) and their spill response qualifications including a discussion of spill response training and experience, regulatory awareness and compliance, and supervision.

(D) Any equipment and personnel identified in the plan must be available for response. Any necessary maintenance for the equipment, vacation periods for response personnel, or other eventuality must be taken into account in relying upon these resources.

1. The equipment owner must notify the Administrator when major equipment is removed from service for a period of 24 hours or more for maintenance or repair. Major equipment is that which, if removed, would affect timely implementation of the plan. Notification must be made prior to removing equipment for regularly scheduled maintenance, and within 24 hours of removing equipment for unscheduled repairs.

2. The equipment owner must demonstrate that backup equipment is available during the time that the primary response equipment is out of service. Backup equipment may be provided from the owner's own inventory, or may be made available from another responder.

3. A plan shall remain valid during the time that equipment has been removed from service for maintenance or repair.

(E) Group 5 Oils

Marine facilities that handle Group 5 oils must contract with one or more Rated OSRO(s) to address the marine facility's Response Planning Volume. Such equipment shall include, but is not limited to the following:

1. sonar, sampling equipment, or other methods for locating the oil on the bottom or suspended in the water column;

2. containment boom, sorbent boom, silt curtains, or other methods to reduce spreading on the bottom;

3. dredges, pumps, or other equipment necessary to recover oil from the bottom;

4. equipment necessary to assess the impact of such discharges; and

5. any other appropriate equipment necessary to respond to a discharge involving a Group 5 oil.

(F) The plan holder may propose the use of non-mechanical methods for response operations which may include dispersants, in-situ burning, coagulants, bioremediants, or other chemical agents. The use of any non-mechanical method for response must be done in accordance with provisions of the State Marine Oil Spill Contingency Plan, the National Contingency Plan, the applicable federal Area Contingency Plan and all applicable State laws and regulations. If a non-mechanical method of response is proposed, the plan shall include:

If a non-mechanical method of response is proposed, the plan shall include:

1. methods of deployment or application;

2. for use of a chemical agent,a description of the specific mechanisms in place to assess the environmental consequences of the chemical agent. This shall include the mechanism for continuous monitoring of environmental effects for the first three days after initial application, and periodic monitoring thereafter until the agent is inert or no longer operative;

3. identification of all permits, approvals or authorizations needed to allow the use of chemical agents or non-mechanical methods, and the timeline for obtaining them;

4. a plan for protecting resources at risk, areas of public concern and the public from any adverse effects of the non-mechanical method used;

5. the projected efficacy of each type of non-mechanical method proposed for use taking into account the type of spilled material and the projected environmental conditions of the potential spill site; and

6. upon request, the plan holder shall provide any test results known to the plan holder which assess the environmental impacts of applying these methods in the marine environment.

(G) The plan shall describe methods for tracking the movement of the discharged oil; and

(H) The plan shall list the location of the weather stations to be used for observations of winds, currents and other data at the time of a spill that may assist in making real-time projections of spill movement.

(e) Shoreline Protection

Each plan must provide for shoreline protection of all potential spills from the marine facility.

(1) Shoreline Response Planning Volume

Each plan shall demonstrate that the marine facility has access to all necessary equipment and services to address the response strategies appropriate to each shoreline that could potentially be impacted by a spill from the facility.

To determine the amount of equipment and services necessary a Response Planning Volume must be calculated as outlined below:

(A) Multiply the reasonable worst case spill for the marine facility, as calculated in Subsection 817.02(d)(1), by the appropriate persistence factor from the chart below for the most persistent type of oil that may be spilled:

Oil Group	Group 1	Group 2	Group 3	Group 4
Persistence Multiplier	.10	.30	.50	.70

(B) Emulsification Factors

The volume determined from the calculation above is then multiplied by one of the following emulsification factors, again, based on the type of oil:

Oil Group	Group 1	Group 2	Group 3	Group 4
Emulsification Multiplier	1.0	1.8	2.0	1.4

(C) Total Shoreline Equipment Required

The total determined by this calculation is a Response Planning Volume.

1. The Response Planning Volume to be used to determine the amount of Response Equipment and Services that must be under contract shall

be the greater of the amount determined in Subsection 817.02(e)(1), or the adjusted Planning Volume for onshore recovery calculated for the nearshore/inland environment in the facility's federal response plan pursuant to 33 CFR Part 154., Appendix C, Section 7.

2. All calculations used to determine the Response Planning Volume shall be included in the plan.

(2) Shoreline Protection Equipment and Services

Each plan must identify, and ensure availability through a contract or other approved means (as defined in Section 815.05(b) of this subchapter), the capability of effecting shoreline protection strategies. Such protection strategies must be commensurate with the Response Planning Volume calculated for potential shoreline impact, and must be capable of addressing all appropriate protection, and response strategies. The specific areas where equipment and services must be available for use shall be identified in the Off-Site Consequence Analysis.

(A) The equipment identified for a specific area must be appropriate for use in that area given the limitations of the bathymetry, geomorphology, shoreline types and other local environmental conditions. Additionally, the equipment identified shall be appropriate for use on the type of oil identified. To the extent that the following information is provided by a Rated OSRO, evidence of a contract or other approved means with a Rated OSRO will suffice:

1. the amounts of all protective booming, shallow-draft vessels, and shoreline protection equipment necessary to address the specific types of shorelines that may be impacted;

2. the location, inventory and ownership of the equipment to be used to fulfill the response requirements;

3. the procedures for storage, maintenance, inspection and testing of spill response equipment under the immediate control of the operator.

(B) Each plan shall have under contract or other approved means sufficient trained personnel to respond to all oil spills up to the calculated Response Planning Volume, which are to remain on scene until demobilized by the State Incident Command or the Unified Command. For planning purposes, this shall include procedures to obtain sufficient personnel to maintain a response effort of at least 14 days.

(C) Any equipment and personnel identified to meet the planning standard requirements must be available for response. Any necessary maintenance for the equipment, vacation periods for response personnel, or other eventuality must be taken into account in relying upon these resources.

1. The equipment owner must notify the Administrator when major equipment is removed from service for a period of 24 hours or more for maintenance or repair. Major equipment is that which, if moved, would affect timely implementation of the plan. Notification must be made prior to removing equipment for regularly scheduled maintenance, and within 24 hours of removing equipment for unscheduled repairs.

2. The equipment owner must demonstrate that backup equipment is available during the time that the primary response equipment is out of service. Backup equipment may be provided from the owner's own inventory or may be made available from another responder.

3. A plan shall remain valid during the time that equipment has been removed from service for maintenance or repair if the Administrator has not disapproved such removal within 24 hours of notification.

4. The equipment owner shall notify the Administrator when the major equipment is back in service.

(3) (Reserved)

(4) Shoreline Clean-Up

(A) Utilizing the equipment that must be under contract, each plan shall describe the methods that will be used to contain spilled oil and remove it from the environment. The equipment identified for a specific area must be appropriate for use in that area given the limitations of the bathymetry, geomorphology, shoreline types and other local environmental conditions. Additionally, the equipment identified shall be appropriate for use on the type of oil identified. The description shall include:

1. all shoreline clean-up procedures and oil diversion and pooling procedures for the close-to-shore environment. These procedures shall include, where appropriate, methods for carrying out response operations and clean-up strategies in shallow-water environments, as identified in the trajectory analysis conducted as part of the Off-site Consequence Analysis;

2. methods for shoreside cleanup, including containment and removal of surface oil, subsurface oil and oiled debris and vegetation from all applicable shorelines, adjacent land and beach types.

3. measures to be taken to minimize damage to the environment from land operations during a spill response, such as impacts to sensitive shoreline habitat caused by heavy machinery or foot traffic.

(B) Protection, response and clean-up strategies will be specific to the type of oil spilled, the expected spill sites as identified in the Off-Site Consequence Analysis, and the resources at risk at those spill sites.

(C) Each plan must utilize all the strategies appropriate to the potential impact sites.

(D) Each plan shall have under contract or other approved means sufficient trained personnel to respond to all oil spills up to the Response Planning Volume, which are to remain on scene until demobilized by the State Incident Command or the Unified Command

(f) Response Procedures

(1) Each plan shall describe the organization of the marine facility's spill response system and management team. An organizational diagram depicting the chain of command shall also be included. Additionally, the plan shall describe the method to be used to interface the plan holder's organization into the State Incident Command System and/or the Unified Command Structure as required by Title 8, California Code of Regulations, Subsection 5192(q)(3)(A).

(A) The plan holder may utilize the procedures outlined in the appropriate Area Contingency Plan when describing how the marine facility's chain of command will interface with the State Incident Command System which utilizes the Unified Command.

(B) Each plan shall describe the organization of the plan holder's public information office, as it relates to an oil spill incident, and the method by which the Information Officer will be integrated into the State Incident Command System.

(C) Each plan shall describe the plan holder's safety program as it relates to an oil spill incident and the method by which their Safety Office will be integrated into the State Incident Command System.

(2) Each plan shall identify potential sites needed for spill response operations including location(s) for:

(A) a central command post sufficient to accommodate the State Incident Command or Unified Command as well as the plan holder's response organization;

(B) a central communications post if located away from the command post;

(C) equipment and personnel staging areas.

(3) Each plan shall include a checklist, flowchart or decision tree depicting the procession of each major stage of spill response operations from spill discovery to completion of cleanup. The checklist, flowchart or decision tree shall describe the general order and priority in which key spill response activities are performed.

(4) Each plan shall describe how the plan holder will provide emergency services before the arrival of local, state or federal authorities on the scene, including:

(A) procedures to control fires and explosions, and to rescue people or property threatened by fire or explosion;

(B) procedures for emergency medical treatment and first aid;

(C) procedures to control ground, marine and air traffic which may interfere with spill response operations;

(D) procedures to manage access to the spill response site and the designation of exclusion, decontamination and safe zones; and

(E) procedures to provide the required personnel protective gear for responders.

(5) Each plan shall describe equipment and procedures to be used by marine facility personnel to minimize the magnitude of a spill and minimize structural damage which may increase the quantity of oil spilled.

(A) Spill mitigation procedures shall include immediate containment strategies, methods to stop the spill at the source, methods to slow or stop leaks, and methods to achieve immediate emergency shutdown.

(B) For spill mitigation procedures the plan shall include prioritized procedures for marine facility personnel including specific procedures to shut down affected operations. Responsibilities of facility personnel should be identified by job title. A copy of these procedures should be maintained at the facility operations center. These procedures should address the following equipment and scenarios:

1. failure of manifold and mechanical loading arm, other transfer equipment, or hoses, as appropriate;
2. tank overfill;
3. tank failure;
4. pipe rupture;
5. pipe leak, both under pressure and not under pressure, if applicable;
6. explosion and/or fire; and
7. other equipment failure (e.g. pumping system failure, relief valve failure, etc.).

(6) Each plan shall detail the lines of communications between the responsible party, the Qualified Individual and the on–scene commanders, response teams, and local, state, and federal emergency and disaster responders, including:

(A) communication procedures;

(B) the communication function (e.g., ground–to–air) assigned to each channel or frequency used;

(C) the maximum broadcast range for each channel or frequency used; and

(D) redundant and back–up systems.

(7) Each plan shall provide for post–spill review, including methods to review both the effectiveness of the plan and the need for plan amendments.

(A) The result of the review shall be forwarded to the Administrator within 90 days following the completion of response and cleanup procedures.

(B) The review shall be used by the Administrator only for the purposes of proposing future amendments to the contingency plan.

(8) Each plan shall describe the procedures to manage access to the spill response site, the designation of exclusion, decontamination and safe zones, and the decontamination of equipment and personnel during and after oil spill response operations, as required by the California Occupational Safety and Health Administration.

(9) Prior to beginning spill response operations and/or clean up activities, a Site Safety Plan must be completed. Each site safety plan shall include information as required pursuant to Title 8, Section 5192(b)(4)(B) of the California Code of Regulations including, but not limited to, a written respiratory protection program, written personal protective equipment program, written health and safety training program, written confined space program and permit forms, direct reading instrument calibration logs, and written exposure monitoring program.

(g) Notification Procedures

(1) Each plan shall include a list of contacts to call in the event of a drill, threatened discharge of oil, or discharge of oil. The plan shall:

(A) detail the procedures for reporting oil spills to all appropriate local, state, and federal agencies;

(B) identify a central reporting office or individual who is responsible for initiating the notification process and is available on a 24–hour basis. The individual making this notification must be fluent in English. The following information must be provided:

1. the individual or office to be contacted;
2. telephone number or other means of contact for any time of the day; and
3. an alternate contact in the event the individual is unavailable.

(C) establish a clear order of priority for notification.

(2) Immediate Notification

Nothing in this section shall be construed as requiring notification before response.

(A) Each plan shall include a procedure for contacting the OSRO, or other initial response resources if an OSRO is not being used, immediately, but no longer than 30 minutes, after discovery of a discharge of oil or threatened discharge of oil.

(B) Each plan shall include a procedure that ensures that the owner/operator or his/her designee will initiate contact with the Qualified Individual, the California Office of Emergency Services and the National Response Center immediately, but no longer than 30 minutes, after discovery of a discharge of oil or threatened discharge of oil.

(C) All phone numbers necessary to complete the immediate notification procedures must be included in the response manual.

(3) Each plan shall identify a call–out procedure to acquire the resources necessary to address spills that cannot be addressed by the equipment that the owner/operator is required to have under contract. Procedures must allow for initiation of the call–out within 24 hours of the incident and must begin as soon as a determination has been made that additional resources are necessary.

(4) Each plan shall provide a checklist of the information to be reported in the notification procedures, including but not limited to:

(A) marine facility name and location;

(B) date and time of the incident;

(C) the cause and location of the spill;

(D) an estimate of the volume of oil spilled and the volume at immediate risk of spillage;

(E) the type of oil spilled, and any inhalation hazards or explosive vapor hazards, if known;

(F) the size and appearance of the slick;

(G) prevailing weather and sea conditions;

(H) actions taken or planned by personnel on scene;

(I) current condition of the marine facility;

(J) injuries and fatalities; and

(K) any other information as appropriate.

(5) Reporting of a spill as required by Subsection 817.02(g)(2) shall not be delayed solely to gather all the information required by Subsection 817.02(g)(4).

(6) An updated estimate of the volume of oil spilled and the volume at immediate risk of spillage shall be reported to the California Governor's Office of Emergency Services whenever a significant change in the amount reported occurs, but not less than every 12 hours within the first 48 hours of response. The State Incident Commander and/or the Federal On–Scene Coordinator through the Unified Command shall have the option of increasing or decreasing this timeframe, as needed. Updated spill volume information included in the Incident Action Plan developed through the Unified Command will meet the requirements of this subsection.

(h) Temporary Storage and Waste Management

(1) Each plan shall identify sufficient temporary storage for all recovered oil or all oily waste, and identify facilities that would be able to accept the recovered oil or oily waste for recycling or other means of waste management. Sufficient storage shall be no less than two times the calculated Response Planning Volume up to the Daily Recovery Rate as determined in Section 817.02(d)(3)(B).

(A) To meet the temporary storage requirement described in Subsection (1) above, the following amounts of storage shall be dedicated response resources (as defined in Section 815.05(c) of this subchapter) or OSRO–owned and controlled response resources (as defined in Section 815.05(k) of this subchapter), as applicable to the appropriate risk zone:

Sufficient storage to support the skimming systems shall be brought to the scene of the spill during the first four hours of response:

520 barrels of storage, or 20% of the response planning volume, whichever is less, shall be brought to the scene of the spill within four hours of notification of a spill;

12,000 barrels, or two times the response planning volume, whichever is less, shall be available at the scene of the spill within 6 hours of notification of a spill.

The balance of the temporary storage requirement described in Subsection (1) above may be provided by non–dedicated storage resources. All skimming systems operating at the scene of a spill shall have adequate storage.

(2) Each plan shall identify the party that shall maintain responsibility for recovered oil and oily waste for the purposes of temporary storage.

(3) Each plan shall describe site criteria and methods used for temporary storage of recovered oil and oily wastes generated during response and cleanup operations, including sites available within the marine facility, or near the spill area.

(4) Each plan shall identify all applicable permits, and all federal, state and local agencies responsible for issuing those permits for transit, temporary storage and ultimate waste management of all wastes likely to result from an oil spill.

(5) Each plan shall include information which could expedite the state approval process for the use of temporary waste storage sites, including a list of appropriate contacts and a description of procedures to be followed for each approval process.

(i) Oiled Wildlife Care Requirements

Each plan shall describe how oiled wildlife care will be provided by one of the following approved means:

(1) Utilize the California Oiled Wildlife Care Network (OWCN) to meet oiled wildlife care requirements; or

(2) describe procedures that clearly outline how oiled wildlife care will be provided. The equipment, facilities, and personnel necessary to implement these procedures must be identified and assured by contract for each Geographic Area covered by the plan. Standards and written protocols for wildlife care must comply with all applicable State and federal laws.

(j) Training

(1) Each plan shall provide that all appropriate personnel employed by the marine facility shall receive training in the use and operation of oil spill response and clean–up equipment. The plan shall describe:

(A) the type and frequency of training that each individual in a spill response position receives to achieve the level of qualification demanded by their job description;

(B) the procedures, if any, to train and use volunteers or other additional personnel in spill response operations as necessary for the size of the spill.

(2) Each plan shall describe the type and frequency of personnel training on methods to reduce operational risks. The description of the training shall include, if applicable, the following:

(A) any established training objectives that address potential spill sources and causes that were identified in the Risk and Hazard Analysis.

(B) the means of achieving any established training objectives, such as:

1. training programs for the positions involved with the various aspects of the marine facility's operation that could result in a spill (e.g., position responsible for facility inspections or transfers);

2. a training schedule, including adequate frequency, (e.g., initial training upon hire and annual refresher training) and type of training (workshops, classroom, videotape, on–the–job training, etc.) for each position trained, by job classification;

(C) any licenses, certifications or other prerequisites required to hold particular jobs.

(D) A plan holder whose facility is subject to and in compliance with State Lands Commission training regulations; Title 2, Division 3, Chapter 1, Article 5.3, CCR Sections 2540 through 2548, shall be considered in compliance with the training provisions of this subsection.

(3) Each plan shall provide for safety training as required by state and federal health and safety laws for all personnel likely to be engaged in oil spill response, including a program for training non–permanent responders such as volunteers or temporary help.

(4) The marine facility owner/operator shall ensure that training records are maintained for 3 years. All such documentation must be made available to the Administrator upon request.

(k) Drills and Exercises

(1) Each plan shall describe the small marine facility's drill and exercise program that meets the requirements of Section 820.01(a), to ensure that the elements of the plan will function in an emergency.

(2) Training sessions may constitute creditable drills and exercises if all requirements in Subsection 820.01(a) are met.

(3) A marine facility owner/operator shall ensure that all of the response resources identified in the plan participate in equipment deployment exercises at least once every three years.

NOTE: Authority cited: Sections 8670.7, 8670.10, 8670.28, 8670.29 and 8670.30, Government Code. Reference: Sections 8670.7, 8670.10, 8670.25.5, 8670.28, 8670.29, 8670.30, 8670.31 and 8670.37.51, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Change without regulatory effect amending subsection (a)(2) filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Change without regulatory effect amending subsections (d)(3)(B)1., (d)(3)(B)2., (d)(3)(B)2.ii. and (d)(3)(D) filed 6–11–97; operative 7–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 24).
4. Amendment of section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
5. Change without regulatory effect amending subsections (c)(4)(A)–(C), (f)(1) and (j)(2)(D) and amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
6. Amendment of subsections (d)(3)(B)1.–(d)(3)(B)2.iii. filed 5–25–2001; operative 7–1–2001 pursuant to Government Code section 8670.28(e) and 14 CCR 817.02(d)(3)(E). Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 2001, No. 21).
7. Amendment of subsection (a)(4) and (h)(1), new subsection (h)(1)(A) and amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
8. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 817.03. Small Marine Fueling Facility Plan Content.

To the degree the information required by Subsections 817.03(b) through (k) exists elsewhere, copies of the pre–existing information may be submitted. If the information provided is not sufficient to meet the requirements of this subchapter, additional information may be requested by the Administrator.

(a) Introductory Material

(1) Each plan shall provide the following information:

(A) name and address of the small marine fueling facility (as defined in Section 790 of this subdivision), and mailing address if different. The name and address of the facility shall be referenced in the plan title or on a title page at the front of the plan;

(B) name, address, phone number, fax number and e–mail address, if available, of the owner and/or operator of the small marine fueling facility;

(C) name, address, phone number, fax number and e–mail address, if available, of the person to whom correspondence should be sent;

(D) a certification statement signed under penalty of perjury by an executive within the plan holder's management who is authorized to fully implement the oil spill contingency plan, who shall review the plan for accuracy, feasibility, and executability. If this executive does not have training, knowledge and experience in the area of oil spill prevention and response, the certification statement must also be signed by another individual within the plan holder's management structure who has this requisite training, knowledge, and experience. The certification shall be submitted according to the following format;

> "I certify, to the best of my knowledge and belief, under penalty of perjury under the laws of the State of California, that the information contained in this contingency plan is true and correct and that the plan is both feasible and executable."
>
> _____(signature), (title), (date);

(E) The California Certificate of Financial Responsibility (COFR) number for the small marine fueling facility shall be included in the front of the plan. If the COFR is not available when the plan is submitted because the facility is not yet operational, the COFR number must be pro-

vided as soon as it becomes available. The COFR number must be provided before the plan can be approved.

(2) Each plan shall identify a Qualified Individual, as defined in Chapter 1, Section 790 of this subdivision, and any alternates that may be necessary for the purpose of implementing the plan, and documentation that the Qualified Individual acknowledges this capacity. If an alternate or alternates are identified in the plan, then the plan shall also describe the process by which responsibility will be transferred from the Qualified Individual to an alternate. During spill response activities, notification of such a transfer must be made to the State Incident Commander at the time it occurs.

(3) Each plan shall provide the name, address, telephone number and facsimile number of an agent for service of process designated to receive legal documents on behalf of the plan holder, and documentation that the agent for services of process acknowledges this capacity. Such agent shall be located in California.

(4) Each plan shall identify a Spill Management Team (as defined in Section 815.05(p) of this subchapter), and provide documentation that the Spill Management Team acknowledges this capacity.

(5) Each plan shall contain a copy of the contract or other approved means (as defined in Section 815.05(b) of this subchapter), verifying that any oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill. Plan holders shall only contract with an OSRO(s) that has received a Rating by OSPR (as specified in Section 819 of this subchapter) for the booming, on-water recovery and storage, and shoreline protection services required.

(b) Small Marine Fueling Facility Description

(1) Each plan shall describe the small marine fueling facility's design and operations with specific attention to those areas from which an oil spill could occur. This description shall include, at a minimum, the following information:

(A) For small marine fueling facilities (except for those mobile transfer units addressed under Subsection (B) below):

1. a piping and instrumentation diagram, and a tank diagram including the location of pumps, valves, vents and lines; the number, and oil storage capacity of each structure covered under the plan and its age, design, construction and general condition; the range of oil products normally stored in each structure; the presence or absence of containment structures and equipment; and the location of mooring areas, oil transfer locations, control stations, safety equipment, drip pans and the drainage for drip pans;

(B) For mobile transfer units:

1. an instrumentation and tank diagram of the mobile transfer unit tankage and fueling components:

(C) a description of the types, physical properties, health and safety hazards, maximum storage or handling capacity and current normal daily throughput of oil handled. A material safety data sheet (MSDS) or equivalent will meet some of these requirements and can be maintained separately at the small marine fueling facility providing the plan identifies its location;

(D) a description of the normal procedures for transferring oil, and the amount, frequency and duration of the oil transfers; and

(E) the small marine fueling facility's normal hours of operation.

(c) Prevention Measures

Each plan shall address prevention measures in order to reduce the possibility of an oil spill occurring as a result of an oil transfer. The prevention measures must eliminate or mitigate all the hazards identified in the Risk and Hazard Analysis.

(1) Risk and Hazard Analysis

(A) Each plan shall provide a history of the significant spills from the small marine fueling facility for either the 10 year period prior to the date of plan submittal, or from the date the facility became operational, whichever is shorter. As used in this section, a significant spill is one which had a deleterious impact on the local environment, or caused the physical layout of the facility or the facility's operations procedures to be modified. This information shall include:

1. a written description of sites, equipment or operations with a history of oil spills;

2. the cause and size of any historical spill. The causes to be considered shall include such factors as operator error, or a failure of the system or subsystem from which the spill occurred;

3. a brief summary of the impact of the spills; and

4. a description of the corrective actions taken in response to any and all spills included in the historical data.

(B) Each small marine fueling facility shall conduct a Risk and Hazard Analysis to identify the hazards associated with the operation of the small marine fueling facility, including operator error, the use of the facility by various types of vessels, equipment failure, and external events likely to cause an oil spill.

The owner/operator may use the "What-If Analysis" hazard evaluation method or an equivalent method identified by the American Institute of Chemical Engineers.

(C) The chosen hazard evaluation method must be conducted in accordance with the guidelines established by the American Institute of Chemical Engineers as published in the "Guidelines for Hazard Evaluation Procedures", second edition, copyright 1992, prepared for The Center For Chemical Process Safety.

1. The plan must include information regarding the expertise of the working group that develops the analysis.

2. The plan must include information that demonstrates to the Administrator that the analysis is appropriate to the small marine fueling facility and adequate according to the published procedures referenced in (C) above.

3. An owner/operator may be found in violation of this section if the Risk and Hazard Analysis does not adequately address the risks posed by the small marine fueling facility.

4. The Administrator may require that an analysis be updated if there are significant changes made to the small marine fueling facility. A significant change, as used in this paragraph, is one that would have an impact on the outcome of the Risk and Hazard Analysis.

5. Additional information regarding the analysis method used or the working group that conducted the analysis shall be made available to the Administrator upon request.

(D) Each plan shall include a summary of the results of the Risk and Hazard Analysis. The summary shall include the following:

1. the hazard analysis method used, and a statement that the analysis is specific to the small marine fueling facility. If the analysis relies on a risk assessment at a similar facility, the summary shall specify how the two facilities are comparable;

2. an inventory of the hazards identified, including the hazards that resulted in the historical spills;

3. an analysis of the potential oil discharges, including the size, frequency, cause, duration and location of all significant spills from the small marine fueling facility as a result of each major type of hazard identified;

4. the control measures that will be used to mitigate or eliminate the hazards identified. The plan shall include timeframes for implementing any control measures that cannot be functional immediately; and

5. a prediction of the potential oil spills that might still be expected to occur after any mitigating controls have been implemented.

(E) All supporting documentation used to develop the Risk and Hazard Analysis summary shall be made available to the Administrator upon request.

(2) Off-Site Consequence Analysis:

For the significant hazards identified in the Risk and Hazard Analysis required under this section, the small marine fueling facility (except for mobile transfer units, as defined in Chapter 1, Section 790 of this subdivision) shall conduct a trajectory analysis to determine the Off-Site Consequences of an oil spill. This analysis shall assume pessimistic water and air dispersion and other adverse environmental conditions such that the worst possible dispersion of the oil into the air or onto the water will be considered. This analysis is intended to be used as the basis for determin-

ing the areas and shoreline types for which response strategies must be developed. Some of the information required in this subsection may be drawn from the appropriate Area Contingency Plans completed by the U.S. Coast Guard, State Agencies, and Local Governments pursuant to the Oil Pollution Act of 1990. If information is available, the plan holder may make reference to that information (i.e., specify where the information can be found) and does not need to duplicate it in the plan. The analysis, which shall be summarized in the plan, shall include at least the following:

(A) a trajectory, or series of trajectories, to determine the potential direction, rate of flow and time of travel of the reasonable worst case oil spill from the small marine fueling facility to marine waters and to the shorelines, including shallow-water environments, that may be impacted. For purposes of this requirement, a trajectory or trajectories (projected for a minimum of 72 hours) that determine the outer perimeter of a spill, based on regional extremes of climate, tides, currents and wind with consideration to seasonal differences, shall be sufficient;

(B) for each probable shoreline that may be impacted, a discussion of the general toxicity effects and persistence of the discharge based on type of product; the effect of seasonal conditions on sensitivity of these areas; and an identification of which areas will be given priority attention if a spill occurs.

(3) Resources at Risk from Oil Spills:

Based on the trajectory of the spilled oil as determined in the Off-Site Consequence Analysis, each small marine fueling facility plan (except for mobile transfer units, as defined in Chapter 1, Section 790 of this subdivision) shall identify the environmentally, economically and culturally sensitive sites that may be impacted. Each plan shall identify and provide a map of the locations of these areas. Some of the information required in this subsection may be drawn from the appropriate Area Contingency Plans completed by the U.S. Coast Guard, State Agencies, and Local Governments pursuant to the Oil Pollution Act of 1990. If information is available, the plan holder may make reference to that information (i.e., specify where the information can be found) and does not need to duplicate it in the plan.

(A) The map of environmentally sensitive sites shall include:

1. shoreline types and associated marine resources;

2. the presence of migratory and resident marine bird and mammal migration routes, and breeding, nursery, stopover, haul-out, and population concentration areas by season;

3. the presence of aquatic resources including marine fish, invertebrates, and plants including important spawning, migratory, nursery and foraging areas;

4. the presence of natural terrestrial animal and plant resources in marine-associated environments;

5. the presence of state or federally-listed rare, threatened or endangered species;

6. the presence of commercial and recreational fisheries including aquaculture sites, kelp leases and other harvest areas.

(B) The map of the locations of economically and culturally sensitive sites shall include:

1. public beaches, parks, marinas, boat ramps and diving areas;

2. industrial and drinking water intakes, power plants, salt pond intakes, and other similarly situated underwater structures;

3. off-shore oil and gas leases and associated drilling/production platforms;

4. known historical and archaeological sites;

5. areas of cultural or economic significance to Native Americans; and

6. the major waterways and vessel traffic patterns that are likely to be impacted.

(4) Required Prevention Measures

(A) Each small marine fueling facility shall implement all prevention measures to reduce or mitigate the potential hazards identified in the Risk and Hazard Analysis.

(B) In addition, each plan shall include the following:

1. schedules, methods and procedures for testing, maintaining and inspecting hoses, mobile transfer unit tankage and fueling components, and other structures within or appurtenant to the small marine fueling facility, that contain or handle oil which may impact marine waters if a failure occurs. Any information developed in compliance with Title 33 CFR, Part 154; Title 49 CFR, Part 195; and/or Title 5, Division 1, Part 1, Chapter 5.5 of the Government Code may be substituted for all or part of any comparable prevention measures required by this subsection;

2. methods to reduce spills during transfer and storage operations, including overfill prevention measures and immediate spill containment provisions. Any information developed in compliance with Title 2, CCR, Division 3, Chapter 1, Article 5.5; and/or Title 33 CFR, Parts 154 and 156 may be substituted for all or part of any comparable prevention measures required by this subsection;

3. procedures to assure clear communication among all the parties involved during transfer operations. Any information developed in compliance with Title 2, CCR, Division 3, Chapter 1, Article 5.5; Title 14, CCR, Division 1, Subdivision 4, Chapter 3, Subchapter 6; and/or Title 33 CFR, Parts 154 and 156 may be substituted for all or part of any comparable prevention measures required by this subsection;

4. the plan holder shall provide additional relevant information to the Administrator upon request.

(d) Containment Booming and On-Water Recovery

Each plan holder must a contract or other approved means for containment booming and on-water recovery response resources up to their Response Planning volume for all potential oil spills from the small marine fueling facility. To determine the amount of response resources for containment booming and on-water recovery, each plan holder must calculate a Response Planning Volume as outlined below:

(1) Reasonable Worst Case Spill

To calculate the Response Planning Volume, it is first necessary to determine the reasonable worst case spill size as follows:

(A) For small marine fueling facilities (except for mobile transfer units which are addressed in Subsection (B) below):

1. the amount of additional spillage that could reasonably be expected to enter California marine waters during emergency shut-off, transfer or pumping operations if each hose or pipeline ruptures or becomes disconnected, or if some other incident occurs which could cause or increase the size of an oil spill. The spillage shall be calculated as follows: the maximum time to discover the release from the pipe or hose in hours, plus the maximum time to shut down flow from the pipe or hose in minutes or hours (based on historic discharge data or the best estimate in absence of historic discharge data for the facility) multiplied by the maximum flow rate expressed in barrels per hour (based on the maximum relief valve setting or maximum system pressure when relief valves are not provided) plus the total linefill drainage volume expressed in barrels.

(B) For mobile transfer units:

1. the total tank storage capacity.

(C) The calculations, and such parameters as flow rates, linefill capacities and emergency shutoff times, that are used to determine a small marine fueling facility's reasonable worst case spill shall be submitted as part of the plan. The Administrator may review and test these parameters as part of the drill conducted in accordance with Subsection 816.03(b).

(2) Persistence and Emulsification Factors

(A) The reasonable worst case spill volume is then multiplied by a persistence factor relative to the most persistent type of oil that may be spilled. The persistence factors are specified below:

Oil Group	Group 1	Group 2	Group 3	Group 4
Persistence Multiplier	.20	.50	.50	.50

(B) Emulsification Factors

The volume determined from the calculation in Subparagraph (A) is then multiplied by one of the following emulsification factors, again, based on the type of oil.

Oil Group	Group 1	Group 2	Group 3	Group 4
Emulsification Multiplier	1.0	1.8	2.0	1.4

(C) Response Planning Volume

The total determined by the above calculation is a Response Planning Volume.

1. The Response Planning Volume is used to determine the amount of Response Equipment and Services that must be under contract.

2. All calculations used to determine the Response Planning Volume shall be included in the plan.

(3) Response Capability Standards

The standards set forth in this section may not reflect the exigencies of actual spill response. However, these are the standards that must be used to determine the amount of equipment and personnel that must be under contract or other approved means. Response resources in addition to those under contract must be identified, and a call–out procedure in place to access this equipment, if the small marine fueling facility has a spill that exceeds these planning standards. The owner/operator is ultimately responsible for addressing the entire volume of an actual spill regardless of the planning standards.

(A) Total Response Resources Required

1. The total amount of on–water containment and recovery equipment and services required shall be the amount necessary to address the Response Planning Volume determined in Sections 817.03(d)(1) & (2) as follows:

i. sufficient on–water containment and recovery equipment and services to respond to 50% of the calculated Response Planning Volume within two hours of notification.

ii. sufficient on–water containment and recovery equipment and services to respond to the remaining 50% of the calculated Response Planning Volume within 12 hours of notification.

2. The timeframes for equipment delivery and deployment as specified in this subsection do not take into account the time required to conduct a health and safety assessment of the site as set forth in Subsection 817.03(f)(6), and as required by the California Occupational and Safety Administration. In addition, these timeframes do not account for delays that may occur due to weather or seastate. The actual time necessary to deliver and deploy equipment will be assessed at the time of an incident or a drill and will take into account the prevailing conditions of weather and seastate, as well as the site assessment requirements.

(4) Transfer Operations

Each plan shall demonstrate that the small marine fueling facility, not including mobile transfer units, owns or has access to sufficient and appropriate boom, trained personnel and equipment, maintained in a stand–by condition, such that at least 600 feet of boom can and will be deployed for the most effective containment immediately, but no longer than 30 minutes after the discovery of a spill. Additionally, each plan holder shall identify the equipment, personnel and procedures such that an additional 600 feet of boom can and will be deployed within one hour for the most effective containment in the event of an oil spill. Response resources owned or under contract to the small marine fueling facility or vessel engaged in oil transfer operations may be used to meet these requirements.

(5) On–Water Response Equipment and Services

(A) Each plan shall demonstrate that the small marine fueling facility owns or has under contract or other approved means (as defined in Section 815.05(b) of this subchapter), access to all the necessary equipment, services, and personnel to comply with the Response Capability Standards established in Subsection 817.03(d). The amount of response equipment required shall take into account the effective daily recovery capacity (as defined in Chapter 1, Section 790 of this subdivision) of the oil recovery equipment.

(B) The equipment identified for a specific area must be appropriate for use in that area given the limitations of the geography, bathymetry, water depths, tides, currents and other local environmental conditions. For those areas that require shallow–water response capability (refer to the relevant U.S. Coast Guard Area Contingency Plan), the plan shall provide for an adequate number of shallow–draft vessels (as defined in Section 815.05 of this subchapter) and for adequate booming and other shoreline protective resources to be owned or under contract or other approved means and available to respond to provide shoreline protection of all sensitive sites identified in the trajectory analysis conducted as part of the Off–site Consequence Analysis. Additionally, the equipment identified shall also be appropriate for use on the type of oil identified. To the extent that the following information is provided by a Rated OSRO, evidence of a contract or other approved means with a Rated OSRO will suffice:

1. the location, inventory and ownership of the equipment to be used to fulfill the response requirements of this subchapter;

2. the type and capacity of storage and transfer equipment matched to the skimming capacity of the recovery systems;

3. the manufacturer's rated capacities and the operational characteristics for each major item of oil recovery equipment;

4. the effective daily recovery capacity (as defined in Chapter 1, Section 790 of this subdivision) for each major piece of on–water recovery equipment listed, as well as the effective daily recovery capacity for the skimming systems as a whole.

i. A request may be submitted to the Administrator to review the effective daily recovery capacity for a piece of equipment if it can be shown that the equipment has a different capacity than the derating factor allows.

ii. The Administrator's decision regarding a change in the effective daily recovery capacity for a piece of equipment will be issued as soon as administratively feasible.

5. vessels designated for oil recovery operations, including skimmer vessels and vessels designed to tow and deploy boom and availability of shallow–draft vessels;

6. procedures for storage, maintenance, inspection and testing of spill response equipment under the immediate control of the operator;

(e) Shoreline Protection and Clean–up

Each plan must provide for shoreline protection and clean–up of all potential spills from the small marine fueling facility. The equipment identified for a specific area must be appropriate for use in that area given the limitations of the bathymetry, geomorphology, shoreline types and other local environmental conditions. Additionally, the equipment identified shall be appropriate for use on the type of oil identified.

(f) Response Procedures

(1) Each plan shall describe the organization of the small marine fueling facility's spill response management team. An organizational diagram depicting the chain of command shall also be included. Additionally, the plan shall describe the method to be used to interface the plan holder's organization into the State Incident Command System and/or the Unified Command Structure as required by Title 8, California Code of Regulations, Subsection 5192(q)(3)(A).

(A) The plan holder may utilize the procedures outlined in the appropriate Federal Area Contingency Plan when describing how the small marine fueling facility's chain of command will interface with the State Incident Command System which utilizes the Unified Command Structure.

(2) Each plan shall describe how the plan holder will provide emergency services before the arrival of local, state or federal authorities on the scene, including:

(A) procedures to control fires and explosions, and to rescue people or property threatened by fire or explosion;

(B) procedures for emergency medical treatment and first aid;

(3) Each plan shall include a checklist, flowchart or decision tree depicting the procession of each major stage of spill response operations from spill discovery to completion of clean–up. The checklist, flowchart, or decision tree shall describe the general order and priority in which key spill response activities are performed.

(4) Each plan shall describe equipment and procedures to be used by small marine fueling facility personnel to minimize the magnitude of a spill and minimize structural damage which may increase the quantity of oil spilled.

(A) Spill mitigation procedures shall include immediate containment strategies, methods to stop the spill at the source, methods to slow or stop leaks, and methods to achieve immediate emergency shutdown.

(5) Each plan shall provide for post–spill review, including methods to review both the effectiveness of the plan and the need for plan amendments.

(A) The result of the review shall be forwarded to the Administrator within 90 days following the completion of response and clean–up procedures.

(B) The review shall be used by the Administrator only for the purposes of proposing future amendments to the contingency plan.

(6) Prior to beginning spill response operations and/or clean–up activities, a Site Safety Plan must be completed. Each Site Safety plan shall describe the procedures to be used for the development of the Site Safety Plan required pursuant to Title 8, Section 5192(b)(4)(B) of the California Code of Regulations.

(g) Notification Procedures

(1) Each plan shall include a list of contacts to call in the event of a drill, threatened discharge of oil, or discharge of oil. The plan shall:

(A) detail the procedures for reporting oil spills to all appropriate local, state, and federal agencies;

(B) identify a central reporting office or individual who is responsible for initiating the notification process and is available on a 24–hour basis. The individual making this notification must be fluent in English. The following information must be provided:

1. the individual or office to be contacted;

2. telephone number or other means of contact for any time of the day; and

3. an alternate contact in the event the individual is unavailable.

(C) establish a clear order of priority for notification.

(2) Immediate Notification

Nothing in this section shall be construed as requiring notification before response.

(A) Each plan shall include a procedure for contacting the OSRO, or other initial response resources if an OSRO is not being used, immediately, but no longer than 30 minutes, after the discovery of a discharge of oil or threatened discharge of oil.

(B) Each plan shall include a procedure that ensures that the owner/operator or his/her designee will initiate contact with the Qualified Individual, the California Governor's Office of Emergency Services and the National Response Center immediately, but no longer than 30 minutes, after discovery of a discharge of oil or threatened discharge of oil.

(C) All phone numbers necessary to complete the immediate notification procedures must be included in the response manual.

(3) Each plan shall identify a call–out procedure to acquire the resources necessary to address spills that cannot be addressed by the equipment that the owner/operator owns or has under contract. Procedures must allow for initiation of the call–out within 24 hours of the incident and must begin as soon as a determination has been made that additional resources are necessary.

(4) Each plan shall provide a checklist of the information to be reported in the notification procedures, including but not limited to:

(A) small marine fueling facility name and location;

(B) date and time of the incident;

(C) the cause and location of the spill;

(D) an estimate of the volume of oil spilled and the volume at immediate risk of spillage;

(E) the type of oil spilled, and any inhalation hazards or explosive vapor hazards, if known;

(F) the size and appearance of the slick;

(G) prevailing weather and sea conditions;

(H) actions taken or planned by personnel on scene;

(I) current condition of the small marine fueling facility;

(J) injuries and fatalities; and

(K) any other information as appropriate.

(5) Reporting of a spill as required by Subsection 817.03(g)(2) shall not be delayed solely to gather all the information required by Subsection 817.03(g)(4).

(6) An updated estimate of the volume of oil spilled and the volume at immediate risk of spillage shall be reported to the California Governor's Office of Emergency Services whenever a significant change in the amount reported occurs, but not less than every 12 hours within the first 48 hours of response. The State Incident Commander and/or the Federal On–Scene Coordinator through the Unified Command shall have the option of increasing or decreasing this timeframe, as needed. Updated spill volume information included in the Incident Action Plan developed through the Unified Command will meet the requirements of this subsection.

(h) Temporary Storage and Waste Management

(1) Each plan shall identify sufficient temporary storage for all recovered oil or all oily waste, and identify facilities that would be able to accept the recovered oil or oily waste for recycling or other means of waste management. Sufficient storage shall be no less than two times the calculated Reasonable Worst Case Spill volume as determined in Section 817.03(d)(1).

(2) Each plan shall identify the party that shall maintain responsibility for recovered oil and oily waste for the purposes of temporary storage.

(3) Each plan shall describe site criteria and methods used for temporary storage of recovered oil and oily wastes generated during response and clean–up operations, including sites available within the small marine fueling facility or near the spill area.

(4) Each plan shall identify all applicable permits, and all federal, state and local agencies responsible for issuing those permits for transit, temporary storage and ultimate waste management of all wastes likely to result from an oil spill.

(5) Each plan shall include information which could expedite the state approval process for the use of temporary waste storage sites, including a list of appropriate contacts and a description of procedures to be followed for each approval process.

(i) Oiled Wildlife Care Requirements

Each plan shall describe how oiled wildlife care will be provided by one of the following approved means:

(1) Utilize the California Oiled Wildlife Care Network (OWCN) to meet oiled wildlife care requirements: or

(2) describe procedures that clearly outline how oiled wildlife care will be provided. The equipment, facilities, and personnel necessary to implement these procedures must be identified and assured by contract for each Geographic Area covered by the plan. Standards and written protocols for wildlife care must comply with all applicable State and federal laws.

(j) Training

(1) Each plan shall provide that all appropriate personnel employed by the small marine fueling facility shall receive training in the use and operation of oil spill response and clean–up equipment. The plan shall describe:

(A) the type and frequency of training that each individual in a spill response position receives to achieve the level of qualification demanded by their job description;

(2) Each plan shall describe the type and frequency of personnel training on methods to reduce operational risks. The description of the training shall include, if applicable, the following:

(A) any established training objectives that address potential spill sources and causes that were identified in the Risk and Hazard Analysis.

(B) the means of achieving any established training objectives, such as:

1. a training schedule, including adequate frequency, (e.g., initial training upon hire and annual refresher training) and type of training (workshops, classroom, videotape, on–the–job training, etc.) for each position trained;

(C) any licenses, certifications or other prerequisites required to hold particular jobs.

(D) A plan holder whose small marine fueling facility is subject to and in compliance with State Lands Commission training regulations; Title 2, Division 3, Chapter 1, Article 5.3, CCR Sections 2540 through 2548, shall be considered in compliance with the training provisions of this subsection.

(3) Each plan shall provide for safety training as required by state and federal health and safety laws for all personnel likely to be engaged in oil spill response, including a program for training non–permanent responders such as volunteers or temporary help.

(4) The small marine fueling facility owner/operator shall ensure that training records are maintained for three years. All such documentation must be made available to the Administrator upon request.

(k) Drills and Exercises

(1) Each plan shall describe the small marine fueling facility's drill and exercise program that meets the requirements of Section 820.01(a) to ensure that the elements of the plan will function in an emergency.

(2) Drills shall be designed to exercise either individual components of the plan or the entire response plan. Such drills, individually or in combination, shall ensure that the entire plan is exercised at least once every three years.

NOTE: Authority cited: Sections 8670.7, 8670.28, 8670.29 and 8670.30, Government Code. Reference: Sections 8670.7, 8670.10, 8670.25.5, 8670.28, 8670.29, 8670.30, 8670.31 and 8670.37.51, Government Code.

HISTORY

1. New section filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
2. Change without regulatory effect amending subsections (f)(1) and (j)(2)(D) and amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
3. Amendment of subsection (a)(4) and amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
4. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 818. Tank Vessel Contingency Plans.

HISTORY

1. New heading filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Editorial correction of section heading (Register 95, No. 41).
3. Amendment of heading filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 818.01. Applicability.

(a) Plans

Unless tank vessels are exempt as provided in Subsection (b) below, oil spill contingency plans shall be prepared, submitted and used pursuant to the requirements of this section by all tank vessels which transit in the marine waters (as defined in Section 815.05 of this subchapter) of California, or conduct business in the state. Business in the state would include such transactions as lightering operations off the coast of California.

(b) Exemptions

(1) This subchapter shall not apply to a tank vessel that enters the marine waters of the state because of imminent danger to the crew, or in an effort to prevent an oil spill or other harm to public safety or the environment. This exemption applies if the following are met:

(A) the operator and crew comply with all orders given by the Administrator or his/her designee, unless the orders are contradicted by orders from the U.S. Coast Guard;

(B) except for fuel, oil may be transferred to or from the tank vessel only if permission is obtained from the Administrator and one of the following conditions is met;

1. the transfer is necessary for the safety of the crew; or

2. the transfer is necessary to prevent harm to public safety or the environment; or

3. a contingency plan is approved or made applicable to the tank vessel.

(C) the tank vessel shall leave the marine waters of the state as soon as it is safe to do so, unless a contingency plan is approved or made applicable to its operation.

(2) Operation Without a Plan

(A) A tank vessel may enter marine waters without an approved contingency plan if the Administrator approves entrance under the plan of the terminal or tanker that is the destination of the tank vessel. The Administrator's approval can be communicated by telephone or facsimile and is subject to the following:

1. the operator of the terminal or tanker provides the Administrator with advance written assurance that the operator assumes full responsibility for the tank vessel while it is traveling to or from the terminal or tanker. Such assurance may be delivered by hand, by mail or by facsimile. If delivered by facsimile the original must follow;

2. the contingency plan includes all conditions pertinent to a tank vessel;

3. the tank vessel meets all the requirements of the terminal or tanker's contingency plan; and,

4. the tank vessel has not made a similar entrance into marine waters in the preceding 12 month period.

(B) A tank vessel in marine waters pursuant to Subsection 818.01(b)(2) shall be operated in accordance with the tank vessel's operations manual. In the event of an oil spill, the tank vessel operator shall comply with the directions of the Administrator and the applicable contingency plan of the terminal or tanker.

(3) Response Vessels

Contingency plans are not required for dedicated response vessels, which are those vessels that are dedicated to conducting response activities for an oil spill incident exclusively.

(4) Innocent Passage

Contingency plans are not required for vessels engaged in innocent passage (as defined in Section 815.05 of this subchapter) within the marine waters of California.

NOTE: Authority cited: Section 8670.28, Government Code. Reference: Sections 8670.30, 8670.33, and 8670.34, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Change without regulatory effect amending subsection (a) and amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
4. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 818.02. Tank Vessel Plan Content (Except for Those Vessels Carrying Oil As Secondary Cargo Addressed in Section 818.03 of This Subchapter).

To the degree the information required by Subsections 818.02(b) through (m) exists elsewhere, copies of the pre–existing information may be submitted. If the information provided is not sufficient to meet the requirements of this subchapter, additional information may be requested by the Administrator.

(a) Introductory Material

(1) Each plan shall provide the following information for each tank vessel covered by the plan:

(A) the tank vessel's name, country of registry, year built, classification society, radio call sign, and Lloyd's IMO identification number. For U.S. flagged (registered) tank vessels without a Lloyd's IMO identifica-

tion number, the vessel's official number (also known as the document number) shall be used;

(B) name, address, phone number, fax number and e-mail address, of the owner and/or operator of the tank vessel(s). This information shall be referenced in the plan title or on a title page at the front of the plan;

(C) the name, address, phone number, fax number and e-mail address, of the person to whom correspondence should be sent;

(D) the tank vessel's classification, hull type, gross registered tonnage (GRT), maximum cargo amounts, length, draft and beam;

(E) a certification statement signed under penalty of perjury by an executive within the plan holder's management who is authorized to fully implement the oil spill contingency plan, who shall review the plan for accuracy, feasibility, and executability. If this executive does not have training, knowledge and experience in the area of oil spill prevention and response, the certification statement must also be signed by another individual within the plan holder's management structure who has this requisite training, knowledge, and experience. The certification shall be submitted according to the following format;

> "I certify, to the best of my knowledge and belief, under penalty of perjury under the laws of the State of California, that the information contained in this contingency plan is true and correct and that the plan is both feasible and executable."
>
> _____(signature), (title), (date);

(F) the California Certificate of Financial Responsibility (COFR) number for the tank vessel(s) covered by the plan shall be included in the front of the plan, or for fleet plans shall be listed separately in a subsection of the plan.

(2) Each plan shall identify a Qualified Individual, as defined in Chapter 1, Section 790 of this subdivision, and any alternates that may be necessary for the purpose of implementing the plan. If the plan holder contracts for this service, documentation that the Qualified Individual or company, and any identified alternates, acknowledge this capacity shall be included in the plan. If an alternate or alternates are identified in the plan, then the plan shall also describe the process by which responsibility will be transferred from the Qualified Individual to an alternate. During spill response activities, notification of such a transfer must be made to the State Incident Commander at the time it occurs.

(3) Each plan shall provide the name, address, telephone number and facsimile number of an agent for service of process designated to receive legal documents on behalf of the plan holder. If the plan holder contracts for this service, documentation that the agent for services of process acknowledges this capacity shall be included in the plan. Such agent shall be located in California.

(4) Each plan shall identify a Spill Management Team (as defined in Section 815.05(p) of this subchapter). If the plan holder contracts for this service, documentation that the Spill Management Team acknowledges this capacity shall be included in the plan.

(5) Each plan shall contain a copy of the contract or other approved means (as defined in Section 815.05(b) of this subchapter), verifying that any oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill. This requirement can be met by a copy of the basic written agreement with an abstract of the recovery and/or cleanup capacities covered by the contract. Plan holders shall only contract with an OSRO(s) that has received a Rating by OSPR (as specified in Section 819 of this subchapter) for the booming, on-water recovery and storage, and shoreline protection services required.

(b) Tank Vessel Description

(1) Each plan shall describe the tank vessel's design and operations with specific attention to those areas from which a spill could reasonably be expected to impact the marine waters of California. This description shall include, at a minimum, the following information:

(A) a piping and tank diagram including the location of valves, vents and lines; the age, design, and construction of the tank vessel; the range of oil products normally carried in each structure; and safety equipment;

(B) a description of the types, physical properties, health and safety hazards and maximum storage or handling capacity of the oil or product carried. A material safety data sheet (MSDS) or equivalent will meet some of these requirements and can be maintained separately aboard the tank vessel providing the plan identifies its location.

(c) Prevention Measures

(1) Each plan holder shall take all appropriate prevention measures designed to reduce the possibility of an oil spill occurring as a result of collisions, groundings, explosions or operator error during the operation of the tank vessel. These prevention measures shall include, but not be limited to, the following:

(A) documented safe practices in ship operations and a safe working environment;

(B) safeguards against all identified risks and hazards;

(C) properly documented and updated procedures related to safety and pollution prevention;

(D) ensuring personnel are qualified, medically fit and hold proper licenses;

(E) ensuring personnel know how to operate emergency equipment;

(F) ensuring personnel are trained in emergency preparedness (e.g., fire and boat drills, oil spill response, etc.);

(G) appropriate system monitoring duties are performed;

(H) proper preventive maintenance, inspection and testing of equipment or systems, the failure of which could result in a hazardous situation. This includes, but is not limited to, emergency equipment, cargo system integrity, alarms and emergency shutdowns, oil transfer system integrity, and oily water separator;

(I) internal and external audits to verify compliance of actual practice with documented systems, and to assure continuous review and improvement of safety and pollution prevention systems and processes.

(2) Submitting the following documents as appropriate, and maintaining compliance with the state requirements cited in (c)(1)(C) above, will be considered a demonstration of compliance with this subsection (c):

(A) The owner/operator of a U.S. flag tank vessel shall submit a valid Certificate of Inspection (COI) issued by the U. S. Coast Guard. The owner/operator of a foreign flag tank vessel shall submit valid certificates issued by a member of the International Association of Classification Societies certified by the International Maritime Organization (IMO) of the most recent vessel inspection.

(B) The owner/operator shall also submit a valid Safety Management Certificate (SMC) for each vessel covered by the plan, as well as a Document of Compliance (DOC) to demonstrate compliance with the performance elements in the International Safety Management (ISM) Code subject to IMO Resolution A.741(18), or shall submit proof of compliance with the American Waterways Operators (AWO) Responsible Carrier Program, if applicable.

(C) Where a plan holder's tank vessel is engaged in transfer operations at a facility subject to Public Resources Code 8755, and the plan holder is in compliance with State Lands Commission regulations for oil transfer operations, the plan holder shall be considered in compliance with rules and regulations for preventions of oil spills at marine terminals.

(d) Planning for the Location of Response Resources

The owner/operator must be prepared to respond to a spill anywhere within the marine waters of California where the tank vessel transits. To determine the regions in which response equipment and personnel must be available, the owner/operator shall include in the plan a description of the vessel's normal routes of travel including a list of each of the six Geographic Regions that the vessel transits along these routes. OSPR has developed Shoreline Protection Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website) for vessel traffic in California's marine waters. Owners/operators shall meet the response resource and time frame requirements from the appropriate SP Tables when contracting for shoreline protection services.

(e) Containment Booming and On-Water Recovery

Each plan holder must provide a contract or other approved means for containment booming and on-water recovery response resources up to their Response Planning Volume for all potential spills from the tank vessel that could reasonably be expected to impact the marine waters of

California. Each plan must demonstrate response resources sufficient to address potential spills in each Geographic Response Plan Area (GRA) if available, or Geographic Region through which the tank vessel may transit. (GRA's are geographic subdivisions of ACP areas). To determine the amount of response resources for containment booming and on-water recovery, each plan holder must calculate a Response Planning Volume as outlined below:

(1) Reasonable Worst Case Spill

To calculate the Response Planning Volume, it is first necessary to determine the reasonable worst case spill for each tank vessel. The reasonable worst case spill is calculated as 25% of the tank vessel's total cargo capacity.

(2) Persistence and Emulsification Factors

(A) The reasonable worst case spill volume is then multiplied by a persistence factor relative to the most persistent type of oil that each tank vessel carries over the marine waters of California. The persistence factors are specified below:

Oil Group	Group 1	Group 2	Group 3	Group 4
Persistence Multiplier	.20	.50	.50	.50

(B) Emulsification Factors

The volume determined from the calculation above is then multiplied by one of the following emulsification factors, again, based on the type of oil.

Oil Group	Group 1	Group 2	Group 3	Group 4
Emulsification Multiplier	1.0	1.8	2.0	1.4

(C) Response Planning Volume

The total determined by this calculation is a Response Planning Volume.

1. The Response Planning Volumes to be used to determine the amount of equipment and services that must be under contract or other approved means, shall be the greater of the amount necessary to address the Response Planning Volume as calculated in Subsections 818.02(e)(1)-(2) or the Planning Volume for On-water Recovery for Inland/Nearshore Environment calculated for the vessel's federal response plan prepared pursuant to 33 CFR, Part 155, Appendix B. The Planning Volume for On-water Recovery is the Adjusted Volume from the federal calculations determined prior to establishing response tiers utilizing the mobilization factors;

2. the calculations used to determine the Response Planning Volume shall be included in the plan.

(3) Response Capability Standards

The equipment and personnel necessary to address the Response Planning Volume is brought to the scene of the spill over a period of time. The timeframes are dependent upon the GRA or Geographic Region in which the tank vessel transits and is specified in the tables in this subsection.

The standards set forth in this section are only planning standards and may not reflect the exigencies of actual spill response. However, these are the standards that must be used to determine the amount of equipment and personnel that must be under contract or other approved means. Response resources in addition to those under contract must be identified and a call-out procedure in place to access this equipment if the tank vessel has a spill that exceeds the Response Planning Volumes. The owner/operator is ultimately responsible for addressing the entire volume of an actual spill regardless of the planning volume.

(A) On-Water Daily Recovery Rates and Containment Boom Amounts

1. The total amount of on-water recovery equipment and services required shall be the lesser of the amount necessary to address the Daily Recovery Rates established in Subsection 818.02(e)(3)(B) below or the Response Planning Volume determined in Subsection 818.02(e)(2)(C).

2. The amount of response resources and the timeframes for delivery are specified in Subsection 818.02(e)(3)(B)(4) below. The barrels per day capability figure is the total amount of on-water recovery equipment that must be at the scene of the spill at the hour specified which is measured from the time of notification, as described in this subchapter. All on-water recovery response resources shall be capable of being deployed and operable within one hour of arrival at the scene of the spill or drill but no later than the designated timeframe for each risk zone.

3. The equipment identified for a specific area must be appropriate for use in that area given the limitations of the geography, bathymetry, water depths, tides, currents and other local environmental conditions. For those areas that require shallow-water response capability (refer to the relevant U.S. Coast Guard Area Contingency Plan), the plan shall provide for an adequate number of shallow-draft vessels (as defined in Section 815.05 of this subchapter) to be owned or under contract or other approved means. Additionally, the equipment identified shall also be appropriate for use on the type of oil identified.

4. The timeframes for equipment delivery and deployment as specified in this Subsection do not take into account the time required to conduct a health and safety assessment of the site as set forth in Subsection 818.02(g)(9), and as required by the California Occupational and Safety Administration. In addition, these timeframes do not account for delays that may occur due to weather or seastate. The actual time necessary to deliver and deploy equipment will be assessed at the time of an incident or a drill and will take into account the prevailing conditions of weather and seastate, as well as the site assessment requirements.

(B) Daily Recovery Rate

1. Vessels that transit in High-Volume Ports.

DELIVERY TIME (HRS)	12	24	36	60
BBLS/DAY CAPABILITY	23,437	31,250	46,875	78,125

i. Tank Vessels that transit: 1) inward of the inland line of demarcation as described in 33 CFR, Section 80.1142 for San Francisco harbor, and 2) inwards of a six nautical mile radius of Long Beach Light (LLNR 3025) [33-43.4N, 118-11.2W] outside the entrance to the Los Angeles/Long Beach Harbors on the Los Angeles and Long Beach Harbor Chart # 18751, shall have the initial 23,437 bbls/day on-water recovery capability at the scene of the spill within six hours.

ii. in addition, at the facility/transfer points or during transfers at anchorage designations within the High Volume Ports, there must be 3,125 barrels/day, or 10% of the vessel's cargo capacity, whichever is less, of on-water recovery capability that can be mobilized and on-scene within two hours of notification;

iii. if a facility/transfer point within a High Volume Port maintains and can immediately deploy containment equipment for a 3,125 barrel spill, or 10% of the vessel's cargo capacity, whichever is less, the initial on-water recovery capability can be on-scene within three hours rather than two hours.

2. Vessels Operating in Facility/Transfer Areas or the Santa Barbara Channel Area.

DELIVERY TIME (HRS)	12	36	60
BBLS/DAY CAPABILITY	19,531	35,156	66,406

i. in addition, at the facility/transfer points within the Facility/Transfer Areas and the Santa Barbara Channel Area there must be 3,125 barrels/day, or 10% of the vessel's cargo capacity, whichever is less, of on-water recovery capability that can be mobilized and on-scene within two hours of notification;

ii. if a facility/transfer point within a Facility/Transfer Area or the Santa Barbara Channel Area maintains and can immediately deploy containment equipment for a 3,125 barrel spill, or 10% of the vessel's cargo capacity, whichever is less, the initial on–water recovery capability can be on–scene within three hours rather than two hours.

iii. for those points where transfers occur infrequently, and where there is not permanent equipment present, the 3,125 barrel/day, or 10% of the vessel's cargo capacity, whichever is less, on–water response capability shall be brought to the site at the time of transfer;

iv. for infrequent transfers of non–persistent oil, the initial response requirement may be waived by application to the Administrator. The application for waiver must include a justification based on such factors as the location of the transfer point, proximity to response equipment, additional equipment in the immediate area, and the relative environmental sensitivity of the potential spill sites.

3. Vessels that transit along the Balance of the Coast within California marine waters.

DELIVERY TIME (HRS)	18	36	60
BBLS/DAY CAPABILITY	15,625	31,250	62,500

i. in addition, at the facility/transfer points or during transfers at anchorage designations within the Balance of the Coast there must be 3,125 barrels/day, or 10% of the vessel's cargo capacity, whichever is less, of on–water recovery capability that can be mobilized and on–scene within two hours of notification;

ii. for infrequent transfers of non–persistent oil, the 3,125 barrel/day or 10% of the vessel's cargo capacity, whichever is less, on–water recovery capability requirement may be waived by application to the Administrator. The application for waiver must include a justification based on such factors as the location of the transfer point, proximity to response equipment, additional equipment in the immediate area, and the relative environmental sensitivity of the potential spill sites.

(C) Sufficient containment equipment shall be brought to the scene of the spill to address the Daily Recovery Rates as designated in Subsection 818.02(e)(3)(B).

(D) The standards set forth in Subsection 818.02(e)(3)(A)(4), were increased by a factor of 25% on July 1, 1997, and again on July 1, 2001. It was determined that this increase was feasible and necessary to meet the best achievable protection of the coast.

(E) The standards set forth in Subsection 818.02(e)(3)(A)(4) will be reviewed by the Administrator to determine if increases to these amounts are feasible and necessary in order to meet the best achievable protection of the coast The Administrator shall conduct a review and hold a public hearing prior to confirming the new standards to solicit input regarding the necessity of the proposed increase and any credits that may be allowed.

(4) Movement of Response Resources

There may be times when it is necessary to move response equipment from one risk zone to another in order to respond to a catastrophic oil spill. However, the Administrator needs to ensure that sufficient response resources are available to address a reasonable risk within each zone. Therefore, when equipment is needed from one risk zone which may impact the plan holder's on–water containment and recovery at the 6 hour level, the plan holder or OSRO shall make a request to the Administrator to temporarily reduce the Response Capability Standards set forth in (d)(3) above, before the equipment can be moved. The Administrator shall only grant such a request after determining that sufficient response resources are available to address a reasonable risk within the zone from where the response equipment is being considered for removal.

(5) On–Water Response Equipment and Services

(A) Each plan shall demonstrate that the tank vessel owner/operator has under contract or other approved means (as defined in Section 815.05(b) of this subchapter), access to all necessary response resources to comply with the Response Capability Standards for containment booming and on–water recovery established pursuant to Subsection 818.02(e)(3). The amount of response equipment required will take into account the effective daily recovery capacity (as defined in Chapter 1, Section 790 of this subdivision) of the equipment.

(B) The equipment identified for a specific area must be appropriate for use in that area given the limitations of the geography, bathymetry, water depths, tides, currents and other local environmental conditions. For those areas that require shallow–water response capability (refer to the relevant U.S. Coast Guard Area Contingency Plan), the plan shall provide for an adequate number of shallow–draft vessels (as defined in Section 815.05 of this subchapter) to be owned or under contract or other approved means. Additionally, the equipment identified shall also be appropriate for use on the type of oil identified. To the extent that the following information is provided by a Rated OSRO, evidence of a contract or other approved means with a Rated OSRO will suffice:

1. the location, inventory and ownership of the equipment to be used to fulfill the response requirements of this subchapter;

2. a complete inventory of any nonmechanical response equipment and supplies, including the type and toxicity of each chemical agent, with procedures for storage and maintenance;

3. the manufacturer's rated capacities and operational characteristics for each major item of oil recovery equipment;

4. the type and capacity of storage and transfer equipment matched to the skimming capacity of the recovery systems;

5. the effective daily recovery capacity (as defined in Chapter 1, Section 790 of this subdivision) for each major piece of on–water recovery equipment listed, as well as the effective daily recovery capacity for the skimming systems as a whole.

i. A request may be submitted to the Administrator to review the effective daily recovery capacity for a piece of equipment if it can be shown that the equipment has a different capacity than the derating factor allows.

ii. The Administrator's decision regarding a change in the effective daily recovery capacity for a piece of equipment will be issued as soon as administratively feasible.

6. vessels designated for oil recovery operations, including skimmer vessels and vessels designed to tow and deploy boom, and availability of shallow–draft vessels;

7. vessels of opportunity reasonably available for oil spill recovery operations, including availability of shallow–draft vessels, procedures to equip the vessels, inventory equipment, and train personnel;

8. procedures for storage, maintenance, inspection and testing of spill response equipment under the immediate control of the operator;

9. sufficient equipment to track the movement of discharged oil including aerial surveillance sufficient to direct skimming operations.

10. Each plan shall describe the personnel available to respond to an oil spill, including:

i. a list by job category including a job description for each type of spill response position needed as indicated in the spill response organization scheme;

ii. a match between personnel by job category, and the equipment proposed for use (including equipment appropriate for shallow–water environments), including the plan for mobilization of such personnel; and

iii. sufficient personnel to maintain a response effort of at least 14 days.

11. Each plan shall describe procedures for the transport of required equipment, personnel and other resources to the spill site. The description shall include plans for alternative procedures during adverse environmental conditions. Adverse environmental conditions to be considered shall include:

i. adverse weather;

ii. sea states, tides, winds and currents;

iii. presence of debris or other obstacles; and

iv. any other known environmental conditions that could restrict response efforts.

(C) A list of the spill management personnel (company name if applicable) and their relevant qualifications including a discussion of spill response training and experience, regulatory awareness and compliance, and supervision.

(D) Any equipment and personnel identified in the plan must be available for response. Any necessary maintenance for the equipment, vacation periods for response personnel, or other eventuality must be taken into account in relying upon these resources.

1. The equipment owner must notify the Administrator when major equipment is removed from service for a period of 24 hours or more for maintenance or repair. Major equipment is that which, if moved, would affect timely implementation of the plan. Notification must be made prior to removing equipment for regularly scheduled maintenance, and within 24 hours of removing equipment for unscheduled repairs.

2. The equipment owner must demonstrate that backup equipment is available during the time that the primary response equipment is out of service. Backup equipment may be provided from the owner's own inventory, or may be made available from another responder.

3. A plan shall remain valid during the time that equipment has been removed from service for maintenance or repair.

(E) Tank vessels that carry Group 5 oils must contract with one or more Rated OSRO(s) to address the Response Planning Volumes. Such equipment shall include, but is not limited to the following:

1. sonar, sampling equipment, or other methods for locating the oil on the bottom or suspended in the water column;

2. containment boom, sorbent boom, silt curtains, or other methods to reduce spreading on the bottom;

3. dredges, pumps, or other equipment necessary to recover oil from the bottom;

4. equipment necessary to assess the impact of such discharges; and

5. any other appropriate equipment necessary to response to a discharge involving a group 5 oil.

(F) The plan holder may propose the use of non–mechanical methods for response operations which may include dispersants, in–situ burning, coagulants, bioremediants, or other chemical agents. The use of any non–mechanical method for response must be done in accordance with provisions of the State Marine Oil Spill Contingency Plan, the National Contingency Plan, the applicable Regional Area Contingency Plan, and all applicable State laws and regulations.

If a non–mechanical method of response is proposed, the plan shall include:

1. methods of deployment or application;

2. for use of chemical agents, a description of the specific mechanisms in place to assess the environmental consequences of the chemical agent. This shall include the mechanism for continuous monitoring of environmental effects for the first three days after initial application, and periodic monitoring thereafter until the agent is inert or no longer operative;

3. identification of all permits, approvals or authorizations needed to allow the use of chemical agents or non–mechanical methods, and the timeline for obtaining them;

4. a plan for protecting resources at risk, areas of public concern and the public from any adverse effects of the non–mechanical methods used;

5. the projected efficacy of each type of non–mechanical method proposed for use taking into account the type of spilled material and the projected environmental conditions of the potential spill site; and

6. upon request, the plan holder shall provide any test results known to the plan holder which assess the environmental impacts of applying these methods in the marine environment.

(G) The plan shall describe methods for tracking the movement of the discharged oil; and

(H) The plan shall include a list of location of the weather stations to be used for observations of winds, currents and other data at the time of a spill that may assist in making real– time projections of spill movement.

(f) Shoreline Protection

Each plan must provide for shoreline protection in the Geographic Response Plan Areas (GRA) or Geographic Regions the tank vessel may transit. Each plan shall demonstrate through contracts(s) or other approved means, the response resources necessary to protect each type of shoreline and all applicable environmentally and culturally sensitive sites in the time frames required, as outlined in the appropriate SP Table (dated July 17, 2006), incorporated by reference herein. The Tables representing High Volume port areas (i.e., the San Francisco and Los Angeles/Long Beach Tables) will go into effect on May 1, 2007; all other Tables will go into effect on September 1, 2007. The SP Tables shall be reviewed and updated as needed (e.g., to reflect updates to the ACPs, etc.). Updates to the SP Tables will be processed by OSPR staff using the procedures outlined in the Administrative Procedure Act.

(1) Percentages of Dedicated Shoreline Protection Resources

The following table lists the applicable percentage of dedicated shoreline protection boats and staff that are required for each Geographic Region:

Geographic Region (also known as ACP Area)	*% DEDICATED RESOURCES FOR SHORELINE PROTECTION*
1	50% dedicated boats and staff
2	75% dedicated boats and staff
3	0% (non–dedicated boats and staff allowed)
4	0% (non–dedicated boats and staff allowed) *For Port Hueneme only, 75% dedicated boats and staff required
5	75% dedicated boats and staff
6	50% dedicated boats and staff

(A) An owner/operator may propose alternatives to what is listed in the SP Tables for boats and staff only. The proposal may be tested by the Administrator anytime prior or subsequent to plan approval.

(B) Each plan shall have under contract or other approved means sufficient personnel to implement the shoreline protection strategies in the time frames required from the appropriate SP Tables, who are to remain on scene until demobilized by the State Incident Command or the Unified Command. For planning purposes, this shall include procedures to obtain sufficient personnel to maintain a response effort of at least 14 days.

(C) Any equipment and personnel identified to meet the contingency plan requirements must be available for response. Any necessary maintenance for the equipment, vacation periods for response personnel, or other eventuality must be taken into account in relying upon these resources.

1. The equipment owner must notify the Administrator when major equipment is removed from service for a period of 24 hours or more for maintenance or repair, if such movement would affect timely implementation of the plan. Notification must be made prior to removing equipment for regularly scheduled maintenance, and within 24 hours of removing equipment for unscheduled repairs.

2. The equipment owner must demonstrate that backup equipment is available during the time that the primary response equipment is out of service. Backup equipment may be provided from the owner's own inventory, or may be made available from another responder.

3. A plan shall remain valid during the time that equipment has been removed from services for maintenance or repair if the Administrator has not disapproved such removal within 24 hours of notification.

4. The equipment owner shall notify the Administrator when the major equipment is back in service.

(2) Shoreline Clean–Up

(A) Each plan shall describe methods to clean up spilled oil and remove it from the environment. The owner/operator shall have a contract or other approved means to provide the appropriate shoreline clean up services. The equipment identified for a specific area must be appropriate for use in that area given the limitations of the bathymetry, geomorphology, shoreline types and other local environmental conditions. Additionally, the equipment identified shall be appropriate to implement all the applicable strategies, and appropriate for use on the type of oil identified. The following information must be provided:

1. methods for shoreside clean–up, including containment and removal of surface oil, subsurface oil and oiled debris and vegetation from all applicable shorelines, adjacent land and beach types; and

2. measures to be taken to minimize damage to the environment from land operations during a spill response, such as impacts to sensitive shoreline habitat caused by heavy machinery or foot traffic.

(g) Response Procedures

(1) Each plan shall describe the organization of the tank vessel's spill response system and management team. An organizational diagram depicting the chain of command shall also be included. Additionally, the plan shall describe the method to be used to integrate the plan holder's organization into the State Incident Command System and/or the Unified Command Structure as required by Title 8, California Code of Regulations, Subsection 5192(q)(3)(A).

(A) The plan holder may utilize the procedures outlined in the appropriate Area Contingency Plan when describing how the tank vessel's chain of command will interface with the State Incident Command System which utilizes the Unified Command.

(B) Each plan shall describe the organization of the plan holder's public information office, as it relates to an oil spill incident, and the method by which the Information Officer will be integrated into the State Incident Command System.

(C) Each plan shall describe the plan holder's safety program, as it relates to an oil spill incident, and the method by which their Safety Officer will be integrated into the State Incident Command System.

(2) Each plan shall identify potential sites needed for spill response operations including location(s) for:

(A) a central command post sufficient to accommodate the State Incident Command or Unified Command as well as the plan holder's response organization;

(B) a central communications post if located away from the command post; and

(C) equipment and personnel staging areas.

(3) Each plan shall include a checklist, flowchart or decision tree depicting the procession of each major stage of spill response operations from spill discovery to completion of cleanup. The checklist, flowchart or decision tree shall describe the general order and priority in which key spill response activities are performed.

(4) Each plan shall describe how the owner/operator will provide onboard emergency services before the arrival of local, state or federal authorities on the scene, including:

(A) procedures to control fires and explosions, and to rescue people or property threatened by fire or explosion;

(B) procedures for emergency medical treatment and first aid; and,

(C) procedures to provide the required personnel protective gear for responders.

(5) Each plan shall describe equipment and procedures to be used by tank vessel personnel to minimize the magnitude of a spill and minimize structural damage which may increase the quantity of oil spilled.

(6) Each plan shall detail the lines of communications between the responsible party, the Qualified Individual and the on–scene commanders, response teams, local, state, and federal emergency and disaster responders, including:

(A) communication procedures;

(B) the communication function (e.g., ground–to–air) assigned to each channel or frequency used;

(C) the maximum broadcast range for each channel or frequency used; and

(D) redundant and back–up systems.

(7) Each plan shall provide for post–spill review, including methods to review both the effectiveness of the plan and the need for plan amendments.

(A) The result of the review shall be forwarded to the Administrator *within 90 days following the completion of response* and cleanup procedures.

(B) The review shall be used by the Administrator only for the purposes of proposing future amendments to the contingency plan.

(8) Each plan shall describe the procedures to manage access to the spill response site, the designation of exclusion, decontamination and safe zones, and the decontamination of equipment and personnel during and after oil spill response operations, as required by the California Occupational Safety and Health Administration.

(9) Prior to beginning oil spill response operations and clean up activities, a Site Safety Plan must be completed. Each plan shall include information as required pursuant to Title 8, Section 5192(b)(4)(B) of the California Code of Regulations including, but not limited to, a written respiratory protection program, written personal protection equipment program, written health and safety training program, written confined space program and permit forms, direct reading instrument calibration logs, and written exposure monitoring program.

(h) Notification Procedures

(1) Each plan shall include a list of contacts to call in the event of a drill, threatened discharge of oil, or discharge of oil. The plan shall:

(A) identify a central reporting office or individual who is responsible for initiating the notification process and is available on a 24–hour basis. The individual making this notification must be fluent in English. The following information must be provided:

1. the individual or office to be contacted;

2. telephone number or other means of contact for any time of the day; and

3. an alternate contact in the event the individual is unavailable.

(B) detail the procedures for reporting oil spills to all appropriate local, state and federal agencies within each of the 6 Geographical Regions that the tank vessel transits;

(C) establish a clear order of priority for notification.

(2) Immediate Notification

Nothing in this section shall be construed as requiring notification before response.

(A) Each plan shall include a procedure for contacting the OSRO in each of the six Geographic Regions that the tank vessel transits immediately, but no longer than 30 minutes, after the discovery of a discharge of oil or threatened discharge of oil.

(B) Each plan shall include a procedure that ensures that the owner/operator or his/her designee will initiate contact with the Qualified Individual, the California Governor's Office of Emergency Services and the National Response Center immediately, but no longer than 30 minutes, after discovery of a discharge of oil or threatened discharge of oil.

(C) Each plan shall include all phone numbers necessary to complete the immediate notification procedures.

(3) Each plan shall identify a call–out procedure to acquire the resources necessary to address spills that cannot be addressed by the equipment that the owner/operator is required to have under contract. Procedures must allow for initiation of the call–out within 24 hours of the incident and must begin as soon as a determination has been made that additional resources are necessary.

(4) Each plan shall provide a checklist of the information to be reported in the notification procedures, including but not limited to:

(A) tank vessel name, country of registry, call sign, and official number;

(B) location of the incident;

(C) date and time of the incident;

(D) course, speed and intended track of the tank vessel;

(E) the nature of the incident;

(F) an estimate of the volume of oil spilled and the volume at immediate risk of spillage;

(G) the type of oil spilled, and any inhalation hazards or explosive vapor hazards, if known;

(H) the size and appearance of the slick;

(I) prevailing weather and sea conditions;

(J) actions taken or planned by personnel on scene;

(K) current condition of the tank vessel;

(L) injuries and fatalities; and

(M) any other information as appropriate.

(5) Reporting of a spill as required by Section 818.02(h)(2) shall not be delayed solely to gather all the information required by Subsection 818.02(h)(4).

(6) An updated estimate of the volume of oil spilled and the volume at immediate risk of spillage shall be reported to the California Governor's Office of Emergency Services whenever a significant change in the amount reported occurs, but not less than every 12 hours within the first 48 hours of response. The State Incident Commander and/or the Federal On-Scene Coordinator through the Unified Command shall have the option of increasing or decreasing this timeframe, as needed. Updated spill volume information included in the Incident Action Plan developed through the United Command will meet the requirements of this subsection.

(i) Temporary Storage and Waste Management:

(1) Each plan shall identify sufficient temporary storage for all recovered oil or all oily waste, and identify facilities that would be able to accept the recovered oil or oily waste for recycling or other means of waste management. Sufficient storage shall be no less than two times the calculated Response Planning Volume up to the Daily Recovery Rate as determined in Subsection 818.02(e)(3)(B).

(A) To meet the temporary storage requirement described in Subsection (1) above, the following amounts of storage shall be dedicated response resources (as defined in Section 815.05(c) of this subchapter) or OSRO-owned and controlled response resources (as defined in Section 815.05(k) of this subchapter), as applicable to the appropriate risk zone:

Sufficient storage to support the skimming systems shall be brought to the scene of the spill during the first four hours of response:

520 barrels of storage, or 20% of the response planning volume, whichever is less, shall be brought to the scene of the spill within four hours, of notification of a spill;

12,000 barrels, or two times the response planning volume, whichever is less, shall be available at the scene of the spill within 6 hours of notification of a spill.

The balance of the temporary storage requirement described in Subsection (1) above, may be provided by nondedicated storage resources. All skimming systems operating at the scene of a spill shall have adequate storage.

(2) Each plan shall identify the party that shall maintain responsibility for recovered oil and oily waste for the purposes of temporary storage.

(3) Each plan shall describe site criteria and methods used for temporary storage of recovered oil and oily wastes generated during response and cleanup operations, including known available sites.

(4) Each plan shall identify all applicable permits, and all federal, state and local agencies responsible for issuing those permits for transit, temporary storage and ultimate waste management of all wastes likely to result from an oil spill.

(5) Each plan shall include information which could expedite the state approval process for the use of temporary waste storage sites, including a list of appropriate contacts and a description of procedures to be followed for each approval process.

(j) Oiled Wildlife Care Requirements

Each plan shall describe how oiled wildlife care will be provided by one of the following approved means:

(1) Utilize the California Oiled Wildlife Care Network (OWCN) to meet oiled wildlife care requirements; or

(2) describe procedures that clearly outline how oiled wildlife care will be provided. The equipment, facilities, and personnel necessary to implement these procedures must be identified and assured by contract for each Geographic Area covered by the plan. Standards and written protocols for wildlife care must comply with all applicable State and federal laws.

(k) Training

(1) Each plan shall provide that all appropriate personnel directly responsible to the owner/operator shall receive training in the use and operation of oil spill response and cleanup equipment. The plan shall describe:

(A) the type and frequency of training that each individual in a spill response position receives to achieve the level of qualification demanded by their job description;

(B) the procedures, if any, to train and use volunteers or other additional personnel in spill response operations as necessary for the size of the spill.

(2) Each plan shall describe the type and frequency of personnel training on methods to reduce operational risks. The description of the training shall include if applicable, the following:

(A) the means of achieving any established training objectives, such as:

1. training programs for each position involved with the various aspects of the operation that could result in a spill (e.g., position responsible for tank vessel inspections or transfers);

2. a training schedule, including adequate frequency, (e.g., initial training upon hire and annual refresher training) and type of training (workshops, classroom, videotape, on-the-job training, etc.) for each position trained;

(B) licenses, certifications or other prerequisites to hold particular jobs.

(3) Each plan shall provide for safety training as required by state and federal health and safety laws for all personnel likely to be engaged in oil spill response, including a program for training non-permanent responders, such as volunteers or temporary help.

(4) The tank vessel owner/operator shall ensure that training records are maintained for three years. All such documentation must be made available to the Administrator upon request.

(*l*) Drills and Exercises

(1) Each plan shall describe the tank vessel's drill and exercise program that meets the requirements of Section 820.01(a), to ensure that the elements of the plan will function in an emergency.

(2) Training sessions may constitute creditable drills and exercises if all requirements of Subsections 820.01(a) are met. Onboard emergency procedure drills conducted aboard the tank vessel and properly logged may be credited.

(3) Drills shall be designed by the vessel owner/operator to exercise either components of or the entire response plan. Such drills, individually or in combination, shall ensure that the entire plan is exercised at least once every three years.

(m) Tank Vessel Emergency Services:

(1) Notification Requirements:

Any party responsible for a tank vessel as defined in this subdivision shall notify the U.S. Coast Guard within one hour of a disability if the disabled vessel is within 12 miles of the shore of the state, pursuant to the requirements of Government Code Section 8670.20(b).

(2) Equipment and Services:

Tank vessel emergency services means all services rendered to save a vessel and cargo from any marine peril that could reasonably be expected to cause a discharge of oil into the marine waters of the state, and includes those actions necessary to control or stabilize the vessel or cargo.

(A) All tank vessels required to have a contingency plan pursuant to Section 818.01(a) must demonstrate sufficient tank vessel emergency service capability as outlined in this section;

(B) Availability of the following equipment and services shall be demonstrated by sufficient in-house capability or a signed, valid contract or other approved means with a vessel emergency services provider, or by other means approved by the Administrator. For the purpose of this subsection, a plan holder can demonstrate the availability of equipment and services, in lieu of a signed, valid contract or sufficient in-house capability, by a Letter of Intent or a Conditional Agreement, signed by the entity

providing such services and attesting to the availability of the equipment and services required as specified in this Subsection (m). Any service provider must have the appropriate expertise, and all required equipment ready and available to respond within the following timeframes:

1. within 12 hours of notification of the U.S. Coast Guard;

(i.) an emergency services vessel of the appropriate size, configuration, and operating capability to ensure stabilization of a disabled vessel shall be on scene. The emergency services vessel must be capable of reaching the disabled vessel before the disabled vessel would run aground. In determining the time it would take for a vessel to run aground, an estimate shall be made based on the drift rate in the worst case weather assuming the complete loss of power and/or steering;

(ii.) a professional salvor, naval architect or other qualified person knowledgeable of stability, and hull stress assessments of the vessel shall be engaged in tank vessel emergency operations. These assessments shall be developed pursuant to the shipboard spill mitigation procedures as set forth in 33 CFR, Part 155.1035(c)).

(iii.) a private firefighting capability that will respond to casualties in the area(s) in which the vessel will operate. This capability shall be a supplement to the firefighting capability on board the vessel;

(iv.) the vessel emergency services provider must be capable of performing emergency lightering operations, and must have the following equipment on–scene: fendering equipment; transfer hoses and connection equipment; portable pumps; and any ancillary equipment necessary to off–load the volume of the tank vessel's largest cargo tank in 24 hours of continuous operation;

(v.) dewatering pumps, hoses, and power supplies sufficient to maintain vessel stability and prevent sinking shall be on scene.

(2) within 18 hours of notification of the U.S. Coast Guard, and to the extent necessary to avoid a pollution incident, the following must be on scene;

(i) resources for shoring, patching or making other emergency, temporary repairs to correct structural, stability, or mechanical problems on the vessel;

(ii) equipment necessary to tow an incapacitated vessel to a safe haven.

NOTE: Authority cited: Sections 8670.7, 8670.10, 8670.28, 8670.29 and 8670.30, Government Code. Reference: Sections 8670.7, 8670.10, 8670.20, 8670.25.5, 8670.27, 8670.28, 8670.30, 8670.31 and 8670.37.51, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Change without regulatory effect amending subsection (a)(2) filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Change without regulatory effect amending subsections (e)(3)(B)1., (e)(3)(B)2., (e)(3)(B)3., (e)(3)(D) and (e)(3)(E) filed 6–11–97; operative 7–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 24).
4. Amendment of section heading, section and NOTE filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
5. Change without regulatory effect amending subsections (d)(1), (d)(2)(A), (d)(3), (e)(5)(B)11., (g)(1) and (g)(1)(C) and amending NOTE filed 8–29–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
6. Amendment of subsections (e)(3)(B)1.–(e)(3)(B)3.ii. filed 5–25–2001; operative 7–1–2001 pursuant to Government Code section 8670.28(e) and 14 CCR 818.02(e)(3)(E). Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 2001, No. 21).
7. Amendment of subsections (a)(4) and (i)(1), new subsection (i)(1)(A) and amendment of NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
8. Amendment of section heading and section filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).
9. Amendment of subsection (a)(1)(A) filed 8–6–2008; operative 9–5–2008 (Register 2008, No. 32).

§ 818.03. Vessels Carrying Oil As Secondary Cargo (VCOASC) Plan Content.

To the degree the information required by Subsections 818.03(b) through *(l)* exists elsewhere, copies of the pre–existing information may be submitted. If the information provided is not sufficient to meet the requirements of this subchapter, additional information may be requested by the Administrator.

(a) Introductory Material

(1) Each plan shall provide the following information for each vessel carrying oil as secondary cargo (VCOASC, as defined in Section 790 of this subdivision) covered by the plan:

(A) the vessel's name, country of registry, call sign, and official identification number;

(B) name, address, phone number, fax number and e–mail address, if available, of the owner and/or operator of the vessel(s). This information shall be referenced in the plan title or on a title page at the front of the plan;

(C) the name, address, phone number, fax number and e–mail address, if available, of the person to whom correspondence should be sent;

(D) a certification statement signed under penalty of perjury by an executive within the plan holder's management who is authorized to fully implement the oil spill contingency plan who shall review the plan for accuracy, feasibility, and executability. If this executive does not have training, knowledge and experience in the area of oil spill prevention and response, the certification statement must also be signed by another individual within the plan holder's management structure who has this requisite training, knowledge, and experience. The certification shall be submitted according to the following format;

> "I certify, to the best of my knowledge and belief, under penalty of perjury under the laws of the State of California, that the information contained in this contingency plan is true and correct and that the plan is both feasible and executable."
>
> _____(signature), (title), (date);

(E) the California Certificate of Financial Responsibility (COFR) number for the tank vessel(s) covered by the plan shall be included in the front of the plan, or for fleet plans shall be listed separately in a subsection of the plan.

(2) Each plan shall identify a Qualified Individual, as defined in Chapter 1, Section 790 of this subdivision, and any alternates that may be necessary for the purpose of implementing the plan and documentation that the Qualified Individual acknowledges this capacity. If an alternate or alternates are identified in the plan, then the plan shall also describe the process by which responsibility will be transferred from the Qualified Individual to an alternate. During spill response activities, notification of such a transfer must be made to the State Incident Commander at the time it occurs.

(3) Each plan shall provide the name, address, telephone number and facsimile number of an agent for service of process designated to receive legal documents on behalf of the plan holder and documentation that the agent for services of process acknowledges this capacity. Such agent shall be located in California.

(4) Each plan shall identify a Spill Management Team (as defined in Section 815.05(p) of this subchapter), and provide documentation that the Spill Management Team acknowledge this capacity.

(5) Each plan shall contain a copy of the contract or other approved means (as defined in Section 818.05(b) of this subchapter), verifying that any oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill. Plan holders shall only contract with an OSRO(s) that has received a Rating by OSPR (as specified in Section 819 of this subchapter) for the booming, on–water recovery and storage, and shoreline protection services required.

(b) VCOASC Description

(1) Each plan shall describe the vessel's design and operations with specific attention to those areas from which a spill could reasonably be expected to impact the marine waters of California. This description shall include, at a minimum, the following information:

(A) a piping and tank diagram including the location of valves, vents and lines; the age, design, and construction of the vessel; the range of oil products normally carried in each structure; and safety equipment;

(B) a description of the types, physical properties, health and safety hazards and maximum storage or handling capacity of the oil or product carried. A material safety data sheet (MSDS) or equivalent will meet some of these requirements and can be maintained separately aboard the vessel providing the plan identifies its location;

(C) the vessel's classification, hull type, gross registered tonnage (GRT), oil cargo capacity, length, draft and beam.

(c) Prevention Measures

(1) Each plan holder shall take all appropriate prevention measures designed to reduce the possibility of an oil spill occurring as a result of allisions, collisions, groundings, explosions or operator error during the operation of the VCOASC. Each plan shall include a summary of the policies, programs, guidelines and/or procedures designed to implement the following:

(A) methods to reduce spills during transfer and storage operations, including overfill prevention measures, and immediate spill containment provision. Any information developed in compliance with Title 33 CFR, Parts 154 and 156 may be substituted for all or part of any comparable prevention measures required by this subsection;

(B) procedures to assure clear communication among all the parties involved during transfer operations;

(C) use of vessel traffic service systems where available;

(D) procedures to be used to avoid the known navigational hazards.

(E) Where a plan holder's VCOASC is engaged in transfer operations at a facility subject to Public Resources Code 8755, and the plan holder is in compliance with State Lands Commission regulations for oil transfer operations, the plan holder shall be considered in compliance with the provisions of this subsection.

(F) The plan holder shall provide additional relevant information to the Administrator upon request.

(2) [Reserved]

(3) At the time the initial contingency plan is submitted, the owner/operator shall either submit a Certificate Of Inspection (COI) issued by the USCG or a certificate issued by a member of the International Association of Classification Societies certified by the International Maritime Organization (IMO) of the most recent vessel inspection, or verify that the vessel has such a certificate and that the certificate is available for review.

(4) The owner/operator shall also submit a Safety Management Certificate to demonstrate compliance with the performance elements in the International Safety Management (ISM) Code subject to IMO Resolution A.741(18), or shall submit proof of compliance with the American Waterways Operators (AWO) Responsible Carrier Program, if applicable.

(d) Planning for the Location of Response Resources

The owner/operator must be prepared to respond to a spill anywhere within the marine waters of California where the VCOASC transits. To determine the regions in which response equipment and personnel must be available, the owner/operator shall include in the plan a description of the VCOASC's normal routes of travel including a list of each of the six Geographic Regions that the VCOASC transits along these routes. OSPR has developed Shoreline Protection Tables (SP Tables (see Section 790)), incorporated by reference herein and posted at OSPR's website) for VCOASC traffic in California's marine waters. Owners/operators shall meet the response resource and time frame requirements for the appropriate Small Harbor from the SP Tables when contracting for shoreline protection services.

(e) Containment Booming and On-Water Recovery

Each plan holder must contract for containment booming and on-water recovery response resources up to their Response Planning Volume for all potential spills from the VCOASC that could reasonably be expected to impact the marine waters of California. Additionally, each plan must also demonstrate response capability sufficient to address potential spills in each Geographic Response Plan Area (GRA), if available, or Geographic Region through which the vessel may transit. (GRA's are geographic subdivisions of ACP area.) To determine the amount of response resources for containment booming and on-water recovery, each plan holder must calculate a Response Planning Volume as outlined below:

(1) Reasonable Worst Case Spill

To calculate the Response Planning Volume, it is first necessary to determine the reasonable worst case spill for each vessel. The reasonable worst case spill is calculated as 30% of the vessel's total cargo capacity of petroleum products.

(2) Persistence and Emulsification Factors

(A) The reasonable worst case spill volume is then multiplied by a persistence factor relative to the most persistent type of oil that each VCOASC carries over the marine waters of California. The persistence factors are specified below:

Oil Group	Group 1	Group 2	Group 3	Group 4
Persistence Multiplier	.20	.30	.50	.50

(B) Emulsification Factors: The volume determined from the calculation above is then multiplied by one of the following emulsification factors, again, based on the type of oil.

Oil Group	Group 1	Group 2	Group 3	Group 4
Emulsification Multiplier	1.0	1.8	2.0	1.4

(C) Response Planning Volume

The total determined by this calculation is a Response Planning Volume.

1. The Response Planning Volumes to be used to determine the amount of equipment and services required shall be the greater of the amount necessary to address the Response Planning Volume as calculated in Subsections 818.03(e)(1) – (2) or the Planning Volume for On-water Recovery for Inland/Near-shore Environment calculated for the vessel's federal response plan prepared pursuant to 33 CFR, Part 155.1045. The Planning Volume for On-water Recovery is the Adjusted Volume from the federal calculations determined prior to establishing response tiers utilizing the mobilization factors.

2. The calculations used to determine the Response Planning Volume shall be included in the plan.

(3) Response Capability Standards

The equipment and personnel necessary to address the Response Planning Volume is brought to the scene of the spill over a period of time. The timeframes are dependent upon the GRA or Geographic Region in which the VCOASC transits.

The standards set forth in this section may not reflect the exigencies of actual spill response. However, these are the standards that must be used to determine the amount of equipment and personnel that must be under contract or other approved means. Response resources in addition to those under contract must be identified and a call-out procedure in place to access this equipment if the VCOASC has a spill that exceeds the Response Planning Volumes. The owner/operator is ultimately responsible for addressing the entire volume of an actual spill regardless of the planning volumes.

(A) On-Water Daily Recovery Rates and Containment Boom Amounts

1. The total amount of on-water containment and recovery equipment and services required shall be the amount necessary to address the Response Planning Volume determined in Subsection 818.03(e)(2)(C), as follows:

i. VCOASC that transit in High-Volume Ports shall have sufficient on-water containment and recovery equipment and services to respond to 10% of the calculated Response Planning Volume (as calculated in Sections 818.03(e)(1)-(2)) at the scene of the spill within two hours. There shall be sufficient on-water containment and recovery equipment

and services to respond to the remaining Response Planning Volume within 12 hours.

ii. VCOASC operating in Facility Transfer areas or the Santa Barbara Channel area shall have sufficient on–water containment and recovery equipment and services to respond to 10% of the calculated Response Planning Volume (as calculated in Sections 818.03(e)(1)–(2)) at the scene of the spill within 12 hours. There shall be sufficient on– water containment and recovery equipment and services to respond to the remaining Response Planning Volume within 36 hours.

iii. VCOASC that transit along the Balance of the Coast shall have sufficient on–water containment and recovery equipment and services to respond to 10% of the calculated Response Planning Volume (as calculated in Sections 818.03(e)(1)–(2)) at the scene of the spill within 18 hours. There shall be sufficient on–water containment and recovery equipment and services to respond to the remaining Response Planning Volume within 36 hours.

(4) Transfer Operations

Each plan shall demonstrate that the VCOASC owner/operator owns or has access to sufficient and appropriate boom, trained personnel and equipment, maintained in a stand–by condition, such that at least 600 feet of boom can and will be deployed for the most effective containment immediately, but no longer than 30 minutes after the discovery of a spill. Additionally, each plan holder shall identify the equipment, personnel and procedures such that an additional 600 feet of boom can and will be deployed within one hour for the most effective containment in the event of an oil spill. Response resources owned or under contract to the marine facility or vessel engaged in oil transfer operations may be used to meet this requirement.

(5) On–Water Response Equipment and Services

(A) Each plan shall demonstrate that the VCOASC owner/operator has under contract or other approved means (as defined in Section 815.05(b) of this subchapter) access to all necessary response resources to comply with the Response Capability Standards for containment booming and on–water recovery established pursuant to Subsection 818.03(e). The amount of response equipment required will take into account the effective daily recovery capacity (as defined in Chapter 1, Section 790 of this subdivision) of the oil recovery equipment.

(B) The equipment identified for a specific area must be appropriate for use in that area given the limitations of the geography, bathymetry, water depths, tides, currents and other local environmental conditions. For those areas that require shallow–water response capability (refer to the relevant U.S. Coast Guard Area Contingency Plan), the plan shall provide for an adequate number of shallow–draft vessels (as defined in Section 815.05 of this subchapter) to be owned or under contract or other approved means and available to respond to provide shoreline protection of all sensitive sites identified in the trajectory analysis conducted as part of the Environmental Consequence analysis. Additionally, the equipment identified shall also be appropriate for use on the type of oil identified. To the extent that the following information is provided by a Rated OSRO, evidence of a contract or other approved means with a Rated OSRO will suffice:

1. the location, inventory and ownership of the equipment to be used to fulfill the response requirements of this subchapter;

2. the manufacturer's rated capacities and operational characteristics for each major item of oil recovery equipment;

3. the type and capacity of storage and transfer equipment matched to the skimming capacity of the recovery systems;

4. the effective daily recovery capacity (as defined in Chapter 1, Section 790 of this subdivision) for each major piece of on–water recovery equipment listed, as well as the effective daily recovery capacity for the skimming systems as a whole.

i. A request may be submitted to the Administrator to review the effective daily recovery capacity for a piece of equipment if it can be shown that the equipment has a different capacity than the derating factor allows.

ii. The Administrator's decision regarding a change in the effective daily recovery capacity for a piece of equipment will be issued as soon as administratively feasible.

5. vessels designated for oil recovery operations, including skimmer vessels and vessels designed to tow and deploy boom;

6. procedures for storage, maintenance, inspection and testing of spill response equipment under the immediate control of the operator;

(f) Shoreline Protection

Each plan must provide for shoreline protection in the Small Harbor the VCOASC may transit. Each plan shall demonstrate through contracts(s) or other approved means, the response resources necessary to protect each type of shoreline and all applicable sensitive sites as outlined in the appropriate Small Harbor as listed in the SP Tables (see Section 790), incorporated by reference herein. The SP Tables shall be reviewed, and updated if needed, annually by OSPR staff. using the procedures outlined in the Administrative Procedure Act.

(1) Shoreline Protection Requirements for Vessels Operating in Small Harbors

Included in the SP Tables is a listing of Small Harbors throughout the state. The requirements in the Small Harbor Table apply to all vessels over 300 GT that operate in the small harbors as listed. The following apply to the Small Harbor Table only:

(A) Non–dedicated resources are allowed for shoreline protection for the vessels that operate in these harbors.

(B) The amounts of boom, boats and staff, as listed, are required for the vessels that operate in these harbors. In some locations additional response resources may be required for included or adjacent sensitive sites if this has been identified in the applicable ACPs.

(C) Resource requirements can be met either with pre–positioned equipment (as identified in the owner/operator's Contingency Plan) or by a contract with a Rated OSRO. Advance notice to the OSRO is required before the plan holder can begin operating in the small harbor.

(D) Unless otherwise specified in the Small Harbor Table, anytime that a vessel over 300 GT operates in these small harbors, that vessel shall have a contract or other approved means for a minimum of 2,500 feet of boom that can be deployed in 6 hours.

(E) An owner/operator may propose lesser amounts of shoreline protection resources than that listed in the Small Harbor Table, for carrying out planned projects in the Balance of the Coast, upon petitioning and approval of the Administrator. The proposal may be tested by the Administrator anytime prior or subsequent to plan approval.

(2) Shoreline Clean–Up

(A) Each plan shall describe methods to clean up spilled oil and remove it from the environment. The owner/operator shall have a contract or other approved means to provide the appropriate shoreline clean up services. The equipment identified for a specific area must be appropriate for use in that area given the limitations of the bathymetry, geomorphology, shoreline types and other local environmental conditions. Additionally, the equipment identified shall be appropriate to implement all the applicable strategies, and appropriate for use on the type of oil identified. The description shall include:

1. methods for shoreside clean–up, including containment and removal of surface oil, subsurface oil and oiled debris and vegetation from all applicable shorelines, adjacent land and beach types; and

2. measures to be taken to minimize damage to the environment from land operations during a spill response, such as impacts to sensitive shoreline habitat caused by heavy machinery or foot traffic.

(g) Response Procedures

(1) Each plan shall describe the organization of the VCOASC's spill response management team. An organizational diagram depicting the chain of command shall also be included. Additionally, the plan shall describe the method to be used to integrate the plan holder's organization into the State Incident Command System and/or the Unified Command

Structure as required by Title 8, California Code of Regulations, Subsection 5192(q)(3)(A).

(A) The plan holder may utilize the procedures outlined in the appropriate and most recent Federal Area Contingency plan when describing how the vessel's chain of command will interface with the State Incident Command System which utilizes the Unified Command.

(2) Each plan shall include a checklist, flowchart or decision tree depicting the procession of each major stage of spill response operations from spill discovery to completion of clean–up. The checklist, flowchart or decision tree shall describe the general order and priority in which key spill response activities are performed.

(3) Each plan shall describe how the owner/operator will provide onboard emergency services before the arrival of local, state or federal authorities on the scene, including:

(A) procedures to control fires and explosions, and to rescue people or property threatened by fire or explosion;

(B) procedures for emergency medical treatment and first aid.

(4) Each plan shall describe equipment and procedures to be used by VCOASC personnel to minimize the magnitude of a spill and minimize structural damage which may increase the quantity of oil spilled.

(5) Each plan shall detail the lines of communications between the responsible party, the Qualified Individual and the on–scene commanders, response teams, local, state, and federal emergency and disaster responders, including:

(A) communication procedures;

(B) the communication function (e.g., ground–to–air) assigned to each channel or frequency used;

(C) the maximum broadcast range for each channel or frequency used; and

(D) redundant and back–up systems.

(6) Each plan shall provide for post–spill review, including methods to review both the effectiveness of the plan and the need for plan amendments.

(A) The result of the review shall be forwarded to the Administrator within 90 days following the completion of response and clean–up procedures.

(B) The review shall be used by the Administrator only for the purposes of proposing future amendments to the contingency plan.

(7) Each plan shall describe the procedures to manage access to the spill response site, the designation of exclusion, decontamination and safe zones, and the decontamination of equipment and personnel during and after oil spill response operations, as required by the California Occupational Safety and Health Administration.

(8) Each plan shall describe the procedures for the evaluation of health and safety concerns and the determination of site safety prior to beginning oil spill response operations and clean–up activities.

(h) Notification Procedures

(1) Each plan shall include a list of contacts to call in the event of a drill, threatened discharge of oil, or discharge of oil. The plan shall:

(A) identify a central reporting office or individual who is responsible for initiating the notification process and is available on a 24–hour basis. The individual making this notification must be fluent in English. The following information must be provided:

1. the individual or office to be contacted;

2. telephone number or other means of contact for any time of the day; and

3. an alternate contact in the event the individual is unavailable.

(B) detail the procedures for reporting oil spills to all appropriate local, state, and federal agencies within each of the six Geographic Regions that the VCOASC transits;

(C) establish a clear order of priority for notification.

(2) Immediate Notification

Nothing in this section shall be construed as requiring notification before response.

(A) Each plan shall include a procedure for contacting the OSRO in each of the six Geographic Regions that the VCOASC transits immediately, but no longer than 30 minutes, after the discovery of a discharge of oil or threatened discharge of oil.

(B) Each plan shall include a procedure that ensures that the owner/operator or his/her designee will initiate contact with the Qualified Individual, the California Governor's Office of Emergency Services and the National Response Center immediately, but no longer than 30 minutes, after discovery of a discharge of oil or threatened discharge of oil.

(C) Each plan shall include all phone numbers necessary to complete the immediate notification procedures.

(3) Each plan shall identify a call–out procedure to acquire the resources necessary to address spills that cannot be addressed by the equipment that the owner/operator is required to have under contract. Procedures must allow for initiation of the call–out within 24 hours of the incident and must begin as soon as a determination has been made that additional resources are necessary.

(4) Each plan shall provide a checklist of the information to be reported in the notification procedures, including but not limited to:

(A) VCOASC name, country of registry, call sign, and official number;

(B) location of the incident;

(C) date and time of the incident;

(D) course, speed and intended track of the VCOASC;

(E) the nature of the incident;

(F) an estimate of the volume of oil spilled and the volume at immediate risk of spillage;

(G) the type of oil spilled, and any inhalation hazards or explosive vapor hazards, if known;

(H) the size and appearance of the slick;

(I) prevailing weather and sea conditions;

(J) actions taken or planned by personnel on scene;

(K) current condition of the VCOASC;

(L) injuries and fatalities; and

(M) any other information as appropriate.

(5) Reporting of a spill as required by Section 818.03(h)(2) shall not be delayed solely to gather all the information required by Subsection 818.03(h)(4).

(6) An updated estimate of the volume of oil spilled and the volume at immediate risk of spillage shall be reported to the California Governor's Office of Emergency Services whenever a significant change in the amount reported occurs, but not less than every 12 hours within the first 48 hours of response. The State Incident Commander and/or the Federal On–Scene Coordinator through the Unified Command shall have the option of increasing or decreasing this timeframe, as needed. Updated spill volume information included in the Incident Action Plan developed through the Unified Command will meet the requirements of this subsection.

(i) Temporary Storage and Waste Management

(1) Each plan shall identify sufficient temporary storage for all recovered oil or all oily waste, or identify facilities that would be able to accept the recovered oil or oily waste for recycling or other means of waste management. Sufficient storage shall be no less than two times the required Response Capability Standards as determined in Subsection 818.03(e)(3).

(2) Each plan shall identify the party that shall maintain responsibility for recovered oil and oily waste for the purposes of temporary storage.

(3) Each plan shall describe site criteria and methods used for temporary storage of recovered oil and oily wastes generated during response and clean–up operations, including known available sites.

(4) Each plan shall identify all applicable permits, and all federal, state and local agencies responsible for issuing those permits for transit, temporary storage and ultimate waste management of all hazardous waste products likely to result from an oil spill.

(5) Each plan shall include information which could expedite the state approval process for the use of temporary waste storage sites, including a list of appropriate contacts and a description of procedures to be followed for each approval process.

(j) Wildlife Rehabilitation Requirements

Each plan shall describe how oiled wildlife care will be provided by one of the following approved means:

(1) Utilize the California Oiled Wildlife Care Network (OWCN) to meet oiled wildlife care requirements: or

(2) describe procedures that clearly outline how oiled wildlife care will be provided. The equipment, facilities, and personnel necessary to implement these procedures must be identified and assured by contract for each Geographic Area covered by the plan. Standards and written protocols for wildlife care must comply with all applicable State and federal laws.

(k) Training

(1) Each plan shall provide that all appropriate personnel directly responsible to the owner/operator shall receive training in the use and operation of oil spill response and clean-up equipment. The plan shall describe:

(A) the type and frequency of training that each individual in a spill response position receives to achieve the level of qualification demanded by their job description;

(B) the procedures, if any, to train and use volunteers or other additional personnel in spill response operations as necessary for the size of the spill.

(2) Each plan shall describe the type and frequency of personnel training on methods to reduce operational risks. The description of the training shall include, if applicable, the following:

(A) the means of achieving any established training objectives, such as:

1. training programs for each position involved with the various aspects of the operation that could result in a spill (e.g., position responsible for vessel inspections or transfers);

2. a training schedule, including adequate frequency, (e.g., initial training upon hire and annual refresher training) and type of training (workshops, classroom, videotape, on-the-job training, etc.) for each position trained;

(B) licenses, certifications or other prerequisites to hold particular jobs.

(3) Each plan shall provide for safety training as required by state and federal health and safety laws for all personnel likely to be engaged in oil spill response, including a program for training non-permanent responders, such as volunteers or temporary help.

(4) The VCOASC owner/operator shall ensure that training records are maintained for three years. All such documentation must be made available to the Administrator upon request.

(*l*) Drills and Exercises

(1) Each plan shall describe the VCOASC's drill and exercise program. The vessel owner/operator shall conduct drills and exercises as necessary to ensure that the elements of the plan will function in an emergency, as described in Section 820.01(a).

(2) Drills shall be designed to exercise either components of or the entire response plan. Such drills, individually or in combination, shall ensure that the entire plan is exercised at least once every three years.

NOTE: Authority cited: Sections 8670.7, 8670.10, 8670.28, 8670.29 and 8670.30, Government Code. Reference: Sections 8670.7, 8670.10, 8670.20, 8670.25.5, 8670.27, 8670.28, 8670.29, 8670.30, 8670.31 and 8670.37.51, Government Code.

HISTORY

1. New section filed 6-1-98; operative 6-1-98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
2. Change without regulatory effect amending subsection (g)(1) and amending NOTE filed 8-29-2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
3. Amendment of subsection (a)(4) and amendment of NOTE filed 10-9-2002; operative 10-9-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
4. Amendment of section and NOTE filed 3-20-2007; operative 5-1-2007 (Register 2007, No. 12).

§ 819. Oil Spill Response Organization (OSRO) Rating.

HISTORY

1. New heading filed 11-4-93 with the Secretary of State by the Department of Fish and Game; operative 11-4-93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of section heading filed 6-1-98; operative 6-1-98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Amendment of section heading filed 10-9-2002; operative 10-9-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).

§ 819.01. Purpose and Scope.

(a) The Oil Spill Response Organization Rating process was developed to facilitate the preparation and review of oil spill contingency plans. An owner or operator who is required to submit a contingency plan must, among other things, identify and ensure by contract or other approved means the availability of personnel and equipment necessary to respond to all contingency plan requirements. Plan holders that have a contract or other approved means for the booming, on-water recovery and storage, and shoreline protection services of a Rated OSRO do not have to list that OSRO's response resources in their plan. A Rated OSRO has received an OSRO Rating Letter (ORL) from OSPR for the booming, on-water recovery and storage and shoreline protection services as listed in their application.

(b) The Rating levels assigned pursuant to this section are for planning purposes and may not reflect the exigencies of actual spill response.

(c) Only OSRO's that receive a Rating from OSPR are eligible to enter into agreements for response services pursuant to Government Code 8670.56.6.(j)(1), for the response resources as listed in their ORL.

NOTE: Authority cited: Sections 8670.28, 8670.30 and 8670.56.6(j)(1), Government Code. Reference: Sections 8670.28, 8670.30 and 8670.56.6(j)(1), Government Code.

HISTORY

1. New section filed 11-4-93 with the Secretary of State by the Department of Fish and Game; operative 11-4-93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment filed 6-1-98; operative 6-1-98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Change without regulatory effect amending subsections (d)(1) and (e) filed 8-29-2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
4. Amendment of section heading, section and NOTE filed 10-9-2002; operative 10-9-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
5. Amendment of subsection (b) filed 3-20-2007; operative 5-1-2007 (Register 2007, No. 12).

§ 819.02. OSRO Application Content.

(a) General Information

An individual or entity may apply for consideration as a Rated OSRO for oil spill response operations. OSPR will only grant Ratings by Geographic Regions (or Geographic Response Plan areas, if established) for the following services: booming; on-water recovery and storage; and shoreline protection. An OSRO's existing Letter of Approval issued from the Administrator shall remain valid unless revoked, and shall be deemed to meet the requirements of this section for three years from the date of the letter's issuance. OSROs without a current Letter of Approval must submit a completed application within 60 calendar days prior to citing the OSRO's response resources and services to comply with the contingency planning requirements for tank vessels, nontank vessels and marine facilities. The following information is required before an application will be reviewed:

(1) the OSRO's name, contact person, mailing and physical addresses, facsimile and telephone numbers;

(2) all subcontractor's name(s) (if applicable), contact person, mailing and physical addresses, facsimile and telephone numbers;

(3) list of plan holders contracted with;

(4) for the previous two years from the date of the application, documentation of California oil spills responded to or California equipment

deployment exercises participated in, including personnel and equipment used for the response/exercise;

(5) an organizational diagram depicting the OSRO's response organization and management/command structure;

(6) a description of the roles, responsibilities and method to interface the OSRO's organization with the State Incident Command System and/or the Unified Command Structure as required by Title 8, CCR, Subsection 5192(q)(3)(A). (The OSRO may utilize the appropriate Area Contingency Plan as a reference for information on the Incident Command System/Unified Command Structure).

(7) for each type of service, the types of oil to which the OSRO is willing and able to respond;

(8) a description of the OSRO's communications equipment, to include:

(A) the amount and type of equipment;

(B) the frequencies to be used; and

(C) the number of certified operators.

(b) Equipment and Personnel

The application shall include for each location (i.e., where the equipment is stored, moored and operating area), the following information as applicable for the response equipment and personnel available to respond, indicating whether company owned/employee or subcontracted (including subcontractor's name), and dedicated or non–dedicated or OSRO–owned and controlled (as defined in Section 815.05 of this subchapter), that forms the basis for the requested Rating, Note: Ratings for six hours or earlier require sufficient dedicated response resources (as defined in Section 815.05(c)) or OSRO–owned and controlled resources (as defined in Section 815.05(k)), except for shoreline protection services in which the six hour dedicated resources requirement is specified in Section 819.02(d)(4) of this subchapter. The required information shall include but not be limited to:

(1) A description of the boom to include:

(A) total lengths of boom by type;

(B) manufacturer name and model;

(C) freeboard and draft

(D) connector type; and

(E) intended operating environments;

(F) associated anchoring systems

(2) A description of the skimmers (including Oil Spill Response Vessels (OSRV)) to include:

(A) total number of skimmers by type;

(B) manufacturer name and model;

(C) intended operating environments, including current;

(D) skimmer type by design (i.e., stationary, advancing, self–propelled, stationary/advancing);

(E) manufacturer's nameplate capacity;

(F) Effective Daily Recovery Capacity (EDRC);

(G) on board storage capacity integral to the skimmer;

(H) storage capacity of the skimming system external to the skimmer (e.g., dracones, tank barges, etc.), if any, and pump rate for off loading on–board storage; and

(I) maximum draft;

(3) A description of the response vessels (not including OSRV's) to include:

(A) vessel name;

(B) vessel length, width, and draft;

(C) vessel type by design;

(D) current documentation/registration;

(E) intended operating environments;

(F) ability to tow;

(G) horsepower;

(H) amount of boom on board;

(I) pump rate for off loading on–board storage; and

(J) applicable design limits, including suitability for different types of oils, operating environments as related to adverse weather, and draft;

(4) A description of the recovered oil storage to include:

(A) type/name;

(B) official number;

(C) length/beam/draft;

(D) maximum capacity;

(E) a copy of the vessel's Certificate of Inspection or other documentation as applicable;

(5) For all equipment, all inspections and maintenance must be documented and the records maintained for 3 years. The location of the records must be noted in the application, and all records must be available for review during verification inspections conducted by OSPR.

(6) for any equipment not located in the Geographic Region for which a Rating is sought, the applicant shall provide attestation that the equipment is transportable and available for use within the Rating time period;

(7) Equipment shall be listed only if it is in a fully operable condition. Future equipment, ordered but not yet delivered and fully operable, may be listed, but it must be listed and identified separately with its date of availability indicated.

(8) Personnel

For all personnel identified as a spill response resource, the application shall include for each Geographic Region that the OSRO is requesting a Rating:

(A) the number of personnel that are to be utilized for response activities at the six hour response level or earlier, their assignments during spill response, and whether they are dedicated or OSRO–owned and controlled or non–dedicated personnel. A list matching trained personnel by name to the equipment type and the services offered shall be made available for review during verification inspections by OSPR;

(B) the plan for mobilization of personnel including cascading additional personnel, and estimated time of mobilization;

(C) a list of the training and qualifications required for each spill response assignment including:

1. all appropriate State and federal safety and training requirements, including the OSHA requirements for Hazardous Operations and Emergency Response, and the requirements under Title 8, California Code of Regulations, Section 5192;

2. the number of trained supervisors and laborers, and the types of training received;

3. the procedures for training personnel;

4. the timelines for mobilizing and training additional response personnel not under contract; and

5. a statement by the OSRO certifying that all personnel within a job category have the requisite training and qualifications for their assignment during spill response.

6. Documentation of training and qualifications shall be maintained by the OSRO and shall be made available to the Administrator upon request.

(c) Subcontracted Response Resources

If response resources that form the basis for the assigned Rating is under contract from another party, and if the information required in this subsection is not listed elsewhere, provide the following information:

(1) on–site deployment timeframes by Geographic Region and operating environments;

(2) A valid contract from each company that is providing the contracted resources shall be submitted to OSPR for review. If all subcontracts are the same, submitting one contract along with the signature pages for any additional contracts shall suffice. The contract shall include, but not be limited to, the following:

(A) the name of the company providing the resources (subcontractor);

(B) a complete listing and storage location of the specific resources being provided;

(C) the timeframe for which the agreement is valid;

(D) any limits on the availability of resources;

(E) a signed letter from the subcontractor by an authorized individual, to the OSRO stating the following:

"The information provided regarding [subcontractor] response equipment and personnel is factual and correct to the best of my knowledge and belief. I agree to allow OSPR personnel access to

my facility and records for the purpose of verifying the information contained in the Rating application in which my assets are listed. I agree to participate in announced and unannounced drills as set forth in Section 819.03 of this subchapter to verify any or all of the information regarding my response equipment and personnel contained in a Rating application".

(3) Any drill or inspection of subcontracted response resources shall be coordinated with the OSRO whose application contains the subcontracted response resources.

(4) If the subcontracted response resources are not dedicated response resources, the OSRO must ensure the availability of non–dedicated response resources by contract in quantities equal to twice what the OSRO requires of the dedicated response resources. These non–dedicated response resources are subject to verification inspections and will be required by the Administrator to participate in an announced and unannounced drill(s).

(d) Service–specific Information

(1) List the Geographic Response Plan (GRA) area(s), (or the Geographic Regions(s) as defined in Chapter 1, Section 790 (ACP Areas), if GRA's are not established) in which spill response services are being offered. Include for each GRP or region:

(A) the services being offered and/or under contract (i.e., booming, on–water recovery and storage, and shoreline protection services);

(B) estimated timeframes to deploy equipment/resources at scene,

(C) operating environment(s) as described in 33 CFR 154, as applicable, including the OSRO's minimum operating depth, and

(D) requested Rating level, as described in Section 819.04 of this subchapter.

(2) for each Rating level as described in Section 819.04, and for each service offered, a written plan of operations including a call–out list for each GRA, or Geographic Region (ACP area if GRA's are not established), and operating environment of response coverage. The written plan of operations can be limited to the following time frames: six hours for High Volume Ports; 12 hours for Facility Transfer Areas; and 18 hours for Balance of the Coast (except for Shoreline Protection Ratings for small harbors which is limited to 7 hours). However, a written general plan to acquire response resources beyond these time frames is still required. As applicable, the plan will describe the number(s), type(s), means of deployment, and operations of all oil spill response equipment and trained personnel, including subcontracted resources, that the applicant would use for a spill of 50 barrels, a spill of 3,125 barrels and the largest reasonable worst case spill for which the applicant would be contractually responsible.

(3) The applicant shall submit a description of the systems approach (as defined in Section 815.05 of this subchapter) for the services offered (i.e., booming, on–water recovery and storage, and shoreline protection services) in a narrative format, for the equipment listed in Subsection (b) including, but not limited to:

(A) for all boom:

1. describe how boom is transported and method of deployment.

(B) for all skimmers (including vessel of opportunity skimming systems (VOSS)):

1. describe how the skimmer is deployed and operated;

2. describe how skimmer is transported.

(C) for all vessels (OSRO owned vessels, and subcontracted vessels):

1. describe how vessel is transported; and

2. describe type of spill response service the vessel is primarily to be used for (e.g., OSRV, skimming, towing boom, boom deployment).

(D) for all recovered oil storage:

1. describe how recovered oil is transported to/from storage.

(4) for all shoreline protection services of environmentally sensitive sites:

(A) For tank vessels and nontank vessels, OSRO's will receive a Rating for each GRA (or Geographic Region as defined in Chapter 1, Section 790 (ACP Area)). Ratings will reflect the OSRO's capability to deliver and deploy the response resources necessary to protect each type of shoreline and all applicable sensitive sites in the time frames required, as outlined in the appropriate SP Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website). The SP Tables shall be reviewed and updated as needed (e.g., to reflect updates to the ACPs, etc.). Updates to the SP Tables will be processed by OSPR staff using the procedures contained in the Administrative Procedure Act.

1. An OSRO may propose alternatives to what is listed in the SP Tables for boats and staff only. The proposal may be tested by the Administrator anytime prior or subsequent to plan approval.

(B) For marine facilities, OSRO's will receive a Rating for each GRA (or Geographic Region as defined in Chapter 1, Section 790 (ACP Area)). Ratings will reflect the OSRO's capability to deliver and deploy the response resources for each marine facility to protect each type of shoreline and all applicable sensitive sites in the time frames required, based on the expected oil impact from the trajectory analysis. The following information shall be submitted with each application for a Shoreline Protection Rating for impacts within the first six hours:

1. Sensitive site name and number;

2. Expected time of impact from marine facility;

3. Expected time of arrival and deployment of response resources;

4. Amount of boom, vessels, trained personnel, and other resources necessary to protect the identified site in the timeframes required.

5. For impacts at seven hours and beyond, the total amount of response resources (boom, boats, staff, etc.) necessary to protect the remaining sensitive sites.

(C) The Rating(s) requested by the OSRO shall be justified by providing documentation specifying: location of both ACP and plan holder–identified sensitive sites to be protected, as determined by the OSRO; equipment and personnel; estimated time of arrival at the site to be protected; and deployment times. Announced and unannounced drills will be used to validate the Rating(s).

(D) Ratings up to and including six hours require sufficient dedicated response resources or OSRO–owned and controlled resources. (OSRO–owned and controlled resources refers to equipment owned by the OSRO, and personnel who are employed directly by the OSRO). The following table lists the applicable percentage of dedicated shoreline protection boats and staff that are required for each Geographic Region:

Geographic Region (also known as ACP Area)	*% DEDICATED RESOURCES FOR SHORELINE PROTECTION*
1	50% dedicated boats and staff
2	75% dedicated boats and staff
3	0% (non–dedicated boats and staff allowed)
4	0% (non–dedicated boats and staff allowed) *For Port Hueneme only, 75% dedicated boats and staff required
5	75% dedicated boats and staff
6	50% dedicated boats and staff

(E) Shoreline Protection Requirements for Vessels Operating in Small Harbors Included in the SP Tables is a listing of Small Harbors throughout the state. OSROs may apply for a Rating for each Small Harbor by meeting the requirements in the Table. The requirements in the Small Harbor Table apply to all vessels over 300 GT that operate in the small harbors as listed. The following apply to the Small Harbor Table only:

1. Non–dedicated resources are allowed for shoreline protection for the vessels that operate in these harbors.

2. The amounts of boom, boats and staff, as listed, are required for the vessels that operate in these harbors. In some locations additional response resources may be required for included or adjacent sensitive sites if this has been identified in the applicable ACPs.

3. Resource requirements can be met either with pre–positioned equipment (as identified in the owner/operator's Contingency Plan) or by a contract with a Rated OSRO. Advance notice to the OSRO is required before the plan holder can begin operating in the small harbor.

4. Unless otherwise specified in the Small Harbor Table, anytime that a vessel over 300 GT operates in these small harbors, that vessel shall

have a contract or other approved means for a minimum of 2,500 feet of boom that can be deployed in 6 hours.

5. An OSRO may propose lesser amounts of shoreline protection resources than that listed in the Small Harbor Table, for carrying out planned projects in the Balance of the Coast, upon petitioning and approval of the Administrator. The proposal may be tested by the Administrator anytime prior or subsequent to plan approval.

6. An OSRO may apply for a Temporary Small Harbor Rating for shoreline protection for a specific timeframe to cover a vessel being used for a specific project. Unannounced Drills for these Temporary Ratings will not require actual deployment of equipment.

(e) Attestation

The application shall contain the following language, signed and dated from the OSRO, by an authorized individual:

"The information provided regarding response equipment and personnel is factual and correct to the best of my knowledge and belief. I agree to allow OSPR personnel access to my facility, prior and subsequent to receiving a Rating, for the purpose of verifying the information contained in this application. I understand that all response resources identified for Rating purposes are subject to verification visits. I agree to participate in announced and unannounced drills as set forth in Section 819.03 of this subchapter to verify any or all of the information contained in this application, prior and/or subsequent to receiving a Rating".

(f) Confidentiality

(1) An applicant may request that proprietary information be kept confidential. Such a request must include justification for designating the information as confidential. The Administrator will make a determination regarding that information which may be considered confidential and removed from any copy of the application that is made available for public review.

(A) An applicant may also request that any reports, or studies prepared or submitted under any OSRO certification requirements be designated as proprietary information. Such a request must include justification for designating the report or study as confidential.

(2) Any information designated as confidential must be clearly identified as proprietary.

(3) If an applicant designates information as confidential, two different copies of the application must be submitted as follows:

(A) one copy must contain the confidential information. This application will be utilized in the review and Rating process;

(B) one copy must be submitted with the confidential information removed. This copy will be available for public review. This application must contain sufficient information in place of the confidential information so that any individual reviewing the application will understand all the elements of the application.

NOTE: Authority cited: Sections 8670.28 and 8670.30, Government Code. Reference: Sections 8670.10, 8670.19, 8670.28 and 8670.30, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Amendment of section and NOTE filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
4. Amendment filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 819.03. Application Review, Verification and Drills.

(a) Review For Rating

(1) An application will be reviewed within 90 calendar days of receipt or resubmission.

(2) The Administrator shall rate an OSRO upon determination that the applicant has met the requirements for the appropriate Rating levels, as outlined in Subsection 819.04(b)(2), for the equipment, services and operating environments listed in the application. The Administrator shall not issue a Rating until the applicant OSRO successfully completes an unannounced drill to verify the information in the OSRO's application.

(3) A Rating may be denied or modified if the Administrator determines that the OSRO applicant fails to meet the criteria for the Rating level of any services, based upon inspection, verification or performance of an announced and unannounced drill or actual spill, or for other reasons as determined by the Administrator. The Administrator may require the satisfactory completion of an unannounced drill of each rated OSRO prior to being granted a modified rating, or for renewal, or prior to reinstatement of a revoked or suspended rating.

(b) Standards For Review

OSRO Rating Letters will be issued to OSROs subject to the following conditions:

(1) Equipment, equipment maintenance records, and personnel training records, and personnel–specific equipment qualifications must be verifiable by inspection by the Administrator. Any resources not on site at the time of an inspection will not be counted until verified by subsequent inspection.

(2) Response personnel must comply with all appropriate State and federal safety and training requirements. Safety requirements include, but are not limited to, the following (found in Title 8, California Code of Regulations):

Trenching and Shoring (Section 1504, 1539–1547)
Electrical Safety (Section 2299–2974)
Injury and Illness Prevention Program (Section 3203)
Employee Exposure Records (Section 3204)
Transporting Employees (Section 3702)
Crane Safety (Section 4885–5049)
Noise/Hearing Conservation (Section 5095–5100)
Ergonomics (Section 5110)
Respiratory Protection (Section 5141 and 5144)
Airborne Contaminants/Employee Exposure Monitoring (Section 5155)
Confined Space (Section 5157–5159)
Hazardous Waste Operation and Emergency Response (Section 5192)
Hazard Communication (Section 5194)
Benzene Standard (Section 5218)

(3) Safety and training records may be inspected for verification.

(c) Inspections and Verification of Response Resources

(1) OSROs seeking a Rating are subject to unannounced inspections anytime prior and subsequent to receiving a Rating to verify the response services cited in the application.

(A) Any contract or sub–contract for response resources listed in the application must acknowledge OSPR personnel's right to inspect and verify listed contracted response resources as provided in this section or those response resources will not be counted. Inspection of sub–contracted response resources shall be coordinated with the OSRO whose application contains the subcontracted response resources.

(2) The Administrator or any duly authorized representative of OSPR may do any of the following:

(A) enter the OSRO's or sub–contractor's facility or other areas where response service equipment is stored or serviced to inspect the response services cited in the application;

(B) document, photograph or videotape any response service equipment;

(C) request start up, operation, or demonstration of any response service equipment or response system cited in the application;

(D) inspect and copy any documents, reports, equipment maintenance records, employee training records, or other information required to verify the response services cited in the application.

(3) Deficiencies noted during the inspection may result in denial of the application, or revocation or modification of the OSRO's Rating as described in Section 819.06 of this subchapter.

(4) The Administrator may accept an inspection completed by a governmental agency if all requirements of Sections 819 through 819.07 are met.

(5) OSRO Announced Drills and Inspections; and Unannounced Drills

Announced and unannounced drills shall be conducted to verify any or all of the elements of the services provided by an OSRO in its application prior and subsequent to issuing a Rating. A drill for the protection of sensitive sites shall conform as close as possible to the response that would occur during a spill but sensitive sites shall not be damaged during the drill. The Administrator may determine if actual spill response may be substituted in lieu of a drill, as described in CCR Section 820.01(k) of this subchapter.

(A) Announced Drills and Inspections

All OSRO's shall submit annual drill schedules to OSPR and conduct equipment deployment and sensitive site protection exercises for equipment listed in the application, including subcontracted equipment, for any services they are Rated for. The exact dates of the exercises shall be submitted 30 calendar days prior to the exercise being conducted.

1. At least 50% of all response equipment other than boom shall be exercised each year, and all response equipment, other than boom, shall be exercised over a two-year period. The OSRO will ensure that this equipment is identified/labeled and the same equipment is not used repeatedly for each exercise.

2. At least 33% of the boom listed in the application shall be inspected annually, and 1/3 of that 33% shall be deployed annually, and shall be representative of the total inventory contained in the application. The OSRO shall identify/label the boom and document the deployment or inspection.

3. For the equipment deployment exercises, the OSRO shall operate boats, boom and skimmers in each type of operating environment contained in the application.

4. Documentation that these exercises/inspections have been performed shall be submitted to OSPR within 30 calendar days after completion of the exercise/inspection. The equipment deployment exercises pursuant this subsection will also satisfy the equipment deployment exercise requirement of Section 818.02(*l*)(1)(D) for any vessel or Section 817.02(k)(3) for any marine facility that utilizes the OSRO's resources to fulfill the response element of the vessel or marine facility's own plan. These exercises will not fulfill the semi-annual equipment deployment exercise requirement of marine facility-owned equipment pursuant to Section 817.02(k)(1)(B).

5. OSROs shall ensure they coordinate equipment deployment exercises with all of their subcontractors. Full systems must be deployed and operating for all booming, on-water recovery and storage, and shoreline protection services.

(B) Unannounced Drills

OSROs are subject to unannounced drill(s) by OSPR to verify the ability of the OSRO to respond and deploy equipment and personnel as stated in the OSRO's application, prior and subsequent to receiving a rating. Unannounced drills will only be held to verify Ratings of 24 hours or earlier.

1. An OSRO shall be subject to one unannounced drill per year in each ACP area in which a Rating has been issued by OSPR. However, for ACP Area 2 only (as described in Chapter 1, Section 790(g)(2)(B)), if an OSRO applies for and receives a Rating for six hours or earlier they shall be subject to one unannounced drill each year in each of the Geographic Response Plan areas (GRA) identified in the ACP.

i. The Administrator may call a drill to test every service that the OSRO intends to provide, pursuant to the OSRO's application. Plan holders are still subject to unannounced drills for all required services, including those which OSPR does not Rate the OSRO.

ii. Each OSRO applying to provide shoreline protection services shall be subject to one unannounced drill that tests their ability to provide sensitive shoreline site protection services in each Geographic Region (or Geographic Response Plan area, if established) in which they apply to provide services.

2. Significant reductions in resources, as described in Section 819. 05 of this subchapter, may warrant additional unannounced drills.

3. Failure to participate in an unannounced drill may result in denial or revocation of the OSRO's Rating as described in Section 819.06 of this subchapter.

4. The Administrator may modify, suspend or revoke an OSRO's Rating if the OSRO fails to satisfactorily complete a drill.

5. The Administrator may cancel an announced or unannounced drill at any time due to hazardous or other operational circumstances, which shall include but not be limited to:

i. any unsafe activity or condition;

ii. oil or cargo transfer operations;

iii. inclement weather or sea state;

iv. on-going spill response activities;

v. emergency situation as determined by the U.S. Coast Guard Captain of the Port;

vi. other situations or conditions as determined by the Administrator

6. All non-governmental costs associated with an unannounced drill are the obligation of the OSRO.

7. OSROs may identify client plan holder(s) who wish to receive credit for a drill as described in CCR Section 820.01 of this subchapter.

8. The Administrator shall issue a written report evaluating the performance of the OSRO after every unannounced drill called by the Administrator within 30 calendar days.

9. The Administrator shall determine whether an unannounced drill called upon the OSRO by a federal agency qualifies as an unannounced drill for the purpose of this section, as described in CCR Section 820.01(j).

NOTE: Authority cited: Sections 8670.28 and 8670.30, Government Code. Reference: Sections 8670.19, 8670.28 and 8670.30, Government Code.

HISTORY

1. New section filed 11-4-93 with the Secretary of State by the Department of Fish and Game; operative 11-4-93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment of section and NOTE filed 6-1-98; operative 6-1-98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Change without regulatory effect amending subsection (c)(2) and amending NOTE filed 8-29-2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 35).
4. Amendment of section heading, section and NOTE filed 10-9-2002; operative 10-9-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
5. Amendment of subsections (c)(3)-(5) and (c)(5)(B)1. filed 3-20-2007; operative 5-1-2007 (Register 2007, No. 12).

§ 819.04. OSRO Rating, Update, and Renewal Procedure.

(a) Filing

Applications must be filed with the Administrator of the Office of Spill Prevention and Response in the Department of Fish and Game. Applications shall either be delivered in person or sent by registered mail with return receipt requested, or other means as approved by the Administrator to the Marine Safety Branch of OSPR.

(b) OSRO Rating

(1) Upon satisfactorily meeting the requirements of this subchapter, an OSRO will receive the OSRO Rating Letter (ORL) that will state the type of response services, GRA or ACP area, Rating time frame(s), the on-water daily recovery rate or Shoreline Protection Rating from the appropriate Shoreline Protection Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website), as applicable, and any applicable conditions or restrictions. An OSRO Rating may not be assigned, transferred, or assumed. An OSRO's existing Letter of Approval issued from the Administrator shall remain valid unless modified, suspended or revoked, and shall be deemed to meet the requirements of this section for three years from the date of the letter's issuance. OSROs without a current Letter of Approval must submit a completed application within 60 calendar days prior to citing the OSRO's response equipment and services to comply with the contingency planning requirements for tank vessels, nontank vessels and marine facilities.

(2) Ratings for Containment Booming and On-Water Recovery and Storage

Ratings will reflect the type of response service(s) offered based on the projected arrival time of the response equipment and personnel within the designated operating areas. Note: Ratings for six hours or earlier require sufficient dedicated response resources) as defined in Section 815.05(c)) or OSRO-owned and controlled resources (as defined in Section 815.05(k)). Ratings for containment booming services only will be limited to 12 hours or earlier. For containment booming and on-water recovery and storage (on-scene) means that the equipment is at the scene of the spill, and deployed and operating within one hour of arrival at the scene of the spill, but no later than the designated time frame for each Rating(s). The Rating time frames are as follows:

Ratings	*Equipment On-Scene*
0	On-scene within 30 minutes
1	On-scene within 1 hour
2	On-scene within 2 hours (Temporary storage on-scene within 4 hours)
3	On-scene within 3 hours
4	On-scene within 4 hours
6	On-scene within 6 hours
12	On-scene within 12 hours
18	On-scene within 18 hours
24	On-scene within 24 hours
36	On-scene within 36 hours
60	On-scene within 60 hours

(3) Ratings for Shoreline Protection

Ratings for shoreline protection will be based on the ability of the OSRO to meet the response requirements of the applicable Shoreline Protection Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website). Note: Subsection 819.02(d)(4)(D) lists the applicable percentage of dedicated shoreline protection boats and staff that are required for each Geographic Region. The OSRO Rating Letter (ORL) for Shoreline Protection will list the applicable SP Tables and time frames that the OSRO has been Rated.

(c) Updates

(1) To maintain the OSRO's assigned Rating level, the following information shall be updated and submitted to OSPR:

(A) the current list of the OSRO's client plan holders, submitted whenever there is a change in the list, and;

(B) the current list of all owned and subcontracted oil spill response equipment and trained personnel listed in the application, that forms the basis for the assigned Rating, submitted within one year, and annually thereafter, of the anniversary date of the original Rating.

(d) Renewal

(1) Ratings will be assigned for a period of three years unless suspended or revoked by the Administrator or assigned a modified Rating level. An OSRO shall file an application for renewal at least 90 calendar days prior to the expiration of the Rating. Renewal applications shall have the same content as a new application, and shall follow the same review, verification and drill procedures as a new application. Modification of a Rating shall not affect the three year period.

(2) Ratings may be renewed earlier at the request of the OSRO in the event the OSRO has sustained a significant increase or decrease in response resources.

(3) The Administrator may require an earlier or more frequent Rating renewal than that required in Subparagraph (d)(1) above. The OSRO will be notified in writing if an earlier renewal is required. The notice will include an explanation of the reasons for the earlier Rating renewal. The circumstances that would warrant an earlier renewal include, but are not limited to, the following:

(A) a change in regulations;

(B) the development of new oil spill response technologies as determined by the Administrator;

(C) deficiencies in oil spill response capability identified by the Administrator as part of the Coastal Protection Review;

(D) an increased need to protect plant and wildlife habitat;

(E) deficiencies in oil spill response capability identified during an oil spill;

(F) deficiencies in oil spill response capability identified during an announced or unannounced drill;

(G) significant reductions to the OSRO's response capability; and

(H) any other situation deemed appropriate by the Administrator.

NOTE: Authority cited: Sections 8670.28 and 8670.30, Government Code. Reference: Sections 8670.28 and 8670.30, Government Code.

HISTORY

1. New section filed 11-4-93 with the Secretary of State by the Department of Fish and Game; operative 11-4-93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment filed 6-1-98; operative 6-1-98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Amendment of section heading, section and NOTE filed 10-9-2002; operative 10-9-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
4. Amendment of subsections (b)(1)-(2), new subsection (b)(3) and amendment of subsection (d) filed 3-20-2007; operative 5-1-2007 (Register 2007, No. 12).

§ 819.05. Notice of Reduction in Response Resources.

(a) The OSRO shall notify the Administrator of significant reductions in equipment, personnel or management 14 calendar days in advance. This notice may be oral, followed by a written notice as soon as possible, or in writing by facsimile or letter. If the reduction is unforeseen, oral notice shall be given immediately after becoming aware of such change. The notice shall include the identification of backup resources sufficient to maintain the OSRO's Rating level, subject to approval by the Administrator.

(1) a significant reduction is one that would affect the OSRO's ability to respond consistent with their assigned Rating level.

(b) It is the responsibility of the OSRO to verify and report to the Administrator any significant reductions in subcontracted equipment and personnel listed in the OSRO's application.

(c) Failure to notify the Administrator of significant reductions in response resources may result in the modification of a Rating level or revocation of the OSRO Rating Letter.

NOTE: Authority cited: Sections 8670.28 and 8670.30, Government Code. Reference: Sections 8670.28 and 8670.30, Government Code.

HISTORY

1. New section filed 11-4-93 with the Secretary of State by the Department of Fish and Game; operative 11-4-93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment filed 6-1-98; operative 6-1-98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Repealer and new section filed 10-9-2002; operative 10-9-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).

§ 819.06. Rating Modification, Suspension, Revocation, or Denial.

(a) Criteria:

(1) Criteria for modification. The Administrator may modify an OSRO Rating at any time if the OSRO is not in compliance with the conditions of the Rating. The OSRO shall only perform at the modified Rating level until or unless the original Rating is reinstated.

(2) Criteria for suspension. The Administrator may suspend a Rating at any time if the OSRO is not in compliance with the requirements of this subchapter. In the situation where a Rated OSRO has refused to participate in an announced or unannounced drill, except as provided in Section 819.03(c)(5)(B), or is unable to successfully complete an announced or unannounced drill due to significant reductions in response resources, the Administrator may suspend the Rating at any time after the announced or unannounced drill is called. An OSRO with a suspended Rating shall not provide those services until the Rating is either modified or reinstated. The Administrator may revoke an OSRO Rating if the OSRO fails within 60 calendar days of written notification pursuant to Subsection (b) to correct deficiencies that were the cause of a Rating suspension, or if statutory enactments subsequent to the issuance of the Rating conflict with the purposes of the OSRO Rating program.

(3) Criteria for Denial. The Administrator may deny an OSRO Rating if the OSRO has failed to provide the information required in the Rating

application as set forth in section 819.02 or has failed to satisfy the Application review criteria set forth in Section 819.03. If the Administrator decides to deny an OSRO Rating, the Administrator shall issue a written statement of the basis for the denial. After receiving the written statement of denial from the Administrator, the OSRO shall wait 90 calendar days before submitting a new application

(b) Procedure For Modification, Suspension, Revocation, or Denial.

(1) When the Administrator believes there are valid grounds for modifying, suspending, revoking, or denying a Rating the OSRO shall be notified in writing of the modification, suspension, revocation or denial by certified or registered mail. A proposed revocation notice shall be issued after the 60 day period required by subsection (a)(2) above. The notice shall identify the Rating to be modified, suspended, revoked or denied and the reason(s) for such modification, suspension, revocation or denial, and inform the OSRO of the right to request reconsideration of a modification, suspension, revocation or denial. The Administrator may amend any notice of modification, suspension, revocation or denial at any time.

NOTE: Authority cited: Sections 8670.28 and 8670.30, Government Code. Reference: Sections 8670.28 and 8670.30, Government Code.

HISTORY

1. New section filed 11–4–93 with the Secretary of State by the Department of Fish and Game; operative 11–4–93. Submitted to OAL for printing only pursuant to Government Code section 8670.28(e) (Register 93, No. 45).
2. Amendment filed 6–1–98; operative 6–1–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 23).
3. Repealer and new section filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
4. Amendment of section heading and section filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 819.07. Reconsideration and Hearing Procedures.

(a) Request for reconsideration. Any person may request reconsideration if that person is one of the following:

(1) An applicant for an OSRO Rating or renewal who has received written notice of denial;

(2) An OSRO who has a Rating modified, suspended, or revoked.

(b) Method of requesting reconsideration. Any person requesting reconsideration of an action must comply with the following criteria:

(1) Any request for reconsideration must be in writing, signed by the person requesting reconsideration or by the legal representative of that person, and must be submitted to the Administrator.

(2) The request for reconsideration must be received by the Administrator within 20 calendar days of the date of notification of the decision.

(3) The request for reconsideration shall state the reason(s) for the reconsideration, including presenting any new information or facts pertinent to the issue(s) raised by the request for reconsideration.

(c) The Administrator shall notify the OSRO of his or her decision within 15 calendar days of the receipt of the request for reconsideration. This notification shall be in writing and shall state the reasons for the decision. The notification shall also provide information concerning the right to a hearing and the procedures for requesting a hearing.

(d) Hearing.

The OSRO may, within 15 calendar days after receipt of notice that reconsideration has been denied, request a hearing in writing.

(1) Any hearing required under this subchapter shall be conducted by an independent hearing officer according to the procedures specified in Government Code Section 11500 et seq. (The Administrative Procedure Act) and shall be scheduled as expeditiously as possible.

(2) After conducting any hearing pursuant to this section, the hearing officer within 30 calendar days after the hearing is held, shall issue a written decision. The decision of the hearing officer shall constitute the final administrative decision.

NOTE: Authority cited: Sections 8670.28 and 8670.30, Government Code. Reference: Sections 8670.28 and 8670.30, Government Code.

HISTORY

1. New section filed 10–9–2002; operative 10–9–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 41).
2. Amendment of section heading and section filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 820.01. Drills and Exercises.

(a) Exercises shall be designed to exercise either individual components of the contingency plans or the entire response plan. Components include, but are not limited to:

on–water containment and recovery;

shoreline protection;

response procedures (which includes how the plan interfaces with the State's Incident Command Structure and/or Unified Command as required by Title 8, California Code of Regulations, Subsection 5192(p)(D)(2));

notification procedures;

temporary storage and waste management procedures;

oiled wildlife care requirements;

and training related to response procedures.

Such exercises, individually or in combination, shall ensure that the entire plan is exercised at least once every three years, emphasizing spill response operations from spill discovery to completion of clean up and documentation. Any number of components may be tested during the exercises required below.

(1) For marine facilities and small marine fueling facilities:

(A) A tabletop exercise, announced or unannounced, of the spill management team(s) shall be conducted annually.

(B) Notification procedures shall be exercised quarterly for the Qualified Individual, marine facility personnel, the OSRO and the spill management team.

(C) A semi–annual exercise to test the deployment of facility–owned equipment, which shall include immediate containment strategies, methods to stop the spill at the source, methods to slow or stop leaks, and methods to achieve immediate emergency shutdown.

(D) Shoreline protection strategies shall be exercised as described in Subsection 820.01(b) below.

(E) Oil spill response organization field equipment deployment exercises for on–water recovery and for shoreline protection shall each be conducted at least once every three years. Shoreline protection strategies shall be exercised as described in Subsection 820.01(b) below.

(F) The owner/operator shall maintain adequate records of drills and exercises, for a period of at least three years, to include records of any drills and exercises of the oil spill response organization and resources identified in the contingency plan. These records shall be maintained at the marine facility and shall be available for inspection by the Administrator.

(2) For Tank vessels, nontank vessels and vessels carrying oil as secondary cargo, as applicable:

(A) A shore–based spill management team tabletop exercise shall be conducted annually. This exercise shall be conducted in California at least once every three years.

(B) Onboard emergency procedures and Qualified Individual notification drills shall be conducted quarterly, or 72 hours prior to entering marine waters, whichever is less often;

(C) Oil spill response organization field equipment deployment exercises for on–water recovery and for shoreline protection shall each be conducted at least once every three years. Shoreline protection strategies shall be exercised as described in Subsection 820.01(b) below.

(D) The vessel owner/operator shall maintain adequate records of drills and exercises, for a period of at least three years, to include records of any off–vessel drills and exercises (i.e., drills and exercises not held aboard the vessel) of the oil spill response organization and resources identified in the contingency plan. These records shall be maintained at the United States location of either the Qualified Individual or the vessel owner/operator. Contingency plans should indicate the location of these records. All exercises conducted aboard the vessel shall be documented in the vessel's log.

(3) Drills shall be designed to exercise either individual components of the contingency plans or the entire response plan. Such drills, individually or in combination, shall ensure that the entire plan is exercised at least once every three years.

(4) The owner/operator shall ensure that records sufficient to document a drill or exercise are maintained for three years following the completion of the drill or exercise. All such documentation must be made available to the Administrator upon request.

(b) Shoreline Protection Strategies for Sensitive Sites

(1) Marine facility owners/operators are required to exercise shoreline protection response strategies for all ACP–listed sensitive sites within the area identified as impacted. Marine facility owner/operators may use their own trajectories to identify impacted areas.

(2) Vessel owner/operators are required to exercise the shoreline protection response strategies that are identified in the applicable Shoreline Protection Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website). All owner/operators may participate in the OSPR Sensitive Site Strategy Evaluation Program (as defined in Section 790) or shall submit a yearly schedule to OSPR which lists four sensitive sites to be exercised. Owner/operators are required to demonstrate to the Administrator that these areas have been exercised, either with owner/operator–owned equipment or through a Rated OSRO under contract with the owner/operator.

(A) Each schedule shall be approved or denied within 180 days after receipt by the Administrator.

(B) The Administrator shall determine whether each schedule adequately assures that the shoreline protection strategies for all sensitive sites identified as potentially impacted will be exercised. If it is determined that a schedule is inadequate, it will be returned to the submitter with a written explanation of deficiencies and, if practicable, suggested modifications or alternatives.

(c) The Administrator may call a drill or conduct an inspection, to validate all or part of a contingency plan. This drill or inspection may be announced or unannounced.

(d) To receive credit from OSPR for an exercise, the following notification requirements must be met:

(1) The owner/operator shall invite the Administrator to participate in both the equipment deployment exercises and the management team tabletop exercises and shall submit written notification including, but not limited to, the following information: company name, address, marine facility or tank vessel name, OSPR contingency plan number, point of contact, phone/FAX number, e–mail address, type of exercise, date, time and location of exercise, sensitive sites being tested, exercise scenario description, plan components to be tested, and other participants in the drill. The owner/operator may use the OSPR Exercise Notification Form (FG OSPR 1964, 3/10/97) or a document that includes the same information as the Notification Form, for this purpose. Notification may be made via letter, E–mail, or fax and sent to:

DRILLS AND EXERCISES COORDINATOR
EXECUTIVE BRANCH
DEPARTMENT OF FISH & GAME/OSPR
POST OFFICE BOX 944209
SACRAMENTO, CALIFORNIA 94244–2090
FAX: DRILLS AND EXERCISES COORDINATOR,
DFG/OSPR, (916) 324–9786

(2) The Administrator shall be given advance notice of a minimum of 30 days for all exercises. Full Scale Combination Exercises and Area Exercises, however, require advance notice of a minimum of 60 days.

(e) The Administrator shall determine if the elements of the plan were adequately tested by the exercise scenario and the response of the participants.

The Administrator shall give credit for all exercise objectives successfully tested during the exercise. Objectives not successfully tested during the exercise will not receive credit and shall be exercised again within the three year cycle. Exercise objectives shall include, but not be limited to, the following (as set forth in Appendix B of the PREP guidelines, as applicable):

(1) Notifications: Test the notification procedures identified in the contingency plan;

(2) Staff mobilization: Demonstrate the ability to assemble the spill response organization identified in the contingency plan;

(3) [Reserved]

(3.1) Unified Command: Demonstrate the ability of the spill response organization to form or interface with a Unified Command;

(3.1.1) Federal Representation: Demonstrate the ability to consolidate the concerns and interests of the other members of the unified command into a unified strategic plan with tactical operations;

(3.1.2) State Representation: Demonstrate the ability to function within the unified command structure;

(3.1.3) Local Representation: Demonstrate the ability to function within the unified command structure;

(3.1.4) Responsible Party Representation: Demonstrate the ability to function within the unified command structure;

(3.2) Response Management System: Demonstrate the ability of the response organization to operate within the framework of the response management system identified in their respective plans;

(3.2.1) Operations: Demonstrate the ability to coordinate or direct operations related to the implementation of action plans contained in the respective response and contingency plans developed by the unified command;

(3.2.2) Planning: Demonstrate the ability to consolidate the various concerns of the members of the unified command into joint planning recommendations and specific long range strategic plans. Demonstrate the ability to develop short range tactical plans for the operations division;

*(CA1) Situation Unit: Demonstrate the ability to collect, organize, and disseminate information about the current status of the spill;

*(CA2) Resource Unit: Demonstrate the ability to maintain the status of all incident resources;

*(CA3) Environmental Unit: Demonstrate the ability to prepare environmental data including assessments, modeling, surveillance, resources at risk, and impacts on environmentally sensitive sites.

*(CA4) Resources at Risk Technical Specialist: Demonstrate the ability to identify natural resources thought to be at risk from exposure to spilled oil through the gathering and analysis of known and anticipated oil movement and the location of natural, cultural and economic resources, and to prioritize a list of resources for protection based on the relative important of the resources and relative risk of exposure.

(3.2.3.) Logistics: Demonstrate the ability to provide the necessary support of both the short term and long term action plans;

(3.2.4) Finance: Demonstrate the ability to document the daily expenditures of the organization and provide cost estimates for continuing operations;

(3.2.5) Public Affairs: Demonstrate the ability to form a joint information center and provide the necessary interface between the unified command and the media;

(3.2.6) Safety Affairs: Demonstrate the ability to monitor all field operations and ensure compliance with safety standards;

(3.2.7) Legal Affairs: Demonstrate the ability to provide the unified command with suitable legal advice and assistance;

(CA5) Liaison Officer: Demonstrate the ability to establish and coordinate interagency communication and cooperation;

(4) Source Control: Demonstrate the ability of the spill response organization to control and stop the discharge at the source;

(4.1) Vessel Emergency Services (formerly called Salvage): Demonstrate the ability to assemble and deploy the vessel emergency services resources identified in the response plan;

(4.2) Firefighting: Demonstrate the ability to assemble and deploy the firefighting resources identified in the response plan;

(4.3) Lightering: Demonstrate the ability to assemble and deploy the lightering resources identified in the response plan;

(4.4) Other Vessel Emergency Services (formerly called Salvage) Equipment and Devices: Demonstrate the ability to assemble and deploy other vessel emergency services equipment and devices identified in the response plan;

(5) Assessment: Demonstrate the ability of the spill response organization to provide an initial assessment of the discharge and provide continuing assessments of the effectiveness of the tactical operations;

(6) Containment: Demonstrate the ability of the spill response organization to contain the discharge at the source or in various locations for recovery operations;

(7) Recovery: Demonstrate the ability of the spill response organization to recover, mitigate, and remove the discharged product. Includes mitigation and removal activities, e.g., dispersant use, in–situ burning use, and bioremediation use.

(7.1) On–water Recovery: Demonstrate the ability to assemble and deploy the on–water response resources identified in the response plans;

(7.2) Shore–based Recovery: Demonstrate the ability to assemble and deploy the shoreside response resources identified in the response plans;

*(CA6) Dispersants: Demonstration the ability to evaluate the use of chemical dispersants utilizing the state and federal dispersant use policies and procedures adopted in the Region IX Regional Contingency Plan and the federal area plans, including: identify and mobilize the necessary equipment and personnel; utilize the appropriate FOSC checklists and evaluation forms (pre–approval or case–by–case dispersant use approval); activate the Regional Response Team (RRT) for case–by–case dispersant approval and provide sufficient information for a recommendation to be made by the RRT; develop all necessary documentation of actions taken; and, if appropriate, develop a dispersant use plan for inclusion in the Incident Action Plan (IAP).

*(CA7) In–situ Burning: Demonstrate the ability to evaluate the use of in–situ burning utilizing state and federal policies and procedures as adopted in the federal area contingency plans, including: identify and mobilize the necessary equipment and personnel; establish and coordinate communications with the local air quality management districts; complete the in–situ burning checklists and evaluation forms; activate the Regional Response Team (RRT) and provide sufficient information for a recommendation to be made by the RRT; document actions taken; and, if appropriate, develop an in–situ burning plan for inclusion in the IAP.

*(CA8) Bioremediation: Demonstrate the ability to evaluate the use of bioremediation utilizing state and federal policies and procedures as adopted in the federal area contingency plans, including: identify and mobilize the necessary equipment and personnel; develop all necessary documentation of actions taken; and, if appropriate, develop a bioremediation plan for inclusion in the IAP.

(8) Protection: Demonstrate the ability of the spill response organization to protect the environmentally and economically sensitive areas identified in the approved Area Contingency Plans;

(8.1) Protective Booming: Demonstrate the ability to assemble and deploy sufficient resources to implement the protection strategies contained in the Area Contingency Plan and the respective industry response plan;

(8.2) Water Intake Protection: Demonstrate the ability to quickly identify water intakes and implement the proper protection procedures from the Area Contingency Plan or develop a plan for use;

(8.3) Wildlife Recovery and Rehabilitation: Demonstrate the ability to quickly identify these resources at risk and implement the proper protection procedures from the Area Contingency Plan or develop a plan for use;

(8.4) Population Protection: Demonstrate the ability to quickly identify health hazards associated with the discharged product and the population at risk from these hazards, and implement the proper protection procedures from the Area Contingency Plan or develop a plan for use;

(9) Disposal: Demonstrate the ability of the spill response organization to dispose of the recovered material and contaminated debris.

(CA9) Waste Management: Demonstrate the ability of the spill response organization to properly manage the recovered product and to develop a waste management plan for approval by the Unified Command. The plan will include appropriate procedures for obtaining permits and/or waivers, waste characterization, waste minimization, volumetric determination, and overall waste management and final disposition, as appropriate;

(10) Communications: Demonstrate the ability to establish an effective communications system for the response organization;

(10.1) Internal Communications: Demonstrate the ability to establish an intra–organization communications system. This encompasses communications both within the administrative elements and the field units;

(10.2) External Communications: Demonstrate the ability to establish communications both within the administrative elements and the field units;

(11) Transportation: Demonstrate the ability to provide effective multi–mode transportation both for execution of the discharge and support functions;

(11.1) Land Transportation: Demonstrate the ability to provide effective land transportation for all elements of the response;

(11.2) Waterborne Transportation: Demonstrate the ability to provide effective waterborne transportation for all elements of the response;

(11.3) Airborne Transportation: Demonstrate the ability to provide the necessary support of all personnel associated with the response;

(12) Personnel Support: Demonstrate the ability to provide the necessary support of all personnel associated with the response;

(12.1) Management: Demonstrate the ability to provide administrative management of all personnel involved in the response. This requirement includes the ability to move personnel into or out of the response organization with established procedures;

(12.2) Berthing: Demonstrate the ability to provide overnight accommodations on a continuing basis for a sustained response;

(12.3) Messing: Demonstrate the ability to provide suitable feeding arrangements for personnel involved with the management of the response;

(12.4) Operational/Administrative Spaces: Demonstrate the ability to provide suitable operational and administrative spaces for personnel involved with the management of the response;

(12.5) Emergency Procedures: Demonstrate the ability to provide emergency services for personnel involved in the response;

(13) Equipment Maintenance and Support: Demonstrate the ability to maintain and support all equipment associated with the response;

(13.1) Response Equipment: Demonstrate the ability to provide effective maintenance and support for all response equipment;

(13.2) Response Equipment (Support): Demonstrate the ability to provide effective maintenance and support for all equipment that supports the response. This requirement includes communications equipment, transportation equipment, administrative equipment, etc;

(14) Procurement: Demonstrate the ability to establish an effective procurement system;

(14.1) Personnel: Demonstrate the ability to procure sufficient personnel to mount and sustain an organized response. This requirement includes ensuring that all personnel have qualifications and training required for their position within the response organization;

(14.2) Response Equipment: Demonstrate the ability to procure sufficient response equipment to mount and sustain an organized response;

(14.3) Support Equipment: Demonstrate the ability to procure sufficient support equipment to support and sustain an organized response;

(15) Documentation: Demonstrate the ability of the spill response organization to document all operational and support aspects of the response and provide detailed records of decisions and actions taken. These documents shall be provided to the Administrator upon request.

*California–specific requirements

(f) The owner/operator shall provide the following documentation in order to receive credit from OSPR for any exercise conducted:

(1) the contingency plan number including point of contact, phone number and e–mail address;

(2) a list of all other participants and their roles, including contingency plan numbers if applicable;

(3) a list of all components of the contingency plan tested;

(4) a list of all ACP–listed sensitive site protection response strategies tested and documentation of actual deployment;

(5) A list of any written plans created during the drill or response (such as the site safety plan, incident action plan, disposal plan communications plan, completed or not);

(6) a list of other regulatory agencies attending the drill or exercise, if any; and,

(7) an exercise evaluation.

(8) for all exercises:

(A) information that demonstrates whether the required drills as listed in subsection in (a) above, have been conducted. The Evaluator Work Sheet (FG OSPR 1963, 2/9/98) or a form that includes the same information may be used to gather this information. This information shall be kept by the Plan Holder for 3 years and made available to the Administrator upon request;

(B) information of either concern or benefit to the local Area Planning Committee or the applicable California Harbor Safety Committee including, but not limited to, the following: plan components tested, observations and description of successful positive action or statement of problem, and any recommendations for suggested action or improvement to Area Contingency Plans, marine facilities and vessel plans, OSROs, federal agencies, state agencies, local agencies, training or exercise programs. The USCG/OSPR Lessons Learned Reporting Form (ACP LL Rev. 2/98), or a form that includes the same information, may be used to gather this information. This information shall be kept by the Plan Holder for 3 years and made available to the Administrator upon request.

(9) for all tabletop exercises:

(A) information including, but not limited to, the following: point of contact, and phone number and e-mail address, date of exercise; location; time started/time completed; the response plan scenario used; size of spill; evaluation of the spill management team(s) knowledge of the oil spill response plan; determination of proper notifications; evaluation of the communications system; ability to access contracted OSROs; ability to coordinate spill response with On-Scene Coordinator, state and applicable agencies; and ability to access sensitive site and resource information in the Area Contingency Plan if referenced. The Spill Management Team/Tabletop Exercise Report (FG OSPR 1966, 5/7/97), or a form that includes the same information, may be used to gather this information. This information shall be kept by the Plan Holder for 3 years and made available to the Administrator upon request.

(10) for all equipment deployment exercises:

(A) information including, but not limited to, the following: date; identity of marine facility or vessel; location(s); time started/completed; equipment ownership; a list of type and amount of all equipment deployed and number of support personnel employed; description of the exercise goals and a list of any Area Contingency Plan strategies tested, with a sketch of equipment deployments and booming strategies; if marine facility-owned equipment, was at least the amount of equipment deployed necessary to respond to the average most probable spill; was equipment deployed in its intended operating environment; was a representative sample of OSRO-owned equipment deployed; was the OSRO-owned equipment deployed in its intended operating environment; description of the marine facility's comprehensive training and equipment maintenance programs; did personnel responsible for equipment deployment actually deploy the equipment; and was deployed equipment operational. The Equipment Deployment Evaluation Form (FG OSPR 1965, 2/20/97), or a form that includes the same information, may be used to gather this information. This information shall be kept by the Plan Holder for 3 years and made available to the Administrator upon request.

(11) a list or check sheet showing what documentation has been submitted as part of the credit request.

(g) The Administrator shall issue exercise credit via e-mail, for objectives met during the exercise, within 90 days to the owner/operator for any exercise attended by OSPR personnel, which evaluates the adequacy of the exercise scenario to test elements of the plan and its implementation, and the response of the participants. Any inadequacies noted in the Administrator's report must be addressed in writing by the owner/operator within 60 days of the receipt of the Administrator's report. The owner/operator's response shall propose remedies to the noted inadequacies including, but not limited to, any necessary changes to the plan, any changes in contracted or owned response resources, changes in or additions to training, and/or the need for additional drills or exercises. The owner/operator's response shall include a schedule for implementing the remedies. The Administrator may audit all drill documentation to verify that the drill was done in accordance with the credit request.

(h) Substitution

(1) In-State Exercises

In substitution for the exercises required by Subsection (a) above, the Administrator may accept an exercise conducted by the marine facility or vessel, and called by an agency other than the OSPR, if all of the following conditions are met:

(A) the exercise tests one or more of the following: the marine facility or vessel's spill management team and spill response organization; deployment of the facility or vessel's response equipment; or deployment of other response resources identified in the contingency plan; and

(B) the exercise is conducted with the U. S. Coast Guard, or another local, state or federal agency and the OSPR has been invited with the minimum notification required in Section 820.01(d)(2); and,

(C) the owner/operator has received prior approval for the exercise substitution from the Administrator, and,

(D) the Administrator finds the plan components tested and evaluation criteria equal to or exceeding those of the OSPR.

(2) Out-of-State Exercises

The only exercise that can be substituted under this Subsection (2) is an exercise of the spill management team and a response management organization that is separate from the tank vessel operation itself. However, at least once every three years, the annual spill management team tabletop exercise must be conducted in California.

In substitution for the spill management team tabletop exercises, the Administrator may accept an exercise conducted by the vessel owner/operator outside of the State of California if the following conditions are met:

(A) OSPR has been invited with the minimum notification required in Subsection 820.01(d)(2); and,

(B) the owner/operator has received prior approval for the exercise substitution from the Administrator; and,

(C) the Administrator finds the exercise objectives and evaluation criteria equal to or exceeding those of the OSPR.

(i) OSRO Exercises

An exercise of an OSRO's services may fulfill the equipment deployment exercise requirement of Subsection (a)(1) above for any marine facility, or Subsection (a)(2) above for any vessel, that utilizes the OSRO's plan to fulfill the response requirements of the facility's or vessel's own plan. These exercises will not fulfill the semi-annual equipment deployment exercise requirement of marine facility-owned equipment pursuant to Subsection (a)(1)(C). OSRO's who participate in the OSPR Sensitive Site Strategy Evaluation program (as defined in S. 790) may meet the shoreline protection exercise requirement of Subsection (b)(1) above for marine facilities, or Subsection (a)(2) above for vessels.

(j) Unannounced Exercises

An unannounced exercise may be used to satisfy the exercise requirements of this subsection under the following conditions:

(1) The owner/operator shall submit a written request to the administrator within 90 days after the unannounced exercise is conducted asking that the exercise be considered in substitution for one or more of the required exercises, and;

(2) the exercise tests one or more of the following: 1) the marine facility's or vessel's spill management team and spill response organization, 2) deployment of the facility's or vessel's response equipment, or 3) deployment of other response resources identified in the facility's or vessel's plan.

(k) Actual Spill

(1) Actions taken in response to an actual spill may be considered for exercise credit upon request of the owner/operator if all of the following conditions are met:

(A) the OSPR receives the documentation, as appropriate, outlined in Section 820.01(f); and,

(B) the OSPR receives documentation of State OES oil spill notification, and the owner/operator provides all the information required on the OSPR Notification Form (FG OSPR Form 1964); and,

(C) activation of the spill management team is successfully accomplished; and,

(D) OSPR or another regulatory agency responds to the spill. A written response/evaluation by the owner/operator may be accepted by OSPR in lieu of an agency report if an agency report is not prepared; and,

(E) the response was carried out in accordance with an approved contingency plan, the appropriate Area Contingency Plan, and/or in accordance with the directions of the Administrator or Federal On-Scene Coordinator; and

(F) the OSPR receives a report from the Responsible Party as to cause of the spill, and procedures or other measures adopted to prevent a similar reoccurrence.

(G) Plan holders must submit updated oil spill contingency plans showing the procedures developed for Subsection (F) above.

HISTORY

1. New subchapter 4 (sections 825.01-827.02) and section filed 12-28-99; operative 2-3-2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).

§ 825.03. Purpose and Scope.

This subchapter sets forth planning requirements for oil spill prevention and response for nontank vessels (300 gross tons or greater) in California. The planning requirements specify that the owner/operator of a nontank vessel must own or have contracted for on-water recovery and storage resources sufficient to respond to all spills up to the reasonable worst case spill volume in the time frames specified. The owner/operator shall also demonstrate through contracts(s) or other approved means, the shoreline protection response resources necessary to protect each type of shoreline and all applicable sensitive sites as outlined in the appropriate Shoreline Protection Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website). The Tables representing High Volume port areas (i.e., the San Francisco and Los Angeles/Long Beach Tables) will go into effect on May 1, 2007; all other Tables will go into effect on September 1, 2007. Equipment in addition to that under contract must be identified, and a call-out procedure in place to access additional response resources if needed. For the purpose of meeting the regulatory requirements herein, contracts for booming, on-water recovery and storage, and shoreline protection services can only be made with OSRO's Rated by the Office of Spill Prevention and Response. For other required services (e.g., shoreline clean-up, waste management, spill response management, etc.) contracts or other approved means with non-rated OSRO's may be used.

The equipment that the owner/operators have available must also be applicable to the areas of intended use. Nontank vessel owner/operators shall demonstrate adequate emergency services as described, by sufficient in-house capability or a signed, valid contract with a vessel emergency services provider.

The information required by this subchapter must be submitted to the Office of Spill Prevention and Response (OSPR), and maintained by the owner/operator, in separate volumes. A principal volume will be compiled to contain all the required information, calculations, studies, maps and related data. A separate volume will be set up as a initial response activity manual and will contain only the information that response personnel will need at the time of a spill to facilitate the immediate notification and response actions that are mandated.

To the greatest extent possible, California has endeavored that this subchapter be consistent with the scope and intent of California's tank vessel oil spill contingency plan regulations, the enabling legislation Senate Bill 1644 (Chapter 964, Statutes of 1998), the Federal oil spill response regulations, and the Area Contingency Plans (ACP) completed by the U.S. Coast Guard, State Agencies, and local governments, with public participation, as required by the Oil Pollution Act of 1990 (33 USC 2701, et seq.). Consideration shall be given to the differences in environmental risk between spills from nontank vessels and tank vessels. Information developed to demonstrate compliance with other applicable Federal, State, and International (e.g., International Maritime Organization, etc.) requirements may be used to demonstrate compliance with all or part of this subchapter to the extent that the information meets the requirements of this subchapter.

NOTE: Authority cited: Sections 8670.28 and 8670.29, Government Code. Reference: Sections 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12-28-99; operative 2-3-2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Change without regulatory effect amending last two paragraphs filed 3-30-2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 13).
3. Amendment of section and NOTE filed 3-20-2007; operative 5-1-2007 (Register 2007, No. 12).

§ 825.05. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "Contract or Other Approved Means":

(1) includes either of the following:

(A) A written, signed contract, or written certification of active membership, between a plan holder and an Oil Spill Response Organization(s) (OSRO) rated by OSPR (as specified in Section 819.01 of this subchapter) This contract shall identify and ensure the availability of the required personnel and equipment capable of responding to an oil spill within the stipulated response times and in the specified Geographic Regions in which the nontank vessel; or

(B) Written certification that the necessary personnel and equipment are owned or operated by the plan holder and are available within the stipulated response times and in the specified Geographic Regions;

(2) The owner/operator shall notify the Administrator within five days of a change in contracted resources/membership with a local or regional OSRO.

(3) A contract between a plan holder and an OSRO shall not contain a provision requiring the plan holder to notify the OSRO in advance, in order to guarantee response services for two hours and beyond (as specified in Section 819.04(b)(2) of this subchapter) for containment booming and on-water recovery services. It may contain provisions to notify the OSRO 24 hours in advance before entering California marine waters, to meet the 0–12 hour shoreline protection requirement. This advance notice requirement is only for vessels that operate in those areas not identified as High Volume ports. For immediate (less than 2 hours) spill response coverage during oil transfer operations, advance notice to the OSRO is also allowed. A plan holder shall comply with all other applicable contractual provisions or the contingency plan will immediately be nullified, and the plan holder will be operating in marine waters without an approved contingency plan, which is in violation of Section 826.06 of this subchapter.

(b) "Dedicated Response Resources" means equipment and personnel committed solely to oil spill response, containment, and cleanup that are not used for any other activity that would adversely affect the ability of that equipment and personnel to provide oil spill response services in the time frames for which the equipment and personnel are Rated. Ratings of six hours or earlier require either dedicated response resources or OSRO-owned and controlled response resources, as specified in Section 819.04(b)(2) of this subchapter.

(c) "Equipment Deployment Exercise" means an exercise of oil spill response equipment identified in an oil spill contingency plan or an OSRO application, through its actual deployment and operation as it would be used in spill response efforts in an environment of similar water depth, current velocity, tidal range, and substrate, where the equipment may need to be used in an actual oil spill response.

(d) "Implementation of the Plan" means that all essential provisions have been taken to enable the plan or any portion of the plan to become operational.

(e) "Innocent Passage" means navigation through the territorial sea for the purpose of traversing that sea without entering internal waters or calling at a roadstead or port facility outside internal waters. Passage shall be continuous and expeditious. However, passage includes stopping and anchoring, but only in so far as the same are incidental to ordinary navigation or are rendered necessary by distress or for the purpose of rendering assistance to persons, ships or aircraft in danger or distress.

(f) "Letter of Approval" means a written document issued by the Office of Spill Prevention and Response to the plan holder following verification, inspection and if required by the Administrator, satisfactory performance in an announced and unannounced drill, and final review and approval of the plan holder's contingency plan.

(g) "Marine Waters", means those California marine waters subject to tidal influence and includes all waterways used for waterborne commercial nontank vessel traffic to the Port of Stockton and the Port of Sacramento.

(h) "Nontank Vessel" means a vessel of 300 gross tons or greater, other than a tank vessel, not designed to carry oil as cargo.

(i) "OSRO-Owned and Controlled Resources" means equipment owned by the OSRO and personnel who are employed directly by the OSRO.

(j) "Plan Holder" means the owner/operator of a nontank vessel responsible for the development, submittal, update, maintenance of, and compliance with the oil spill contingency plan required under this subchapter.

(k) "Plan Recipient" means a receiving agency and any other entity that has been designated in this subchapter to receive a copy of the nontank vessel oil spill contingency plan.

(*l*) "Reasonable Worst Case Spill" means a spill of the total volume of the largest fuel tank on the nontank vessel.

(m) "Shallow-Draft Vessel" means:

(1) for purposes of boom deployment, a vessel that must be able to operate in water depths of two feet or less;

(2) for purposes of skimming operations, a vessel and attendant skimming system that must be able to operate in water depths of three feet or less.

(n) "Spill Management Team" means the personnel identified in an oil spill contingency plan to staff the organizational structure that will manage all aspects of response, containment, and clean up and is able to fully integrate into an Incident Command/Unified Command structure, as required by the National Contingency Plan and the State Marine Oil Spill Contingency Plan.

(o) "Tabletop Exercise" means an exercise of an oil spill contingency plan and the spill management response efforts without the actual deployment of response equipment. A tabletop exercise usually involves the enactment of a response to a simulated spill.

(p) "Unannounced Drill" means an exercise of an oil spill contingency plan or an OSRO application initiated by OSPR without prior notice to the plan holder or oil spill response organization.

(q) "Waters of the State", for the purpose of this subchapter, means those California waters subject to tidal influence including all waterways used for waterborne commercial nontank vessel traffic including the Port of Stockton and the Port of Sacramento.

NOTE: Authority cited: Sections 8670.28 and 8670.29, Government Code. Reference: Sections 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Change without regulatory effect amending subsections (a)(1), (a)(4)–(b) and (e), repealing subsections (g)–(h) and relettering subsections filed 3–30–2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 13).
3. Amendment of section and NOTE filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).
4. Amendment of subsection (a)(3) filed 11–5–2007 as an emergency; operative 11–5–2007 (Register 2007, No. 45). A Certificate of Compliance must be transmitted to OAL by 5–5–2008 or emergency language will be repealed by operation of law on the following day.
5. Amendment of subsection (a)(3) refiled 5–2–2008 as an emergency; operative 5–2–2008 (Register 2008, No. 18). A Certificate of Compliance must be transmitted to OAL by 7–31–2008 or emergency language will be repealed by operation of law on the following day.
6. Certificate of Compliance as to 4–28–2008 order transmitted to OAL 7–25–2008 and filed 8–6–2008 (Register 2008, No. 32).

§ 825.07. General Requirements.

(a) A nontank vessel of 300 gross tons or greater shall not operate in marine waters unless the owner or operator has an oil spill contingency plan prepared and submitted in accordance with this subchapter for the Geographic Regions (as defined in Section 790 of this subdivision) the nontank vessel transits. Nontank vessel plan holders shall only contract with an OSRO(s) that has received a Rating by OSPR (as specified in Section 819.01 of this subchapter), for the booming, on-water recovery and storage, and shoreline protection services required. An OSRO's existing Letter of Approval issued from the Administrator shall remain valid unless revoked and shall be deemed to meet the requirements of this subchapter for three years from the date of the letter's issuance.

(b) No person shall load oil onto, or from a nontank vessel unless the following conditions are met prior to transfer operations:

(1) after initial submittal but prior to approval of the contingency plan, the nontank vessel owner/operator must provide the owner/operator of the marine facility or vessel providing fuel with a certified copy of the letter/certificate acknowledging the receipt of the nontank vessel's oil spill contingency plan by the Administrator, if the marine facility or vessel providing fuel does not already have such a letter on file;

(2) after approval of the initial submittal of the contingency plan, the owner/operator of the nontank vessel must provide the owner/operator of the marine facility or vessel providing fuel with a copy of the letter approving the current oil spill contingency plan for that nontank vessel if the marine facility or vessel providing fuel does not already have such a letter on file;

(3) the nontank vessel owner/operator must notify the marine facility or vessel providing fuel of any change in the approval status not reflected by the letter on file at that marine facility; and

(4) the owner/operator of the nontank vessel must certify that a complete copy of the initial response activity manual for that nontank vessel is on board the nontank vessel.

(c) Each plan shall be consistent with the State Marine Oil Spill Contingency Plan and not in conflict with the National Contingency Plan, or the applicable Federal Area Contingency Plans.

(d) nothing in this subchapter shall, in any manner or respect, impair or limit the authority of the California Coastal Commission or San Francisco Bay Conservation and Development Commission to review federal activities, federal development projects, or federally–permitted or licensed activities, as authorized pursuant to the Coastal Zone Management Act of 1972 (16 U.S.C., section 1451 et seq.). Nor shall this subchapter impair or limit the authority of the California Coastal Commission or San Francisco Bay Conservation and Development Commission to ensure such activities or projects are performed in a manner that is consistent, to the extent required by applicable law, with the enforceable policies of the California Coastal Management Program. Nothing in this subchapter shall, in any manner or respect, impair or limit the authority of the California Coastal Commission to ensure that development activities or projects, in which nontank vessels under 300 gross tons are involved, are performed in a manner that is consistent, to the extent required by applicable law, with the enforceable policies of the California Coastal Act.

(e) All plans shall be written in English, and the initial response activity manual portion shall also be in a language that is understood by all crew members responsible for carrying out the plan.

NOTE: Authority cited: Sections 8670.32(a), (b) and (g), Government Code. Reference: Sections 8670.32(a), (b) and (g), Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Amendment of subsection (a), repealer of subsection (a)(5) and amendment of subsection (d) filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 826. Plan Submittal, Review and Approval.

§ 826.01. Plan Submittal.

(a) Plans:

Unless otherwise exempt, each owner/operator of a nontank vessel shall provide an oil spill contingency plan for that nontank vessel. The plan may be specific to an individual nontank vessel or may apply to a fleet of nontank vessels. All nontank vessel–specific elements required by Subsections 827.02(a) through (f) of this subchapter shall be addressed for an individual nontank vessel or all the nontank vessels included in a Fleet Plan.

(1) Response Elements:

(A) Nontank Vessel Fleet Plans

Fleet contingency plans may be submitted by an owner/operator that has a number of nontank vessels that transit the same or substantially the same routes in marine waters. Nontank vessels may be added to a fleet tank vessel contingency plan providing all of the requirements of this subchapter are met.

1. A fleet contingency plan shall contain all prevention and response elements required pursuant to this subchapter.

(2) Incorporation of Other Plans and Reference Documents

An individual or fleet contingency plan shall contain all prevention and response elements required pursuant to this subchapter. Citing specific relevant sections of appropriate reference material may be an acceptable alternative to reproducing the full text, maps, diagrams, etc., in the contingency plan. The Administrator will determine if such submissions or citations adequately meet the requirements of this subchapter prior to final plan approval. Examples of plans or other reference documents that may be submitted or cited include, but are not limited to, the following:

(A) Plans Submitted to International, Federal or State Authorities: Appropriate sections of plans submitted to and approved by any state, federal or international authority may be either submitted or cited, as approved by the Administrator, to meet part of the requirements contained in this subchapter. These references may include documents submitted to comply with California's tank vessel contingency plan requirements, U.S. Coast Guard requirements, or the International Safety Management (ISM) Code.

(B) Federal Area Contingency Plans (ACP) and Geographic Response Plans (GRP): Information from ACP's and GRP's currently in effect which meet the requirements of Subsections 827.02(g) through (n) may be cited. Information from ACP's and GRP's that are not currently in effect must be submitted.

(C) Privately Prepared Reference Documents: Private companies may prepare reference documents specifically intended to address part or all of the requirements of Subsections 827.02(g) through (n) of this subchapter. These documents may incorporate other plans or reference documents pursuant to this Subsection 826.01(a)(2). With a company's authorization, a plan holder may submit such a document in its entirety to meet part or all of the requirements of Subsections 827.02(g) through (n).

(D) Rated OSRO:

When contracting with an OSRO, Rated by OSPR pursuant to Title 14, California Code of Regulations (CCR) Section 819.02, to meet the oil spill response requirements under this subchapter, the owner/operator may cite the Rated OSRO application in lieu of listing the OSRO's response resources which meet the requirements of 14 CCR Section 819.02.

1. An OSRO Rating does not guarantee the performance of an OSRO, nor does the use of an OSPR–Rated OSRO in a contingency plan relieve the plan holders of their ultimate statutory and regulatory responsibility to ensure the adequacy of the spill response resources identified in their contingency plan.

(E) If approved by the Administrator, plans, reference texts and other materials not listed above may be submitted to meet part of the requirements of this subchapter.

(b) Time frames:

(1) Any nontank vessel that is operating shall submit a contingency plan that is received by OSPR at least seven working days prior to entering marine waters. Nontank vessel owner/operators shall notify the Administrator by facsimile prior to entering marine waters for the harbors of Humboldt Bay, Port Hueneme, Monterey Bay, and San Diego, and the ports of Stockton and Sacramento.

(2) On a one–time basis only, the Administrator may allow a nontank vessel to enter marine waters in a shorter time period if the nontank vessel owner/operator provides to OSPR all of the following:

(A) Nontank vessel name, call sign, official number, length, gross tonnage, fuel type and total volume, capacity of largest fuel tank, type of cargo carried, amount of cargo on–board, destination, intended route while in the marine waters, and address and telephone number of both the owner and operator;

(B) A copy of a valid contract for response resources that meet the requirements of this subchapter;

(C) Identification, including telephone number and facsimile number, of a Qualified Individual; and

(D) Evidence of Financial Responsibility in the amount of three hundred million dollars ($300,000,000).

(c) Receiving Agencies:

(1) One copy of the applicable contingency plan (either hard copy or electronic media — see Section 826.02) covering each Geographic Region the nontank vessel transits shall be delivered to the Marine Safety Branch of the Office of Spill Prevention and Response within the Department of Fish and Game. Delivery of the plan may be in person or by registered mail with return receipt requested, or the equivalent. Additional hard copies shall be provided to an OSPR regional office upon request.

(2) Within two working days of a request from the Administrator, additional copies (hard copy or electronic media) shall be mailed by the plan holder to other member agencies of the State Interagency Oil Spill Committee and the State Oil Spill Technical Advisory Committee.

(3) Any additional copies shall be submitted within two working days of a request by the Administrator.

(d) Confidentiality:

(1) A plan holder may request that proprietary information be kept confidential. Such a request must include justification for designating the information as confidential. The Administrator will make a determination regarding that information which may be considered confidential and removed from any copy of the plan that is made available for public review.

(A) A plan holder may also request that any reports or studies prepared or submitted under any contingency plan requirements be designated as proprietary information. Such a request must include justification for designating the report or study as confidential.

(2) Any information designated as confidential must be clearly identified as proprietary.

(3) If a plan holder designates information as confidential, two different copies of the plan must be submitted as follows:

(A) one copy shall contain the confidential information. This plan will be utilized by the Administrator in the review and approval process;

(B) one copy shall be submitted with the confidential information removed. This copy will be available for public review. This plan must contain sufficient information in place of the confidential information so that any individual reviewing the plan will understand all the notification, prevention and response elements of the plan.

(C) Any plan submitted to any state agency, as required by this section, must include all confidential information.

NOTE: Authority cited: Sections 8670.32(c) and (g), Government Code. Reference: Sections 8670.32(c) and (g), Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Change without regulatory effect repealing subsections (a)(1)(B)–(a)(1)(B)2. and amending subsections (b)(2)(B) and (d)(1)–(d)(1)(A) filed 3–30–2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 13).
3. Amendment of subsection (a)(2)(D), new subsection (a)(2)(D)1., amendment of subsections (b) and (c)(1)–(2) and repealer of subsection (c)(4) filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 826.02. Plan Format.

OSPR will accept either an original hard copy of the contingency plan or a CD–ROM formatted contingency plan with an original, signed copy of the "Feasibility and Executability Statement" required by this subchapter. Other documents required to be submitted with the contingency plan, such as signed contracts with Oil Spill Response Organizations, may be scanned on the CD using Adobe Acrobat. Although not required, it is requested that the Table of Contents be linked to the different sections of the plan. Also, if a Federal Vessel Response Plan (VRP) or other non–California plan format it used, it is requested that the plan be electronically linked to the plan sections that comply with California's requirements. Each plan shall be organized into at least two separate volumes: an initial response activity manual and a principal volume or volumes with related appendices. The format for each is outlined below:

(a) Initial Response Activity Manual:

A simplified initial response activity manual, suitable for on–scene use in the event of a spill, which summarizes the key notification information outlined in subsection 827.02 (d) and the initial shipboard response actions necessary to minimize the impact of a spill on marine waters, shall be prepared and submitted with each plan.

(1) Nontank vessels that have an approved Ship–board Oil Pollution Emergency Plan (SOPEP), may certify compliance with the emergency ship–board procedures requirements of the SOPEP, or may submit a copy of their Letter of Approval for their SOPEP, in lieu of providing the initial shipboard response actions specified in (a) above. The SOPEP shall be submitted to the Administrator upon request,

(2) The initial response activity manual shall be maintained on board the nontank vessel at all times.

(b) Principal Volume of the Plan:

(1) The principal volume of the plan shall include all the required information including a summary of the conclusions of all studies, calculations and analyses, as applicable.

(2) The principal volume of each plan shall be organized to facilitate access to information, and shall include:

(A) a detailed table of contents with chapters arranged, to the extent possible, in the same order in which the requirement for that information appears in this subchapter, or alternately with a cross reference to the requirements of this subchapter;

(B) a system of numbered chapters, sections and appendices;

(C) index tabs for locating plan chapters;

(D) a log sheet placed in the front of the plan for recording all amendments and updates; and

(E) amendments and updates that are consecutively numbered and dated.

(3) If hard copies of the plan are submitted, they shall be submitted on 8 1/2 by 11 inch paper, in a loose–leaf 3–ring binder to allow replacement of chapters or appendix pages without requiring replacement of the entire plan. Amendments and updates shall be hole–punched and in a format that will fit the binder that was submitted with the plan.

(4) All hard copy and electronic documents submitted will become the property of the Administrator. The documents will be retained by the Administrator for a minimum of three (3) years unless the plan is withdrawn by the submitter.

(c) References to Other Plans or Documents:

If references to other plans or documents are included in a contingency plan, as specified in Section 826.01(a)(2) above, the following must also be submitted:

(1) a listing of all the elements of the individual or fleet nontank vessel contingency plan that will be replaced by elements in the referenced plan or document, with an index specifying the location of the required elements, by regulation section, that will be met by the referenced plan or document.

NOTE: Authority cited: Sections 8670.28 and 8670.29, Government Code. Reference: Sections 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Amendment of first paragraph and subsection (b)(3), new subsection (b)(4) and amendment of NOTE filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 826.03. Plan Review and Approval.

(a) No nontank vessel shall operate in marine waters until the owner/operator is notified that the contingency plan meets the minimum requirements listed in this subsection. A contingency plan shall be reviewed for these minimum requirements within seven working days of notification that the nontank vessel is entering marine waters, and the vessel owner/operator shall be notified in writing that: 1) the plan meets the minimum requirements; or 2) the plan is deficient and what specific information is needed, and that the nontank vessel shall not enter marine waters until the following information has been provided:

(1) Nontank vessel name, call sign, official number, length, gross tonnage, fuel type and total volume, capacity of largest fuel tank, destination, intended route while in marine waters, and address and telephone number of both the owner and operator;

(2) Evidence of a contract or other approved means (as defined in Section 825.05 of this subchapter), documenting that the oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill, for each Geographic Region the nontank vessel transits;

(3) Identification, including telephone number and facsimile number, of a Qualified Individual; and

(4) Evidence of financial responsibility in the amount of three hundred million dollars ($300,000,000). Documentation that a California Certificate of Financial Responsibility is being processed will fulfill this requirement.

(b) Time frames:

(1) After notification that the plan meets the minimum requirements specified in Subsection (a), each plan shall be reviewed for all the requirements of this subchapter and be approved or denied within 180 days.

(2) The Administrator shall determine whether each plan complies with the regulations governing the contingency planning process. If the administrator determines that a plan is inadequate, a written explanation of deficiencies shall be sent to the plan holder.

(3) Upon notification of a plan's deficiencies, the plan holder will have 90 days to submit a new or modified plan, or make corrections to their original plan. Such a re-submittal shall be treated as a new submittal and processed according to the provisions of this section (b).

(c) Prior and subsequent to plan approval, the Administrator may make an on-site inspection and require an unannounced drill of all or part of any contingency plan submitted in order to determine the plan's adequacy pursuant to the authority in Government Code Section 8670.10(a).

(d) Public Review and Comment: Contingency plans will be made available for review by any interested member of the general public at the headquarter's office of OSPR.

(1) Any person interested in reviewing the plan shall contact the Administrator to request an appointment to review the plan at the headquarter's office of OSPR. Copies of the plans will be provided at the cost of duplication.

(2) Any interested person may review a plan and submit written comments prior to the Administrator's approval or disapproval of the initial plan or plan updates. Such comments will be taken into consideration in the Administrator's review process.

(e) Plan Approval:

(1) Unless the Administrator determines otherwise on a case-by-case basis, a contingency plan will be considered to be effective upon notification per Subsection (a) pending final approval unless and until the owner/operator is notified that the plan is inadequate per Subsection 826.03(f).

(2) A contingency plan shall be approved if it adequately addresses all of the requirements specified in this subchapter.

(3) Any revised plan submitted by an owner/operator in response to a notification of inadequacy shall be considered approved unless otherwise notified by the Administrator within the time frames established in Section 826.03(b).

(4) The Administrator shall consider any comments submitted by other agencies or interested parties when approving or disapproving the plan.

(5) The Administrator shall notify the plan holder when a contingency plan has been approved. The Administrator shall issue a letter of approval and certificate describing the conditions of approval, if any, and specifying the expiration date of the Letter of Approval and certificate.

(f) Denial or Revocation of Plan:

(1) Approval shall be denied or revoked if a plan does not comply or maintain compliance with this subchapter.

(2) If approval is denied or revoked, the Administrator shall notify the plan holder in writing of the reasons for denial or revocation and provide an explanation of those actions necessary to secure approval.

(A) the plan holder shall have 90 calendar days from notification to submit a new or revised plan that incorporates the recommended changes, during which time the plan is considered effective pending final approval. If the plan holder fails to address plan deficiencies within 90 calendar days of notification, the plan may be denied a second time.

(B) No nontank vessel shall operate in marine waters if it fails to gain approval of its contingency plan after the second submission, or if a second denial was issued as noted in (A) above, until a subsequent submission is approved.

(C) If a plan holder fails to address plan deficiencies within 90 calendar days from notification of a second plan denial, the Administrator may, without further notice, declare the plan null and void.

(g) Appeals: The plan holder may appeal a decision made by the Administrator regarding a contingency plan in accordance with the following provisions:

(1) the plan holder may submit a written request for reconsideration to the Administrator regarding any decision of denial or revocation of approval. Requests must be submitted within 15 working days from the date the plan holder receives notice that final approval of the plan has been denied. The request must contain the basis for the reconsideration and, if available, provide evidence which rebuts the basis for the Administrator's decision regarding the plan;

(2) within 15 working days following the receipt of the request for reconsideration, the Administrator shall send the plan holder a notice that the decision has been rescinded and that the plan is approved, or that the Administrator rejects the request for reconsideration and shall adhere to the earlier decision;

(3) the plan holder may, within 15 working days after receipt of notice that reconsideration has been denied, request a hearing in writing. No such hearing may be requested unless and until all remedies pursuant to this section have been exhausted. The Administrator shall conduct a reconsideration hearing upon request;

(4) the proceedings and hearings under this section shall be conducted in accordance with Chapter 4.5 (commencing with Section 11400) of Part I of Division 3 of Title 2 of the Government Code, including the right of judicial review as provided for in Section 11460.80 of the Government Code.

(h) Proof of Approval:

The Letter of Approval shall be presented upon request to the operator of a marine facility or vessel providing fuel prior to an oil transfer.

(i) Liability: Approval of a plan does not constitute an express assurance regarding the adequacy of the plan in the event of a spill nor does it constitute a defense to liability on the part of the operator or owner.

NOTE: Authority cited: Sections 8670.32(b), (c) and (g), Government Code. Reference: Sections 8670.132(g), and (h), 11400–11470.50 and 11460.80, Government Code.

HISTORY

1. New section filed 12-28-99; operative 2-3-2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Change without regulatory effect amending section filed 3-30-2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 13).
3. Amendment of subsection (f)(2)(A)-(B), new subsection (f)(2)(C) and amendment of subsections (g)(1), (g)(3) and (h) filed 3-20-2007; operative 5-1-2007 (Register 2007, No. 12).

§ 826.04. Plan Implementation and Use.

(a) Availability:

(1) Nontank Vessel Initial Response Activity Manual

(A) The owner/operator shall maintain a copy of the nontank vessel's approved initial response activity manual.

(B) The owner/operator shall maintain a copy of the nontank vessel's approved initial response activity manual on board the nontank vessel at all times.

(C) The approved initial response activity manual must be in a central location accessible to key response personnel at all times.

(2) The qualified individual shall maintain a complete copy of the contingency plan including the initial response activity manual and any material referenced in the plan. The plan and any referenced material must be available for use in the event of an incident.

(3) Immediate Notification Information

(A) the immediate response and notification information shall be posted in a conspicuous location with access to a telephone, or other similar means of communication. This information shall include the names

and telephone numbers of the individuals, agencies and organizations who must be immediately notified when a spill occurs.

(b) Implementation:

(1) Each contingency plan shall be effective upon submittal, pending final approval, or until denied or revoked, as described in Section 826.03(f).

(2) An owner/operator, or any of his/her agents and employees shall use and implement the contingency plan in the event of an oil spill or an oil spill drill.

(3) Any deviation from any major element of the contingency plan must be approved by the Administrator in advance of the change. A major element is one that will affect timely and adequate oil spill response.

(4) All involved parties shall carry out whatever direction is given by the Administrator in connection with the response, containment, and clean up of a spill. A responsible party or potentially responsible party may refuse to accept a directive from the Administrator if:

(A) the directions of the Administrator are in direct conflict with directions from the Federal On–scene Coordinator; and/or

(B) the party reasonably, and in good faith, believes that the directions or orders given by the Administrator will substantially endanger the public safety or the environment.

(5) If a party refuses to accept the directive of the Administrator, the party shall state the reason why they have refused at the time of refusal, and:

(A) the party who has refused a directive shall follow up a verbal explanation of their refusal with a written notice to the Administrator explaining in full the reason(s) for refusing the directive. The written notice must be submitted to the Administrator within 48 hours of the refusal;

(B) the burden of proof shall be on the party to demonstrate, by clear and convincing evidence, why refusal to follow orders was justified.

(6) Failure to implement the plan appropriately shall constitute a violation of this subchapter.

(c) Coordination With Other Plans:

(1) Each plan shall be consistent with an approved State Marine Oil Spill Contingency Plan and not in conflict with the National Contingency Plan.

(2) Beginning with the first review and resubmission, each plan submitted shall be consistent with the appropriate Area Contingency Plan(s) completed by the Coast Guard, State Agencies, and Local Governments as required by the Oil Pollution Act of 1990, that are in effect on January 15 of the year in which the contingency plan update is required.

NOTE: Authority cited: Sections 8670.28 and 8670.29, Government Code. Reference: Sections 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Change without regulatory effect amending subsection (b)(1) filed 3–30–2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 13).
3. Amendment of subsections (b)(3) and (c)(1) and amendment of NOTE filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 826.05. Plan Updates/Resubmission.

(a) Time frames:

(1) Update and Review

(A) All existing plans for nontank vessels shall be resubmitted for review on September 1, 2001, and then once every five years thereafter from the date of approval.

1. A complete new plan must be resubmitted for the update and review only if there have been changes to the original plan or update since the last submittal. If the original plan or submitted updates have not changed, or the relevant Area Contingency Plan has not been amended, the owner/operator may submit a letter to the Administrator stating that the plan currently on file with the OSPR is up–to–date and complete.

(B) The Administrator may require earlier or more frequent resubmission than that required in Subparagraph (A). The Administrator shall notify the owner/operator in writing if an earlier update is required. The notice shall include an explanation for the reasons for the update and the time frame to comply with the resubmission. The circumstances that would warrant an earlier review or update include, but are not limited to, the following:

1. a change in regulations or statute;
2. the development of new oil spill response technologies as determined by the Administrator during any review of response capability standards;
3. deficiencies identified during the Administrator's review of all the oil spill contingency plans;
4. an increased need to protect plant and wildlife habitat;
5. deficiencies in oil spill response capability identified during an oil spill;
6. deficiencies in oil spill response capability identified during an oil spill drill;
7. significant changes to the nontank vessel; and
8. any other situation deemed appropriate by the Administrator where deficiencies in the ability to provide timely and effective oil spill response are identified.

(2) Unscheduled Updates

(A) The Administrator shall be notified as soon as possible, but at least within 24 hours, of any significant change or update to an approved plan.

1. A significant change is one that could affect timely and adequate oil spill response including changes in nontank vessel ownership or P&I club coverage.

2. Changes which are not significant include minor changes in equipment, personnel, or operating procedures which do not affect timely and adequate oil spill response.

3. As soon as administratively feasible, the Administrator will approve any change that would benefit the public health and safety, improve environmental protection, or facilitate more effective response, containment and clean up.

(b) Review and Approval of Plan Updates:

(1) The Administrator shall deny approval of a resubmitted plan, or updated section(s) of a plan, if it is no longer adequate according to the adopted regulations in effect at the time of resubmission.

(2) The review will be processed in accordance with the same time frames and procedures for submission of the initial plan.

(c) Logging and Distributing the Revised Plan:

(1) within 15–days of the Administrator's approval of revisions:

(A) the contingency plan holder shall distribute the revised plan page(s) to all plan recipients.

Faxed updates for insertion into the plan are not acceptable.

(2) The updated page(s) shall have an update number and date revised on the bottom of each page, and shall be accompanied by an index of updates that includes update number, date revised, page(s) revised, and subject matter of update. As an alternative to the hard copy, this information may be submitted on electronic media, in a format approved by the Administrator (see Section 826.02)).

(3) The log sheet, located in the front of the plan, shall be used to record the date the amendment was received, the initials of the individual who received the amendment, and a description of the change.

(d) Each plan recipient and/or each plan holder, as appropriate, must incorporate and utilize all updated materials as provided by the plan holder.

NOTE: Authority cited: Sections 8670.28 and 8670.29, Government Code. Reference: Sections 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Change without regulatory effect amending subsections (a)(1)(A)1.–(B), (c)(1)(A) and (d) and repealing subsection (c)(1)(B) filed 3–30–2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 13).
3. Amendment of subsections (a)(1)(A)–(A)1. and (c)(2) and amendment of NOTE filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 826.06. Compliance Requirements/Penalties.

(a) Except as provided in Subsection 827.01(b) of this subchapter, any nontank vessel subject to the provisions of this subchapter that enters ma-

rine waters without an approved contingency plan required by this subchapter or a certificate of financial responsibility issued by the Administrator shall be subject to an administrative civil penalty of up to one hundred thousand dollars ($100,000). The Administrator shall assess the civil penalty against the owner or operator of the nontank vessel. Each day the owner/operator of such a nontank vessel is in violation shall be considered a separate violation.

(b) Except as provided in Subsection 827.01(b) of this subchapter, any nontank vessel owner/operator who knowingly and intentionally has the nontank vessel enter marine waters without an approved contingency plan required by this subchapter or a certificate of financial responsibility issued by the Administrator is guilty of a misdemeanor punishable by up to one year of imprisonment in the county jail, or by a fine of up to ten thousand dollars ($10,000), or by both the imprisonment and a fine. Each day the owner/operator of such a nontank vessel is in knowing and intentional violation shall be considered a separate violation.

NOTE: Authority cited: Sections 8670.28, 8670.29 and 8670.57, Government Code. Reference: Sections 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Amendment of NOTE filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 827. Nontank Vessel Contingency Plans.

§ 827.01. Applicability.

(a) Plans:

Unless nontank vessels are exempt as provided in Subsection (b) below, oil spill contingency plans shall be prepared, submitted and used pursuant to the requirements of this subchapter by all nontank vessels, 300 gross tons or greater, which transit in marine waters (as defined in Section 825.05 of this subchapter).

(b) Exemptions:

(1) Contingency plans are not required for non–self propelled nontank vessels that do not carry any oil.

(2) This subchapter shall not apply to a nontank vessel that enters marine waters because of imminent danger to the crew, or in an effort to prevent an oil spill or other harm to public safety or the environment. This exemption applies if the following are met:

(A) the operator and crew comply with all orders given by the Administrator or his/her designee, unless the orders are contradicted by orders from the U.S. Coast Guard;

(B) the nontank vessel shall leave marine waters as soon as it is safe to do so, unless a contingency plan is approved or made applicable to its operation.

(3) Response Vessels

Contingency plans are not required for dedicated response vessels, which are those vessels that are dedicated to conducting response activities for an oil spill incident exclusively.

(4) Innocent Passage

Contingency plans are not required for nontank vessels engaged in innocent passage (as defined in Section 825.05 of this subchapter) within the waters of the state.

NOTE: Authority cited: Sections 8670.28 and 8670.29, Government Code. Reference: Sections 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Amendment of NOTE filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).

§ 827.02. Nontank Vessel Plan Content.

Nontank vessel owner/operators shall submit an individual nontank vessel or fleet contingency plan which shall include all of the information required by Subsections 827.02 (a) through (n) for each of the Geographic Regions the nontank vessel transits. Some of the documentation described in Subsection 826.01(a)(2) may be used in lieu of developing comparable documentation to fulfill certain required contingency plan elements if the documentation meets the requirements of this subchapter.

NOTE: Subsections 827.02(a) through (f) contain the nontank vessel–specific elements of an oil spill contingency plan.

(a) Introductory Material:

(1) The owner/operator shall provide the following information for each nontank vessel covered by the plan:

(A) the nontank vessel's name, country of registry, year built, classification society, radio call sign, and Lloyd's IMO identification number. For U.S. flagged (registered) nontank vessels without a Lloyd's IMO identification number, the vessel's official number (also known as the document number) shall be used;

(B) name, address, phone number, fax number and email address if available of the owner and/or operator of the nontank vessel(s). This information shall be referenced in the plan title or on a title page at the front of the plan;

(C) the name, address, phone number, fax number and email address if available of the person to whom correspondence should be sent;

(D) the nontank vessel's classification, hull type, gross tonnage, maximum fuel amounts, length, draft and beam;

(E) Certification Statement

1. Owner/operators shall provide a certification statement signed under penalty of perjury by an executive within the plan holder's management who is authorized to fully implement the oil spill contingency plan, who shall review the plan for accuracy, feasibility, and executability. If this executive does not have training, knowledge and experience in the area of oil spill prevention and response, the certification statement must also be signed by another individual within the plan holders' management structure who has this requisite training, knowledge, and experience. The certification shall be submitted according to the following format:

"I certify, to the best of my knowledge and belief, under penalty of perjury under the laws of the state of California, that the nontank vessel–specific information contained in this contingency plan is true and correct and that the plan as a whole is both feasible and executable."

_____ (Signature), (title), (date);

(F) the California Certificate of Financial Responsibility (COFR) number for the nontank vessel(s) covered by the plan shall be included in the front of the plan or for fleet shall be indexed separately in a subsection of the plan.

(G) Evidence of a contract or other approved means (as defined in Section 825.05 of this subchapter), documenting that the oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill, for each Geographic Region the nontank vessel transits. Plan holders shall only contract with an OSRO(s) that has received a Rating by OSPR (as specified in Section 819.01 of this subchapter) for the booming, on–water recovery and storage, and shoreline protection services required.

(H) a copy of the nontank vessel's oil transfer procedures, in English.

(2) Each plan shall identify a Qualified Individual (as defined in Chapter 1, Section 790 of this subdivision) and any alternates that may be necessary for the purpose of implementing the plan. If the plan holder contracts for this service, documentation that the Qualified Individual or company, and any identified alternates, acknowledge this capacity shall be included in the plan, for each nontank vessel covered by the plan. If an alternate or alternates are identified in the plan, then the plan shall also describe the process by which responsibility will be transferred from the Qualified Individual to an alternate. During spill response activities, notification of such a transfer must be made to the State Incident Commander at the time it occurs.

(3) Each plan shall provide the name, address, telephone number and facsimile number of an agent for service of process designated to receive legal documents on behalf of each plan holder covered by the plan. If the plan holder contracts for this service, documentation that the agent for service of process acknowledges this capacity shall be included in the plan. Such agent shall be located in California.

(b) Nontank Vessel Fuel and Tankage Description/Capacity:

(1) The owner/operator shall provide information on the type(s) of fuel(s) normally used by each nontank vessel covered by the plan. A material safety data sheet (MSDS) or equivalent for each type of fuel used shall be provided to the Administrator upon request.

(2) Each plan shall provide information on the total fuel capacity and the capacity of the largest fuel tank, of each nontank vessel covered by the plan.

(c) Prevention Measures:

(1) As applicable, the owner/operator shall either submit a Certificate Of Inspection (COI) issued by the U. S. Coast Guard, or a summary of certificates issued by a member of the International Association of Classification Societies of the most recent nontank vessel inspection, or verify that the nontank vessel has such a certificate or summary and that the certificate is available for review.

(2) Nontank Vessels Subject to The International Safety Management Code

(A) The owner/operator shall also submit a copy of their Safety Management Certificate to demonstrate compliance with the performance elements in the International Safety Management (ISM) Code subject to IMO Resolution A.741(18), or shall submit proof of compliance with the American Waterways Operator (AWO) Responsible Carrier Program, whichever is applicable. ISM Code requirements currently apply to: passenger ships, including passenger high speed craft; oil tankers; chemical tankers; gas carriers; bulk carriers; and cargo high–speed craft of 500 gross tons or greater.

(B) ISM Code requirements will apply to other cargo ships and mobile offshore drilling units of 500 gross tons or greater on July 1, 2002, and the owner/operator shall submit a copy of their Safety Management Certificate on or before that date.

(3) Bunkering Operations

(A) When conducting bunkering operations in marine waters, a nontank vessel shall carry a seven–barrel spill kit for on–deck oil spills containing the following:

1. sorbents sufficient to contain seven barrels of oil;
2. non–sparking hand scoops, shovels, and buckets;
3. containers suitable for holding seven barrels of recovered waste;
4. a minimum of 15 gallons of a deck cleaning agent;
5. appropriate protective clothing to protect personnel from inhalation hazards, eye exposure, and skin contact;
6. non–sparking portable pumps with appropriate hoses; and
7. the equipment required in this section shall remain ready and pumps with appropriate hoses shall be ready for immediate use during bunkering operations.

(B) The equipment, personnel and procedures sufficient to contain a 50 barrel spill shall be present on–site during all transfer operations and deployable immediately in the event of an oil spill. Response resources owned or under contract to the marine facility or tank vessel engaged in oil transfer operations may be used to meet this requirement.

(d) Notification Procedures:

(1) The owner/operator shall provide a list of contacts to call in the event of a drill, threatened discharge of oil, or discharge of oil. The plan shall:

(A) identify a central reporting office or individual who is responsible for initiating the notification process and is available on a 24–hour basis. The individual making this notification must be fluent in English. The following information must be provided:

1. the individual or office to be contacted;
2. telephone number or other means of contact for any time of the day; and
3. an alternate contact in the event the individual or office is unavailable.

(B) detail the procedures for reporting oil spills to all appropriate local, state and federal agencies within each of the six Geographic Regions that the nontank vessel transits;

(C) establish a clear order of priority for notification.

(2) Immediate Notification

Nothing in this section shall be construed as requiring notification before response.

(A) Each plan shall include a procedure for contacting the OSRO in each of the six Geographic Regions that the nontank vessel transits immediately, but no longer than within 30 minutes, after the discovery of a discharge of oil or threatened discharge of oil.

(B) Each plan shall include a procedure that ensures that the owner/operator or his/her designee will initiate contact with the Qualified Individual, the California Governor's Office of Emergency Services and the National Response Center immediately, but no longer than 30 minutes, after discovery of a discharge of oil or threatened discharge of oil.

(C) Each plan shall include all phone numbers necessary to complete the immediate notification procedures.

(3) Each plan should identify a call–out procedure to acquire equipment in addition to that under contract, to access this equipment if the nontank vessel has a spill that exceeds its reasonable worst case spill.

(4) Each plan shall provide a checklist of the information to be reported in the notification procedures, including but not limited to:

(A) nontank vessel name, country of registry, call sign, and official number;

(B) location of the incident;

(C) date and time of the incident;

(D) course, speed and intended track of the nontank vessel;

(E) the nature of the incident;

(F) an estimate of the volume of oil spilled and the volume at immediate risk of spillage;

(G) the type of oil spilled, and any inhalation hazards or explosive vapor hazards, if known;

(H) the size and appearance of the slick;

(I) prevailing weather and sea conditions;

(J) actions taken or planned by personnel on scene;

(K) current condition of the nontank vessel;

(L) injuries and fatalities; and

(M) any other information as appropriate.

(5) Reporting of a spill as required by Subsection 827.02(d)(2) shall not be delayed solely to gather all the information required by Subsection 827.02(d)(4).

(6) An updated estimate of the volume of oil spilled and the volume at immediate risk of spillage shall be reported to the California Governor's Office of Emergency Services whenever a significant change in the amount reported occurs, but not less than every 12 hours within the first 48 hours of response. The State Incident Commander and/or the Federal On–Scene Coordinator through the Unified Command shall have the option of increasing or decreasing this time frame, as needed. Updated spill volume information included in the Incident Action Plan developed through the Unified Command may meet the requirements of this subsection.

(e) Shipboard Drills and Exercises

NOTE: Spill management team and response organization drills and exercises are addressed in Section 827.02(m) of this subchapter.

(1) Each plan shall describe the vessel's drill and exercise program that meets the requirements of Section 820.01(a), to ensure that the elements of the plan will function in an emergency.

(2) Training sessions may constitute creditable drills and exercises if all requirements of Subsections 820.01(a) ("Drills and Exercises") of this subdivision are met. Onboard emergency procedure drills conducted aboard the nontank vessel and properly logged may be credited.

(f) Post–Spill Review:

Each plan shall provide for post–spill review, including methods to review both the effectiveness of the plan and the need for plan amendments.

(A) The result of the review shall be forwarded to the Administrator within 90 days following the completion of response and clean–up procedures.

(B) The review shall be used by the Administrator only for the purposes of proposing future amendments to the contingency plan.

NOTE: Subsections 827.02(g) through (n) contain the response elements of an oil spill contingency plan.

(g) Planning for the Location of Response Resources:

The owner/operator must be prepared to respond to a spill anywhere within marine waters where the nontank vessel operates. To determine the regions in which response equipment and personnel must be available, the owner/operator shall include in the plan a description of the nontank vessel's normal routes of travel including a list of each of the six Geographic Regions that the nontank vessel transits along these routes. OSPR has developed "Shoreline Protection Tables" (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website) for vessel traffic in California's marine waters. Owners/operators shall meet the response resource and time frame requirements from the appropriate SP Tables when contracting for shoreline protection services.

(h) Containment Booming and On-Water Recovery:

(1) Each plan holder must provide a contract or other approved means for the containment booming and on-water recovery response resources up to their reasonable worst case spill volume for all potential spills from the nontank vessel that could reasonably be expected to impact marine waters. Each plan must demonstrate response resources sufficient to address potential spills in each Geographic Response Plan Area (GRA) if available, or Geographic Region through which the nontank vessel may transit. (GRA's are geographic subdivisions of ACP areas). To determine the amount of response resources for containment booming and on-water recovery the reasonable worst case spill volume must be determined, which is the total volume of the single largest fuel tank of all the nontank vessels covered by the plan.

Each plan shall contain a copy of the contract or other approved means (as defined in Section 825.05 of this subchapter), documenting that any oil spill response organization(s) that are named in the plan will provide the requisite equipment and personnel in the event of an oil spill, for each Geographic Region the nontank vessel transits. This requirement can be met by a copy of the basic written agreement with an abstract of the recovery and/or clean-up capacities covered by the contract.

(2) Response Capability Standards

The equipment and personnel necessary to address the reasonable worst case spill are brought to the scene of the spill within a period of time. The time frames are dependent upon the risk zone in which the nontank vessel is located and is specified in Subsection (B), below.

The standards set forth in this section are only planning standards and may not reflect the exigencies of actual spill response. However, these are the standards that must be used to determine the amount of equipment and personnel that must be under contract or other approved means. Response resources in addition to that under contract must be identified and a call-out procedure in place to access this equipment if the nontank vessel has a spill that exceeds its reasonable worst case spill. The owner/operator is ultimately responsible for addressing the entire volume of an actual spill regardless of the planning volume.

(A) On-Water Daily Recovery Rates and Containment Boom Amounts

1. The total amount of on-water recovery equipment and services required shall be the amount necessary to address the reasonable worst case spill volume.

2. The time frames for response resource delivery are specified in Subsection 827.02(h)(2)(B), below. Appropriate equipment to address the reasonable worst case spill volume must be capable of being at the scene of the spill at the hour specified which is measured from the time of notification, as described in Subsection 827.02(d) of this subchapter. All on-water recovery response resources shall be capable of being deployed and operable within one hour of arrival at the scene of the spill or drill but no later than the designated time frame for each risk zone.

3. The equipment identified for a specific area must be appropriate for use in that area given the limitations of the geography, bathymetry, water depths, tides, currents and other local environmental conditions. For those areas that require shallow-water response capability (refer to the relevant Area Contingency Plan), the plan shall provide for an adequate number of shallow-draft vessels (as defined in Section 825.05 of this subchapter) to be owned or under contract or other approved means and available to respond to provide shoreline protection of the sensitive sites potentially impacted by a spill. Additionally, the equipment identified shall also be appropriate for use on the type of oil identified.

4. The time frames for equipment delivery and deployment as specified in this subsection do not take into account the time required to conduct a health and safety assessment of the site as set forth in Subsection 827.02(j)(6), and as required by the California Occupational Safety and Health Administration. In addition, these time frames do not account for delays that may occur due to weather or sea state. The actual time necessary to deliver and deploy equipment will be assessed at the time of an incident or a drill and will take into account the prevailing conditions of weather and sea state, as well as the site assessment requirements.

(B) Delivery Times

1. Nontank vessels operating in High-Volume Ports (as defined in Section 790 of this subdivision) shall have the on-water recovery capability to address the nontank vessel's reasonable worst case spill volume at the scene of the spill within 12 hours of notification, except as provided below:

i. nontank vessels that transit: 1) inward of the inland line of demarcation as described in 33 CFR Section 80.1142 for San Francisco harbor; 2) inwards of a six nautical mile radius of Long Beach Light (LLNR 3025) [33-43.4N, 118-11.2W] outside the entrance to the Los Angeles/Long Beach Harbors on the Los Angeles and Long Beach Harbor Chart #18751; and 3) the Ports of Stockton and Sacramento, shall have the on-water recovery capability to address the nontank vessel's reasonable worst case spill volume at the scene of the spill within six hours.

ii. in addition, when conducting bunkering operations within the High Volume Ports and the ports of Stockton and Sacramento, there must be 2500 barrels/day or 10% of the nontank vessel's total fuel capacity, whichever is less, of on-water recovery capability that can be mobilized and on-scene within two hours of notification;

iii. if containment equipment for a 2500 barrel spill, or 10% of the nontank vessel's total fuel capacity, whichever is less, can immediately be deployed, the initial on-water recovery capability can be on-scene within three hours rather than two hours.

iv. In addition nontank vessels, when not conducting bunkering operations, but when operating in the Ports of Stockton and Sacramento shall have containment boom and associated deployment equipment for a 2500 barrel spill pre-staged such that it can be immediately deployed.

2. Nontank vessels operating in Facility/Transfer Areas or the Santa Barbara Channel Area (as defined in Section 790 of this subdivision) shall have the on-water recovery capability to address the nontank vessel's reasonable worst case spill volume at the scene of the spill within 12 hours of notification.

i. in addition, when conducting bunkering operations within the Facility/Transfer Areas or the Santa Barbara Channel Area, there must be 2500 barrels/day, or 10% of the nontank vessel's total fuel capacity, whichever is less, of on-water recovery capability that can be mobilized and on-scene within two hours of notification;

ii. if containment equipment for a 2500 barrel spill, or 10% of the nontank vessel's total fuel capacity, whichever is less, can immediately be deployed, the initial on-water recovery capability can be on-scene within three hours rather than two hours.

iii. In addition, nontank vessels, when not conducting bunkering operations but when operating in Humboldt Bay and Monterey Bay, shall have containment boom and associated deployment equipment for a 2500 barrel spill pre-staged such that it can be immediately deployed.

3. Nontank vessels that transit along the Balance of the Coast (as defined in Section 790 of this subdivision), within marine waters shall have the on-water recovery capability to address the nontank vessel's reason-

able worst case spill volume at the scene of the spill within 18 hours of notification.

i. in addition, when conducting bunkering operations within the Balance of the Coast there must be 2500 barrels/day, or 10% of the nontank vessel's total fuel capacity, whichever is less, of on–water recovery capability that can be mobilized and on–scene within two hours of notification.

(3) On–Water Response Equipment and Services

(A) Each plan shall demonstrate that the nontank vessel owner/operator has under contract or other approved means (as defined in Section 825.05 of this subchapter), access to all necessary response resources to comply with the required containment booming and on–water recovery established pursuant to Subsection 827.02(h)(2)(B). The amount of response equipment required will take into account the derated capacity (as defined in Chapter 1, Section 790 of this subdivision) of the equipment.

(B) The equipment identified for a specific area must be appropriate for use in that area given the limitations of the geography, bathymetry, water depths, tides, currents and other local environmental conditions. For those areas that require shallow–water response capability (refer to the relevant Area Contingency Plan), the plan shall provide for an adequate number of shallow–draft vessels (as defined in Section 825.05 of this subchapter) to be owned or under contract or other approved means and available to respond to provide shoreline protection of the sensitive sites potentially impacted by a spill. Additionally, the equipment identified shall also be appropriate for use on the type of oil identified. To the extent that the following information is provided by a Rated OSRO, evidence of a contract or other approved means with a Rated OSRO will suffice:

1. the location, inventory and ownership of the equipment to be used to fulfill the response requirements of this subchapter;

2. a complete inventory of any nonmechanical response equipment and supplies, including the type and toxicity of each chemical agent, with procedures for storage and maintenance;

3. the manufacturer's rated capacities and operational characteristics for each major item of oil recovery equipment;

4. the type and capacity of storage and transfer equipment matched to the skimming capacity of the recovery systems;

5. the derated capacity (as defined in Chapter 1, Section 790 of this subdivision) for each major piece of on–water recovery equipment listed, as well as the derated capacity for the skimming systems as a whole.

i. A request may be submitted to the Administrator to review the derated capacity for a piece of equipment if it can be shown that the equipment has a different capacity than the derating factor allows.

ii. The Administrator's decision regarding a change in the derated capacity for a piece of equipment will be issued as soon as administratively feasible.

6. vessels designated for oil recovery operations, including skimmer vessels and vessels designed to tow and deploy boom, and availability of shallow–draft vessels;

7. vessels of opportunity reasonably available for oil spill recovery operations, including availability of shallow–draft vessels, procedures to equip the vessels, inventory equipment, and train personnel;

8. procedures for storage, maintenance, inspection and testing of spill response equipment under the immediate control of the operator;

9. sufficient equipment to track the movement of discharged oil including aerial surveillance sufficient to direct skimming operations.

10. Each plan shall describe the personnel available to respond to an oil spill, including:

i. a list of the spill management personnel and their relevant qualifications including a discussion of spill response training and experience, regulatory awareness and compliance, and supervision;

ii. a list by job category including a job description for each type of spill response position needed as indicated in the spill response organization scheme;

iii. a match between personnel by job category, and the equipment proposed for use (including equipment appropriate for shallow–water environments), including the plan for mobilization of such personnel; and

iv. sufficient personnel to maintain a response effort of at least 14 days.

(C) Each plan shall describe procedures for the transport of required equipment, personnel and other resources to the spill site. The description shall include plans for alternative procedures during adverse environmental conditions. Adverse environmental conditions to be considered shall include:

1. adverse weather;

2. sea states, tides, winds and currents;

3. presence of debris or other obstacles; and

4. any other known environmental conditions that could restrict response efforts.

(D) A list of the spill management personnel (company name if applicable) and their relevant qualifications including a discussion of spill response training and experience, regulatory awareness and compliance, and supervision.

(E) Any equipment and personnel identified in the plan to meet the planning standard requirements must be available for response. Any necessary maintenance for the equipment, vacation periods for response personnel, or other eventualities must be taken into account in relying upon these resources.

1. The equipment owner must notify the Administrator when major equipment is removed from service for a period of 24 hours or more for maintenance or repair. Major equipment is that which, if moved, would affect timely implementation of the plan. Notification must be made prior to removing equipment for regularly scheduled maintenance, and within 24 hours of removing equipment for unscheduled repairs.

2. The equipment owner must demonstrate that backup equipment is available during the time that the primary response equipment is out of service. Backup equipment may be provided from the owner's own inventory, or may be made available from another responder.

3. A plan shall remain valid during the time that equipment has been removed from service for maintenance or repair.

(4) the equipment owner shall notify the Administrator when the major equipment is back in service.

(F) The plan holder may propose the use of non–mechanical methods for response operations which may include dispersants, in–situ burning, coagulants, bioremediants, or other chemical agents. The use of any non–mechanical method for response must be done in accordance with provisions of the State Marine Oil Spill Contingency Plan, the National Contingency Plan, the applicable Area Contingency Plan, and all applicable State laws and regulations. If a non–mechanical method of response is proposed, the plan shall include:

1. methods of deployment or application;

2. For the use of chemical agents, a description of the specific mechanisms in place to assess the environmental consequences of the Chemical Agent. This description shall include the mechanism for continuous monitoring of environmental effects for the first three days after initial application, and periodic monitoring thereafter until the agent is inert or no longer operative;

3. identification of all permits, approvals or authorizations needed to allow the use of non–mechanical methods, and the time line for obtaining them;

4. a plan for protecting resources at risk, areas of public concern, and the public from any adverse effects of the non–mechanical methods used;

5. the projected efficacy of each type of non–mechanical method proposed for use taking into account the type of spilled material and the projected environmental conditions of the potential spill site; and

6. upon request, the plan holder shall provide any test results known to the plan holder which assess the environmental impacts of applying these methods in the marine environment.

(G) The plan shall describe the methods for tracking the movement of the discharged oil; and

(H) The plan shall include a list of the locations of the weather stations to be used for observations of winds, currents and other data at the time of a spill that may assist in making real–time projections of spill movement.

(i) Shoreline Protection:

Each plan must provide for shoreline protection in the Geographic Response Plan Areas (GRA) or Geographic Regions the nontank vessel may transit. Each plan shall demonstrate through contract(s) or other approved means, the response resources necessary to protect each type of shoreline and all applicable environmentally and culturally sensitive sites in the timeframes required, as outlined in the appropriate Shoreline Protection Tables (SP Tables, see Section 790, incorporated by reference herein and posted on OSPR's website). The Tables representing High Volume port areas (i.e., the San Francisco and Los Angeles/Long Beach Tables) will go into effect on May 1, 2007; all other Tables will go into effect on September 1, 2007. The SP Tables shall be reviewed and updated as needed (e.g., to reflect updates to the ACPs, etc.). Updates to the SP Tables will be processed by OSPR staff using the procedures outlined in the Administrative Procedure Act.

(1) Percentages of Dedicated Shoreline Protection Resources

The following table lists the applicable percentage of dedicated shoreline protection boats and staff that are required for each Geographic Region:

Geographic Region (also known as ACP Area)	*% DEDICATED RESOURCES FOR SHORELINE PROTECTION*
1	50% dedicated boats and staff
2	75% dedicated boats and staff
3	0% (non–dedicated boats and staff allowed)
4	0% (non–dedicated boats and staff allowed) *For Port Hueneme only, 75% dedicated boats and staff required
5	75% dedicated boats and staff
6	50% dedicated boats and staff

(A) An owner/operator may propose alternatives to what is listed in the SP Tables for boats and staff only. The proposal may be tested by the Administrator anytime prior or subsequent to plan approval.

(2) Shoreline Protection Requirements for Vessels Operating in Small Harbors

Included in the SP Tables is a listing of Small Harbors throughout the state. The requirements in the Small Harbor Table apply to all vessels over 300 GT that operate in the Small Harbors as listed. The following apply to the Small Harbor Table only:

(A) Non–dedicated resources are allowed for shoreline protection for the vessels that operate in these harbors.

(B) The amounts of boom, boats and staff, as listed, are required for the vessels that operate in these harbors. In some locations additional response resources may be required for included or adjacent sensitive sites if this has been identified in the applicable ACPs.

(C) Resource requirements can be met either with pre–positioned equipment (as identified in the owner/operator's Contingency Plan) or by a contract with a Rated OSRO. Advance notice to the OSRO is required before the plan holder can begin operating in the harbor.

(D) Unless otherwise specified in the Small Harbor Table, anytime that a vessel over 300 GT operates in these small harbors, that vessel shall have a contract or other approved means for a minimum of 2,500 feet of boom that can be deployed in 6 hours.

(E) An owner/operator may propose lesser amounts of shoreline protection resources than that listed in the Small Harbor Table, for carrying out planned projects in the Balance of the Coast, upon petitioning and approval of the Administrator. The proposal may be tested by the Administrator anytime prior or subsequent to plan approval.

(3) Each plan shall have under contract or other approved means sufficient personnel to implement the shoreline protection strategies in the time frames required from the appropriate SP tables, who are to remain on scene until demobilized by the Sate Incident Command or the Unified Command. For planning purposes, this shall include procedures to obtain sufficient personnel to maintain a response effort of at least 14 days.

(A) Any equipment and personnel identified in the plan to meet the contingency plan requirements must be available for response. Any necessary maintenance for the equipment, vacation periods for response personnel, or other eventualities must be taken into account in relying upon these resources.

1. The equipment owner must notify the Administrator when major equipment is removed from service for a period of 24 hours or more for maintenance or repair. Major equipment is that which, if moved, would affect timely implementation of the plan. Notification must be made prior to removing equipment for regularly scheduled maintenance, and within 24 hours of removing equipment for unscheduled repairs.

2. The equipment owner must demonstrate that backup equipment is available during the time that the primary response equipment is out of service. Backup equipment may be provided from the owner's own inventory, or may be made available from another responder.

3. A plan shall remain valid during the time that equipment has been removed from service for maintenance or repair if the Administrator has not disapproved such removal within 24 hours of notification.

4. the equipment owner shall notify the Administrator when the major equipment is back in service.

(4) Shoreline Clean–Up

(A) Utilizing the equipment that must be under contract, Each plan shall describe methods to clean up spilled oil and remove it from the environment. The owner/operator shall have a contract or other approved means to provide the appropriate shoreline clean up services. The equipment identified for a specific area must be appropriate for use in that area given the limitations of the bathymetry, geomorphology, shoreline types and other local environmental conditions. Additionally, the equipment identified shall be appropriate to implement the applicable strategy, and appropriate for use on the type of oil identified. The following information must be provided:

1. methods for shore side clean–up, including containment and removal of surface oil, subsurface oil and oiled debris and vegetation from all applicable shorelines, adjacent land and beach types; and

2. measures to be taken to minimize damage to the environment from land operations during a spill response, such as impacts to sensitive shoreline habitat caused by heavy machinery or foot traffic.

(j) Response Procedures:

Some of the documentation from the most recent Area Contingency Plans may be used in lieu of developing comparable response procedures, if appropriate and approved by the Administrator.

(1) The owner/operator shall include in the plan a description of the organization of the nontank vessel's spill management team and spill response system. An organizational diagram depicting the chain of command shall also be included. Additionally, the plan shall describe the method to be used to integrate the plan holder's organization into the State Incident Command System and/or the Unified Command Structure as required by Title 8, California Code of Regulations, Subsection 5192(q)(3)(A). Each plan shall identify a Spill Management Team (as defined in Section 825.05 of this subchapter). If the plan holder contracts for this service, documentation that the Spill Management Team acknowledges this capacity shall be included in the plan.

(A) The plan holder may utilize the procedures outlined in the appropriate and most recent Area Contingency Plan when describing how the nontank vessel's chain of command will interface with the State Incident Command System which utilizes the Unified Command.

(B) Each plan shall describe the organization of the plan holder's public information office, as it relates to an oil spill incident, and the method by which the Information Officer will be integrated into the State Incident Command System.

(C) Each plan shall describe the plan holders' safety program, as it relates to an oil spill incident, and the method by which their Safety Officer will be integrated into the State Incident Command System.

(2) Each plan shall identify potential sites needed for spill response operations, including location(s) for:

(A) a central command post sufficient to accommodate the State Incident Command or Unified Command as well as the plan holder's response organization;

(B) a central communications post if located away from the command post; and

(C) equipment and personnel staging areas.

(3) Each plan shall include a checklist, flowchart or decision tree depicting the procession of each major stage of spill response operations from spill discovery to completion of clean–up. The checklist, flowchart or decision tree shall describe the general order and priority in which key spill response activities are performed.

(4) Each plan shall detail the lines of communications between the responsible party, the Qualified Individual and the on–scene commanders, response teams, local, state, and federal emergency and disaster responders, including:

(A) communication procedures;

(B) the communication function (e.g., ground–to–air) assigned to each channel or frequency used;

(C) the maximum broadcast range for each channel or frequency used; and

(D) redundant and back–up systems.

(5) Each plan shall describe the procedures to manage access to the spill response site, the designation of exclusion, decontamination and safe zones, and the decontamination of equipment and personnel during and after oil spill response operations, as required by the California Occupational Safety and Health Administration.

(6) Prior to beginning oil spill response operations and clean–up activities, a Site Safety Plan must be completed. Each Site Safety Plan shall include information as required pursuant to Title 8, Section 5192(p)(8)(D)(2) of the California Code of Regulations including, but not limited to, a written respiratory protection program, written personal protection equipment program, written health and safety training program, written confined space program and permit forms, direct reading instrument calibration logs, and written exposure monitoring program.

(k) Temporary Storage and Waste Management:

(1) Each plan shall identify sufficient temporary storage for all recovered oil or all oily waste, and identify facilities that would be able to accept the recovered oil or oily waste for recycling or other means of waste management. Sufficient temporary storage shall be no less than two times the reasonable worst case spill volume for the nontank vessel.

(A) To meet the temporary storage requirement described in Subsection (1) above, the following amounts of storage shall be dedicated response resources (as defined in Section 825.05(b) of this subchapter) or OSRO–owned and controlled resources (as defined in Section 825.05(i) of this subchapter), as applicable to the appropriate risk zone:

Sufficient storage to support the skimming systems shall be brought to the scene of the spill during the first four hours of response:

520 barrels of storage, or 20% of the reasonable worst case oil spill volume, whichever is less, shall be brought to the scene of the spill within four hours of notification of a spill;

12,000 barrels, or two times the reasonable worst case oil spill volume, whichever is less, shall be available at the scene of the spill within 6 hours of notification of a spill.

The balance of the temporary storage requirement described in Subsection (1) above may be provided by non–dedicated storage resources. All skimming systems operating at the scene of a spill shall have adequate storage.

(2) Each plan shall identify the party that shall maintain responsibility for recovered oil and oily waste for the purposes of temporary storage.

(3) Each plan shall describe site criteria and methods used for temporary storage of recovered oil and oily wastes generated during response and clean–up operations, including known available sites.

(4) Each plan shall identify all applicable permits, and all federal, state and local agencies responsible for issuing those permits for transit, temporary storage and ultimate waste management of all wastes likely to result from an oil spill.

(5) Each plan shall include information which could expedite the state approval process for the use of temporary waste storage sites, including a list of appropriate contacts and a description of procedures to be followed for each approval process.

(*l*) Oiled Wildlife Care Requirements: The owner/operator shall provide information to include in the plan on how oiled wildlife care will be provided by one of the following approved means:

(1) utilize the California Oiled Wildlife Care Network (OWCN) to meet oiled wildlife care requirements: or

(2) describe procedures that clearly outline how oiled wildlife care will be provided. The equipment, facilities, and personnel necessary to implement these procedures must be identified and assured by contract for each Geographic Region covered by the plan. Standards and written protocols for wildlife care must comply with all applicable State and federal laws.

(m) Drills and Exercises

(1) Each plan shall describe the vessel's drill and exercise program that meets the requirements of Section 820.01(a), to ensure that the elements of the plan will function in an emergency.

(2) Training sessions may constitute creditable drills and exercises if all requirements of Subsections 820.01(a) ("Drills and Exercises") of this subdivision are met.

(3) Drills shall be designed by the nontank vessel owner/operator to exercise either individual components of the plan or the entire response plan. Such drills, individually or in combination, shall ensure that the entire plan is exercised at least once every three years.

(n) Nontank Vessel Emergency Services:

(1) Notification Requirements:

Any party responsible for a nontank vessel as defined in this subdivision shall notify the U.S. Coast Guard within one hour of a disability (as defined in Government Code Section 8670.20(b)) if the disabled nontank vessel is within 12 miles of the shore of the state.

(2) Equipment and Services:

Nontank vessel emergency services means all services rendered to save a nontank vessel and cargo from any marine peril that could reasonably be expected to cause a discharge of oil into the waters of the state, and includes those actions necessary to control or stabilize the nontank vessel or cargo.

(A) All nontank vessels required to have a contingency plan pursuant to Section 827.01(a) must demonstrate sufficient nontank vessel emergency services means capability as outlined in this section;

(B) Availability of the following equipment and services shall be demonstrated by sufficient in–house capability or a signed, valid contract or other approved means with a vessel emergency services provider or by other means approved by the Administrator. For the purpose of this subsection, a plan holder can demonstrate the availability of equipment and services, in lieu of a signed, valid contract or sufficient in–house capability, by a Letter of Intent or a Conditional Agreement, signed by the entity providing such services and attesting to the availability of the equipment and services required as specified in this Subsection (n). Any service provider must have the appropriate expertise, and all required equipment ready and available to respond within the following time frames:

1. Within 12 hours of notification of the U.S. Coast Guard:

i. an emergency services vessel of the appropriate size, configuration, and operating capability to ensure stabilization of a disabled nontank vessel shall be on scene. The emergency services vessel must be capable of reaching the disabled nontank vessel before the disabled nontank vessel would run aground. In determining the time it would take for a nontank vessel to run aground, an estimate shall be made based on the drift rate in the worst case weather assuming the complete loss of power and/or steering;

ii. a professional salvor, naval architect or other qualified person knowledgeable of stability, and hull stress assessments of the nontank vessel shall be engaged in nontank vessel emergency operations. These

assessments shall be developed pursuant to the shipboard spill mitigation procedures as set forth in 33 CFR, Part 155.1035(c)).

iii. a private firefighting capability that will respond to casualties in the area(s) in which the nontank vessel will operate. This capability shall be a supplement to the firefighting capability on board the nontank vessel;

iv. dewatering pumps, hoses, and power supplies sufficient to maintain nontank vessel stability and prevent sinking shall be on scene.

2. within 18 hours of notification of the U.S. Coast Guard, and to the extent necessary to avoid a pollution incident, the following must be on scene:

i. resources for shoring, patching or making other emergency, temporary repairs to correct structural, stability, or mechanical problems on the nontank vessel;

ii. equipment necessary to tow an incapacitated nontank vessel to a safe haven.

NOTE: Authority cited: Sections 8670.5, 8670.7, 8670.10, 8670.20, 8670.25, 8670.25.5, 8670.28 and 8670.29, Government Code. Reference: Sections 8670.10, 8670.12, 8670.20, 8670.25, 8670.25.5, 8670.28 and 8670.29, Government Code.

HISTORY

1. New section filed 12–28–99; operative 2–3–2000 pursuant to Government Code section 11343.4 (Register 99, No. 53).
2. Change without regulatory effect repealing subsection (a)(1)(E)1., renumbering and amending former subsection (a)(1)(E)2. to subsection (a)(1)(E)1. and amending subsections (a)(1)(F)–(G) filed 3–30–2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 13).
3. Amendment of section and NOTE filed 3–20–2007; operative 5–1–2007 (Register 2007, No. 12).
4. Amendment of subsection (a)(1)(A) filed 8–6–2008; operative 9–5–2008 (Register 2008, No. 32).

Subchapter 6. Oil Transfer and Vessel Operations

Article 1. General Requirements

§ 840. Short Title.

This subchapter shall be known and may be cited as the Department of Fish and Game, Office of Spill Prevention and Response, Oil Transfer and Vessel Operation Regulations.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2, 8670.7 and 8670.17, Government Code.

HISTORY

1. New subchapter 4, article 1 and section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of subchapter heading and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Change without regulatory effect amending subchapter 6 heading filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
4. Amendment filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 840.1. Applicability.

(a) The provisions of this subchapter shall apply to:

(1) all oil transfer operations other than internal vessel transfers regardless of the quantity being transferred, conducted within California marine waters, or a shore–based transfer where a spill could impact California marine waters, except as noted in (b) below; and

(2) all drydock associated oil transfers including, but not limited to, oil transfers to or from a tank vessel or nontank vessel in drydock; oil transfers to or from tanks (portable and/or fixed) within the drydock; and oil transfers to or from the drydock; and

(3) all vessels engaged in oil transfer operations. For the purpose of this subchapter, "vessel" is not limited to the definition in Chapter 1, Section 790, of this subdivision and includes tank vessels and nontank vessels.

(b) This subchapter does not apply to:

(1) nontank vessels with an oil carrying capacity of less than 250 barrels;

(2) oil transfers to or from a marine terminal;

(3) small craft refueling docks as defined in Chapter 1, Section 790 of this subdivision;

(4) public vessels as "public vessels" are defined in 33 United States Code (USC) 2701;

(5) dedicated oil spill response vessels when conducting response operations in a response area; or

(6) vessels of opportunity as defined in Chapter 1, Section 790 of this subdivision.

(7) internal vessel transfers.

(c) Both the transfer unit and the receiving unit may be monitored by Staff during any phase of the oil transfer operation.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2, 8670.14, 8670.17 and 8670.18, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 840.2. Administration.

(a) The Staff shall administer this subchapter and shall thereby seek to provide for the following:

(1) the prevention and elimination of any contamination or pollution of the ocean and tidelands,

(2) the prevention and elimination of waste from the marine waters,

(3) the conservation of natural resources,

(4) the protection of human health and safety, and

(5) the protection of the environment.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Section 8670.2, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).

§ 841. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this Subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "#1 and #2 Grade Oils", for the purpose of this subchapter, means oils with an API gravity of 35 to 40 and are primarily intended for use in internal combustion engines that use compression for ignition, or used in turbine engines, or used as a heating oil.

(b) "Boom", for the purpose of this subchapter, means flotation boom or other effective barrier containment material suitable for containment of oil that is discharged onto the surface of the water.

(c) "Person in charge" means that person as defined in 33 CFR 154.105.

(d) "Receiving Unit" means any tank vessel, nontank vessel or marine facility which is not a marine terminal, which receives oil during an oil transfer operation.

(e) "Small marine fueling facility" means either of the following:

(A) a mobile transfer unit, or

(B) a fixed facility that is not a marine terminal, which dispenses primarily nonpersistent oil, and may dispense small amounts of persistent oil, primarily to small craft, and meets all of the following criteria:

(1) has tank storage capacity not exceeding 40,000 gallons in any single storage tank or storage tank compartment.

(2) has total usable tank storage capacity not exceeding 75,000 gallons.

(3) had an annual throughput volume of over-the-water transfers of oil that did not exceed 3,000,000 gallons during the most recent preceding 12-month period.

(f) "SOLAS" means the International Convention for Safety of Life at Sea 1974, and the Protocols of 1978 and 1988, published in SOLAS, consolidated edition 1997, IMO Publications, International Maritime Organization (IMO), 4 Albert Embankment, London SE1 7SR, United Kingdom.

(g) "Staff" means the Administrator or any personnel within the California Department of Fish and Game authorized to act on behalf of the Administrator.

(h) "Transfer" or "Transfer Operation" means the transfer of oil.

(i) "Transfer Unit" means any tank vessel, nontank vessel, or marine facility from which oil is transferred to another vessel or marine facility which is not a marine terminal, during an oil transfer operation.

NOTE: Authority cited: Sections 8670.17, 8670.18 and 8670.28, Government Code. Reference: Section 8670.3, Government Code.

HISTORY

1. New section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with amendment of subsections (g)(1), (j), (r)(1)(B)-(C), (s) and NOTE, new subsection (*l*) and subsection redesignation and filed 7-12-94 (Register 94, No. 28).
3. Change without regulatory effect amending section filed 7-12-95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
4. Amendment filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

§ 842. Incorporation by Reference.

(a) Unless found to conflict with regulations of this subchapter, and to the extent that they govern the transportation or transfer of oil, the following regulations promulgated by the United States Coast Guard are incorporated by reference:

(1) 33 Code of Federal Regulations (CFR) Part 151, Vessels Carrying Oil, Noxious Liquid Substances, Garbage, Municipal or Commercial Waste, and Ballast Water.

(2) 33 CFR Part 154, Facilities Transferring Oil or Hazardous Material in Bulk.

(3) 33 CFR Part 155, Oil or Hazardous Material Pollution Prevention Regulations for Vessels.

(4) 33 CFR Part 156, Oil and Hazardous Material Transfer Operations.

(5) 46 CFR Part 34, Firefighting Equipment.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with amendment of subsection (a) and NOTE and filed 7-12-94 (Register 94, No. 28).
3. Amendment filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

Article 1.1. Requirements for the Transfer of Oil

§ 843. General.

(a) No person may conduct an oil transfer operation unless the equipment, personnel and operating procedures meet the requirements of this subchapter.

(b) Any transfer operation which does not meet the requirements of Subsection (a) of this section may be subject to a shutdown of operations. An order issued by the Staff to terminate an oil transfer operation is an order of the Administrator and failure to comply constitutes a violation of Article 9 of the Government Code (commencing with Section 8670.57 et seq.).

(c) The Administrator may grant an exemption or partial exemption from compliance with any requirement in this subchapter if the following conditions are met:

(1) An owner or operator submits a written request for an exemption to the Administrator at least 30 days before operation under the exemption is proposed, unless the Administrator authorizes a shorter time period; and

(2) It is determined from the request that:

(A) compliance with a specific requirement is economically or physically impractical;

(B) no alternative procedure, method, or equipment standard exists that would provide an equivalent level of protection from pollution by oil; and

(C) the likelihood of oil being discharged as a result of the exemption is minimal.

(3) If requested, the applicant must submit any appropriate information to substantiate the request for an exemption. Such information may include an environmental and economic assessment of the effects of and the reasons for the exemption, and any proposed procedures, methods or equipment standards to be followed in lieu of those required. The Administrator may consider any exemption or partial exemption from compliance with any requirement in the Federal regulations granted by the Commandant of the U.S. Coast Guard;

(4) The exemption may specify the procedures, methods, or equipment standards that will apply;

(5) An exemption will be granted or denied in writing. The decision of the Administrator will be rendered within 10 calendar days of receipt of the request and is the final agency action.

(d) Any exemption granted by the State Lands Commission pursuant to Title 2, CCR Section 2310, shall remain in full force and effect until such exemption expires by its own terms or an application is made to the Administrator, pursuant to this section for an extension or amendment of such exemption.

NOTE: Authority cited: Sections 8670.7, 8670.17, 8670.18 and Article 9 (commencing with Section 8670.57 et seq.), Government Code. Reference: Sections 8670.2, 8670.14 and 8670.17, Government Code.

HISTORY

1. New article 1.1 and section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with amendment of section and NOTE and filed 7-12-94 (Register 94, No. 28).
3. Amendment of section and NOTE filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

§ 843.1. Persons in Charge: Designation and Qualification.

(a) A separate "person in charge" must be designated for the oil transfer operations of the transfer unit and for the oil transfer operations of the receiving unit.

(b) No person may serve as person in charge of oil transfer operations unless:

(1) the person in charge meets the requirements set forth in 33 CFR 154.710, 33 CFR 155.710 and 156.115, whichever is appropriate.

(2) the person in charge has been designated in writing in accordance with 33 CFR 155.820 as set forth in 33 CFR 154.730, and 33 CFR 155.715.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with amendment of NOTE and filed 7-12-94 (Register 94, No. 28).
3. Amendment filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

§ 843.2. Compliance with Oil Transfer Procedures or Operations Manual.

(a) The operator of each vessel required by 33 CFR 155.720 to have oil transfer procedures shall ensure that such procedures are current and shall require vessel personnel to use the oil transfer procedures during each oil transfer operation.

[The next page is 200.39.]

(b) The operator of each marine facility required by 33 CFR 154.300 to have an operations manual shall ensure that the manual's procedures are current and shall require facility personnel to use the operations manual during each oil transfer operation.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment of section heading, section and NOTE filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 843.3. Availability of Oil Transfer Procedures or Operations Manual.

The written oil transfer procedures or operations manual must be:

(a) available for inspection by Staff whenever the transfer unit is conducting an oil transfer operation;

(b) legibly printed in English and any other language or languages used primarily by personnel engaged in the oil transfer operation; and

(c) permanently posted or available at the site of transfer where the procedures can be easily seen and used by members of the crew when engaged in oil transfer operations.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment of section heading and section filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 843.4. Contents of the Oil Transfer Procedures or Operations Manual.

The oil transfer procedures or operations manual must contain, either in the order listed or by use of a cross–reference index page, all of the following as appropriate:

(a) a list of each product transferred to or from the vessel or marine facility;

(b) a description of each oil transfer system on the vessel or marine facility including:

(1) a line diagram of the vessel's or marine facility's oil transfer piping, including the location of each valve, pump, control device, vent, and overflow;

(2) the location of the shutoff valve or other isolation device that separates any bilge or ballast system from the oil transfer system;

(3) a description of and procedures for emptying the discharge containment system;

(c) the number of persons required to be on duty during oil transfer operations;

(d) the duties by title of each officer, person in charge, tankerperson, deckhand, and any other person required for each oil transfer operation;

(e) procedures and duty assignments for tending the vessel's moorings during the transfer of oil;

(f) procedures for operating the emergency shutdown and communications;

(g) procedures for topping off tanks;

(h) procedures for ensuring that all valves used during the oil transfer operations are closed upon completion of transfer;

(i) procedures for reporting oil discharges into the water; and

(j) procedures for closing and opening the vessel openings specified in 33 CFR 155.815.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: 33 CFR 155.750; and Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment of section heading, first paragraph and subsections (a)–(b)(1) filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 843.5. Draining Oil.

No person may intentionally drain oil or oily waste from any source into the bilge of any vessel. For purposes of this section, "bilge" does not mean a slop tank as described in 33 CFR 157.15, or an oily residue tank as described in 33 CFR 157.17.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Section 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).

§ 843.6. Emergency Shutdown.

(a) A vessel carrying oil, with an oil capacity of 250 or more barrels, must have on board an operable means for emergency shutdown that would enable the person in charge of an oil transfer operation to stop the flow of oil to another vessel, or within the vessel itself, within 30 seconds.

(b) A small marine fueling facility must have an operable means for emergency shutdown that would enable the person in charge of the oil transfer operation to stop the flow of oil to a vessel.

(c) The means required in paragraphs (a) and (b) of this section may be a pump control, a quick–acting, power actuated valve, or an operating procedure. If an emergency pump control is used, it must stop the flow or back flow of oil if the oil could siphon through the stopped pump.

(d) The means required in paragraph (a) of this section must be operable from the cargo deck, cargo control room, or the usual operating station of the person in charge of the oil transfer operation.

(e) The means required in paragraphs (a) and (b) of this section must be operable from a location that is accessible to the person in charge.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 843.7. Communications.

(a) During oil transfers, the transfer unit and receiving unit must have continuous two–way voice communication between the persons in charge of the transfer operations on both the transfer unit and receiving unit.

(b) Portable communication devices used to comply with paragraph (a) of this section during the transfer of flammable or combustible liquids must be intrinsically safe, as defined in Title 2, Division 3, Chapter 1, Article 5 of the California Code of Regulations, Section 2370(e).

(c) The primary communication system required by paragraph (a) of this section must be usable and effective in all phases of the transfer operation and all weather conditions. If this communications systems fails, the transfer operation shall be discontinued, as described in the Declaration of Inspection (Section 843.8(z) of this subchapter). The transfer operation shall not resume until the continuous two–way voice communication system is restored.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Title 2 CCR Section 2370(e); and Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 843.8. Pre–Transfer Requirements for Oil Transfer Operations.

No person may conduct an oil transfer operation unless:

(a) the vessel's moorings and mooring lines used during the transfer operation are strong enough to hold during all expected conditions of surge, current, and weather, and are long enough to allow adjustment for changes in draft, drift, and tide during the transfer operation;

(b) oil transfer hoses and loading arms are long enough to allow the vessel to move to the limits of its moorings without placing strain on any component of the oil transfer system;

(c) each hose is supported to prevent kinking or other damage to the hose and to prevent strain on its coupling;

(d) each part of the oil transfer system is properly aligned;

(e) each part of the oil transfer system not necessary for the transfer operation is securely capped, blank flanged, and/or shut off;

(f) the end of each hose that is not connected for the transfer of oil is plugged, capped, or blanked off using the closure devices required by federal regulation;

(g) the transfer system is attached to a fixed connection on the transfer unit or receiving unit except that when a nontank vessel of less than 250 barrel capacity is receiving fuel, an automatic back pressure shutoff nozzle may be used;

(h) each overboard discharge or sea suction valve that is connected to the vessel's oil transfer or cargo tank system is sealed or lashed in the closed position, except when used to receive or discharge ballast;

(i) each oil transfer hose is in good repair, and is suitable for the purpose intended and free from defect which would permit the discharge of oil through the hose material; has no unrepaired loose covers, kinks, bulges, soft spots, or any other defect which would permit the discharge of oil through the hose material and no gouges, cuts, or slashes that penetrate the first layer of hose reinforcement. (See the recommended practices in the "Hose Technical Information Bulletin: No. IP–11–4; Oil Suction and Discharge Hose: Manual for Maintenance, Testing and Inspection," published by the Rubber Manufacturers Association (RMA), 1440 K Street, N.W., Washington, D.C. 20005). For purposes of this section, "reinforcement" means the strength members of the hose, consisting of fabric, cord and/or metal;

(j) the discharge containment equipment on deck or on the dock that must be deployed pursuant to Sections 844 and 844.3 of this subchapter, is deployed and in place prior to any transfer of oil, and periodically drained to provide the required capacity;

(k) each drain and scupper is closed by mechanical means to adequately prevent any discharge or leaking of oil; freeing ports shall be adequately blocked to prevent any discharge or leaking of oil;

(*l*) all connections in the oil transfer system are leak free, except that a component in the transfer system, such as the packing glands of a pump which cannot be made leak free, shall not leak at a rate that exceeds the capacity of the discharge containment equipment to hold any such leakage during the transfer operation;

(m) the communications equipment and procedures required by this subchapter are operating during the entire transfer operation;

(n) the emergency means of shutdown is in position and operable;

(o) there is a qualified person in charge on the transfer unit and a person in charge on the receiving unit during a transfer operation;

(p) each person in charge required by paragraph (o) of this section:

(1) shall be present at the site of the oil transfer operation and immediately available to the oil transfer personnel;

(2) has readily available a copy of the vessel oil transfer procedures or the facility operations manual, as appropriate at the operations center or central point where transfer operations are controlled and monitored; and

(3) conducts the transfer operation in accordance with the vessel oil transfer procedures or facility operations manual, as appropriate;

(q) the personnel required, under the facility operations manual and the vessel oil transfer procedures, to conduct the oil transfer operation:

(1) are on duty; and

(2) conduct the transfer operation in accordance with the facility's operations manual or vessel's oil transfer procedures, as appropriate;

(r) each person required by paragraph (o) understands and speaks the English language fluently, or engages the services of an interpreter;

(s) the person in charge of oil transfer operations on the transfer unit and the person in charge of oil transfer operations on the receiving unit have held a conference to ensure that each person in charge understands the following details of the transfer operation:

(1) the identity of the product and quantity to be transferred, and availability of a material safety data sheet for the product to be transferred;

(2) the sequence of transfer operations;

(3) the transfer rate;

(4) the name or title and location of each person participating in the transfer operation;

(5) the details of their respective transfer or receiving system and the particulars of the transfer operation;

(6) the critical stages of the transfer operation;

(7) all the federal, state, and local rules that apply to the transfer of oil;

(8) the emergency procedures, which shall include;

(A) acknowledgment that together both units are willing to provide all spill containment resources under each of their control on site;

(B) identification, in writing, of each unit's contracted OSRO;

(C) agreed–upon written emergency shutdown procedures.

(9) the discharge containment procedures;

(10) the discharge reporting procedures;

(11) the watch or shift arrangements;

(12) the transfer shutdown procedures;

(t) the person in charge of oil transfer operations on the transfer unit and the person in charge of oil transfer operations on the receiving unit agree to begin the transfer operation;

(u) To ensure safe operation and early detection of an oil leak, for oil transfer operations between sunset and sunrise, deck lighting shall be provided by the self–propelled vessel that adequately illuminates (as described by 33 CFR 155.790) the following:

(1) each transfer operation work area and each transfer connection point in use on a self–propelled vessel; and

(2) each transfer operation work area and each transfer connection point in use on each barge or small marine fueling facility discharging or receiving oil, unless the barge or small marine fueling facility itself provides adequate illumination.

(3) Where illumination appears to be inadequate, Staff may require verification by instrument of the levels of illumination. On a horizontal plane three feet above the deck or walking surface, illumination must measure at least:

(A) 5.0 foot candles at transfer connection points; and

(B) 1.0 foot candles in oil transfer operation work areas.

(v) appropriate fire fighting equipment is available as required in 46 CFR, Part 34.

(w) in addition to the requirements listed in 33 CFR 154.500(e), all transfer hoses shall have all markings near the two ends in the vicinity of the flanges where they can be easily seen.

(x) all transfer connections shall:

(1) use suitable material in joints and couplings to ensure a leak–free seal;

(2) use a new gasket;

(3) use a bolt in every available hole;

(4) use bolts of the correct size in each bolted connection;

(5) tighten each bolt and nut uniformly and sufficiently to distribute the load to ensure a leak–free seal;

(6) not use any bolt that shows signs of strain or is elongated or deteriorated;

(7) use either:

(A) a bolted or full threaded connection; or

(B) a quick–connected coupling with a means of securing the coupling to prevent accidental release.

(y) the vessel has a fill pipe for which containment can be provided. For vessels less than 250 barrels capacity, an automatic back pressure nozzle can be used.

(z) a written Declaration of Inspection (DOI) which shall include the following, in addition to the requirements of 33 CFR 156.150(c):

(1) identification of each unit's OSRO;

(2) acknowledgment by each unit that their OSRO has been notified in advance;

(3) emergency shut–down procedures;

(4) agreed–upon hand and/or sound signals that initiate and complete the shut–down of the transfer operation.

(5) The Declaration of Inspection shall be filled out and signed by each person in charge and relief person in charge. Each person in charge who is different from the person who originally signed the Declaration of Inspection shall sign the Declaration of Inspection before assuming or re–assuming the duties of a person in charge. Prior to their signing or re–signing the Declaration of Inspection, each person in charge shall inspect the transfer unit or receiving unit, as appropriate, to ensure that the requirements of this subchapter are being maintained;

(aa) a loading plan shall be completed in writing by the receiving unit.

(ab) Transfer operations shall not be started or, if started, shall be discontinued under the following conditions:

(1) during severe weather, electrical storms, or wave conditions;

(2) if a fire occurs on the wharf, on the vessel, on the marine facility, or in the vicinity of the wharf, vessel or marine facility;

(3) any condition that may jeopardize the safety of the transfer;

(4) loss of continuous two–way voice communication.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment of section heading and section filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 843.9. Personnel Work Limitations.

(a) No shoreside person involved in a transfer operation may work more than 16 hours in any 24 hour period, or more than 40 hours in any 72 hour period, except in an emergency.

(b) No vessel person involved in a transfer operation may work more than 15 hours in any 24 hour period, or more than 36 hours in any 72 hour period, except in an emergency.

(c) For purposes of this section, "work" includes any administrative duties associated with the vessel or transfer operation whether performed on board the vessel or onshore.

(d) For purposes of this section, "emergency" is limited to those situations which threaten life, damage to property or have adverse impact on the public health or safety.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 844. Containment and Response Equipment Requirements; Marine Facility and Vessel Oil Transfer Operations.

This section does not apply to small marine fueling facilities. Containment and response equipment requirements for small marine fueling facilities, including mobile transfer units, are addressed in Section 844.3 of this subchapter.

(a) The requirements specified in this section are in addition to those specified in 33 CFR 155 which are incorporated herein by reference.

(b) Containment and Removal of On–Deck Spills.

(1) Transfer units and receiving units must provide appropriate equipment and supplies for the containment, removal and storage of on–deck oil spills of at least seven barrels. Such equipment and supplies must include:

(A) sorbents sufficient to contain seven barrels of oil;

(B) non–sparking hand scoops, shovels, and buckets;

(C) containers suitable for holding seven barrels of recovered waste;

(D) a minimum of 15 gallons of a deck cleaning agent;

(E) appropriate protective clothing to protect personnel from inhalation hazards, eye exposure, and skin contact;

(F) non–sparking portable pump(s) with appropriate hoses; and

(G) the equipment required in this section must remain ready, and pump(s) with appropriate hoses must be ready, for immediate use during transfer operations.

(c) Transfer units, except for small marine fueling facilities, must carry or provide at the point of transfer appropriate equipment and supplies for the containment and removal of both persistent oil, and #1 and #2 grade oil (as defined in Section 841 of this subchapter) spills in water adjacent to the transfer site. Prior to beginning each transfer operation the transfer unit shall provide either one of the following for the duration of the entire transfer operation:

(1) boom deployed so as to enclose the water surface area adjacent to the receiving unit which will provide common containment area for:

(A) either of the following:

1. the entire receiving unit and the point of transfer; or

2. those portions of the receiving unit or seawall from which oil may spill into the water.

(B) where the hull of the transfer unit or seawall is capable of acting as an effective barrier on the side of the receiving unit, the boom on that side may be deployed so that it provides containment between the receiving unit and the transfer unit or seawall.

(C) the boom shall be deployed so that it provides a stand–off of not less than 4 feet from the outboard side of the receiving unit.

(2) sufficient boom, trained personnel and equipment, maintained in a stand–by condition at the point of transfer, such that at least 600 feet of boom, or an amount sufficient to meet the containment requirements in subsection (1), above, whichever is greater, can and will be deployed for the most effective containment immediately, but no longer than 30 minutes, after discovery of a spill.

(d) In addition to the requirements specified in this Subsection (c) above, the owner or operator of a transfer unit shall also identify the equipment, personnel and procedures such that at least an additional 600 feet of boom can and will be deployed. These response resources shall be on–scene and deployed within one hour for the most effective containment in the event of an oil spill.

NOTE: Authority cited: Sections 8670.7, 8670.17, 8670.18 and 8670.28, Government Code. Reference: Sections 8670.2, 8670.14, 8670.25 and 8670.28, Government Code.

HISTORY

1. New article 1.2 and section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Repealer of article heading and amendment of section heading and section filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 844.1. Oil Discharge Cleanup; Marine Facility and Vessel Oil Transfer Operations.

This section does not apply to small marine fueling facilities. Oil discharge cleanup requirements for small marine fueling facilities are addressed in Section 844.4 of this subchapter.

(a) Each person conducting an oil transfer operation shall stop the transfer operation whenever oil from any source is discharged:

(1) in the transfer operation work area and poses a threat of spilling into marine waters; or

(2) into the water or upon the adjoining shoreline in the transfer area.

(b) Except as permitted under paragraph (c) of this section, no person may resume an oil transfer operation after it has been stopped under Subsection (a) of this section, unless:

(1) the source of the spill has been secured;

(2) the oil discharged in the oil transfer operation work area is cleaned up;

(3) the oil discharged into the water or upon the adjoining shoreline is cleaned up; and

(4) both persons in charge agree to resume the oil transfer operation.

(c) The U.S. Coast Guard Captain of the Port may authorize resumption of the oil transfer operation if it is deemed appropriate.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2, 8670.14 and 8670.25, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment of section heading and section filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 844.2. Reporting Requirements; Marine Facility and Vessel Oil Transfer Operations.

This section does not apply to small marine fueling facilities. Reporting requirements for small marine fueling facilities are addressed in Section 844.5 of this subchapter.

(a) An immediate report must be made by the transfer unit to the California Office of Emergency Services in the event any of the following occurs during an oil transfer operation:

(1) a fire, explosion, collision, or grounding;

(2) any similar incident or occurrence which poses a threat to the vessels involved.

(b) The master or person in charge of a vessel shall report any discharge of oil into the water from such vessel.

(c) Notification.

(1) Unless the Staff and the operator agree otherwise, at least four (4) hours, but not more than twenty–four (24) hours, prior to the initiation of any transfer operation, the transfer unit operator shall provide notice of the transfer to the Staff. For oil transfer operations where the transfer unit operator is given less than four (4) hours notice, the operator shall provide the Staff with notice of the transfer as soon as possible after receiving notice of the anticipated transfer, but in any case prior to the initiation of transfer operations.

(2) The notification requirement in Subsection (a) above also applies to oil transfers to or from a marine facility, tank vessel or nontank vessel within a drydock, and oil transfers to or from the drydock.

(3) Notifications shall be made in writing by facsimile machine or other agreed upon means to the Staff.

(4) The notification shall include the following:

a. the location of the transfer;

b. the expected time of arrival of the transfer unit;

c. time anticipated for initiation of the transfer operation;

d. time anticipated for completion of the transfer operation;

e. the names of the transfer unit and receiving unit involved;

f. the type or types of oil and quantity being transferred;

g. the name and 24 hour telephone and facsimile number of the Qualified Individual; and

h. the name of the transfer unit's contracted oil spill response organization(s).

(5) Acknowledgment by the Staff of the notification required by this section is not required to commence operations.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2, 8670.14 and 8670.25.5, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment of section heading and section filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 844.3. Containment and Response Equipment Requirements; Small Marine Fueling Facility Oil Transfer Operations.

(a) The requirements specified in this section are in addition to those specified in 33 CFR 154 which are incorporated herein by reference.

(b) Small marine fueling facilities shall carry on–site appropriate equipment and supplies for the containment and removal of on–deck and on–shore oil spills of at least two barrels. Such equipment and supplies must include:

(1) sorbents sufficient to contain two barrels of oil;

(2) non–sparking hand scoops, shovels, and buckets;

(3) containers suitable for holding two barrels of recovered waste;

(4) a minimum of five gallons of a deck cleaning agent;

(5) appropriate protective clothing to protect personnel from inhalation hazards, eye exposure, and skin contact;

(6) non–sparking portable pumps with appropriate hoses; and

(7) the equipment required in this section must remain ready, and pumps with appropriate hoses must be ready, for immediate use during transfer operations.

(c) Small marine fueling facilities, not including mobile transfer units, must carry or provide at the point of transfer appropriate equipment and supplies for the containment and removal of both persistent oil, and #1 and #2 grade oil (as defined in Section 841 of this subchapter) spills in waters adjacent to the transfer site. Prior to beginning each transfer operation, the small marine fueling facility shall provide either one of the following for the duration of the entire transfer operation:

(1) boom deployed so as to enclose the water surface area adjacent to the vessel which will effectively maintain a common containment and oil entrapment area for:

(A) either of the following:

1. the entire vessel and the point of transfer; or

2. those portions of the vessel and seawall from which oil may spill into the water.

(B) where the hull of the vessel and the face of the dock or seawall are both capable of acting as effective barriers, the boom may be deployed so that it provides containment between the vessel and dock or seawall.

(C) the boom shall be deployed so that it provides a stand–off of not less than four feet from the outboard side of the vessel.

(2) sufficient boom, trained personnel and equipment, maintained in a stand–by condition at the point of transfer, such that at least 600 feet of boom, or an amount sufficient to meet the containment requirements in subsection (1) above, whichever is greater, can and will be deployed for the most effective containment immediately, but no longer than 30 minutes, after discovery of a spill.

(d) In addition to the requirements specified in this Subsection (c) above, the owner or operator of a small marine fueling facility, not including mobile transfer units, shall also identify the equipment, personnel and procedures such that at least an additional 600 feet of boom can and will be deployed. Mobile transfer units shall identify the equipment, personnel and procedures sufficient to contain a two barrel spill. These

response resources shall be on-scene and deployed within one hour for the most effective containment in the event of an oil spill.

NOTE: Authority cited: Sections 8670.7, 8670.17, 8670.18 and 8670.28, Government Code. Reference: Sections 8670.2, 8670.14, 8670.25 and 8670.28, Government Code.

HISTORY

1. New article 1.3 and section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with amendment of section and NOTE and filed 7-12-94 (Register 94, No. 28).
3. Renumbering of former section 844.3 to section 844.6 and new section filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

§ 844.4. Oil Discharge Cleanup; Small Marine Fueling Facility Operations.

(a) Each person conducting an oil transfer operation shall stop the transfer operation whenever oil from any source is discharged:

(1) in the transfer operation work area and poses a threat of spilling into marine waters; or

(2) into the water or upon the adjoining shoreline in the transfer area.

(b) Except as permitted under paragraph (c) of this section, no person may resume an oil transfer operation after it has been stopped under paragraph (a) of this section, unless:

(1) the source of the spill has been secured;

(2) the oil discharged in the oil transfer operation work area is cleaned up;

(3) the oil discharged into the water or upon the adjoining shoreline is cleaned up; and

(4) both persons in charge agree to resume the oil transfer operations.

(c) The U.S. Coast Guard Captain of the Port may authorize resumption of the oil transfer operation if it is deemed appropriate.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Section 8670.2, 8670.14 and 8670.25, Government Code.

HISTORY

1. New section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with amendment of NOTE and filed 7-12-94 (Register 94, No. 28).
3. Renumbering of former section 844.4 to section 844.7 and new section filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

§ 844.5. Reporting Requirements; Small Marine Fueling Facility Operations.

(a) An immediate report must be made by the vessel and the small marine fueling facility to the California Office of Emergency Services, in the event any of the following occurs during an oil transfer operation:

(1) a fire, explosion, collision, or grounding;

(2) any similar incident or occurrence which poses a threat to the vessels or facilities involved.

(b) The master or person in charge of a vessel or small marine fueling facility (including Mobile Transfer Units) shall immediately report any discharge of oil into the water.

(c) Notification: Mobile Transfer Units Only.

(1) Unless the Staff and the operator agree otherwise, at least four hours, but not more than 24 hours, prior to the initiation of any transfer operation, the mobile transfer unit operator shall provide notice of the transfer to the Staff. For mobile transfer unit operations where the operator is given less than four hours notice, the operator shall provide the Staff with notice of the transfer as soon as possible after receiving notice of the anticipated transfer, but in any case prior to the initiation of transfer operations.

(2) Notifications shall be made in person, by telephone or by facsimile machine to the Staff.

(3) The notification shall include the following:

a. the location of the transfer;

b. the expected time of arrival of the unit;

c. time anticipated for initiation of the transfer operation;

d. time anticipated for completion of the transfer operation;

e. the names of the transfer unit or receiving unit involved;

f. the type or types of oil being transferred;

g. the name and 24 hour telephone and facsimile number of the Qualified Individual; and

h. the name of the Mobile Transfer Unit's oil spill response organization(s).

(4) Acknowledgment by the Staff of the notification required by this section is not required to commence operations.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2, 8670.14 and 8670.25.5, Government Code.

HISTORY

1. New section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with amendment of subsections (b)(7), (c)(2), (d) and NOTE and filed 7-12-94 (Register 94, No. 28).
3. Editorial correction of subsection (c) (Register 95, No. 41).
4. Repealer and new section filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

Article 1.2. Additional Requirements for Lightering Operations

§ 844.6. Applicability.

(a) This Article applies to vessels which engage in oil lightering operations where a spill could impact the marine waters of California. Lightering or lightering operation means the transfer of a cargo of oil in bulk from one vessel to another. Lightering includes all phases of the operation from the beginning of mooring activities between the transfer unit and the receiving unit to the departure of the either the transfer unit or the receiving unit. A lightering operation does not include bunkering. These rules are in addition to rules found in Article 1.1 of this subchapter. The requirements of this article shall not apply to a vessel that conducts a lightering operation in an effort to prevent an oil spill or other harm to public safety or the environment.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2, 8670.17 and 8670.18, Government Code.

HISTORY

1. New section filed 2-18-94 as an emergency; operative 2-18-94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6-20-94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2-18-94 order transmitted to OAL 5-27-94 with relocating of subsection (b)(2) to (c) and amendment of NOTE and filed 7-12-94 (Register 94, No. 28).
3. Repealer of former section 844.6 and renumbering of former section 844.3 to section 844.6, including relocation and renumbering of former article 1.3 heading to article 1.2 heading and amendment of article heading and section filed 8-13-2002; operative 9-12-2002 (Register 2002, No. 33).

§ 844.7. General Requirements; Lightering Operations.

(a) No vessel may transfer cargo oil upon marine waters of the State of California where the cargo oil is to be lightered, unless:

(1) the vessel is in compliance with the requirements of this subchapter;

(2) both the receiving unit and the transfer unit have on board at the time of transfer, a valid Certificate of Inspection, Certificate of Compliance, or a Tank Vessel Examination Letter, as would have been required under 46 U.S.C. 3710 or 3711, had the transfer taken place in a port or place subject to the jurisdiction of the United States; and

(3) the receiving unit and transfer unit as required by 33 CFR 151 have on board, at the time of transfer, an International Oil Pollution Prevention (IOPP) Certificate or equivalent documentation of compliance with Annex I of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978. Such documentation is the same as that which required by 33 CFR 151 for vessels in the navigable waters of the United States. The IOPP Certificate or documentation of compliance shall be that prescribed by 33 CFR 151.19 and 33 CFR

151.21, and shall be effective under the same timetable as specified in 33 CFR 151.19.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Repealer of former section 844.7 and renumbering and amendment of former section 844.4 to section 844.7 filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 844.8. Applicability.

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Repealer filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

Article 1.3. Transfer Operations Inspection Program

§ 845. Inspections.

(a) Inspectors may board and inspect any vessel which is conducting, preparing to conduct, or has just finished conducting an oil transfer before either the transfer unit or the receiving unit has departed. The Administrator has the primary responsibility for carrying out the provisions of the Act within the Administrator's jurisdiction.

(b) The Administrator shall designate persons to act in the capacity of inspector for purposes of this article. Such personnel shall be readily identifiable by credentials issued by the Administrator. Credentials issued pursuant to this article shall be carried by the inspector conducting any inspection and made available for viewing upon request from any interested party.

(c) As used in Section 845.2 below, the term Administrator shall also mean any person having the authority to conduct inspections as delegated pursuant to this article.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.18, Government Code.

HISTORY

1. New article 1.5 and section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of subsection (b) and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Renumbering of former article 1.5 to article 1.3 and amendment of subsections (a) and (b) filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 845.1. Compliance with Federal, State and Local Regulations.

All operators involved in transfer operations shall comply with all applicable federal, state, and local pollution prevention regulations, including, but not limited to, the provisions under 33 CFR Parts 154, 155, and 156.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.2 and 8670.14, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

§ 845.2. Inspections and Monitoring.

(a) The Administrator shall carry out an inspection program which shall include the following:

(1) at least once every three years, the Administrator shall conduct a system safety inspection of each vessel engaged in transfer operations in the marine waters of California. Such an inspection shall determine whether the vessel is in compliance with equipment, procedures, and other requirements as specified by this subchapter.

(2) monitoring transfer operations at the transfer site on a continuing, random basis.

(b) Inspectors' Access to Vessels and Records.

(1) Every vessel operator shall provide the Administrator access at any time to any and all policies, guidelines and reports relating to the testing, inspection, maintenance and operation of the vessel, including but not limited to operations manuals and U.S. Coast Guard Inspection Reports.

(2) All vessel operators involved in transfer operations shall ensure that the Administrator has access at any and all times on board any and all vessels engaged in transfer operations. The vessel operator shall provide, at a minimum, SOLAS approved access to board the vessel. Access shall be provided to the Administrator for the purpose of monitoring transfer operations and compliance with regulations of the U.S. Coast Guard and the Administrator with regard to oil pollution prevention during such operations. The Administrator shall have access to any and all

areas of the vessel necessary, as deemed by the inspector, to monitor any and all phases, aspects, and parts of the transfer operations.

(3) Access under paragraphs (1) and (2) shall be provided without warrant or prior notification by the Administrator.

(4) If the Administrator is denied access as specified under this section, all transfer operations at the vessel shall terminate and may not proceed until the earlier of the following occurs:

(A) the Administrator gives approval for transfers to proceed; or

(B) a period of 48 hours has elapsed from the time that the Administrator informed that access was denied. During such 48 hour period the Administrator shall pursue appropriate legal remedies to gain access, or enjoin further oil transfers.

(5) If access as specified under this section is denied, the Administrator shall do all of the following:

(A) provide notification of the denial of access to the U.S. Coast Guard Marine Safety Office having jurisdiction;

(B) provide notification of the denial of access to the State Lands Commission; and

(C) take whatever legal action is necessary to obtain access, including, but not limited to, the following:

1. seeking any orders or other documents necessary or appropriate from a court having proper jurisdiction; or

2. seeking any other orders or documents necessary or appropriate.

(c) In the event of an oil spill, the presence of any of the Administrator's inspectors or any other agent or employee of the Administrator shall in no way relieve or alter any responsibility the operator of a vessel involved in transfer operations may have to report the discharge to the Office of Emergency Services, as required under Government Code Section 8670.25.5, and to comply with all applicable contingency plans and all requirements under the Government Code regarding response to oil spills.

NOTE: Authority cited: Sections 8670.7, 8670.17 and 8670.18, Government Code. Reference: Sections 8670.18 and 8670.25.5, Government Code.

HISTORY

1. New section filed 2–18–94 as an emergency; operative 2–18–94 (Register 94, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–20–94 or emergency language will be repealed by operation of law on the following day.
2. Certificate of Compliance as to 2–18–94 order transmitted to OAL 5–27–94 with amendment of section and NOTE and filed 7–12–94 (Register 94, No. 28).
3. Amendment of subsections (b)(2) and (b)(5)(A) filed 8–13–2002; operative 9–12–2002 (Register 2002, No. 33).

Chapter 4. Vessel Requirements

Subchapter 1. Tank Vessel Escort Program for the San Francisco Bay Region

Article 1.

§ 851. Short Title.

NOTE: Authority cited: Sections 8670.17 and 8670.23, Government Code. Reference: Section 8670.17, Government Code.

HISTORY

1. New chapter 3 (sections 851–851.10) and article 1 filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New chapter 3 (sections 851–851.10) and article 1 refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order including amendment of subchapter heading and repealer of section transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).
4. Change without regulatory effect renumbering former chapter 3 to chapter 4 and amending subchapter 1 heading filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
5. Repealer of article 1 heading filed 11–8–96; operative 1–1–97 (Register 96, No. 45).

§ 851.1. Effective Date of This Subchapter.

This subchapter, as amended, shall be effective on June 9, 2004.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Sections 8670.17.2(b), 8670.23.1(d), (e)(1) and (h), Government Code.

HISTORY

1. New section filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order including amendment of section and NOTE transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).
4. Amendment of section and NOTE filed 8–31–94; operative 9–30–94 (Register 94, No. 35).
5. Amendment of section heading, section and NOTE filed 11–8–96; operative 1–1–97 (Register 96, No. 45).
6. Amendment filed 5–19–2000; operative 6–18–2000 (Register 2000, No. 20).
7. Editorial correction reinstating section as it existed prior to amendments printed in error in Register 2000, No. 20 (Register 2000, No. 42).
8. Amendment filed 9–4–2001; operative 10–4–2001 (Register 2001, No. 36).
9. Change without regulatory effect amending section filed 10–7–2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 41).

§ 851.2. Purpose and Scope.

This subchapter sets forth tank vessel escort requirements for the San Francisco, San Pablo and Suisun Bays. These requirements specify that tank vessels carrying 5,000 or more long tons of oil in bulk as cargo shall be escorted by a suitable escort tug or tugs. The escort tugs will be available, and shall respond as needed to influence the speed and direction of travel of the tank vessel in the event of a casualty, or steering or propulsion failure, thereby reducing the possibility of groundings or collisions and the risk of oil spills from these tank vessels. This subchapter established the criteria for matching tugs to tankers and barges. Tankers will be matched according to a matrix that correlates a tanker's displacement with the braking force of a tug(s). Barges must be matched based on a one–to–one correlation of the deadweight tonnage of the barge to the braking force of the tug(s).

The Administrator shall review the matching criteria and other program elements within two years of the effective date of this subchapter. The program review will include a survey of the tanker–related incidents in U.S. waters to determine the types of failures that have occurred, an assessment of tug technology and any advances made in design and power, and the tug escort–related rules and policies that are implemented by other coastal states and maritime organizations. At the conclusion of the review, the Administrator will determine whether it is necessary to modify the tug/tanker matching criteria or any other provision of the program requirements.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Sections 8670.17.2(b) and 8670.23.1(e)(1), Government Code.

HISTORY

1. New section filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).
4. Amendment of section and NOTE filed 11–8–96; operative 1–1–97 (Register 96, No. 45).

§ 851.3. Definitions.

Definitions governing the construction of this subchapter can be found in Government Code Section 8670.3, and Chapter 1 of this subdivision.

NOTE: Authority cited: Sections 8670.3, 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Sections 8670.3 and 8670.17.2(a), Government Code.

HISTORY

1. New section filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94

or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order including amendment of subsection (i)(1), new subsection (*l*) and subsection relettering transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).
4. Change without regulatory effect repealing and adding new first paragraph, repealing subsections (a)–(j) and (m) and subsection relettering filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
5. Repealer and new section, and amendment of NOTE filed 11–8–96; operative 1–1–97 (Register 96, No. 45).

§ 851.4. Applicability.

(a) This subchapter shall apply to all tank vessels capable of carrying 5,000 or more long tons of oil in bulk as cargo when these vessels are underway on waters in the San Francisco, San Pablo and Suisun Bays, as follows:

(1) tank vessels carrying 5,000 or more long tons of oil as cargo shall be required to comply with all the requirements in this subchapter;

(2) tank vessels carrying less than 5,000 long tons of oil as cargo shall only be required to comply with the reporting requirement as stated in Subsection 851.7

(b) The escort requirements of this subchapter shall not apply to tank vessels that are only shifting location within an anchorage. Any tug used during such a shifting maneuver need not be an escort tug registered with the Clearing House.

(c) This subchapter shall not apply to tank vessels otherwise covered by the requirements of this subchapter in the event of an emergency. The master of the tank vessel shall report to the Clearing House any deviation from the requirements outlined in this subchapter as soon as practicable, and in no case later than the departure of the tank vessel from the marine waters of the state. For purposes of this section, an emergency shall include, but not be limited to, any of the following:

(1) imminent and immediate danger to the vessel, its cargo, or its crew; or

(2) imminent and immediate danger to a marine terminal, or to the escort tug; or

(3) imminent and immediate danger to a vessel in close proximity to the tank vessel; or

(4) any emergency declared by the Captain of the Port.

(d) This subchapter (except for this Subsection 851.4(d)) shall not apply to tankers with double hulls, as that term is defined in 33 CFR 157.03(kk), when the tanker also has the following:

(1) Fully redundant steering and propulsion systems to include:

(A) two independent propulsion systems each with a dedicated propeller, engine (or motor), electrical generation system, electrical system (including the switchboard), fuel system, lube oil system, and any other system required to provide the vessel with independent means of propulsion; and

(B) two independent rudders each with separate steering systems; and

(C) the propulsion and steering components, as described in Subsection (A) and (B) above, shall be arranged in separate spaces, such that a fire or flood in one space will not affect the equivalent system in the other space(s); and

(D) a bow thruster with an assigned power source;

(2) A Navigation System in compliance with the federal navigational equipment requirements set forth in 33 CFR Sections 164.35, 164.37, 164.38(b), 164.40, 164.41, 164.42, and 164.43.

(3) No exemption to this subchapter shall be allowed for a tanker requesting a U.S. Coast Guard Captain of the Port letter of deviation, pursuant to 33 CFR Sections 164.51, 164.53, and 164.55.

(4) The Administrator may require tankers that are exempt from this subchapter under the conditions outlined in Subsection (d) to periodically demonstrate the tanker and crew's ability to maneuver in response to a partial or total loss of propulsion and/or steering at a level of safety at least equal to that of an escorted tanker.

(e) This subchapter shall apply to all tugs being used to escort tank vessels in waters identified as escort zones.

(f) The tank vessel master remains responsible for the safe navigation and maneuvering of the vessel in all circumstances. The requirements outlined in this section are in addition to, and not a limitation of, any other responsibility created by custom, law, or regulation.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1, Government Code. Reference: Section 8670.23.1, Government Code.

HISTORY

1. New section filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order including amendment of subsections (b) and (c), and NOTE transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).
4. Amendment of section and NOTE filed 11–8–96; operative 1–1–97 (Register 96, No. 45).
5. Amendment of subsections (b) and (d) and repealer and new subsections (d)(1)–(4) filed 9–4–2001; operative 10–4–2001 (Register 2001, No. 36).
6. Amendment of NOTE filed 9–15–2006; operative 10–15–2006 (Register 2006, No. 37).

§ 851.5. Escort Zone Requirements.

(a) Six tank vessel escort zones are established as follows:

(1) Zone 1: All waters in the area encompassed by a straight line drawn between Point Bonita Light, through Mile Rocks Light to the shore (the COLREGS Demarcation Line), and eastward to the Golden Gate Bridge;

(2) Zone 2: All waters from the Golden Gate Bridge, south to a line drawn between the southern tip of Bay Farm Island and the southeastern tip of Point San Bruno Peninsula, and north to a line drawn from Point San Pablo to San Pablo Bay Light 4 (Light List number 5880), to San Pablo Bay Channel Light 5 (Light List number 5885), to Point San Pedro;

(3) Zone 3: All waters from the southern end of Zone 2 to one mile north of the San Mateo Bridge;

(4) Zone 4: All waters in the navigable channel from one mile north of and to one mile south of the San Mateo Bridge;

(5) Zone 5: All waters from the eastern boundary of Zone 2 to the western approaches of the Carquinez Bridges at Light 15;

(6) Zone 6: All waters from Light 15, through the Carquinez Strait, north on the Sacramento Ship Channel to one mile beyond the Ryer Island Ferry Terminal and east on the San Joaquin River to one mile beyond the Antioch Bridge;

(b) Tank vessels required to have escorts under this subchapter shall be escorted in the zones as specified below:

(1) Escort tugs are required for tank vessels operating within Zones 1, 2, 4, or 6;

(2) Escort tugs will not be required in Zones 3 or 5, or in areas outside of Zones 1 through 6;

(3) No tank vessel may transit in a zone that requires an escort tug unless escorted by a tug or tugs of sufficient size and capability, as specified in section 851.9 (for tankers) and 851.9.1 (for barges).

(4) In Zone 1, escort tugs shall be stationed as follows:

(A) on an inbound transit, the escort tug shall be in Zone 1 prior to the tank vessel's arrival to the area bounded by an arc eight nautical miles seaward of and centered on Mile Rocks Light; and

(B) on an outbound transit, the escort tug shall remain in Zone 1 until the tank vessel leaves the area bounded by an arc eight nautical miles seaward of and centered on Mile Rocks Light.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Section 8670.17.2(a), Government Code.

HISTORY

1. New section filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).

4. Amendment of section heading, section and NOTE filed 11-8-96; operative 1-1-97 (Register 96, No. 45).

§ 851.5.1. Escort Plans.

(a) All tank vessel masters shall use an Escort Plan for transits through zones 1, 2, 4, or 6. The tank vessel shall not continue or commence a transit through any Escort Zone without an Escort Plan that is complete and adequate. The plan shall document the steps that the tank vessel owner/operator and/or master will take to comply with the requirements of this subchapter. The Escort Plan requirements set forth in this section are only planning standards and may not reflect the exigencies of an actual incident response. However, the Escort Plan must demonstrate that the vessel master is prepared to take the actions necessary to assure a reasonable level of success in providing the protection intended by this subchapter, as stated in section 851.2. The Escort Plan shall include:

(1) the tank vessel's intended route(s);

(2) the intended transit speed(s);

(3) a communication plan, to include the radio frequencies that will be used and any other means of electronic communication;

(4) the following characteristics of the tank vessel:

(A) the location and strength of the bitts and chocks to be used by the escort tugs,

(B) the location of the pushing surfaces on the hull that are strong enough to sustain the forces that can be exerted by the escort tug(s),

(C) the number of crew assigned to escort-related duties,

(D) any pertinent performance characteristics and related limitations of the steering and propulsion system(s);

(5) the escort tugs to be used during the transit as required in section 851.9 (for tankers) or 851.9.1 (for barges);

(6) the response actions that will most likely be implemented in the event of an emergency, taking into account the available bitts and chocks, pushing surfaces, line type, and expected tides and currents.

(b) Escort Plans shall be prepared using one of the following:

(1) a format as designed, completed and submitted by the tank vessel owner/operator; or

(2) a Checklist as recommended by the Harbor Safety Committee of the San Francisco Bay region, and approved by the Administrator. The vessel owner/operator shall assure that the vessel master completes the Checklist according to the requirements in this subchapter.

(c) Review, approval and use of an Escort Plan designed and submitted by the tank vessel owner/operator:

(1) a tank vessel owner/operator may develop an Escort Plan for a vessel or vessels, and submit that plan to the Administrator for review and approval prior to using the plan for escorted transits;

(2) the Escort Plan developed by the vessel owner/operator shall include all the information required in subsection 851.5.1(a). The requirement for information regarding the tug(s) to be used during the transit may be met by stating the size and braking force capacity of the tug(s) needed for each of the vessels covered by the plan.

(3) each plan shall be either approved, approved with conditions, or denied within 60 days after the Administrator receives the plan. Approval, once given, may be revoked if it is found that the plan submitter is not complying with the requirements of this subchapter;

(A) to be approved, the plan must comply with the requirements in this section, must match tug(s) to the tank vessels in accordance with the requirements in this subchapter, and must demonstrate that the tank vessel owner/operator and/or master maintains a level of readiness that will allow for effective implementation of the plan. The plan submitter shall be notified in writing when a plan has been approved.

(B) approval shall be denied or revoked if the plan, or the implementation of the plan, does not comply with the requirements of this subchapter. If a plan is denied or revoked, the Administrator shall notify the owner/operator in writing of the reasons for denial or revocation, and provide an explanation of those actions necessary to secure approval. The Checklist form of escort plan, as prescribed in this section, shall be used unless and until a new or revised escort plan is submitted and approved by the Administrator.

(4) once approved, the master and pilot shall use and comply with the Escort Plan on each escorted transit:

(A) the details of the Escort Plan shall be reviewed and discussed as part of the pre-escort conference (section 851.7);

(B) as part of the pre-escort communications, the pilot or, if there is no pilot on board, the master shall notify the Clearing House that the plan has been reviewed, and shall inform the Clearing House of the tugs that have been chosen for the escort.

(5) the Checklist format, as described in this section, shall be used for all escorted transits unless or until an Escort Plan is submitted by the vessel owner/operator, and approved by the Administrator.

(d) Completion, review and use of Escort Plans prepared using the Checklist format developed by the Harbor Safety Committee:

(1) the Checklist shall include all the items enumerated in subsection 851.5.1(a), as well as a schematic drawing of a tank vessel sufficient to illustrate the location of the bitts and chocks, and those areas on the hull that are capable of withstanding the forces exerted by the escort tug(s). The Administrator shall provide a copy of the approved Checklist to the Clearing House for distribution to tank vessel owner/operators, masters and/or pilots.

(2) the master shall complete the Checklist, and shall verify that all the requisite elements have been included. The master shall sign the Checklist to indicate that, to the best of the master's knowledge, the information on the Checklist is correct, and is in compliance with the requirements of this subchapter. If there is no pilot on board, the master shall notify the Clearing House when the Checklist has been completed and shall inform the Clearing House of the tugs that have been chosen for the escort. The Administrator may request a copy of any Checklist at any time to determine if the planning process has been completed adequately.

(3) the Checklist shall be completed by the tank vessel master at the following points during a transit operation:

(A) for vessels arriving from sea, the Checklist shall be completed prior to entering Zone 1;

1. Alternatively, the agent or owner/operator may complete the Checklist and electronically send the completed form to the master and the Clearing House:

i. before the vessel's estimated time of arrival to the San Francisco Bay Pilotage area, or

ii. before the vessel's arrival at the San Francisco Bay Precautionary Area, or

iii. after the vessel's departure from its last Port of Call.

(B) for in-bay movements or for departures, the Checklist shall be completed prior to beginning the transit.

(4) if a pilot is on board, the pilot shall review the Checklist as cited in subsection 851.5.1(d) and shall verify that all the elements have been completed adequately. The pilot shall sign the Checklist after reviewing and verifying its adequacy. The pilot shall then notify the Clearing House that the planning process has been completed, and shall inform the Clearing House of the tugs that have been chosen for the escort.

(A) the pilot shall determine that the Checklist is adequate if the following are met:

1. all the items on the Checklist have been addressed completely; and

2. the information provided demonstrates that the tank vessel master is prepared to take the actions necessary to assure a reasonable level of success in using the escort tug(s) in response to a vessel casualty.

(B) if the pilot determines that the Checklist is not adequate, the pilot shall notify the Clearing House, and explain the reason(s) for such determination. The Clearing House shall then immediately notify the Administrator that a Checklist has been determined to be inadequate by the pilot.

(C) The Administrator shall review all inadequacy determinations made by a pilot and shall decide whether the determination is appropriate. The Administrator may affirm or overturn such determination, or may provide for conditional approval of a Checklist, as follows:

1. the Checklist will be considered adequate if it is complete, if the tug to tanker match has been done in accordance with this subchapter, and the information provided demonstrates that the tank vessel master is pre-

pared to take the actions necessary to assure a reasonable level of success in using the escort tug(s) in response to a vessel casualty. If a Checklist is determined to be inadequate, the vessel may be ordered to discontinue operations until an adequate Checklist is completed;

2. a Checklist may be approved conditionally if there is a minor deficiency in one or more of the requisite elements. Conditional approval may require that the tank vessel operate under specified precautionary measures (such as operating at a slower speed). If the owner/operator of a tank vessel fails to comply with the requirements of the conditional approval, the Administrator may order the tank vessel to discontinue operations until an acceptable Checklist for that vessel has been completed and approved.

(D) The pilot is not responsible for delaying or stopping the transit solely because of a plan's inadequacy.

(5) The tank vessel owner/operator or the master shall ensure a copy of the completed, signed Checklist is submitted to the Clearing House within 14 days after the transit covered by the Checklist. The master, pilot, ship's agent or vessel owner/operator may send the copy to the Clearing House. A copy of the Checklist shall also be maintained aboard the vessel for a period of one year after the transit. A copy of the Checklist shall be made available to the Administrator upon request.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Sections 8670.17.2(b) and 8670.23.1(e)(1), Government Code.

HISTORY

1. New section filed 11-8-96; operative 1-1-97 (Register 96, No. 45).
2. New subsections (d)(3)(A)1. and (d)(4)(D), and amendment of subsections (d)(4) and (d)(5) filed 5-19-2000; operative 6-18-2000 (Register 2000, No. 20).
3. Editorial correction reinstating section as it existed prior to amendments printed in error in Register 2000, No. 20 (Register 2000, No. 42).
4. New subsections (d)(3)(A)1.-iii., amendment of subsection (d)(4), new subsection (d)(4)(D) and amendment of subsection (d)(5) filed 9-4-2001; operative 10-4-2001 (Register 2001, No. 36).

§ 851.6. Clearing House Responsibilities.

(a) The Administrator shall establish a Clearing House which shall be responsible for performing escort compliance and monitoring duties, to include the following:

(1) monitor, verify, and record the braking force of each escort tug that will be used to comply with this subchapter;

(2) ensure that the braking force measurement is certified by the American Bureau of Shipping (ABS) or by any member in the International Association of Classification Societies;

(A) the braking force measurement shall be monitored by the Clearing House for those escort tugs that are tested in the San Francisco Bay region;

(B) escort tugs may be tested in another port if the braking force measurement is conducted in a manner consistent with the ABS (or equivalent) standards as used by the Clearing House. The tug owner/operator shall register such measurement with the Clearing House, and shall provide verification that the measurement complies with the ABS (or equivalent) standards.

(3) maintain and publish a register which lists the following for each escort tug whose braking force is measured under this section:

(A) the tug's name;

(B) the tug operator;

(C) the length of the tug;

(D) for tractor tugs, bollard pull ahead or astern, or the braking force determined by an alternate compliance model developed in accordance with the requirements of this subchapter;

(E) for conventional tugs, bollard pull astern;

(F) type and configuration of the propulsion system;

(G) type and configuration of the steering system.

(4) receive notification of a tank vessel's arrival and/or movement as required under Section 851.7;

(5) receive notification of the displacement of a tanker, and the tug(s) chosen for an escorted transit. The Clearing House shall use this reported information to determine if the tanker is correctly matched to the escort tug(s) as required in this subchapter, and shall immediately report to the Administrator when such a match has not been done correctly. The verification shall be made prior to the tanker's arrival and/or movement. The Clearing House shall also be responsible for verifying the tug vessel's stability when these tugs are operating westward of the Golden Gate Bridge as specified in Section 851.8(f);

(6) receive notification of the deadweight tonnage of a barge and the tug(s) that have been chosen for the escorted transit. The Clearing House shall use this reported information to determine if the barge is correctly matched to the escort tug(s) as required in this subchapter, and shall immediately report to the Administrator if the match has not been done correctly. The verification shall be made prior to the arrival and/or movement of the barge;

(7) maintain copies of blank Checklists for distribution upon request to tank vessel owner/operators, masters and/or pilots;

(8) receive notification of the completion of an Escort Plan, or the completion and adequacy of a Checklist, and report to the Administrator when a pilot makes a determination that a Checklist is not adequate;

(9) maintain copies of the completed Checklists submitted by the tank vessel owner/operator or masters. Copies must be kept for a period of 3 years from the date of the transit covered by the Checklist. A copy of any Checklist shall be made available to the Administrator upon request;

(10) receive reports from tug owners, operators or agents of any tug casualty that occurs during an escorted transit, and develop and maintain a database of all such casualty reports;

(11) monitor compliance with the requirements of this subchapter and report all violations to both the Office of Spill Prevention and Response and the Harbor Safety Committee for the San Francisco Bay Region.

(b) The Administrator shall ensure that the duties of the Clearing House are performed in an effective and impartial manner. The Administrator may enter into a contract or establish a memorandum of understanding to designate an individual, organization, corporation or agency to operate as the Clearing House.

(c) The Clearing House shall be authorized to assess and collect a fee to cover the costs incurred in complying with the tug escort requirements of this subchapter. The owner/operators of all escort tugs and all tank vessels required to have a tug escort shall pay the fee assessed by the Clearing House.

NOTE: Authority cited: Sections 8670.17.1, 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Sections 8670.17.1 and 8670.23.1(e)(1), Government Code.

HISTORY

1. New section filed 5-6-93 as an emergency; operative 5-6-93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9-3-93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8-16-93 as an emergency; operative 9-4-93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1-3-94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8-16-93 order including amendment of subsection (a)(3) transmitted to OAL 11-30-93 and filed 1-11-94 (Register 94, No. 2).
4. Amendment of section heading, section and NOTE filed 11-8-96; operative 1-1-97 (Register 96, No. 45).
5. Amendment of subsections (a)(5), (a)(7) and (a)(12) filed 5-19-2000; operative 6-18-2000 (Register 2000, No. 20).
6. Editorial correction reinstating section as it existed prior to amendments printed in error in Register 2000, No. 20 (Register 2000, No. 42).
7. Amendment of subsections (a)(2), (a)(3)(D), (a)(5), (a)(7) and (a)(12) filed 9-4-2001; operative 10-4-2001 (Register 2001, No. 36).
8. Amendment of subsection (a)(7), repealer of subsection (a)(10) and subsection renumbering filed 5-10-2004; operative 6-9-2004 (Register 2004, No. 20).

§ 851.7. Communication and Reporting Requirements Before, During and After an Escorted Transit.

(a) No more than one hour prior to entering or transiting the marine waters of the San Francisco, San Pablo or Suisun Bays, the pilot or, if there is no pilot onboard, the master of a tank vessel shall report the vessel's name and position to the Clearing House, and shall report the status of the vessel as follows:

(1) tank vessels carrying 5,000 or more long tons of oil as cargo shall report as "*Escort Required*"; or

(2) tank vessels carrying less than 5,000 long tons of oil as cargo and requiring no escort need not be reported.

(b) After completing the review of the Checklist or the Escort Plan, as specified in section 851.5.1, the pilot or, if there is no pilot onboard, the master of the tank vessel shall report the following to the Clearing House:

(1) a statement that the Escort Planning process has been completed;

(2) if a pilot is onboard, a statement from the pilot as to whether the Checklist is completed, and whether the Checklist is or is not adequate;

(3) a listing of the tugs that were chosen for the escort during the Escort Planning process;

(4) for a tanker, the vessel's displacement;

(5) for a barge, the vessel's deadweight tonnage.

(c) Pre–Escort Conference: Before commencing an escorted transit, the pilot or, if there is no pilot onboard, the master of the tank vessel shall initiate communications with the escort tug(s). During this pre–escort conference, all parties shall plan and discuss the details of the escorted transit as specified on the Checklist or in the Escort Plan, including, but not limited to, the following:

(1) the intended route;

(2) the intended destination;

(3) the speed of the vessel;

(4) the positioning of the escort tug(s) relative to the tank vessel being escorted;

(5) the manner in which an emergency connection would be made between the escort tug and tank vessel;

(6) radio communications, including primary and secondary frequencies; and

(7) anticipated weather and tidal conditions.

(d) The master of the escort tug(s) shall report the name of the tug(s) and the name of the tank vessel to the Clearing House upon arrival at the following locations:

(1) for inbound tank vessel movements; when passing Alcatraz, and when on–station;

(2) for in–bay and outbound tank vessel movements; when on–station at the tank vessel prior to movement of the tank vessel.

(e) At all times during the escorted transit, the master or pilot of the tank vessel shall maintain direct, two–way radio communication with the master or pilot of the escort tug. The radio communication shall be on a channel agreed to by both the master or pilot of the tank vessel and the master or pilot of the escort tug.

(f) Reporting tug casualties during and after an escorted transit:

(1) the master of the escort tug shall immediately notify the master or pilot of the escorted vessel of any casualty that occurs to the tug during the escorted transit. A casualty shall include any loss of main propulsion, primary steering, or any component or system that reduces the maneuverability of the tug, or any other occurrence that adversely affects the tug's ability to perform the escort function;

(2) the tug owner, operator or agent shall file a written casualty report with the Clearing House within 72 hours of occurrence. The Clearing House shall maintain a database of these reports for three years.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Section 8670.23.1(e)(1), Government Code.

HISTORY

1. New section filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).
4. Amendment of section heading, section and NOTE filed 11–8–96; operative 1–1–97 (Register 96, No. 45).
5. Amendment of subsections (a)(2) and (f)(2) filed 5–19–2000; operative 6–18–2000 (Register 2000, No. 20).
6. Editorial correction reinstating section as it existed prior to amendments printed in error in Register 2000, No. 20 (Register 2000, No. 42).
7. Amendment of subsections (a)(2) and (f)(4) filed 9–4–2001; operative 10–4–2001 (Register 2001, No. 36).

§ 851.8. Requirements for Escort Tugs; Braking Force Measurement, Crew and Training Standards, Equipment and Stationing Criteria.

(a) Braking force measurement:

(1) any escort tug used to comply with the requirements of this subchapter must have its braking force verified and registered with the Clearing House, as follows:

(A) for tractor tugs escorting in an ahead position the braking force is measured as the ahead bollard pull;

(B) for tractor tugs escorting in an astern position the braking force is measured as the astern bollard pull;

(C) for conventional tugs the braking force is measured as the astern bollard pull.

(2) The braking force shall be re–measured after any modifications and/or repairs to the main engines, hull, shaft–drive line, or steering, that could affect the bollard pull. The new measurements must be verified and registered with the Clearing House.

(3) The Clearing House shall publish procedures and standards to be followed when conducting braking force measurement. These procedures, entitled "San Francisco Bay Region Clearing House, Rules for Bollard Pull Tests", dated May 19, 2000, are incorporated by reference. These procedures and standards shall be made available upon request to the Clearing House.

(4) Any escort tug used to comply with the requirements of this subchapter shall also meet one of the following:

(A) the escort tug shall have its braking force re–measured within 3 years of its last bollard pull test, or;

(B) the escort tug shall submit to an Escort Tug Inspection Program, as follows:

1. Escort tugs 150 gross tons or greater, and classed escort tugs shall be made available for inspection by the Administrator twice in five years during their dry dock examination. The period between inspections shall not exceed three years.

2. Escort tug maintenance records shall be made available for inspection by the Administrator.

3. If dry dock examination extensions are necessary, escort tugs shall comply with the direction of the cognizant Officer in Charge, Marine Inspection, or American Bureau of Shipping principal surveyors' direction.

4. For classed escort tugs, a copy of the Class Surveyor's report confirming that the condition of the drive train (shafts, propellers, nozzles or other type drive) and main engines are in the same state as when the builder's or last bollard pull certificate was issued, shall be forwarded to the Administrator.

5. Escort tug companies shall participate and have a certificate of compliance from one of the following Management Systems:

i. American Waterways Operators Responsible Carrier Program;

ii. International Safety Management;

iii. ISO 9000 (quality management).

6. Escort tugs of less than 150 gross tons shall be made available for inspection by the Administrator once in five years during their dry dock examination. These escort tugs shall use a certified Marine Surveyor and shall comply with subsections 2, 3, and 4, above.

(C) Escort tugs that submit to the Escort Tug Inspection Program, as described above, can perform escort duties in any port in the state, if the tugs meet the requirements of the appropriate subchapter (i.e., Subchapter 1, San Francisco Bay Region; Subchapter 2, Los Angeles/Long Beach Harbor; Subchapter 3, Port Hueneme Harbor; Subchapter 4, Humboldt Bay; Subchapter 5, San Diego Harbor), of this Chapter 4 of the California Code of Regulations.

(b) Any escort tug used to comply with the requirements of this subchapter, must meet crew standards as follows:

(1) An escort tug shall have a minimum of four persons on board including one certified tug master and two certified deck hands. The fourth person shall be a crew member capable of resolving mechanical difficulties aboard an escort tug in the event of an emergency;

(2) The requirement for four crew members does not preclude additional deck hands who are gaining experience for certification;

(3) The certified deck hands required under this subsection shall at all times be awake, alert and ready to respond during an escorted transit. The fourth person must be immediately available to respond to any mechanical difficulties aboard the escort tug. Immediate response may be assured by an alarm or other signaling device to wake or alert the fourth person to the emergency.

(A) The Administrator may review the equipment and crew on an escort tug to assure compliance with this provision. The Administrator may require that the fourth person be awake and alert and ready to respond if the tug operator does not provide adequate mechanism to assure that the fourth person is immediately available to respond to a mechanical difficulty.

(4) Working hours for escort crew members shall be limited to 15 hours in any 24–hour period, not to exceed 36 hours during any 72–hour period except in an emergency or a drill. Working hours shall include any administrative duties associated with the tug whether performed on board the tug or on shore.

(c) Training requirements for the crew of any escort tug used to comply with the requirements of this subchapter are as follows:

(1) to qualify for certification as the master or deck hand on an escort tug, an applicant must do all of the following:

(A) possess a current and valid U.S. Coast Guard Merchant Mariner's Document;

(B) show proof of at least 960 hours on duty of prior service aboard a tug, at least 240 hours of which must have been in the San Francisco Bay region;

(C) successfully complete an approved education program which covers the following topics:

1. basic tugboat seamanship;
2. line handling skills;
3. communication systems;
4. emergency response to the loss of steering or propulsion on an escorted tank vessel and on the escort tug itself.

(2) in addition to the requirements of subsection 851.8(c)(1), certification as the master of an escort tug requires that the applicant also do the following:

(A) possess a U.S. Coast Guard license appropriate to the escort tug in service; and

(B) show proof of an additional 240 hours on duty of service aboard a tug in the San Francisco Bay region (for a total of 480 of the requisite 960 hours of service); and

(C) successfully complete an approved education program which covers knowledge of local waters, basic seamanship, and the use of the escort tug in reducing the risk of an escorted vessel's grounding or collision.

(3) individuals may be considered to have satisfied certain educational requirements without attending an education program, if they meet the following criteria:

(A) an individual with a U.S. Coast Guard rating of Able Seaman Special (OSV) is considered to have met the educational requirements in subsection 851.8(c)(1)(C) 1 and 2;

(B) an individual with any Coast Guard license appropriate for the escort tug in service is considered to have met the educational requirements in subsections 851.8(c)(1)(C).

(4) the Administrator shall review and approve the educational programs for masters and deck hands of escort tugs, and shall establish and maintain a list of all such approved programs:

(A) an educational program shall be approved if it provides the coursework required by this section, and can adequately train students in the requisite skills;

(B) a request for approval of a program shall be submitted to the Administrator in writing and shall include the following:

1. a description of the course content and materials;
2. the qualifications of the instructors;
3. the estimated cost of the program to the students;
4. a description of the site(s) where the course will be held, both classroom and field locations.

(C) the Administrator shall notify the applicant of approval or denial within 30 days of the submittal of the application:

1. if the educational program is denied, the applicant will be notified of the reasons for denial and may resubmit the program for review after the deficiencies have been remedied;

2. once approved, the educational program must be submitted for re–evaluation at least once every 5 years or when a significant change occurs in the course content or materials. The 5–year re–submittal shall include an updated description of course content, materials, cost, and instructor qualifications, as well as copies of student evaluations from classes conducted during the previous year;

3. the Administrator may audit the course at any time to assure compliance with the requirements of this section.

(5) The Administrator shall assure compliance with tug crew training and qualification requirements. Compliance with crew training and qualification requirements shall be verified as follows:

(A) tug owner/operators shall establish and maintain adequate documentation to verify the training and qualifications of individual crew members, and shall make this information available to the Administrator upon request;

(B) the Administrator may review the owner/operator's documentation annually to assure compliance with this section;

(C) the Administrator may request this documentation at any time.

(d) The following equipment must be onboard an escort tug and in operable condition during all escorted transits:

(1) a line–throwing gun for use in Zone 1, with 300 feet of tag line. The tag line shall be of suitable strength and size for deploying the tow line;

(2) power line–handling equipment fore or aft for rapid, mechanically assisted deployment of lines. The primary line–handling equipment shall be in the position (fore or aft) best suited for the design of the particular tug in escort service;

(3) tow line with a breaking strength that is 2.5 times the certified braking force of the escort tug;

(4) a quick release device to be used when an escort tug is in a tethered mode;

(5) one working radar;

(6) fendering appropriate to absorb impact in skin–to–skin operations, and located at both the bow and stern to act as pivot points when pulling away from the tank vessel. In addition, the fencing must be sufficient to assure that there are no exposed corners, large holes or metal parts which could inflict damage on the escorted vessel, and must cover sufficient surface area to minimize sliding when working at an angle to the tank vessel.

(e) Annual inspection of the escort tug's equipment:

(1) the owner/operator shall assure that the required equipment is on board and operable during all escorted transits;

(2) the Administrator shall verify that the required equipment is on board each escort tug, and in operable condition. This verification may be obtained by an annual inspection which may be announced or unannounced. In conducting such inspections, the Administrator shall be guided by the standards established by the American Waterways Operators (AWO) in their Responsible Carrier Program, Sections III and IV, dated 2/21/95.

(f) Stability requirements for all escort tugs that operate westward of the Golden Gate Bridge are as follows:

(1) an escort tug shall have a load–line certificate; or

(2) an escort tug shall have a letter verifying stability issued by the American Bureau of Shipping or any member in the International Association of Classification Societies. The letter shall establish that the escort tug complies with the stability requirements outlined in federal Load Line Regulations at 46 CFR, Sections 42.09–10(a), 42.09–15(a), (b), and (c) except subparagraphs (1) and (2), and 42.09–25(a) and (b) except for the portion of the last line of (b) that reads "... and meeting applicable requirements in this subchapter"; and 46 CFR Sections 173.090, 173.095 and 174.145. A copy of this letter shall be kept on file with the Clearing House.

(g) Stationing requirements for escort tugs:

(1) an escort tug shall not simultaneously engage in the escort of more than one tank vessel;

(2) escort tugs shall maintain a station–keeping distance of no more than 1000 feet ahead or aside, or 500 feet astern of the tank vessel while engaged in escort activity;

(3) escort tugs shall standby as the tank vessel transits Zones 3 and/or 5, as follows:

(A) the escort tug(s) shall standby in Zone 2 or 6 as the tank vessel transits Zone 5; and

(B) the escort tug(s) shall standby in Zone 2 or 4 as the tank vessel transits Zone 3; or

(C) the escort tug(s) may accompany the escorted tank vessel through Zone 3 and/or 5 in lieu of standing by.

(4) in Zone 1, the escort tug(s) shall be stationed as follows:

(A) on an inbound transit, the escort tug shall be in Zone 1 prior to the tank vessel's arrival to the area bounded by an arc eight nautical miles seaward of and centered on Mile Rocks Light; and

(B) on an outbound transit, the escort tug shall remain in Zone 1 until the tank vessel leaves the area bounded by an arc eight nautical miles seaward of and centered on Mile Rocks Light.

(h) Escort transit log:

(1) escort tug masters shall keep a record in the ship's log of every escorted transit;

(2) the record of the escorted transit in the ship's log shall include information regarding the sequence of events during the transit, the crew assignments, any casualties that may occur, and any drills conducted.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1, Government Code. Reference: Section 8670.23.1, Government Code.

HISTORY

1. New section filed 5–6–93 as an emergency; operative 5–6–93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9–3–93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8–16–93 as an emergency; operative 9–4–93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1–3–94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8–16–93 order including amendment of subsections (b)(1), (2) and (4) transmitted to OAL 11–30–93 and filed 1–11–94 (Register 94, No. 2).
4. Amendment of section heading, section and NOTE filed 11–8–96; operative 1–1–97 (Register 96, No. 45).
5. Amendment filed 5–19–2000; operative 6–18–2000 (Register 2000, No. 20).
6. Editorial correction reinstating section as it existed prior to amendments printed in error in Register 2000, No. 20 (Register 2000, No. 42).
7. Amendment filed 9–4–2001; operative 10–4–2001 (Register 2001, No. 36).
8. Amendment of subsection (a)(2), new subsections (a)(4)–(a)(4)(C) and amendment of NOTE filed 9–15–2006; operative 10–15–2006 (Register 2006, No. 37).

§ 851.9. Tanker and Tug Matching Criteria, and Tanker Crew and Equipment Requirements.

(a) Default Matrix Option for Matching Tugs to Tankers: The tug or tugs used for an escorted transit shall be able to provide sufficient braking force to stop the escorted tanker from a speed of 5 knots through the water. The braking force of the tug(s) shall match the tanker's displacement, as indicated in the following matrix:

	Zones 1 and 2					*Zones 4 and 6*				
Assisting Current	slack	1 kt	2 kts	3 kts	4 kts	slack	1 kt	2 kts	3 kts	4 kts
Displacement*	Braking Force in kips (1,000 pounds of force)									
0 to < 20	20	20	30	40	40	40	50	70	90	110
20 to < 30	20	30	40	50	60	50	70	90	120	160
30 to < 40	30	40	50	60	70	60	90	120	160	210
40 to < 50	30	40	60	70	90	70	110	150	200	250
50 to < 60	40	60	70	90	110	100	140	190	250	320
60 to < 80	50	70	90	120	140	120	180	250	330	420
80 to < 100	60	80	110	140	180	150	220	300	400	520
100 to < 120	70	100	130	170	210	180	270	370	500	650
120 to < 140	80	110	150	190	240	210	310	430	580	760
140 to < 160	90	140	190	240	310	240	350	490	660	860
160 to < 180	100	150	210	270	350	260	390	550	740	970
180 to < 200	110	170	230	300	390	**	**	**	**	**
200 to < 220	120	180	250	330	420	**	**	**	**	**

* 1,000 long tons

** The channel depth in zones 4 and 6 limits vessels that may use the channel to those drawing less than 35 feet. This table does not address vessels in zones 4 and 6 with a displacement greater than 180,000 long tons because such vessels would draw more than 35 feet and would thus not be allowed into these zones.

(1) Applicable current velocity: The current velocities shall be determined using the published tide and current tables developed and maintained by NOAA, and used by the pilots. The current velocity used shall be the one published for the estimated time of arrival at the points noted below. The estimated time of arrival shall include a window of 30 minutes before and after the scheduled arrival to account of possible delays or changes. Tank vessel operators are responsible for adjusting the estimated arrival time when it appears that it will fall outside of the originally estimated one hour window.

(2) Location of current readings: The specific current velocity to be used in conjunction with the matrix shall be the published readings for the following locations:

(A) The Golden Gate Bridge – the predicted current velocity at the Golden Gate Bridge shall apply to vessels in zones 1 and 2 that are west of a north–south line drawn through the eastern tip of Alcatraz Island and terminating at Angel Island or to vessels in zones 1 and 2 that are west of the eastern entrance to Racoon Strait.

(B) The Bay Bridge; west of Yerba Buena Island – the predicted current velocity at the Bay Bridge shall apply to vessels in zone 2 that are south of an arc drawn from Alcatraz Island east to Treasure Island and east of the north–south line drawn through Alcatraz Island.

(C) 1.25 miles north of Point Chauncey – The predicted current velocity at 1.25 miles north of Pt. Chauncey shall apply to vessels in zone 2 that are north of an arc with a radius of 2.7 nautical miles centered at the intersection of the Bay Bridge and the San Francisco Peninsula drawn from Alcatraz Island east to Treasure Island and east of the north–south line drawn through the eastern tip of Alcatraz Island.

(D) The San Mateo Bridge The predicted current velocity at the San Mateo Bridge shall apply to vessels while in zone 4.

(E) The Carquinez Bridge – the predicted current velocity in Carquinez Strait shall apply to vessels in zone 6.

How to use the Default Matrix Option for Matching Tugs to Tankers: The matrix provides current velocities for slack water, 1, 2, 3, and 4 knots. The slack water column shall be used only when the water is truly slack. The 1 knot column shall be used for any velocity above 0 and equal to 1. The 2 knot column shall be used for any velocity above 1 and equal to 2, and so on up to the 4 knot maximum.

In those situations where the current velocity is above 4 knots, such as may occur at the Golden Gate, the tank vessel requiring an escort tug shall reschedule the transit to a time when the current velocity drops to 4 knots or below.

(b) Alternative To The Default Matrix for Matching Tugs to Tankers: Measurement methodologies other than those used to establish the Default Matrix may be used instead of, or in addition to, the Matrix as follows:

(1) Alternate Compliance Model for Escort Tugs: Tug owner/operators may propose an alternate method for measuring the braking force of any tug (in kips). Such alternate method may be used to demonstrate that the tug can provide higher steering or braking forces (in kips) than the simple bollard pull measurement would indicate. An alternate measurement may only be submitted once in any 12 month period and shall comply with the following:

(A) the owner/operator shall assure that the following are included when developing a methodology for calculating an alternate braking force for a given escort tug:

1. the alternate measurement is conducted from a starting speed of 10 knots for zones 1 and 2, and 8 knots for zone 4 and 6;

2. the escort tug is not required to exceed the limits of its ability to generate the forces, and in no instance submerges the deck edge to achieve the alternate measurement;

3. the escort tug operates all its equipment at or below the manufacturer's recommended guidelines for the safe working load of the tug;

4. unless demonstrated otherwise by full scale testing, all machinery shall be assumed to operate at or below performance levels published by the manufacturer;

5. any current bollard pull values registered with the Clearing House shall be utilized where appropriate in any formulas or models;

6. any known condition that would impair the escort tug's ability to perform shall be included in the calculation.

(B) the measurement must be conducted by a marine architect or engineer approved by the Administrator:

1. the tug owner/operator shall submit the name of the marine architect or engineer to the Administrator for approval prior to having that individual or his/her company conduct an alternate measurement.

2. the Administrator shall approve a marine architect or engineer if that person has demonstrated the education, knowledge and experience necessary to conduct the testing and modeling of tug capabilities and braking force.

(C) the alternate model and the resultant measurement shall be approved by the Administrator before the alternate model may be used to match a tanker to a tug or tugs. The Administrator shall approve the alternate model if it provides both of the following:

1. a higher force (in kips) than the simple bollard pull measurement would indicate; and

2. at least the same level of protection as the braking forces established in the default matrix.

(D) after an alternate model is approved, the Administrator shall provide the Clearing House with the new braking force measurement for the subject tug(s). The new measurements shall be used with the Default Matrix established in this section.

(2) Alternate Compliance Model for Tankers: Tanker owner/operators may develop a model for the vessels in their fleet relative to the steering and braking demands of the vessels, and the braking capabilities of tugs. The steering and braking demands established by the alternate model may be used instead of the Default Matrix to match escort tugs to the tankers. An alternate compliance model may only be submitted once in any 12–month period and shall comply with the following:

(A) the measurement must be conducted by a marine architect or engineer approved by the Administrator. The tanker owner/operator shall submit the name of the marine architect or engineer to the Administrator for approval prior to having that individual or his/her company conduct an alternate model:

1. the Administrator shall approve a marine architect or engineer if that person has demonstrated the education, knowledge and experience necessary to conduct the testing and modeling of tug capabilities and braking force.

(B) the alternate model and the resultant measurements shall be approved by the Administrator before the alternate model may be used to match a tanker to a tug or tugs. The Administrator shall approve the alternate model if the following conditions are met:

1. under the alternate model the tanker can complete a safe transit, staying within the 95th percentile of constraint as established in "The San Francisco Bay Tanker Escort Study," dated 7/95, prepared by Glosten Associates; and

2. the alternate model provides at least the same level of protection as the braking forces established in the Default Matrix, and can be achieved using no more than three tugs as required in subsection 851.9(d).

(C) After an alternate model is approved, the Administrator shall provide the Clearing House with the tanker in kips which corresponds to the tanker's displacement and speed under the approved alternate model.

(c) The Administrator may allow deviations from compliance for the matching of tugs to laden tankers when these vessels make short transits from the berth to berth within a zone and are assisted by docking tugs and transiting at speeds less than 8 knots.

(1) The tanker master or owner/operator shall make a request for such deviations to the Administrator through the Clearing House at least 24 hours prior to the desired shift.

(2) The Administrator shall approve or deny the deviation request by verbally notifying the Clearing House within 12 hours of the request. A written confirmation shall follow within 24 hours.

(d) Maximum number of tugs to be used during an escorted transit:

(1) the tanker must be accompanied by a sufficient number, but no more than three tugs to provide the braking forces specified in this section;

(e) Speed limits for tankers are as follows:

(1) tankers that use the Default Matrix as provided in this section shall not proceed at a speed in excess of 10 knots through the water in Zones 1, 2, 3 and 5, nor more than 8 knots through the water in Zones 4 and 6, with the following qualifications:

(A) the speed or speeds selected by the tanker for the transit must permit stationing the escort tug(s) to allow the tug(s) to effectively influence the tanker's movement in the event of a casualty;

(B) the tanker shall proceed at a safe speed. The determination of a safe speed shall include, but not be limited to:

1. environmental factors such as the depth of the water, visibility, wind conditions, and the speed of the tidal currents; and

2. proximity of other vessel traffic and any other vessels at anchor.

(C) Tankers shall in any case have their engines ready for immediate maneuver and shall not operate in any control modes or with fuels that prevent an immediate response to an engine order.

(2) tank vessels may be exempt from the speed limits specified in subsection 851.9(e)(1) if they establish and use an approved alternate compliance model for determining the steering and braking demands of their vessels, as provided in this section. In such cases, the speed limit will be that used to establish the alternate compliance model, and must be specified in the Escort Plan, or on the Checklist.

(f) Crew requirements:

(2) the tanker shall comply with all applicable federal regulations relating to anchor readiness;

(3) tankers shall have sufficient and qualified supervisors to provide direct supervision of line-handling crew operations. Supervisors shall have direct radio communication capability with the bridge of the tanker.

(g) Equipment requirements:

(1) each tanker shall have deck chocks and bitts that are of sufficient size, strength, and number to accommodate the anticipated braking force of the escort tug(s);

(2) the tanker owner/operator shall indicate the location and strength of the bitts and chocks in the Escort Plan for each vessel.

HISTORY

1. New section filed 5-6-93 as an emergency; operative 5-6-93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9-3-93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8-16-93 as an emergency; operative 9-4-93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1-3-94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8-16-93 order including amendment of subsections (d)-(f) transmitted to OAL 11-30-93 and filed 1-11-94 (Register 94, No. 2).
4. Repealer and new section filed 11-8-96; operative 1-1-97 (Register 96, No. 45).
5. New subsections (a)(1) and (a)(2), repealer of subsections (c)(1) and (c)(2), and new subsections (c)-(c)(2) filed 5-19-2000; operative 6-18-2000 (Register 2000, No. 20).
6. Editorial correction reinstating section as it existed prior to amendments printed in error in Register 2000, No. 20 (Register 2000, No. 42).
7. Amendment filed 9-4-2001; operative 10-4-2001 (Register 2001, No. 36).

§ 851.9.1. Barge and Tug Matching Criteria, and Barge Crew and Equipment Requirements.

(a) A barge must be accompanied by a sufficient number, but no more than three tugs to provide the braking force specified in this section:

(1) the line-haul tug which provides the power to push or tow a barge shall not become an escort tug during the course of a transit unless the line-haul tug has been relieved of its duties as the primary towing vessel, and replaced with another tug that serves as primary towing vessel,

(2) any line-haul tug that does become the escort tug after being relieved of all line-haul duties, must meet all the requirements for escort tugs as specified in this subchapter.

(b) The tug or tugs used to escort a barge must be able to provide sufficient braking force to stop the barge, measured as follows:

(1) the braking force shall be measured as the escort tug's astern static bollard pull;

(2) the escort tug shall have total astern static bollard pull in pounds equal to, not less than, the barge's deadweight tonnage;

(c) A barge shall not exceed 8 knots through the water during an escorted transit.

(d) Crew Requirements:

(1) A barge shall have sufficient and qualified line-handling-capable deck hands onboard the barge, standing by and available to receive lines from each escort tug;

(A) the deck hands for the barge shall be made available from the line-haul tug;

(B) in the interest of crew safety, when entering or leaving Zone 2 bound to or from the sea (Golden Gate Bridge), crew transfers to or from the barge may be made in the vicinity of Alcatraz Island;

(C) when a barge is fitted with an emergency tow wire, or comparable mechanical device of sufficient strength and handling characteristics to control the barge, or the escort tug is made fast to the barge, deck hands shall not be required on board the barge.

(2) Barges shall have sufficient and qualified supervisors to provide direct supervision of line-handling crew operations. Supervisors shall have direct radio communication capability with the bridge of the tug that is towing the barge.

(e) Equipment requirements:

(1) each barge shall have deck chocks and bitts that are of sufficient size, strength and number to accommodate the anticipated braking force of the escort tug(s);

(2) the barge owner/operator shall indicate the location and strength of the bitts and chocks in the Escort Plan for each vessel or on the Checklist for each transit.

HISTORY

1. New section filed 11-8-96; operative 1-1-97 (Register 96, No. 45).
2. Amendment of subsection (a)(1) filed 5-19-2000; operative 6-18-2000 (Register 2000, No. 20).
3. Editorial correction reinstating section as it existed prior to amendments printed in error in Register 2000, No. 20 (Register 2000, No. 42).
4. Amendment of subsection (a)(1) filed 9-4-2001; operative 10-4-2001 (Register 2001, No. 36).

§ 851.10. Penalties.

Any person who knowingly, intentionally or negligently violates any provision of this subchapter shall be subject to criminal, civil, and/or administrative civil actions as prescribed in Article 9, Government Code, beginning with Section 8670.57.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1, Government Code. Reference: Sections 8670.23.1 and 8670.57-8670.69.6, Government Code.

HISTORY

1. New section filed 5-6-93 as an emergency; operative 5-6-93 (Register 93, No. 19). A Certificate of Compliance must be transmitted to OAL 9-3-93 or emergency language will be repealed by operation of law on the following day.
2. New section refiled 8-16-93 as an emergency; operative 9-4-93 (Register 93, No. 34). A Certificate of Compliance must be transmitted to OAL by 1-3-94 or emergency language will be repealed by operation of law on the following day.
3. Certificate of Compliance as to 8-16-93 order transmitted to OAL 11-30-93 and filed 1-11-94 (Register 94, No. 2).
4. Amendment of section and NOTE filed 11-8-96; operative 1-1-97 (Register 96, No. 45).
5. Amendment of NOTE filed 9-15-2006; operative 10-15-2006 (Register 2006, No. 37).

§ 851.10.1. Requests for Redetermination.

The owner/operator of a tank vessel or an escort tug may request redetermination of an action taken relative to an inadequacy decision or conditional approval of an Escort Plan or Checklist, denial or revocation of approval of an educational program, or application for use of an alternative compliance model. A request for redetermination must be submitted in writing and shall be processed as follows:

(a) the request must be submitted to the Administrator within 15 calendar days from the date of the decision being disputed;

(b) the request must contain the basis for the redetermination and, if available, provide evidence which rebuts the basis for the decision;

(c) within 15 calendar days following the receipt of the request for redetermination, a notice shall be sent indicating that the Administrator shall adhere to the earlier decision or that the decision has been modified or rescinded.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1, Government Code. Reference: Sections 8670.23.1 and 8670.57-8670.69.6, Government Code.

HISTORY

1. New section filed 11-8-96; operative 1-1-97 (Register 96, No. 45).
2. Amendment of NOTE filed 9-15-2006; operative 10-15-2006 (Register 2006, No. 37).

Subchapter 2. Tank Vessel Escort Program for the Los Angeles/Long Beach Harbor

§ 851.20. Purpose and Scope.

This subchapter sets forth tank vessel escort requirements for tank vessels underway in the Los Angeles/Long Beach Harbor and their approaches. These requirements specify that tank vessels carrying 5,000 or more long tons of oil in bulk as cargo shall be escorted by a suitable escort tug or tugs. When required, the escort tug(s) shall take action under the direction of the tank vessel master or pilot, to influence the speed and direction of travel of the tank vessels in the event of a casualty, steering or

propulsion failure, thereby reducing the possibility of groundings or collisions and the risk of an oil spill from these tank vessels.

This subchapter establishes the criteria for matching tugs to tankers and barges. Tankers will be matched according to a matrix that correlates a tanker's displacement with the braking force of a tug(s). Barges less than 20,000 displacement tons shall be matched based on the aggregate displacement tonnage of both the primary towing vessel and the tank barge. Barges with a displacement tonnage greater than 20,000 require a tethered escort and a one–to–one correlation between the sum of the total displacement tonnage of the primary towing vessel and its barge, and the escort tug(s).

The Administrator shall review the matching criteria, other program elements and enforcement mechanisms within three years of August 15, 2001. The program review will include a survey of the tank vessel–related incidents in U.S. waters to determine the type of failures that have occurred, an assessment of tug technology and any advances made in design and power, and the tug escort–related rules and policies that are implemented by other coastal states and maritime organizations, and any changes to bathymetry in the Harbor. At the conclusion of the review, the Administrator will determine whether it is necessary to modify the tug/tank vessel matching criteria or any other provision of the program requirements.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New subchapter 2 and section filed 7–28–94; operative 8–29–94 (Register 94, No. 30).
2. Change without regulatory effect amending subchapter 2 heading filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Amendment of subchapter 2 heading, section and NOTE filed 8–19–98; operative 9–18–98 (Register 98, No. 34).
4. Amendment filed 7–16–2001; operative 8–15–2001 (Register 2001, No. 29).

§ 851.21. Definitions.

Definitions governing the construction of this subchapter can be found in Government Code Section 8670.3, and Chapter 1 of this subdivision.

NOTE: Authority cited: Sections 8670.3, 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 7–28–94; operative 8–29–94 (Register 94, No. 30).
2. Change without regulatory effect amending section filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Amendment of section and NOTE filed 8–19–98; operative 9–18–98 (Register 98, No. 34).
4. Repealer and new section filed 7–16–2001; operative 8–15–2001 (Register 2001, No. 29).

§ 851.22. Applicability.

(a) This subchapter shall apply to all laden tank vessels when they are:

(1) Inbound from the seaward limits of the pilot operating areas to anywhere inside the Federal Breakwater;

(2) transiting anywhere inside the Federal Breakwater (from dock to anchor, anchor to dock and shifting between docks); and/or

(3) outbound from dock or anchor to the Federal Breakwater.

(b) This subchapter shall apply to all escort tugs being used to escort tank vessels during transits described in subsection (a), above.

(c) This subchapter (except for this Subsection (c)) shall not apply to tankers with double hulls, as that term is defined in 33 CFR 157.03, when the tanker also has fully redundant steering and propulsion systems; as well as integrated navigation systems to minimally include:

(1) Redundant propulsion and steering systems:

(A) two independent propellers each with a dedicated engine (or motor), propulsion system (electrical generation system) electrical system (including the switchboard), fuel system, lube oil system; and any other system required to provide the vessel with independent means of propulsion; and

(B) two independent rudders each with separate steering systems; and

(C) the propulsion and steering components, as described in subsections (A) and (B), above, shall be arranged in separate spaces, such that a fire or flood in one space will not affect the equivalent system in other space(s);

(D) a bow thruster with an assigned power source.

(2) A navigation system in compliance with the federal navigational equipment requirements set forth in 33 CFR Sections 164.35, 164.37, 164.38(b), 164.40, 164.41, 164.42, and 164.43.

(3) No exemption to this subchapter shall be allowed for a tanker requesting a U.S. Coast Guard Captain of the Port letter of deviation, pursuant to 33 CFR Sections 164.51, 164.53, and 164.55.

(4) The Administrator may require tankers that are exempt from this subchapter under the conditions outlined in Subsection (c) above to periodically demonstrate the tanker and crew's ability to maneuver in response to a partial or total loss of propulsion and/or steering at a level of safety at least equal to that of an escorted tanker.

(d) This subchapter shall not apply to purely dedicated response vessels.

(e) Consistent with Section 851.26(e) of this subchapter, nothing in these regulations shall prohibit the master or pilot from taking any action necessary to avoid:

(1) a collision or grounding; and/or

(2) damage to the tank vessel or escort tug and/or its crew and/or cargo.

(f) The requirements outlined in this section are in addition to, and not a limitation of, any other responsibility created by custom, law, or regulation. The tank vessel master remains responsible for the safe navigation and maneuvering of the tank vessel in all circumstances.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code; 33 USC 2002(b) and 2007; and 33 CFR 157.03.

HISTORY

1. New section filed 7–28–94; operative 8–29–94 (Register 94, No. 30).
2. Amendment of section and NOTE filed 8–19–98; operative 9–18–98 (Register 98, No. 34).
3. Repealer of subsection (c) and new subsections (c)–(c)(4) filed 7–16–2001; operative 8–15–2001 (Register 2001, No. 29).

§ 851.23. Requirements for Escort Tugs; Bollard Pull Testing and Certification, Equipment Requirements, Crew and Training Standards.

(a) Bollard Pull Testing Requirements.

(1) All escort tugs in the Los Angeles/Long Beach Harbor used for escorting tank vessels, shall have their static bollard pull (ahead and astern) measured for determining their forces in kips.

(2) Static bollard pull measurements shall be verified by a member of IACS, and in accordance with the following standards:

(A) The measurement shall be taken with the escort tug's trim and/or displacement corresponding to applicable loadline requirements or letter of stability.

(B) Auxiliary equipment (such as pumps and generators) which is driven from the main engine(s) or propeller shaft(s) in normal operation of the escort tug shall be connected during the measurement process.

(C) All bollard pull measurements shall be derived solely on the basis of the escort tug's capabilities. No outside assistance shall be allowed.

(D) The propeller(s) blades fitted during the measurement shall be the same as those used when the escort tug is in normal operation.

(E) Water depth shall be a minimum of 45 feet (not underwater clearance).

(F) Water current shall not exceed 1.0 knot.

(G) Wind velocity shall not exceed 10 knots.

1. Measurements of water current and wind velocity shall be provided to the classification society surveyor by the escort tug owner's representative.

(H) Towline length shall be a minimum of 300 feet.

(I) The strain cell used for the measurements shall have been calibrated within the past 12 months. The classification surveyor shall verify this fact. The accuracy of the strain cell shall be +/–2% within a temperature range of –40° and 104°F.

(J) Instruments providing both a continuous read–out and the bollard pull graphically as a function of the time, shall be connected to the strain cell.

(K) The surveyor for the classification society shall:

1. be aboard the escort tug during the measurement process to verify that the bollard pull report is correct;

2. determine the escort tug's static bollard pull capacity by averaging the forces recorded (without any significant tendency of decline) for a period of at least 15 minutes while maintaining a fixed reading with the engine(s) operating at the manufacturer's recommended continuous output;

3. sign the completed "BOLLARD PULL REPORT" of the Los Angeles/Long Beach Harbor Safety Committee; and

4. sign and issue a "BOLLARD PULL CERTIFICATE".

(3) Escort tug companies shall provide the Los Angeles/Long Beach Harbor Safety Committee with the results of the static bollard pull measurements taken pursuant to the provisions of this subchapter.

(4) Results of any and all static bollard pull measurements shall be inventoried and published by the Marine Exchange.

(5) Escort tugs which do not have current bollard pull certifications on file with the Marine Exchange and the Harbor Safety Committee or which do not meet the requirements for alternative compliance for bollard pull measurements, cannot be used for the escort of tank vessels in the Los Angeles/Long Beach Harbor.

(6) The braking force shall be re–measured after any modifications and/or repairs to the main engines, hull, shaft–drive line, or steering, that could affect bollard pull. The new measurements must be reported to the Los Angeles/Long Beach Harbor Safety Committee and on file with the Marine Exchange.

(7) Any escort tug used to comply with the requirements of this subchapter shall also meet one of the following:

(A) the escort tug shall have its braking force re–measured within 3 years of its last bollard pull test, or;

(B) the escort tug shall submit to an Escort Tug Inspection Program, as follows:

1. Escort tugs 150 gross tons or greater, and classed escort tugs shall be made available for inspection by the Administrator twice in five years during their dry dock examination. The period between inspections shall not exceed three years.

2. Escort tug maintenance records shall be made available for inspection by the Administrator.

3. If dry dock examination extensions are necessary, escort tugs shall comply with the direction of the cognizant Officer in Charge, Marine Inspection, or American Bureau of Shipping principal surveyors' direction.

4. For classed escort tugs, a copy of the Class Surveyor's report confirming that the condition of the drive train (shafts, propellers, nozzles or other type drive) and main engines are in the same state as when the builder's or last bollard pull certificate was issued, shall be forwarded to the Administrator.

5. Escort tug companies shall participate and have a certificate of compliance from one of the following Management Systems:

i. American Waterways Operators Responsible Carrier Program;

ii. International Safety Management;

iii. ISO 9000 (quality management).

6. Escort tugs of less than 150 gross tons shall be made available for inspection by the Administrator once in five years during their dry dock examination. These escort tugs shall use a certified Marine Surveyor and shall comply with subsections 2, 3, and 4, above.

(C) Escort tugs that submit to the Escort Tug Inspection Program, as described above, can perform escort duties in any port in the state, if the tugs meet the requirements of the appropriate subchapter (i.e., Subchapter 1, San Francisco Bay Region; Subchapter 2, Los Angeles/Long Beach Harbor; Subchapter 3, Port Hueneme Harbor; Subchapter 4, Humboldt Bay; Subchapter 5, San Diego Harbor), of this Chapter 4 of the California Code of Regulations.

(b) Equipment Requirements for Escort Tugs.

All escort tugs used to escort tank vessels shall be equipped with and shall maintain in good working order:

(1) primary and secondary VHF radios; and

(2) fendering appropriate to absorb the impact inherent in hull–to–hull operations; and

(3) power line handling equipment fore and aft to mechanically assist in the deployment and/or retrieval of tow lines.

(A) Tow lines provided by tank vessels and/or escort tugs shall:

1. be maintained in sufficient number, length, condition and strength to assure effective control of the intended vessel maneuver, based on weather conditions, the tank vessel's size, and the escort tug's certified static bollard pull or alternative model forces;

2. have a certified strength of at least 1.5 times the escort tug's certified static bollard pull or the alternative model forces found in Section 851.29 of this subchapter.

(c) Any escort tugs used to comply with the requirements of this subchapter shall meet crew standards as follows:

(1) Federal regulations regarding hours of work apply to licensed and unlicensed crew members. According to these regulations, working hours shall include any administrative duties associated with the tug whether underway or at the dock. Hours of rest shall be in accordance with Part A, Chapter 8, Section A–VIII/1, paragraphs 1–4, of the International Convention on Standards of Training, Certification, and Watchkeeping for Seafarers, 1978, as amended in 95 (STCW) standard, which is incorporated by reference.

(2) An escort tug, during escort and assist operations required by this subchapter, shall have a minimum of three crewmembers on board ready to respond at the tug master's discretion during an escort transit. At least one crewmember shall be capable of resolving mechanical difficulties aboard an escort tug in the event of an emergency.

(3) The Administrator may review the equipment and crew on an escort tug to assure compliance with this subsection.

(d) Training requirements for the crew of any escort tug used to comply with the requirements of this subchapter shall include, but are not limited to:

(1) In addition to demonstrable skills that satisfy federal requirements (46 CFR, Section 10.464) for towing vessel licensure, the following training elements are required (with refresher training every 5 years):

(A) Masters/Mates:

*1. Bridge management training;

*2. Radar training;

3. Navigation/boat handling training or proficiency evaluation, including Rules of the Road refresher training;

4. Company policy and procedure orientation, including review of international, federal and state requirements;

*5. Marine firefighting/fire prevention;

*6. Personal safety, including:

i. First aid and CPR certification;

ii. Confined space hazard awareness;

iii. Injury prevention;

iv. Cargo knowledge/hazard awareness.

*7. Responsibility and authority of master including supervisory skills training;

*8. Currency of knowledge, as required by federal law (46 CFR 15.812) to serve as pilot on non–self propelled tank vessels;

*9. Knowledge of local geography:

i. Terminal location and approaches;

ii. Anchorages;

iii. Tanker routes.

(B) Crew members, other than masters/mates:

1. Deck equipment operations and safety training;

2. Company policy and procedure orientation, which shall include a review of applicable international, federal and state requirements;

*3. Vessel firefighting/fire prevention;

*4. Personal safety, including:

i. First aid and CPR certification;

ii. Confined space hazard awareness;

iii. Injury prevention;

iv. Lock-out/tag-out procedure.

5. Marine diesel operations training, including engine room equipment and alarms.

In addition to the subjects listed above within this Subsection (B) crew members, other than masters and mates, shall demonstrate their ability to operate the vessel in place of the master/mate in an emergency situation, when the master/mate is unable for any reason to operate in his/her capacity.

(C) All crew members:

1. Employee orientation, including:

i. Drug and alcohol policy;

ii. Safety as a condition of employment;

iii. Vessel layout/deck operations;

iv. Required safety gear;

v. Job responsibilities.

*2. Emergency procedures orientation:

i. Fire;

ii. Collision/allision;

iii. Sinking;

iv. Grounding;

v. Man overboard;

vi. Personal injury;

vii. Oil spill reporting.

3. Knowledge and use of tug escorts:

i. How to use an escort tug to reduce the risk of grounding or collision of an escorted vessel;

ii. The roles of the tug (as servant of the vessel) and the pilot during escorts;

iii. The primacy of safety of life and the escort tug;

4. Capabilities and performance limitations of the escort tug, including but not limited to:

i. Handling and performance characteristics of escort tugs (e.g., stability, hydrodynamics, tripping, etc.);

ii. Propulsion type;

iii. Force capabilities;

iv. Line and connection system integrity;

v. Navigation systems.

(2) Training required as a condition of U.S. Coast Guard licensure (e.g., firefighting) may be used to satisfy the training specifications listed in Subsection (d)(1) above, as appropriate.

(3) Compliance with the crew training and qualification requirements listed in Subsection (d)(1) above shall be verified as follows:

(A) Companies that comply with the International Convention on Standards of Training, Certification, and Watchkeeping for Seafarers (STCW) certification and have a Safety Management System (SMS) in place shall provide internal audit reports and STCW training certificates to the Administrator upon request; or

(B) Companies that are not STCW certified, but which have a SMS in place shall request approval from the Administrator by providing all of the following:

1. Details of their training program; and

2. Certified audit reports; and

3. Demonstration of proficiency of the crew in the training elements prior to approval when deemed necessary by the Administrator.

HISTORY

1. New section filed 7-28-94; operative 8-29-94 (Register 94, No. 30).

2. Change without regulatory effect amending subsection (c)(1)(B) filed 7-12-95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).

3. Amendment of section heading, section and NOTE filed 8-19-98; operative 9-18-98 (Register 98. No. 34).

4. Repealer of subsections (a)(5) and (a)(8), subsection renumbering and amendment of newly designated subsection (a)(6) filed 7-12-99 as an emergency; operative 7-12-99 (Register 99, No. 29). A Certificate of Compliance must be transmitted to OAL by 11-9-99 or emergency language will be repealed by operation of law on the following day.

5. Reinstatement of section as it existed prior to 7-12-99 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 2).

6. Repealer of subsections (a)(5) and (a)(8), subsection renumbering and amendment of newly designated subsection (a)(6) filed 1-10-2000; operative 2-9-2000 (Register 2000, No. 2).

7. Amendment of section heading, repealer of subsections (c)-(c)(2) and new subsections (c)-(d)(3)(B)3. filed 9-27-2004; operative 10-27-2004 (Register 2004, No. 40).

8. New subsections (a)(6)(A)-(a)(6)(A)3. filed 4-25-2005; operative 4-25-2005 pursuant to Government Code section 11343.4 (Register 2005, No. 17).

9. Amendment of subsection (a)(6)(A)1. filed 3-1-2006 as an emergency; operative 3-1-2006 (Register 2006, No. 9). A Certificate of Compliance must be transmitted to OAL by 6-29-2006 or emergency language will be repealed by operation of law on the following day.

10. Amendment of subsection (a)(6)(A)1. refiled 6-29-2006 as an emergency; operative 6-29-2006 (Register 2006, No. 26). A Certificate of Compliance must be transmitted to OAL by 10-27-2006 or emergency language will be repealed by operation of law on the following day.

11. Amendment of subsection (a)(6), repealer of subsections (a)(6)(A)-(a)(6)(A)3., new subsections (a)(7)-(a)(7)(C) and amendment of NOTE filed 9-15-2006; operative 10-15-2006 (Register 2006, No. 37).

§ 851.24. Pre-Escort Conference.

(a) Prior to commencing an escorted transit, the tank vessel master/pilot shall:

(1) contact the escort tug master, mate or officer in charge of the watch, to confirm the number and position of the escort tug(s); and

(2) establish the radio frequency to be used for communications; and

(3) establish the anticipated direction of movement and destination of the tank vessel; and

(4) communicate any other pertinent information that the master/pilot and escort tug master, mate or officer in charge of the watch deem necessary to facilitate operations in the case of an unplanned event.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 7-28-94; operative 8-29-94 (Register 94, No. 30).

2. Change without regulatory effect amending subsection (a) filed 7-12-95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).

3. Repealer and new section filed 8-19-98; operative 9-18-98 (Register 98, No. 34).

4. Amendment of subsections (a)(1)-(2) and (a)(4) filed 7-16-2001; operative 8-15-2001 (Register 2001, No. 29).

§ 851.25. Speed Limits for Tankers.

(a) Tankers transiting between the seaward limits of the pilot operating areas and anywhere inside the Federal Breakwater shall restrict their speed as follows:

(1) eight (8) knots for vessels 60,000 displacement tons and less;

(2) six (6) knots for vessels exceeding 60,000 displacement tons.

(b) The maximum speed limits contained in subsections (a)(1) and (a)(2) reflect favorable circumstances and conditions and shall be adjusted for safety based on weather and tidal conditions and the proximity of other vessel traffic.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 7-28-94; operative 8-29-94 (Register 94, No. 30).

2. Renumbering of former section 851.25 to section 851.26 and new section filed 8-19-98; operative 9-18-98 (Register 98, No. 34).

3. Amendment of section heading and section filed 7-16-2001; operative 8-15-2001 (Register 2001, No. 29).

§ 851.26. General Escort Tug Requirements for Tankers.

(a) The force requirements contained in this subchapter reflect favorable circumstances and conditions. The tanker master/pilot shall arrange for additional escort tug(s) should adverse weather conditions, unusual port congestion, the contemplated movement of the vessel or other conditions or circumstances so require.

(b) The master/pilot of inbound tankers shall confirm by VHF contact with the required escort tugs(s), that the tug(s) is/are stationed at the appropriate seabouy prior to the tankers reaching the seaward limit of the pilot operating area.

(c) Tanker Crew Requirements.

(1) a tanker shall have:

(A) sufficient and qualified line handling capable crew members standing by and available to immediately receive lines from each escort tug. The crew shall not be assigned duties that would interfere with their ability to immediately respond to an emergency situation;

(B) its anchors ready for letting go prior to entering the pilot operating areas (inbound tankers only);

(C) sufficient and qualified supervisors to provide direct supervision of line handling crew operations for tankers. Supervisors shall have direct radio communication capability with the bridge of the tanker.

(d) Tanker Equipment Requirements:

(1) each tanker shall have appropriate and suitably maintained bitts and chocks that are of sufficient size, strength, and number to accommodate the anticipated forces of the escort tug(s);

(2) the tanker owner/operator shall indicate the location of the appropriate bitts and chocks, as well as the safe working loads, on the ship's general arrangement plan for each tanker. This information shall also be communicated to the pilot during the pre–escort conference required by Section 851.24 of this subchapter.

(e) Notwithstanding any other provision of this subchapter:

(1) any additional requirements for tug escort as deemed necessary by the U.S. Coast Guard shall supersede the requirements of this subchapter;

(2) During a nonemergency situation the master/pilot, may only adjust the minimum escort requirements contained in this subchapter with the concurrence of the Coast Guard Captain of the Port.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 7–28–94; operative 8–29–94 (Register 94, No. 30).
2. Repealer of former section 851.26 and renumbering of former section 851.25 to section 851.26, including amendment of section heading, section and NOTE filed 8–19–98; operative 9–18–98 (Register 98, No. 34).
3. Amendment of section heading and section filed 7–16–2001; operative 8–15–2001 (Register 2001, No. 29).

§ 851.27. Tanker and Tug Matching Criteria.

(a) Force Selection Matrix. The tug(s) used for the escorted vessel movements described in Section 851.22, Subsections (a) and (b), shall provide forces equivalent to those delineated in the following Force Selection Matrix. Where multiple tugs are needed to meet these requirements, the total number of escort tugs for a single tank vessel movement or transit shall not exceed two.

(b) To meet the requirements of the Force Selection Matrix, tractor tugs shall be tethered, inbound and outbound. Conventional tugs may be tethered or untethered inbound, but shall be tethered outbound.

Section 851.27. Force Selection Matrix

	Tractor Tugs			*Conventional Tugs*				
	Ahead Forces for Tugs Using Stern Line (Vsp) Astern Forces for Tugs Using Headline (Asd)		*2nd Tug Ratio*	*Ahead Forces*		*2nd Tug Ratio*	*Astern Forces*	
Tanker Displacement					*Short*			*Short*
Long Tons	*Kips*	*Short Tons*	R_{T2}	*Kips*	*Tons*	R_{c2}	*Kips*	*Tons*
0 to <60,000	20	10	2.7	50	25	1.2	30	15
60,000 to <100,000	40	20	2.7	60	30	1.3	50	25
100,000 to <140,000	50	25	2.7	80	40	1.4	80	40
140,000 to <180,000	60	30	2.8	120	60	1.4	100	50
180,000 to <212,000	90	45	3.8	220	110	1.6	120	60
212,000 to <220,000	100	50	3.8	250	125	1.6	120	60
220,000 to <260,000	120	60	5.3	410	205	1.6	140	70
260,000 to <300,000	140	70	5.4	480	240	1.6	160	80
300,000 to <340,000	170	85	5.6	590	295	1.6	190	95

(c) the above force requirements can be met by employing either:

(1) a single tractor tug, in which case the required force is set forth in the tractor tug column in the matrix above; or

(2) a single conventional tug, in which case the tug must meet both the required forces set forth in the conventional tug ahead and astern columns in the matrix above.

(d) accurate tug–to–tanker matching calculations for two tugs to meet the force requirements set forth in the above matrix, may be derived by using either:

(1) two conventional tugs; or

(2) a combination of two tugs, which may be employed, as follows:

(A) When using one tractor and one conventional tug the combined tug forces shall be calculated by subtracting the tractor tug's force measurement from the required force amount set forth in the tractor tug column in the matrix above, and multiplying the balance by the ratio (R_{T2}) provided for the second tug in that tank vessel displacement category. The resulting force amount must be met by the conventional tug using its ahead force measurement.

E.g., force ahead of second tug ≥ (force required from tractor tug column – force tractor) x R_{T2}. I.e., force required from tractor tug column ≤ force tractor + (force ahead of second tug ÷ R_{T2}).

The conventional tug must also meet an astern force amount that shall be calculated by subtracting the tractor tug's force measurement from the required force amount set forth in the tractor tug column in the matrix above and multiplying the balance by 1.0.

E.g., force astern second tug ≥ (force required from tractor tug column – force tractor) x 1. i.e., force required from tractor tug column ≤ force tractor + force astern conventional.

(B) When using two tractor tugs, the second tractor tug's force requirement shall be determined in the same way as for a second conventional tug.

Example: a 180,000 displacement tanker requires a 90 kip tractor tug to meet the minimum escort standards of this subchapter. In a situation where a 70–kip tractor tug is available, one additional tug could be used to fulfill the remaining 20 kip requirement by multiplying this balance by the ratio (R_{t2}) for this category. Thus, the ahead force and the astern force of the second tug must be:

Ahead force for the second tug (90–70)= 20 x 3.8 = 76 (kips).

Astern force for the second tug (90–70)= 20 x 1 = 20 (kips).

(C) When using two conventional tugs, the combined tug forces shall be calculated by subtracting the force measurement of the tug working at the transom from the required conventional tug ahead force amount set forth in the conventional tug ahead force column in the matrix above, and multiplying the balance by the ratio provided for the second tug, (R_{c2}) in that tank vessel displacement category. The resulting force amount must be met by the second conventional tug using its ahead force measurement.

E.g., force ahead of second tug ≥ (ahead force required from conventional tug column – force ahead of first conventional tug) x R_{c2}.

I.e., ahead force required from conventional tug column ≤ force ahead of first conventional tug + (force ahead of second tug ÷ R_{c2}).

The second conventional tug must also meet an astern force amount that shall be calculated by subtracting the first tug's astern force measurement from the required force amount set forth in the conventional tug astern force column in the matrix above, and multiplying the balance by 1.0.

E.g., force astern of second tug ≥ astern force required from conventional tug column – force astern of first conventional tug.

I.e., astern force required from conventional tug column ≤ force astern of first conventional tug + force astern of second tug.

Example: a 180,000 displacement tanker requires a 220 kip ahead force and 120–kip astern force conventional tug to met the minimum escort standards of this subchapter. In a situation where a 150–kip ahead force with 100–kip astern force conventional tug is available, one additional tug could be used to fulfill the remaining force requirements (second tugs forces x R_{c2}). Thus, the ahead force and the astern force of the second tug must be:

Ahead force for the second tug = (220–150) x 1.6 = 112 (kips)

Astern force for the second tug = (120–100) x 1 = 20 (kips)

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 7–28–94; operative 8–29–94 (Register 94, No. 30).
2. Repealer and new section filed 8–19–98; operative 9–18–98 (Register 98, No. 34).
3. Amendment of subsections (b) and (d)(1), redesignation and amendment of a portion of subsection (d)(2)(A) as (d)(2)(B) and subsection relettering filed 7–16–2001; operative 8–15–2001 (Register 2001, No. 29).

§ 851.27.1. Tank Barge and Tug Matching Criteria, Tethering, Stationing and Equipment Requirements.

(a) The tug(s) used to escort a tank barge must be able to provide sufficient braking force to stop the tank barge.

(1) The braking force shall be measured either as:

(A) the escort tug's ahead static bollard for tractor tugs using stern lines (VSP); or

(B) astern static bollard pull for tractor tugs using headlines (ASD); or

(C) astern static bollard pull for conventional tugs;

(2) At the appropriate seabouy:

(A) Tethered escort tug(s) are required for all tank barges and their primary towing vessels whose aggregate displacement tonnage exceeds 20,000;

(B) The escort tug(s) shall have the minimum individual or aggregate braking force, when tethered or untethered, as specified in Subsection (3) A. and B. below:

(3)

Total Displacement Tonnage of the Tank Barge and the Primary Towing Tug	*Minimum Required Escort Tug(s) Static Bollard Pull in Short Tons*	
	Tethered Escort Tug(s)	*Untethered Escort Tug(s)*
A. 0 to 20,000 displacements	10 short tons	15 short tons
B. >20,000 displacement tons	*Tethered Escort Tug(s)* A total astern static bollard pull (in pounds) equal to or greater than the sum of both the primary towing tug's and barge's total displacement tonnage. (E.g., where the total towing tug and tank barge displacement is 25,000 displacement tons, the escort tug(s)' astern static bollard pull shall be at least 25,000 pounds or 12.5 short tons.)	

(4) A tank barge must be accompanied by a sufficient number, but no more than two tugs to provide the braking force specified in this section.

(5) The towing tug which provides the power to push or tow a tank barge shall not become an escort tug during the course of a transit unless the towing tug has been relieved of its duties as the primary towing vessel, and replaced with another tug that serves as the primary towing vessel.

Any towing tug that does become the escort tug after being relieved of all towing duties must meet all the requirements for escort tugs as specified in this subchapter.

(6) The primary towing vessels for tank barges transiting between the seaward limits of the pilot operating areas and anywhere inside the Federal Breakwater shall restrict their speed to four (4) knots.

(b) Stationing Requirements.

(1) The primary towing tug master or mate shall confirm by VHF contact with the required escort tug(s), that the tug(s) is/are stationed at the appropriate seabouy prior to the tank barge reaching the seaward limit of the pilot operating area.

(c) Equipment Requirements.

(1) Each tank barge shall have deck chocks and bitts that are of sufficient size, strength and number to accommodate the anticipated forces of the escort tug(s) as stated in subsection (a)(3) above;

(2) The tank barge owner/operator shall illustrate the location of the bitts and chocks, and any other locations on the hull, which are capable of withstanding the forces exerted by the escort tug(s), within documentation kept on file with the Marine Exchange, and onboard the towing tug.

NOTE: Authority cited: Sections 8670.17.2(a) and 8670.23.1(d), Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 7–16–2001; operative 8–15–2001 (Register 2001, No. 29).

§ 851.28. General Requirements for Tank Vessels.

(a) All laden, inbound tank vessels engaged in movements described in Section 851.22, Subsections (a) and (b), shall:

(1) comply with the escort requirements specified in Section 851.27, or its alternatives found in Section 851.29; and

(2) report their displacement upon arrival and departure to the Vessel Traffic Information Service/Marine Exchange; and

(3) either through the tank vessel owner/operator or the agent acting on their behalf, provide the accurate displacement of the tank vessel when ordering tug escort services from the tug provider(s); and

(4) be met by the required escort tug at the seaward limit of the pilot operating areas; and

(5) not proceed closer than two nautical miles from the Federal Breakwater entrance unless the required escort tug is in position at the seaward limit of the pilot operating areas.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 7–28–94; operative 8–29–94 (Register 94, No. 30).
2. Renumbering of former section 851.28 to new section 851.30 and new section 851.28 filed 8–19–98; operative 9–18–98 (Register 98, No. 34).

§ 851.29. Alternative to Section 851.27 Requirements for Matching Escort Tugs to Tank Vessels.

(a) Measurement methodologies other than those used to establish the requirements in Section 851.27 may be used instead of, or in addition to, that section as follows:

(1) Escort tug operators may propose an alternative method for measuring the forces of any escort tug (in kips) than the static bollard pull measurement indicates. An alternative measurement may be submitted only once in any 12 month period and shall comply with the following:

(A) the owner/operator shall assure that the following are included when developing a methodology for calculating alternate forces for a given escort tug:

1. The alternate measurement is conducted from a starting speed of five (5) knots;

2. the escort tug is not required to exceed the limits of its ability to generate the forces, and in no instance submerges the deck edge to achieve the alternate measurement;

3. the escort tug operates all its equipment at or below the manufacturer's recommended guidelines for its safe working load;

4. unless demonstrated otherwise by full scale testing, all machinery shall be assumed to operate at or below performance levels published by the manufacturer;

5. any current bollard pull values registered with the Marine Exchange shall be utilized where appropriate in any formulas or models;

6. any known condition that would impair the escort tug's ability to perform shall be included in the calculation.

(B) the measurement must be conducted by a naval architect or licensed marine engineer approved by the Administrator:

1. the escort tug operator shall submit the name of the naval architect or licensed marine engineer to the Administrator for approval prior to having that individual or his/her company conduct an alternate measurement.

2. the Administrator shall approve a naval architect or licensed marine engineer if that person has demonstrated the education, knowledge and experience necessary to conduct the testing and modeling of escort tug capabilities and forces.

(C) The alternate model and the resultant measurements shall be approved by the Administrator before the alternate model may be used to match a tanker to an escort tug or tugs. The Administrator shall approve the alternate model if it provides both of the following:

1. A higher force (in kips) than the static bollard pull measurement indicates; and

2. at least the same level of protection as the forces required by Section 851.27.

(D) After an alternate model is approved, the Administrator shall provide the Los Angeles/Long Beach Harbor Safety Committee with a list of the escort tug combinations which correspond to the tank vessel displacements and speeds under the approved alternate methodology.

(2) Tanker operators may develop a model for the vessels in their fleet relative to the steering and braking demands of the vessels. The steering and braking demands established by the alternate model may be used to match escort tugs to tankers in lieu of those specified in Section 851.27. An alternate compliance model may be submitted only once in any 12 month period and shall comply with the following:

(A) The measurement must be conducted by a naval architect or licensed marine engineer approved by the Administrator.

1. The tanker operator shall submit the name of the marine architect or licensed marine engineer to the Administrator for approval prior to having that individual or his/her company conduct an alternate model.

2. the Administrator shall approve a naval architect or licensed marine engineer if that person has demonstrated the education, knowledge and experience necessary to conduct the testing and modeling of escort tug capabilities and forces.

(B) The alternate model and the resultant measurements shall be approved by the Administrator before the alternate model may be used to match a tank vessel to an escort tug or tugs. The Administrator shall approve the alternate model if:

1. It provides at least the same level of protection as the forces established in Section 851.27; and

2. can be achieved using no more than two escort tugs as required by this subchapter.

(C) After an alternate model is approved, the Administrator shall provide the Marine Exchange and the Los Angeles/Long Beach Harbor Safety Committee with the tank vessel demand in kips which corresponds to the tanker's displacement and speed under the approved alternate model.

HISTORY

1. New section filed 7-28-94; operative 8-29-94 (Register 94, No. 30).

2. Renumbering of former section 851.29 to new section 851.32 and new section 851.29 filed 8-19-98; operative 9-18-98 (Register 98, No. 34).

§ 851.30. Reporting.

Anyone may report violations of the provisions of this subchapter to:

(a) the Office of Spill Prevention and Response; or

(b) The United States Coast Guard Captain of the Port.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. Renumbering of former section 851.28 to new section 851.30, including amendment of section and NOTE, filed 8-19-98; operative 9-18-98 (Register 98, No. 34).

§ 851.31. Compliance Monitoring and Notification.

Compliance monitoring of these regulations shall be accomplished by the procedures specified in either subsection (a) or (b), below:

(a) The development of a compliance monitoring program(s) or process(es) designed by the Port of Los Angeles and the Port of Long Beach (Ports), or their designees.

(1) The program(s) or process(es) shall specify how the Ports will provide the Administrator, or his designee, with notification of a violation(s) to the regulations; and or

(2) that the vessel, under normal, not exigent circumstances, is to be detained until the requirements of this subchapter have been fully met.

(A) The program and/or process shall be submitted to the Administrator for his/her review and approval no later than 120 days from the effective date of this regulation.

(B) The Administrator shall have 60 days within which to review and either approve, conditionally approve or disapprove the Ports' submittal. Upon termination of this time line the Administrator shall:

1. Fully approve the proposed program and/or process provided by the Ports and provide written confirmation of this approval.

2. Conditionally approve the proposal(s). The Administrator shall provide a written explanation for the conditional approval and state the objectional items contained in the proposal. The Ports shall be given 30 days from the date of their receipt of the Administrator's explanation, to resubmit a proposal which will either excise or mitigate, with an explanation, the Administrator's objections. The Administrator shall have 30 days from the date of receipt of the Ports' amended proposal, and shall either fully approve or fully disapprove this document.

3. Disapprove the Ports' proposals.

(b) If either of the Ports' program(s) and/or process(es) is/are disapproved, or if either of the ports fail to submit a program, the Administrator shall implement the compliance monitoring provisions of this subchapter by the adoption of further regulations. These regulations may include the establishment of a Clearing House function within the Marine Exchange or through any other legal means deemed appropriate by the Administrator.

HISTORY

1. New section filed 8-19-98; operative 9-18-98 (Register 98, No. 34).

§ 851.32. Remedies.

(a) Nothing herein shall limit or prevent any action by any party in a court of competent jurisdiction.

(b) Any person who knowingly, intentionally or negligently violates any provision of this subchapter shall be subject to criminal, civil, and/or an administrative civil penalty as prescribed in Article 9 of the Government Code beginning with Section 8670.57.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.67(b), Government Code.

HISTORY

1. Renumbering of former section 851.29 to new section 851.32, including amendment of section and NOTE, filed 8-19-98; operative 9-18-98 (Register 98, No. 34).

Subchapter 3. Tank Vessel Escort Regulations for Port Hueneme Harbor

§ 851.50. Purpose and Scope.

The regulations in this subchapter set forth tank vessel escort requirements for Port Hueneme. These requirements specify the number of tugs required for escort service. The escort tugs will be available to influence the speed and direction of travel of a tank vessel in the event of a steering or propulsion failure, thereby reducing the possibility of a grounding or collision and the risk of an oil spill from these tank vessels.

The Administrator shall periodically review the elements of the tank vessel escort program. The program review will include a survey of the tanker-related incidents in U.S. waters to determine the types of failures that have occurred, an assessment of tug technology and any advances made in design and power, and the related tug-escort rules and policies that are implemented by other coastal states and maritime organizations. At the conclusion of the review, the Administrator will determine whether it is necessary to modify any provision of the program requirements.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New subchapter 3, article 1 (sections 851.50–851.54) and section filed 3–21–95; operative 4–20–95 (Register 95, No. 12).
2. Change without regulatory effect amending subchapter 3 heading filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Change without regulatory effect amending section and NOTE filed 10–21–96 pursuant to Section 100, title 1, California Code of Regulations (Register 96, No. 43).
4. Amendment of subchapter heading and section filed 1–15–98; operative 2–14–98 (Register 98, No. 3).
5. Repealer of article heading and amendment of second paragraph filed 12–21–2004; operative 1–20–2005 (Register 2004, No. 52).

§ 851.51. Definitions.

In addition to the definitions found in Government Code Section 8670.3 and Chapter 1, Section 790 of this Subdivision, the following definitions shall apply to this subchapter. Where similar terms are defined, the following will supersede the definition in Government Code Section 8670.3 and Chapter 1:

(a) "Escort" means maintaining a position in the vicinity of the tank vessel, based on existing conditions, which will enable a tug to provide timely and effective response to prevent a vessel casualty.

(b) "Master" means the licensed master of the tanker.

(c) "Operator" means the operator of an uninspected towing vessel licensed under federal statutes and/or regulations to engage in the towing of a barge.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.3 and 8670.17.2, Government Code.

HISTORY

1. New section filed 3–21–95; operative 4–20–95 (Register 95, No. 12).
2. Change without regulatory effect amending first paragraph, repealing subsections (c), (e) and (g)–(j), and subsection relettering filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Repealer of subsection (a), subsection relettering, and amendment of NOTE filed 1–15–98; operative 2–14–98 (Register 98, No. 3).
4. Amendment of first paragraph filed 12–21–2004; operative 1–20–2005 (Register 2004, No. 52).

§ 851.51.1. Requirements for Escort Tugs.

(a) A tug may be used for escort services if authorized by the Oxnard Harbor District and/or the U.S. Navy for use in Port Hueneme.

(b) Tugs used for escort services must be equipped with at least 500 horsepower.

(c) The braking force shall be re-measured after any modifications and/or repairs to the main engines, hull, shaft-drive line, or steering, that could affect the bollard pull. The new measurements must be registered with the Oxnard Harbor District.

(d) Escort tugs that submit to the Escort Tug Inspection Program, as described in Sections 851.8(a)(4)(B) and 851.23(a)(7)(B), can perform escort duties in any port in the state, if the tugs meet the requirements of the appropriate subchapter (i.e., Subchapter 1, San Francisco Bay Region; Subchapter 2, Los Angeles/Long Beach Harbor; Subchapter 3, Port Hueneme Harbor; Subchapter 4, Humboldt Bay; Subchapter 5, San Diego Harbor), of this Chapter 4 of the California Code of Regulations.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. Change without regulatory effect adding new section filed 10–21–96 pursuant to Section 100, title 1, California Code of Regulations (Register 96, No. 43).
2. Amendment of NOTE filed 12–21–2004; operative 1–20–2005 (Register 2004, No. 52).
3. New subsections (c)–(d) filed 9–15–2006; operative 10–15–2006 (Register 2006, No. 37).

§ 851.52. Tug Escort for Tankers.

(a) All tankers operating in Port Hueneme, whether entering, departing, shifting or berthing, shall use two escort tugs between the Pilot Boarding Area and the designated berth. For purposes of this Article, oil spill response vessels and offshore supply vessels as defined in 46 USC 2101, are not required to engage escort tugs in accordance with this subchapter.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 3–21–95; operative 4–20–95 (Register 95, No. 12).
2. Amendment of section heading, section and NOTE filed 1–15–98; operative 2–14–98 (Register 98, No. 3).

§ 851.53. Tug Escort for Barges.

(a) All tank barges operating in Port Hueneme, whether entering, departing, or shifting, except as specified in subparagraph (a)(4), shall use a tug or tugs for escort, in addition to the towing vessel, based on the following criteria:

(1) Tank barges of 150 feet or less: No escort tug is required unless deemed necessary by the Master or Operator as appropriate for that size vessel.

(2) Tank barges greater than 150 feet, but less than or equal to 250 feet: One escort tug is required; the horsepower of the tug shall be appropriate for that size vessel as deemed necessary by the Master or Operator as appropriate for that size vessel.

(3) Tank barges greater than 250 feet: At least one escort tug is required; the horsepower of the tug shall be 1500 horsepower or greater. Additional tugs shall be used as deemed necessary by the Master or Operator as appropriate for that size vessel.

(4) Empty tank barges operating in Port Hueneme shall have a tug escort on a case-by-case basis as deemed necessary by the Master or Operator as appropriate for that size vessel.

(b) In accordance with Section 851.53(a), tank barges entering or departing Port Hueneme shall be escorted by a tug or tugs between the Pilot Boarding Area and the designated berth. For purposes of this Article, oil spill response vessels and offshore supply vessels as defined in 46 USC 2101, are not required to engage escort tugs in accordance with this subchapter.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Section 8670.17.2, Government Code.

HISTORY

1. New section filed 3–21–95; operative 4–20–95 (Register 95, No. 12).
2. Amendment of section heading, section and NOTE filed 1–15–98; operative 2–14–98 (Register 98, No. 3).

§ 851.54. Remedies.

(a) Nothing herein shall limit or prevent any action by any party in a court of competent jurisdiction.

(b) Any person who knowingly, intentionally or negligently violates any provision of this Subchapter shall be subject to criminal, civil, and/or administrative civil actions as prescribed in Article 9, beginning with Government Code Section 8670.57.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.57, Government Code.

HISTORY

1. New section filed 3–21–95; operative 4–20–95 (Register 95, No. 12).
2. Amendment subsection (b) and amendment of NOTE filed 12–21–2004; operative 1–20–2005 (Register 2004, No. 52).

Subchapter 4. Tank Vessel Escort Regulations for Humboldt Bay

Article 1. General Provisions and Definitions

§ 851.80. Purpose and Scope.

The regulations in this subchapter set forth tank vessel escort requirements for tank vessels entering, shifting within, or leaving Humboldt Bay.

"Humboldt Bay" encompasses those harbor boundaries which include all submerged lands of Humboldt Bay (Inner Harbor); and the open water boundary defined as the area centered on the Humboldt Bay Sea Buoy and extending radially outward for a distance of one mile then landward to the perpendicular intersection with the north and south spits.

The escort tug requirements specify that tank vessels carrying as cargo a total volume of oil greater than or equal to 5,000 long tons or 5% of the vessel's deadweight tonnage, whichever is less, shall be escorted by a suitable escort tug(s).

The escort tug(s) shall be used to influence the speed and direction of travel of a tank vessel in the event of a steering or propulsion failure, thereby reducing the possibility of groundings or collisions and the risk of an oil spill from these tank vessels.

The Administrator shall review the tug/tank vessel matching criteria and other requirements of this subchapter within two years of the effective date of this subchapter. The review will include a survey of the tank vessel–related incidents in U.S. waters to determine the type of failures that have occurred, an assessment of tug technology and any advances made in design and power, and the escort tug–related rules and policies that are implemented by other coastal states and maritime organizations. At the conclusion of the review, the Administrator will determine whether it is necessary to modify the tug/tank vessel match criteria or any other requirements of this subchapter.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New subchapter 4, article 1 (sections 851.80–851.86) and section filed 2–27–97; operative 3–29–97 (Register 97, No. 9).

§ 851.81. Definitions.

In addition to the definitions found in Government Code Section 8670.3 and Chapter 1, Section 790 of this subdivision, the following definition shall apply to this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "Bona fide sister tug" means a tug which has not had its bollard pull capabilities verified by a member of the International Association of Classification Societies, but is constructed and maintained with the same hull form, engines, type of propulsion, stability, maneuverability, speed, power, and endurance of a tested and certified escort tug.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New section filed 2–27–97; operative 3–29–97 (Register 97, No. 9).

§ 851.82. Escort Tug Requirements for Tank Vessels.

(a) Escort tugs, alone or in combination, must have total ahead bollard pull in pounds greater than or equal to the tank vessel's deadweight tonnage. When required under this subsection and subsection 851.85(j)(2), additional escort tugs shall stand by during transit and be prepared to render assistance.

(b) All tankers transiting the waters of Humboldt Bay, carrying as cargo a total volume of oil greater than or equal to 5,000 long tons or 5% of the vessel's deadweight tonnage, whichever is less, shall use a minimum of one escort tug. For purposes of this subchapter, oil spill response vessels, and offshore supply vessels as defined in 46 USC 2101, are not required to engage escort tugs in accordance with this subchapter.

(c) All tank barges transiting the waters of Humboldt Bay, carrying as cargo a total volume of oil greater than or equal to 5,000 long tons or 5% of the vessel's deadweight tonnage, whichever is less, shall use at least one escort tug, in addition to the barge's line–haul tug. For purposes of this subchapter, oil spill response vessels, and offshore supply vessels as defined in 46 USC 2101, are not required to engage escort tugs in accordance with this subchapter.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New section filed 2–27–97; operative 3–29–97 (Register 97, No. 9).

§ 851.83. Requirements for Escort Tug Crew Members.

Any escort tug used to comply with the requirements of this subchapter, must meet crew standards as follows:

(a) Escort tug operators shall, at a minimum, be duly licensed Operators of Uninspected Towing Vessels as set forth in Title 46, Code of Federal Regulations (CFR), Section 10.464.

(b) Escort tug crews shall have a minimum of two certified deck hands. An engineer, if employed, may not be included as a deck hand. This requirement does not preclude additional deck hands who are gaining experience for certification, but such deck hands cannot be used to meet the manning requirements of this section.

(c) Escort tug crews shall possess Coast Guard license(s)/document(s) appropriate for the escort tug and service.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New section filed 2–27–97; operative 3–29–97 (Register 97, No. 9).

§ 851.84. Requirements for Escort Tugs.

All escort tugs approved for use under this subchapter shall be equipped with and shall maintain in good working order:

(a) Primary and secondary VHF radios;

(b) 300 feet of tag line;

(c) Power line–handling equipment fore and aft for rapid, mechanically assisted deployment of lines. The primary winch shall be in the position best suited for the design of the particular vessel in escort service;

(d) Tow line with a "safe working load" that is 2.5 times the certified bollard pull rating of the escort tug;

(e) One working radar;

(f) Fendering as follows:

(1) appropriate to absorb the impact inherent in hull–to–hull operations;

(2) located at both the bow and stern to act as pivot points when pulling away from the tank vessel;

(3) sufficient to assure that there are no exposed corners, large holes or metal parts which could inflict damage on the escorted vessel; and

(4) sufficient surface area to minimize sliding when working at an angle.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New section filed 2–27–97; operative 3–29–97 (Register 97, No. 9).

§ 851.85. Requirements During Tank Vessel Escorts.

(a) Escort tugs shall maintain a station–keeping distance from the tank vessel being escorted of no further than 1,000 feet ahead or aside, or 500 feet astern of the tank vessel while engaged in the escort activity.

(b) An escort tug shall not simultaneously engage in the escort of more than one tank vessel.

(c) The speed or speeds selected for the transit must permit stationing the escort tug to allow the escort tug to effectively influence the tank vessel's movement in the event of a casualty.

(d) A tanker shall have sufficient and qualified line–handling–capable crew members standing by and available to immediately receive lines from each escort tug. In addition, the tanker shall comply with all applicable federal regulations relating to anchor readiness.

(e) The line–haul tug for a tank barge shall have sufficient and qualified line–handling–capable deck hands standing by available to receive lines from each escort tug. When the tank barge is fitted with an emergency tow wire or comparable, adequate mechanical device, or the escort tug is made fast to the tank barge, crew transfers shall not be required.

(f) Tank vessels shall have sufficient and qualified direct supervision of line–handling–crew operations. Supervisors shall have direct radio communication capability with the bridge of the tank vessel or vessel towing a barge.

(g) The master of any tank vessel shall maintain, at all times for which escort tug services are required, direct two way radio communications on VHF–FM with the master of the escort tug on a channel agreed to by both the master of the tank vessel and the master of the escort tug providing escort services.

(h) Notwithstanding any other provision of this subchapter, all escort tugs in Humboldt Bay which meet the requirements of this subchapter for the escort of tank vessels shall have their bollard pull (ahead and astern) measured, except as provided in (i) below.

(1) Bollard pull measurements shall be verified by a member of the International Association of Classification Societies.

(2) Bollard pull measurements verified by a member of the International Association of Classification Societies in other ports of the State shall meet the requirements of this section, provided that evidence of the results of these measurements are on file with the Humboldt Bay Harbor District.

(3) Escort tug companies shall provide the Humboldt Bay Harbor District with the results of the bollard pull measurements verified pursuant to the provisions of this subchapter.

(4) Escort tugs whose bollard pull has not been measured and verified or are not within the scope of the definition of "bona fide sister tug", shall not be used for the escort of tank vessels in Humboldt Bay.

(i) An escort tug determined by the master/pilot to be a "bona fide sister tug" may be used with the same (ahead and astern) bollard pull as the certified sister tug.

(j) The braking force shall be re–measured after any modification and/or repairs to the main engines, hull, shaft–drive line, or steering, that could affect the bollard pull. The new measurements must be registered with the Humboldt Bay Harbor District.

(k) Escort tugs that submit to the Escort Tug Inspection Program, as described in Sections 851.8(a)(4)(B) and 851.23(a)(7)(B), can perform escort duties in any port in the state, if the tugs meet the requirements of the appropriate subchapter (i.e., Subchapter 1, San Francisco Bay Region; Subchapter 2, Los Angeles/Long Beach Harbor; Subchapter 3, Port Hueneme Harbor; Subchapter 4, Humboldt Bay; Subchapter 5, San Diego Harbor), of this Chapter 4 of the California Code of Regulations.

(*l*) Notwithstanding any other provision of this subchapter:

(1) The tank vessel master remains responsible for the safe navigation and maneuvering of the tank vessel in all circumstances. The requirements outlined in this subchapter are in addition to, and not a limitation of, any other responsibilities created by custom, law, or regulation.

(2) Where an emergency exists, the tank vessel master may adjust the minimum escort tug requirements contained in this subchapter. For purposes of this subchapter, an emergency is defined as any of, but is not limited to, the following:

(A) imminent and immediate danger to the tank vessel, its cargo or its crew;

(B) imminent and immediate danger to a marine terminal, service or escort tug;

(C) imminent and immediate danger to a vessel in the proximity of the escorted vessel; or

(D) any emergency declared by the United States Coast Guard Captain of the Port which would necessitate a modification to the provisions set forth in this subchapter.

2. New subsections (j)–(k) and subsection reletting filed 9–15–2006; operative 10–15–2006 (Register 2006, No. 37).

§ 851.86. Remedies.

(a) Nothing herein shall limit or prevent any action by any party in a court of competent jurisdiction.

(b) Any person who knowingly, intentionally or negligently violates any provision of this subchapter shall be subject to criminal, civil, and/or administrative civil actions as prescribed in Article 9, Government Code, beginning with Section 8670.57.

NOTE: Authority cited: Sections 8670.17.2(d) and 8670.23.1(d), Government Code. Reference: Sections 8670.17.2, 8670.23.1 and 8670.57, Government Code.

1. New section filed 2–27–97; operative 3–29–97 (Register 97, No. 9).

Subchapter 5. Escort Tug Requirements for San Diego Harbor

§ 852. Purpose and Scope.

The regulations in this subchapter set forth tank vessel escort requirements for the San Diego Harbor. Escort tugs shall be available to influence the speed and direction of travel of a tank vessel in the event of a casualty, or a steering or propulsion failure, thereby reducing the possibility of a grounding or collision and the risk of an oil spill.

The Administrator shall periodically review the tug/tank vessel matching criteria and other requirements of this subchapter. The review will include a survey of the tank vessel–related incidents in U.S. waters to determine the type of failures that have occurred, an assessment of tug technology and any advances made in design and power, and the escort tug–related rules and policies that are implemented by other coastal states and maritime organizations. At the conclusion of the review, the Administrator will determine whether it is necessary to modify the tug/tank vessel match criteria or any other requirements of this subchapter.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New subchapter 5 (sections 852–852.6) and section filed 1–23–97; operative 2–22–97 (Register 97, No. 4).
2. Amendment of section and NOTE filed 3–30–2005; operative 4–29–2005 (Register 2005, No. 13).

§ 852.1. Definitions.

Definitions governing the construction of this subchapter can be found in Government Code Section 8670.3, and in Chapter 1, Section 790 of this Subdivision.

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.3, 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New section filed 1–23–97; operative 2–22–97 (Register 97, No. 4).
2. Amendment of NOTE filed 3–30–2005; operative 4–29–2005 (Register 2005, No. 13).

§ 852.2. Minimum Requirements for Escort Tugs.

(a) Only tugs meeting the requirements set forth in this subchapter shall be allowed to provide escort services.

(b) The owner/operator of any tug offering escort services to tank vessels shall submit the tug to bollard pull testing before providing escort services. See Section 852.3 of this subchapter for testing requirements.

(c) A tug must demonstrate a minimum ahead bollard pull of 10 tons to qualify for escort service.

(d) In order to escort tankers over 20,000 deadweight tons, a tug must demonstrate a minimum ahead bollard pull of 18 tons.

(e) The tug(s) assigned to a tank vessel shall be capable of providing a combined total ahead bollard pull of no less than 2 pounds of thrust per deadweight ton of assigned tank vessel.

(f) An escort tug's primary assist lines must have a specified breaking strength not less than 1.5 times the tug's maximum bollard pull.

(g) For any transit between Ballast Point and sea that requires an escort tug(s), a tank vessel shall have at least one escort tug which is adequately equipped to perform in open ocean conditions.

(h) Escort tugs must have the capability to communicate with the tank vessel by primary and secondary VHF–FM radios.

(i) Escort tugs shall be fendered as appropriate to absorb the impact of normal skin–to–skin operations, protecting both the tank vessel and the escort tug from metal to metal contact. To the extent possible, the fendering shall have a surface which minimizes sliding when the escort tug is working at an angle to the tank vessel.

(j) Any tugs working beyond the Line of Demarcation must have crews that are certified in accordance with the International Convention on Standards of Training, Certification, and Watchkeeping for Seafarers 95 (STCW)

NOTE: Authority cited: Sections 8670.17.2 and 8670.23.1, Government Code. Reference: Sections 8670.17.2 and 8670.23.1, Government Code.

HISTORY

1. New section filed 1–23–97; operative 2–22–97 (Register 97, No. 4).
2. Amendment of subsections (b) and (f), new subsection (j) and amendment of NOTE filed 3–30–2005; operative 4–29–2005 (Register 2005, No. 13).

§ 852.3. Testing Requirements for Escort Tugs.

(a) All testing shall be conducted under the supervision of the American Bureau of Shipping (ABS) standards and practices, or other classification society recognized by the International Association of Classification Societies (IACS) at the expense of each owner/operator. Alternatively, a building certificate of bollard pull for the class will be accepted.

(b) A copy of the test certificate and tug specifications are to be provided by the tug owner/operator, in writing, to the United States Coast Guard Captain of the Port and the San Diego Harbor Safety Committee before providing escort services.

(1) Tug specifications shall include, but are not limited to, the following:

(A) tug name;

(B) tug owner/operator;

(C) tug length;

(D) for tractor tugs, bollard pull ahead;

(E) for conventional tugs, bollard pull ahead and astern;

(F) type and configuration of the propulsion system;

(G) type and configuration of the steering system;

(H) type and configuration of ocean towing equipment.

(c) The braking force shall be re–measured after any modification and/or repairs to the main engines, hull, shaft–drive line, or steering, that could affect the bollard pull. A copy of the bollard pull test certificate and tug specifications are to be provided by the tug owner/operator, in writing, to the United States Coast Guard Captain of the Port and the San Diego Harbor Safety Committee before providing escort services.

(d) Escort tugs that submit to the Escort Tug Inspection Program, as described in Sections 851.8(a)(4)(B) and 851.23(a)(7)(B), can perform escort duties in any port in the state, if the tugs meet the requirements of the appropriate subchapter (i.e., Subchapter 1, San Francisco Bay Region; Subchapter 2, Los Angeles/Long Beach Harbor; Subchapter 3, Port Hueneme Harbor; Subchapter 4, Humboldt Bay; Subchapter 5, San Diego Harbor), of this Chapter 4 of the California Code of Regulations.

2. Amendment of subsections (a) and (b) and amendment of NOTE filed 3–30–2005; operative 4–29–2005 (Register 2005, No. 13).
3. Amendment of subsection (c) and new subsection (d) filed 9–15–2006; operative 10–15–2006 (Register 2006, No. 37).

§ 852.4. Minimum Escort Tug Requirements for Tankers.

Only those tankers designed or modified to carry 5,000 long tons or more of oil or petroleum products as cargo are required to engage escort tugs in accordance with this subchapter except as provided in (i) below.

(a) Each tanker shall engage escort services as follows:

(1) for inbound transits prior to passing between buoys 5 and 6, escort tug(s) shall remain with the tanker until it is properly berthed or anchored;

(2) for outbound transits from the berth or anchorage, escort tug(s) shall remain with the tanker until either safely at sea or after passing between buoys 5 and 6;

(3) while shifting from one location to another within the harbor.

(b) Before commencing an escorted transit, the pilot or master of the tankers shall initiate communications with the escort tug. During this pre–escort communication, all parties shall plan and discuss the details of the escorted transit including, but not limited to, the following:

(1) the intended route;

(2) the intended destination;

(3) the speed of the tanker;

(4) the positioning of the tug(s) relative to the tanker being escorted;

(5) the manner in which an emergency connection would be made between the tug(s) and tanker;

(6) radio communications, including primary and secondary frequencies; and

(7) anticipated weather, tidal, and sea conditions.

(c) Except as provided in (i) below, each tanker shall engage escort services as required by this subchapter whether laden or unladen.

(d) Each tanker shall have a minimum of one escort tug, except as stated in (e) and (i) below.

(e) All tankers over 20,000 deadweight tons shall have a minimum of two escort tugs.

(f) Escort tug(s) shall maintain an optimum station–keeping position as directed by the pilot or tanker master so as to best render assistance if needed. In any case, the escort tug(s) shall stay within 1/8 mile of the tanker while providing escort services.

(g) Tankers requiring escort services shall proceed at a safe speed which shall not exceed 10 knots or the speed at which their escort tug(s) can render assistance, whichever is less. Safe speed shall also take into consideration other factors, including but not limited to, depth of water, visibility, wind conditions, tidal currents, escort tug wakes, other traffic, and vessels at anchor.

(h) All tugs engaging in escort services for a tanker shall have multiple main propulsion systems.

(i) Exemptions:

(1) Where an emergency or extraordinary circumstances exist to threaten public safety, the environment, and/or the vessel, its crew or cargo, the pilot or master of a tanker is authorized to override this section consistent with provisions of the Inland Navigational Rules Act (33 USC 2001 et seq.) for same or similar circumstances. The pilot or master shall report any such event to the U.S. Coast Guard Captain of the Port. For purposes of this section, an emergency or extraordinary circumstances shall include, but not be limited to, any of the following:

(A) imminent and immediate danger to the vessel, its cargo or its crew;

(B) imminent and immediate danger to a marine terminal, service or escort tug;

(C) imminent and immediate danger to a vessel in the proximity of the escorted vessel; or

(D) any emergency declared by the U.S. Coast Guard Captain of the Port.

(2) A tanker shall not be required to engage escort services when it is carrying 5% of the vessel's deadweight tonnage, or 5,000 long tons, whichever is less, of oil or petroleum products as cargo, and is in ballast and inert or gas free.

(3) This subchapter shall not apply to tankers with double hulls, as that term is defined in 33 CFR Section 157.03, when the tanker also has fully redundant steering and propulsion systems. To be considered fully redundant, a steering and propulsion system shall include at least the following:

(A) two propellers with an engine dedicated to each; and

(B) two rudders with separate steering motors; and

(C) an operating bow thruster with a dedicated power source.

HISTORY

1. New section filed 1–23–97; operative 2–22–97 (Register 97, No. 4).
2. Amendment of subsection (i)(2) filed 7–24–98; operative 8–23–98 (Register 98, No. 30).
3. Amendment of NOTE filed 3–30–2005; operative 4–29–2005 (Register 2005, No. 13).

§ 852.5. Minimum Escort Tug Requirements for Barges.

Only those barges designed or modified to carry 5,000 long tons or more of oil or petroleum products as cargo, and which are laden with 5% or more of the vessel's deadweight tonnage in oil or petroleum products, shall be required to engage escort tug(s) in accordance with this subchapter.

(a) Each barge shall engage escort services as follows:

(1) for inbound transits prior to passing between buoys 5 and 6, escort tug(s) shall remain with the barge until it is properly berthed or anchored;

(2) for outbound transits from the berth or anchorage, escort tug(s) shall remain with the barge until either safely at sea or after passing between buoys 5 and 6;

(3) while shifting from one location to another within the harbor.

(b) Before commencing an escorted transit, the pilot or master of the dedicated tug of a barge shall initiate communications with the escort tug. During this pre–escort communication, all parties shall plan and discuss the details of the escorted transit including, but not limited to, the following:

(1) the intended route;

(2) the intended destination;

(3) the speed of the barge;

(4) the positioning of the tug(s) relative to the barge being escorted;

(5) the manner in which an emergency connection would be made between the tug(s) and barge;

(6) radio communications, including primary and secondary frequencies; and

(7) anticipated weather, tidal, and sea conditions.

(c) Barges shall have a minimum of one escort tug in addition to their dedicated tug.

(d) Exemption:

(1) Where an emergency or extraordinary circumstances exist to threaten public safety, the environment, and/or the vessel, its crew or cargo, the pilot or master of the dedicated tug of a barge is authorized to override this section consistent with provisions of the Inland Navigational Rules Act (33 USC 2001 et seq.) for same or similar circumstances. The pilot or master shall report any such event to the United States Coast Guard Captain of the Port. For purposes of this section, an emergency or extraordinary circumstances shall include, but not be limited to, any of the following:

(1) imminent and immediate danger to the vessel, its cargo or its crew;

(2) imminent and immediate danger to a marine terminal, service or escort tug;

(3) imminent and immediate danger to a vessel in the proximity of the escorted vessel; or

(4) any emergency declared by the U.S. Coast Guard Captain of the Port.

Subchapter 6. Vessel Traffic Information Service for the Ports of Los Angeles and Long Beach

Article 1. General Requirements

§ 852.20. Effective Date of Regulations.

This subchapter shall be effective May 1, 1995, and shall remain in effect no longer than five years from the effective date unless extended, amended or otherwise replaced by subsequent regulations. Any such amendment or replacement of these regulations shall provide for the best achievable protection of the marine waters of California.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code.

HISTORY

1. New subchapter 6 (§§ 852.20–852.30), article 1 (§§ 852.20–852.30) and section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).

§ 852.21. Purpose and Scope.

This subchapter sets forth reporting, fee and payment requirements for certain vessels using the Vessel Traffic Information Service (VTIS) for the Ports of Los Angeles and Long Beach. The regulations specify the amount of the fee to be imposed on covered vessels and the method of payment. State law, Section 445 et. seq., of the Harbors and Navigation Code, requires certain vessels to report to the VTIS when navigating within the area of coverage as specified in Section 852.24, of this subchapter. By reporting to the VTIS, covered vessels, and other vessels using waters within the VTIS area, will be provided with information to reduce the possibility of groundings or collisions and the risk of oil or fuel spills from such events.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).

§ 852.22. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this Subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "Covered vessel" means any of the following:

(1) Every power–driven vessel of 40 meters (approximately 131 feet) or more in length, while navigating.

(2) Every towing vessel of 8 meters (approximately 26 feet) or more in length, while navigating. "Towing vessel," as used in this subchapter, means any commercial vessel engaged in towing another vessel astern or alongside or by pushing it ahead.

(3) Every vessel issued a certificate to carry 50 or more passengers for hire, when engaged in trade.

(4) Covered vessel does not include military or public vessels of the United States, or vessels transiting the VTIS area as described in Section 852.24 which are engaged in innocent passage as defined in Article 19, Convention on the Law of the Sea.

(b) "Fee" means the fee assessed pursuant to Section 852.28 of this subchapter and deposited in the Vessel Safety Account of the Oil Spill Prevention and Administration Fund in the State Treasury.

(c) "Marine Exchange" means the Marine Exchange of Los Angeles–Long Beach Harbor, Inc., a corporation organized under the Non–Profit Mutual Benefit Corporation Law, (Part 3 (commencing with Section 7110) of Division 2 of Title 1 of the Corporations Code.

(d) "Operator" is the person defined in Section 651(q) of the Harbors and Navigation Code.

(e) "Ports" means the Ports of Los Angeles and Long Beach.

(f) "VTIS area" means the Designated Reporting Area specified in Section 852.24 of this subchapter.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).
2. Change without regulatory effect amending section filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Change without regulatory effect amending definition of "Covered vessel" and "Marine exchange" filed 1–9–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 2).

§ 852.23. Applicability.

(a) This subchapter shall apply to all covered vessels as defined in Section 852.22 of this subchapter and, in part, to those vessels found in subsection (b), below.

(b) Vessels described in this subsection shall comply with the requirements of Section 447.5 of the Harbors and Navigation Code:

(1) Every power–driven vessel of 20 meters or more in length.

(2) Every vessel of 100 gross tons or more carrying one or more passengers for hire.

(3) Every dredge and floating plant.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).
2. Change without regulatory effect amending section filed 1–9–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 2).

§ 852.24. Designated Reporting Area.

(a) The VTIS area includes the waters of San Pedro Bay, San Pedro Channel, and Santa Monica Bay and navigable waters seaward of the breakwaters that are encompassed by the arc of a circle having its center at Point Fermin Light, with a radius of twenty–five (25) nautical miles drawn from a position on the shore in the vicinity of Laguna Beach, clockwise to a point on the shore approximately midway between Santa Monica and Malibu.

(b) The VTIS area does not include any waters inland from the lines of demarcation, as specified in Title 33 Code of Federal Regulations, Section 80.1114.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).
2. Change without regulatory effect amending subsection (a) filed 1–9–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 2).

§ 852.25. Reporting Requirements.

(a) No person shall operate, navigate or transit within the VTIS area with a covered vessel unless the operator of such covered vessel complies with reporting requirements specified in Section 446 of the Harbors and Navigation Code, the Tariff Rules of the applicable port, and pays the fee as prescribed by local Tariff Rule or by Section 852.28 of this subchapter.

(b) No person shall operate, navigate or transit within the VTIS area with a vessel described in subsections 852.23(b) of this subchapter, unless the operator of such vessel complies with the reporting requirements specified in Section 447.5 of the Harbors and Navigation Code, and the Tariff Rules of the applicable port.

(c) Vessels moving from an anchorage area within the VTIS area shall report to the Marine Exchange at least 15 minutes, but no more than 1 hour, prior to getting underway.

(d) In addition to information required by Section 446 of the Harbors and Navigation Code, the operator of a covered vessel shall also report the vessel's LOA, as defined, and whether or not any dangerous cargo, as listed in 33 Code of Federal Regulations Part 160, Subpart C, is on board the vessel or its tow.

(e) A covered vessel operating within the harbor complex inland of the lines of demarcation, as specified in Section 852.24(b) of this subchapter, and not engaging a pilot, shall report to the appropriate pilot station in accordance with the Tariff Rules of each of the ports.

(f) All communication with the VTIS required by this section shall be conducted in accordance with applicable Federal regulations which have been incorporated in the VTIS Operations Manual developed by the Marine Exchange.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).
2. Change without regulatory effect adding new subsection (b) and subsection relettering filed 1–9–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 2).

§ 852.26. Duties of the Marine Exchange and the Administrator.

(a) The Administrator shall enter into an agreement with the Marine Exchange which shall operate the VTIS in accordance with Section 8670.21 of the Government Code, and Division 3, Chapter 1, Article 4 of the Harbors and Navigation Code. The Administrator shall direct the Marine Exchange to perform the following duties:

(1) facilitate the safe transit of vessel traffic to prevent collisions, rammings, groundings, and environmental damage through aiding navigation by providing information regarding ship locations and traffic; and

(2) receive notification of a covered vessel's arrival and movement as required under Section 446 of the Harbors and Navigation Code prior to the entry of such vessels into the VTIS area; and

(3) monitor compliance with the requirements of this subchapter and report all violations to the office of Oil Spill Prevention and Response and the Harbor Safety Committee for the Los Angeles/Long Beach Region; and

(4) act as an agent of the Administrator for the collection of the fee as prescribed in Section 852.27 of this subchapter. The requirements of this subchapter create no other agency relationship, express or implied, between the Administrator and the Marine Exchange.

(b) The Administrator shall ensure that the duties of the Marine Exchange in the operation of the VTIS are performed in an effective and impartial manner.

(c) The Administrator shall convene, as appropriate, the Los Angeles/Long Beach Harbor Safety Committee, established pursuant to Section 8670.23 of the Government Code, to provide a public forum for oversight of the VTIS operation. Any recommendation or finding of the Harbor Safety Committee shall be forwarded to the Administrator according to the schedule set forth in Section 8670.23(k) of the Government Code or at any other time deemed appropriate by the Harbor Safety Committee.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Sections 8670.21 and 8670.23(e), Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).

§ 852.27. Collection and Payment of Fee.

(a) In the event that the Ports of Los Angeles and/or Long Beach fail to impose a fee in accordance with Section 446.5 of the Harbors and Navigation Code and Section 8670.21(e)(2) of the Government Code that the Administrator deems sufficient to pay the cost of operating the vessel traffic service, the Administrator shall assess a VTIS reporting fee as set

forth in Section 852.28. The fee shall be collected by the Marine Exchange, acting for the Administrator for fee collection purposes only.

(b) The fee shall be imposed on all covered vessels whenever transiting through or navigating within the VTIS area.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).
2. Change without regulatory effect amending subsection (a) filed 1–9–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 2).

[The next page is 200.51.]

§ 852.28. Fee Determination.

(a) On behalf of the Ports or the Administrator, the Marine Exchange shall collect a fee from every covered vessel for each entry to the harbor complex, according to the following schedule:

(1) Each Vessel Over	But Not Over	Fee
0 Meters	150 Meters LOA	$180.00
150 Meters	190 Meters LOA	$200.00
190 Meters	230 Meters LOA	$230.00
230 Meters	270 Meters LOA	$270.00
270 Meters	310 Meters LOA	$300.00
310 Meters	–	$340.00

(A) Exceptions to this requirement are as follows:

1. Any covered vessel for hire operating in a scheduled passenger or freight service between the mainland California coast and Santa Catalina Island which traverses the VTIS area, shall pay a fee of $300.00 per month, per covered vessel during the months of June, July and August and $150.00 per month, per covered vessel during all other months of the year.

2. Any covered vessel engaged in commercial rescue or emergency assistance service for hire, primarily to recreational boaters, which traverses the VTIS area, shall pay a fee of $25.00 per month per covered vessel.

3. Any covered vessel for hire, engaged in off shore oil well maintenance and service, or, any vessel engaged in construction projects, when such vessels is navigating between points in the California mainland coast range, from Point Dume south to Dana Point and including Santa Catalina Island or a designated dumping area for dredging spoils, which traverses the VTIS area, shall pay a fee of $300.00 per month per covered vessel.

(2) The fees prescribed in this subsection may be collected in combination with any other fees collected by the Marine Exchange, provided that the Marine Exchange maintains records of such collections. If the Marine Exchange chooses to collect fees in combination with other fees, all records shall be made available to the Administrator upon request, for accounting purposes.

(b) Upon written request of the Marine Exchange, the Administrator shall review the fee schedule to determine if adjustments may be necessary according to the costs incurred by the Marine Exchange, and the projected revenues for the upcoming State fiscal year. Any adjustment to the fee schedule shall be made in consultation with the Ports.

NOTE: Authority cited: Section 8670.21, Government Code. Reference: Section 8670.21, Government Code; and Division 3, Chapter 1, Article 4, Harbors and Navigation Code.

HISTORY

1. New section filed 3–2–95; operative 4–3–95 (Register 95, No. 9).

§ 852.29. Fee Usage.

The fee collected on behalf of the Administrator by the Marine Exchange shall be deposited in the Vessel Safety Account of the Oil Spill Prevention and Administration Fund in the State Treasury. Money in this account shall be used only for the following purposes:

(a) to establish and fund the operation of a VTIS for the Ports;

(b) to reimburse the U.S. Coast Guard for the cost of assigning Coast Guard personnel to the VTIS;

(c) to reimburse the Marine Exchange for actual costs incurred in the collection of fees pursuant to this subchapter;

(d) to repay any loans made to establish and operate the VTIS;

(e) to provide a reasonable reserve for contingencies.

Chapter 5. Loans, Claims and Grants

Subchapter 1. Local Government Grant Program

Article 1. General Provisions and Definitions

§ 852.60.1. Short Title.

This Chapter shall be known and may be cited as the Local Government Grant Program.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Sections 8574.1, 8574.7, 8670.1, 8670.3, 8670.6, 8670.35 and 8670.38, Government Code.

HISTORY

1. New chapter 4, subchapter 1 and section filed 2–22–93; operative 2–22–93 (register 93, No. 9).
2. Change without regulatory effect renumbering former chapter 4 to chapter 5, amending subchapter 1 heading, and amending section filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Change without regulatory effecting amending section filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
4. Amendment of NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.60.2. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this Subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "Applicant" means any local government which is applying for a grant. Such government must be required to implement a Hazardous Materials Area Plan pursuant to Health and Safety Code Section 25503, and must have jurisdiction over or be directly adjacent to marine waters.

(b) "Area Plan" see "Hazardous Materials Area Plan".

(c) "Fund" means the Oil Spill Prevention and Administration Fund established pursuant to Section 8670.38 of the Government Code.

(d) "Grant" means an award of funds to a local government based on the evaluation and selection of the applicant government's proposal for the completion, update or revision of an oil spill contingency plan element. The awarding of a grant is subject to availability of cash reserves in the Oil Spill Prevention and Administration Fund.

(e) "Grant Agreement" means the written agreement, and any amendment(s) and written change orders thereto, which is/are signed by the Administrator or his/her designated representative and the grant recipient, and which defines the terms, provisions and conditions governing the grant.

(f) "Grant Recipient" means the local government which receives a grant award from the Department of Fish and Game, Office of Spill Prevention and Response (Department or OSPR).

(g) "Hazardous Materials Area Plan", referred to as an Area Plan in this subchapter, means the plan specified in Section 25503 of the Health and Safety Code pertaining to emergency response to a release or threatened release of a hazardous material within a city or a county and any additional minimum planning requirements identified in this subchapter.

(h) "Local Oil Spill Contingency Plan Element" or "local plan" means that element of a Hazardous Materials Area Plan pertaining to emergency response to a release or threatened release of oil or other hazardous material within a city or a county and any additional minimum planning requirements identified in this subchapter.

(i) "Regional Plan" for purposes of prioritization of grant awards pursuant to this subchapter, means a regional oil spill contingency plan element which encompasses all local governments within an entire U.S. Coast Guard Designated Area.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Sections 8574.1, 8574.7, 8670.1, 8670.3, 8670.6, 8670.35 and 8670.38, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effect amending section filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Change without regulatory effecting amending subsections (a), (f) and (h) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
4. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.60.3. Objectives of Local Government Grant Program.

The objective of the local government grant program is to encourage local governments to complete, update or revise an oil spill contingency plan element and to help provide a coordinated response and cleanup effort between local governments and State and Federal officials in order to provide the best achievable protection of the California Coast.

NOTE: Authority cited: Sections 8574.7, 8670.35, 8670.39 and 8670.40, Government Code. Reference: Sections 8574.7 and 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Amendment of NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.60.4. Duties and Responsibilities.

The Administrator has the lead state authority and responsibility for overseeing oil spill response and clean up activities in marine waters, identification of natural resources, protection priorities and damage assessment after an oil spill, in consultation with other state agencies and local governments.

In the event of an oil spill in marine waters, the Department of Fish and Game shall conduct an initial on–scene assessment of the spill and review the measures being taken by the responsible party and determine the appropriate level of response. In the event that the United States Coast Guard is on the scene first and has done an assessment, the Department may accept the Coast Guard's initial assessment and response determination if it is consistent with the guidelines set forth in the state oil spill contingency plan. The State shall establish a Unified Command with the U.S. Coast Guard at a spill in which both the State and Federal forces are involved.

The Unified Command shall consist of the State's On–Scene Coordinator, the Federal On Scene Coordinator, the senior representative of the party responsible for the spill if the party is identified and assumes responsibility and, if included in the MOU described in Subsection (d) below, the representative(s) from the local jurisdiction(s) directly impacted by the spill. The local government representative(s) shall be designated within the local oil spill contingency plan element prepared pursuant to Section 852.62.2(a)(1)(E) of this subchapter.

Such participation by local governments in the Unified Command shall be conditioned on the following:

(a) Completion of a local plan that meets the requirements of Government Code Section 8670.35 and this subchapter.

(b) Participation by local governments in the area contingency planning process of the United States Coast Guard.

(c) Recognition of the Federal On–Scene Coordinator and the State On–Scene Coordinator who have the authority to issue orders and direction to the responsible party.

(d) Upon completion of the process described in Article 2 of this subchapter, a memorandum of understanding (MOU) shall be entered into among the State and all local governments within a county. The MOU is for the purposes of ensuring a unified and coordinated effort between State and local government agencies through appropriate mutual aid in the event of an incident and the coordinated and informed representation within the Unified Command.

2. Change without regulatory effecting amending second and third paragraphs and subsection (d) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

Article 2. Grant Application Provisions

§ 852.61.1. Scope and Applicability.

(a) The regulations contained in this Article set forth the minimum criteria to be developed or identified in a local oil spill contingency plan element submitted by local governments responsible for the completion, updating or revision of an oil spill plan element in order to apply for and receive a grant from the Fund.

(b) This Article applies to all eligible applicants.

NOTE: Authority cited: Sections 8670.35, 8670.38 and 8670.39, Government Code. Reference: Sections 8574.1, 8574.7, 8670.7, 8670.35 and 8670.38, Government Code.

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Amendment of NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.2. Grant Application Process.

(a) An applicant shall submit the documents specified in Section 852.61.6 of this Article in order to apply for a grant.

(b) An original and five (5) copies of the documents required in Subsection (a) shall be submitted to the Administrator. All applications and supporting documents submitted prior to the applicable deadline will become the property of the Administrator. The original documents or one copy will be retained for a minimum of three (3) years for all applicants receiving a grant award.

(c) Documents required in Subsection (b) shall be delivered to the Department of Fish and Game, (OSPR) at the address set forth in the Grant Application.

(d) The documents required in Subsection (b) must be received by the Administrator on or before the close of the application period specified in Section 852.61.4. Grant applications received after the applicable deadline will be returned to the applicant unopened.

(e) Submission of the documents required in Subsection (b) shall be deemed to be an applicant's acceptance of the terms and conditions set forth in this subchapter.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsections (c) and (d) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.3. Grant Applicant Eligibility.

(a) The Administrator may award a grant to an applicant if the following eligibility criteria are met:

(1) The applicant is a local government which is required to implement an Area Plan pursuant to Section 22503(a) and (b) of the Health and Safety Code, and has jurisdiction over or is directly adjacent to marine waters as defined; and

(2) The applicant has elected to complete, update or revise an oil spill contingency plan element of a Hazardous Materials Area Plan pursuant to Section 25503 of the Health and Safety Code, in accordance with this subchapter.

(b) A county, whose designated jurisdiction excludes an independently eligible city(s), is not eligible to obtain additional funds which the ex-

cluded city(s) may be eligible to receive, unless it is a county–city joint plan proposal as specified in Section 852.61.8 of this subchapter.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Sections 8574.1, 8574.7, 8670.7 and 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsection (b) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.4. Grant Application Period.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code; and section 22 of the Act. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Repealer filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.5. Grant Amount.

(a) No grant to an individual local government may exceed $50,000. Grants awarded to local governments submitting joint proposals to prepare, update or revise an area plan(s), as specified in Section 852.61.8 of this subchapter, shall be awarded an amount not to exceed $50,000 for each local government covered by the proposal. Grant awards for subsequent fiscal years shall be determined subject to and in accordance with, annual appropriations by the California Legislature for such purposes.

(b) Grant amounts shall be determined by the Administrator, based on the number of eligible grant recipients selected to receive an award pursuant to Section 852.61.8 and the extent to which the proposal addresses the minimum planning requirements set forth in Section 852.62.2 of this subchapter.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending section filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.6. Contents of the Grant Application.

Applicants shall submit to the Administrator a Grant Application which shall include, but not be limited to, the following:

(a) A Local Government Grant Application (Application), form #FG–OSPR 1914 (New 2/92). The Application must be signed by an authorized official(s) of the Local Government(s) covered by the proposal.

(b) A Project Proposal, which shall include all of the following:

(1) A description of the oil spill contingency plan element to be completed, updated or revised pursuant to Sections 852.62.1 and 852.62.2 of this Article.

(2) An explanation of the proposal's goals or objectives;

(3) A map identifying the geographical area covered by the proposal;

(4) A description of the procedures and methodology to be used to complete, update or revise the oil spill contingency plan element. This shall include, but is not limited to, a description of the work plan; need for consulting services; milestones for completion; levels of plan review; provisions for ensuring consistency with the area plans for United States Coast Guard Captain of the Port Areas, the State and National Oil Spill Contingency Plans, and local coastal programs pursuant to Section 30500, Public Resources Code; and target completion date;

(5) A list of all persons required to implement the proposal by name and title or position, and a brief job description.

(c) A Budget Report consisting of a breakdown of costs to be incurred during the project term. This shall include, but is not limited to, personnel services, contracted professional and consultant services, and operating expenses that include publication costs required to implement the proposal.

(d) A Declaration by the authorized official(s) identified in Subsection (a) of this section stating that the person or entity submitting the application is authorized to submit the application on behalf of the local government(s).

NOTE: Authority cited: Sections 8574.1, 8574.7, 8670.7, 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Sections 8574.1, 8574.7, 8670.7, 8670.35 and 8670.38, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsections (b)(1), (b)(4) and (d) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.7. Review of Grant Application.

(a) The Administrator shall have thirty (30) calendar days in which to review the grant application and verify that it is complete and includes all necessary documents and information as set forth in Section 852.61.6.

(b) If the information contained in the grant application, including supporting documents, is insufficient, the Administrator may request additional information. The applicant shall have 10 (ten) calendar days from the date of the request to submit the requested information to the Administrator. Failure to submit the additional information during this time period may result in the disqualification of applicant. The Administrator may, at his or her discretion, extend the 10 (ten) calendar day period for good cause.

(c) The Administrator shall have twenty (20) calendar days following the initial review period or deadline for submission of additional information, whichever is applicable, to conduct a detailed technical review of the proposal to determine whether it contains the minimum planning requirements set forth in Subsection 852.62.2 of this subchapter.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsection (c) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of subsections (a) and (c) and amendment of NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.8. Evaluation and Selection of Grant Recipient.

(a) The Administrator may select one or more grant recipients from those applicants meeting the grant eligibility criteria set forth in Section 852.61.3, provided the grant proposals they submitted contain the minimum planning requirements set forth in Section 852.62.2 of this subchapter.

(b) The Administrator will apply the following criteria to determine prioritization of grant awards in the event that maximum grant awards can not be given to all applicants during any one fiscal year. The total number of points possible is 150.

(1) Prioritization will be given in decreasing order from (A) to (F), with the highest priority going to (A), Regional Plan Proposals covering one of the Coast Guard Designated Areas, which are outlined in Subsection (d) below.

(A) Regional Plan Proposals, as defined in Section 852.60.2, which include all cities and counties in a Coast Guard Designated Area for oil spill response. 80 points.

(B) Regional Plan Proposals which include less than all cities and counties in a Coast Guard Designated Area for oil spill response. 70 points.

(C) County–City Joint Proposals which cover at least one county and one city for oil spill response. 60 points.

(D) County Plan Proposals which cover one county for oil spill response. 50 points.

(E) Multi–City Plan Proposals which cover two or more cities for oil spill response. 40 points.

(F) City Plan Proposals which cover one city for oil spill response. 30 points.

(2) Following prioritization in accordance with Subsection (b)(1) above, the Administrator may take into account the following criteria in order to make the selection of grant recipients:

(A) The length of coast line that would be protected by the proposal. 20 points.

(B) The risk of oil spills, based on history of spills, and/or volume of oil transported in and along the coastline covered by the proposal and/or number of marine facilities covered by the proposal. 50 points.

(C) Notwithstanding subparagraph (b), the Administrator shall have the discretion to award grants to: grant applicants which have not previously received a grant award; to grant applicants submitting grant applications for the purpose of updating a local government oil spill contingency plan element, in order to be consistent with any changes in the National and/or State Contingency Plan(s); or to applicants submitting proposals covering areas of the coast, determined by the Administrator to be important in order to provide the best achievable protection for the California Coast, including, but not limited to sensitive environmental areas, areas containing unique environmental characteristics, and/or key areas of economic concern.

(d) For purposes of this subchapter, the proposed geographic boundaries for the Coast Guard Designated Areas are as follows:

(1) North Coast – Oregon Border to the Sonoma/Mendocino County line.

(2) San Francisco & Delta Region – Sonoma/Mendocino County line to the Santa Cruz/San Mateo County line, including San Francisco Bay and the portions of the Sacramento/San Joaquin Delta used for waterborne commercial vessel traffic to the Port of Stockton and the Port of Sacramento.

(3) Central Coast – Santa Cruz/San Mateo County line to the San Luis Obispo/Monterey County line.

(4) Northern Los Angeles/Long Beach – San Luis Obispos, Ventura and Santa Barbara Counties.

(5) Southern Los Angeles/Long Beach – Los Angeles and Orange Counties.

(6) San Diego – San Diego/Orange County line to the Mexico Border.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsections (a), (b)(1), (b)(1)(A) and (b)(2) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.9. Notice of Grant Award or Denial.

(a) Within 10 (ten) business days following the review period specified in Section 852.61.7, the Administrator shall notify each applicant in writing whether its grant application was approved for award or denied.

(b) If the grant award is for less than the amount requested in the grant application, the applicant shall have five (5) business days from the date of notification of grant award to submit a revised budget, or to withdraw the application. The administrator shall have five (5) business days from the date of receipt of revised budget to approve or deny the revision.

(c) The notice of denial shall include the basis for denial and the name of a person who may be contacted for further information.

(d) Request for Reconsideration. The grant recipient shall have ten (10) calendar days from the date of the notice of denial to submit a written request for reconsideration of any decision to deny award. The request must contain the basis for requesting reconsideration and, if applicable, provides evidence which rebuts the basis for the denial. Within ten (10) calendar days from the date the request for reconsideration is received, OSPR will advise the grant recipient, in writing, of the Administrator's decision to grant or deny the request.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsection (a) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.10. Grant Agreement.

(a) The written Grant Agreement shall contain the State of California standard agreement and addendums required by the Department of General Services, the grant proposal, the budget approved by Administrator, assure compliance with the terms and conditions specified in Section 852.61.11, and contain any other terms or conditions which the Administrator may deem necessary to carry out the purpose of this subchapter.

(b) Within forty–five (45) calendar days from the date the grant recipient is notified of the grant award or the date of approval of the revised budget, whichever is applicable, the OSPR shall mail the Grant Agreement to grantee.

(c) Upon receipt of the Grant Agreement, the grantee is required to return a signed original and five (5) copies to the OSPR within Sixty (60) calendar days along with a copy of the resolution, order, motion, or ordinance of the affected local governments' local governing body(s) by law having authority to enter into the proposed Grant Agreement, approving and authorizing execution of the Grant Agreement. Failure to execute the agreement within this period may constitute withdrawal of the application.

(d) Modifications to the executed Grant Agreement may be made only upon prior written approval by the Administrator or his or her designated representative. All requests for modification shall include a detailed description of the proposed change(s) and the reason(s) for the changes.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending section filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of subsections (a)–(c) filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.11. Terms and Conditions of a Grant Agreement.

The Grant Agreement shall contain the following terms and conditions:

(a) Midterm Report. The grant recipient shall be required to submit a midterm progress report to the Administrator within thirty (30) calendar days following the midterm of the project. The midterm of the project shall be based on the completion date specified in the grant proposal, unless otherwise agreed to by the Administrator. The report shall include, but not be limited to, all of the following:

(1) A statement that the oil spill contingency plan element being completed, updated or revised is or is not on schedule, and a description of the project tasks or milestones and the status of each. Pertinent reports or interim findings shall be appended.

(2) A discussion of any difficulties or special problems encountered in accomplishing the project tasks.

(3) A financial report comparing costs to date with the approved scope of work and the original approved budget. The report should state whether the program is progressing within the approved budget, and an explanation of any current or anticipated deviations. The report shall include a Statement of Expenditures showing the program's expenditures incurred to date.

(4) A report of any changes in personnel assigned to the development, review or approval of the project.

(b) Compliance. Grant recipients shall comply with all applicable federal, state and local laws, ordinances, regulations and permits.

(c) Subcontractors. Grant recipients shall maintain a list of all subcontractors required to implement the proposal, including name, address, and a description of their work. Applicants must comply with all applicable State Administrative Manual requirements when utilizing subcontractors for services required pursuant to the Grant Agreement.

(d) Auditing:

(1) All grant recipients shall maintain an accounting system which utilizes Generally Accepted Accounting Principles and practices. The Administrator, the State Controller's and the State Auditor General's office, or their designated representatives, shall have a right of reasonable access during normal business hours to all of the grant recipient's records pertaining to the grant.

(2) In addition to accounting records, all source documents associated with the accounting records shall be maintained by the grant recipient in sufficient detail to demonstrate that the funds were used for the purpose for which the grant program is intended. Source documents include, but are not limited to, bid summaries, contracts with the grant recipient, change orders showing approval by a city or county official, purchase orders, invoices, paid warrants, time sheets, labor distribution reports and payroll registers.

(3) The accounting records and source documents shall be retained for at least three (3) years after the grant is awarded, or until resolution of all issues which may arise as a result of any litigation, claim negotiation or audit, whichever is later.

(4) If an audit reveals that grant funds have not been spent in accordance with the Grant Agreement, the Administrator shall terminate the Grant Agreement, and take such steps as necessary to recover funds not spent in accordance with the Grant Agreement. Further, the grant recipient shall be required to forfeit the unexpended portion of the grant. Such forfeitures shall revert to the Fund.

(e) Grant Termination. The Administrator may, upon determining that the receipient has failed to comply with the terms or conditions of the Grant Agreement, terminate any grant in whole, or in part, at any time before the date of completion. The Administrator shall notify the recipient in writing of the termination, the reasons for the termination of the grant, and the effective date of termination. Termination of the Grant Agreement shall result in forfeiture of any funds withheld pursuant to Section 852.61.12(b) of this subchapter.

(f) Request for Reconsideration. The grant recipient shall have ten (10) calendar days from the date of the notice of grant termination to submit a written request for reconsideration of any decision to terminate the Grant Agreement. The request must contain the basis for requesting reconsideration and, if applicable, provide evidence which rebuts the basis for the grant termination. Within ten (10) calendar days from the date the request for reconsideration is received, OSPR will advise the grant recipient, in writing, of the Administrator's decision to grant or deny the request.

(g) Final Report. Upon completion and approval of the oil spill plan element by the Administrator in accordance with the Grant Agreement, pursuant to Section 852.62.3 of this subchapter the grant recipient shall submit a final report. The report shall be submitted within sixty (60) calendar days from the completion and approval of the above stated plan and shall include, but is not limited to:

(1) A Table of Contents.

(2) A brief summary of the objectives of the grant and how these objectives were accomplished.

(3) Any findings, conclusions, or recommendations for additional activities which result from the successful completion of the program for that grant year. A statement, if applicable, of future public and/or private support to maintain or further develop the local contingency plan.

(4) A list of subcontractors who participated, in whole or in part, in the grant program, including the names, addresses and a description of their work. Participating subcontractors must be selected in accordance with procedures outlined in the Grant Agreement.

(5) Final Financial Statement for the Program. This report shall provide information that enables the Administrator to determine the final specific use for all grant funds distributed and may include the final payment request. It shall also indicate all other sources of funds utilized by the program.

(6) Three copies of the completed and approved oil spill contingency plan element, which was completed, updated, or revised pursuant to the Grant Agreement. If portions of the local governments' area plan prepared in accordance with Section 25503 of the Health and Safety Code are cross referenced in the oil spill contingency plan element, the area plan must also be submitted as an addendum to the final report.

(h) A grant recipient shall certify to the Administrator every three (3) years that it has conducted a complete review of the oil spill element of the plan and has made necessary revisions. Whenever substantial changes are made to the oil spill contingency plan element, the grant recipient shall forward such changes to the Administrator within fourteen (14) calendar days of making such changes.

(i) Payment of Funds. Payment of grant funds shall be in accordance with Section 852.61.12 of this subchapter.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsections (c), (d)(4), (e)–(g), (g)(4), (g)(6) and (i) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.61.12. Payment of Grant Funds.

(a) The grant recipient may submit payment requests made in arrears consistent with the time frames set forth in the Grant Agreement.

(b) The OSPR shall retain 10% of the total amount awarded or 10% of any payment request until after the oil spill contingency plan element has been approved pursuant to Section 852.62.3 of this subchapter, the final report has been submitted, and the Administrator has determined that the grant recipient has complied with all terms and conditions of the Grant Agreement.

(c) All payment requests, including the final payment request, shall be submitted to the OSPR within 18 months from the date the Grant Agreement is executed, unless the Administrator approves requests submitted after that period.

(d) The balance of any grant award which is not encumbered during the period set forth in the preceding subparagraph (c) shall be deemed forfeited by the grant recipient. In no event may grant monies be encumbered following three years from the date of the Grant Agreement.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsection (b) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.62.1. Format and Consistency Requirements for Proposed Oil Spill Contingency Plan Element.

(a) To the greatest extent possible, the oil spill contingency plan element contents shall be consistent with all of the following programs or plans:

(1) Area plans required pursuant to Chapter 6.95 of the Health and Safety Code commencing at Section 25500;

(2) The local government's coastal program as certified under Section 30500 of the Public Resources Code;

(3) Local Emergency Response plans required by the National Contingency Plan as revised pursuant to regulations implementing Section 4201(c) of OPA 90.

(b) Each local oil spill contingency plan element shall meet all applicable State and Federal Occupational Safety and Health Administration requirements.

(c) Each local oil spill contingency plan element shall follow the format of the Area Contingency Plans comnpleted by the United States Coast Guard, state agencies, and local government, as required by the OPA 90 (33 USC 2701, et seq.)

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code; and OPA 90 (33 USC 2701, et seq).

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsections (a)(1)–(c) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.62.2. Minimum Planning Requirements.

(a) The Emergency Notification and Coordination Section.

The Emergency Notification and Coordination Section shall contain information which is essential for emergency notification(s) and coordination of incident response to an oil spill in marine waters within or adjacent to the jurisdiction of the local government.

(1) Emergency Notification.

The purpose of the Emergency Notification provisions set forth in this section is to provide timely notice to appropriate agencies and emergency personnel at the state, federal and local level. Emergency Notification shall include the following:

(A) Predesignation of the local government's primary contact person, including title and primary and after–hours telephone number, who is charged with the responsibility and authority to initiate local oil spill response operations.

(B) A current list of telephone numbers and addresses of the federal, state and local organizations and agencies to be notified by the local government's primary contact person when an oil discharge is discovered, which shall include the Office of Emergency Services. The Office of Emergency Services is currently required to then notify public agencies which may be affected by a spill, including the OSPR.

(C) A current list of local emergency response personnel, by job classification or title, including primary and after–hours telephone numbers and addresses of personnel on call to receive notification of an oil discharge.

(D) The local emergency response personnel and local organizations and agencies identified in Subsections (a)(1)(B) and (a)(1)(C) must include, but are not limited to: law enforcement; fire fighting services; medical and public health and safety services; poison control centers; evacuation centers; and hospitals.

(E) Predesignation of a local response coordinator, and alternate(s), including title, and telephone number, who are charged with the responsibility and authority to direct and coordinate local response operations including: crowd and traffic control; emergency evacuation; beach closures; fire suppression; and mobilization of local equipment and personnel. During emergency response, this person will serve as the local government representative for the State On–Scene Coordinator. Communication may be coordinated through the State Liaison officer identified in the State's Incident Command System outlined in the Marine Oil Spill Contingency Plan.

(2) Coordination of Incident Response.

The purpose of the Coordination of Incident Response provisions set forth in this subsection is to clarify local governments' role and responsibilities during an oil spill response.

(A) The following language must be restated in this section of the local government oil spill contingency plan element in order to delineate how the local government's role will be coordinated in the State's Incident Command System:

"The Administrator, in consultation with other state agencies and the local government representative, has the lead state authority and responsibility for overseeing oil spill response and clean up activities in marine waters, identification of natural resources, protection priorities, and damage assessment after an oil spill.

In the event of an oil spill in marine waters, the OSPR shall conduct an initial on–scene assessment of the spill and review the measures being taken by the responsible party and determine the appropriate level of response.

The State On–Scene Coordinator, in consultation with the local government representative, and if applicable, through joint conference with the Federal On–Scene Coordinator, shall determine the nature of the local government support needed, and how local government resources identified in the local oil spill contingency plan element may be employed most effectively. If local government assistance is determined to be needed, the State On–Scene Coordinator, through the Unified Command, shall coordinate with the local government representative identified in the local oil spill contingency plan element in order to obtain such local assistance."

(B) Procedures to establish coordinated communications with federal, state, and other local government response personnel to include, but not be limited to the following:

1. Provisions for access to a reliable communications system for timely notification of an oil discharge, a back up system, and the capability for interconnection with the communications systems established under related oil spill contingency plans, particularly State and National plans.

(b) The Emergency Planning and Procedures Section.

The purpose of the Emergency Planning and Procedures Section is to provide information essential for an effective and timely emergency response. This shall include logistics for emergency response, pre–emergency planning, training, drills, and incident critique and follow–up.

(1) Logistics for Emergency Response.

This section will assist in the identification of staging areas and local resources which may be used during an oil spill response. To the greatest extent possible, local area maps should be provided, where applicable, for the following information:

(A) Identification and description of possible locations for an oil spill response operations center and a reliable communications system for directing the coordinated overall response operations by the Unified Command.

(B) Firefighting capabilities for oil fires for both shipboard and on–shore structures, levels of fire response capability, and willingness of local government to respond to oil fires.

(C) Potential staging area sites to be used by the Unified Command for use in deployment of response equipment along the coastline.

(D) Identify a person, by title, or an agency within the local government to coordinate and obtain lodging accommodations for emergency response personnel, upon request. In addition, provide a listing (or copies of a listing) of local accommodations.

(E) Identification and inventory of available emergency response supplies and equipment under the control of the local government, which may potentially be used during an oil spill response to protect or contribute to the protection of resources. The list should include oil–spill–specific equipment, such as booms and skimmers, as well as land–moving equipment, such as bulldozers and cranes. In addition, identify the contact agency(s), title of person(s) with authority to deploy such equipment, their telephone numbers, and location where the equipment and supplies are stored.

(F) Identification and information on all local airports, or the nearest airport, which may be used for incoming response personnel and/or during response operations. This information should include sufficient details in order to determine the possible role of the airport during an emergency response.

(G) Identification of potential temporary hazardous waste storage sites that may be used for temporary storage of oily wastes retrieved following a marine oil spill, and procedures for securing necessary permits or variances from appropriate state agency(s), including title of responsible person at each agency, and a 24–hour telephone number.

(H) Identification and description of the private or public property and roads to which access would be required in the event of a spill, for the areas where a spill is most likely to occur or have an impact on the shoreline. Additionally, this information should identify a mechanism by which the local government can gain access to ownership information for such properties and a contact phone number on a 24–hour basis.

(I) Identification of local facilities, marine facilities, and marinas including location, capacity, and hours of operation which may be significantly impacted during an oil spill. For purposes of this subsection "facil-

ity" means any public or private utility or plant that requires water intake from or discharge systems into marine waters, and if disrupted would significantly impact the public health and safety. This would include, but is not limited to, water treatment plants, power plants, and desalination plants. Additionally, this information should contain the name, title and telephone number of a local contact person, and/or person(s) who own, hold an ownership interest in, or operate the local facility, marine facility, or marina, as applicable.

(J) Identification of control structures in areas which are tidally influenced, including river mouths, creeks, bays, and wetlands, which may be used to ameliorate or modify tidal flows in order to minimize damages resulting from an oil spill.

(K) Identification of all locally significant areas, including river mouths, bays, recreational boating use areas, shipping lanes and harbor entrances, which may require closure or other emergency measures in the event of an oil spill.

(L) Identification of local government representatives having information concerning local volunteer response groups, animal rescue/recovery groups, local media contacts or public information.

(M) Identification of possible locations for volunteer operations center facilities for oil spill volunteers. These facilities should have adequate space for screening prospective volunteers, registration, training, assignment and deployment of qualified volunteers to an oiled wildlife care facility or field location.

(2) Pre–Emergency Planning.

The pre–emergency planning portion of the Emergency Planning and Procedures Section shall contain information and provision for pre–emergency planning of local emergency response with state and federal responding agencies, particularly the state OSPR, and coordination of pre–emergency planning for response among contiguous jurisdictions.

In order to meet the requirements set forth in this provision of the Emergency Planning and Procedures Section, pre–emergency planning information may be set forth in this section or cross referenced to other portions of the oil spill contingency plan element or the local governments' area plan established pursuant to Health and Safety Code Section 25503 for emergency response to a release or threatened release of a hazardous material. The following information shall for purposes of pre–emergency planning be included or otherwise cross referenced in this section:

(A) Provisions for establishing a definition of authorities, responsibilities and duties of all persons, or entities that are identified in the Incident Command System. The authorities, responsibilities and duties of each person/entity shall be consistent with the State's Incident Command system. Additionally, identify person(s) by title and telephone number, with authority to commit resources during an oil spill response, if such person(s) differ from those person(s) predesignated to participate in the Incident Command System.

(B) Provisions for pre–emergency planning and coordination among emergency responders within the jurisdiction of a city, county or local agency. Pre–emergency planning shall include coordination of emergency response and emergency assistance between contiguous jurisdictions, and/or other jurisdictions within the same Coast Guard Designated Area.

(C) Procedures to assure that full oil spill response resource capability, under the control of the grant recipient, is known and can be committed during an oil spill response upon the request of the State On–Scene Coordinator. Such resources shall include the supplies and equipment identified in Section 852.62.2(b)(1)(E) of this subchapter.

(3) Training Requirements

(A) At a minimum, the oil spill contingency plan element shall establish provisions to ensure training of fire, police and other emergency response personnel in oil spill response and cleanup equipment use and operations that is currently available to the local government, and ensure compliance with all other applicable state or federal training requirements;

(B) Provisions for documenting personnel training described in Subsection (A) above.

(4) Drills.

The Emergency Planning & Procedures Section shall include provisions for coordinating drill participation with the grant paricipant and the State, and shall include the title and phone number of a contact person for drill participation. The grant participant shall make every effort to participate in oil spill contingency plan drills.

(5) Incident Critique and Follow–up.

The Emergency Planning & Procedure Section shall describe provisions for the critique and follow–up of major incidents of a release or threatened release of oil into the marine waters of the state. The critique shall include an interagency meeting to evaluate the response, to improve future response, and to determine if any oil spill contingency plan element revisions are necessary.

(c) The Local Resource Information Section.

The Local Resource Information Section of the oil spill contingency plan element shall include local area information that could be used by the State in order to facilitate the response to an oil spill. Only readily available information which the local governments currently possess should be included. Mapping of information may be completed to the extent feasible and, where possible, should be prepared on U.S.G.S. "7.5 minute series topographic maps" (7.5 minute quads). This section may include, but is not limited to, the following information:

(1) Identification of Natural Resources and Local Conditions.

(A) A description of the important natural, economic and cultural resources, or those which the grant recipient considers significant, which may be potentially impacted by marine oil spills that are within or adjacent to the jurisdiction of the local government. This description should include available information that the local government currently possesses and may include narratives or a listing of information sources on any known environmentally sensitive areas within local government jurisdiction. OSPR is principally responsible for gathering this information and prioritizing natural resources. OSPR is particularly interested in gathering information pertaining to species habitat and distribution, spawning or nursery areas, migration corridors, breeding grounds and/or feeding grounds. Accordingly, grant funds may not be expended to research, collect and prioritize this information.

(B) Based on information that the grant recipient currently possesses, identification of structures located in marine waters including piers, breakwater, submerged obstacles, pipelines and platforms.

(C) Based on information that the grant recipient currently possesses, identification of those areas where, from the perspective of the grant recipient, oil spills are most likely to occur.

(2) Identification of Facilities and local Areas of Major Concern to the Local Government.

This subsection shall contain information on facilities, areas of commercial interest, and public and private recreational areas which could be impacted by a marine oil spill and are of major concern to the local government. For purposes of this subsection "facility" means any public or private utility or plant that requires water intake from, or discharge systems into, marine waters and which, if disrupted, would significantly impact the public health and safety. This could include, but is not limited to, water treatment plants, power plants, and desalination plants. The listing or identification of facilities should include the location of the facility and the location of water intakes and discharges that may need to be protected during an oil spill. Additionally, this subsection may include:

(A) A prioritization of those facilities, areas of commercial interest, and public and private recreational areas within the jurisdiction of the local governments, that are of major concern during an oil spill. This includes the following:

1. A prioritization of those facilities that may be impacted by an oil spill which, if impacted, pose a potential threat to the public health and safety.

2. A prioritization of areas of economic or commercial interest, and public/private recreational interest including, but not limited to, mariculture, commercial fisheries, commercials ports, recreational areas and tourist areas.

NOTE: Authority cited: Sections 8670.25.5, 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending section filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment of section and NOTE filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

§ 852.62.3. Submittal and Approval of Local Oil Spill Contingency Plan Elements.

(a) The oil spill contingency plan element completed, updated, or revised pursuant to the Grant Agreement, must be submitted within 180 calendar days after the execution of the Grant Agreement, or upon a schedule agreed to by the Administrator. Each submittal shall be made with an original and at least two copies. Extensions for submittal may be granted at the discretion of the Administrator.

(b) An element shall be approved if it adequately addresses the minimum planning requirements specified in Section 852.62.2 of this subchapter, or addresses all of the minimum planning requirements required to be addressed pursuant to the Grant Agreement. The Administrator shall have ninety (90) calendar days, from the date of submission, in which to review the element and make an approval determination.

(c) If upon review the element is not approved, the plan shall be returned to the grant recipient that prepared it, specifying the basis of disapproval and identifying the items which must be addressed before the element may be approved. The grant recipient shall have ninety (90) calendar days within which to resubmit the plan, and address all concerns. Failure to do so will result in disapproval of the project. Upon disapproval, the funds withheld pursuant to Section 852.61.12(b) of this subchapter shall be forfeited. Such forfeitures shall revert to the Fund.

(d) Upon approval of the element, the grant recipient shall submit a final report pursuant to Section 852.61.11(g) of this subchapter.

NOTE: Authority cited: Sections 8670.35, 8670.38, 8670.39 and 8670.40, Government Code. Reference: Section 8670.35, Government Code.

HISTORY

1. New section filed 2–22–93; operative 2–22–93 (Register 93, No. 9).
2. Change without regulatory effecting amending subsections (b)–(d) filed 9–23–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 39).
3. Amendment filed 6–9–2003; operative 7–9–2003 (Register 2003, No. 24).

Chapter 6. Fund Administration

Subchapter 2. Oil Spill Prevention and Administration Fund Fee

§ 870.15. Definitions.

In addition to the definitions in Chapter 1, Section 790 of this Subdivision, the following definitions shall govern the construction of this subchapter. Where similar terms are defined, the following will supersede the definition in Chapter 1:

(a) "Board" means the State Board of Equalization.

(b) "Fee" means the fees imposed pursuant to Article 6 (commencing with Section 8670.38) of Chapter 7.4, Division 1, Title 2 of the Government Code and deposited in the Oil Spill Prevention and Administration Fund in the State Treasury.

(c) "Marine Waters", for this subchapter, means those waters subject to tidal influence, including the waterways used for waterborne commercial vessel traffic to the Port of Stockton and the Port of Sacramento. Other waterways upstream of a line running north and south through the point where Contra Costa, Sacramento and Solano Counties meet, are not "marine waters".

(d) "Petroleum products" means any petroleum–based liquid hydrocarbon at atmospheric temperature and pressure that is the product of the fractionation, distillation, or other refining or processing of crude oil and that is used as, useable as, or may be refined as, a fuel or fuel blendstock, including, but not limited to, gasoline, diesel fuel, aviation fuel, bunker fuel, and alcohol fuels containing petroleum products.

NOTE: Authority cited: Sections 8670.39, 8670.40 and 8670.41, Government Code. Reference: Sections 8670.40 and 8670.41, Government Code.

HISTORY

1. New chapter 5, subchapter 2 and section filed 3–19–93; operative 3–19–93 (Register 93, No. 12).
2. Change without regulatory effect renumbering former chapter 5 to chapter 6 and amending section filed 7–12–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 28).
3. Amendment of subsection (b) and amendment of NOTE filed 11–21–2002 as an emergency; operative 1–1–2003 (Register 2002, No. 47). A Certificate of Compliance must be transmitted to OAL by 5–1–2003 or emergency language will be repealed by operation of law on the following day.
4. Amendment of subsection (b) and amendment of NOTE refiled 4–30–2003 as an emergency; operative 5–2–2003 (Register 2003, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–2–2003 or emergency language will be repealed by operation of law on the following day.
5. Certificate of Compliance as to 4–30–2003 order transmitted to OAL 5–15–2003 and filed 6–26–2003 (Register 2003, No. 26).

§ 870.17. Payment of Fees.

(a) Oil transported by tank vessel or pipeline

The Administrator shall impose a fee on the oil transported by tank vessel or pipeline. The fee shall not exceed 5 cents ($0.05) per barrel of crude oil or petroleum products.

(1) Oil/Petroleum products transported by tank vessel:

The fee shall be imposed upon every person owning crude oil at the time that the crude oil is received at a marine terminal from within or outside the state, and upon every person owning petroleum products at the time that those petroleum products are received at a marine terminal from outside the state. The fee shall be collected by the marine terminal operator from the owner of the crude oil or petroleum products based on each barrel of crude oil or petroleum products so received by means of a vessel operating in, through, or across the marine waters of the state.

(2) Oil transported by pipeline:

In addition, every operator of a pipeline shall pay the fee for each barrel of crude oil originating from a production facility in marine waters and transported in the state by means of a pipeline operating across, under or through the marine waters of the state.

(b) Nontank vessel fee

The Administrator shall impose a fee per nontank vessel, to be collected with each new or renewal application to obtain a certificate of financial responsibility. The fee shall be levied as follows:

(1) Operator(s) or owner(s) of nontank vessels with a carrying capacity of over 6,500 barrels, or over 7,500 barrels for nontank vessels owned and operated by California or a federal agency, shall submit a nonrefundable USD $2,500 fee per vessel, or

(2) Operator(s) or owner(s) of nontank vessels that have a carrying capacity greater than 500 barrels of oil and less than or equal to 6,500 barrels of oil, or a carrying capacity greater than 500 barrels of oil and less than or equal to 7,500 barrels of oil for nontank vessels owned and operated by California or a federal agency, shall submit a nonrefundable USD $1,500 fee per vessel, or;

(3) Operator(s) or owner(s) of nontank vessels that have a carrying capacity of 500 barrels of oil or less shall submit a nonrefundable USD $500 fee per vessel.

(4) Do no deduct any processing fees from the per vessel fee.

NOTE: Authority cited: Sections 8670.39(b), 8670.40 and 8670.41, Government Code. Reference: Sections 8670.40(a) and (b) and 8670.41, Government Code.

HISTORY

1. New section filed 3–19–93; operative 3–19–93 (Register 93, No. 12).
2. Change without regulatory effect amending section filed 6–10–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 24).
3. Amendment of section heading and subsection (a), redesignation of former subsections (b) and (c) as subsections (a)(1)–(2), new subsections (b)–(b)(4) and amendment of NOTE filed 11–21–2002 as an emergency; operative 1–1–2003 (Register 2002, No. 47). A Certificate of Compliance must be transmitted to OAL by 5–1–2003 or emergency language will be repealed by operation of law on the following day.
4. Amendment of section heading and subsection (a), redesignation of former subsections (b) and (c) as subsections (a)(1)–(2), new subsections (b)–(b)(4) and amendment of NOTE refiled 4–30–2003 as an emergency; operative 5–2–2003

(Register 2003, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–2–2003 or emergency language will be repealed by operation of law on the following day.

5. Certificate of Compliance as to 4–30–2003 order, including new subsection (b)(2), repealer of subsection (b)(3) and subsection renumbering, transmitted to OAL 5–15–2003 and filed 6–26–2003 (Register 2003, No. 26).

§ 870.19. Determination of Fee on Oil Transported by Tank Vessel or Pipeline.

(a) The fee imposed on the oil transported by tank vessel or pipeline shall be set at 5 cents ($0.05) per barrel of crude oil or petroleum products on January 20 of each year. In no event will the fee exceed 5 cents per barrel.

(b) On or before January 20, the Administrator shall annually prepare a plan that projects revenues and expenses over three fiscal years, including the current year. Based on that plan, the Administrator shall set the fee so that the projected revenues, including any interest, are equivalent to expenses over the period covered by the plan. In setting the fee, the Administrator may allow for a surplus if the Administrator finds that revenues will be exhausted during the period covered by the plan or that a surplus is necessary to cover possible contingencies.

(1) Based upon the January 20 assessment, the Administrator may authorize the collection of a fee lower than 5 cents ($0.05) if the lower fee will result in the collection of sufficient monies during that state fiscal year to fund the purposes set forth in Section 870.21.

(2) The Administrator may suspend collection of the lower fee at any time. If the lower fee is suspended, the fee level shall return to 5 cents ($0.05) per barrel of crude oil or petroleum product and shall remain at the increased level for the balance of the fiscal year.

(c) Whenever the Administrator determines that the fee level shall be changed, the Administrator shall notify the Board in writing within 5 days of making the determination. The Board shall then notify feepayors of the new fee level within 30 days of receiving the determination from the Administrator. The new fee level shall then become effective 30 days after the feepayors have been notified by the Board.

(d) The data used to determine the fee level shall be provided by the Administrator to interested parties upon request.

NOTE: Authority cited: Section 8670.39(b) and 8670.40, Government Code. Reference: Section 8670.40(a), Government Code.

HISTORY

1. New section filed 3–19–93; operative 3–19–93 (Register 93, No. 12).
2. Amendment of section heading and subsections (a)–(b)(2) filed 11–21–2002 as an emergency; operative 1–1–2003 (Register 2002, No. 47). A Certificate of Compliance must be transmitted to OAL by 5–1–2003 or emergency language will be repealed by operation of law on the following day.
3. Amendment of section heading and subsections (a)–(b)(2) refiled 4–30–2003 as an emergency; operative 5–2–2003 (Register 2003, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–2–2003 or emergency language will be repealed by operation of law on the following day.
4. Certificate of Compliance as to 4–30–2003 order transmitted to OAL 5–15–2003 and filed 6–26–2003 (Register 2003, No. 26).

§ 870.21. Fee Usages.

The fee on oil transported by tank vessel or pipeline shall be collected by the Board. All fees levied under this chapter shall be deposited in the Oil Spill Prevention and Administration Fund in the State Treasury. Money in this fund shall be used only for the following purposes:

(a) to implement oil spill prevention programs and to conduct research into prevention and control technology;

(b) to carry out studies which may lead to improved oil spill prevention and response;

(c) to finance environmental and economic studies relating to the effects of oil spills;

(d) to reimburse the member agencies of the State Interagency Oil Spill Committee for costs arising from implementation of Article 3.5 (commencing with Section 8574.1) of Chapter 7 and Chapter 7.4 (commencing with Section 8670.1) of Division 1, Title 2 of the Government Code, and Division 7.8 (commencing with Section 8750) of the Public Resources Code;

(e) to implement, install, and maintain emergency programs, equipment, and facilities to respond to, contain, and clean up oil spills and to ensure that those operations will be carried out as intended;

(f) to respond to an imminent threat of a spill in accordance with the provisions of Government Code Section 8670.62 pertaining to threatened discharges. The cumulative amount of any expenditure for this purpose shall not exceed one hundred thousand dollars ($100,000) in any fiscal year unless the Administrator receives the approval of the Director of Finance and notification is given to the Joint legislative Budget Committee.

(g) to reimburse the Board for costs incurred in the collection of fees pursuant to Chapter 7.4 (commencing with Section 8670.1) of Division 1, Title 2 of the Government Code and Part 24 (commencing with Section 46001) of Division 2 of the Revenue and Taxation Code;

(h) to reimburse the costs incurred by the California State Lands Commission in implementing the Oil Transfer and Transportation Emission and Risk Reduction Act of 2002 (Division 9 (commencing Section 8780) of the Public Resources Code);

(i) to reimburse the Oil Spill Technical Advisory Committee for costs associated with Article 8 (commencing with Section 8670.54) of Chapter 7.4, Division 1, Title 2 of the Government Code;

(j) to provide a reasonable reserve for contingencies.

NOTE: Authority cited: Sections 8670.39(b) and 8670.40, Government Code. Reference: Sections 8670.4, 8670.40 and 8670.56, Government Code.

HISTORY

1. New section filed 3–19–93; operative 3–19–93 (Register 93, No. 12).
2. Amendment of first paragraph, new subsection (g), subsection relettering and amendment of NOTE filed 11–21–2002 as an emergency; operative 1–1–2003 (Register 2002, No. 47). A Certificate of Compliance must be transmitted to OAL by 5–1–2003 or emergency language will be repealed by operation of law on the following day.
3. Amendment of first paragraph, new subsection (g), subsection relettering and amendment of NOTE refiled 4–30–2003 as an emergency; operative 5–2–2003 (Register 2003, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–2–2003 or emergency language will be repealed by operation of law on the following day.
4. Certificate of Compliance as to 4–30–2003 order, including repealer of subsection (d), new subsections (e) and (f) and subsection relettering, transmitted to OAL 5–15–2003 and filed 6–26–2003 (Register 2003, No. 26).

Chapter 7. Compliance

Subchapter 1. Administrative Compliance Actions and Hearing Procedures

Article 1. Administrative Compliance Actions and Civil Penalties

§ 873. Purpose and Scope.

This subchapter establishes policies and procedures for the Administrator to take administrative compliance actions pursuant to Government Code Sections 8670.67, 8670.67.5 and 8670.68.

NOTE: Authority cited: Sections 8670.68 and 11400.20, Government Code. Reference: Sections 8670.67, 8670.67.5, 8670.68 and 11400.20, Government Code.

HISTORY

1. Amendment of chapter 7 heading, new subchapter 1 (articles 1–2), article 1 (sections 873–873.8) and section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.1. Definitions.

In addition to definitions found in Government Code Section 8670.3 and Chapter 1 of this subdivision, the following definitions govern the construction of this subchapter.

(a) "Environment" means the total human surroundings, physical and biological, natural and artificial, and air, water, soil, plants, wildlife, and other ecological factors affecting the growth, development, and safety of people and other living organisms.

(b) "Notice to Comply" means a written alternative to issuing a Complaint for Class 1 violation, which alleges a violation that does not assess a penalty.

(c) "Respondent" means any person against whom a Notice to Comply or a Complaint is filed, pursuant to the provisions of this subchapter.

(d) "Threat", for purposes of this subchapter, means an act or failure to act, the result of which could, by itself or in combination with other acts, endanger the public health and safety or harm the environment.

(e) "Wildlife" means and includes all wild animals, birds, plants, fish, amphibians, and related ecological communities, including the habitat upon which the wildlife depends for its continued viability.

NOTE: Authority cited: Sections 8670.68 and 11400.20, Government Code. Reference: Section 711.2, Fish and Game Code; and Sections 8670.56.5, 8670.67 and 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.2. General Provisions.

(a) The Administrator may take administrative compliance actions for violations of Chapter 7.4 of the Government Code (commencing with Section 8670.1) or Division 7.8 of the Public Resources Code (commencing with Section 8750) and any regulations, permits, or orders, issued or promulgated pursuant to those provisions.

(b) Each calendar day or partial day that a violation occurs shall be considered a separate violation.

(c) Twenty–five (25%) percent of any penalty collected under this subchapter shall be paid to the Office of Oil Spill Prevention and Response. The Administrator may allocate the amount collected among those state, county, or local agencies participating and assisting in the prosecution of the action in accordance with the relative personnel costs and other costs incurred.

(d) Except as provided in Government Code Section 8670.67(c), administrative actions taken pursuant to this subchapter shall be separate and in addition to, and do not supersede or limit, any and all other administrative, civil or criminal actions or remedies.

NOTE: Authority cited: Section 8670.68, Government Code. Reference: Sections 8670.61, 8670.62, 8670.66, 8670.67, 8670.67.5, 8670.68, 8670.68.5 and 8670.69.4, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.3. Classification of Violations.

(a) Any violation of any provision of Chapter 7.4 of the Government Code (commencing with Section 8670.1) or Division 7.8 of the Public Resources Code (commencing with Section 8750) or any regulations, permits, or orders, issued or promulgated pursuant to those sections shall be assigned one of the following violation classifications:

(1) "Class 1 violation" means a violation that, singly or in combination with other acts, could not:

(A) cause an unauthorized discharge of oil; or

(B) substantially increase the risk of an unauthorized discharge of oil; or

(C) create a threat to public health and safety or the environment.

(2) "Class 2 violation" means a violation that in combination with other acts or over time, could reasonably or forseeably cause, or increase the risk of an unauthorized discharge of oil or pose a threat to public health and safety or the environment.

(3) "Class 3 violation" means a violation that has resulted in an unauthorized discharge of oil or posed a substantial threat to public health and safety or the environment.

(b) Cumulative Violations.

(1) If the respondent has committed three (3) Class 1 violations in any twelve–month period, or five (5) in any 24–month period, or seven (7) in any 36–month period, that series of violations may be considered a single Class 2 violation.

(2) If the respondent has committed three (3) Class 2 violations in any twelve–month period, or five (5) in any 24–month period, or seven (7) in any 36–month period, that series of violations may be considered a single Class 3 violation.

(3) If the respondent has committed two (2) or more Class 2 violations at the same time which, taken together, could directly result in a discharge of oil or pose a threat to the public health and safety or the environment, then each violation shall be considered a separate Class 2 violation and the total combination of violations may be considered a Class 3 violation.

(c) The administrative compliance actions taken for Class 1, Class 2 and Class 3 violations are as follows:

(1) Class 1 violation: A Notice to Comply or an administrative civil penalty which shall not exceed $10,000 for each violation.

(2) Class 2 violation: an administrative civil penalty which shall not exceed $25,000 for each violation.

(3) Class 3 violation: an administrative civil penalty which shall not exceed $100,000 for each violation.

NOTE: Authority cited: Sections 8670.7, 8670.67 and 8670.68, Government Code. Reference: Sections 8670.67 and 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.4. Notice to Comply.

(a) The Administrator may issue a Notice to Comply to any person as an alternative to a Complaint for a Class 1 violation, subject to subsection (b).

(b) A Notice to Comply shall clearly state the facts or failures to act that constitute the alleged violation. Where appropriate, a Notice to Comply may require a time in which to comply and include a proposed means by which compliance may be achieved. The Administrator may require a person to provide proof of compliance.

(c) Failure to comply with a Notice to Comply within the time allowed may be considered a violation of this subchapter.

(d) If a person who receives a Notice to Comply disagrees with one or more of the alleged violations cited in the notice, the person shall provide written objection(s) to the Administrator within 10 business days from the date of the receipt of the Notice to Comply. The Administrator shall review the written objections within 90 days of their receipt. Results of this review may include, but are not limited to, rescinding the Notice to Comply, scheduling an informal settlement conference, or issuing a Complaint. If, upon review, the Administrator issues a Complaint and assesses an administrative civil penalty on the basis of the disputed violation, a hearing may be requested, and shall be conducted, in the manner set forth in Article 2 of this subchapter.

(e) Notwithstanding subsection (a), the Administrator shall not issue a Notice to Comply for any knowing, willful, or intentional violations; for any violation that enables the violator to benefit economically from noncompliance, either by realizing reduced costs or by gaining a competitive advantage; or for any violation that is a chronic violation; or for any violation that is committed by a recalcitrant violator.

(f) In determining whether a violation is chronic or a violator is recalcitrant, for purposes of subsection (e), the Administrator shall consider whether there is evidence indicating that the violator has engaged in a pattern of neglect or disregard for the requirements of this subdivision.

(g) Pursuant to subsection (a), the respondent to a Notice to Comply shall:

(1) sign the Notice to Comply and return it to the Administrator within 10 business days or acknowledge the Notice to Comply in a writing, which contains all the information in the Notice to Comply and return it to the Administrator within 10 business days,

(2) within the time for compliance stated in the Notice to Comply, the recipient shall submit a statement to the Administrator detailing the steps by which compliance has been achieved. A false statement that compliance has been achieved is a violation of this subchapter pursuant to Sections 8670.65, 8670.66, or 8670.67 of the Government Code.

(h) Nothing in this subchapter shall be construed to restrict or limit the Administrator's ability to take any other action authorized by law.

NOTE: Authority cited: Sections 8670.7, 8670.67 and 8670.68, Government Code. Reference: Sections 8670.67 and 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.5. Administrative Compliance Actions: Government Code Section 8670.67.

(a) The Administrator may issue a Complaint and assess a civil penalty upon any person who intentionally or negligently:

(1) fails to follow the effective plan (as that term is defined in Title 14, California Code of Regulations Section 815.05), or the direction or orders of the Administrator, or the United States Coast Guard (USCG), in connection with an oil spill, except as provided in Government Code Section 8670.27.

[The next page is 200.61.]

(2) fails to notify the USCG that a vessel (as defined in Government Code Section 8670.20(a)) is disabled within one hour of a disability if, while disabled, the vessel causes a discharge of oil into marine waters.

(3) discharges or spills oil into, or which enters California marine waters unless the discharge is authorized by the United States, the State, or other agency with appropriate jurisdiction.

(4) fails to immediately begin cleanup, abatement, or removal of spilled oil in the manner prescribed by Section 8670.25 of the Government Code.

(5) fails to comply with the provisions of Chapter 7.4 of the Government Code (commencing with Section 8670.1) or Division 7.8 of the Public Resources Code (commencing with Section 8750) and any regulations, permits or orders issued or promulgated pursuant to those sections.

NOTE: Authority cited: Sections 8670.7, 8670.67 and 8670.68, Government Code. Reference: Sections 8670.20, 8670.67 and 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.6. Administrative Compliance Actions: Public Resources Code.

(a) Upon the request of the Executive Officer of the State Lands Commission (Executive Officer) the Administrator may issue an administrative civil Complaint and assess an administrative civil penalty upon any person who intentionally or negligently fails to comply with:

(1) Marine Terminals Inspection and Management regulations found in Title 2 California Code of Regulations Sections 2300 et seq.;

(2) Marine Terminal Personnel Training and Certification regulations found in Title 2 California Code of Regulations Sections 2540 et seq.;

(3) any other provision of Division 7.8 of the Public Resources Code (commencing with Section 8750) and any other regulations, regulatory amendments, permits or orders issued or promulgated pursuant to these Public Resources Code sections.

(b) The Administrator shall consult with the Executive Officer regarding costs, penalties, settlements, allocations, and other matters related to actions taken pursuant to subsection (a).

NOTE: Authority cited: Sections 8670.7 and 8670.67, Government Code. Reference: Sections 8752–8760 (inclusive), Public Resources Code; and Sections 8670.20, 8670.25, 8670.27, 8670.67, 8670.68 and 8670.69.4, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.7. Discharge of Oil; Administrative Civil Liability; Government Code Section 8670.67.5.

In addition to any penalty assessed pursuant to Section 873.3 of this subchapter:

(a) Without regard to intent or negligence, any person who causes or permits oil to be spilled or discharged shall be strictly liable for a civil penalty assessed for up to ten dollars ($10.00) per gallon for every gallon of spilled or discharged oil.

(b) Whenever the spill or discharge results from gross negligence or reckless misconduct, the Administrator shall assess a civil penalty at thirty dollars ($30.00) per gallon of spilled or discharged oil.

(c) Any civil penalty assessed pursuant to either subsection (a) or (b) shall be reduced for every gallon of spilled oil that is:

(1) recovered; and

(2) properly reprocessed, reused, and/or disposed of in accordance with applicable laws.

(d) The Administrator shall take into consideration the nature, circumstances, extent and gravity of the spill, including the spiller's efforts to prevent, abate or clean up a discharge, when determining the appropriate penalty amounts.

(e) The determination of the amount of oil recovered shall be conducted pursuant to the provisions of Title 14 California Code of Regulations, Sections 877, et seq.

NOTE: Authority cited: Sections 8670.7 and 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 873.8. Damages.

[RESERVED]

Article 2. Hearing Procedures

§ 874. Purpose and Scope.

These procedural rules shall govern all hearings held pursuant to this subchapter.

NOTE: Authority cited: Section 8670.68, Government Code. Reference: Section 8670.68, Government Code.

HISTORY

1. New article 2 (sections 874–874.6) and section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 874.1. Complaint.

The Administrator may issue a Complaint upon any person on whom administrative civil liability may be imposed pursuant to Section 8670.67 or 8670.67.5. The Complaint shall:

(a) allege the facts or failures to act which constitute the basis for liability and contain the amount of the proposed civil penalty;

(b) be served by personal service or certified mail;

(c) inform the party so served of the right to a hearing;

(d) include a reference to laws and regulations governing the administrative civil penalty adjudication process; and

(e) include a document to serve as respondent's "Notice of Defense."

NOTE: Authority cited: Section 8670.68, Government Code. Reference: Section 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 874.2. Notice of Defense; Request for Hearing.

(a) Any person served with a Complaint may, within 10 business days after service, request a hearing by filing a Notice of Defense.

(b) A Notice of Defense is deemed to be filed if it is postmarked within 10 business days after service.

(c) A hearing requested by the respondent shall be conducted within 90 days after the Notice of Defense is received by the Administrator.

(d) If a Notice of Defense has not been filed within 10 business days after service of the Complaint, the Administrator shall issue an order setting liability in the amount proposed in the Complaint, or if the Administrator and the party have entered into a settlement agreement, the Administrator shall issue an order setting liability in the amount specified in the settlement agreement.

(e) If the party has not filed a Notice of Defense or if the Administrator and the party have entered into a settlement agreement, the Administrator's order shall:

(1) set the liability in the amount as specified in the Complaint or settlement; and

(2) shall not be subject to review by any court or agency.

NOTE: Authority cited: Section 8670.68, Government Code. Reference: Sections 1013(a) and 2015.5, Code of Civil Procedure; and Section 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 874.3. Hearing Procedures.

(a) Any hearing required under this subchapter shall be conducted by an independent hearing officer according to the procedures specified in Government Code Sections 8670.68 and 11507 to 11517, inclusive, and those statutes incorporated by reference in Section 874.4 of this Article. Where conflicts occur among the above-referenced statutes, the provisions set forth in Government Code 8670.68 shall control.

(b) The independent hearing officer shall take into consideration the nature, circumstances, extent and gravity of the violation, including those factors set forth below, when reviewing the proposed penalty.

(1) the degree of the respondent's negligent, grossly negligent, reckless, or intentional conduct;

(2) the actual or threatened harm to the public health and safety or the environment;

(3) the volume of oil discharged;

(4) the respondent's past and present efforts, including compliance history, to prevent, abate, or clean up a discharge or conditions posing a threat to the public health and safety, fish and wildlife, or the environment;

(5) the respondent's ability to pay the proposed civil penalty;

(6) prior actions brought against the respondent pursuant to this subchapter.

NOTE: Authority cited: Section 8670.68, Government Code. Reference: Section 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 874.4. Incorporation by Reference.

(a) Unless inconsistent or in conflict with the governing statutes or this subchapter, and to the extent that they govern administrative civil penalty adjudication procedures, the following statutes are incorporated by reference:

(1) Definitions: Government Code Sections 11405.10 through 11405.80.

(2) Governing Procedures: Government Code Sections 11415.10 through 11415.60.

(3) Alternative Dispute Resolution: Government Code Sections 11420.10 through 11420.30.

(4) Ex Parte Communications: Government Code Sections 11430.10 through 11430.80.

(5) Alternative Service of Documents (excluding Complaint): Government Code Section 11440.20.

(6) Hearings by Teleconference: Government Code Section 11440.30.

(7) Informal Hearing Procedures: Government Code Sections 11445.10 through 11445.60.

(8) Subpoenas: Government Code Sections 11450.05 through 11450.50.

(9) Enforcement and Sanctions: Government Code Sections 11455.10 through 11455.30.

NOTE: Authority cited: Sections 8670.68 and 11400.20, Government Code. Reference: Sections 8670.68, 11405.10–11405.80, 11415.10–11415.60, 11420.10–11420.30, 11430.10–11430.80, 11440.20, 11440.30, 11445.10–11445.60, 11450.05–11450.50 and 11455.10–11455.30, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 874.5. Order Setting Civil Penalty.

(a) After conducting any hearing required under this subchapter, the independent hearing officer shall issue a decision, including an order setting the amount of civil penalty to be imposed, within 30 days after the case is submitted.

(b) Orders setting civil liability issued pursuant to this section shall become effective and final upon issuance, and payment shall be made within 30 days of issuance.

(c) Copies of the orders shall be served by personal service or by certified mail upon the party served with the Complaint and upon other persons who appeared at the hearing and requested a copy.

(d) Any order for administrative civil penalties entered pursuant to this section shall be subject to interest at the legal rate (as defined in Code of Civil Procedure Section 685.010) from the time of service of the Complaint.

NOTE: Authority cited: Section 8670.68, Government Code. Reference: Section 8670.68, Government Code.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

§ 874.6. Review of Decision.

(a) Within 30 days after service of a copy of a decision issued by the independent hearing officer, a party to the action, or a person appearing at the hearing and served with a copy of the decision, may file a petition for writ of mandate for review of the decision with a court of appeal.

(1) The filing of a petition for writ of mandate shall not stay any corrective action required pursuant to the Act or the accrual of any penalties assessed pursuant to the Act and does not prohibit the court from granting any appropriate relief within its jurisdiction.

(2) Any person who fails to file the petition within the 30–day period may not challenge the reasonableness or validity of a decision or order of the independent hearing officer in any judicial proceedings brought to enforce the decision or order or for other remedies.

(b) Except as otherwise provided in this article, Section 1094.5 of the Code of Civil Procedure shall govern any proceedings conducted pursuant to this section.

(c) In all proceedings pursuant to this subchapter, the court shall uphold the decision of the independent hearing officer if the decision is based upon substantial evidence in the whole record.

NOTE: Authority cited: Section 8670.68, Government Code. Reference: Section 8670.68, Government Code; and Section 1094.5, Code of Civil Procedure.

HISTORY

1. New section filed 3–13–98; operative 4–12–98 (Register 98, No. 11).

Subchapter 2. Determining Amount of Petroleum Hydrocarbons Recovered

Article 1. General Provisions and Definitions

§ 877. Purpose and Scope.

The regulations in this subchapter set forth the methods for determining the amount of liquid petroleum hydrocarbons (oil) recovered. These methods will be used to determine the number of gallons of discharged liquid petroleum hydrocarbon that are recovered and properly disposed of in accordance with applicable law. The term "disposed of" shall include liquid petroleum hydrocarbon that is reprocessed, recycled, or otherwise utilized as an ingredient in the manufacture of petroleum products or other products.

NOTE: Authority cited: Section 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

HISTORY

1. New chapter 7, subchapter 2, article 1 (sections 877–880) and section filed 7–23–97; operative 8–22–97 (Register 97, No. 30).

§ 877.1. Exception.

(a) Unless otherwise agreed to, the amount of petroleum hydrocarbons recovered shall be determined pursuant to Sections 877.3, 878, 879 and 880. The Responsible Party and the Administrator may use an alternative method to the method described in these sections. This alternative method shall be agreed to at the time of the incident and shall be included in the Incident Action Plan or as an attachment thereto.

(b) Not withstanding Section 877.1(a), the Administrator and Responsible Party or potentially Responsible Party shall not be precluded from entering into a binding agreement whereby the parties stipulate to the amount of oil spilled and/or recovered. Such agreement shall be binding on the parties for purposes of a civil penalty action.

Stipulations may be entered into where the parties determine that it is in the interest of justice to do so to facilitate resolution of the response.

NOTE: Authority cited: Section 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

HISTORY

1. New section filed 7–23–97; operative 8–22–97 (Register 97, No. 30).

§ 877.2. Definitions.

In addition to the definitions provided by Section 790 of Title 14, the following definitions shall govern this subchapter. These definitions shall supersede any duplication in Section 790, Title 14:

(a) "API" refers to the American Petroleum Institute. The American Petroleum Institute, in conjunction with the American Society for Testing and Materials (ASTM), American National Standards Institute

(ANSI), British Standards Institute (BSI) and the Institute of Petroleum (IP), has developed standardized methods and formulas to calculate measured quantities of petroleum fluids regardless of point of origin, destination or unit of measure used by custom or statute.

(b) "ASTM" refers to the American Society for Testing and Materials. It is a scientific and technical organization formed for the development of standards on characteristics and performance of materials, products systems and services.

(c) "EPA" refers to the United States Environmental Protection Agency.

(d) "EPA Method 8015A" is a procedure used to determine the concentration of various volatile organic compounds. EPA Method 8015A, Nonhalogenated Volatile Organics by Gas Chromatography, July 1992, is hereby incorporated by reference.

(e) "EPA Method 8270B" is a procedure used to determine the concentration of semi–volatile organic compounds. EPA Method 8270B, Semi–volatile Organic Compounds by Gas Chromatography/Mass Spectrometer (GC/MS): Capillary Column Technique, September 1994, is hereby incorporated by reference.

(f) "EPA Method 3550A" is a procedure used for extracting non–volatile and semi–volatile organic compounds from solids such as soils, sludges and wastes. EPA Method 3550A, Ultrasonic Extraction, September 1994, is hereby incorporated by reference.

(g) "EPA Method 3540B" is a procedure used for extracting non–volatile and semi–volatile organic compounds from solids such as soils, sludges and wastes. EPA Method 3540B, Soxhlet Extraction, September 1994, is hereby incorporated by reference.

(h) "Flame Ionization Detector (FID)" is a detector, used in combination with a Gas Chromatograph, to analyze for saturated hydrocarbons, alkanes, alkenes and unsaturated hydrocarbons.

(i) "Gas Chromatography (GC)" is an analytical technique used to determine the sample concentration of organic constituents including total petroleum hydrocarbons (TPH) in environmental media.

(j) "Gauge" refers to the act of manually measuring the height of liquid in a tank expressed in feet, inches and fractions of inches or other appropriate units.

(k) "Incident Action Plan" is a document that contains objectives reflecting the overall incident strategy and specific tactical actions and supporting information for the next operational period. The Plan may be oral or written.

(*l*) "Recover" or "Recovered" refers to the amount of oil either removed or taken out of the environment after a spill. This does not include material lost to natural evaporation, or dispersion, in situ burning, or the use of chemical dispersants.

(m) "Sorbents" refers to manmade substances or materials that preferentially absorb or adsorb petroleum hydrocarbons. Sorbents typically include but are not limited to booms and pads.

(n) "TPH" refers to total petroleum hydrocarbons. It is a term used to describe the amount of petroleum hydrocarbons which are contained in a solid sample or sediment as a number that may be converted to units of volume or mass.

NOTE: Authority cited: Section 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

HISTORY

1. New section filed 7–23–97; operative 8–22–97 (Register 97, No. 30).

§ 877.3. Recovery of Liquid Petroleum Hydrocarbons.

(a) All material shall be collected and stored at locations that shall be identified and approved by the Unified Command as defined in Section 790(c)(3), Title 14, prior to use.

(b) A storage location conforming to approved methods for the storage of liquid petroleum hydrocarbons (LPH), which is a measured volume of recovered product or crude oil, shall be pre–identified and verified by the Unified Command (UC) as empty. If it is necessary to use a storage location that already contains LPH, water, or a combination of both, the type of product shall be determined and sampled according to API approved standards in advance and pre–gauged using API approved gauging methods. The petroleum hydrocarbon mixture shall be collected and separated. Gauge readings shall be taken until two (2) gauge readings are identical.

(c) The total volume of liquid petroleum hydrocarbons recovered shall be designated at V1.

NOTE: Authority cited: Section 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

HISTORY

1. New section filed 7–23–97; operative 8–22–97 (Register 97, No. 30).

§ 878. Sampling Analysis and Calculation of Petroleum Hydrocarbons in Contaminated Sediment.

(a) All contaminated material shall be collected and stored at locations that shall be identified and approved by the Unified Command prior to use.

(b) The Unified Command, or their representatives, shall develop a statistically sound sampling and analysis plan, agreed upon by all parties, that shall be used in qualifying recovered petroleum hydrocarbons. At a minimum, the sampling plan shall include, but not be limited to, the number of samples to be collected, the sampling methodology to be used, and the methods for quantifying sediment and TPH, and moisture.

(c) Samples shall be collected in pre–cleaned glass containers. Samples shall not be collected in plastic containers.

(d) For the TPH extraction method, applicable EPA or ASTM methods, such as EPA Method 3550A, shall be used.

(e) For quantification of TPH, applicable EPA or ASTM methods, such as EPA Method 8015A by gas chromatography flame ionization detector or EPA Method 8270B shall be used.

(f) The following calculation shall be used to determine the total amount of petroleum hydrocarbons:

Vs = volume of petroleum hydrocarbons recovered in contaminated sediment

Ws = total weight of sediment

Cps = concentration of petroleum hydrocarbons in sediment (from TPH analysis)

Dp = density of petroleum hydrocarbon

Vs = (Ws) x (Cps) x (1/Dp)

NOTE: Authority cited: Section 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

HISTORY

1. New section filed 7–23–97; operative 8–22–97 (Register 97, No. 30).

§ 879. Sorbents and Debris.

(a) All contaminated material shall be collected and stored at locations that shall be identified and approved by the Unified Command prior to use. Sorbents and Debris shall be segregated.

(b) The following methods may be used to determine the amount of recovered petroleum hydrocarbons:

(1) Alternative Number 1.

(A) The petroleum hydrocarbons and water shall be extracted using pressure or other extraction method. A water deluge may be used to effect this process, subsequent to approval by the Unified Command. The petroleum hydrocarbon mixture shall be collected and separated. The petroleum hydrocarbons shall be gauged using API approved gauging methods. Gauge readings shall be taken until two (2) gauge readings are identical.

(2) Alternative Number 2.

(A) The Unified Command, or their representatives, shall develop a statistically sound sampling and analysis plan, agreed upon by all parties, that shall be used in quantifying recovered petroleum hydrocarbons. At a minimum, the sampling plan shall include, but not be limited to, the number of samples to be collected, and the sampling methodology to be used and the methods for quantifying the sorbent, TPH and moisture.

(B) Samples shall be collected in pre–cleaned glass containers. Samples shall not be collected in plastic containers.

(C) For the TPH extraction method, applicable EPA or ASTM methods, such as EPA Method 3550A, shall be used.

(D) For quantification of TPH, applicable EPA or ASTM methods, such as EPA Method 8015A by gas chromatography flame ionization detector or EPA Method 8270B shall be used.

(E) The following calculation shall be used to determine the total amount of petroleum hydrocarbons:

Vpsb = volume of petroleum hydrocarbons recovered in sorbents

Cps = concentration of petroleum hydrocarbons reported in sorbent pads as TPH

Cpb = concentration of petroleum hydrocarbons reported in sorbent boom as TPH

Co = concentration of petroleum hydrocarbons reported in sorbent type other than booms or pads as TPH

Wp = total weight of sorbents pads

Wb = total weight of boom

Wo = total weight of other sorbent type

Dh = density of petroleum hydrocarbons

Vpsb = {[(Cps) x (SWp)]} + {[(Cpb) x (Wb) + (Co x Wo)]} x (1/Dh)

(c) Debris.

The following methods may be used to determine the amount of recovered petroleum hydrocarbons:

(1) Alternative Number 1.

(A) The oily debris shall be washed using water deluge, subsequent to approval by the Unified Command. The petroleum hydrocarbon and water mixture shall be collected and separated. The petroleum hydrocarbons shall be gauged using API approved gauging methods. Gauge readings shall be taken until two (2) gauge readings are identical.

(2) Alternative Number 2.

(A) The oily debris shall be collected and homogenized (by grinding or equivalent to effect total homogenization).

(B) The Unified Command, or their representatives, shall develop a statistically sound sampling and analysis plan, agreed upon by all parties, that shall be used in quantifying recovered petroleum hydrocarbons. At a minimum, the sampling plan shall include, but not be limited to, the number of samples to be collected, and the sampling methodology to be used and the methods for quantifying the oily debris, TPH and moisture.

(C) Samples shall be collected in pre–cleaned glass containers. Samples shall not be collected in plastic containers.

(D) For the TPH extraction method, applicable EPA or ASTM methods, such as EPA Method 3550A, shall be used.

(E) For quantification of TPH, applicable EPA or ASTM methods, such as EPA Method 8015A by gas chromatography flame ionization detector or EPA Method 8270B shall be used.

(F) The following calculation shall be used to determine the total amount of petroleum hydrocarbons:

Vpd = volume of petroleum hydrocarbons recovered in debris

Cpd = concentration of petroleum hydrocarbons reported as TPH

Wd = total weight of debris

Dh = density of petroleum hydrocarbon

Vpd = [(Cpd) x (Wd)] x (1/Dh)

NOTE: Authority cited: Section 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

HISTORY

1. New section filed 7–23–97; operative 8–22–97 (Register 97, No. 30).

§ 879.5. [Reserved].

§ 880. Calculation for Total Recovery of Petroleum Hydrocarbons.

(a) The total recovery of petroleum hydrocarbons (Vr) shall be the sum of the total volume of petroleum hydrocarbons from contaminated sediment (Vs), sorbents (Vpsb), and debris (Vpd), and liquid petroleum hydrocarbons (V1) reported in gallons.

Vr = Vs + Vpsb + Vpd + V1

NOTE: Authority cited: Section 8670.67.5, Government Code. Reference: Section 8670.67.5, Government Code.

2. Change without regulatory effect amending formula filed 2–8–2007 pursuant to section 100, title 1, California Code of Regulations (Register 2007, No. 6).

Chapter 8. Response Technology

Subchapter 1. Licensing and Use of Oil Spill Cleanup Agents

Article 1. General Provisions

§ 884. Purpose and Scope.

This subchapter sets forth the requirements for the licensing and use of oil spill cleanup agents (OSCA). Licensing criteria are established based on the level of toxicity imposed by a given agent. The protocols for using an OSCA are based on the sensitivity of the habitat in which the agent may be used.

The regulations in this subchapter provide specific forms that must be completed by the applicant, and require that the OSCA license be renewed once every five years. Certain products will be considered exempt from the licensing process, but the applicant must petition the Administrator for an exemption to assure that exempted products will be nontoxic in the aquatic environment.

In addition to the regulations in this subchapter, the licensing process will be governed by the criteria and protocols in the "Guidance Document for the Exemption, License and Renewal of Oil Spill Cleanup Agents", dated 1/1/98 (Guidance Document), and herein incorporated by reference. The use criteria for dispersants will be governed by the requirements in this subchapter and the criteria in the "Quick Approval Process for Dispersant Use in Waters Off California", dated 4/14/97, and herein incorporated by reference.

NOTE: Authority cited: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New chapter 8, subchapter 1, article 1 (sections 884–884.5) and section heading filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. New section filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 884.5. Definitions and Abbreviations.

In addition to the definitions found in Government Code § 8670.3, and Chapter 1, of this subdivision, the following definitions shall govern the construction of this subchapter.

(a) "Aquatic toxicity" means that the survivorship of the test organisms in the treatment exposure is less than 90% of those in the control group. Testing to determine if an agent causes aquatic toxicity shall be done in accordance with the testing protocols in the Guidance Document.

(b) "Bioremediation agent" or "bioremediant" means an OSCA which contains oil–degrading bacteria that serve a seeding function, or nutrients that serve to enhance the growth of naturally occurring bacteria. These agents are deliberately introduced into an oil discharge to increase the rate of biodegradation in an effort to mitigate the effects of the discharge.

(c) "Collecting agent" means a type of OSCA, the function of which is to absorb, congeal, gel or emulsify oil. The end product of these actions is an agent–oil mass that remains afloat for later collection or burning. Collecting agents include; emulsion treating agents, herding agents, elasticity modifiers, and sorbents.

(d) "Dispersing agent" or "dispersant" means a type of OSCA, the function of which is to reduce the interfacial surface tension between oil and water. Dispersing agents are surfactant–based chemical compounds, and are composed of both water and oil compatible constituents which allow oil particles to more easily enter the water column.

(e) "EC50" mans Effects Concentration 50, and is the concentration at which 50% of the test organisms display an effect or response to the product being tested during the course of a specified and predetermined time period (e.g. 96 hours).

(f) "Guidance Document" means the Guidance Document for the Exemption, License and Renewal of Oil Spill Cleanup Agents, dated 1/1/98, which is incorporated by reference herein. This document contains the required exemption, license and renewal forms and the instructions for their completion and use.

(g) "LC50" means the median Lethal Concentration 50, and is the concentration at which 50% of the test organisms die during the course of a specified and predetermined time period (e.g. 96 hours).

(h) "Mechanical control device" means any physical device or structure utilized to confine and/or remove oil from the surface of the water or the shoreline.

(i) "Non–toxic" or "not toxic" means that the survivorship of the test organisms in the treatment exposure is 90% or greater than those in the control group. Testing to determine if an agent is non–toxic shall be done in accordance with the Exemption Petition section of the Guidance Document which requires a Standard LC50 bioassay on specified test species.

(j) "Oil Spill Cleanup Agent" (OSCA) means a chemical, or any other substance used for removing, dispersing or otherwise cleaning up oil or any residual products of petroleum in, or on, any of the waters of the state.

(k) "OSCA" means Oil Spill Cleanup Agent.

(*l*) "Sinking agent" means a type of OSCA, the primary function of which is to combine with oil to cause sinking of the agent–oil mass. Sinking agents may not be used in the waters of California.

(m) "Surface washing agent" means a type of OSCA, the function of which is to facilitate the removal of oil from shoreline substrates or other oiled surfaces. The primary effect of this type of OSCA is to act as a wetting agent to soften or lower the viscosity of the oil, thereby increasing the effectiveness of water in displacing the oil from the shoreline surfaces. A surface washing agent cannot act as a dispersant.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code; and 40 CFR Sections 300.115 and 300.175(b).

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Amendment of section heading, repealer of former subsection (g), new subsections (a), (b), (e)–(g), (i) and (m), subsection relettering, amendment of newly designated subsections (c), (d), (g) and (*l*), and amendment of NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

Article 2. Licensing Oil Spill Cleanup Agents

§ 885.1. Applicability and Exemptions.

(a) Any OSCA applied in or on state waters must be licensed by the Administrator unless otherwise exempted, or being used in an expedited testing situation as specified in this Section.

(b) Exemptions to the license requirement:

(1) a manufacturer may request an exemption from the licensing requirements for the following agents and substances;

(A) substances such as sorbents and other cleanup devices that do not employ the use of active chemical cleanup agents; or

(B) substances that do not to cause aquatic toxicity when used for purposes of oil spill response.

(c) Expedited testing and use of an unlicensed OSCA:

(1) the Administrator or his/her designee may authorize the use of an unlicensed OSCA on an expedited basis in any waters of the state;

(2) the unlicensed OSCA must be used in accordance with the criteria established for the particular body of water to which it will be applied, as specified in Article 3 of this subchapter. In addition, such use must be done in consultation with applicable federal agencies and be consistent with the National Contingency Plan.

(3) expedited use of an unlicensed OSCA may be authorized if an application for licensing has been submitted but not yet approved or denied, and the following conditions are met:

(A) there is danger of impact or harmful effect from an oil spill to the waters of the state; and

(B) the Administrator determines that mechanical control devices or currently licensed OSCA's, used either singly or in combination, may not be as appropriate or as effective in the given situation as the unlicensed OSCA; and

(C) a preliminary review of the OSCA's license application indicates that the OSCA being tested will not be more hazardous to the aquatic environment than the oil on which it is being applied; and

(D) the test has been approved by the Administrator and the RRT, and will be supervised by the Administrator.

(4) an expedited test may be conducted for the following purposes;

(A) to determine the efficacy of an OSCA in a given situation or on a particular type of oil;

(B) to obtain information needed to meet the requirements set forth in Government Code §8670.12;

(C) to improve results when used with a currently licensed OSCA and/or a mechanical control device;

(D) to mitigate the effects of the oil spill when it is determined that the impact of the OSCA will be less than the impact of the oil.

(5) the OSCA may only be used once on an expedited basis during the licensing process;

(6) the results of the test shall be documented and made part of the OSCA license application materials.

NOTE: Authority: Sections 8670.13.1 and 8670.7, Government Code. Reference: Sections 8670.13.1, 8670.13.2 and 8670.7, Government Code.

HISTORY

1. New article 2 (sections 885.1–885.10) and section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Amendment of section heading, section and NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.2. Exemption, License and Renewal Applications and Fees.

(a) Exemption Petition, (form #1958, as found in the Guidance Document):

(1) a manufacturer must petition for an exemption to the licensing process for any product that might be used in response to an oil spill that could be considered exempt under section 885.1.

(A) the following materials will automatically be considered exempt, though the manufacturer must still submit an exemption request form in order to establish the product as available for use in California;

1. cellulose fibers, other than peat moss or products derived from peat moss,
2. vermiculite or zeolite,
3. polypropolene,
4. polyethylene,
5. polyurethane,
6. polyester.

(2) the request for exemption must be submitted using the Petition for Exemption, form #1958. This form shall be available from the Administrator upon request.

(3) a petition for exemption shall be accompanied by a filing fee, as follows:

(A) $100 for a petition for an inert agent such as those listed in subsection 885.2(a)(1)(A) above;

(B) $250 for a petition for any other type of agent.

(C) The fee shall be used to cover costs incurred by the Administrator in processing the application.

(D) The fee shall be counted toward the cost of the license application if the exemption request is denied.

(4) Review process:

(A) within 14 days of receipt, the Administrator will issue a letter of acknowledgment notifying the applicant that the petition has been received;

(B) within 30 days of submittal, the applicant will be notified in writing if the petition is not complete, and will be informed of any additional information required. The petition will not be considered complete until all additional information has been submitted;

(C) the Administrator shall approve or deny the exemption request within 60 days of receiving a complete petition;

1. the exemption shall be approved if the manufacturer can demonstrate that the OSCA is not toxic and does not pose a hazard to the aquatic environment;

2. the applicant shall be notified in writing of the Administrator's determination and the reasons for the decision.

(b) License Application, (form #1959 as found in the Guidance Document):

(1) the applicant shall apply for a license for an OSCA using a License Application, form #1959. This form shall be available from the Administrator upon request.

(2) the license shall be valid for a period not to exceed 5 years, and must be renewed prior to the expiration date if the manufacturer wants to continue to have the agent considered available for use during an oil spill.

(3) each application for a license shall be accompanied by a filing fee of one thousand dollars ($1000). These fees shall be used to cover the costs incurred by the Administrator in processing the application.

(4) Review process:

(A) within 14 days of receipt, the Administrator will issue a letter of acknowledgment notifying the applicant that the petition has been received;

(B) within 30 days of submittal, the applicant will be notified in writing if the petition is not complete, and will be informed of any additional information required. The petition will not be considered complete until all additional information has been submitted;

(C) the Administrator shall approve or deny the exemption request within 60 days of receiving a complete application;

1. the license shall be approved if the manufacturer can demonstrate the efficacy of the product as an oil spill cleanup agent, and if the product meets all the licensing requirements of this subchapter;

2. the applicant shall be notified in writing of the Administrator's determination and the reasons for the decision.

(c) License Term and Renewal, (form #1967 as found in the Guidance Document):

(1) The term of a license shall not exceed five years. There is no grace period for renewal. An OSCA may not be used after the expiration of the license.

(2) The manufacturer must apply for renewal of the license using the License Renewal Form #1967. The renewal forms shall be available from the Administrator upon request;

(3) Each application for renewal shall be accompanied by a filing fee of $100. This fee shall be used to cover costs incurred by the Administrator in processing the renewal.

(4) Review process:

(A) within 14 days of receipt, the Administrator will issue a letter of acknowledgment notifying the applicant that the renewal application has been received. If the renewal application is not complete, the letter of acknowledgment will include a list of any additional information that may be required. The application will not be considered complete until all additional information has been submitted;

(B) the Administrator shall approve or deny the request for renewal within 30 days of receiving a complete application;

(C) the license shall be renewed if:

1. the license has not previously been revoked for cause; and

2. the product formulations have not changed or, if changed, the modified formulation has been approved by the Administrator; and

3. the applicant submits a complete application and provides sufficient information to establish that the product meets current licensing criteria.

(D) the applicant shall be notified in writing of the Administrator's determination and the reasons for the decision.

(d) Appeals

(1) An applicant may appeal the Administrator's revocation of a license, or denial of an application for exemption, license or renewal;

(A) an appeal must be filed in writing within 15 working days of the date the notice of denial was mailed.

(B) the appeal must include the applicant's reason(s) for disputing the Administrator's decision. The applicant may include additional test data or other information regarding the OSCA that could be used by the Administrator to reconsider the initial decision.

(C) the Administrator will respond to an appeal within 30 days of receipt of the applicant's request for reconsideration.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Amendment of section heading, section and NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.3. Revoking a License.

(a) The Administrator may revoke a license for the following reasons:

(1) the OSCA does not perform as expected when applied to spilled oil;

(2) the formulation of the OSCA is changed;

(3) information becomes available that demonstrates that the OSCA is more toxic than previously determined, or has adverse effects in the aquatic environment not previously known or anticipated;

(4) information on the license or renewal applications is found to be incorrect, incomplete or inaccurate.

(b) Appeals

(1) A manufacturer may appeal the Administrator's revocation of a license using the process specified in §885.2 of this subchapter.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Repealer and new section and amendment of NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.4. Accuracy of Information and Notification of Changes in Formulation.

(a) The applicant is responsible for the accuracy, completeness and timely update of all the information submitted in connection with the application to license an OSCA, and all the information stated on the product container label. An update to the application shall be considered timely if it is submitted before the application process is completed, and approval/denial determined. If an update is submitted, the application process timelines will recommence with receipt of the updated material.

(b) If any of the information on an application is found to be incorrect or inaccurate, the application shall be denied, or the license revoked if already issued.

(c) Prior to any change in the formulation of an approved product, the applicant shall notify the Administrator in writing and shall obtain specific approval of the change before the OSCA may be used to remove, clean up or otherwise treat oil in California waters.

(1) The Administrator may require a new application if there is a significant change in the OSCA formulation. A significant change is one that would alter the allowable use or the recommended application parameters, as specified in Article 3 of this subchapter.

(2) Failure to provide notification of a change in formulation is cause for the Administrator to revoke the OSCA license.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).

2. Amendment of section and NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.5. Testing Required for Licensing.

(a) Licensing an OSCA is subject to successful screening through:

(1) standardized efficacy tests;

(2) standardized toxicity tests;

(3) such other tests as deemed necessary by the Administrator in order to determine the efficacy, toxicity or appropriate use of the OSCA.

(b) Testing necessary to determine compliance with the efficacy and toxicity criteria shall, as applicable, be conducted consistent with the testing methods or procedures approved by the Administrator, and found in the Guidance Document.

(c) All tests shall be performed by the applicant or his/her designee. The Administrator or his/her authorized agent may verify or require verification of the results of any tests. Any verification costs incurred by the Administrator will be paid from the applicant's licensing fee.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Amendment of section and NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.6. Efficacy and Toxicity Criteria.

Each OSCA to be considered for licensing by the Administrator shall comply with the following efficacy and toxicity criteria:

(a) the OSCA must have a flash point of 170 degrees Fahrenheit or greater;

(b) the hydrogen ion activity of a liquid OSCA that is water soluble, as applied to the water surface must be 6.5 to 8.5 pH units;

(c) the heavy metal and chlorinated hydrogen content must not be greater than the following concentration(s) in parts per million or milligrams per liter of product:

(1) Mercury – 0.005, Cadmium – 0.01, Lead – 0.05,

(2) total identifiable chlorinated hydrocarbon – 0.05.

(d) the OSCA must perform as indicated by the manufacturer when applied in the manner recommended by the manufacturer;

(e) bioremediation agents must degrade the oil through microbial action, and neither the bioremediant or its by–products may be more toxic in the aquatic environment than the oil on which applied;

(f) collecting agents must be nontoxic, and upon application to an oil spill, at least 90 percent of the oil–agent mass must remain afloat;

(g) dispersant efficacy must be established in accordance with the standardized efficacy tests required by this subchapter, and found in the Guidance Document. If more than 10 percent of the oil sinks upon application of the OSCA, the agent will be considered a sinking agent;

(h) no dispersant or surface washing agent shall be licensed if it has has an average level of toxicity greater than 10 mg/l as applied (EC50 less than 10 mg/l). The average level of toxicity of these agents shall be determined by the testing methods described in the Guidance Document.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Amendment of section heading, section and and NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.7. Issuing a License.

(a) A license shall be issued to the OSCA manufacturer (applicant) on a registered trademark–name basis when the following conditions are met:

(1) a completed application has been submitted to the Administrator along with the appropriate fee; and

(2) the applicant has conducted the standardized efficacy and toxicity tests, as well as any other relevant tests or requirements prescribed by the Administrator, and provided in this subchapter; and

(3) the results of the required tests have been submitted to the Administrator; and

(4) the applicant has submitted any additional information as requested by the Administrator to substantiate the test data; and

(5) the results of these required tests and any additional, substantiating data meet the efficacy and toxicity criteria established in this Article.

(b) If the Administrator's Industrial Hygienist determines that the OSCA constitutes a serious occupational hazard to health, the license application will either be;

(1) denied; or

(2) licensed for use with specified conditions that will adequately minimize or mitigate the occupational health hazard.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code; and Title 8, Section 5192, California Code of Regulations.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Amendment of section and NOTE filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.8. OSCA Labeling Requirement.

Each OSCA must have a plainly printed label attached to the container that states at least the following:

(a) the name, brand, and trademark, if any, under which the OSCA is sold;

(b) the name and address of the manufacturer, importer, or vendor;

(c) special handling, storage, or worker safety precautions;

(d) the product's flash point and freezing point, if applicable for the type of product;

(e) recommended application procedure(s), concentration(s), and conditions for use as regards to water salinity, water temperature, and the types and ages of oils on which it may be used;

(f) the shelf life, or expiration date of the product.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Repealer of former section 885.8, and renumbering of former section 885.9 to new section 885.8, including amendment of section and NOTE, filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.9. Legal Responsibility.

Obtaining a license for an OSCA does not waive any other legal responsibilities of the manufacturer or user of an OSCA.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Renumbering of former section 885.9 to new section 885.8, and renumbering of former section 885.10 to new section 885.9, including amendment of NOTE, filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 885.10. Legal Responsibility.

NOTE: Authority: Sections 8670.13.1 and 8670.13.2, Government Code. Reference: Section 8670.13.2, Government Code; Section 13169, Water Code; and California Code of Regulations, Section 2318.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Renumbering of former section 885.10 to new section 885.9 filed 7–28–98; operative 8–27–98 (Register 98, No 31).

Article 3. Use of Oil Spill Cleanup Agents

§ 886.1. Requirements for the Use of a Licensed OSCA.

(a) The use, or expedited testing of an OSCA in response to an oil spill shall be subject to the approval of the Administrator and the Regional Response Team (RRT), and done in compliance with the provisions of this subchapter. An OSCA may be used without obtaining the concurrence of the RRT if the OSCA has been listed in a preauthorization plan of the applicable Area Contingency Plan (ACP). Such listing shall have been done in accordance with the provisions of 40 CFR 300, Subpart J, as follows:

(1) the RRT representative from the Environmental Protection Agency (EPA) and the state of California, and the Department of Commerce (DOC) and Department of Interior (DOI) natural resources trustees shall review and either approve, disapprove, or approve with modification the preauthorization plans of the Area Committees;

(2) the preauthorization plan of the appropriate ACP must address the specific contexts in which the specified products should and should not be used;

(3) the OSCA must then be used in a situation the same as or similar to the context described in the ACP.

(b) The use of an OSCA shall be supervised by the Department of Fish and Game in accordance with the provisions of this subchapter, and any applicable direction or instruction from the Administrator. Decisions regarding use must be consistent with the statutory provisions governing the duties of the Administrator as outlined in Chapter 7.4 of the Government Code, or the Department's responsibilities pursuant to Fish and Game Code §5655.

(c) Use of an OSCA in a domestic water supply:

(1) dispersants, and OSCA's that are not inert, may only be applied to water that is the source of a domestic drinking supply after notification is made to the State Department of Health Services and the appropriate local health agency responsible for drinking water quality; and

(2) the OSCA shall be applied in accordance with the recommendations of the state and local health agencies.

(d) The local Regional Water Quality Control Board shall be notified before any OSCA is applied to a lake, a reservoir or any surface streams.

(e) In addition to the provisions of (a), (b), (c) and (d) above, the following restrictions and requirements apply to the bodies of water indicated:

(1) Lakes and reservoirs:

(A) Collecting agents:

1. collecting agents that are inert may be applied to lakes and reservoirs provided the floating oil–agent mixture is collected and disposed of properly.

2. collecting agents that are not inert may be applied in domestic water supplies but only in accordance with the provisions in subparagraph (c) of this section.

(B) Dispersing agents:

1. any application of a dispersant to a domestic water supply shall be in accordance with the provisions of subparagraph (c) of this section.

2. shall not be applied to the shoreline of a lake or reservoir;

3. aside from 1. and 2. above, dispersing agents may be applied to lakes and reservoirs only if wildlife resources and associated habitat, recreational beaches, marinas or shore facilities are threatened, and other control methods are judged to be inadequate or infeasible by the Department of Fish and Game.

(C) Sinking agents shall not be applied to lakes or reservoirs.

(D) Bioremediation agents may be applied in lakes and reservoirs and associated shorelines provided that the bioremediant, as applied, is not more harmful to the aquatic environment than the spilled oil.

(E) Surface washing agents:

1. surface washing agents that are inert may be applied to the shoreline of surface streams provided that the floating oil–agent mixture is collected and disposed of properly.

2. surface washing agents that are not inert may be applied to domestic water supplies but only in accordance with the provisions in subparagraph (c) of this section.

(2) Surface streams:

(A) Collecting agents;

1. collecting agents that are inert may be applied to surface streams provided the floating oil–agent mixture is collected and disposed of properly.

2. collecting agents that are not inert may be applied in domestic water supplies but only in accordance with the provisions in subparagraph (c) of this section.

(B) Dispersing agents shall not be applied to surface streams.

(C) Sinking agents shall not be applied to surface streams.

(D) Bioremediation agents may be applied to surface streams and associated shorelines provided that the bioremediant, as applied, is not more harmful to the aquatic environment than the spilled oil.

(E) Surface washing agents:

1. surface washing agents that are inert may be applied to the shoreline of surface streams provided that the floating oil–agent mixture is collected and disposed of properly.

2. surface washing agents that are not inert may be applied to domestic water supplies but only in accordance with the provisions in subparagraph (c) of this section.

(3) Bays and estuaries (from the mouth to the upstream boundary of the tidal prism);

(A) Collecting agents may be applied to bays and estuaries provided the floating oil–agent mixture is collected and disposed of properly;

(B) Dispersing agents:

1. shall not be applied to the shoreline of a bay or an estuary.

2. aside from 1. above, dispersing agents may only be applied in accordance with guidelines established in the "Quick Approval Process for Dispersant Use in Waters Off California" as developed by the California Department of Fish and Game and the National Oceanic and Atmospheric Administration, dated 4/14/97.

(C) Sinking agents shall not be applied to a bay or an estuary.

(D) Bioremediation agents may be applied to bays and estuaries and associated shorelines provided that the bioremediant, as applied, is not more harmful to the aquatic environment than the spilled oil.

(E) Surface washing agents may be applied to the shoreline of bays and estuaries provided that the floating oil–agent mixture is collected and disposed of properly.

(4) Ocean waters:

(A) Collecting agents may be applied in ocean waters only if the floating oil–agent mixture is collected and disposed of properly.

(B) Dispersing agents:

1. shall not be applied to shoreline areas, including areas exposed during tidal action;

2. aside from 1. above, dispersing agents may only be applied in accordance with guidelines established in the "Quick Approval Process for Dispersant Use in Waters Off California" as developed by the California Department of Fish and Game and the National Oceanic and Atmospheric Administration, dated 4/14/97.

(C) Sinking agents shall not be applied in ocean waters.

(D) Bioremediation agents may be applied to ocean waters and associated shorelines provided that the bioremediant, as applied, is not more harmful to the aquatic environment than the spilled oil.

(E) Surface washing agents may be applied to the shoreline of bays and estuaries provided that the floating oil–agent mixture is collected and disposed of properly.

(f) In addition to all other requirements of this section, an OSCA shall be used in accordance with the manufacturer's recommendations.

(g) Use of a licensed OSCA at variance with the provisions of this subchapter may be approved only by the Administrator or his/her designee.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code; and 40 CFR Section 300.115.

HISTORY

1. New article 3 (sections 886.1–886.6) and section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Repealer of former section 886.1 and renumbering of former section 886.2 to new section 886.1, including amendment of section and NOTE, filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 886.2. Use of an OSCA Prior to Licensing.

No OSCA shall be used prior to licensing unless exempt form the licensing requirements, or if used on an expedited testing basis. Expedited testing use shall be in accordance with the provisions of Article 2 of this subchapter.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Renumbering of former section 886.2 to new section 886.1, and renumbering of former section 886.3 to new section 886.2, including amendment of section and NOTE, filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 886.3. OSCA Endorsement.

Licensing or permission to use a particular type of OSCA shall not be considered an endorsement of any product by the Administrator or the Department of Fish and Game.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Sections 8670.13.1 and 8670.13.2, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Renumbering of former section 886.3 to new section 886.2, and renumbering of former section 886.6 to new section 886.3, including amendment of section and NOTE, filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 886.4. Penalties.

Any person who knowingly, intentionally or negligently violates any provision of this subchapter shall be subject to criminal, civil, and/or administrative civil actions as prescribed in Article 9, Government Code, beginning with Section 8670.57.

NOTE: Authority: Section 8670.13.1, Government Code. Reference: Article 9, beginning with Section 8670.57, Government Code.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Repealer and new section filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 886.5. Experimental Use of an OSCA.

NOTE: Authority: Sections 8670.13.1 and 8670.13.2, Government Code. Reference: Section 8670.13.2, Government Code; Section 13169, Water Code; and California Code of Regulations, Section 2335.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Repealer filed 7–28–98; operative 8–27–98 (Register 98, No 31).

§ 886.6. OSCA Endorsement.

NOTE: Authority: Sections 8670.13.1 and 8670.13.2, Government Code. Reference: Section 8670.13.2, Government Code; Section 13169, Water Code; and California Code of Regulations, Section 2336.

HISTORY

1. New section filed 12–31–96; operative 12–31–96 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only pursuant to Government Code section 8670.13.2 (Register 97, No. 1).
2. Renumbering of former section 886.6 to new section 886.3 filed 7–28–98; operative 8–27–98 (Register 98, No 31).

Chapter 1. Department of Forestry and Fire Protection—Conflict of Interest Code 201

Chapter 1.5. Timber Harvesting Plans 201

Article 1. General 201

Chapter 3.5. General Forest Policies for California 201

Chapter 4. Forest Practices 201

Subchapter 1. Abbreviations and Definitions 207

Article 1. Abbreviations and Definitions 207

§ 895. Abbreviations Applicable Throughout Chapter.

§ 895.1. Definitions.

Subchapter 2. Application of Forest Practice Rules 220.1

Article 1. Introduction 220.1

§ 896. General.

§ 897. Implementation of Act Intent.

§ 897.1.

Article 2. Preparation and Review of Timber Harvesting Plans 221

§ 898. Feasibility Alternatives.

§ 898.1. Review of Plan by Director.

§ 898.2. Special Conditions Requiring Disapproval of Plans.

Article 3. PRC 4555, Rule Review Procedures 224

§ 900. Intent.

§ 901. Timber Harvesting Plan Decision Delay.

§ 902. Director's Notice to Board.

§ 902.1. Board Action.

§ 902.2. Notice Content.

§ 902.3. Notice Distribution.

§ 903. Order of Procedure.

§ 903.1. Content of Discussion and Prejudice of Appeal.

§ 903.2. Board Action.

Subchapter 3. Forest District Boundaries 225

Article 1. Districts 225

§ 906. Forest Districts.

§ 907. Coast Forest District.

§ 907.1. Southern Subdistrict of the Coast Forest District.

§ 908. Northern Forest District.

§ 909. Southern Forest District.

§ 909.1. High Use Subdistrict.

§ 909.2. Eastside Subdistrict.

Subchapter 4. Coast Forest District Rules 226

Article 1. Introduction 226

§ 911. Statement of Purpose.

Article 2. Ratings and Standards 226

§ 912. Definitions.

§ 912.5. Procedure for Estimating Surface Soil Erosion Hazard Rating.

§ 912.7. Resource Conservation Standards for Minimum Stocking.

§ 912.8. Progeny, Clonal, or Provenance Testing Stocking Standard Exemption.

§ 912.9. Cumulative Impacts Assessment Checklist.

Appendix 230

§ 912.10. Pacific Yew.

Article 3. Silvicultural Methods 233

§ 913. Silvicultural Objectives.

§ 913.1. Regeneration Methods Used in Evenaged Management.

§ 913.1.5. Regeneration Methods Used in Even-Aged Management and Limitations.

§ 913.2. Regeneration Methods Used in Unevenaged Management.

§ 913.2.5. Even-Aged Size Limits.

§ 913.3. Intermediate Treatments.

§ 913.4. Special Prescriptions.

§ 913.5. Stocking Status.

§ 913.6. Alternative Prescriptions.

§ 913.7. Exceptions.

§ 913.8. Special Harvesting Methods for Southern Subdistrict.

§ 913.9. Southern Subdistrict—Cutting Method and Stocking Provisions.

§ 913.10. Timberland Productivity.

§ 913.11. Maximum Sustained Production of High Quality Timber Products.

Article 4. Harvesting Practices and Erosion Control 241

§ 914. Purposes.

§ 914.1. Felling Practices.

§ 914.2. Tractor Operations.

§ 914.3. Cable Yarding.

§ 914.5. Servicing of Logging Equipment, Disposal of Refuse, Litter, Trash and Debris.

§ 914.6. Waterbreaks [Effective until 1-1-2000].

§ 914.6. Waterbreaks [Effective 1-1-2000].

§ 914.7. Timber Operations, Winter Period.

§ 914.8. Tractor Road Watercourse Crossing.

§ 914.9. Alternatives to Standard Rules.

Article 5. Site Preparation 245

§ 915. Purposes.

§ 915.1. Use of Heavy Equipment for Site Preparation.

§ 915.2. Treatment of Vegetative Matter.

§ 915.3. Protection of Natural Resources.

§ 915.4. Site Preparation Addendum.

§ 915.5. Waterbreaks.
§ 915.6. Erosion Control, Winter Period.
§ 915.7. Timber Harvesting, Winter Period.
§ 915.8. Erosion Hazard Ratings.
§ 915.9. Specific Erosion Control Measures.

Article 6. Watercourse and Lake Protection 246
§ 916. Intent of Watercourse and Lake Protection.
§ 916.1. In Lieu Practices.
§ 916.2. Protection of the Beneficial Uses of Water and Riparian Functions.
§ 916.3. General Limitations Near Watercourses, Lakes, Marshes, Meadows and Other Wet Areas.
§ 916.4. Watercourse and Lake Protection.
§ 916.5. Procedure for Determining Watercourse and Lake Protection Zone (WLPZ) Widths and Protective Measures.
§ 916.6. Alternative Watercourse and Lake Protection.
§ 916.7. Reduction of Soil Loss.
§ 916.8. Sensitive Watersheds.
§ 916.9. Protection and Restoration in Watersheds with Threatened or Impaired Values.
§ 916.9.1. Protection Measures in Watersheds with Coho Salmon. [Effective 1–1–2008 pursuant to Public Resources Code section 4554.5(a); operative the date Department of Fish and Game regulations 14 CCR sections 787.0–787.9 become effective]
§ 916.9.2. Measures to Facilitate Incidental Take Authorization in Watersheds with Coho Salmon. [Effective 1–1–2008 pursuant to Public Resources Code section 4554.5(a); operative the date Department of Fish and Game regulations 14 CCR sections 787.0–787.9 become effective]
§ 916.10. Domestic Water Supply Protection.
§ 916.11. Effectiveness and Implementation Monitoring.
§ 916.11.1. Monitoring for Adaptive Management in Watersheds with Coho Salmon. [Effective 1–1–2008 pursuant to Public Resources Code section 4554.5(a); operative the date Department of Fish and Game regulations 14 CCR sections 787.0–787.9 become effective]
§ 916.12. Section 303(d) Listed Watersheds.
§ 916.13. Interim Watershed Mitigation Addendum (IWMA).
§ 916.13.1. Consultation.
§ 916.13.2. IWMA Evaluation Area.
§ 916.13.3. Contents of IWMA
§ 916.13.4. Standards for IWMA Preparation.
§ 916.13.5. Submission of an IWMA as Part of a Plan.
§ 916.13.6. Compliance Monitoring and Expanded Completion Report.
§ 916.13.7. Subsequent Plans Within the IWMA Area.
§ 916.13.8. Equivalent Analysis.

Article 7. Hazard Reduction 254.3
§ 917. Hazard Reduction.
§ 917.1. Snag Disposal and Retention.
§ 917.2. Treatment of Slash to Reduce Fire Hazard.
§ 917.3. Prescribed Broadcast Burning of Slash.
§ 917.4. Treatment of Logging Slash in the Southern Subdistrict.
§ 917.5. Burning of Piles and Concentrations of Slash.
§ 917.6. Notification of Burning.
§ 917.7. Protection of Residual Trees.
§ 917.8. Slash Disposal to Control Forest Insects.
§ 917.9. Prevention Practices.
Appendix 255
§ 917.10. Prevention Practices.
§ 917.11. Locating and Reporting.

Article 8. Fire Protection 256
§ 918. Fire Protection.
§ 918.1. Fire Suppression Resource Inventory.
§ 918.2. Fire Plan Contents.
§ 918.3. Roads to Be Kept Passable.
§ 918.4. Smoking and Matches.
§ 918.5. Lunch and Warming Fires.
§ 918.6. Posting Procedures.
§ 918.7. Blasting and Welding.
§ 918.8. Inspection for Fire.
§ 918.9. Glass Containers.
§ 918.10. Cable Blocks.

Article 9. Wildlife Protection Practices 257
§ 919. Wildlife Practice.
§ 919.1. Snag Retention.
§ 919.2. General Protection of Nest Sites.
§ 919.3. Specific Requirements for Protection of Nest Sites.
§ 919.4. Non–listed Species.

§ 949.7. Determination of Significance.

Subchapter 6. Southern Forest District Rules 328

Article 1. Introduction 328
§ 951. Statement of Purposes.

Article 2. Ratings and Standards 328
§ 952. Definitions.
§ 952.5. Procedure for Estimating Surface Soil Erosion Hazard Rating.
§ 952.7. Resource Conservation Standards for Minimum Stocking.
§ 952.9. Cumulative Impacts Assessment Checklist.
Appendix 330
§ 952.10. Pacific Yew.

Article 3. Silvicultural Methods 333
§ 953. Silvicultural Objectives.
§ 953.1. Regeneration Methods Used in Evenaged Management.
§ 953.1.5. Regeneration Methods Used in Even-Aged Management and Limitations.
§ 953.2. Regeneration Methods Used in Unevenaged Management.
§ 953.2.5. Even-Aged Size Limits.
§ 953.3. Intermediate Treatments.
§ 953.4. Special Prescriptions.
§ 953.5. Stocking Status.
§ 953.6. Alternative Prescriptions.
§ 953.7. Riparian Vegetation.
§ 953.8. Exceptions.
§ 953.9. Successive Cutting.
§ 953.10. Timberland Productivity.
§ 953.11. Maximum Sustained Production of High Quality Timber Products.
§ 953.12. High Use Subdistrict.
§ 953.13. Exceptions.

Article 4. Harvesting Practices and Erosion Control 341
§ 954. Purposes.
§ 954.1. Felling Practices.
§ 954.2. Tractor Operations.
§ 954.3. Cable Yarding.
§ 954.4. Site Preparation Addendum.
§ 954.5. Servicing of Logging Equipment, Disposal of Refuse, Litter, Trash and Debris.
§ 954.6. Waterbreaks [Effective until 1-1-2000].
§ 954.6. Waterbreaks [Effective 1-1-2000].
§ 954.7. Timber Operations, Winter Period.
§ 954.8. Tractor Road Watercourse Crossing.
§ 954.9. Alternatives to Standard Rules.

Article 5. Site Preparation 344
§ 955. Purposes.
§ 955.1. Use of Heavy Equipment for Site Preparation.
§ 955.2. Treatment of Vegetative Matter.
§ 955.3. Protection of Natural Resources.
§ 955.4. Site Preparation Addendum.

Article 6. Watercourse and Lake Protection 345
§ 956. Intent of Watercourse and Lake Protection.
§ 956.1. In Lieu Practices.
§ 956.2. Protection of the Beneficial Uses of Water and Riparian Functions.
§ 956.3. General Limitations near Watercourses, Lakes, Marshes, Meadows and Other Wet Areas.
§ 956.4. Watercourse and Lake Protection.

Page

§ 956.5. Procedure for Determining Watercourse and Lake Protection Zone (WLPZ) Widths and Protective Measures.
§ 956.6. Alternative Watercourse and Lake Protection.
§ 956.7. Reduction of Soil Loss.
§ 956.8. Sensitive Watersheds.
§ 956.9. Protection and Restoration in Watersheds with Threatened or Impaired Values.
§ 956.10. Domestic Water Supply Protection.
§ 956.11. Effectiveness and Implementation Monitoring.
§ 956.12. Section 303(d) Listed Watersheds.
§ 956.13. Interim Watershed Mitigation Addendum (IWMA).
§ 956.13.1. Consultation.
§ 956.13.2. IWMA Evaluation Area.
§ 956.13.3. Contents of IWMA
§ 956.13.4. Standards for IWMA Preparation.
§ 956.13.5. Submission of an IWMA as Part of a Plan.
§ 956.13.6. Compliance Monitoring and Expanded Completion Report.
§ 956.13.7. Subsequent Plans Within the IWMA Area.
§ 956.13.8. Equivalent Analysis.

Article 7. Hazard Reduction 356.1
§ 957. Hazard Reduction [Southern Forest District].
§ 957.1. Snag Disposal and Retention.
§ 957.2. Treatment of Slash to Reduce Fire Hazard.
§ 957.3. Prescribed Broadcast Burning of Slash.
§ 957.4. Treatment of Logging Slash in the High Use Subdistrict.
§ 957.5. Piling and Burning.
§ 957.6. Notification of Burning.
§ 957.7. Protection of Residual Trees.
§ 957.8. Slash Disposal to Control Forest Insects.
§ 957.9. Preventive Practices.
Appendix 356.2
§ 957.10. Locating and Reporting.
§ 957.11. Performance Based Hazard Reduction.
§ 957.12. Treatment of Logging Slash to Reduce Fire Hazard.

Article 8. Fire Protection 356.3
§ 958. Fire Protection.
§ 958.1. Fire Suppression Resources Inventory.
§ 958.2. Fire Plan Contents.
§ 958.3. Roads to Be Kept Passable.
§ 958.4. Smoking and Matches.
§ 958.5. Lunch and Warming Fires.
§ 958.6. Posting Procedures.
§ 958.7. Blasting and Welding.
§ 958.8. Inspection for Fire.
§ 958.9. Glass Containers.
§ 958.10. Cable Blocks.

Article 9. Wildlife Protection Practices 356.4
§ 959. Wildlife Practice.
§ 959.1. Snag Retention.
§ 959.2. General Protection of Nest Sites.
§ 959.3. Specific Requirements for Protection of Nest Sites.
§ 959.4. Non–listed Species.
§ 959.5. Alternatives.
§ 959.6. General Protection of Nest Sites.
§ 959.7. Specific Requirements for Protection of Nest Sites.
§ 959.8. Alternatives.
§ 959.12. Sensitive Species Classification.
§ 959.15. Protection of Wildlife Habitat.
§ 959.16. Late Succession Forest Stands.
§ 959.17. Protection of Old Growth Forest Components.
§ 959.18. Protection of Ancient Forest Components.

Article 10. Violation of Rules Prior to Changes 359
§ 960. Violations of Rules Prior to Changes.

Article 11. Coastal Commission Special Treatment Areas 359
§ 961. Coastal Commission Special Treatment Areas.
§ 961.1. Preliminary Field Work and Timber Harvesting Plans.
§ 961.2. Exemptions from Timber Harvesting Plan Requirements.
§ 961.3. Silvicultural Methods.
§ 961.4. Stocking Requirements.
§ 961.5. Logging Practices.
§ 961.6. Hazard Reduction.
§ 961.7. Watercourse and Lake Protection.
§ 961.8. Buffer Zones Within the Coastal Zone.

Article 12. Logging Roads and Landings 361
§ 963. Logging Roads and Landings.
§ 963.1. Planning for Roads and Landings.
§ 963.2. Road Construction.
§ 963.3. Watercourse Crossings.
§ 963.4. Road Maintenance.
§ 963.5. Landing Construction.
§ 963.6. Conduct of Operations on Roads and Landings.
§ 963.7. Licensed Timber Operator Responsibility for Roads and Landings.
§ 963.8. Planned Abandonment of Roads, Watercourse Crossings, and Landings.
§ 963.9. Roads and Landings in Watersheds with Threatened or Impaired Values.

Article 13. County Rules 364.2
§ 965. Monterey County Rules.
§ 965.1. Haul Routes.
§ 965.2. Hauling to the Nearest Public Road.
§ 965.3. Public Road Protection.
§ 965.4. Log Hauling.
§ 965.5. Winter Period.
§ 965.6. Big Sur Coast.
§ 965.7. Public Water Agency Representative.
§ 965.8. Performance Bonding.
§ 965.9. Erosion Control Maintenance.
§ 965.10. THP Description.

Article 14. Archaeological and Historical Resource Protection 364.3
§ 969. Statement of Purpose.
§ 969.1. Plan, and Emergency Notice Preparation.
§ 969.2. Protection Measures for Plans and Emergency Notices 3 Acres and Larger.
§ 969.3. Post Review Site Discovery.
§ 969.4. Archaeological Training Requirements.

Page

§ 969.5. Site Recording.
§ 969.6. Protection of Sites During Timber Operations.
§ 969.7. Determination of Significance.

Subchapter 7. Administration 364.6

Article 1. Timber Operator Licenses 364.6
§ 1020. Board Authority Delegated.
§ 1021. Crop of Trees.
§ 1022. License.
§ 1022.1. Limited Timber Operator License.
§ 1022.2. License for Site Preparation.
§ 1022.3. License for Erosion Control Maintenance.
§ 1023. Issuance of License.
§ 1023.1. Company, Corporation and Partnership Licenses.
§ 1024. Application Form and Content [Effective until 1-1-99].
§ 1024. Application Form and Content [Effective 1-1-99].
§ 1024.1. Timber Operator Education.
§ 1024.2. Qualifying Experience.
§ 1024.3. Application Processing.
§ 1024.4. Returned Checks.
§ 1024.5. Insurance Maintenance.
§ 1025. Fees for Licenses [Effective until 1-1-99].
§ 1025. Fees for Licenses [Effective 1-1-99].
§ 1026. License Renewal [Effective until 1-1-99].
§ 1026. License Renewal [Effective 1-1-99].
§ 1027. License Denial.
§ 1027.1. Basis of Denial.
§ 1027.2. Partnership and Corporation Denials.
§ 1027.3. Multiple Licenses.
§ 1029. License Availability.
§ 1030. Licensee: Change of Address [Effective until 1-1-99].
§ 1030. Licensee: Change of Address [Effective 1-1-99].

Article 2. Timber Harvesting Plan 364.9
§ 1031. Timber Harvesting Plan Availability.
§ 1032. Timber Harvesting Plan Filing Locations.
§ 1032.7. Plan Submittal and Notice of Intent.
§ 1032.8. Notice of Intent—Distribution by Director.
§ 1032.9. Request for Notification of Timber Harvesting Plan Submission.
§ 1032.10. Request for Information on Domestic Water Supplies.
§ 1033. Filing Date.
§ 1034. Contents of Plan.
§ 1034.1. Plan Submittal.
§ 1034.2. Professional Judgment.
§ 1035. Plan Submitter Responsibility.
§ 1035.1. Registered Professional Forester Responsibility.
§ 1035.2. Interaction Between RPF and LTO.
§ 1035.3. Licensed Timber Operator Responsibilities.
§ 1035.4. Notification of Commencement of Operations.
§ 1036. Deviations.
§ 1036.1. Murrelet Protection before Notice of Completion.
§ 1037. THP Preharvest Inspection—Filing Return.
§ 1037.1. Notice of Filing.
§ 1037.2. Request for Notices.
§ 1037.3. Agency and Public Review.

Page

§ 1037.4. Director's Determination.
§ 1037.5. Review Teams to Be Established.
§ 1037.6. Nonconformance of Plan.
§ 1037.7. Conformance of Plan.
§ 1037.8. Notice of Conformance.
§ 1037.9. Public Inspection.
§ 1037.10. Review Period Waiver.
§ 1037.11. Notice of Waiver.
§ 1038. Exemption.
§ 1038.1. Compliance with Act and Rules.
§ 1038.2. Exemption Form.
§ 1038.3. Agency Exemptions.
§ 1039. Amendment.
§ 1039.1. Effective Period of the Plan.
§ 1040. Report Minor Deviations.
§ 1041. Limitations.
§ 1042. Change of Ownership.
§ 1043. Cancellation of Plans.
§ 1044. Regulations to Take Effect.
§ 1045. Director Delegation.
§ 1050. Erosion Control Maintenance.
§ 1051. Modified Timber Harvest Plan.
§ 1051.1. Contents of Modified THP.
§ 1051.2. Review of Modified THP.
§ 1051.3. Expiration of Modified THP Provisions.
§ 1052. Emergency Notice [Effective until 1-1-2006].
§ 1052. Emergency Notice.
§ 1052.1. Emergency Conditions [Effective until 1-1-2006].
§ 1052.1. Emergency Conditions.
§ 1052.2. Emergency Substantiated by RPF.
§ 1052.3. Emergency Notice for Insect Damaged Timberlands.
§ 1052.4. Emergency Notice for Fuel Hazard Reduction [Effective until 1-1-2006].
§ 1052.4. Emergency Notice for Fuel Hazard Reduction.
§ 1052.5. Emergency Notice for Fire Lookouts.

Article 3. Timber Harvesting Plan Appeal Procedures ..... 364.26(c)
§ 1053. Purpose of Regulations.
§ 1054. Return of Plan by Director.
§ 1054.1. Right to Request Public Hearing.
§ 1054.2. Form of Request for Hearing.
§ 1054.3. Filing of Request for Hearing.
§ 1054.4. Public Hearing.
§ 1054.5. Notice of Hearing.
§ 1054.6. Hearing Record.
§ 1054.7. Hearing Procedures.
§ 1054.8. Order of the Board.
§ 1055. County Appeals Procedures.
§ 1055.1. Hearing on County Appeal.
§ 1055.2. County Appeal Hearing Procedures—Scheduling.
§ 1055.3. County Appeal Hearing Procedures—Notice.
§ 1055.4. County Appeal Hearing Procedures—Record.
§ 1055.5. County Appeal Hearing Procedures—Sequence.
§ 1055.6. County Appeal Hearing Procedures—Order.
§ 1055.7. County Appeal Hearing Procedures—Scheduling.
§ 1055.8. County Appeal Hearing Procedures—Notice.
§ 1055.9. County Appeal Hearing Procedures—Record.
§ 1055.10. County Appeal Hearing Procedures—Sequence.
§ 1055.11. County Appeal Hearing Procedures—Order.

§ 1056.4. Head of Agency Appeal Hearing Procedures—Record.
§ 1056.5. Head of Agency Appeal Hearing Procedures—Sequence.
§ 1056.6. Head of Agency Appeal Hearing Procedures—Order.

Article 3.2. Administrative Penalty Hearing Procedures 364.29
§ 1057. Purpose of Regulations.
§ 1057.1. Filing of Petition and Notice of Defense/Request for Hearing.
§ 1057.2. Failure to Request Hearing.
§ 1057.3. Hearing Procedures.
§ 1057.4. Administrative Record.
§ 1057.5. Petition and Notice of Defense/Request for Hearing Form.
§ 1058. Hearing Procedures—Notice.
§ 1058.1. Hearing Procedures–Recording and Transcription.
§ 1058.2. Hearing Procedures–Use of Board Hearing Procedure and Sequence.
§ 1058.3. Hearing Procedures–Determination.
§ 1058.4. Review of Proposed Decision and Findings of Fact.
§ 1058.5. Determination.
§ 1059. Infractions.

Article 4. Timber Site Classification ..... 364.30(a)
§ 1060. Site Classification.

Article 5. Standardized Stocking Sampling Procedures ..... 364.30(a)
§ 1070. Stocking Sampling.
§ 1071. Minimum Stocking Standards.
§ 1072. Stocking Sampling Procedures.
§ 1072.1. Number of Plots Required.
§ 1072.2. Plot Layout.
§ 1072.3. Equipment.
§ 1072.4. Exclusions.
§ 1072.5. Basal Area Stocking Sampling Procedure.
§ 1072.6. Point Count Stocking Sampling Procedure.
§ 1072.7. Combination Stocking Sampling Procedure.
§ 1073. Unacceptable Results.
§ 1074. Waiver Request.
§ 1074.1. Waiver Approval.
§ 1075. Report of Stocking.

Article 6. Stocking Standards for Substantially Damaged Timberlands 364.32
§ 1080. Substantially Damaged Timberlands.
§ 1080.1. Stocking Requirements for Substantially Damaged Timberlands.
§ 1080.2. Timber Harvesting Plans for Substantially Damaged Timberlands.
§ 1080.3. Stocking Distribution.
§ 1080.4. Stocking Reports for Substantially Damaged Timberlands.
§ 1080.5. Time Period to Meet Stocking Requirements.
§ 1081. Understocked Timberland in Northern and Southern Forest Districts.
§ 1081.1. Limitations.
§ 1085. Stocking Standards for Substantially Damaged Timberlands.
§ 1085.1. Substantially Damaged Timberlands.
§ 1085.2. Stocking Requirements for Substantially Damaged Timberlands.
§ 1085.3. Time Period to Meet Stocking Requirements.
§ 1085.4. Stocking on Areas Previously Logged.
§ 1085.5. Stocking Distribution and Stocking Reports.
§ 1085.6. Plan Filing.

Article 6.5. Nonindustrial Timber Management Plan Administration 364.33
§ 1090. Rule Application.
§ 1090.1. Timber Management Plan and Notice of Timber Operations Filing Locations.
§ 1090.2. NTMP Submittal and Notice of Preparation.
§ 1090.3. Notice of Preparation—Distribution by Director.
§ 1090.4. Request for Notification of NTMP or Notice of Timber Operations Submission.
§ 1090.5. Contents of NTMP.
§ 1090.6. Notice of Timber Operations.
§ 1090.7. Notice of Timber Operations Content.
§ 1090.8. NTMP Professional Judgment.
§ 1090.9. Plan Submitter Responsibility.
§ 1090.10. Registered Professional Forester Responsibility.
§ 1090.11. Interaction Between RPF and LTO on Notice of Timber Operations.

§ 1115.3. Conduct of Hearing.
§ 1115.4. Comments.

Chapter 5. Board of Forestry—Organization and Operation 364.58

Subchapter 1. Board Organization and Procedure 364.58

Article 1. Abbreviations and Definitions 364.58
§ 1120. Abbreviations.
§ 1120.1. Definitions.

Article 2. Membership of Committees ... 364.59
§ 1121. District Technical Advisory Committee (DTAC) Appointments.
§ 1122. Professional Foresters Examining Committee Appointments.

Article 3. Emergency Meetings 364.59

Article 4. Membership of Committees ... 364.59
§ 1135. District Technical Advisory Committee (DTAC) Appointments.
§ 1136. Professional Foresters Examining Committee Appointments.
§ 1137. Other Committees.

Subchapter 2. Board of Rulemaking Under Z'Berg–Nejedly Forest Practice Act 364.59
§ 1141. Consultation.
§ 1142. Contents of Statement of Reasons.
§ 1143. Circulation of Notice and Statements of Reasons.
§ 1144. Evaluation and Adoption of Proposals.
§ 1145. Notice of Decision.
§ 1146. Evaluation of Proposal.
§ 1147. Board Action to Consider and Adopt Proposed Standard, Regulation or Rule.
§ 1148. Notice of Decision.
§ 1149. Public Reports and Emergency Standards, Rules or Regulations.

Subchapter 3. Board Actions Other Than Rule Making Under the Z'berg–Nejedly Forest Practice Act 364.60
§ 1150. Purpose.
§ 1151. Board Regulations for CEQA.
§ 1152. Declaration of Ministerial Projects.
§ 1153. Declaration of Categorical Exemptions.
§ 1154. Declaration of Categorical Exemptions.

Chapter 6. Hazardous Fire Areas and Conditions 364.61

Article 1. General Provisions 364.61
§ 1200. Petition Procedure for Establishing Hazardous Fire Areas by Board of Forestry.

Article 2. North Coast Region 364.61

Article 3. Sierra Cascade Region 364.61
§ 1203. Diamond International Hazardous Fire Area No. 1.

Page

§ 1203.1. Diamond International Hazardous Fire Area No. 2.
§ 1203.2. Collins Almanor Forest–Diamond International Hazardous Fire Area.
§ 1203.3. Anderson Woodlands Hazardous Fire Area.
§ 1203.4. Pondosa Hazardous Fire Area.
§ 1203.5. Big Valley Hazardous Fire Area.
§ 1203.6. Lake Almanor Hazardous Fire Area.
§ 1203.7. Harvey Hazardous Fire Area.
§ 1203.8. Quincy Watershed Hazardous Fire Area.
§ 1203.9. Viola Hazardous Fire Area.

Article 4. South Sierra Region 364.64
§ 1204. Bear Mountain Hazardous Fire Area.
§ 1204.1. Copper Peak Hazardous Fire Area.
§ 1204.2. Madera–Millerton Hazardous Fire Area.
§ 1204.3. Western Fresno and Kings Hazardous Fire Area.
§ 1204.4. Eastern Tulare Hazardous Fire Area.
§ 1204.5. Whitmore–Panther Creek Hazardous Fire Area.
§ 1204.6. Beaver Ridge–Bear River Hazardous Fire Area.
§ 1204.7. Lily Gap–White Pines Hazardous Fire Area.
§ 1204.8. Mokelumne Hazardous Fire Area.
§ 1204.9. Silver Fork Hazardous Fire Area.
§ 1204.10. Sly Park–Alder Creek Hazardous Fire Area.

Article 5. Central Coast Region 364.67
§ 1205. Quien Sabe–Los Muertos Hazardous Fire Area.
§ 1205.1. Jamesburg Hazardous Fire Area.
§ 1205.2. LaGloria Hazardous Fire Area.
§ 1205.3. Pacheco Hazardous Fire Area.
§ 1205.4. San Francisco Peninsula Watershed Hazardous Fire Area.
§ 1205.5. San Mateo, Santa Cruz and Santa Clara Counties Hazardous Fire Area.
§ 1205.6. Los Padres Boundary Hazardous Fire Area.

Article 6. Southern California Region 364.69
§ 1206. DeLuz–Tenaja Hazardous Fire Area.
§ 1207. Closure to Entry—San Francisco Peninsula Hazardous Fire Area.

Chapter 7. Fire Protection 364.70

Article 1. Classification of Private Lands for Fire Protection 364.70
§ 1220. Presently Classified and Recorded Boundaries.
§ 1220.1. Procedure for Classification.
§ 1220.2. Environmental Documentation.
§ 1220.3. Recording of Boundary Changes.
§ 1220.4. Public Access and Review.
§ 1220.5. Suppression of Fires on Lands Adjacent to State Responsibility Areas.

Article 2. Fire Extinguisher Test Standards and Procedures 364.71
§ 1230. Purpose.
§ 1231. Test Standards.
§ 1232. Procedures and Conditions.
§ 1233. Effectiveness Evaluation.
§ 1234. Approved Extinguishers.
§ 1235. Submission for Testing.

Page

Article 3. Fire Prevention Standards for Multiposition Small Engines 364.71
§ 1240. Multiposition Small Engine, Defined.
§ 1241. Minimum Performance Standards for Multiposition Small Engine Exhaust System Fire Ignition Suppression for Engines Manufactured After June 30, 1978.
§ 1241.1. Test Procedures for Multiposition Small Engine Exhaust System Fire Ignition Suppression for Engines Manufactured After June 30, 1978.
§ 1241.2. Compliance Requirement for Multiposition Small Engines Manufactured After June 30, 1978.
§ 1242. Minimum Performance Standards and Test Procedures for Multiposition Small Engine Exhaust System Fire Ignition Suppression for Engines Manufactured Prior to July 1, 1978.
§ 1242.1. Compliance Requirements for Multiposition Small Engines Manufactured Prior to July 1, 1978.

Article 4. Fire Prevention Standards for Electric Utilities 364.72
§ 1250. Purpose.
§ 1251. Definitions.
§ 1252. Areas Where PRC 4292–4296 Apply in State Responsibility Areas.
§ 1252.1. Official Area Maps.
§ 1252.2. Boundary Location—Roads, Etc.
§ 1252.3. Boundary Location—Section Lines, Etc.
§ 1253. Time When PRC 4292–4296 Apply.
§ 1254. Minimum Clearance Provisions—PRC 4292.
§ 1255. Exemptions to Minimum Clearance Provisions—PRC 4292.
§ 1256. Minimum Clearance Provisions—PRC 4293.
§ 1257. Exempt Minimum Clearance Provisions—PRC 4293.
§ 1258. Tree Lines.

Article 5. Standards for Cooperative Fire Protection Contracts During the Nonfire Season 364.77
§ 1260. General Standards.
§ 1261. Standards for Personnel Assignment and Cost Apportionment.
§ 1262. Related Standards for Agreement Administration.

Subchapter 1. Fire Protection (Reserved) 364.77

Subchapter 2. SRA Fire Safe Regulations 364.77

Article 1. Administration 364.77
§ 1270. Title.
§ 1270.01. Purpose.
§ 1270.02. Scope.
§ 1270.03. Local Ordinances.
§ 1270.04. Provisions for Application of These Regulations.
§ 1270.05. Inspection Authority.
§ 1270.06. Inspections.
§ 1270.07. Exceptions to Standards.
§ 1270.08. Requests for Exceptions.
§ 1270.09. Appeals.
§ 1271.00. Definitions.
§ 1271.05. Distance Measurements.
§ 1272.00. Maintenance of Defensible Space Measures.

Article 2. Emergency Access 364.80
§ 1273.00. Intent.
§ 1273.01. Road Width.
§ 1273.02. Roadway Surface.
§ 1273.03. Roadway Grades.
§ 1273.04. Roadway Radius.
§ 1273.05. Roadway Turnarounds.
§ 1273.06. Roadway Turnouts.
§ 1273.07. Roadway Structures.
§ 1273.08. One–Way Roads.
§ 1273.09. Dead–End Roads.
§ 1273.10. Driveways.
§ 1273.11. Gate Entrances.

Article 3. Signing and Building Numbering 364.81
§ 1274.00. Intent.
§ 1274.01. Size of Letters, Numbers and Symbols for Street and Road Signs.
§ 1274.02. Visibility and Legibility of Street and Road Signs.
§ 1274.03. Height of Street and Road Signs.
§ 1274.04. Names and Numbers on Street and Road Signs.
§ 1274.05. Intersecting Roads, Streets and Private Lanes.
§ 1274.06. Signs Identifying Traffic Access Limitations.
§ 1274.07. Installation of Road, Street and Private Lane Signs.
§ 1274.08. Addresses for Buildings.
§ 1274.09. Size of Letters, Numbers and Symbols for Addresses.
§ 1274.10. Installation, Location and Visibility of Addresses.

Article 4. Emergency Water Standards 364.82
§ 1275.00. Intent.
§ 1275.01. Application.
§ 1275.10. General Standards.
§ 1275.15. Hydrant/Fire Valve.
§ 1275.20. Signing of Water Sources.

Article 5. Fuel Modification Standards ... 364.83
§ 1276.00. Intent.
§ 1276.01. Setback for Structure Defensible Space.
§ 1276.02. Disposal of Flammable Vegetation and Fuels.
§ 1276.03. Greenbelts.

Subchapter 3. Fire Hazard 364.83

Article 1. Fire Hazard Severity 364.83
§ 1280. Fire Hazard Severity Zones.

Article 2. Fire Hazard Reduction Standard for Railroad Right–of–Way 364.84
§ 1290. Application.
§ 1291. Fire Protection Agreements.
§ 1292. Definitions.
§ 1293. Minimum Standards.
§ 1294. Compliance Order.
§ 1295. Order Format.

Article 3. Fire Hazard Reduction Around Buildings and Structures 364.85
§ 1299. Defensible Space.

Chapter 8. Forest Products, Wood Waste or Residue Disposal 364.85
Article 1. Scope 364.85
§ 1300. Scope.
Article 2. Methods of Disposal 364.85
§ 1301. Methods of Disposal.
Article 3. Fire Safety Precautions 364.85
§ 1302. Roads and Access.

Chapter 9. State Forests—Use and Sales 364.85
Subchapter 1. Recreational Use 364.85
Article 1. Abbreviations and Definitions 364.85
§ 1400. Abbreviations.
§ 1400.5. Definitions.
Article 2. Camping Area Use 364.86
§ 1401. Camping Area.
§ 1402. Campfire Permits.
§ 1403. Occupancy Time Limits.
§ 1404. Reservations.
§ 1405. Conduct.
§ 1406. Assembly.
Article 3. General Restrictions ..... 364.86(a)
§ 1410. Nuisance.
§ 1411. Equipment.
§ 1412. Noise.
§ 1413. Weapons.
§ 1414. Soliciting.
§ 1415. Firewood.
§ 1416. Defacing Plants.
§ 1417. Geological Features.
§ 1418. Horticulture.
§ 1419. Improvements.
§ 1420. Unauthorized Signs.
§ 1421. Rubbish.
§ 1422. Polluting Waters.
§ 1423. Animal Waste.
§ 1424. Pets.
§ 1425. Horses.
§ 1426. Smoking.
§ 1427. Archeological Features.
Article 4. Vehicles 364.87
§ 1430. Parking Time Limits.
§ 1431. Cross-Country Travel Prohibited.
§ 1432. Speed Limits.
§ 1433. Vehicles in Camping Areas.
Article 5. Restricted Use Areas 364.88
§ 1435. Areas Closed to Hunting, Trapping, and the Use of Firearms.
§ 1436. Areas Closed to Hunting and the Use of Firearms.
§ 1437. Fire Hazard.
§ 1438. Temporary Restricted Use.
§ 1439. Temporary Prohibited Area.
Subchapter 3. Geothermal Development 364.88
Article 1. Purpose 364.88
§ 1500. Purpose.
Article 2. Specific Provisions 364.88
§ 1501. General Requirements.
§ 1502. Special Requirements.
§ 1503. Consent of Permits or Leases.
Subchapter 4. Timber Sales 364.88
§ 1510. Harvesting and Management.
§ 1511. Timber Sales.
§ 1515. Bids Solicitation.
§ 1516. Non-Substitution Agreement.
§ 1517. Notice of Removal.
§ 1518. Transfer Requirement.
§ 1519. Preservation of Records.
§ 1520. Violation.
§ 1521. Notice of Violation and Review.

Chapter 9.5. Forest Improvement Program 364.89
Article 1. Introduction 364.89
§ 1525. General.
§ 1525.1. Statement of Intent.
§ 1526. Abbreviations.
§ 1526.1. Definitions.
Article 2. Eligibility 364.91
§ 1527. Eligible and Ineligible Practices.
§ 1527.1. Project Eligibility.
Article 3. Application Procedures 364.92
§ 1529. General.
§ 1529.1. Application and Management Plan.
Article 4. Guidelines for Cost Sharing ... 364.92
§ 1530. Cost Sharing Schedules.
§ 1530.1. Prevailing Costs.
Article 5. Project Review Procedures and Evaluation Criteria 364.93
§ 1532. Application Review and Filing.
§ 1532.1. Public Notice of Project Application.
§ 1532.2. Preliminary Project Review.
§ 1533. Ranking and Approval of Filed Applications.
Article 6. Program Administration 364.93
§ 1535. Applicant Notification.
§ 1535.1. Cost Sharing Agreements.
§ 1536. Project Completion Report.
§ 1536.1. On-Site Inspection.
Article 7. Request for Reconsideration of Rejected Applications 364.94
§ 1540. Return of Application.
§ 1541. Final Decision by the Director.
§ 1542. Recovery of Funds.
Article 8. Resource Protection Guidelines 364.94
§ 1545. Wildlife Protection.
§ 1545.1. Stream and Lake Protection.
§ 1545.2. Wet Meadows, Marshes, and Other Wet Areas.
§ 1545.3. Erosion Control.
§ 1545.4. Hazard Reduction.
§ 1545.5. Use of Chemicals.
§ 1545.6. Stocking Levels.
§ 1545.7. Species Selection.
§ 1545.8. Special Treatment Areas.
§ 1545.9. Insect Control.

Chapter 9.7. Urban Forestry Program Procedures 364.95
Article 1. Introduction 364.95
§ 1550. Purposes of Guidelines.
§ 1550.1. Legislative Intent.
§ 1550.2. Authority to Adopt Procedures.
Article 2. Definitions 364.95
§ 1551. Abbreviations.
§ 1551.1. Definitions.
Article 3. Eligibility 364.96
§ 1552. Eligible Practices.
§ 1552.1. Ineligible Costs.
§ 1552.2. Eligible Participants.
§ 1552.3. Eligibility and Permits.
Article 4. Guidelines for Awarding Grants 364.97

Page

§ 1553. Grant Guidelines.

Article 5. Application Procedures 364.97
§ 1554. Acceptance for Review and Filing.
§ 1554.1. Application and Content.
§ 1554.2. Application Review and Filing.
§ 1554.3. Priority Ranking of Filed Applications.

Article 6. Project Administration 364.98
§ 1555. Notification of Application Status.
§ 1555.1. Grant Agreements.

Article 7. Appeal Procedures 364.98
§ 1556. Request for Record Review.
§ 1556.1. Final Decision by the Director.

Chapter 9.8. Chaparral Management 364.98

Article 1. Introduction 364.98
§ 1560. Purpose.
§ 1561. Abbreviations.
§ 1561.1. Definitions.

Article 2. Project Eligibility for Contract 364.100
§ 1562. General Eligibility Criteria.

Article 3. Contract Application and Cost Sharing Procedures 364.100
§ 1563. Application.
§ 1564. Cost Sharing Schedules.
§ 1564.1. Prevailing Cost.

Article 4. Project Review Procedures and Evaluation Criteria 364.101
§ 1565. Application Review and Filing.
§ 1565.1. Notice of Project Application.
§ 1565.2. Preliminary Project Review.
§ 1566. Ranking and Approval of Filed Applications.

Article 5. Request for Reconsideration of Rejected Applications 364.101
§ 1567. Rejection of Application.
§ 1568. Director's Decision Final.

Article 6. Resource Protection 364.101
§ 1569. Resource Protection Guidelines.
§ 1569.1. Wildlife Protection.
§ 1569.2. Watercourse and Lake Protection.
§ 1569.3. Wet Meadows, Marshes, and Other Wet Areas.
§ 1569.4. Erosion Control.
§ 1569.5. Use of Chemicals.
§ 1569.6. Smoke Management.

Chapter 10. Registration of Professional Foresters 364.102

Article 1. General Provisions 364.102
§ 1600. Definitions.
§ 1601. Board of Forestry Address.
§ 1601.1. Determination of Deadlines.
§ 1602. Professional Forestry Practice Defined.
§ 1602.1. Identity Required of Registered Professional Forester in Charge.
§ 1603. Seal.
§ 1604. Registration Limited to Natural Persons.
§ 1605. Fees.
§ 1605.1. Professional Forestry Practice Defined.
§ 1605.2. Identity Required of Registered Professional Forester in Charge.
§ 1606. Address Change.

§ 1646. Examination Appeal.
§ 1647. Appeal Procedure.

Article 4. Miscellaneous 364.111
§ 1650. Specialties.
§ 1651. Certified Rangeland Management Specialty.

Chapter 11. Policy for Administration for the Department 364.112

Article 1. Policy Guides for Administration of Statutes Protecting Natural Resources 364.112
§ 1655. Issues to Be Referred to the Board by the Director.

Article 2. Policy Guides for Administration of the Fire Protection System 364.112
§ 1658. Criteria for County Assumption of SRA.

Chapter 12. Regulations for the Implementation of the California Environmental Quality Act 364.113

Article 1. General 364.113
§ 1660. Definitions.

Article 2. Exemptions 364.113
§ 1661. Ministerial Project Exemptions.
§ 1662. Categorically Exempt Activities.
§ 1662.1. Existing Facilities.
§ 1662.2. New Construction of Small Structures.
§ 1662.3. Minor Alterations to Land.
§ 1662.4. Minor Alterations in Land Use Limitations.
§ 1662.5. Information Collection.
§ 1662.6. Action by Regulatory Agencies for Protection of Natural Resources.
§ 1662.7. Inspections.
§ 1662.8. Surplus Government Property Sales.
§ 1662.9. Annexations of Existing Facilities and Lots for Exempt Facilities.

Article 3. Private Services Selection Policy 364.114
§ 1663. Private Services.
§ 1663.1. Definitions.
§ 1663.2. Publication of Announcement.
§ 1663.3. Establishment of Criteria.
§ 1663.4. Selection of Services.
§ 1663.5. Estimate of Value of Services.
§ 1663.6. Negotiation.
§ 1663.7. Amendments.
§ 1663.8. Contracting in Phases.
§ 1663.9. Small Business Participants.

Chapter 13. State Responsibility Fees 364.115
§ 1665.1. Authority.
§ 1665.2. Definitions.
§ 1665.3. Determination of Eligible Parcel.
§ 1665.4. Imposition of the Benefit Fee.
§ 1665.5. Requests for Review and Refunds.

Division 1.5. Department of Forestry and Fire Protection*

*Formerly Division 2, Chapter 2, Division of Forestry.

Chapter 1. Department of Forestry and Fire Protection—Conflict of Interest Code

NOTE: It having been found, pursuant to Government Code Section 11344, that the printing of the regulations constituting the Conflict of Interest Code is impractical and these regulations being of limited and particular application, these regulations are not published in full in the California Code of Regulations. The regulations are available to the public for review or purchase at cost at the following locations:

DEPARTMENT OF FORESTRY AND FIRE PROTECTION
1300 "U" STREET
SACRAMENTO, CA 95814

FAIR POLITICAL PRACTICES COMMISSION
1100 "K" STREET
SACRAMENTO, CA 95814

ARCHIVES
SECRETARY OF STATE
1020 "O" STREET
SACRAMENTO, CA 95814

The Conflict of Interest Code is designated as Chapter 1, Division 1.5 of Title 14 of the California Code of Regulations, and consists of sections numbered and titled as follows:

Chapter 1. Department of Forestry and Fire Protection—Conflict of Interest Code

Section
890. General Provisions
Appendix

NOTE: Authority cited: Sections 87300 and 87304, Government Code. Reference: Section 87300, et seq., Government Code.

HISTORY

1. New chapter 1 (articles 1–5; sections 800–804, not consecutive; Appendices A and B) filed 2–23–79; effective thirtieth day thereafter. Approved by Fair Political Practices Commission 1–3–79 (Register 79, No. 9).
2. Repealer of chapter 1 (articles 1–5, sections 800–804 and Appendices A and B) and new chapter 1 (section 800 and Appendix) filed 4–8–81; effective thirtieth day thereafter. Approved by Fair Political Practices Commission 12–1–80 (Register 81, No. 15).
3. Change without regulatory effect renumbering section 800 to section 890 filed 8–9–93; operative 8–9–93 (Register 93, No. 33).
4. Amendment filed 12–7–93; operative 1–6–93. Submitted to OAL for printing only. Approved by Fair Political Practices Commission 9–21–93 (Register 93, No. 50).
5. Amendment of section and Appendix, including the incorporation of the conflict of interest code for the State Fire Marshal (former title 19, sections 2200–2208) into the conflict of interest code for the Department of Forestry and Fire Protection, filed 2–7–2001; operative 3–9–2001. Approved by Fair Political Practices Commission 12–1–2000 (Register 2001, No. 6).
6. Amendment of Appendix filed 1–17–2008; operative 2–16–2008. Approved by Fair Political Practices Commission 12–20–2007 (Register 2008, No. 3).

Chapter 1.5. Timber Harvesting Plans

Article 1. General

NOTE: Authority cited: section 11152, Government code. Reference: sections 4511–4517; 4551; 4581–4592, Public Resources Code.

HISTORY

1. New Chapter 1.5 (Sections 891.1–897.1, not consecutive) filed 3–4–75 as an emergency; designated effective 3–5–75 (Register 75, No. 10).
2. Repealer of Chapter 1.5 (Sections 891.1–897.1, not consecutive and Appendix A) and new Chapter 1.5 (Sections 890–898) filed 7–2–75 as an emergency; effective upon filing. Certificate of Compliance included (Register 75, No. 27).
3. Repealer of Chapter 1.5 (Sections 890–898, not consecutive) filed 8–25–75 as an emergency; designated effective 9–1–75 (Register 75, No. 35).
4. Certificate of Compliance filed 10–9–75 (Register 75, No. 41).
5. Reprinting of NOTE and History inadvertently omitted during printing process (Register 80, No. 24).
6. Editorial correction (Register 80, No. 31).

Chapter 3.5. General Forest Policies for California

NOTE: Authority cited: Section 740, Public Resources Code. Reference: Sections 740 and 742, Public Resources Code.

HISTORY

1. New Chapter 3.5 (Article 1, Section 846) filed 6–17–80; effective thirtieth day thereafter (Register 80, No. 25).
2. Repealer of Chapter 3.5 (Section 846) filed 6–16–83; effective thirtieth day thereafter (Register 83, No. 25).

Chapter 4. Forest Practices*

*Formerly Subchapters 1, 2, 3, and 4.1 of Chapter 2, Division 2, Title 14, Cal. Adm. Code.

CROSS REFERENCE TABLE NO. 1

Substantial reorganization of Chapter 4 occurred in Register 78, No. 20. The effective date of the revisions is July 6, 1978. For details concerning the information contained in certain sections prior to reorganization, refer to the following table.

When reference is made to a section of the Public Resources Code, the definition formerly contained within the text of regulations has been removed and can no longer be found in Division 1.5, Title 14, California Administrative Code. All sections not listed retain the numbers effective prior to July 6, 1978.

Subchapter 1. Abbreviations and Definitions*

*Regulations adopted by Board of Forestry.

Article 1. Abbreviations and Definitions

§ 895. Abbreviations Applicable Throughout Chapter.

The following abbreviations are applicable throughout this chapter:

B & M	Baseline and Meridian reference lines running in true EW and NS directions used in U.S. General Land Survey
CAA	Confidential Archaeological Addendum
CAL	Confidential Archaeological Letter
CAL FIRE	California Department of Forestry and Fire Protection
CCR	California Code of Regulations
CDF	California Department of Forestry and Fire Protection
CEQA	California Environmental Quality Act (Public Resources Code Section 21000 et seq.)
cm	Centimeter(s)
d.b.h.	The average diameter of a tree measured outside bark, at breast height, a point 4.5 feet (1.37m) above the average ground level
def.	Definition
DFG	California Department of Fish and Game
E	true cardinal direction East
EIR	Environmental Impact Report as defined in Public Resources Code Section 21061
F&GC	Fish and Game Code
FPA	Z'berg–Nejedly Forest Practice Act of 1973 and amendments thereto (Public Resources Code Section 4511 et seq.)
ft.	foot or feet
Gov. C.	Government Code
H	Humboldt (used in combination with B & M)
ha.	hectare(s)
HCP	Habitat Conservation Plan
in.	inch or inches
LTO	Licensed Timber Operator
m	Meter or metres
MD	Mount Diablo (used in combination with B & M)
MTHP	Modified Timber Harvest Plan
N	true cardinal direction North
NAHC	Native American Heritage Commission
NMFS	National Marine Fisheries Service
NTMP	means Nonindustrial Timber Management Plan
PRC	Public Resources Code
PTEIR	means Program Timberland Environmental Impact Report.
PTHP	means Program Timber Harvesting Plan
R	Range: *a row of townships, six miles in width, between* two successive meridian lines of the U.S. General Land Survey
ref.	Refer, reference
RMP	Road Management Plan
RPF	Registered Professional Forester
RWQCB	Regional Water Quality Control Board
S	true cardinal direction South
SB	San Bernardino (used in combination with B & M)
Sec.	Section
T	Township: *a tier of ranges, six miles in length between* two successive standard parallels as used in the U.S. General Land Survey
THP	Timber Harvesting Plan
TPZ	Timberland preserve zone (Ref. Government Code Section 51100(g).)
TRPA	Tahoe Regional Planning Agency
USGS	United States Geological Survey
W	true cardinal direction West.
WHR	California Wildlife Habitat Relationships System
WLPZ	Watercourse and Lake Protection Zone

NOTE: Authority cited: Sections 4551, 4551.5 and 21082, Public Resources Code. Reference: Sections 4511, 4512, 4513, 4521.3, 4522, 4522.5, 4523–4525, 4525.3, 4525.5, 4525.7, 4526, 4526.5, 4527, 4527.5, 4528, 4551, 4551.5, 4552, 4582 and 21080.5, Public Resources Code.

HISTORY

1. New subchapter 1 (sections 895 and 895.1) filed 1–20–78 as an emergency; effective upon filing. Certificate of Compliance included (Register 78, No. 3).
2. Redesignation from chapter 2 (sections 895–1112, not consecutive) to chapter 4 (sections 895–1112, not consecutive) filed 5–19–78 as procedural and organizational; designated effective 7–6–78 (Register 78, No. 20).
3. Amendment of NOTE filed 2–21–79 as procedural and organizational; effective upon filing (Register 79, No. 9).
4. Change without regulatory effect filed 5–24–89 (Register 89, No. 23).
5. New provision on "WLPZ" filed 2–11–91; operative 3–13–91 (Register 91, No. 14).
6. Amendment of section adding "NTMP" filed 7–11–91; operative 8–12–91 (Register 91, No. 44).
7. Amendment adding definitions of "LTO," "MTHP" and NAHC" filed 11–26–96; operative 1–1–97 pursuant to Public Resources Code section 4554.5 (Register 96, No. 48).
8. Amendment adding definitions of "PTEIR" and "PTHP" and amendment of NOTE filed 11–26–96; operative 1–1–97 pursuant to Public Resources Code section 4554.5 (Register 96, No. 48).
9. Amendment adding definitions "CAA," "CAL," and "USGS" filed 11–26–97; operative 1–1–98 pursuant to Public Resources Code section 4554.5 (Register 97, No. 48).
10. Amendment adding definition of "RWQCB" filed 2–17–2000; operative 7–1–2000 pursuant to Public Resources Code section 4554.5 (Register 2000, No. 7).
11. Editorial correction of HISTORY 10 (Register 2000, No. 22).
12. Amendment adding definitions of "CDF," "DFG," "HCP" and "NMFS" filed 5–31–2000; operative 7–1–2000 (Register 2000, No. 22).
13. New abbreviation for "Interim Watershed Mitigation Addendum" filed 7–15–2002; operative 1–1–2003 pursuant to Public Resources Code section 4554.5 (Register 2002, No. 29).
14. Change without regulatory effect repealing abbreviation for "Interim Watershed Mitigation Addendum" filed 11–18–2003 pursuant to section 100, title 1, California Code of Regulations (Register 2003, No. 47).
15. New abbreviation for "California Wildlife Habitat Relationships System" filed 12–1–2003; operative 1–1–2004 pursuant to Public Resources Code section 4551.5 (Register 2003, No. 49).
16. New abbreviation for "Tahoe Regional Planning Agency" filed 6–21–2005 as an emergency; operative 6–21–2005 (Register 2005, No. 25). A Certificate of Compliance must be transmitted to OAL by 10–19–2005 or emergency language will be repealed by operation of law on the following day.
17. New abbreviation for "Tahoe Regional Planning Agency" refiled 10–13–2005 as an emergency; operative 10–13–2005 (Register 2005, No. 41). A Certificate of Compliance must be transmitted to OAL by 2–10–2006 or emergency language will be repealed by operation of law on the following day.
18. New abbreviation for "Tahoe Regional Planning Agency" refiled 2–10–2006 as an emergency; operative 2–10–2006 (Register 2006, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–12–2006 or emergency language will be repealed by operation of law on the following day.
19. Reinstatement of section as it existed prior to 2–10–2006 emergency amendment by operation of Government Code section 11346.1(f) (Register 2006, No. 24).
20. New abbreviation for "Tahoe Regional Planning Agency" refiled 6–16–2006 as an emergency; operative 6–16–2006 (Register 2006, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–16–2006 or emergency language will be repealed by operation of law on the following day.
21. Certificate of Compliance as to 6–16–2006 order transmitted to OAL 9–7–2006 and filed 10–11–2006 (Register 2006, No. 41).
22. New abbreviation for "California Department of Forestry and Fire Protection" filed 7–9–2007 as an emergency; operative 7–9–2007 (Register 2007, No. 28). A Certificate of Compliance must be transmitted to OAL by 1–7–2008 or emergency language will be repealed by operation of law on the following day.
23. New abbreviation for "Road Management Plan" filed 11–29–2007; operative 1–1–2008 pursuant to Public Resources Code section 4554.5(a) (Register 2007, No. 48).

§ 895.1. Definitions.

The definitions contained in the Z'berg–Nejedly Forest Practice Act of 1973 as amended (commencing with section 4511 of the Public Resources Code) shall apply to this chapter, as well as the following definitions, unless the context clearly requires otherwise.

Defined word or phrase	*PRC Sec. Containing Ref. Def.*
"Abandonment" means leaving a logging road reasonably impassable to standard production four wheel drive highway vehicles, and leaving a logging road and landings, in a condition which provides for long–term functioning of erosion controls with little or no continuing maintenance.	
"Act" means the Z'berg–Nejedly Forest Practice Act of 1973 as currently amended. *(Commencing with section 4511 of the Public Resources Code.)*	4511
"Active nest" means a bird nest site at which breeding efforts have recently occurred as determined by the Department of Fish and Game, as specified below:	
For the Great blue heron, Great egret, recently means within the last two years.	
For the Golden eagle, Osprey, Goshawk, recently means within the last three years.	
For the Bald eagle and Peregrine falcon, recently means within the last five years.	
Nests that have not been used within this time period are considered abandoned.	
"Adequate Site Occupancy" means the range of stocking levels which provide a balance between the largest number of trees per acre capable of maximum individual tree growth on future crop trees and maximum overall stand growth. This balance is achieved when stocking levels are within Zones 2 and 3 of the Langsaeter curve, as shown in "The Practice of Silviculture", by David Smith (1962).	
"Alternative prescription" means a written analysis of preharvest and postharvest timber stand conditions and a description of the silvicultural practices and systems to be used in lieu of the standard methods.	
"Approved and legally permitted structure" means, for the purposes of 14 CCR 1038(d), only structures that are designed for human occupancy and garages, barns, stables, and structures used to enclose fuel tanks.	
"Archaeological Coverage Map" means the map or maps required as part of a Confidential Archaeological Addendum or a Confidential Archaeological Letter pursuant to 14 CCR §§ 929.1 [949.1, 969.1](c)(9) and 1052(a)(10). The map(s) shall contain a north arrow, a scale, and accurately display the project boundary, the site survey area showing survey intensity(ies), and specific location of all archaeological and historical sites identified within the site survey area. The map(s) must be on a 1:1 scale copy of a USGS 7.5′ quadrangle(s), or digitally generated topographical equivalent. Additional maps at other scales may be required to more accurately display required information or increase clarity.	
Average Severe Fire Weather Conditions [*Effective until 1–1–2006.*]: Atmospheric and fuel conditions where fuel moisture content (dry weight basis) of 1–hour timelag fuels is three percent, 10–hour fuels is four percent and 100–hour fuels is five percent, and live surface fuels is 70 percent. Mid–flame wind speed is seven miles per hour or greater, when measured in a closed forest canopy (40 percent canopy cover or greater).	
"Average slope" means the arithmetic average of a sample of slopes taken systematically over the area to which the average is to be applied.	
"Bankfull stage" means the stage that occurs when discharge fills the entire channel cross section without significant inundation of the adjacent floodplain, and has a recurrence interval of 1.5 to 2.0 years.	
"Basal area per acre"	4528(a)
"Beneficial Functions of Riparian Zone" means the specific role of the riparian zone to provide protection for water temperature control, streambed and flow modification by large woody debris, filtration of organic and inorganic material, upslope stability, bank and channel stabilization and vegetative structure diversity for fish and wildlife habitat.	
"Beneficial Use" means those uses of water as defined by section 13050(f) of the Water Code and as described in the applicable Water Quality Control Plan.	
"Berm" means a curb or dike constructed to control water and prevent roadway runoff waters from discharging onto roadside slopes and/or to provide material for subsequent road maintenance.	
"Board"	4521.3
"Broadcast burning" means the use of fire throughout a site preparation area to prepare it for regeneration. It does not include burning of organic matter which is piled during mechanical site preparation or for hazard reduction.	
"Brood Material" as used in these rules refers to any cut or downed portion of a tree's stem greater than three inches with intact undeteriorated bark.	
"Buffer zone" means the area of protection surrounding a nest tree in which timber operation must be conducted in accordance with the provisions set forth in these regulations. A buffer zone does not constitute a special treatment area.	
"Cable roads" means the path followed by logs being yarded by a cable system.	
"Cable yarding" means that system of skidding (transporting) logs by means of cable (wire rope) to the yarding machine (yarder) or a landing while the yarder remains stationary.	
"Canopy" means the more or less continuous layer of branches and foliage formed collectively by the crowns of adjacent trees and other woody species.	
"Channel zone" means that area that includes a watercourse's channel at bankfull stage and a watercourse's floodplain, encompassing the area between the watercourse transition lines.	
For the Coast Forest District:	
"Coastal Commission Special Treatment Area" means an identifiable and geographically bounded forest area designated within the Coastal Zone that constitutes a significant wildlife and/or plant habitat area, area of special scenic significance, and any land where timber operations could adversely affect public recreation areas or the biological productivity of any wetland, estuary, or stream especially valuable because of its role in a coastal ecosystem.[1] *(Reference: Section 31118.5, Public Resources Code.)*	
For the Southern Forest District:	
"Coastal Commission Special Treatment Area" means an identifiable and geographically bounded forest area designated within the Coastal Zone that constitutes a significant wildlife and/or plant habitat area, area of special scenic significance, and any land where timber operations could adversely affect public recreation areas or the biological productivity of any wetland, estuary, or stream especially valuable because of its role in the coastal ecosystem. Special treatment areas were adopted by the Coastal Commission on July 5, 1977. Maps or designations of "Coastal Commission Special Treatment Areas" are on file in the Department offices within the Southern Forest District.[2] *(Reference: Section 31118.5, Public Resources Code.)*	
"Codominants" means trees with crowns forming the general level of the forest canopy and receiving full light from above, but comparatively little light from the sides. Codominants usually have medium–sized crowns, but are crowded on the sides.	
For the Coast Forest District:	
"Commercial Species" means those species found in group A and those in group B that are found on lands where the species in Group A are now growing naturally or have grown naturally in the recorded past.	
Group A —coast redwood (*Sequoia sempervirens*)	
—Douglas fir (*Pseudotsuga menziesii*)	
—grand fir (*Abies grandis*)	
—western hemlock (*Tsuga heterophylla*)	
—western redcedar (*Thuja plicata*)	
—bishop pine (*Pinus muricata*)	
—Monterey pine (*Pinus radiata*)	
—Sitka spruce (*Picea sitchensis*)	
—incense cedar (*Libocedrus decurrens*)	
—Port Orford cedar (*Chamaecyparis lawsoniana*)	
—California red fir (*Abies magnifica*)	
—white fir (*Abies concolor*)	
—Jeffrey pine (*Pinus jeffreyi*)	
—ponderosa pine (*Pinus ponderosa*)	
—sugar pine (*Pinus lambertiana*)	
—western white pine (*Pinus monticola*)	

Defined word or phrase	PRC Sec. Containing Ref. Def.
Group B —tanoak (*Lithocarpus densiflorus*) —red alder (*Alnus rubra*) —white alder (*Alnus rhombilfolia*) —eucalyptus (*Eucalyptus species*) —Pacific madrone (*Arbutus menziesii*) —golden chinkapin (*Castanopsis chrysophylla*) —pepperwood (*Umbellulria californica*) —Oregon white oak (*Quercus Garryana*) —California black oak (*Quercus kelloggii*)	
For the Northern Forest District:	
"Commercial species" means those species found in group A and those in group B that are found on lands where the species in group A are now growing naturally or have grown naturally in the recorded past.	
Group A — sugar pine (*Pinus lambertiana*) — ponderosa pine (*Pinus ponderosa*) — Jeffrey pine (*Pinus jeffreyi*) — western white pine (*Pinus monticola*) — lodgepole pine (*Pinus contorta*) — coast redwood (*Sequoia sempervirens*) — white fir (*Abies concolor*) — California red fir (*Abies magnifica*) — noble fir (*Abies procera*) — Douglas-fir (*Pseudotsuga menziesii*) — incense-cedar (*Libocedrus decurrens*) — Port Orford cedar (*Chamaecyparis lawsoniana*)	
Group B — Knobcone pine (*Pinus attenuata*) — Digger pine (*Pinus sabiniana*) — California black oak (*Quercus kelloggii*) — Oregon white oak (*Quercus garryana*) — tanoak (*Lithocarpus densiflorus*) — mountain hemlock (*Tsuga mertensiana*) — Brewer spruce (*Picea breweriana*) — Englemann spruce (*Picea englemanii*) — Sierra redwood (*Sequoiadendron giganteum*) — golden chinkapin (*Castanopsis chrysophylla*) — foxtail pine (*Pinus balfouriana*) — white alder (*Alnus rhombifolia*) — Monterey pine (*Pinus radiata*) — Pacific madrone (*Arbutus menziesii*) — California laurel (*Umbellularia Californica*) — Western juniper (*Juniperus occidentalis*)	
For the Southern Forest District:	
"Commercial species" means those species found in group A and those in group B that are found on lands where the species in group A are now growing naturally or have grown naturally in the recorded past.	
Group A —Coulter pine (*Pinus coulteri*) —Jeffrey pine (*Pinus jeffreyi*) —ponderosa pine (*Pinus ponderosa*) —sugar pine (*Pinus lambertiana*) —lodgepole pine (*Pinus contorta*) —Monterey pine (*Pinus radiata*) —western white pine (*Pinus monticola*) —Douglas-fir (*Pseudotsuga menziesii*) —California red fir (*Abies magnifica*) —white fir (*Abies concolor*) —incense cedar (*Libocedrus decurrens*) —coast redwood (*Sequoia sempervirens*) —Sierra redwood (*Sequoiadendron giganteum*) —mountain hemlock (*Tsuga mertensiana*)	
Group B —white alder (*Alnus rhombifolia*) —cottonwood (*Populus fremontii*) —eucalyptus (*Eucalyptus sp.*) —Pacific madrone (*Arbutus menziesii*) —California black oak (*Quercus kelloggii*) —tanoak (*Lithocarpus densiflorus*)	
"Committee"	4522
"Community Fuelbreak Area" means a shaded fuelbreak approved by a public fire agency as part of a fire prevention plan for fire protection, ignition management, prefire management or other fire defense improvements. Within a shaded fuelbreak, vegetation is managed to reduce the potential for wildfire damage and provides a direct benefit to defensible space as defined in 14 CCR 1271. Community fuelbreak areas include defensible space areas within 200 feet of approved and legally permitted structures, as defined in 14 CCR 895.1, and those areas comprising systems of fuelbreaks that are designed or approved by a public fire agency as part of a fire prevention plan.	
"Compatible use" means uses which do not significantly detract from the use of the property for, or inhibit, growing and harvesting timber, and shall include those specified in Government Code 51104(h) unless in specific instances such use would be contrary to this definition.	
"Concentration" means an accumulation of slash, limbs, tops, slabs or other logging debris that exceeds 30 inches (76.2 cm) in height above the ground and covers more than 100 square feet (9.29 m^2) of surface area except that individual logs not associated with other logging debris which exceed these dimensions shall not be considered a concentration of slash or logging debris.	
"Confidential Archaeological Addendum" means the archaeological and historical resources survey and impact assessment report prepared for a proposed timber operation. The addendum is confidential to the extent permitted pursuant to Government Code §§ 6254(r) and 6254.10. It shall not be included in any document provided to the public. It shall contain all information required by 14 CCR §§ 929.1, 929.2, 929.3, 929.7, 949.1, 949.2, 949.3, 949.7, 969.1, 969.2, 969.3, 969.7.	
"Confidential Archaeological Letter" means the archaeological and historical resources survey and impact assessment prepared for an Emergency Notice covering three acres or more in size. It is included with the submittal of the Emergency Notice to the Director and contains all information required by 14 CCR § 929.1 [949.1, 969.1](c)(2), (7), (8), (9), (10) and (11), including site records, as required pursuant to 14 CCR §§ 929.1 [949.1, 969.1](g) and 929.5 [949.5, 969.5]. The information may be presented in either a letter or report format. It is confidential to the extent permitted pursuant to Government Code §§ 6254(r) and 6254.10 and shall not be included in any document provided to the public.	
"Countable tree"	4528(b)
"Critical period" means the time of year when the special timber operations practices set forth in these regulations are required to minimize nesting disturbance to a species of special concern.	
"Crop of trees," within the meaning of PRC 4526, means any number of trees which can be harvested commercially.	
"Cumulative impacts" means those impacts as defined in 14 CCR 15355.	
"Current archaeological records check" means a review of the State's archaeological and historical resource files conducted at the appropriate Information Center of the California Historical Resource Information System for the area which could be affected by timber operations. The Office of Historical Preservation, which is within the Department of Parks and Recreation, has the address for the regional Information Center a person must contact. The records check must have been conducted within five years prior to the date a THP, NTMP, or Emergency Notice of 3 acres or more is submitted to the Director.	
"Cutover land"	4522.5
"Cutting method" means silvicultural method within the Southern Subdistrict of the Coast Forest District.	
"Damaging effects" means demolition, destruction, relocation, or significant alteration of an archaeological or historical site or resource before the significance of the site is determined.	
"Danger tree" means any tree located on or adjacent to a utility right-of- way or facility that could damage utility facilities should it fall where (1) the tree leans toward the right-of-way, or (2) the tree is defective because of any cause, such as: heart or root rot, shallow roots, excavation, bad crotch, dead or with dead top, deformity, cracks or splits, or any other reason that could result in the tree or main lateral of the tree falling. See chapter VII, Hazardous Tree Identification, Powerline Fire Prevention Field Guide-1977, A joint Publication of the California Department of Forestry, U.S. Forest Service, and U.S. Bureau of Land Management.	
"Decadent and Deformed Trees of Value to Wildlife": Trees, either conifers or hardwoods, that are not countable per PRC § 4528 but which exhibit characteristics of substantial value to wildlife including but not limited to such features as broken tops, dead tops, forked tops, nests, mistletoe clumps, substantial decay and cavities.	
"Department" means the Department of Forestry.	
"Diameter" when measuring standing live trees, means the average diameter of a tree measured outside the bark, at breast eight, a point 4.5 feet (1.37m) above the average ground level.	

Defined word or phrase	*PRC Sec. Containing Ref. Def.*
"Director" means the Director of Forestry.	
"District"	4523
"Ditch drain" means a drainage structure or facility which will move water from an inside road ditch to an outside area.	
"Domestic water use" means the use of water in homes, resorts, motels, organization camps, developed campgrounds, including the incidental watering of domestic stock for family sustenance or enjoyment and the irrigation of not more than one half acre in lawn, ornamental shrubbery, or gardens at any single establishment. The use of water at a developed campground or resort for human consumption, cooking or sanitary purposes is a domestic use.	
"Dominants" means trees with well–developed crowns extending above the general level of the forest canopy and receiving full light from above and partly from the sides.	
"Drainage facilities" means facilities constructed to control water, including, but not limited to, fords, inside ditches, waterbreaks, outsloping and rolling dips.	
"Drainage structure" means a structure installed to control, divert or to cross over water, including, but not limited to, culverts, bridges and ditch drains.	
"Dunning's classification" although initially devised exclusively for pine, here is intended to apply to all commercial coniferous species and means a system of tree classification based on maturity of trees, age, position of tree crown in stand, shape of top, diameter, density of foliage and risk or susceptibility of tree to insect and other mortality where trees are classed as follows:	
Class 1. Tree immature, 60 to 150 years of age, crown dominant or extending above general level of the crown cover, top pointed, d.b.h. up to 30 inches (76.2 cm), foliage dense and risk good.	
Class 2. Tree immature, 60 to 150 years of age, crown codominant or equal to general level of the crown cover, top pointed, d.b.h. up to 24 inches (61.0 cm), foliage dense and risk good.	
Class 3. Tree mature, 150 to 300 years of age, crown dominant or extending above general level of the crown cover, top rounded, d.b.h. 18 inches (45.7 cm) to 40 inches (101.6 cm), foliage moderately dense and risk fair to good.	
Class 4. Tree mature, 150 to 300 years of age, crown codominant or equal to general level of the crown cover, top rounded and risk poor to fair.	
Class 5. Tree overmature, over 300 years of age, crown dominant or extending above the general level of the crown cover, top flat, foliage thin, and risk poor.	
Class 6. Tree immature, 60 to 150 years of age, crown intermediate to or suppressed by the general level of the crown cover, top pointed, d.b.h. 12 inches (30.5 cm) to 15 inches (38.1 cm), foliage moderately dense and risk fair to good.	
Class 7. Tree mature or overmature, over 150 years of age, crown intermediate or suppressed by the general level of the crown cover, top flat, d.b.h. rarely over 18 inches (45.7 cm), foliage sparse and risk poor. (*Reference: Section 4531, Public Resources Code.*)	
"Dying Trees" means trees which exhibit one or more of the following: fifty percent or more of the foliage–bearing crown is dead or fading in color from a normal green to yellow, sorrel, or brown, excluding normal autumn coloration changes; successful bark beetle attacks with indications of dead cambium and brood development distributed around the circumference of the bole; seventy–five percent or more of the circumference of the lower bole is girdled by wildlife; or trees designated by an RPF as likely to die within one year.	
"Effects" means effects and impacts as defined in 14 CCR 15358.	
"Emergency" means 1) those conditions that will cause waste or loss of timber resources to the timber owner that may be minimized by immediate harvesting of infected, infested or damaged timber or salvaging down timber; 2) those conditions that obstruct or reduce effective emergency response operations; or 3) those conditions that will cause appreciable financial loss to the timber owner that may be minimized by immediate harvesting of timber.	
"End–Hauling" means the removal and transportation of excavated material to prevent sidecast.	
"Energy dissipator" means a device or material used to reduce the energy of flowing water.	
"Equipment exclusion zone (EEZ)" means the area, as explained in the THP, where heavy equipment associated with timber operations is totally excluded for the protection of water quality, the beneficial uses of water, and/or other forest resources.	
"Equipment limitation" is the term used when the use of timber harvesting equipment is to be limited for the protection of water quality, the beneficial uses of water, and/or other forest resources.	
"Equipment limitation zone (ELZ)" means the area, as explained in the THP, where heavy equipment associated with timber operations is limited for the protection of water quality, the beneficial uses of water, and/or other forest resources.	
"Erosion controls" means drainage facilities, soil stabilization treatments, road and landing abandonment, removal and treatment of watercourse crossings, and any other features or actions to reduce surface erosion, gullying, channel erosion, and mass erosion.	
For the Coast Forest District	
"Erosion Hazard Rating" means the rating derived from the procedure specified in 14 CCR 912.5 designed to evaluate the susceptibility of the soil within a given location to erosion.	
For the Southern Forest District:	
"Erosion Hazard Rating" Means the rating derived from the procedure specified in 14 CCR 952.5 designed to evaluate the susceptibility of the soil within a given location to erosion. (*Reference: Section 4562, Public Resources Code.*)	
"Erosion potential" see 14 CCR 952.5. (*Reference: Section 4562, Public Resources Code.*)	
"Estimated erosion potential" means the product of the soil and slope values derived from the table in 14 CCR 932.5 or as such product may be modified in accordance with the instructions contained in that section. *(Reference: Section 4562, Public Resources Code.)*	
"Excess material" means material that is not used or needed as a functional part of the road or a landing.	
"Executive Officer" means the Executive Officer of the State Board of Forestry authorized by PRC 739.	
"Extended dry periods" means those periods during the winter period when saturated soil conditions do not exist.	
"Feasible" means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, legal, social and technical factors. With regard to economic feasibility, the issue shall be whether the plan as revised could be conducted on a commercial basis within 3 years of the submission of the plan and not solely on the basis of whether extra cost is required to carry out the alternatives.	
"Fifty–year flood flow" means that magnitude of peak flow which one would expect to be equaled or exceeded, on the average, once ever 50 years. This flow shall be estimated by empirical relationships between precipitation and watershed characteristics and runoff and then may be modified by direct channel cross section measurements and local experience.	
"Fill" means material that is placed in low areas and built up to form the roadbed or landing surface.	
Fort the Coast Forest District:	
"Fire Protection Zone" means that portion of the logging area within 100 feet (30.48 m) as measured along the surface of the ground, from the edge of the traveled surface of all public roads and railroads; and within 200 feet (60.96 m) as measured along the surface of the ground, from permanently located structures currently maintained for human habitation.	
For the Northern Forest District:	
"Fire protection zone" means that portion of the logging area within 100 feet (30.48 m), as measured along the surface of the ground, from the edge of the traveled surface of all public roads and railroads, and 50 feet (15.24 m) as measured along the surface of the ground from the traveled surface of all private roads, and within 100 feet (30.48 m), as measured along the surface of the ground, from permanently located structures currently maintained for human habitation. *(Reference: Section 4561.6, Public Resources Code.)*	

Defined word or phrase	PRC Sec. Containing Ref. Def.
For the Southern Forest District:	
"Fire Protection Zone" means that portion of the logging area within 100 feet (30.48 m), as measured along the surface of the ground, from the edge of the traveled surface of all public roads and railroads; and within 200 feet (60.96 m), as measured along the surface of the ground from permanently located structures currently maintained for human habitation.	
"Fuelbreak"	4528(e)
"Functional Nesting Habitat" means habitat with a dominant and codominant tree canopy closure of at least 40% and a total canopy (including dominant, codominant, and intermediates) of at least 60%. Usually the stand is distinctly multi-layered with an average stem diameter in dominant, codominant conifers, and hardwoods > 11″ D.B.H. The stand usually consists of multi-specied trees (including hardwoods) of mixed sizes. All nests, snags, down logs, and decadent trees shall also be considered as part of the habitat. Nesting substrates are provided by broken tops, cavities, or platforms such as those created by a hawk or squirrel nest, mistletoe broom, or accumulated debris. Owls are known to occasionally nest in less than optimal habitat. Nesting areas may also be associated with topographical relief and aspect which alter microclimates.	
"Functional Roosting Habitat" during the territorial season consists of stands where average stem diameter is > 11″ D.B.H. among dominant and codominant trees. Hardwood and conifers provide an average of at least 40% canopy closure but the stand can have a high degree of variability. Stand size and configuration must be sufficient to provide multiple perch sites which are suitable for protection from various environmental conditions including wind, heat, and precipitation.	
"Functional Foraging Habitat" is dependent on the presence and availability of prey on the forest floors or in the canopy; presence of accessible perching limbs; and adjacency to stands with canopy closures > 40%. Average stem diameter is usually 6″ D.B.H. for hardwoods and > 11″ D.B.H. for conifers among dominant, codominant, and the total overhead canopy closure, including intermediate trees, is at least 40%. Where overall canopy closure is > 80%, forage habitat is limited to areas with ample flight space below limbs and among stems. Habitat between 40 and 25% must be verified by local information.	
"Functional Wildlife Habitat" means vegetative structure and composition which function to provide essential characteristics for wildlife feeding, reproduction, cover and movement between habitats. The habitat components must be in sufficient quantities and arrangement to support the diverse assemblage of wildlife species that are normally found on or use forestlands within that area. Within this definition the following terms mean: Function(al): Refers to ecological relationships between both the habitat components and needs of the species which allows for all of the normal life cycle including, migration corridors, genetic pathways, food availability, temperature protection, moisture retention, nutrient cycling, denning, spawning, nesting, and other functions necessary to complete a life cycle. Composition: Refers to the types, abundance, distribution, and ecological relationships of species of terrestrial and aquatic vegetation within the forest stand including, dominance, richness, trophic levels and other population and community features at levels which affect the long-term survival of individual forest species. Structure: Refers to the physical arrangement of and relationships between living and non-living terrestrial and aquatic components within the forest stand including, age, size, height and spacing of live vegetation in the forest in addition to seeps, spawning gravels, pools, springs, snags, logs, den trees, meadows, canopy coverage, levels of canopies and other physical features necessary to allow species to function.	
"Good cause is shown" as used in PRC 4590 means when: the plan submitter presents facts which describe the factors beyond the control of the plan submitter and his or her agents, such as market conditions, weather, technical difficulties or natural disaster, that have prevented feasible completion of the timber operation within the effective period of the plan.	
"Hard frozen conditions" means those frozen soil conditions where loaded or unloaded vehicles can travel without sinking into the road surfaces to a depth of more than six inches over a distance of more than 25 feet.	
"Harm" means an act where it actually kills or injures a federally listed wildlife species. Such acts may include a significant habitat modification or degradation which actually kills or injures wildlife by significantly impairing essential behavior patterns, including breeding, feeding or sheltering.	
"Harass" means an intentional or negligent act or omission which creates the likelihood of injury to a federally listed wildlife species by annoying it to such an extent as to significantly disrupt normal behavioral patterns which include, but are not limited to, breeding, feeding or sheltering.	
"Harvesting method" means the process used to cut and remove timber. It may have as its silvicultural objective either stand regeneration or intermediate treatments.	
"Historic Road" means an existing road, including associated landings and watercourse crossings, that is not part of the permanent road network and that has not been maintained or proactively abandoned.	
"Inner Gorge" means a geomorphic feature formed by coalescing scars originating from landsliding and erosional processes caused by active stream erosion. The feature is identified as that area beginning immediately adjacent to the stream channel below the first break in slope.	
"Intermediate treatments" means harvests conducted to modify or guide the development of an existing stand of trees, but not to replace (regenerate) the stand with a new one. The treatments involve the removal of trees to allow expansion of the crowns and root systems.	
"Intermediates" means trees with crowns below the general level of the forest canopy and receiving little light from either above or the sides. Intermediates have minimally-developed crowns and are crowded on the sides.	
"Ladder Fuels" means vegetative fuels that can spread a fire vertically between or within a fuel type.	
"Lake" is a permanent natural body of water of any size, or an artificially impounded body of water having a surface area of at least one acre, isolated from the sea, and having an area of open water of sufficient depth and permanency to prevent complete coverage by rooted aquatic plants.	
"Lake Tahoe Region" means those portions of Placer and El Dorado Counties lying within the authority of the Tahoe Regional Planning Agency.	
"Landing" means that area where forest products are concentrated prior to loading for transportation to market.	
"Late succession forest stands" means stands of dominant and predominant trees that meet the criteria of WHR class 5M, 5D, or 6 with an open, moderate or dense canopy closure classification, often with multiple canopy layers, and are at least 20 acres in size. Functional characteristics of late succession forests include large decadent trees, snags, and large down logs.	
"Layout" means a prepared bed into which a tree is felled. A layout is generally constructed by tractor and is intended to reduce the breakage that occurs during the felling of trees.	
"License"	4524
"Listed Species" means a plant or animal species which is listed as rare, threatened or endangered under federal or state law, or a sensitive species by the Board.	
"Live and healthy" as used in PRC 4528(b)(2) means a tree that is a potential crop tree.	
"Log culvert" means a drainage structure consisting of logs or logs and fill material placed in a drainage in such a manner as to allow for the passage of water. Also commonly referred to as a "Humboldt crossing."	
"Logging area" means that area on which timber operations are being conducted as shown on the map accompanying the Timber Harvesting Plan, and within 100 feet as measured on the surface of the ground, from the edge of the traveled surface of appurtenant roads owned or controlled by the timberland owner, timber operator or timber owner, and being used during the harvesting of the particular area. The traveled surface of such appurtenant roads is also part of the logging area.	
"Logging road" means a road other than a public road used by trucks going to and from landings to transport logs and other forest products.	
"Logging Road Surface Drainage Network" means the system of drainage facilities and structures associated with logging roads, which are used to control, divert, or cross over water.	

Defined word or phrase	*PRC Sec. Containing Ref. Def.*
"Long–term significant adverse effect on fish, wildlife, or listed species known to be primarily associated with late succession forest stands" means an effect that creates an identifiable trend or set of conditions which provide a substantial level of scientific evidence that a population of one or more species of fish, wildlife, or listed species primarily associated with late succession forest stands will become extirpated from a significant portion of its current range in the Forest District within the planning horizon.	
"Long Term Sustained Yield" means the average annual growth sustainable by the inventory predicted at the end of a 100 year planning period.	
For the Coast Forest District:	
"Lopping" means severing and spreading of slash so that no part of it remains more than 30 inches (76.2 cm) above the ground.	
For the Northern Forest District:	
"Lopping" means severing and spreading of slash so that no part of it remains more than 30 inches (76.2 cm) above the ground. *(Reference: Section 4551.5, Public Resources Code.)*	
For the Southern Forest District:	
"Lopping" means severing limbs from the exposed sides of the unutilized portions of trees so that portions of the severed limbs are in contact with the ground. *(Reference: Section 4551.5, Public Resources Code.)*	
"Lopping For Fire Hazard Reduction" means severing and spreading slash so that no part of it generally remains more than 30 inches above the ground except where a specific rule provides another standard.	
"Mainline road" [*Effective until 1–1–2006.*]: Roads on non federal lands that are used as the primary route for the transportation of forest products that are fed by arterial (secondary) haul roads.	
"Mainline road" [*Effective 1–1–2006.*] means roads on non federal lands that are used as the primary route for the transportation of forest products that are fed by arterial (secondary) haul roads.	
"Manmade watercourse" means a watercourse which is constructed and maintained to facilitate man's use of water and includes, but is not limited to ditches and canals used for domestic, hydropower, irrigation, and other beneficial uses (manmade watercourses as defined do not include roadside drainage ditches).	
"Marking" means a painted horizontal band or other distinguishing designation which is visible from two sides of a tree, and a stump designation, if required in the THP, which is visible after felling operations.	
For the Northern Forest District:	
"Meadows and wet areas" means those areas which are moist on the surface throughout most of the year and/or support aquatic vegetation, grasses and forbs as their principal vegetative cover. *(Reference: Section 4562.7, Public Resources Code.)*	
For the Southern Forest District:	
"Meadows and Wet Areas" means those areas which are moist on the surface throughout most of the year and/or support aquatic vegetation, grasses and forbs as their principal vegetative cover.	
"Mechanical site preparation" means all site preparation activities undertaken by motorized heavy equipment to prepare an area for regeneration.	
"Minor deviations" means any change, minor in scope, in a plan which can reasonably be presumed not to make a significant change in the conduct of timber operations and which can reasonably be expected not to significantly adversely affect timberland productivity or values relating to soil, water quality, watershed, wildlife, fisheries, range and forage, recreation, and aesthetic enjoyment.	
"Native Americans" means the Native American Heritage Commission and those local Native American tribal groups and individuals to be notified or consulted pursuant to the Forest Practice Rules as defined in the Native American Contact List.	
"Native American Contact List" means the list that identifies those Native Americans that must be notified or consulted pursuant to the Forest Practice Rules. The Department shall maintain this list utilizing information and advice provided by the Native American Heritage Commission (NAHC). The list shall identify the appropriate contacts to be notified or consulted during preparation or review of Timber Harvesting Plans. The list shall be organized by counties or portions of counties and shall include all local federally recognized tribal governments. It shall also include other California Native American organizations or individuals that the Department places on the list based upon demonstrated knowledge concerning the location of archaeological or cultural resources within California. The NAHC shall also be included as a required contact for each county on the list to enable the NAHC to complete a check of their Sacred Lands File which is authorized by PRC §§ 5097.94(a) and 5097.95. The list shall be posted on the Department's internet site to make it readily available to RPFs and others needing the list to comply with these rules. The list shall also be available by mail through written request to the Department's Region offices. At least twice annually, the Department shall update the list to provide the most current information. Each update will reflect a new revision date, so users of the list may identify which version of the list they were using.	
"Native American Archaeological or Cultural Site" means any archaeological or other cultural resource that is associated with Native Americans. These sites must be identifiable by a specific physical location containing specific physical attributes. Native American archaeological or cultural sites include but are not limited to: village sites, camp sites, petroglyphs, prehistoric trails, quarries, milling stations, cemeteries, ceremonial sites or traditional cultural sites and properties.	
"Nest site" means the geographic area and surrounding habitat that includes the nest tree(s), perch tree(s), screening tree(s), and replacement tree(s) of a bird species of special concern.	
"Nest tree" means the tree, snag, or other structure that contains the nest of a species of special concern.	
"Occupied nest" means a nest currently being used by one or more adult birds with eggs or young present.	
"Overhanging bank" means a condition in which the upper portion of a cut slope projects (hangs) over the lower portion of a cut slope.	
"Overstory" means that portion of the trees, in a forest of more than one story, forming the upper canopy layers.	
"Owl habitat" means Type A, B, or C owl habitat or those areas with functional foraging habitat, functional nesting habitat, and functional roosting habitat which support the owl's biological needs for breeding, sheltering, and feeding. An area of habitat could have characteristics which support all of the functional needs for nesting, roosting, and foraging or combination of those functions. Because owls are known to occasionally inhabit less than optimal forest structure, local information can be used to justify the modification of functional habitat definitions.	
"Past projects" means previously approved, on–going, or completed projects which may add to or lessen impact(s) created by the THP under consideration. These generally include, but may not be limited to, projects completed within the last ten years.	
"Perch tree" means a tree or snag identified and designated by the RPF or supervised designee in consultation with the Department of Fish and Game as utilized periodically by a species of special concern for nesting, territorial defense, or as an approach to its nest or feeding area.	
"Permanent road" means a road which is planned and constructed to be part of a permanent all–season transportation facility. These roads have a surface which is suitable for hauling of forest products throughout the entire winter period and have drainage structures, if any, at watercourse crossings which will accommodate the fifty–year flood flow. Normally they are maintained during the winter period.	

Defined word or phrase	*PRC Sec. Containing Ref. Def.*
"Permanent Road Network" means the permanent, seasonal, and temporary roads that provide the infrastructure necessary for timber operations and forest management.	
"Permanent watercourse crossing" means a watercourse crossing that will be constructed to accommodate the estimated fifty-year flood flow and will remain in place when timber operations have been completed.	
"Person"	4525
"Plan" means: (a) Timber Harvesting Plan (THP) as described in PRC 4582. (b) Nonindustrial Timber Management Plan (NTMP) as described in PRC 4593.2(e). (c) Program Timber Harvesting Plan (PTHP) as described in 14 CCR 1092 and 1092.1.	4582
"To plan" means examination of feasible alternatives, field review of alternatives, and reflection of this examination and field review in choice of road or landing locations, and other factors, together with associated mitigation measures in the harvest plan.	
"Planning Watershed" means the contiguous land base and associated watershed system that forms a fourth order or other watershed typically 10,000 acres or less in size. Planning watersheds are used in planning forest management and assessing impacts. The Director has prepared and distributed maps identifying planning watersheds plan submitters must use. Where a watershed exceeds 10,000 acres, the Director may approve subdividing it. Plan submitters may propose and use different planning watersheds, with the director's approval. Examples include but are not limited to the following: when 10,000 acres or less is not a logical planning unit, such as on the Eastside Sierra Pine type, as long as the size in excess of 10,000 acres is the smallest that is practical. Third order basins flowing directly into the ocean shall also be considered an appropriate planning watershed.	
"Predominant" trees are those whose crowns are above the general level of the canopy and are significantly older than the surrounding stand.	
"Prescribed maintenance period" means the period, beginning with filing of the work completion report provided the report is approved during which erosion controls which are required and constructed as part of a timber operation must be maintained in a functional condition. The period shall not exceed three years from the filing of the work completion report provided that the report is subsequently approved by the director.	
"Professional Archaeologist" means a person who holds at least a Bachelor of Arts or Science degree in Anthropology or Archaeology from a college or university and has completed at least three years of professional experience in research, writing, or project supervision in archaeological investigation or cultural resource management and protection programs.	
Program Timberland Environmental Impact Report (PTEIR), means a Program Environmental Impact Report in compliance with CEQA for ongoing management of timberlands, including timber operatrions and related land management practices which require permits from public agencies. Subsequent PTHPs shall be tied to a PTEIR.	
Program Timber Harvesting Plan (PTHP), means a Timber Harvesting Plan prepared by an RPF which relies upon a PTEIR for CEQA compliance and meets the standards of PRC Section 4581. PTHPs must be within the scope of the PTEIR, the rules of the board and other applicable state laws.	
"Project" means an activity which has the potential to cause a physical change in the environment, directly or ultimately, and that is 1) undertaken by a public agency, or 2) undertaken with public agency support, or 3) requires the applicant to obtain a lease, permit, license or entitlement from one or more public agencies. This includes Timber Harvesting Plans.	
"Public fire agency" means California Department of Forestry and Fire Protection, United States Forest Service, Bureau of Land Management, and other federal fire protection agencies, counties providing fire protection pursuant to PRC 4129, or city, county, or local fire agencies.	
"Public road" means a road open to the general public which is (a) in the State or County road system, or (b) a road on which a public agency has a deeded, unlimited easement.	
"Quality of water" means the level of water quality as specified by the applicable Water Quality Control Plan, including its water quality objectives, policies and prohibitions.	
"Range of the Northern Spotted Owl" means the following counties: Marin, Napa, Del Norte, Mendocino, Colusa, Shasta (north of Highway 299, west of Interstate 5), Tehema (west of Interstate 5), Sonoma, Humboldt, Lake, Trinity, Siskiyou, Glenn (west of Interstate 5), Modoc (west of Highway 139).	
"Reasonably Foreseeable Probable future projects" means projects with activities that may add to or lessen impact(s) of the proposed THP including but not limited to: (1) if the project is a THP on land which is controlled by the THP submitter, the THP is currently expected to commence within but not limited to, 5 years or, (2) if the project is a THP on land which is not under the control of the THP submitter the THP has been submitted or on-the-ground work including THP preparation has materially commenced, or (3) if the project is not a THP, and a permit is required from a public agency, and the project is under environmental review by the public agency, or (4) if the project is one which is under taken by a public agency, the agency has made a public announcement of the intent to carry out the project.	
"Reconstructed roads" means those existing roads that are to be restored or improved to make them useable for hauling forest products.	
"Reconstructed" does not include routine or annual maintenance or rehabilitation that does not require substantial change in the original prism of the road.	
"Reconstruction of existing tractor roads" means restoring or improving the surface of pre-existing tractor roads or skid trails in a manner that requires substantial cutting or filling of soil or rock.	
"Regeneration method" means the process used to secure replacement of a forest stand. Section 895.1, Table 1, entitled "Relationship of Standard Silvicultural Treatments to Objectives and Stand Conditions" shows the general relationships of regeneration methods and intermediate treatments to even-aged and uneven-aged management.	
"Registered Professional Forester" means a person who holds a valid license as a professional forester pursuant to article 3, chapter 2, division 1 of the Public Resources Code.	
"Replacement Tree" means a tree or snag within the nest site of a species of special concern identified and designated by the RPF or supervised designee in consultation with the Department of Fish and Game as being suitable as a replacement for a nest or perch tree should the existing tree become unusable.	
"Reproduction" means young trees of commercial species that are less than 4 inches (10.2 cm) d.b.h., i.e., seedlings and saplings.	
"Resource conservation standards"	4525.3
"Rigging" means the cable (wire rope), blocks, and hook equipment used in cable yarding systems.	
"Riparian" means the banks and other adjacent terrestrial environs of lakes, watercourses, estuaries, and wet areas, where transported surface and subsurface freshwaters provide soil moisture to support mesic vegetation.	
"Rip-rap" means rock or other suitable material placed to prevent or reduce erosion.	
"Road failure" means damage to the roadbed not permitting vehicular passage for hauling of forest products, but does not mean cut bank or fill sloughing incidental to road settling.	
"Road Management Plan" means a document submitted as part of a plan that describes the long-term management of a road system in one or more planning watersheds on timberlands. A RMP identifies, evaluates, and proposes approaches to avoid or mitigate significant environmental effects that could result from the construction, reconstruction, use, maintenance, abandonment, and management of roads related to forest resource management activities on timberlands.	

Defined word or phrase	*PRC Sec. Containing Ref. Def.*
"Road Management Unit" means the part or parts of timberland ownership(s) that are analyzed together as part of an RMP and may include areas of one or more timberland ownerships. A Road Management Unit shall be limited to one Forest District unless otherwise approved by the Director. The landowner has the option of including within the Road Management Unit the entire ownership(s) and any areas outside the ownership that the Director agrees are part of a logical Road Management Unit based upon regulatory and ecological factors.	
"Rolling dip" means a drainage facility that is constructed to remain effective while allowing passage of motor vehicles at reduced road speed.	
"Rules"	4525.5
"Sampling area" means the area delineated on a map accompanying a report of stocking showing the area sampled by one of the procedures specified in 14 CCR 10172.	
"Saturated soil conditions" means that site conditions are sufficiently wet that timber operations displace soils in yarding or mechanical site preparation areas or displace road and landing surface materials in amounts sufficient to cause a turbidity increase in drainage facilities that discharge into Class I, II, III, or IV waters, or in downstream Class I, II, III, or IV waters that is visible or would violate applicable water quality requirements. In yarding and site preparation areas, this condition may be evidenced by: a) reduced traction by equipment as indicated by spinning or churning of wheels or tracks in excess of normal performance, b) inadequate traction without blading wet soil, c) soil displacement in amounts that cause visible increase in turbidity of the downstream waters in a receiving Class I, II, III, or IV waters, or in amounts sufficient to cause a turbidity increase in drainage facilities that discharge into Class I, II, III, or IV waters, or d) creation of ruts greater than would be normal following a light rainfall. On logging roads and landing surfaces, this condition may be evidenced by a) reduced traction by equipment as indicated by spinning or churning of wheels or tracks in excess of normal performance, b) inadequate traction without blading wet soil, c) soil displacement in amounts that cause visible increase in turbidity of the downstream waters in receiving Class I, II, III, or IV waters, or in amounts sufficient to cause a turbidity increase in drainage facilities that discharge into Class I, II, III, or IV waters, d) pumping of road surface materials by traffic, or e) creation of ruts greater than would be created by traffic following normal road watering, which transports surface material to a drainage facility that discharges directly into a watercourse. Soils or road and landing surfaces that are hard frozen are excluded from this definition.	
"Scattered parcel" means a timberland ownership within a planning watershed is less that 10% of the area of the watershed and does not adjoin a planning watershed where the timberland ownership is greater than 20% of the watershed.	
"Screening trees" means those trees or snags identified and designated by the RPF or supervised designee in consultation with the Department of Fish and Game as necessary to protect nest trees of species of special concern from the impacts of human activities and natural elements.	
"Seasonal road" means a road which is planned and constructed as part of a permanent transportation facility where: (1) commercial hauling may be discontinued during the winter period, or (2) the landowner desired continuation of access for fire control, forest management activities, Christmas tree growing, or for occasional or incidental use for harvesting of minor forest products, or similar activities. These roads have a surface adequate for hauling of forest products in the non–winter periods, and in the extended dry periods or hard frozen conditions occurring during the winter period; and have drainage structures, if any, at watercourse crossings which will accommodate the fifty–year flood flow. Some maintenance usually is required.	
"Seed Tree" a thrifty vigorous tree of commercial species of seed bearing age, with full crown, and free from damage caused by timber operations and hazard abatement which would impair seed productivity.	
"Sensitive Species" means those species designated by the Board of Forestry pursuant to 14 CCR 898.2(d). These species are the Bald eagle, Golden eagle, Great blue heron, Great egret, Northern goshawk, Osprey, Peregrine falcon, California condor, Great gray owl, Northern Spotted Owl, and Marbled Murrelet.	
"Sidecast" means excess earthen material pushed or dumped to or over the side roads or landings.	
"Significant adverse impact on the environment" means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance. An economic or social change by itself shall not be considered a significant effect on the environment. A social or economic change related to a physical change may be considered in determining whether the physical change is significant.	
"Significant archaeological or historical site" means a specific location which may contain artifacts, or objects and where evidence clearly demonstrates a high probability that the site meets one or more of the following criteria: (a) Contains information needed to answer important scientific research questions. (b) Has a special and particular quality such as the oldest of its type or best available example of its type. (c) Is directly associated with a scientifically recognized important prehistoric or historic event or person. (d) Involves important research questions that historical research has shown can be answered only with archaeological methods. (e) Has significant cultural or religious importance to Native Americans as defined in 14 CCR § 895.1.	
"Silviculture" is the theory and practice of controlling the establishment, composition and growth of forests.	
"Silvicultural system" is the planned program of forest stand treatments during the life of a stand. It consists of a number of integrated steps conducted in logical sequence leading to maintaining a forest stand of distinctive form for the level of management intensity desired.	
"Silvicultural methods" in Public Resources Code section 4852(d) is referred to as "silvicultural systems" for purposes of these regulations.	
"Site classification"	4528(d)
"Site preparation" means any activity involving mechanical disturbance of soils or burning of vegetation which is performed during or after completion of timber harvesting and is associated with preparation of any portion of a logging area for artificial or natural regeneration.	
"Site preparation addendum" means an addendum to the THP which describes proposed site preparation areas, site preparation practices, and related measures.	
"Site preparation area" means any portion of a logging area in which site preparation is conducted.	
"Site survey area" means: the area where a field survey is conducted for archaeological and historical sites which includes the entire logging area except appurtenant roads and those portions of the 100 foot strip along such roads unless there are timber operations to remove commercial wood products that could affect an archaeological or historical site.	
"Skidding" (see "yarding" in this section).	
"Slash"	4525.7
"Slide areas" are areas indicated by the following characteristics: 1. Shallow–seated Landslide. An area where surface material (unconsolidated rock colluvium, and soil) has moved downslope along a relatively steep, shallow failure surface. The failure surface is generally greater than 65% in steepness and less than 5 feet in depth. It is usually characterized by: (1) a scarp at the top; (2) a concave scar below the scarp, where surface material has been removed; and sometimes (3) a convex area at the bottom where slide material is deposited. Vegetation is usually disturbed (tilted trees), anomalous (younger, even–aged stand), or absent (bare soil). Minor bank slumps are excluded from this definition. 2. Deep–seated Landslide. An area where landslide material has moved downslope either as a relatively cohesive mass (rotational slides and translational block slides) or as an irregular, hummocky mass (earthflow). The failure surface is generally deeper than five feet and is usually well–exposed at the head scarp. Complex failures with rotational movement at the head and translational movement or earthflows downslope are common. Vegetation on rotational and translational slides is relatively undisturbed, although trees and shrubs may be pistol–butted or tilted. Deep–seated landsides may have intermediate tension cracks, scraps, and shallow slides superimposed throughout the slide mass.	

Defined word or phrase	PRC Sec. Containing Ref. Def.
Deep–seated landslide risk is usually associated with cohesive soils.	
"Small Group" means groups of trees in areas up to 2 1/2 acres.	
"Snag" means a standing dead tree or standing section thereof, regardless of species.	
"Southern Subdistrict" of the Coast Forest District is comprised of the timberlands in the Counties of Santa Cruz, Santa Clara, San Mateo, San Francisco and Marin situated within the boundaries of the Coast Forest District.	
"Special Treatment Areas" are specific locations which contain one or more of the following significant resource features which may be at risk during timber operations.	
a. Within 200 feet of the watercourse transition line of federal or state designated wild and scenic rivers;
